v. a. To clink; to click; to make a sharp, sudden, abrupt noise. —To gabble; to chatter rapidly and emptily. In England, to erase the mark on a sheep, occasioning it to weigh less, and, hence, yield less duty; as, to clack wool.

v. i. [Fr. *cliquer*.] To click; to clink; to make a noise like that of a clock; to make a sharp, abrupt, monotonous sound.

To talk glibly and incessantly; to chatter continually.

Clackamas, in Oregon, a river rising in the W. ridge of the Cascade Range, and joining the Willamette.

A N.W. county, bounded W. by the Columbia River, N. by the Willamette River, and E. by the Cascade Range. Cap. Oregon City.

Clack-box, n. (Mach.) In locomotive engines, the box fitted on to the boiler where a ball-clack is placed, to close the orifice of the feed-pipe, and prevent steam or hot water reaching the pumps. The ball of the clack is raised from its seat by the stroke of the pump-plunger forcing the water against it, which water then passes into the boiler, while the instant fall of the ball prevents egress from the boiler.

Clack-dish, n. A dish with a movable lid for clacking, used by beggars in former times.

Clack-door, n. (Mach.) A square iron plate screwed on to the side of a bottom-pump, or small bore for convenience of changing the clack or valve.

Clack'er, n. He, or that which, clacks.

Clackman-naushire, a co. of Scotland, bounded S.E. by Fife, S. and S.W. by the river Forth, W. by Alva, and on every other side by Perthshire; area, 48 sq. m.; pop. 23,742.—CLACKMANNAN, cap. of the co., is 7 m. from Stirling, near the confluence of the Devon with the Forth; pop. 7,114.

Clacks, n. pl. (Mach.) In locomotive engines, the complete valves of the pumps where the ball-valve is enclosed in a frame or cage, to limit its rise, and guide its fall into the steam-tight seat of the orifice of the pipe.

Clack-seats, n. pl. (Mach.) Two recesses in each pump of a locomotive engine for the clacks to fit into.

Clack-valve, n. (Mach.) A flat valve in the cold-water pump of a steam-engine, with a hinge joint.

Clad, pp. [See CLOTHE.] Clothed; invested; covered, as with a garment.

“The courtiers were all most magnificently clad.”—Swift.

Cladinn, n. (Bot.) The Bog-rush, a genus of plants, order *Cyperaceæ*. They are generally unimportant herbs.

Cladonia, n. (Bot.) A gen. of Lichens. *C. rangiferina* is the Reindeer-moss, so termed from constituting the principal food of the reindeer. *C. pyxidata* is commonly termed Cup-moss; it has been employed as a remedy in whooping-cough.

Clagenfurth, [Ger. *Klagenfurt*.] a town of Austria, in Illyria, gov. Laybach, cap. duchy of Carinthia, on the Glan, in an extensive plain, 21 m. E. of Villach. Manf. Fine woollen and silk fabrics, white lead. Pop. 13,479.

Clai'borne, in Alabama, a twp., cap. of Monroe co., on the Alabama, abt. 209 m. S.W. of Montgomery.

Clai'borne, in Louisiana, a N. parish, bordering on Arkansas; area, 1,200 sq. m. It is bounded W. by the Danchite, or Dorchet River, and intersected by branches of the Bayou d'Arbonne. Surface, uneven; soil, fertile. Cap. Homer.

Clai'borne, in Mississippi, a W. county; area 740 sq. m. It is bounded W. by the Mississippi, separating it from La., N.W. by the Big Black River, and is traversed by the Bayou Pierre. The surface is undulating, and the soil fertile. Cap. Port Gibson.

A post-village of Jasper co., abt. 80. E.S.E. of Jackson.

Clai'borne, in Tennessee, a N.N.E. county, bordering on Virginia; area, about 350 sq. m. It is bounded S.E. by Clinch River, and drained by Powell's River. The surface is elevated, and the soil generally fertile. The co. contains zinc, lead, and an abundance of iron ore. Cap. Tazewell.

Clai'borne Bee, n. (Geol.) See TERTIARY PERIOD, § *Eocene*.

Claim, v. a. [O. Fr. *clamer*, from Lat. *clamo*, frequentative of O. L. *calo*, to call; allied to Gr. *kalō*, *kulonmai*, to Eng. *call*, and probably to Ger. *hell*.] To call upon; to call for; to challenge as a right; to demand as due; to require; to ask for; to maintain as a right.

“Poets have undoubted right to claim.”

If not the greatest, the most lasting name.”—Congreve.

v. i. To possess a claim; to be justly entitled to something; as, to claim one's rights.

n. A demand as of a right or supposed right; a demand for something due.

“I first return, and then disprove thy claim.”—Dryden.

A title to something in the possession of another; a right; a title; a pretension.

“The claims of long descent.”—Tennyson.

The thing claimed or demanded, as by right of settlement, or possession; as, a miner's claim.

Claimable, a. That may be claimed or demanded as due.

Claimant, n. One who claims anything as a due or right; as, a claimant to a throne.

—One who possesses a right of claim.

Claim'ess, n. A claimant; one who claims as due.

Claim'less, a. Without a claim; having no claim.

Clair'ac, a town of France, dep. Lot-et-Garonne, on the Lot, 16 m. N. W. of Agen; pop. 4,890.

Clair'ant, ALEXIS CLAUDE, (klair'-o), a French mathematician and astronomer, b. at Paris, 1713. He studied the higher mathematics at 10 years of age, at 13 wrote a memoir on curves, and at 16 produced one of his most remarkable works, the *Recherches sur les courbes à double courbure*. This was in 1729, and in 1731, although under age, he was received into the Academy of Sciences. He took part in the measurement of a degree of the meridian in Lapland, and made important discoveries respecting lunar motions and the motions of comets. D. 1765.

Clair'bourn, in Ohio, a township of Union county.

Claire, (St.) or SANTA CLARA, B. 1193, of a noble family of Assisi, in the duchy of Spoleto. Attracted by the eloquence and piety of St. Francis of Assisi, she abandoned the pleasures of social life, and betook herself to solitude, prayer, and mystic meditation; founded an order of nuns in 1213; d. at Assisi, Aug. 11, 1253, and was canonized by Alexander IV. in 1255. The nuns of the order of St. Claire at first observed the rule of St. Benedict, but in 1224 the austerity of this rule was mitigated by St. Francis, and again modified by Urban IV. in 1264. Those who followed the rule as modified by Urban, are called *Urbanists*; the other and austerer portion of the sisterhood, *Damianists*. The order rapidly increased; and convents are numerous at the present day in France, Belgium, Bavaria, Asia, and America. The nuns devote themselves chiefly to the education of the young.

Claire (St.) Deville, HENRI ETIENNE, a French chemist, b. 1818 at St. Thomas, W. Indies. He studied in France, and, in 1844, was intrusted with the organization of the Faculty of Science at Besançon. In 1851, he became professor of Chemistry in the Normal School of Paris, succeeded M. Dumas as professor in the Faculty of Sciences, in 1859, and was elected a member of that Academy in 1861. In 1853 he discovered a new method of mineral analysis, and he since made several important chemical discoveries. D. 1876.

Clair-obscure, n. [Fr. *clair-obscur*.] (Painting.) See CHIARO-OSCURO.

Clairon, CLAIRE JOSEPHINE DE LA TIDE, (klair'-awn), a distinguished French actress, b. 1723. She made her first appearance on the stage in her 12th year, and subsequently became the greatest tragic performer of her age and country, but lived a licentious life. D. 1803.

Clair, (St.), in America. See ST. CLAIR.

Clairvaux, (kler-rō'), a village of France, dep. Aube, on the Aube, 10 m. above Bar-sur-Aube. It is the site of the once famous Cistercian abbey (*Clara Vallis*) founded in 1114 by St. Bernard, who was buried in it. The abbey, at one time immensely rich, was suppressed at the revolution, and the extensive buildings are now used as a house of correction.

Clairvoyance, n. [Fr., from *clair*, clear, and *voir*, to see; clear-seeing.] See SOMNAMBULISM.

Clairvoyant, a. [Fr., from *clair*, clear, from Lat. *clarus*, and *voyant*, seeing.] Pertaining to the act of clairvoyance.

—*n.* One who sees, in a mesmeric state, objects not otherwise apparent to the senses.

Clall'lam, in Washington, a N.W. co., containing about 1,750 sq. m. The strait of Juan de Fuca forms its N., and the Pacific Ocean its W. boundary. It is intersected by the Dungeness and Ohallat rivers. Surface, mountainous. Cap. Port Angeles. Pop. (1897) 8,650.

Clall'ams, an Indian tribe, in Washington, near the strait of Juan de Fuca, N. of Columbia river.

Clam, v. a. [A.S. *clæmian*, from *gelimon*, to glue, or fasten together.] To clog or smear with glutinous or viscous matter; to lime; to glue.

“The sprigs were all daubed with lime, and the birds clammed and taken.”—L. E. Strange.

v. i. To stick to; to adhere; to attach by viscous agency.

Clam, n. (Zool.) Same as CHAMA, *q. v.*

(*Her.*) A term for an escallop or cockle-shell, supposed to indicate that the bearer had been a crusader, or had made long voyages by sea.

pl. (*Ship-building*.) A pair of strong pincers for extracting nails.

pl. (*Mech.*) A kind of wooden vice.

Clam, n. [An abridgment of *clamor*.] A final clashing of a set of bells all sounded discordantly together. (*n.*)

v. i. (*Campanology*.) To make a clam, or clamorous sound.

Clamant, a. [Lat. *clamans*, from *clamo*, to cry.] Crying aloud; beseeching.

Clam'ation, n. Act of crying out, as in supplication.

Clam'atores, n. pl. (Zool.) A sub-order of birds, ord. *Incessores*, comprising birds which have 3 toes before and 1 behind, and the latter not versatile; the primaries 10, the first nearly as long as the second; and the tail-feathers usually 12.

Clam'ber, v. i. [Ger. *klammern*, to clasp, to cling to; frequentative or intensive of *klemmen*, to jam, to press hard; allied to *clump* and *climb*.] To mount up by clutching or catching hold with the hands and feet, or with the claws; to climb with difficulty, or with hands and feet.—Often preceding *up*; as, to *clamber up* a wall.

“Clamber not you up to the casements then.”—Shaks.

Clam'miness, n. State of being clammy or viscous; viscosity; stickiness.

“A greasy pipkin will spoil the clamminess of the glue.”—Mozon.

Clam'my, a. [From *clam*.] Sticky; thick; viscous; adhesive; soft and sticky; glutinous; tenacious; as, a clammy hand.

Clam'o, in Wisconsin, a twp. of Green co.

Clam'or, Clam'on'r, n. [Lat. *clamor*, from *clamo*, to call or cry out. See CLAIM.] A loud call, shout, or cry; continued vociferation; outcry.

“The people thou grew exorbitant in their clamours for justice.”—King Charles I.

Loud and continued noise and complaint; noise; uproar.

“Immortal Jove's dread clamours counterfeit.”—Shaks.

v. a. To approach or greet with noise or uproar; as, “Clamouring their God with praise.”—Milton.

—To confound, deafen, or stun with noise.

(*Campanology*.) To produce a loud clang by multiplicity of strokes; as, to *clamor* bells.

v. i. To call or cry out loud; to talk loud; to utter in a loud voice repeatedly; to vociferate; to make importunate demands; as, to *clamor* for justice.

“The obscure bird clamour'd the live-long night.”—Shaks.

Clam'orer, n. He who, or that which, clamors.

Clam'orous, a. Full of clamor; speaking and repeating loud words; noisy; vociferous; turbulent; boisterous; as, a clamorous mob.

“He kiss'd her lips with such a clamorous smack.”—Shaks.

Clam'orously, adv. With loud noise or words.

Clam'orouslyness, n. State or quality of being clamorous.

Clamp, n. [A.S. *clam*, a baudage, what holds or retains; Du. *klamp*; Ger. *klammer*, *klemmen*, to pinch, to squeeze; W. *clymu*, to tie. See CLAM.] Something that stiffens, fastens, binds, or strengthens; a piece of timber or iron used to strengthen anything, or to fasten work together.

(*Brick-making*.) A kiln built above the ground, for the purpose of burning bricks in.—A mass of bricks piled up for kiln-burning.

(*Metal*.) A quantity of ore set apart for fusion.

(*Carpentry*.) A piece of wood fixed to the end of a board by mortise and tenon, or by groove and tongue, so that the fibres of the one piece, thus fixed, traverse those of the board, and by this means prevent it from casting; the piece at the end is called a *clamp*, and the board is said to be clamped.

(*Ship-building*.) A thick plank placed in a ship's side to support the ends of the beams.

(*Mech.*) A movable piece of lead to cover the jaws of a vice.

—A heavy footfall; a tramp; a clumsy tread.

v. a. To fasten or strengthen with clamps; as, to *clamp* a board.

v. i. To tread with a heavy, clumsy step.

Clamp'er, n. An iron apparatus with sharp prongs, affixed to the heel or sole of a boot, to enable the wearer to get a firm foothold upon ice.

Clamping, n. (*Joinery.*) The operation of fitting a board with the grain to the end of another board across the grain.

Clamp-nails, n. pl. (*Ship-building.*) Nails used to fasten on clamps.

Clamps, n. pl. (*Ship-building.*) Thick planks placed in a ship's side, to sustain the ends of the beams.

Clan, n. [*Ir. cland*; *Gael. clann, clainne*, offspring, a family, children.] In Scotland, a tribe or collection of families united under a chieftain, whose rule is hereditary. The clans of the Scottish Highlands are tribes consisting of many families, all bearing the same surname, which according to tradition descends from a common ancestor. But it is more probable that most *C.* were formed of an aggregate of different families, the inferior standing to the superior in the same sort of relation as the Roman clients to their patrons, and by degrees assuming the same name. Some *C.*, however, are divided into branches, each possessing a distinct surname. The chieftainship of every *C.* descends regularly through heirs male; but in the earlier times of their history the rights of primogeniture were not very distinctly defined. The Gaelic *C.* occupy the N. and W. with part of the central shires of the country.

—A clique; a sect; a particular body of persons identified by some common interest or understanding. (Generally used in a depreciatory sense.)

"Partridge and the rest of his clan may hoot me for a cheat, if I fail in any particular." — *Swift*.

Clandestine, a. [*Lat. clandestinus*, from *clam*, hidden, secretly; allied to *celo, celatum*, to hide.] Private; underhand; done secretly, and wrongfully or unlawfully; as, a clandestine amour.

Clandestinely, adv. Secretly; privately.

Clandestineness, n. State of secrecy or concealment.

Clandestin'ity, n. Secrecy; concealment. (*R.*)

Clang, v. a. [*Lat. clangō*; *Gr. klazō*, to make a sharp, piercing sound; formed in imitation of a loud, clear, shrill sound, and radically the same with *clank, clink*.] To cause to emit a shrill sound, as by striking metallic substances.

"The fierce Curetes . . . clang'd their sounding arms." — *Prior*.

—*v. i.* To emit a sharp noise, or shrill sound.

"Have I not heard loud 'larums . . . and trumpets clang?" — *Shaks*.

—*n.* [*Lat. clangor*; *Gr. klan-gē*, any sharp sound.] A sharp, shrill sound, made by striking or clashing together metallic or sonorous bodies, or any like sound; as, the clang of arms.

Clan'gor, Clan'gour, n. [*Lat. clangor*.] A clang; a sharp, shrill, harsh, clashing sound.

"And hear the trumpets' clangour pierce the sky." — *Dryden*.

Clan'gorous, a. Sharp or harsh in sound; with clangor.

Clan'gous, a. [*O. Fr. clangeux*.] Making a changing sound; as, "birds of harsh and clangous throats." — *Brown*.

Clank, (klank,) n. [*Lat. clangor*. See *CLANG*.] The loud, shrill, sharp sound made by the collision of metallic or other sonorous bodies.

"The melodious clank of marrow-bone and cleaver." — *Spectator*.

—*v. a.* To occasion a sharp, shrill, clanging sound; to strike with a sharp sound; as, to *clank* chains together.

—*v. i.* To clang; to make a ringing sound, as by collision of metallic bodies.

Clan'nish, a. Closely united, like a clan; disposed to adhere closely, as the members of a clan; as, a *clannish* state of society.

Clan'nishly, adv. In a clannish manner.

Clan'nishness, n. Close adherence, or disposition to unite and amalgamate as a clan.

Clanship, n. A state of union, as in a family or clan; an association under the sway of a chieftain.

Clans'man, n.; pl. CLANSMEN. One who is a member of a certain clan.

"And Evan's, Donald's fame rings in each clansman's ears." — *Byron*.

Clanwill'iam, n. A town of Cape Colony, S. Africa, cap. of a district of same name, about 140 m. from Cape Town: *pop.* 3,000.

Clap, v. a. (imp. and pp. CLAPPED, or CLAPT.) [*A. S. clapan; Du. klappen, kloppen; Ger. klappern, klopfen*; formed from the sound.] To strike together with a quick motion, so as to make a noise.

"Glad of a quarrel, straight I clap the door,
Sir, let me see your works, and you no more." — *Pope*.

—To thrust to; to drive together; to shut hastily; to strike against, or bring into contact suddenly.

"His friends would have clapp'd him into bedlam." — *Spectator*.

—To applaud by striking the hands together; to manifest approbation by patting of the hands; as, to *clap* a popular speech or performance.

—To infect with a venereal disorder.

"Who'd force his pepper where his guests are clapt?" — *King*.

To *clap up*, to complete suddenly without due precaution.

"Was ever match clapt up so suddenly?" — *Shaks*.

—*v. i.* To move or drive together suddenly with noise.

"The doors around me clapt." — *Dryden*.

—To enter upon with briskness and alacrity.

"Come, a song. Shall we clap into 't roundly?" — *Shaks*.

—To strike the hands together by way of applause.

"All the best men are ours . . . when the ladies hid 'em clap." — *Shaks*.

—*n.* A noise made by sudden collision.

"Give the door such a clap . . . as will shake the room." — *Swift*.

—A burst of sound; a violent concussive noise; an explosion; as, a *clap* of thunder.

—A thrust; sudden or unexpected act or motion.

"What, fifty of my followers at a clap!" — *Shaks*.

—Act of applause; a striking together of hands to express approbation; as, "unexpected *claps* or hisses." — *Addison*.

[*O. Fr. clapoire*.] (*Med.*) Gonorrhoea impura.

(*Falconry.*) The nether part of the beak of a hawk.

Clapboard, (klap'board,) n. A thin board or stave for making casks. — In the U. States, a strip of board or scantling used for the roofs and sides of log or frame houses, &c.

—*v. a.* To cover with clapboards. (Used in the U. States.)

Clap-bread, Clap-cake. In some parts of England, a thin oaten cake baked hard on a girdle.

Clap-dish, n. Same as *CLACK-DISH, q. v.*

Clap-net, n. A net or seine used for catching birds, and made to clap together suddenly.

Clap'per, n. One who applauds by clapping of hands. — The tongue of a bell, or of a mill-hopper.

"A heart as sound as a bell, and his tongue is the clapper." — *Shaks*.

Clap'per-claw, v. a. [*clap* and *claw*.] To scratch; to maul with one's fingers.

"They are clapper-clawing one another. I'll look on." — *Shaks*.

—To scold; to brow-beat; to abuse with the tongue.

"They've always been . . . at one another clapper-clawing." — *Hudibras*.

Clap'perton, HUGH, an African traveller, b. in Scotland, 1788. In 1822 he accompanied Lieutenant Denham and Dr. Oudney on an expedition to Central Africa, and on his return received a captaincy. In this enterprise he and Denham determined the positions of Bournou, Houssa, and Mandara; Oudney had died at an early stage of the journey, in 1824. The principal object of the expedition had been to ascertain the course and the termination of the Niger; but, as they were unsuccessful, he was dispatched again, in 1825, on the same journey. He and his party landed, in the month of November, in the Bight of Benin; but they were all more or less attacked with a sickness which proved fatal to several of them. He had proceeded to Chungary, a village four miles from Socottra, when he was seized with dysentery, which carried him off. D. 1827.

Clapp'ville, n. in Massachusetts, a post-village of Worcester co.

Clap'ton, n. a village of Middlesex, England, and a suburb of London.

Clap-trap, n. A trap for clapping in theatres; hence, a trick or device to gain applause.

—*a.* Ensnaring; deceitful; artful; simulated; counterfeit; as, a *clap-trap* speech.

Claque'to, n. in Washington, a post-village, cap. of Lewis county, on Newaukum river, 35 miles S. by W. of Olympia.

Claque (kläk), n. [*Fr.* from *claquer*, to clap the hands.]

The name given to the means by which public performances are secured a favorable reception. In Paris, one M. Santon established, in 1820, an office for the assurance of dramatic success, and was thus the originator of the so-called Parisian claque. Sometimes, when the success of a piece is very doubtful, as many as from 300 to 500 *claqueurs* are sent to applaud it. They are even frequently instructed in the details of the piece, and shown beforehand what parts they are to applaud. They have also particular parts assigned to them; the laughers (*rieurs*) must laugh at every joke, the weepers (*pleureurs*) weep at all the moving passages, the *chatouillers* seek to keep their neighbors in good humor, while the *bisiteurs* eulogize particular parts of the performance.

Clara, n. in Pennsylvania, a post-township of Potter co., 7 m. N.W. of Caudersport.

Clara Vill'a, n. a town of Cuba, 45 m. N.W. of Trinidad, in a sugar district; *pop.* about 6,132.

Clare, (ORDER OF ST.) See *CLAIRE, ST.*

Clare, n. in Ireland, a maritime co., province of Munster. It is separated by the river Shannon from the county of Limerick on the S.E.: the Atlantic Ocean bounds it on the W., the Bay of Galway on the N., and a portion of the counties of Galway and Tipperary on the E. Area, 1,294 square miles. The surface is mountainous, and the soil light, but very fertile, producing potatoes, oats, and barley. Cap. Ennis. It is watered by the Fergus and its affluents.

Clare, or CLARE CASTLE, n. a town in the above co., on the Fergus, 2 m. S. of Ennis; *pop.* about 925.

Clare, or CLARA, n. an island off the W. coast of Ireland, at the entrance of Clew Bay, belonging to the county Mayo. It is abt. 4½ m. long, and 2 m. broad.

Clare, n. in Michigan, a N. central co.; area, 650 sq. m.; the co. is traversed by the Maskegon River, and the surface is heavily timbered; cap. Farwell.

Clare, n. in New York, a township of St. Lawrence co.

Clare Gal'way, n. a parish of Ireland, co. Galway, 6 m. from Galway; *pop.* 2,800.

Clare'mont, n. in England, a mansion at Esher, county Surrey, inhabited by the ex-king Louis Philippe, of France, after the Revolution of Feb. 1848, till his death, 1850. It became the property of the Queen in 1882.

Clare'mont, n. in Illinois, a post-village of Richland co., 123 m. E. of St. Louis.

Claremont, n. in Minnesota, a post-village and township of Dodge co., abt. 27 m. W. of Rochester, on a branch of Zumbro River.

Claremont, n. in New Hampshire, a flourishing post-village and township of Sullivan co., on the Connecticut River, abt. 48 m. W. by N. of Concord.

Claremont, n. in South Carolina, a post-office of Sumter county.

Clare'mont, n. in Virginia, a P. O. of Surrey county.

Clarence, n. A kind of closed four-wheeled carriage.

Clarence, n. in Iowa, a post-village of Cedar co., 35 m. E. S. E. of Cedar Rapids.

Clarence, n. in Michigan, a post-township of Clare co., about 12 m. N. E. of Marshall.

Clarence, n. in Missouri, a post-village of Shelby co., 59 m. W. of Hannibal.

Clarence, n. in New York, a post-township of Erie co., 16 m. N. E. of Buffalo.

Clarence, n. in Wisconsin, a village of Green co., on Sugar river, about 37 m. S. of Madison.

Clarence, n. in New York, a P. O. of Erie county.

Clarence Harbor, or PORT, n. in Alaska, on the E. side of Behring Strait, 45 m. S.E. of Cape Prince of Wales.

Clarence Island, n. in South America, W. of Terra del Fuego. Lat. 54° 10' S., Lon. 71° 20' W. It is abt. 52 m. long from E. to W., and 23 wide.

Clarence Island, n. in the Pacific, N. of Navigator Island, Lat. 8° 10' S., Lon. 172° 10' W.

Clarence Lake, or GREAT LAKE, n. in Van Diemen's Land, and in Norfolk Plains, abt. 9 m. long, and 4 wide.

Clarence River, n. in E. Australia, enters the Pacific Ocean at Shoal Bay, Lat. 29° 20' S.

Clarence Strait, n. in Alaska, between Duke of York Island and Prince of Wales Archipelago.

Clarence Strait, n. in Australia, N.W. coast. It is the channel separating Melville Island from the coast. It is abt. 12 m. wide, and full of small islets and rocks.

Clarenceux, n. (Her.) In England, the second king at arms. This name was first given to a herald of the Duke of Clarence, during the reign of Edward III., 1327-1377.

Clarendon, EDWARD HYDE, EARL OF, Lord High Chancellor of England, b. at Dinton in Wiltshire, 1608. During the civil wars he zealously attached himself to the royal cause, was made successively Chancellor of the Exchequer and privy councillor, and was the chief adviser of the king. After the failure of the royalist arm he took refuge in Jersey, and then joined Prince Charles in Holland. *C.* contributed to the Restoration, accompanied Charles II. to London, and was made lord chancellor. In his judicial capacity his conduct was irreproachable, and he was the defender of his country's freedom against the abuses of the royal power. But he at length became unpopular, was removed from his high employments, and banished by act of parliament. His *History of the Rebellion*, although considered by some as a partial inaccurate, and untrustworthy narrative, is one of the most remarkable works in the literature of his time.

His daughter Anne was married to the Duke of York afterwards James II., and 2 daughters, Anne and Mary the fruit of this marriage, both ascended the English throne. D. at Rouen, 1674.

Clarendon, GEORGE WILLIAM FREDERICK VILLIERS, 4th EARL OF, b. 1800. He was Minister Plenipotentiary to the court of Madrid from 1833 to 1839. In 1847 he became Lord-Lieutenant of Ireland, which post he held until 1852. He was appointed secretary for foreign affairs in 1853, which office he held till the retirement of Lord Palmerston in 1859. In 1864 he joined Lord Palmerston's 2d government, retiring with his colleagues June, 1866; and, in 1868, on the accession of the Gladstone ministry to power, he was again appointed Foreign Secretary. Lord *C.*, who was descended from the brothers of Villiers, the favorite of James I., and maternally from Lord Clarendon (see above), was brother of Charles Peham Villiers, the advocate of Free-Trade. D. 1870.

Clarendon, n. in Arkansas, a town, the cap. of Monroe co., 60 m. E. of Little Rock. *Pop.* (1897) about 1,500.

Clarendon, n. CONSTITUTIONS OR STATUTES OF. See *CLARENDON PARK*, also *ALDERBURY*.

Clarendon, n. in Mich., a twp. in S.E. of Calhoun co.

Clarendon, n. in N. Y., a p.-v. and twp. of Orleans co.

Clarendon, n. in S. Carolina, an E. central district; area about 700 sq. m. The Santee River bounds it on the and W., and it is drained by Black River and Lynch Creek. Surface, nearly even; soil, moderately fertile. Cap. Manning.

Clarendon, n. in Vermont, a post-village and township of Rutland co., on Otter Creek, 55 m. S.W. by S. of Montpelier.

Clarendon, n. (Typography.) Types with a somewhat bolder and heavier face than common fonts; viz.

This line is set in Clarendon.

Clarendon Park, n. a royal forest of England, in Wiltshire, 3 m. from Salisbury; area, 4,1 acres. In this park there are still to be seen the vestiges of a hunting-seat, or royal palace, in which Henry II., with his council, enacted, in 1164, the "Constitution of Clarendon," designed to check the power and privileges of the clergy. The earldom belongs now to the Villiers family.

Clarendon Springs, n. in Vermont, a post-office of Rutland co.

Clarens, n. a village of Switzerland, on the Lake of Geneva. It commands a fine view on the lake, and is immortalized by the writings of Rousseau.

Clare'-obscure, n. (Painting.) See *CHIARO-OSCUR*.

Claret, n. See *BORDEAUX, (WINE OF.)*

Claxibella, n. (Mus.) A stop, or set of pipes in an organ.

Clar'icord, n. [From *Lat. clarus*, clear, and *chord* string.] (*Mus.*) An ancient musical instrument resembling a spinet.

Clar'idon, n. in Ohio, a post-twp. of Geauga co.

—A township of Marion co.

Clarification, n. [*Lat. clarificatio*. See *CLARIFY*.] Act of clearing or fining liquid substances by chemical means.

lar'ifier, *n.* That which clarifies or purifies.

A vessel used for clarifying, as in sugar-works.

lar'ify, *v. a.* [Fr. *clarifier*, from Lat. *clarifico*—*clarus*, clear, and *facio*, to make.] To make clear; to purify from feculent matter; to defecate: to fine; as, to *clarify* sugar.

To brighten: to illuminate. (*B.*)

"To *clarify* his reason, and to rectify his will."—*South.*

v. i. To grow clear or bright: to grow or become clear, pure, or fine, as a liquor. To grow bright: to clear up.

larin'da, in *Iowa*, a fine city, capital of Page county, 65 m. S. E. of Omaha, Neb. Here is the State Insane Asylum. *Pop.* (1897) abt. 4,000.

lar'inet, **Clar'ionet**, *n.* [Fr. *clariette*, dim. of *clarion*.] (*Mus.*) A wooden musical wind-instrument, whose mouth partakes of the trumpet form, and which is played by holes and keys; said to have been invented

Fig. 611. — CLARINET.

about the year 1600 by John Christopher Denner of Leipsic. Like the oboe, it is played with a reed mouth-piece, though it is of a somewhat different form.

lar'ington, in *Ohio*, a post-village of Monroe co., 135 n. E. of Columbus, on the Ohio River.

ar'ington, in *Pennsylvania*, a P. O. of Forest co.

ar'ion, *v.* [Fr. *clarion*, from *clair*; Lat. *clarus*, clear, shrill. (*Mus.*) A kind of trumpet whose tube is narrower than that of the common trumpet, and its tone more acute and shrill.

ar'ion, in *Illinois*, a township of Bureau co., abt. 59 n. N.E. of Princeton.

A post-vill. of Grundy co., 140 m. N.N.E. of Springfield.

ar'ion, in *Pennsylvania*, a N.W. county; area, 600 sq. m. It is bounded on the S.W. by the Alleghany River, and on the S. by Red Bank Creek. *Surface*, hilly; *soil*, fertile. Iron, bituminous coal, and limestone are found here. *Cap.* Clarion.

A twp. and borough, cap. of the above co., on Clarion River, abt. 75 m. N.E. of Pittsburg.

ar'ion, or CLOUD'S ISLAND, in the N. Pacific, off the N. coast of Mexico; Lat. 18° 20' N., Lon. 114° 50' W.

ar'ionet, *n.* (*Mus.*) See CLARINET.

ar'ion River, (or TOBT'S RIVER,) in *Pennsylvania*, rises in McKean co., and flowing S.W. falls into the Alleghany in Clarion co.

ark, ABRAHAM, one of the signers of the Declaration of Independence, b. at Elizabethtown, N. J., 1726; d. 1794.

ark, SIR JAMES, first physician to Queen Victoria, b. in Banffshire, 1788. He is the author of works on climate, and on consumption. D. 1870.

ark, WILLIAM, an American general and explorer, b. in Va., 1770, and emigrated to Kentucky in 1784. In 803 the U. States govt. organized an expedition to explore the vast region acquired by their recent purchase of Louisiana; and President Jefferson offered C. the rank of captain of engineers, and the joint command of the army, with Capt. Meriwether Lewis. The expedition left St. Louis in March, 1804; ascended the Missouri to its source; crossed the Rocky Mountains; struck one of the upper branches of the Columbia; and descended that river to the Pacific Ocean. They returned in the autumn of 1806, having performed the most extensive and important exploration ever undertaken by the American govt. C.'s journal was published in 1814. C. was afterwards made superintendent of Indian Affairs, and d. in 1838.

ark, in *Indiana*, a township of Johnson co.; *pop.* 474.

A township of Montgomery co.

A township of Perry co.

ark, in *Iowa*, a township of Tama co.

ark, in *Ohio*, an E. township of Browne co.; *pop.* 691.

A S. township of Clinton co.

ark, in *Wisconsin*, a N.W. central county; area, 1,548 sq. m. It is intersected by the Black River, and drained by Eau Claire and Little Eau Plaine rivers. *Surface*, regular; *soil*, fertile. *Cap.* Neilsville.

ark, or CLARK'S CITY, in *Michigan*, a village of Monroe co., 28 m. S.W. of Detroit, on Swan Creek.

Clarke, ADAM, b. in Ireland, 1762. At the early age of 16, he became a travelling preacher in the Wesleyan Methodist connection, and for 20 years continued to be such. But, though he was very popular as a preacher, it chiefly as a writer that he demands notice here. He published a very useful *Bibliographical Dictionary*; a supplement to that work; a most laborious *Commentary on the Bible*; a *Narrative of the last illness and death of Richard Porson*; *Memoirs of the Wesley Family*; and several other religious works. D. of the cholera, 32.

Clarke, EDWARD DANIEL, an English traveller and mineralogist, b. 1769. A complete edition of his works has been printed in 11 vols. D. 1822.

Clarke, ELIJAH, an American general, b. in N. Carolina. He distinguished himself in engagements with Indians on the frontiers of Georgia, was made brigadier-general, defeated the British at Musgrave's Hill and Blackstocks, and contributed greatly to the capture of Augusta, in 1800. He was accused, in 1794, of a design to establish independent government in the Indian Creek nation, and is said to have finally held a commission in the British service. D. 1800.

Clarke, HENRI JACQUES GUILLAUME. See FELTRE, (DUKE OF)

Clarke, MARY VICTORIA COWDEN, an English authoress, b. 1809. Her *Concordance of Shakspeare*, published in 1845, has obtained, deservedly, a great success. She is also the author of some novels.

Clarke, SAMUEL, an English theologian and natural philosopher, b. in Norwich, 1675. He became chaplain to the bishop of Norwich, and in 1699 published *Three Practical Essays on Baptism, Confirmation, and Repentance*. By this work he established his reputation as an able writer; and he now entered the lists as a controversialist, by publishing *Reflections* on a book by Toland, entitled "Amyntor." In 1704-5 he was appointed Boyle Lecturer, and took for the subjects of his sixteen sermons, *The Being and Attributes of God*, and *The Evidences of Natural and Revealed Religion*. In 1712 he published a valuable edition of *Cesar's Commentaries*, and his celebrated work *The Scripture Doctrine of the Trinity*. This work involved him in a controversy, in which his principal opponent was Dr. Waterland; and the heterodoxy of Dr. Clarke was made the subject of a complaint in the lower house of Convocation. Subsequently, he had a controversy with Leibnitz on the principles of religion and natural philosophy. Although his alleged heterodoxy had deprived him of all chance of rising in the Church, he had so just a sense of what was due to his profession, that when offered the mastership of the mint, on the death of Sir Isaac Newton, he declined it as incompatible with the clerical office and character. The latter part of his life was distinguished by his letter to Hoadley, *On the Proportion of Velocity and Force in Bodies in Motion*, and his edition of *Homers Iliad*, with a Latin version. After his death, his sermons, in 10 vols., were published by his son. D. 1729.

Clarke, in *Alabama*, a S.W. co., area, 1,270 sq. m. It is bounded on the W. by the Tombigbee, and on the S.E. by the Alabama River. The surface is hilly; the soil is partly fertile. *Cap.* Grove Hill. *Pop.* (1890) 22,624.

Clarke, in *Arkansas*, a S.W. central co., area, 941 sq. m. The Washita forms its E. boundary, and the Little Missouri the S.E. The surface is hilly, and soil sandy but productive. *Cap.* Arkadelphia.

Clarke, in *Georgia*, a N.E. central co., area, 280 sq. m. It is bounded on the W. by the Appalachee, and watered by the Oconee and its branches and the Cedar, Shoal, and Sandy creeks. The surface is irregular; the soil in the valleys, fertile. *Cap.* Athens. *Pop.* (1890) 15,186.

Clarke, in *Illinois*, an E. co., bordering on Indiana, area, 469 sq. m. The Wabash river bounds it on the S.E. It is traversed on the N. fork of the Embarras River, and Fox and Crane creeks. The surface is varied with forests and prairies; the soil is fertile. Stone-coal is found near the Wabash river. *Cap.* Marshall. *Pop.* (1890) 21,899. Generally spelled CLARK.

Clarke, in *Indiana*, a S. co., bordering on Kentucky, area, 400 sq. m. It is bounded on the S.E. by the Ohio River, and cut by Silver Creek. The surface is generally even; the soil good and well cultivated. Iron-ore, marble, limestone, and hydraulic cement are found. *Cap.* Charleston.

Clarke, in *Iowa*, a S. county, area 432 sq. m. Several branches of the Whitebreast and South rivers rise in this county; and the E. fork of Grand River traverses through it. The surface is nearly level, and the soil fertile. *Cap.* Osceola.

Clarke, in *Kentucky*, an E. central co., area 210 sq. m. The Kentucky and Red rivers form its entire S. boundary, and it is intersected by Stoner's and Howard creeks. The surface is irregular; the soil in some parts very productive. *Cap.* Winchester.

Clarke, in *Missouri*, a N.E. co., area 516 sq. m. It is separated from Illinois by the Mississippi, and from Iowa by the Des Moines, which forms its N.E. boundary; it is also traversed by the Wyaconda and Fox rivers, the surface is even; consists of rich prairie-land. *Cap.* Kahoka. *Pop.* (1890) 15,126. Also spelled CLARK.

Clarke, in *Mississippi*, an E.S.E. co.; area, abt. 654 sq. m. It is traversed by the Chickasawha, a branch of the Pascagoula. The surface is nearly level. *Cap.* Quitman. *Pop.* 1890) 15,826.

Clarke, in *Ohio*, a S.W. central co.; area, 380 sq. m. It is traversed by Mad River, and drained by the sources of the Little Miami, and by Lagonda Creek. The surface is undulating, and the soil very fertile. *Cap.* Springfield. *Pop.* (1890) 52,277. Also spelled CLARK.

Clarke, or CLARK, in *Ohio*, a township of Coshocton co.

Clarke, in *Virginia*, a N.E. co.; area, 205 sq. m. It is intersected by the Shenandoah River. C. is part of the great valley of Virginia which stretches out from the N.W. range of the Blue Ridge. The surface is undulating, and the soil, overlying blue limestone, is very fertile. *Cap.* Berryville.

Clarke, in *Washington*, a South West co.; area, about 1,400 sq. m. The Columbia River which separates it from Oregon, forms its S. and S.W. boundary; and the Cathlapootle River and other streams drain the county. The surface is irregular, and the soil fertile. *Cap.* Vancouver.

Clarke's Point, a peninsula S.W. of New Bedford Bay. At its extremity is a fixed light, 32 ft. above the sea. Lat. 41° 35' 30" N., Lon. 70° 54' 12" W.

Clarke's River, or FLATHEAD RIVER, in *Washington*, the River rises in the Rocky Mountains, in about 45° 30' N. Lat. It takes a N. course of about 200 m., then flows N.W. and enters the Columbia in Lat. abt. 48° 50' N., and Lon. 117° 45' W. The Blackfoot and the Riviere à Jacques, are its principal affluents. Its length is abt. 650 m.

Clarke'sville, in *Georgia*, a post-village, capital of Habersham co., 133 m. N. of Milledgeville. The Blue

Ridge and other mountains in the vicinity make it a pleasant summer resort.

Clark'ia, *n.* [Named in honor of Gen. Clark.] (*Bot.*) A genus of plants, ord. *Onagraceae*. The beautiful *Clarkia pulchella*, found in Oregon and California, is a handsome annual garden-plant, with lilac-purple or white axillary flowers.

Clark's, in *Ohio*, a post-office of Coshocton co.

Clarks'borough, in *New Jersey*, a post-village of Gloucester co., 5 m. S.W. of Woodbury.

Clark's Bridge, in *New York*, a village of Erie co., 8 m. E. by N. of Buffalo.

Clarks'burg, in *Indiana*, a village of Daviess co., 16 m. N.E. of Washington, the county-seat.

—A post-village of Decatur co., 50 m. N. of Madison.

—A village of Johnson co., 18 m. S.E. of Indianapolis.

Clarks'burg, in *Kentucky*, a village, cap. of Lewis co., 4 m. from the Ohio River, and 90 E.N.E. of Frankfort.

Clarks'burg, in *Maryland*, a township of Montgomery co., 60 m. W.N.W. of Annapolis.

Clarks'burg, in *Massachusetts*, a township of Berkshire co., 105 m. N.W. by W. of Boston.

Clarks'burg, in *New Jersey*, a post-village of Monmouth co., 20 m. E. of Trenton.

Clarks'burg, in *New York*, a post-office of Erie co., 200 m. W. of Albany.

Clarks'burg, in *Pennsylvania*, a post-village of Indiana co., 170 m. W. of Harrisburg.

Clarks'burg, in *Ohio*, a village of Belmont co., about 30 m. W. of Wheeling.

—A village of Clarke co., 48 m. W. of Columbus.

—A post-village of Ross co., abt. 18 m. N.W. of Chillicothe.

Clarks'burg, in *Virginia*, a thriving town, capital of Harrison co., 82 m. E. of Parkersburg. Coal is here abundant and largely mined. *Pop.* (1897) abt. 4,000.

Clarksburgh, in *Missouri*, a P.O. of Moniteau co.

Clark's Corners, in *Ohio*, a village of Ashtabula co., 165 m. N.E. of Columbus.

Clark's Corners, in *Pennsylvania*, a village of Luzerne co.

Clark's Creek, in *Pennsylvania*, Dauphin co., flows into the Susquehanna River, abt. 10 m. N. of Harrisburg.

Clark's Creek, in *N. Carolina*, a post-office of Montgomery co.

Clark's Factory, in *New York*, a P.O. of Delaware co.

Clarks'field, in *Ohio*, a post-township of Huron county.

Clark's Green, in *Pennsylvania*, a post-office of Lackawanna co.

Clark's Grove, in *Minnesota*, a post-village of Freeborn co., 40 m. S. of Faribault.

Clark's Island, in Banks's Strait, the most S. of the Furneaux islands, off the N.E. side of Van Diemen's Land. The S. end of the island is in abt. Lat. 40° 34' S., —In the N. Pacific Ocean. Lat. 27° 48' N., Lon. 176° W.

Clark's Sir George Isle, in the Arctic Ocean, 10 m. off the coast of British N. America, in Lat. 69° 20' N., Lon. 118° 40' W.

Clark's Mills, in *New York*, a flourishing village of Oneida co., about 12 m. S.W. of New York, on Oriskany Creek.

Clark's Mills, in *Wisconsin*, a post-village of Manitowish co. It is a manufacturing village.

Clark's Mills, in Canada, a village, county of Addington, 21 miles W. of Kingston, on the Napanee River.

Clark'sou, in *New York*, a post-township of Monroe county, 16 miles N.W. of Rochester, on Lake Ontario.

Clark'sou, THOMAS, an English philanthropist, whose whole life may almost be said to have passed in laboring to effect the extinction of the slave-trade. B. 1760, at Wisbeach in Cambridgeshire; d. in 1846.

Clark'sou, in *Ohio*, a post-village of Columbiana co., about 165 m. N.E. of Columbus.

Clark'sou Centre, in *New York*, a village of Monroe co., 215 m. W. by N. of Albany.

Clark's River, in *Kentucky*, rises near the S. part of the State, flows N. and N.W., and enters the Ohio at Paducah, near the mouth of the Tennessee.

—In *Washington*. See CLARKE'S RIVER.

Clark's Run, in *California*, a small stream of Yuba co., enters Yuba River, about 20 m. above Marysville.

Clarks ton, in *Michigan*, a post-village of Independence township, Oakland co., 36 m. N.W. of Detroit, on Kearsley Creek.

Clarks'town, in *New York*, a post-township of Rockland county, 122 miles below Albany, on the bank of the Hudson River.

Clarks'ville, in *Alabama*, a post-village, cap. of Clarke co., 134 m. S. by W. of Tuscaloosa.

Clarks'ville, in *Arkansas*, a post-village, cap. of Johnson co., about 100 m. N.W. of Little Rock, on Spadra Creek.

Clarks'ville, in *California*, a post-village of El Dorado co., 18 m. W. by E. of Placerville.

Clarks'ville, in *Indiana*, a town of Clarke co., on the Ohio River, about 4 m. above New Albany. *Pop.* in 1897 about 1,800.

Clarks'ville, in *Iowa*, a post-village of Butler co., 24 m. N.W. of Cedar Falls, and 12 W.N.W. of Waverley, on Shell Rock river.

—A village of Monroe co., 94 m. S.W. of Iowa City.

Clarks'ville, in *Minnesota*, a village of Le Sueur co.; opp. site Henderson, on Minnesota River.

Clarks'ville, in *Missouri*, a town of Pike co., about 100 m. above St. Louis. *Pop.* (1897) abt. 1,400.

Clarks'ville, in *New Hampshire*, a post-township of Coos co., on the Connecticut River, 120 m. N. of Concord.

Clarksville, in *New Jersey*, a village of Hunterdon co., 14 m. N. of Flemington.

Clarksville, in *New York*, a vill. of Albany co.

—A township of Alleghany co., 67 m. E.S.E. of Buffalo; pop. 784.

—A village of Brookfield twp., Madison co.

Clarksville, in *Ohio*, a post-village of Clinton co., 81 m. S.W. of Columbus.

—A village of Defiance co., on St. Joseph's River.

Clarksville, in *Pennsylvania*, a village of Mercer co., 245 m. W.N.W. of Harrisburg.

—A village of Wayne co., 152 m. N.E. of Harrisburg, and 8 W. of Honesdale.

—A post-village of Greene co., 12 m. N.E. of Waynesburg, on Ten Mile Creek.

Clarksville, in *Tennessee*, a city, cap. of Montgomery co., on the Cumberland and Red rivers, 50 m. N.W. of Nashville. It is in the centre of "dark tobacco" district of Ky. and Tenn., and is one of the largest tobacco markets in the country. Has large lumber interests and iron ore deposits in vicinity. Pop. 1890, 7,924.

Clarksville, in *Texas*, a town, cap. of Red River co., about 15 m. S.W. of Red River and 320 N.E. of Austin City. (1897) about 2,200.

Clarksville, in *Virginia*, a post-village of Mecklenburg co., on the Roanoke river.

Claro-obscuro, *n.* (*Painting*.) Same as CHIARO-OSCURO, *q. v.*

Clart, *v. a.* [From *Armoirien*, *kalas*, mud.] An English provincialism for to damb, to dirty, &c.

Clarty, *a.* Muddy; dirty; filthy; foul. (Vulgar.)

Clary, *n.* (*Bot.*) See SALVIA.

Claryville, in *New York*, a post-office of Sullivan co.

Clary-water, *n.* A liquid compound of brandy, sugar, clary-flowers, and cinnamon, with a little ambergris; supposed to be useful in assisting digestion.

Clash, *v. i.* [Polish *klaskanie*; Ger. *klatschen*; Gr. *klazō*; formed from the sound.] To make a noise by mutual collision; to strike one against another in a noisy manner; as, the *clash* of weapons.

—To meet in opposition; to be contrary; to act in a contrary direction; to interfere; as, to *clash* in opinion.

"Wherever there are men, there will be *clashing* sometime or other." — *L'Estrange*.

—*v. a.* To strike one thing against another so as to produce sound or noise.

"The nodding statue *clash'd* his arms." — *Dryden*.

—*n.* A striking together with noise; collision, or noisy contact of bodies.

"War and slaughter, and the *clash* of arms." — *Pope*.

—Opposition; contradiction; contention, as of thoughts, opinions, or interests; as,

"The *clashes* between popes and kings." — *Denham*.

Clashingly, *adv.* In a clashing manner.

Clasp, *n.* [From *A. S.* *clýppan*, to clip, clasp, or embrace; Gael. *clasp*, a clasp, a buckle, *clasp*, to button, to tie.] A hook for fastening; a catch for holding something together; as, the *clasp* of a belt.

"That hook, . . . that in gold *clasps* locks in the golden story." — *Shaks.*

—A throwing of the arms around; a hug; a clip; a close embrace.

"The gross *clasps* of a lascivious Moor." — *Shaks.*

—*v. a.* To clip; to embrace; to hug; to grasp; as, to *clasp* a lady's waist.

"I beg, and *clasp* thy knees." — *Milton*.

—To shut or fasten together with a clasp.

"One *clasp'd* in wood, and one in strong cow-hide." — *Pope*.

—To catch and hold by twining; to surround and cling to; to inclose within the hands.

"Direct the *clasping* ivy where to climb." — *Milton*.

Clasp'er, *n.* One who, or the thing which, clasps, as the tendril of a vine, or other plant.

Clasp-cred, *a.* Possessed of tendrils.

Clasp-knife, *n.* A knife, the blade of which folds into the sheath of the handle.

Clasp-lock, *n.* A self-acting lock with a spring.

Clasp-nails, *n. pl.* (*Joinery*.) Nails with small, arrow-shaped heads, so as to sink in the wood.

Class, *n.* [Fr. *classe*, from Lat. *classis*; probably from Gr. *klesis*, for *kalesis*, from *kaleō*, *kalesō*, to call, to call together.] A company or order of citizens; an order or rank of persons assembled together as having characteristics or interests in common; as, the upper *class* of society.

—A number of students or pupils of the same standing, or pursuing the same studies at the same college or school; as, a Greek *class*.

"This lower *class* in the school of knowledge." — *Watts*.

—A set of beings or things having something in common, or ranged under a common distribution and denomination.

(*Zoöl.*) The second division of the animal kingdom. The animals grouped in a class possess the general character of the branch to which they belong, but they are divided by complications more or less evident in the general plan of structure; hence the division of a class into as many orders as these complications present varieties.

(*Bot.*) A group of alliances possessing some important structural characters in common. In the system adopted throughout this work, the vegetable kingdom is divided into seven classes, beginning with the *Thallogens*, which are the simplest plants, existing without the distinctions of leaf and stem, and also destitute of flowers; and ascending with the *Acrogens*, *Rhizogens*, *Endogens*, *Dictyogens*, and *Gymnogens*, up to the *Exogens*, or perfect plants.

—*v. a.* To form or arrange into a class or classes; to

arrange in sets or ranks, according to some method founded on natural distinction; as, to *class* passages.

—To distribute; to rank; to place in sets or divisions, as painters that study in the same school of art.

—*v. i.* To be classed, grouped, or distributed into sets.

Clas'sen's Corner, in *Indiana*, a village of La Porte co., 5 m. W.S.W. of La Porte.

Class'ible, *a.* Susceptible of classification.

Classic, **Class'ical**, *a. and n.* [Lat. *classicus*; Fr. *classique*.] (*Lit.*) In antiquity, the Roman people were divided into classes, and the highest order were, by pre-eminence, termed *classici*. Hence the name came to be applied figuratively to writers of the highest rank, and this is the sense in which it is commonly used at the present day. The highest and purest class of writers in any language are termed the *classics*; but, in a more limited sense, the name is given to the best writers of ancient Greece and Rome. In another sense, and as opposed to modern, it is applied to the productions of ancient Greece and Rome. — See ROMANTIC.

(*Fine Arts*.) A term denoting that the principle of the arrangement of a subject is such as would have suggested itself to the minds of architects, or artists, of the early, and the more decidedly classical, period; in which the accessories or the parts of a design are suitable to its general character, and such that nothing can be introduced which does not strictly belong to the particular class under which it is placed.

Class'ical, *a.* Pertaining to the first rank or class in modern literature and art; conforming to the chief order of talent and highest authority in taste; pure; refined; as, a *classical* style.

(*Ecccl.*) Pertaining to a classis, or ecclesiastical judicatory.

Class'icism, *n.* A classic idiom or style.

Class'icality, **Class'icalness**, *n.* State or quality of being classical.

Class'ically, *a.* In a classical or refined manner; after the manner of classic authors.

—Belonging to the manner of classes, or method of classification.

Class'icism, *n.* A classicalism; a chaste or correct style, idiom, or expression.

Class'icist, *n.* A classic scholar; one versed in classical knowledge, or in the classics.

Class'ifiable, *a.* That which may be classified; as, a *classifiable* population.

Class'ific, *a.* Constituting a class or classes; arrangement into distinct orders; distribution into sets.

Classifica'tion, *n.* [Fr.] This word, in a general sense, denotes the arrangement of a variety of objects into groups or classes, according to their resemblances or differences. It is from the power of abstraction in the human mind, — the power of considering certain qualities or attributes of an object, apart from the rest, that classification is possible. No assortment or arrangement can be formed among things not perfectly alike, but by losing sight of their individual or lesser peculiarities, and limiting the attention to those which they have in common. The properties that may be adopted as the basis of classification are very various, as may be seen in the numerous botanical, geological, and other systems. When the properties on which the classification is based are arbitrarily selected, the system is said to be *artificial*; when they lie in the essential nature of the objects themselves, it is *natural*. The ends of scientific (or natural) classification are best answered when the objects are formed into groups, respecting which a greater number of general propositions can be made; and those propositions more important than could be made respecting any other groups into which the same things could be distributed. The properties, therefore, according to which objects are classified, should, if possible, be those which are causes of many other properties, or, at any rate, which are sure marks of them. The end of *C.* as an instrument for the investigation of nature, is to make us think of those objects together which have the greatest number of important common properties, and which, therefore, we have oftenest occasion, in the course of our inductions, for taking into joint consideration. Our ideas of objects are thus brought into the order most conducive to the successful prosecution of inductive inquiries generally.

Classifica'tory, *a.* Pertaining to, or admitting of, classification.

Class'ify, *v. a.* [Fr. *classifier*, from L. Lat. *classis*, and *facio*, to make.] To form into a class or classes; to distribute into classes; to arrange in sets according to some properties or characters; to systematize; to place in order of natural affinity; as, to *classify* mankind.

Class'is, *n.; pl.* CLASSES. [Lat. See CLASS.] (*Ecccl.*) An ecclesiastical judicatory, or association having judicial powers and privileges in certain Churches.

Class'man, *n.; pl.* CLASSMEN. At Oxford University, England, a scholar or student who undergoes examination for his degree by order of merit; — synonymous to the terms *wrangler* and *optime* at Cambridge, the sister university.

Class'mate, *n.* A fellow-collegian; one who belongs to the same class with another; a brother-student.

Clath'rate, *a.* [Gr. *klēthra*, lattice.] (*Bot.*) Cancel-late; lattice-shaped.

Clat'sop, in *Oregon*, a N.W. county. The Columbia River bounds it on the N., and the Pacific Ocean on the W. Several small streams pass through the co., emptying into the Pacific. The soil is generally good. Cap. Astoria.

Clat'ter, *v. i.* [A. S. *clatrun*, anything that makes a clattering; Du. *klateren*; formed from the sound, and allied to *clack*, *clap*.] To make rattling or repeated sharp sounds, as by striking sonorous bodies; to utter

repeated acute and rattling sounds by being struck together.

"Their *clattering* arms with the fierce shocks resound." *Glanville*

—To talk fast and idly; to chatter noisily; to prate glibly, and emptily; to bounce.

"All those airy speculations were only a noise and *clattering* of words." — *Decay of Piety*.

—*v. a.* To strike and make a rattling noise.

"You *clatter* still your brazen kettle." — *Swift*.

—*n.* A rattling or confused noise made by the collision of metallic or other sonorous bodies; tumultuous and confused noise; a repetition of abrupt, sharp sounds; as, "musical *clatter*." — *Swift*.

Clat'terer, *n.* One who clatters; a prater; a babbler.

Clat'teringly, *adv.* With a clattering manner.

Claude Lorrain, (*klaw'd*.) a celebrated landscape painter, b. in Lorraine, 1600. His real name was CLAUDE GELÉE, and he was the son of poor parents, who put him apprentice to a pastry-cook. The love of art, however, prevailed over the circumstances in which he was placed and having received some instructions in drawing from his brother, who was a wood-engraver, he went to Rome and was employed as cook and color-grinder by the painter Tassi, from whom he received instructions in the fundamental principles of his art. He gradually won his way upwards to independence and fame, and by 1633 was known as a good landscape-painter. Sundrart was his intimate companion, and first led him to paint from nature. In the study of nature he was unwearied; passing entire days in the fields, noting every change in the aspect of nature from sunrise to sunset. The fruits of this patient observation are seen, especially in his admirable treatment of aerial perspective. One of his most celebrated landscapes represents a little grove of the Villa Madama near Rome, for which Pope Clement XI. offered as much gold as would be required to cover the surface of the painting. According to the most general opinion he d. in Rome, 1682.

Clau'dent, *a.* [Lat. *claudens*.] Shutting; enclosing confining.

Claude, (*St.*) a town of France, dep. Jura, at the confluence of the Bienne and Tacon, 25 m. S. of Lous-le-Sau-nier. *Manf.* Cotton, paper, musical boxes, toys, &c. *Pop.* 6,809.

Claudia'us, CLAUDIUS, a Latin poet, b. at Alexandria, flourished under the reigns of Theodosius, Arcadius, and Honorius; was patronized by Stilicho, and had a statue erected to his honor in the forum of Trajan. His larger poems lose some of their value from being courtly panegyrics; but in all his poems he displayed brilliant fancy and much polished elegance.

Clau'dicant, *a.* [Lat., from *claudicare*.] Limping; halting in gait. (*R.*)

Claudica'tion, *n.* [Lat. *claudicatio*.] Habit of halting or limping.

Claudian'us I. TIBERIUS DRUSUS NERO, surnamed GERMANICUS, and BRITANNICUS, 4th emperor of Rome, b. at Lyons B. C. 10. After spending 50 years of his life in private station, unhonored, and but little known, he was, on the murder of Caligula, his nephew, A. D. 4, proclaimed emperor by the soldiers, and confirmed the sovereignty by the senate. At first he performed some praiseworthy acts, but he soon became contemptible for his debauchery and voluptuousness; and he died A. D. 54, of poison administered by his 2d wife, Agrippina. Claudius went to Britain two years after his accession, and made it a Roman province. He built the port of Ostia, the Claudian aqueduct, and executed other great works.

CLAUDIUS II., MARCUS AURELIUS FLAVIUS, surnamed GOTHICUS, Roman emperor, b. in Illyria A. D. 214, was raised to the throne on the death of Gallienus, in 268, and by his virtues as well as by his splendid victories over the Goths he proved himself worthy of his exalted station. D. 2 A. D.

Claudius Appian, a Roman decemvir. See APPIAN.

Claudian'us Pul'cher, PUBLIUS, a profligate Roman patrician, especially known as the enemy of Cicero. He served as a soldier in Asia for some years, and being Rome in 65 B. C., persecuted Catiline, and took a bribe to drop the proceedings. He became most notorious by his daring entrance, dressed as a woman, into the house of Caesar, during the celebration of the mysteries of the Bona Dea, in 62 B. C. On his trial, the evidence of Cicero was decisive against him, and thenceforth his aim was revenge on Cicero. From a patrician he became a plebeian, in order to be eligible for a tribune, and procure the banishment of his great enemy, who was however soon recalled. He afterwards went about the city with a band of gladiators, and had frequent combats with Milo and his band. It was in one of these combats that he was at last killed, B. C. 52.

Clause, (*klawz*.) *n.* [Fr. *clause*; Lat. *clausus*, from *clau* to shut, to inclose; allied to Gr. *kleō*, *kleisō*, to shut. An article, or a distinct part of a contract, will, deed agreement, &c.; a stipulation or proviso in any legal document; as, a *clause* in an indenture.

"The *clause* is untrue concerning the bishop." — *Hooker*.

(*Gram.*) A member or subdivision of a period or sentence; so much of a sentence as may be construed together.

Clausel, BERTRAND, COMTE, (*klaw'sel*.) a distinguished French soldier, b. at Mirepoix, 1772. He had already gained distinction in the army of the Pyrenees, at Domingo, in Italy, and Dalmatia, when he went to Spain in 1810, under Junot and Massena. He besieged Ciudad Rodrigo, was wounded at Salamanca, and having secured a retreat, (memorable in military annals,) army of Portugal, and led it into Spain, was appointed commander-in-chief in the N. of Spain, in 1813.

Henry Clay

1777-1852

was one of the last to lay down arms in 1814; and among the first to declare himself in favor of Bonaparte during the Hundred Days, when he took the command of Bordeaux, and established the imperial government without striking a blow. Banished on the return of the Bourbons in 1815, he retired to the U. States, where he remained some years. After the revolution of 1830 he was appointed commander-in-chief of the forces in Algeria; but in consequence of some misunderstanding with the home government, he returned to France in 1831, received the marshal's baton, and, in 1835, returned to Algeria as governor-general of the colony; but the check he sustained at Constantine, in 1836, led to his resignation, and the rest of his days were passed in retirement. D. 1842.

lausen, HENRIK NICOLAI, a Danish theological writer and politician, b. 1793. In 1807 he published *Apologien Ecclesie Christiane Antitheodosiani Platonis ejusque Philosophiae Arbitri*, a work remarkable for its boldness of style. In 1820 he was appointed Professor of Theology in the University of Copenhagen. In 1837 appeared his *Popular Discourses on the Reformation*; in 1843, *Development of the Fundamental Dogmas of Christianity*; and in 1851, *The Confession of Augsburg Explained Historically and Dogmatically*. In politics C. was a strong advocate of Danish nationality, was made a member of the Council of State in 1848, and assisted in drawing up the Danish constitution of 1848. Died in 1877.

lausenburg. See KLAUSENBURG.

lausilia, n. (Zool.) A genus of Mollusca, chiefly inhabiting mosses at the foot of trees; so named because the aperture of the shell is closed internally by a spiral lid.

lauselville, in Alabama, a village of Monroe co., 90 m. S.W. of Montgomery.

laussville, in Pennsylvania, a post-village of Lehigh co., 83 m. E.N.E. of Harrisburg.

lausthal. See KLAUSTHAL.

laus'al, a. [Fr. *claustral*, from Lat. *claustrum*, enclosure.] Pertaining, or relating, to a cloister, or religious house; as, a *claustral* prior.

laus'ular, a. [From Lat. *clauclere*, to shut.] Possessing clauses: pertaining to clauses.

laus'ure, n. [Lat. *clausura*.] The act of confining, closing, or shutting up. (R.)

la'vate, **Clav'ated**, a. (Bot. and Zool.) Club-shaped; as when a body is linear at the base, but towards the apex grows gradually broader.

lav'eciu, n. [Fr.] (Mus.) The harpsichord.

la'vel, n. See CLEVVY.

lav'ellated, a. [L. Lat. *clavellatus*, from *clava*, a club.] (Chem.) Relating to potash in its divers forms; so applied in allusion to its being obtained from billets or clubs of wood.

lav'er, v. i. [Scot.] To talk loudly and sociably.

z. Social conversation; chat. (Scottish.)

"Wi' clavers, an' havers." — Burns.

Clish-ma-claver. [Scot.] Idle talk.

av'erack, in New York, a post-township of Columbia co., 4 m. E. of Hind-on; pop. abt. 3,477.

av'uary, n. [Fr. *clavier*.] (Mus.) A scale of lines and spaces.

av'ichord, n. Same as CLARICHORD, q. v.

av'icle, n. [Lat. *clavicula*, dim. of *clavis*, a key; Fr. *clavicule*.] (Anat.) The bone situated between the sternum, or breast-bone, and the acromion process of the scapula or blade-bone; serving to keep the shoulders apart, that the arm may enjoy a freer and wider range of motion. It takes its name from its resemblance to the ancient Roman key; and it is curved somewhat in the form of an italic f. Its sternal end is thick, strong, and expanded, while the acromial end is broad and flattened, and presents an oblong surface, in order to articulate with the acromion process of the scapula.

Fig. 612. — a b, THE CLAVICLE.

av'icor'nes, n. pl. [Lat., club-horned.] (Zool.) In some systems, a family of coleopterous insects, of the section *Pentamera*, distinguished by the club-shaped termination of the antennæ, which are larger than the maxillary palpi.

av'ic'ular, a. Pertaining to, or consisting of, the collar-bone.

av'ier, n. (Mus.) The key-board of a pianoforte, organ, &c.

av'iform, a. [Lat. *clava*, club, and *forma*, form.] (Bot.) Club-shaped; — used in reference to components of plants.

av'iger, n. [Lat. *clavis*, key, or *clava*, and *gerere*, to carry.] A person who holds the keys of any building. — One who carries a club.

avig'erous, a. Carrying a club or a key.

av'is, n. Lat. pl. CLAVES; Eng. pl. CLAVISES. [Lat.] A key; a guide to the elucidation of anything; a glossary.

av'us, n. [Lat.] (Antiq.) Among the Romans, an article of dress, which seems to have been a purple band worn upon the tunic and toga, and was of two fashions,

one broad and the other narrow, denominated respectively *clavus latus* and *clavus angustus*. The former was a single broad band of purple, extending perpendicularly from the neck down to the centre of the tunic; the latter probably consisted of two narrow purple slips, running parallel to each from the top to the bottom of the tunic, one from each shoulder. The *latus clavus* was a distinctive badge of the senatorial order; and hence it is used to signify the senatorial dignity, and *laticlavus*, the person who enjoys it. The *angustus clavus* was the decoration of the equestrian order; but the right of wearing the *latus clavus* was also given to the children of equestrians, at least in the time of Augustus, as a prelude to entering the senate-house.

(Med.) A severe pain in the forehead, compared to the driving of a nail into the skull.

Clav'y, n. (Arch.) A mantel or chimney-piece.

Claw, (klaw,) n. [A. S. *claw*; Du. *klaauw*; Ger. *klaue*; Icel. *klo*; Dan. *klo*; probably allied to *clutch*.] The root is found in Ger. *Kleben*, to cleave, to split. The sharp, hooked nail of a beast, bird, or other animal; as, a bear's claw.

"He softens the harsh rigour of the laws,
Blunts their keen edge, and grinds their harpy claws." — Garth.

—The whole foot of an animal, armed with hooked nails or talons; as, the *claws* of Satan.

—The nail of a finger of the human hand. (Sometimes applied in a vulgar sense.)

—Anything resembling the claw of an animal; as, the claw of a hammer.

(Bot.) The narrow part of the base of a petal which takes the place of the foot-stalk of a leaf, of which it is a modification; — called also *Unguis*.

—v. a. [A. S. *clawen*.] To scratch, scrape, pull, or tear with the nails or talons.

"Look if the wither'd elder hath not his poll clawed like a parrot." — Shaks.

—To scratch or tickle, so as to afford relief from some uneasy sensation; hence, by implication, to fawn upon; to flatter; to cringe to.

"I must laugh when I am merry, and claw no man in his humor." — Shaks.

—To escape; to effect an exit; to get away.

To *claw off* or *away*. To scold, revile, or rail at.

To *claw off*. (Naut.) To beat to windward, to avoid hugging a lee-shore.

Claw'back, n. A flatterer; a sycophant; a lickspittle.

"The Pope's clawbacks." — Bishop Jewel.

Clawed, (klawd,) a. Equipped with claws.

Claw'less, a. Wanting, or without claws.

Claw'sickness, n. The foot-rot in sheep.

Clay, n. [A. S. *clæg*; Frisian, *klai*; North Fris. *klai*; Ger. *klei*.] The root is formed in A. S. *clifian*; Ger. *kleben*; O. Ger. *klehjan*, *gukliban*, to adhere. Allied to Icel. *klístr*, glue, clay, Lat. *gluten*, and Gr. *glōios*, any sticky, clammy stuff, as mud, *glōia*, glue; Sansk. *lip*, to besmear. (Chem.) Clay is formed from the disintegration of felspathic rocks by the combined action of the air and water. It necessarily varies in its composition, but its fundamental constituent is silica, and alumina stands second. Ordinary clay contains, in addition, small portions of undecomposed rock, potash, oxide of iron, lime and magnesia, the character of the clay being much modified by the preponderance of one or other of these ingredients: Classified as to their origin, clays are (1) *sedimentary*, or composed of fine sediments deposited by water; (2) *residual*, the material left after the removal of the soluble parts of rocks; (3) *glacial*, rock material ground fine by glaciers. One of the important characteristics of clay in its hydrated condition is its plasticity, and its capability of being made hard by heat, — properties which render the different kinds of this substance available for various fictile purposes. The purest kind of clay is *kaolin*, or china-clay, which is formed by the disintegration of felspathic rocks. This species was originally found in China; but a similar description is obtained from deposits near St. Austell, in Cornwall, and St. Yrieix, near Limoges, in France. Kaolin is nearly pure silicate of alumina. Such clays are obtained in this country at Brunswick, Maine, at Haddam, Connecticut, and other places. (See PORCELAIN MANUFACTURE.)

Pipe-clay is a white clay nearly free from iron. — Common *potter's clay* contains a considerable amount of iron. In New Jersey, near Woodbridge, and also at South Amboy, beds of clay are worked to a great extent for the manufacture of stone ware. Similar deposits also compose the banks of the Delaware River, between Bordentown and Burlington. They all belong to the series of upper secondary rocks, underlying the green sand beds. *Brick-clay* contains varying proportions of iron: hence different countries build houses of different colors. Clay-beds found in Wisconsin, near Lake Michigan, are so free from this coloring matter, that the bricks are of a straw color. They are so much esteemed as to be transported from Milwaukee to New York city. — *Marl* is clay containing a notable proportion of carbonate of lime. The colors known as *umber* and *sienna* are clays colored by the peroxides of iron and manganese. — *Fuller's-earth* is a clay of a peculiar kind, which, when dried, possesses the property of absorbing grease from woollen fabrics, and is employed for that purpose. It contains a small percentage of magnesia.

(Lit. and Script.) Earth in general; — used as a metaphor with reference to the elementary particles of the human body.

"The precious porcelain of human clay." — Byron.

—v. a. To cover, smear over, or manure with clay.

—To purify and whiten with clay, as sugar.

Clay, HENRY, an illustrious American orator and statesman, b. in Virginia, 1777. Becoming a student of law,

in his 21st year he was admitted to the bar, and commenced practice at Lexington, Ky. His success was signal and immediate; with a competent amount of legal learning, he became one of the most popular advocates that ever addressed a jury. About 1804, he entered the arena of politics, and, in 1806, became U. S. senator for a single year, to fill the unexpired term of Mr. Adair; and in 1811 was elected to, and chosen speaker of, the House of Representatives, remaining in that post till 1814, when he was sent abroad as one of the commissioners to negotiate the treaty of peace with England at Ghent. On his return he was again sent to Congress, and re-elected to his old position as speaker. C. at this time took an active part in acknowledging the independence of the Hispano-American republics, and the encouragement of American industry by a protective tariff. He had also a prominent share in the vehement discussions about slavery which were excited in 1820 by the question respecting the admission of Missouri into the Union; and he was, (if not the author,) the earnest advocate of the famous "compromise" on that subject, which established the line of 36° 30' as the N. limit of slave-holding territory. In 1824, C. was a candidate for the presidency against J. Q. Adams, Gen. Jackson, and W. H. Crawford; and, no choice being effected in the Electoral College, when the matter came up to the House of Representatives, C. and his friends voted for Mr. Adams, thereby securing his election. During the entire period of the Adams administration, 1825–9, C. was Secretary of State, and performed the duties of that office with consummate ability. In 1831, he returned to the U. States senate, and became the leader of the opposition to General Jackson's govt., and strove, but ineffectually, against the removal of the deposits from the U. S. Bank. Through his influence also, the "Compromise Bill," as it was called, was passed through Congress, which put an end to the Nullification controversy, by a partial abandonment of the protective system. In 1832, C. was again the candidate of his party for the presidency, though with little chance of success, owing to the overwhelming popularity of General Jackson, who was re-elected. In March, 1842, he resigned his seat in the senate, and retired into private life, until 1844, when he came forward a third time as a candidate for the presidential chair. In one of the most exciting political contests that ever occurred in this country, C. was again defeated, but by a very small numerical majority, obtained mainly through the influence of the administration, — then in the hands of his political opponents, — and the obstinacy of the so-called "liberty party." The immediate consequence of this, his third defeat, was the annexation of Texas, a measure to which he had given his strenuous opposition. This was virtually the termination of C.'s public career, though, in 1849, he consented to resume his seat in the senate, in view of the perilous contest which was then impending between the slave-holding party and its opponents, on the California and territorial questions. C. was the author of the celebrated "Compromise of 1850," as it was termed, by which, after a long and vehement struggle, this dispute was, for the time being, adjusted. This was the third occasion in his career in which, by giving the whole weight of his abilities and influence to an intermediate course between two extremes, he put an end to a violent conflict of opinion, which menaced the peace of the country, and the duration of the Union. On the question of slavery, C. always favored moderate counsels, and a pacificatory policy. The excitement and exhaustion occasioned by this last great controversy gave the final blow to his already enfeebled constitution, and he died at Washington, June 29, 1852, leaving behind him the reputation of an able and patriotic statesman whose public life had been without a stain.

Clay, in Florida, a N.E. co.; area, 550 sq. m. St. John's River forms its eastern boundary. Surface, even; cap. Green Cove Springs.

Clay, in Georgia, a W.S.W. co., bounded on the W. by the Chattahoochee River, which separates it from Alabama. Surface, nearly even; soil, fertile. Cap. Fort Gaines.

Clay, in Illinois, a S.E. co.; area, 440 sq. m. It is traversed by Little Wabash River and Elm Creek. Surface, somewhat undulating; soil, productive. Cap. Louisville. Pop. (1890) 17,437.

Clay, in Indiana, a W. county; area, 700 sq. m. It is traversed by Eel river; its surface is nearly even and the soil fertile. Iron ore and numerous coal-beds are found. Cap. Brazil. Pop. (1890) 30,536.

Clay, in Indiana, a township of Bartholomew county.

—A township of Carroll co.

—A township of Cass co.

—A village of Cass co., 85 m. N. of Indianapolis.

—A township of Dearborn co.

—A township of Decatur co.

—A township of Hamilton co.

—A township of Hendricks co.

—A township of Howard co.

—A township of La Grange co.

—A township of Miami co.

—A township of Morgan co.

—A township of Owen co.

—A township of Pike co.

—A township of Spencer co.

—A township of St. Joseph's co.

—A township of Wayne co.

Clay, in Iowa, a N.W. co.; area, 600 sq. m.; drained by Lizard and Little Sioux rivers. Cap., Spencer. Pop. (1890) 9,310.

Clay, in Iowa, a township of Hardin co.

—A township of Harrison co.

Clay, in *Iowa*, a township of Jones co.

—A township of Marion co.

—A township of Washington co.

—A township of Wayne co.

Clay, in *Kansas*, a N.N.E. co.; area, 650 sq. m. It is traversed by the Republican River, which divides it into two parts. *Soil*, fertile. *Cap.* Clay Centre.

Clay, in *Kentucky*, a S.E. co.; area, about 700 sq. m. It is intersected by the S. Fork of Kentucky River; has an extensive salt manufactory; and is abundantly supplied with coal and iron ore. *Cap.* Manchester.

Clay, in *Michigan*, a township of St. Clair co., on the St. Clair River.

Clay, in *Minnesota*, a W.N.W. co., bordering on Dakota; area, 1,080 sq. m. It is bounded by the Red River on the W., and drained by Buffalo River. *Surface*, even; *soil*, alluvial, fertile. *Cap.* Moorehead. *Pop.* (1895) 15,154.

Clay, in *Missouri*, a twp. of Lafayette co.

Clay, in *Nebraska*, a S.E. co.; area, 576 sq. m. It is drained by the Big Blue and Big Nemaha rivers. *Surface*, uneven; *soil*, varied but productive. *Cap.* Clay Center. *Pop.* (1890) 16,310.

Clay, in *New York*, a post-township of Onondaga co., 10 m. N. of Syracuse, on Oswego River. It is connected with Oswego and Syracuse by a canal.

Clay, in *Ohio*, a township of Auglaize co.

—A township of Gallia co.

—A township of Highland co.

—A township of Knox co.

—A township of Muskingum co.

—A township of Montgomery co.

—A township of Ottawa co.

—A township of Scioto co.

—A township of Tuscarawas co.

Clay, in *Pennsylvania*, a thriving township of Butler county.

—A township of Lancaster co.

Clay, in *Texas*, a N. co., bordering on Indian Territory; area, about 1,100 sq. m. It is bounded on the N. by Red River. *Cap.* Henrietta. *Pop.* (1890) 7,503.

Clay, in *W. Virginia*, a central co.; area, about 400 sq. m. Intersected by Elk River, and Sycamore and Big Buffalo creeks. *Surface*, varied. *Cap.* Clay Court-House. *Pop.* (1890) 4,659.

Clay Bank, in *Michigan*, a post-village and township, cap. of Oceana co., 60 m. N. W. of Grand Rapids, on Lake Michigan.

Clay Banks, in *Wisconsin*, a post-township of Door co., about 5 m. S. of Sturgeon Bay, on Lake Michigan.

Clayburgh, in *New York*, a post-office of Clinton co.

Clay Centre, in *Kansas*, a prosperous town, cap. of Clay co. *Pop.* (1897) about 3,100.

Clay'ey, *a.* Consisting of, or abounding with, clay; partaking of clay; resembling clay.

Clay'ey soil, (*Agric.*) Soil in which clay is the principal earthy ingredient. Soils of this description, when first subjected to cultivation, are expensive to work, and uncertain in their produce; but after they have been well drained, cultivated, limed, and manured, they become the most fertile of all soils, producing immense crops of wheat, beans, clover, rye-grass, &c. Great improvement is also effected in them by partially burning them.

Clay Furnace, in *Pennsylvania*, a vill. of Mercer co.

Clay Ironstone, *n.* (*Min.*) The name commonly given to the compact kinds of Siderite or carbonate of iron, which are rendered impure by an admixture of clay. These occur chiefly as flattened spheroidal masses of various sizes, in many clay formations, more especially among those of the coal-measures. The color of this ore is generally yellowish-brown or reddish-gray, the fracture is finely granular; it is easily scratched, and gives out an argillaceous odor when breathed upon.

Clay'ish, *a.* Partaking of the nature of clay; as, "clayish water." — *Harvey*.

Clay Lick, in *Pennsylvania*, a P. O. of Franklin co.

Clay'marl, *n.* A whitish, smooth, chalky clay.

Claymont, in *Delaware*, a post-village of New Castle co., 8 m. N.E. of Wilmington, in Delaware co.

Claymore, *n.* [*Gael.* *claidheamh-mòr*; *Arm.* *klaib*, everything made of iron, *pl.* *klaibion*, offensive weapons.] A large two-handed broadsword, formerly the national weapon of the Scottish Highlanders.

"With dirk, claymore, or rusty trigger." — *Burns*.

Clay Pool, in *Indiana*, a post-village of Kosciusko co., 100 m. N.N.E. of Indianapolis.

Clay Port, in *Indiana*, a village of Kosciusko co., 100 m. N. by E. of Indianapolis.

Clay's Bar, in *California*, a village of Calaveras co., 17 m. S.W. of Mokelumne Hill.

Claysburg, in *Ohio*, a village of Preble co., about 35 m. W. of Dayton.

Clay Slate, *n.* See SLATE.

Claysville, in *Alabama*, a post-village of Marshall co., abt. 133 m. N.N.E. of Tuscaloosa, on the Tennessee River.

Claysville, in *Indiana*, a village of Hendricks co., 21 m. W.S.W. of Indianapolis.

—A post-village of Washington co., 90 m. S. by W. of Indianapolis.

Claysville, in *Kentucky*, a twp. and post-village of Harrison co., 47 m. N.E. of Frankfort, on Licking River.

Claysville, in *Maryland*, a village of Mountgomery co.

Claysville, in *Ohio*, a village of Clinton co., 48 m. S.W. of Columbus.

—A village of Greene co., 10 m. from Xenia.

—A post-village of Guernsey co., 80 m. E. of Columbus.

Claysville, in *Pennsylvania*, a post-borough of Washington co., 22 m. E. of Wheeling.

Claysville, in *W. Virginia*, a village of Wood co., 7 m. S.E. of Parkersburg, on Little Kanawha River.

Clayton, JOHN MIDDLETON, an American statesman, B. in Sussex co., Delaware, in 1796, was chosen senator to Congress in 1829, and held office till the close of 1836, when he resigned. He was then appointed chief-justice of his native State, and continued on the bench for nearly 3 years. In 1845, he was again sent to the U. States senate, and remained there till March, 1849, when he became secretary of state under Gen. Taylor. In this capacity he negotiated the Bulwer-Clayton Treaty (*q. v.*), adjusting the respective claims of Great Britain and this country in Central America. C. resigned office on Gen. Taylor's death in 1850, but remained in the senate till his decease, Nov. 9th, 1856. He was a zealous Whig, an able debater, and a statesman of high talent and upright character.

Clayton, in *Alabama*, a post-village, cap. of Barbour co., 75 m. S.E. of Montgomery.

Clayton, in *California*, a post-village of Contra Costa co., 32 m. E.N.E. of San Francisco.

—A village of Yuba co., 40 m. N.N.E. of Marysville.

Clayton, in *Georgia*, a post-village, cap. of Rabun co., 175 m. N. of Milledgeville.

—A N.W. county; intersected by Flint River. *Surface*, Varied. *Soil*, generally good. *Cap.* Jonesborough. *Pop.* (1890) 8,300.

Clayton, in *Illinois*, a township of Adams county.

—A township of Woodford co.

—A post-village of Adams co., 28 m. E.N.E. of Quincy, and 89 W. of Springfield.

Clayton, in *Indiana*, a thriving post-village of Hendricks co., 20 m. W.S.W. of Indianapolis.

Clayton, in *Iowa*, an E.N.E. co., bordering on Wisconsin; area, 760 sq. m. It is bounded on the E. by the Mississippi River; and drained by the Turkey and S. fork of the Turkey River. *Surface*, varied by woodlands and prairies; *soil*, fertile, and climate healthy. Lead mines are in operation in the S.E. part of the co. *Cap.* El Kader.

—A thriving post-village of Clayton co., 50 m. above Dubuque, on Mississippi River. It is an extensive trading-port, and lead mines are worked here.

—A township of Taylor co.

Clayton, in *Maryland*, a post-office of Harford co.

Clayton, in *Michigan*, a township of Genesee county.

—A post-village of Lenawee co., 11 m. W. by S. of Adrian.

Clayton, in *Nebraska*, a small village of Clay co., 48 m. W. by S. of Nebraska City.

Clayton, in *New Jersey*, a glass manuf. town, of Gloucester co. *Pop.* (1897) abt. 1,600.

Clayton, in *New York*, a post-village and township of Jefferson co., on Chaumont and St. Lawrence rivers, 20 m. N.N.W. of Watertown. It has a landing on the St. Lawrence.

Clayton, in *Ohio*, a village of Adams co., 9 m. S.W. of West Union.

—A post-village of Miami co.

—A post-village of Montgomery co., 75 m. W. by S. of Columbus.

—A village of Morgan co.

—A township of Perry co.

Clayton, in *Pennsylvania*, a post-office of Berks co.

Clayton, in *Wisconsin*, a township of Crawford county.

—A township of Winnebago co.

Claytona, in *Ohio*, a village of Morgan co., 75 m. E.S. E. of Columbus.

Clayton Centre, in *New York*, a post-office of Jefferson co.

Claytonia, *n.* [Named in honor of John Clayton, a botanist of Virginia.] (*Bot.*) A genus of plants, order *Elatinaceæ*. The Spring Beauty, *C. Caroliniana* and *Virginica*, are delicate, small, fleshy, early-flowering plants, flowering in April, and common in woods, and on rocky hills, from Canada to Carolina. The flowers are in a terminal cluster, white, with a slight tinge of red or rose-color, with deeper colored veins.

Claytonville, in *Kansas*, a post-village and township of Brown co., 60 m. N. by E. of Topeka.

Claytonville, in *N. Carolina*, a post-village of Henderson co., 28 m. S. by W. of Ashville.

Clay Village, in *Kentucky*, a post-village of Shelby co., 16 m. W. of Frankfort; *pop.* about 350.

Clayville, in *New York*, a post-village of Oneida co., 10 m. S. of Utica.

Clawson, in *Wisconsin*, a village of Manitowoc co., 12 m. W. of Manitowoc.

Clazome'ne. See VURLA.

Clead'ing, *n.* [*Scot.*, clothing.] (*Mach.*) A covering-piece, or jacket, used in locomotive engines, and made of narrow strips of wood neatly fitted round the boiler and fire-box to prevent the radiation of the heat. Externally, this is sometimes covered with zinc, and a coating of dry hair-felt is commonly placed between the boiler and the wood, for the same purpose.

Clean, *a.* [*A. S.* *clæn*; *Ice.* *glan*, the brightness of things polished; *Ger.* *glatt*, smooth, polished; *W.* and *Gael.* *glan*, pure, clean, fair.] Free from dirt and impurity; as, *clean linen*. — Free from moral stain, mark, defilement, or pollution; chaste; innocent; guiltless; sinless; pure; as, a *clean conscience*. — Free from whatever is foul, injurious, or defective; as, a *clean patch* of

land. — Free from awkwardness, unwieldy action, or bungling; featsome; clever; dexterous; adroit; as, a *clean boxer*; a *clean swindle*. — Free from check, limitation, or restraint; thorough; complete; as, to show a pursuer a *clean pair of heels*. — Uninfected with foul pollution or loathsome disease, as leprosy.

"If the plague be somewhat dark, and spread not in the skin the priest shall pronounce him *clean*." — *Lev.* xiii. 6.

(*Scrip.*) *Clean* and *unclean* are terms in the Bible in a ceremonial sense, assigned to certain animals, and to men in certain cases, by the law of Moses, (*Lev.* xi. 15; *Num.* xix.; *Deut.* xiv.) A distinction between clean and unclean animals existed before the deluge, (*Gen.* vii. 2.) The Mosaic law was not merely arbitrary, but grounded on reasons connected with animal sacrifices, with health, with the separation of the Jews from other nations, and their practice of moral purity; (*Lev.* xi. 43-45; *xx.* 24-26; *Deut.* xiv. 2, 3, 21.) The ritual law was still observed in the time of Christ, but under the gospel it was annulled, (*Acts* x. 9-16.) Ceremonial uncleanness was contracted by the Jews in various ways, voluntarily and involuntarily. It was removed, usually in the evening of the same day, by bathing. In other cases a week, or even forty or fifty days, and some sacrificial offerings, were required.

Clean, *adv.* Quite; perfectly; thoroughly; fully; wholly entirely.

"Domestic hrolls *clean* overblown." — *Shaks.*

—In a dexterous manner; without check or miscarriage.

"Pope came off *clean* with Homer; but they say, Broome went before, and kindly swept the way." — *Henley*.

—*v. a.* [*A. S.* *clænan*.] To purify: to cleanse; to remove all impure, noxious, or extraneous matter from; as, to *clean* a stable.

Clean'er, *n.* One who cleans; the thing which cleans as, a knife-cleaner.

Clean'ing, *n.* The act of making clean, or freeing from dirt or impurity. — The after-birth of certain domestic animals, as cows, &c.

Cleanlily, (*klæn'li-le*), *adv.* In a cleanly manner. (*R.*) **Clean-limbed**, *a.* Having well-proportioned limbs with limbs without flaw or blemish; as, a *clean-limbed* athlete.

Cleanliness, *n.* State of being cleanly; freedom from dirt, filth, or any foul extraneous matter; as, the *cleanliness* of a city.

—Neatness of person or dress; purity; — as opposed to negligence of attire and foulness of person.

"Having no adorning but *cleanliness*." — *Sidney*.

Clean'ly, *a.* (*Comp.* CLEANLIER; *sup.* CLEANLIEST.) [*A. S.* *clænlic*.] Clean-like; clean by habit or inclination; free from dirt, filth, or any foul matter; neat.

"Some plain but *cleanly* country maid." — *Dryden*.

—Carefully avoiding dirt or pollution; pure; innocent; immaculate.

"Sweetly relishing and *cleanly* joys." — *Granville*.

—Cleansing; making clean or neat; as, "*cleanly* powder Prior.

—Evinced adroitness; free from bungling or clumsiness; dexterous; artful; showing nice address.

"Through his fine handling, and his *cleanly* play." — *Spenser*.

—*adv.* [*A. S.* *clænlice*.] In a cleanly manner; neatly.

"I'll leave sack, and live *cleanly*, as a nobleman should." — *Shak.*

Clean'ness, *n.* State or quality of being clean; freedom from dirt, filth, and extraneous matter; neatness of person or dress; as, *cleanness* of habit.

—Purity; innocence.

"The *cleanness* and purity of one's mind." — *Pope*.

—Freedom from infectious or foul disease.

—Freedom from error; exactness; correctness; easy confidence.

"He minded only . . . the *cleanness* of expression." — *Dryden*.

Cleansable, (*klænz'a-bl*), *a.* That may be cleansed.

Cleanse, (*klænz*), *v. a.* [*A. S.* *clænsian*.] To purify; make clean or pure; to remove filth or foul matter; free from guilt, crime, or pollution; as, to *cleanse* from evil.

"Not all her od'rous tears can *cleanse* her crime." — *Dryden*.

Cleanser, (*klænz'er*), *n.* The person who, or thing which, cleanses; a detergent.

Clean'thes, a Greek Stoic philosopher of the 3d cent. B. C. He was a native of Assus, in Lydia; but, visiting Athens, he became a zealous disciple of Zeno; and enable him to attend on that master in the day, he was accustomed to labor by night. His mental and bodily strength was immense, and despite all obstacles, studied so successfully as to become, B. C. 263, Zeno's successor. Of his writings only some fragments remain, among which is his noble *Hymn to Zeus*.

Clear, *n.* (*Arch.*) Extent of inside work; as, a galley 60 feet long in the *clear*.

Clear, *a.* [*Ger.* *klar*; *Du.* *klaar*; *Ice.* *klár*; *Dan.* a *Swed.* *klar*; *Fr.* *clair*; *Lat.* *clarus*; *It.* *chiaro*; *W.* *cl*.] The root is found in *Eng.* *glare*, to emit a full or strong light.] Transparent; bright; brilliant; luminous; pure; unclouded; undimmed; unobscured; without opaqueness or nebulosity; as, a *clear sky*.

"The stream is so transparent, pure, and *clear*." — *Denham*.

—Distinct; apparent; manifest; evident; perspicuous; plain; as, a *clear understanding*.

"Many men reason *clear* and rightly, who know not how to make a syllogism." — *Locke*.

—Distinct in sound; canorous; shrill; plainly articulated; audible; as, a *clear soprano voice*.

"As *clear* as a whistle." — *Byron*.

—Quick in discernment; acute; prompt; discriminating.

"Mother of science! now I feel thy power Within me *clear*." — *Milton*.

Fig. 613.
CLAYMORE.

Unencumbered; free from debt, distress, impediment, obstruction, incumbrance, embarrassment, obligation, or accusation; as, a *clear* course in life.

"Five pounds, if rightly tipp'd, would set me *clear*." — *Gay*.

Free from deductions or charges; exempt; in full; without drawback or diminution; net; as, a *clear* discharge.

"Hope is *clear* gain as long as it lasts." — *Collier*.

Free from guilt, stain, or blemish; unspotted; irrep- roachable.

"In action faithful, and in honour *clear*." — *Pope*.

Serene; cheerful; unclouded; free from care or anxiety; as, a *clear* conscience.

Free from mixture, alloy, or impurity; unmixed; pure; as, *clear* water.

"Though deep, yet *clear*; though gentle, yet not dull." — *Denham*. Without external defect, flaw, or blemish; as, a *clear* skin, a *clear* picture.

adv. Plainly; manifestly; clearly; self-evident; — op- posed to *obscure*.

"Now *clear* I understand

What oft my steadiest thoughts have search'd in vain." — *Milton*. Free from limitation; quite; wholly; entirely; indicat- ing complete separation; as, to get *clear* off.

v. a. To make *clear* or bright; to free the sight from opaque obstructions or influences; to brighten.

"He sweeps the skies, and *clears* the cloudy North." — *Dryden*.

To fine; to purify; to clarify; to free from impurity, mixture, or deleterious matter; as, to *clear* liquors. To free from obscurity, ambiguity, or perplexity; to make evident and comprehensible; as, to *clear* a mystery.

"Many knotty points there are

Which all discuss, but few can *clear*." — *Pope*.

To free from anything noxious and injurious; to remove an impediment, encumbrance, obstruction, or embarrass- ment; as, to *clear* one's self from liability; to *clear* timbered land.

"This one mighty sum has *clear'd* the debt." — *Dryden*.

To remove any impediment to sound or hearing; to make audible; as, to *clear* the voice.

To free; to exonerate from the imputation of reproach or guilt; to justify; to vindicate; to acquit; as, the prisoner was *cleared*.

"How! would'st thou *clear* rebellion?" — *Addison*.

To make gain or profit beyond all expenses and charges; to realize; to net; as, to *clear* a fortune.

"He *cleared* but two hundred thousand crowns a year." — *Addison*.

To leap over without touching; as, to *clear* a snag, to

clear a fence. To remove anything in order to leave behind a free, open, unobstructed place; as, to *clear* away soil or rubbish.

To *clear* a ship at the Custom-house. (*Com.*) To per- form the necessary routine prescribed by the govern- ment Customs authorities in order to obtain permission for a ship to leave port for a stated voyage. — To *clear* the deads. (*Mining.*) To clear a shaft or drift. (Used in Cornwall, Eng.) — To *clear* for action. (*Naut.*) To re- move all articles which obstruct the decks of a ship, preparatory to an engagement. — To *clear* the land. To get sufficient sea-room, and prevent danger of running ashore.

v. i. To become *clear*; to become free from cloud or fog; to become fair; frequently preceding *up*, *off*, or *away*; as, the weather *clears* up.

To become free, disentangled, disengaged, and unen- cumbered.

"He that *clears* at once will relapse." — *Bacon*.

(*Com.*) In banking operations, to settle balances and exchange differences, by a system adopted among bankers.

To *clear* out. To depart; to leave; to make exit; as, to *clear* out bag and baggage. (Used colloquially.)

clear'age, *n.* Clearance; removal. (*R.*)

clear'ance, *n.* Act of clearance or removal; as, to effect a rapid *clearance* of goods.

(*Com.*) A certificate that a ship has been cleared at the Custom-house; and, hence, obtained permission to proceed to sea.

Clear or net profit.

Clear Creek, in *California*, in Shasta co., enters the Sacramento River 2 m. below Shasta City.

Clear Creek, in *Colorado*, a N. central co., area 375 sq. m. It is watered by Clear Creek. Its surface is moun- tainous, containing rich gold and silver mines. *Cap.* Georgetown. *Pop.* (1890) 7,184.

Clear Creek, in *Illinois*, in the S. part of the State, falls into the Mississippi.

A township of Clark co.—now included in Wabash twp.

A twp. of Cumberland co.—now included in Neoga twp.

Clear Creek, in *Indiana*, a small stream of Hunting- don co., enters Wabash River.—Another, in Monroe co., unites with Salt Creek.

A township of Huntington co.

A township of Monroe co.

Clear Creek, in *Iowa*, a flourishing township of Jasper county.

A township of Johnson co.

A township of Keokuk co.

Clear Creek, in *Kansas*, a township of Nemaha county.

Clear Creek, in *Missouri*, a village of Bates co.

A village of Daviess co.

Clear Creek, in *New York*, a post-village of Chautau- qua co., 320 m. W. by S. of Albany.

Clear Creek, in *Ohio*, a township of Ashland coun- ty.

A post-township of Fairfield co., 30 m. S. by E. of Co- lumbus.

—A township of Warren co.

Clear Creek, in *Tennessee*, a post-office of Greene co. **Clear'field**, in *Wisconsin*, a township of Juneau coun- ty.

Clear Creek Landing, in *Illinois*, a post-village of Alexander co., 215 m. S. of Springfield.

Clear'edness, *n.* State or quality of being cleared.

Clear'er, *n.* That which clears, purifies, or enlightens; a brightener.

"Gold is a wonderful *clearer* of the understanding." — *Addison*.

(*Naut.*) A sailmaker's tool.

Clear'ford, in *Pennsylvania*, a W. central co., mostly situated on the W. declivity of the Alleghany Moun- tains; area, 1,150 sq. m. It is washed by the W. branch of the Susquehanna River (which receives here the wa- ters of Clearfield Creek,) and by Mushannon Creek. The soil near the large streams is fertile, and the uplands af- ford good pasture. The forests furnish large quantities of pine, oak, poplar, and cherry, which are conveyed down the river by means of rafts. *Min.* Chiefly hard coal and iron. *Cap.* Clearfield. *Pop.* (1890) 69,565.

—A post-borough, cap. of the above county, in Lawrence township, on the W. branch of the Susquehanna, 120 m. W. N.W. of Harrisburg. *Pop.* (1897) ab. 3,000.

—A post-village and township of Butler co.

Clear'-headed, *a.* Having a clear head or under- standing; as, a *clear-headed* man.

Clear'ing, *n.* Act of making clear; justification; vin- dication.

—A tract of forest land after it is cleared of timber for tillage and cultivation.

(*Com.*) In banking, a method in use among bankers and financiers to settle balances, and regulate the ad- justment of exchange operations.

Clear'ing-house, *n.* (*Com.*) The office or place wherein is conducted the operation of clearing of bal- ances and accounts between bankers of the same place, for avoiding the inconvenience of carrying about large sums in currency or negotiable paper. Each bank sends to the clearing-office a clerk, whose duty it is to draw out an abstract of the checks upon other houses, and at the clearance to exchange them against those on his own bank. The balance is paid in cash. The first clear- ing-house established in the U. States was that in New York, in 1853, including 58 banks. In 1896 it included 65 banks, and the total clearings were \$29,350,894,884.

Clear Lake, in *California*, in Lake co.; length, abt. 20 m.; width, from 2 to 6 m. Near it are found gold and copper.

—A township of Lake co.

Clear Lake, in *Minnesota*, a township of Sherburne co., about 10 m. below St. Cloud.

Clear'ly, *adv.* In a clear manner; plainly; evidently; fully; distinctly; obviously; explicitly; luminously; as, to be *clearly* in the wrong.

Clear'ness, *n.* State of being clear; purity; bright- ness; transparency; splendor; lustre; openness; plain- ness; sincerity; distinctness; acuteness; quick discern- ment; as, *clearness* of expression.

Clear Port, in *Ohio*, a post-office of Fairfield co.

Clear'-seeing, *a.* Having a clear sight; intelligent.

Clear'-shining, *a.* Shining with unclouded bright- ness.

Clear'-sighted, *a.* Seeing with clearness; having acuteness of sight; discerning; perspicacious; as, a *clear-sighted* lawyer.

"*Clear-sighted* reason wisdom's judgment leads." — *Denham*.

Clear'sightedness, *n.* State of being clear-sighted; acute discernment.

Clear Spring, in *Indiana*, a village of Jackson co., 64 m. S. of Indianapolis.

—A village of Kosciusko co., 14 m. S.E. of Warsaw.

—A township of La Grange co.

Clear Spring, in *Maryland*, a post-village and twp. of Washington co., 110 m. N.W. of Annapolis.

Clear Spring, in *Pennsylvania*, a P. O. of York co.

Clear'-starch, *v. a.* To stiffen with starch, and then clear by alternately clapping and stretching between the hands.

"A widow, who washes, and can *clear-starch* his bands." — *Addison*.

Clear'-starcher, *n.* One who practises clear-starch- ing.

Clear'-story, *n.* (*Arch.*) See CLERESTORY.

Clear'-stuff, *n.* (*Carp.*) Boards, scantling, &c., free from knots.

Clear'ville, in *Pennsylvania*, a P. O. of Bedford co.

Clear Water, in *Minnesota*, a post-village of Wright co., 17 m. N.W. of Monticello, on the Mississippi.

Clear water, in *Wisconsin*, a village of Chippewa co., on Chippewa River, at the mouth of L'Eau Claire River.

Clear Water River, in *Idaho*, rises in the Rocky Mountains and flowing W., forms the N. boundary of Nez Percés co. Called also the *Kooskoosia*.

Clear'water (or *WASHACUMMOO*) **River**, in Brit. N. America, connecting Lake Methve with the river Atha- baska; Lat. 56° 30' N., Lon. 110° W.

Cleat, *n.* (*Carp.*) A short, narrow strip of wood, fast- ened to a piece of timber-work, to hold it in a certain position.

(*Naut.*) A piece of wood used on board ship, in vari- ous forms, to belay ropes to.

—An iron toe- or heel-piece affixed to shoes, to lessen their wear.

—*v. a.* To strengthen or support with a cleat.

Cleav'able, *a.* That may be cleft or divided.

Cleav'age, *n.* [*Fr. frivage*.] Act or manner of cleaving or splitting.

(*Min.*) A condition of rocks in which they are capable of being split into parallel plates indefinitely thin. The property of cleavage, in the strict sense of the word, is

confined to argillaceous rocks, and of all these the slates show the most perfect specimens. Mechanical compres- sion appears to produce, on substances exposed to it, conditions so like those of cleavage, that it is hardly possible to resist the conclusion that to this cause chiefly the phenomenon is due.

Cleave, *v. i.* (*imp.* CLEAVED, old spelling CLAVE; *pp.* CLEAVED.) [*A. S. cleofian, clifian*; *Ger. kleben*; *O. Ger. kleben, klebjan*, from *kleb*, glue; *Sansk. lip*, to besmear. See CLAY.] To stick; to hold to; to adhere closely.

"The thin chameleon, fed with air, receives

The color of the thing to which he *cleaves*." — *Dryden*.

—To fit; to unite aptly; to cohere; to match; to suit.

"Our strange garments *cleave* not to their mould." — *Shaks*.

—To unite by closeness of feeling or interest; to adhere to with strong attachment; as, to *cleave* to a wife.

"We cannot imagine, that . . . his grace doth *cleave* to the one, and forsake the other." — *Hooker*.

—*v. a.* (*imp.* CLOVE, or CLEFT; *pp.* CLOVEN, or CLEFT.) [*A. S. cleafan*; *D. kloven*; *O. Ger. kluuban*; *Swed. and Goth. klyfva*; *Icel. kluufa*, to split. Probably allied to *Gr. klaō*, to break off or in pieces.] To split; to rive; to part, separate, or divide by force; as, to *cleave* a carcass.

"And *cleave* a giant at a random blow." — *Tickell*.

—To divide or part naturally; to open or sever without vio- lence.

"And every beast that parteth the hoof, and *cleaveth* the cleft into two claws." — *Deut. xiv. 6*.

—*v. i.* To part asunder; to open; to crack; to separate.

"He cut the *cleaving* sky." — *Pope*.

Cleave'land, PARKER, LL.D., a distinguished Ameri- can mineralogist, b. in Mass., 1780. He graduated at Harvard Coll., in 1799, and six years later was appointed professor of chemistry, mineralogy, and natural philoso- phy, in Bowdoin Coll., Maine, a position which he honor- ably held for half a century. C. was the pioneer of natu- ral science in this country, and, in 1816, published his principal work, *The Elements of Mineralogy and Geology*, founded on the systems of Brongniart and Haüy. This work passed into a 2d edition in 1822. D. Oct. 15, 1858.

Cleave'land, in *New York* and *Ohio*. See CLEVELAND.

Cleave'landite, *n.* (*Min.*) A name given to ALBITE (*q. v.*), in honor of CLEVELAND, PARKER (*q. v.*).

Cleav'er, *n.* One who cleaves; that which cleaves, as a butcher's hatchet or chopper.

(*Bot.*) A climbing plant.

Cleav'ers, *n.* (*Bot.*) See GALIUM.

Cle'burne, in *Arkansas*, a small village, former capital of Cross co.

Cle'burne, in *Texas*, a town, the cap. of Johnson co.

Cleche, (*clech*), *n.* [*Fr. cléch*.] (*Her.*) A kind of cross charged with another cross of the same figure, but of the color of the field.

Cledge, (*klej*, *n.* [*A. S. clæg*, clay.]) (*Mining.*) The upper stratum of fuller's earth.

Cledgy, *a.* Tenacious; unyielding; stiff; as, a *cledgy* land.

Cleek's Mills, in *Virginia*, a post-office of Bath co.

Clef, *n.* [*Fr. clef*, from *Lat. claris*, a key; *Gr. kleis*, from *kleiō*, to close.] (*Mus.*) A character prefixed to a staff in music to determine the local names of the notes, and the sounds which they represent. There are three kinds of

clefs now in use: viz. (*fig.* 614), the G, placed on the second line; the C, on the third line; and the F, on the

fourth line. The C clef (*fig.* 615) is a fifth below the G clef, and a fifth above the F clef. The C clef is also placed on the fourth line for some instruments, and for the tenor part in vocal music.

Cleft, *imp.* and *pp.* of CLEAVE, *q. v.*

Cleft, *n.* [*From CLEAVE*.]

A space, aperture, or open- ing made by splitting; a crack; a crevice; a fissure; a chink; as, a *cleft* in a rock.

—A piece split off; as, a *cleft* of wood.

(*Farriery.*) A disease in the form of a crack on a horse's pastern.

(*Bot.*) When the inci- sions cut in the leaf ex- tend to about the middle of the blade, or somewhat deeper, and especially if the sinuses are acute, the leaf is said to be *cleft* (*fig.* 616); and the terms *two-cleft*, *three-cleft* (or in the Latin form, *bifid*, *trifid*, &c.) designate the number of

the segments.

Cleft'-footed, *a.* Having a cleft or cloven foot.

Cleft'-graft, *v. a.* To engraft by cleaving the stock of a tree, and inserting a branch or scion.

"Fibrets may be *cleft-grafted* on the common nut." — *Mortimer*.

Cleft'-grafting, *n.* (*Hort.*) The operation of insert- ing a scion into a cleft made in the stock of a tree. See GRAFTING.

Fig. 616.—A CLEFT LEAF.

Cleg, *n.* See GLEG.

Clem, *v. i.* [A. S. *chlemmian*; Icel. *klemma*, to emaciate.] To starve by deprivation of food. (Used in some parts of England.)

v. a. To famish; to starve; to be without food. (Prov. Eng.)

"What! will he *clem* me and my followers?"—Ben Jonson.

Clema'teae, *n. pl.* (Bot.) A tribe of plants, order *Ranunculaceae*. DIAG. Calyx valvate, or induplicate.

Clem'atis, *n.* (Bot.) A genus of plants, tribe *Clemateae*. The White-vine Clematis, *C. vitalba*, is a deciduous climber of vigorous growth. Height 15–30 feet. Flowers white in Aug.; common in France and England. The French gardeners make very neat baskets with its twigs.

Fig. 617. — CLEMATIS VITALBA.

In gardens and plantations the plant is valuable for the rapidity with which it may be made to cover naked walls, low buildings and arbors. A nearly similar species is the Virgin's Bower, *C. Virginiana*, common in hedges and thickets in the north of the U. States.

Clem'ence, *n.* [Fr. *clémence*, clemency.] Used poetically for clemency.

Clémence, ISAURE, (*klaï'mawnee*), a wealthy and illustrious lady of Toulon, France, who was descended, it is supposed, from the counts of that city. Towards the year 1490, she instituted at Toulon the "Jeu Floraux" (Floral Fêtes), and left considerable revenues for the support of these gatherings. B. about 1450; D. 1500 or 1513. These fêtes were established to encourage the art of poetry, and at them were distributed, for the best effusions, prizes consisting of different flowers in gold or silver. Something of the same kind had been commenced in 1322, and, in 1695, an academy was founded from the funds, and still exists at this day.

Clem'ency, *n.* [Lat. *clementia*, from *clemens*. Etymol. unknown.] Calmness; mildness; placidity; tranquillity; gentleness; lenity; indulgence; tenderness; a readiness to pardon, forgive, or spare; as, the clemency of the Almighty.

—Mildness, softness, in relation to the elements; as, the clemency of a climate.

Clem'ens, TITUS FLAVIUS, known as CLEMENT OF ALEXANDRIA, one of the fathers of the Church, B. about the middle of the 2d century. Of his early career so little is known, that it is doubtful whether he was born at Alexandria or at Athens; but about the year 189 he succeeded Pantænus in the catechetical school of the former city, and taught there until 202, when the edict of Severus compelled him to seek a new abode. In 210 he was in Cappadocia. D. about 220.

Clem'ent I., CLEMENS ROMANUS, Pope, and one of the apostolic fathers, B. about A. D. 30. It is supposed that he is the same Clement mentioned by St. Paul (*Phil.* iv. 3) as one of his fellow-laborers. The identity is asserted in Euseb. (*H. E.* iii. 4), Origen (vol. i. p. 262, ed. Lommatzsch), and Jerome (*Scriptor. Eccl.* p. 176). He was, according to Catholic tradition, baptized by St. Peter, and ordained bishop of Rome in 91, succeeding to Anacle'tus. Among the writings which are attributed to him are, one epistle exhorting to unity (generally admitted as genuine); two other epistles preserved by the Syriac Church; the two collections of apostolical canons and constitutions; and the *Clementines*, a narrative of his life, and of his connection and journeys with St. Peter. He is accounted a saint and martyr in the Roman calendar, his festival being Nov. 23. D. about 100, and was succeeded by Evaristus. In 1875, a part of the 1st and 2d Epistle, hitherto lost, were found in the library of the Holy Sepulchre in Constantinople, and shortly after, an ancient Syriac version of both Epistles was found in Paris. See *St. C. of Rome*, by Lightfoot. Lond. 1877.

CLEMENT II. (*Suidger*), was of Saxon birth, and, in 1046, succeeded Gregory VI., who was pope during the dynasty of Benedict IX. He crowned Henry III. emperor, and D. 1047; and at his death, Benedict was restored to the papal see.

CLEMENT III. succeeded Gregory VIII. in 1187, preached

a crusade against the Saracens; D. 1191, and was succeeded by Celestine III.

CLEMENT IV. (*Guido Fulcodi*), succeeded Urban IV. in 1265. He signed, with St. Louis of France, the "Pragmatic Sanction," which put an end to the differences existing between Rome and France. D. at Viterbo, 1268. His death was followed by a long interregnum.

CLEMENT V. (*Bertrand de Got*), succeeded Benedict XI. in 1305, and removed the residence of the popes from Rome to Avignon. He was the tool of Philip the Fair of France, and, at his desire, suppressed the order of Knights Templars. D. 1314, and had no immediate successor.

CLEMENT VI. (*Pierre Roger*), a native of Limousin, succeeded Benedict XII. in 1342. During his pontificate, Rienzi attempted to establish the republic at Rome. His learning and eloquence are applauded by Petrarch. D. at Avignon, 1352. His successor was Innocent VI.

CLEMENT VII. (*Giulio de Medici*), nephew of Lorenzo the Magnificent, and cousin of Leo X., succeeded Adrian VI. in 1523. He entered into the "holy league" with Francis I. of France, the Italian princes, and Henry VIII. of England, against the Emperor Charles V. In the war which ensued, Rome was taken and plundered, and the pope himself was shut up in the castle of St. Angelo. He had, consequently, to make terms with Charles. Subsequently, Henry VIII. having repudiated Catharine of Aragon and married Anne Boleyn, Clement excommunicated him in 1534. This occasioned a schism, and ultimately resulted in the separation of England from the Romish Church. D. 1534, and was succeeded by Paul III.

CLEMENT VIII. (*Ippolito Aldobrandini*), B. at Fano, 1536, was elected in 1592, succeeding Innocent IX. He absolved Henry IV. of France, upon that monarch making public profession of Catholicism, and was chiefly instrumental in bringing about the peace of Vervins, in 1598. He elevated to the rank of cardinal, Baronius, Bellarmine, and other distinguished men, and was a learned and sagacious pontiff. D. 1605, and was succeeded by Leo XI.

CLEMENT IX. (*Giulio Rospigliosi*), B. at Pistoia, 1600, succeeded Alexander VII., 1667. During his pontificate, Candia was taken from the Venetians by the Turks. D. 1666, and was succeeded by

CLEMENT X. (*Emilio Altieri*), B. 1590. Being of great age, the government was left in the hands of Cardinal Paluzzi, a distant relative. D. 1676, and was succeeded by Innocent XI.

CLEMENT XI. (*Giovanni Francesco Albani*), B. at Pesaro, 1649, succeeded Innocent XII., 1700. His pontificate was disturbed by the quarrels of the Jesuits and the Jansenists, and on issuing the famous bull "Unigenitus," a schism was produced, which lasted many years, between France and Rome. D. 1721, and was succeeded by Innocent XIII.

CLEMENT XII. (*Lorenzo di Corsini*), B. at Florence, 1652, succeeded Benedict XIII. in 1730, and reformed many abuses of the Church. D. 1740, and was succeeded by Benedict XIV.

CLEMENT XIII. (*Carlo Rezzonico*), B. at Venice, 1693, succeeded Benedict XIV., 1758. The Jesuits having been expelled from France, Spain, Portugal, and Naples, he made great but useless efforts to reinstate them. In 1768 he lost Avignon and Benevento. D. 1769. — There is a splendid mausoleum to him in St. Peter's, executed by Canova, who was eight years employed on it. He was succeeded by

CLEMENT XIV. (*Giovanni Vincenzo Antonio Ganganelli*), B. at St. Arcangelo, 1705. Being of a conciliating disposition, he lived on good terms with all the European courts, and recovered Avignon and Benevento, which had been lost under the preceding pontiff. Pressed to decide the question of the abolition of the order of the Jesuits, he, in 1773, after temporizing for several years, issued the bull ordaining their suppression. D. 1774, and was succeeded by Pius VI.

Clem'ent, JACQUES, a French regicide. See HENRY III.

Clem'ent, *a.* [Lat. *clemens*.] Calm; mild; placid; mild in temper and disposition; lenient; indulgent; kind; merciful; gracious; disposed to forgive, pardon, or spare; as, a clement ruler.

Clement of Alexandria. See CLEMENS.

Clemen'ti, MUZIO, an Italian composer, B. in Rome, 1752, spent the greater part of his life in England. He published 106 sonatas, several symphonies, overtures, &c., and a large work entitled *Gradus ad Parnassum*, on the art of pianoforte-playing. D. 1832.

Clem'entine, *a.* Pertaining to St. Clement, or to the constitution of Clement V.

Clem'ently, *adv.* With clemency; mercifully.

Clem'enton, in New Jersey, a village of Camden co., 13 m. S.S.E. of Camden.

Clem'entsburg, in Kentucky, a village of Crittenden co., on the Ohio, 220 m. W. by S. of Frankfort.

Clem'monsville, in North Carolina, a village of Davidson co.

Clench, *v. a.* See CLINCH.

Cle'obis and Bi'ton. (*Myth.*) Two youths, sons of Cydippe, the priestess of Juno, at Argos. When oxen could not be procured to draw their mother's chariot to the temple of Juno, they put themselves under the yoke, and drew it, amidst the acclamations of the multitude, who congratulated the mother on the piety of her sons. Cydippe entreated the goddess to reward them with the best gift that could be granted to mortals. When Cydippe came forth from the temple, she found her sons "asleep for ever" in each other's arms.

Cleobu'tus, one of the seven wise men of Greece, was a native of the Isle of Rhodes, and lived in the 6th century B. C.

Cleom'brotus, king of Sparta, gave battle, at Lenctra to the Thebans, headed by Epaminondas, and was there killed, 371 B. C. This battle, when the Spartan army was almost entirely destroyed, put an end to the pre-eminence of Sparta in Greece.

Cleo'me, *n.* (Bot.) A genus of plants, order *Capparidaceae*. The Spider-wort, *C. pungens*, 3–4 feet high, is a common garden-plaut, with curious purple flowers blossoming in July.

Cleom'enes III., king of Sparta, succeeded his father Leonidas. He was of an enterprising spirit, and resolved to restore the ancient discipline of Lyncrgus in its full force, by banishing luxury and intemperance. He made war against the Achæans, and attempted to destroy their league. Aratus, the general of the Achæans, who supposed himself inferior to his enemy, called Antigonus to his assistance; and Cleomenes, when he had fought the unfortunate battle of Sellasia, 222 B. C., retired into Egypt, to the court of Ptolemy Evergetes, where his wife and children had gone before him. Ptolemy received him with great cordiality; but his successor, weak and suspicious, soon expressed his jealousy of this noble stranger, and imprisoned him. Cleomenes killed himself, and his body was flayed and exposed on a cross 220 B. C. — There were others of this name, but of inferior note.

Cle'on, a celebrated Athenian popular leader, was the son of Cleænetus, and was by trade a tanner. He was the opponent of the measures of Pericles, on whose death he became the popular favorite. His character and designs have been represented in the most contradictory colors; and the controversy whether he is to be regarded as a earnest defender of popular rights, or a vulgar factious mob-leader, is still unsettled. He is severely treated by Thucydides, and is the object of the most merciless satire of Aristophanes. The massacre of the Mitylenæan prisoners at Athens, in B. C. 427, was chiefly owing to his influence. Two years afterwards he gained great distinction by his capture of the Spartans in the island of Sphacteria, opposite to the fort of Pylos. In 424 he commanded an expedition against Brasidas in Thrace and was defeated and killed in the battle before Amphipolis.

Cle'ona, in Iowa, a township of Scott co.

Cle'opas, one of the two disciples who were going to Emmaus on the day of the resurrection, when Jesus himself drew near and talked with them, (Luke xxiv. 18.) It is a question whether *C.* is to be considered identical with Cleophas or Alphaeus in John xix. 25. — See ALPHEUS.

Cleopat'ra, queen of Egypt. She was the daughter of Ptolemy Auletes, who, at his death, left his crown to her and her younger brother, Ptolemy; but being minors, they were placed under the guardianship of Pothinus and Achilles, who deprived Cleopatra of her share of the government.

Cæsar, however, who had met her at Alexandria, being struck with her youthful charms, — she was then about 17, — took up her cause and proclaimed her queen of Egypt; and for some time Cleopatra made the conqueror the bond-slave of her beauty. She followed him to Rome, and was there at the time of his murder. After Cæsar's death she captivated the triumvir, Mark Antony; who, after marrying Octavia, left her for the sake of Cleopatra. The latter was with Antony at the fatal battle of Actium, and failing to fascinate Augustus, and determined not to be his prisoner, she put an end to her existence by applying an asp to her arm, the bite of which caused her immediate death, B. C. 30, aged 39. Cleopatra had a son by Cæsar, and several children by Antony.

Cleopatra's Needle. See ALEXANDRIA.

Cleostrat'us, an eminent Greek astronomer and mathematician, a native of Tenedos. He first arranged the signs of the zodiac, and corrected the error in the length of the Grecian year, by introducing the period termed *Ochetris*. He flourished in the 6th century B. C.

Clepe, *v. a.* [A. S. *clipian*, to call.] To name, call, or designate. (0)

"Ere I could make thee . . . clepe thyself my love."—Shaks.

—*v. i.* To cry out in an appealing manner.

"Cleping for vengeance of this treachery."—Mirror for Magistrate.

Clep'sydra, *n.* [Lat., from Gr. *klepsydra* — *kleptō*, to steal, and *hydōr*, water.] A water-clock; a time-piece used by the ancients, which measured time by the discharge of a certain quantity of water, which stole gradually and insensibly away through an orifice of a determinate magnitude. Clepsydras were first brought into use in Egypt under the reigns of the Ptolemies, and seem to have been common in Rome, though they were employed chiefly in winter; in summer, sun-dials were used. Though clepsydras are attended with several inconveniences, the principal of which is the unequal rapidity of the flow caused either by a variation in the depth of the water in the containing vessel, or of temperature, or barometric pressure, they are nevertheless susceptible of considerable accuracy; and before the invention of clocks and watches, astronomers could depend only on clepsydras for measuring small portions of time. At present they are abandoned, because

Fig. 618. — CLEOPATRA.
(Bronze coin. Cabinet of Medals, Paris.)

pendulum clocks and watches are much more convenient, as well as infinitely more exact. In one case, however, it has been proposed to revive their use; namely, for the accurate measurement of very short intervals of time by the flowing of mercury from a small orifice in the bottom of a vessel kept constantly filled to a fixed height. The stream is intercepted at the moment of noting any event, and diverted aside into a receiver, into which it continues to run till the moment of noting any other event, when the intercepting cause is suddenly removed. The stream then flows in its original course, and ceases to run into the receiver. The weight of mercury received, compared with the weight of that which passes through the orifice in a given time, observed by the clock, gives the interval between the events. A form of water-clock has also recently been devised for communicating the necessary motion to telescopes equatorially mounted.

CLERE. See **LECLERC**.

CLERE-STORY. **CLERE-STORY.** (Arch.) An upper story, or row of windows in a Gothic church, rising clear above the adjoining parts of the building.

CLERGY. (*klérj*), *n. pl.* [Fr. *clergé*; Lat. *clericus*, *clerus*; Gr. *klérikos*, from *kléros*, a lot, portion, inheritance, from the manner in which Matthias was elected by lot to the postleship.] The body or order of men chosen or set apart to the service of God, in the Christian Church; — a contradistinction to the lay worshippers, or laity. This use of the term is very ancient, and appears to have gradually become prevalent, as the ministers of religion more and more exclusively, instead of the members of the Christian Church equally, began to be regarded as God's "heritage" and "priesthood" (1 Pt. ii. 9, and v. 3), consecrated to him, and peculiarly his. The distinction between the C. and the laity became more marked through the multiplication of offices and titles among the C., the ascription to them of a place in the Christian church similar to that of the priests and Levites in the Jewish Church, with peculiar rights and privileges; the growth of monastic institutions, and the introduction of celibacy. In harmony with the notions on which this distinction is founded, is that of an indelible character derived from ordination, so that a renunciation of the clerical office is either viewed as an impossibility, or a sort of apostasy. These notions in their highest degree belong to the Roman Catholic Church. In the Protestant churches, the distinction between C. and laity is much less wide; and although the same terms are often used, it is rather conventionally than in their full signification. Among the privileges accorded to the C. by the Roman emperors, and in the Middle Ages, was exemption from civil offices; among the rights asserted by them, and which caused much dispute, was exemption from lay-jurisdiction, even in cases of felony. The term *ecclesiastical* C. is the designation of priests of the Roman Catholic Church who are not of any religious order, but have the care of parishes. Monks who are in holy orders are designated *Regular C.*

CLERGYABLE. *a.* Admitting the benefit of clergy, or entitled to the same; as, a *clergyable* felony.

CLERGYMAN. *n.* *pl.* **CLERGYMEN.** One of the clergy; a man in holy orders; a person regularly qualified and authorized to preach the Gospel and administer its ordinances.

"It seems to be in the power of a reasonable *clergyman* to make the most ignorant man comprehend his duty." — *Swift*.

CLERICAL. *n.* [Lat. *clericus*.] A clerk, or clergyman; a clerical person.

CLERICAL. *a.* Belonging to the clergy; pertaining to the clergy, or a clergyman; as, *clerical* duties, — pertaining to a clerk or writer; as, a *clerical* error.

CLERICALITY. *n.* State or condition of a clergyman.

CLERICAL. *n.* [See **CLERGY**.] The literary or well-educated element of society.

CLERK. *n.* [A.S. *clerc*, *cleric*, from Lat. *clericus*; Gr. *klérikos*.] In its primary sense, it was the legal appellation of a clergyman. The clergy being exclusively the learned part of the community of the Middle Ages, the word hence came to signify an educated person; and thus acquired the sense of a scribe or writer in France and England.

CLERK. *n.* man of letters; a scholar. (*o*)
one who is employed under another person as a writer or accountant; a scribe; a peuman; as, a merchant's *clerk*; the *clerk* of a court, &c.

"A clerk foredoom'd his father's soul to cross.
Who pens a stanza when he should engross." — *Pope*.

CLERK. *n.* an assistant in a shop or store, who acts as a salesman, &c.; one who attends only to a part of the business of a merchant, while the merchant himself superintends the whole. (U. States.)

CLERK. *n.* In England, a lay functionary who reads the responses in a church; as, a *parish-clerk*.

CLERK'S-FAIR. *n.* In England, a village festival held in honor of the parish-clerk.

CLERKLESS. *a.* Illiterate; ignorant; without learning.

CLERKLINESS. *n.* State or quality of being clerkly; clerkship.

CLERKLY. *a.* Scholarly; literate; learned.

CLERKSHIP. *n.* State of being a member of the ministry of the Church.

CLERKSHIP. *n.* scholarship; literary qualifications; learning.

CLERKSHIP. *n.* office or business of a clerk; as, a *clerkship* in the Treasury. — Function of a lay church-officer; as, a *parish-clerkship*.

CLERMONT. [Lat. *clarus mons*, airy mountain.] The name of many small French towns and villages.

CLERMONT. *n.* in Indiana, a post-village of Marion co., 10 m. W.N.W. of Indianapolis.

CLERMONT. *n.* in Iowa, a post-village and township of

Fayette co., 28 m. W. of Prairie du Chien, and 36 S.S.W. of Lansing, on Turkey River.

CLERMONT. *n.* in New York, a post-township of Columbia county, 10 m. S. by W. of Hudson, on the Hudson River.

CLERMONT. *n.* in Ohio, a S.W. co.; area, 462 sq. m. It is bounded on the S.W. by the Ohio, on the W. by the Little Miami River, and drained by the E. fork of Little Miami. Surface, irregular; soil, fertile, and a rich agricultural co. Cap. Batavia. Population in 1890, 33,497.

CLERMONT. *n.* in Tennessee, a village of Warren co., about 60 m. S.E. of Nashville.

CLERMONT-FERRAND. (anc. *Augustonemetum*.) a city of France, cap. of dep. Puy-de-Dôme, on an affluent of the Allier, 82 m. W. of Lyons and 208 m. S. by W. of Paris. It is finely situated on an eminence, surrounded on the S. and W. by an amphitheatre of mountains, of which the Puy-de-Dôme is the culminating point, and overlooking on the N. and E. the picturesque and fertile plain of the Limagne. Manf. Linen, woollen cloths, paper, &c. Anterior to the Roman conquest, this city was named *Nemusus*, and was the cap. of the Arverni. It is the birthplace of Gregory of Tours, Pascal, Delille, Desaix, &c. Pop. 37,690.

CLERMONT-FERRAND. a town of France, dep. Hérault, 23 m. W.N.W. of Montpellier. It has extensive manufactures of woollen cloth. Pop. 6,050.

CLERMONT MILLS. in Maryland, a post-office of Hartford co.

CLERMONT-TONNERRE. ANTOINE JULES DE, a French cardinal, b. 1749. He was an active member of the States-general; but is chiefly remembered as author of the interesting *Journal of what occurred at the Temple during the Captivity of Louis XVI.* D. 1830.

CLERMONT-TONNERRE. STANISLAS, COMTE DE, was one of the first among the nobility to side with the popular party in the opening scenes of the French revolution. Having at length given umbrage to his party, he was put to death in 1792.

CLERMONT-TONNERRE. an island of the Pacific, in the Low Island group, in Lat. 18° 32' 49" S., Lon. 136° 21' 12" W. Surface low; 10 m. long, and 1½ wide. It was discovered by the French admiral Duperre in 1825.

CLERMONTVILLE. in Pennsylvania, a post-village of McKean co., 194 m. N. W. of Harrisburg.

CLEROMANCY. *n.* [Fr. *cléromancie*, from Gr. *kléros*, lot, and *manéia*, prophesying.] Art of divination by the tossing of dice or other marked cubes.

CLERONOMY. *n.* [Gr. *kléros*, and *nemesithai*, to possess.] Heritance; patrimony; hereditary position; inheritance.

CLER-STORY. *n.* (Arch.) See **CLERE-STORY**.

CLERUS. *n.* **CLERIDE.** *n. pl.* (*Zool.*) A genus and family of Coleopterous insects, of small extent; generally handsomely variegated in their colors, and seldom exceeding an inch in length. The species of the genus *Clerus* are amongst the largest of the family; having the elytra generally of a bright red color, ornamented with purple spots. The perfect insects extract the honey from flowers; but their larvæ, which are of a bright red color, are very destructive to bees and wasps, in the nests of which the females deposit their eggs, during the absence of those insects, upon whose grubs the larvæ of the *Clerus* prey; they begin in the cell where they were hatched, and proceed from cell to cell, devouring each inhabitant until they arrive at maturity.

Fig. 619.
HIVE-BEETLE.
(*C. apivorus*.)

CLETHRA. *n.* (*Bot.*) A genus of plants, order Ericaceæ.

The Sweet-pepper Bush, *C. alnifolia*, is a deciduous shrub, 4 to 8 feet high, growing in swamps; leaves alternate, petiolate; peduncles and calyx hoary-pubescent; corolla white, spreading, about equalling the stamens and styles; blossoming in July.

Fig. 620. — SWEET PEPPER-BUSH.
(*C. alnifolia*.)

CLETO CREEK. in Texas, Goliad co., flows S. into the San Antonio.

CLEVELAND. CHARLES DEXTER, an American author, b. 1802. In 1823 he entered Dartmouth Coll., and wrote *The Moral Characters of Theophrastus*, with a Translation and Critical Notes, and an *Epitome of Grecian Antiquities*, in 1827, both works having been published before he took his degree. His *First Lessons in Latin upon a New Plan*, and a work entitled *The National Orator*, appeared in 1828, and his edition of *Xenophon's Anabasis*, with *English Notes*, in 1830; in which year he was elected to the professorship of the Latin and Greek Languages in Dickinson Coll. In 1831 he published *A Compendium of Grecian Antiquities*. In 1832 he was appointed Professor of Latin in the University of New York, and in 1834 he established a young ladies' school in Philadelphia. In addition to other educational works, he published,

in 1848, *A Compendium of English Literature, from Sir John Mandeville to William Cooper*, and a continuation of the work under the title of *English Literature of the Nineteenth Century*. Prof. C. was author of other works, including an edition of *Milton's Poetical Works*, with *Life and Dissertation on each Poem*. D. 1869.

CLEVELAND. GROVER. See **SECTION II.**

CLEVELAND. in Geo., a v. of Meriwether co. — A p.-v., cap. of White co. — In Ill., a v. of Boone co. — In Ind., a twp. of Elkhart co. — A v. of Tippecanoe co. — A p.-v. of Hancock co. — A twp. of Whitley co. — In Minn., a p.-v. of Le Sueur co. — In N. Y., a p.-v. of Oswego co.

CLEVELAND. in N. C., a S. W. co., bordering on S. C.; area, 660 sq. m. Surf. irregular, with considerable elevations, the principal is King's Mountain, in the S. E. of the co. Soil, generally fertile. Cap. Shelby.

CLEVELAND. in Ohio, a large city and port of entry, cap. Cuyahoga co., on Lake Erie, at the mouth of Cuyahoga river, 225 m. N. E. of Cincinnati, 195 m. S. W. of Buffalo, and 135 E. N. E. of Columbus; Lat. 41° 31' 7" N., and Lon. 81° 45' 57" W. This fine city (the second in the State in size, wealth, and importance) is situated on a high bluff elevated some 80 ft. above the lake, has broad, rectangular streets, well shaded with trees (whence it is called the "Forest City"), several public squares, and a number of handsome public edifices. Among these are the U. S. buildings, the County Court-House, U. S. Marine Hospital, Charity Hospital, City Hall, the Music Hall, seating 5,000, and the Union R. R. depot; numerous churches of various denominations; a large number of excellent schools, colleges, literary and theatrical institutions, &c. In the center of the principal square adorning this city is a magnificent marble statue of Commodore Perry, the hero of Lake Erie. Wade Park, 63 acres in area, is situated on Euclid avenue, one of the finest streets in the U. S. Gordon Park, 120 acres, lies 2 m. N. on the lake shore, the two being connected by a wide boulevard. There are several handsome cemeteries, as the City, Lake View, Riverside, the Woodland, the Roman Catholic, &c. From the commanding position this city occupies on Lake Erie, it necessarily follows that it is a place of the highest commercial importance, both as a railroad center and as the entrepôt of a large trade with Canada. The great Ohio Canal, connecting with the Ohio river, has here its chief outlet; while several lines of railroad meet in C. Just beyond the city limits is the beautiful Lake View Cemetery, where, 250 feet above Lake Erie, stands the Garfield monument, built at a cost of \$130,000, and 125 feet in height. Beneath repose the remains of the late President Garfield. The elevated plain on which C. stands is cut into two unequal divisions by the Cuyahoga river, which flows through bottom lands half a mile wide, known as "the flats." This depressed section is traversed by railroad lines and occupied by railroad stations, repair and car shops, great lumber yards, coal and ship yards, iron foundries and various other industrial establishments. A score of bridges span the Cuyahoga and its valley, and it is crossed by three great viaducts, one of them 3,931 feet long. The large and important traffic carried on between C. and Canada, and the regions about Lake Superior, employs a great steam fleet; while sailing-vessels of a light draught hold regular communication with Liverpool, Eng., via the lakes, Welland Canal, and the river St. Lawrence. C. is the entrepôt of the copper and iron ore brought from Lake Superior; and, on the other hand, forms the shipping port for the coal and agricultural produce of the great State of Ohio, to Canada and foreign countries. The freight received and shipped by lake in 1890 amounted to 4,371,269 tons, including more than 2,000,000 tons of iron ore. About 500,000,000 feet of lumber are received annually. An extensive break-water has been constructed by the U. S., designed as a harbor of refuge. The principal manufacturing interests of this flourishing city consist in copper-smelting, boiler-making, coal-oil distilling, manufacture of sewing-machines, &c. Malleable iron forms a very extensive industry, while in the building of steel and iron vessels C. surpasses all lake ports. Lumber, wool, and salt provisions also form a prominent feature of its industrial prosperity. The city is governed by a mayor and a city council, made up of a representative from each of the 20 districts formed from the 40 wards. It had a net debt on Jan. 1, 1897, of \$5,393,453, while the assessed valuation of taxable property was \$134,565,905. C. was laid out in October, 1796, by a party of surveyors headed by Moses Cleveland, from whom it received its name. It grew slowly, and was not made a city till 1836. In 1854 Ohio City, on the W. side of the river, was united with C. Other annexations have since been made, C. being now about 32 sq. miles in area. It has of late years grown rapidly, and in 1890 had a population of 261,353. Estimated pop. Jan. 1, 1897, 370,000.

— In Tenn., a town, cap. of Bradley co. Pop. (1897) 4,000.

CLEVELANDER. SHOBAI VAIL, an American sculptor, b. at Middleton, Ohio, 1812. He executed the busts of Webster, Clay, Van Buren, &c. D. 1843.

CLEVER. *a.* [A. S. *glæwerfhlth*, from *glaw*, skilful, sagacious; O. Ger. *glaw*; Icel. *glögg*, acute, sharp; Goth. *glaggrn*, with accuracy, with care.] Sagacious; perspicacious; skilful; talented; dexterous; adroit; able; acute; expert; as, a *clever* author.

"Be good, sweet maid, and let who will be *clever*." — *C. Kingsley*.

— Executed with ability, dexterity, skill, and success; as, a *clever* performance.

"It was the *cleverer* mockery of the two." — *L'Estrange*.

— Possessing fitness, appropriateness, suitability, or propriety.

"I can't but think 't would sound more *clever*,
To me, and to my heirs for ever." — *Pope*.

—Handsome; well-shaped; attractive.

"The girl was a tight *clever* wench as any was." —*Arbuthnot*.

—An Americanism, denoting agreeable; good-natured; amiable; obliging; as, a *clever* fellow.

Cleverish, *a.* Clever in a moderate sense. (R.)

Cleverly, *adv.* In a clever, expert, or able manner; as, the book is *cleverly* written.

"A rogue may take a man's head off as *cleverly* as an executioner." —*South*.

Cleverness, *n.* Quality of being clever; ability; adroitness; dexterity; skill.

—Agreeableness of disposition; amiability; courtesy; obligingness; good-nature. (Used exclusively in the U. S.)

Cleves, a town of Prussia, prov. Rhine, formerly the cap. of the duchy of Cleves, on the rivulet Kermisdal, within 2 m. from the Rhine. *Manuf.* Flannel and cotton; it has also iron-foundries. *Pop.* 10,000.

Cleves, or **Cleves'town**, in *Ohio*, a post-village of Hamilton co., abt. 12 m. W. by N. of Cincinnati.

Clevis, **Clev'y**, *n.* [O. Eng. *clewe*.] An iron bent in the form of an ox-bow, with the two ends perforated to receive a pin, used on the end of a tongue of a wagon, cart, or plough, to draw it by.

Clew, (frequently written *CLUE*), *n.* [A. S. *cleow*, *clive*; Du. *klawen*; O. Ger. *kloben*; Lat. *globus*; allied to W. *clob*, a round knob, a lump.] A ball of thread; the thread that forms a ball.

"They see small *clews* draw vastest weights along." —*Dryden*.

—The thread that guides a person in a labyrinth.

"While guided by some *clew* of heav'nly thread,
The perplex'd labyrinth we backward tread." —*Roscommon*.

—Anything that guides or directs one in an intricate case, or when one is in doubt.

"No *clew* to guide me thro' this gloomy maze." —*Smith*.

(*Naut.*) The lower corner of square sails, and the after corner of a fore-and-aft sail.

—*v. a.* To direct, as by a thread.

(*Naut.*) To truss up sails to the yard, in order to furling; as, to *clew* the main-topsail.

Clew Bay, in Ireland, an inlet of the Atlantic, in co. Mayo, Connaught, Lat. 53° 55' N., Lon. 9° 50' W., extending inland for abt. 15 m., with a nearly uniform breadth of 8 m.

Clew'-garnets, **Clue'-garnets**, *n. pl.* (*Naut.*) Ropes for hauling up the clews of the fore-sail or main-sail of a square-rigged vessel.

Clew'-lines, **Clue'-lines**, *n. pl.* (*Naut.*) Ropes used on board ship for hauling up the clews of a square sail.

Cliché, (*kle-sha'*) [Fr.] (*Metal.*) The matrix of a die. — *Cliché casting*, a mode of casting whereby the mould is forced perpendicularly down upon the metal while in a state of fusion.

Clichy-la-Garenne, a village of France, dep. Seine, formerly 5 m. N.W. Paris, but now contiguous to the fortifications of the capital. Here, on March 30, 1814, an engagement took place between the allies and the National Guard under Marshal Moncey.

Click, *v. i.* [Formed from the sound. See *CLACK*, of which *click* may be regarded as a weakened form.] To make a small, sharp noise, or rather a succession of such sounds, as by a gentle striking.

"The varnish'd clock that *click'd* behind the door." —*Goldsmith*.

—*v. a.* To snatch or seize in a hurried manner. (Used in some parts of England.)

—*n.* [O. Fr. *clieche*.] (*Mach.*) A pall, or small piece of iron falling with a clicking sound into a notched or ratchet-wheel.

—The latch of a door. (An English provincialism.)

—A small, sharp sound; as, a *click* of the tongue. See *CLUCK*.

Click'er, *n.* A cant term for a salesman or trader's servant, who stands at the door to invite customers. — In some trades, the man who distributes work.

Click'et, *n.* [O. Fr. *cliquet*.] The knocker of a door. — The latch-key of a door.

Cl'ency, *n.* State or condition of a client.

Cl'ient, *n.* [Fr. *client*; Lat. *cliens*, from Gr. *kluō*, to hear, to comply with, obey; found in *aus-cul-to*, to give ear to; Sansk. *gru*, to hear.] Among the ancient Romans, the clients were a numerous body of the Roman citizens, so termed relatively to their patrons or protectors.

This relation was in many aspects similar to that of a serf to his feudal lord, but bore a much milder form. It was the duty of the patron to watch over the interests of his clients, protect them from aggression, and appear for them in law-suits. He also frequently made them grants of land on lease. In return the client was bound to defend his patron, and contribute towards any extraordinary expenses he might be subject to; as the portioning his daughters, the payment of a fine imposed on the estate, &c. He might not appear as accuser or witness against him in judicial proceedings; a prohibition which was reciprocal. The body of clients was increased by the institution by which foreigners, who, as allies of Rome, had a share of its franchise, might choose themselves patrons on their coming to settle in the city. The obligations of clients were hereditary, and could not be shaken off unless through the decay of the family of the patron. The clients have by some been distinguished from the plebeians; by others they have been regarded as plebeians who of their own will entered into certain relations with the patrician families. — Among the other duties of a Roman patron towards his client was that of maintaining his cause gratuitously in legal proceedings. Hence the term *client* has become appropriated in modern times to one whose cause is prosecuted, or defended, and his person represented by an advocate, counsellor, or lawyer, — though it cannot be said that such representations be at all gratuitous.

Cl'ientage, *n.* A body, or the business, of clients.

Client'al, *a.* Dependent; as, "A *cliental* relation." —*Burke*.

—Of, or relating to, a client; as, the "*cliental* chair." —*Dickens*.

Cl'iented, *a.* Supplied with clients.

"The worse-conditioned and least-*cliented* pettifoggers." —*Carew*.

Client'elage, *n.* A body of dependent persons; the followers of a nobleman.

Cl'ientship, *n.* Condition of a client; state of dependency upon a patron.

"Patronage and *clientship* among the Romans always descended." —*Dryden*.

Clif'den, in *Idaho*, a mining village of Alturas co., on Feather River, about ½ m. from Rocky Bar.

Clif'den, in Ireland, a seaport-town of Connaught, dist., Connemara, co. and 43 m. W.N.W. of Galway, on an inlet of Ardhear harbor; *pop.* 1,500.

Cliff, *n.* [A. S. *clif*, *clif*, *cleofa*, from *clifian*, *cleofian*, to

Fig. 621. — LIZARD POINT.
(Cornwall, England.)

cleave.] The precipitous side of a rocky mountain; a steep bank; a high and abrupt rock (fig. 621); any precipice.

Cliff, *n.* See *CLEF*.

Cliff-dwellers. See SECTION II.

Cliff-limestone, *n.* (*Geol.*) In the States west of New York, the limestones directly upon the Clinton limestone. In the peninsula of Michigan the thickness is about 100 ft. (*Winchell*). In Ohio, Indiana, and Illinois, this rock and the coniferous strata overlying it have been called the *Cliff-limestone*, because it often stands in bold bluffs along the river-valleys. Such bluffs are a common feature in all limestone regions where the strata are nearly horizontal and in heavy beds.

Clifford, in *Indiana*, a post-village of Bartholomew co., on Flat Rock Creek, about 8 m. N. by E. of Columbus.

Clifford, in *Pennsylvania*, a post-township of Susquehanna co., 10 m. N. of Carbondale.

Cliffy, *a.* Having cliffs; broken; craggy; as, "Vesta's *cliffy* isle." —*Dyer*.

Clift, *n.* [See *CLIFF*.] A fissure, crack, or cleft.

"High growing on the top of rocky *clift*." —*Spenser*.

Clift'ed, *a.* Broken; fractured; fissured.

Clifton, a favorite watering-place of England, forming the W. suburb of Bristol. It has tepid springs of 75°, which contain much carbonic acid and salts of magnesia, and were brought into notice about 1675. *Pop.* 17,897. — See *BRISTOL*.

Clifton, in *Illinois*, a post-village of Iroquois co., 69 m. S. by W. of Chicago.

Clifton, in *Indiana*, a flourishing township of Boone co.

Clifton, in *Iowa*, a post-village of Louisa co., 22 m. S.W. of Muscatine.

Clifton, in *Kansas*, a post-village of Washington co., about 50 m. N.W. of Manhattan.

Clifton, in *Kentucky*, a village of Woodford co., on the Kentucky River.

Clifton, in *Maine*, a township of Penobscot county.

Clifton, in *Michigan*, a P.O. of Keweenaw co.

Clifton, in *Minnesota*, a village of St. Louis co., on Lake Superior, about 12 m. N.E. of Du Luth.

Clifton, in *Missouri*, a village of Jefferson co., on the Mississippi River, 26 m. S. by W. of St. Louis.

Clifton, in *Nevada*, a village of Lander co., on the Troiyabe Mountain range, in Reese River mining district, 1 m. W. of Austin.

Clifton, in *New York*, a twp. of St. Lawrence co.

—A village of Richmond co., on New York Bay, about 7 m. S.S.W. of New York city.

Clifton, in *Ohio*, a village of Clarke co., about 50 m. S.W. of Columbus.

—A post-village of Greene co., on the Little Miami River, 75 m. N.E. of Cincinnati.

Clifton, in *Pennsylvania*, a village of Carbon co., N. of the Lehigh river, about 120 m. N. E. of Harrisburg.

—A post-village of Lacka co., abt. 16 m. S. E. of Scranton.

Clifton, in *Tennessee*, a post-village of Wayne co.

Clifton, in *W. Virginia*, a post-office of Mason co.

Clifton, in *Wisconsin*, a village of Dane co., on the Wisconsin River, about 24 m. N.W. of Madison.

—A township of Grant co.

—A post-township of Monroe co., about 22 m. E.S.E. of Sparta.

—A township of Pierce co., on the St. Croix River, 5 m. above Prescott.

Clifton Dale, in *Massachusetts*, a P. O. of Essex co.

Clifton Forge, in *Virginia*, a town of Alleghany co.

Clifton Hill, in *Missouri*, a post-office of Randolph co.

Clifton Park, in *New York*, a post-township of Saratoga co., 17 m. N. by W. of Albany, bordering on the Mohawk River and Erie Canal.

Clifton Springs, in *New York*, a post-village of Ontario co., 44 m. E.S.E. of Rochester.

Clifty, in *Indiana*, a flourishing township of Bartholomew co.

Clifty, in *Indiana*, a post-village of Decatur co., 45 m. S.E. of Indianapolis.

Clifty Creek, in *Alabama*, flows S. into Sipsey River in Walker co.

Clifty Creek, in *Indiana*, Jefferson co., falls in the Ohio 1 m. below Madison.

Clifty Creek, in *Indiana*, rises in Rush co., flows S.W. about 50 m. and enters the Driftwood Fork of White River, 3 m. below Columbus.

Clifty Creek, in *Kentucky*, flows through the S. part of Muhlenberg co., into Muddy Creek.

Climac'ter, *n.* Same as *CLIMACTERIC*.

Climac'teric, *n.* [Gr. *klimakter*, adj. of *klimaktērīke* from *klimax*, a ladder, a staircase, from *klinō*, to mal-

to slope or slant.] (*Physiol.*) By this word was formerly understood a critical period in human life; when a certain stage or progress in life had been accomplished, at which the frame was considered more susceptible of external impressions than at other times; and after which, if passed with safety, the body was likely (except from special circumstances) to escape the dangers of mortality. The ancients, who fully entertained and implicitly believed in these periodical changes, divided the life into certain epochs; the first taking place at the end of the 7th year, and the subsequent periods answering the numbers resulting from the multiplication of 3, and 9 into each other — as the 21st, the 49th, the 63rd, and the 81st. It is supposed that Pythagoras derived the doctrine of the *C.* system from the Egyptians; but be this as it may, the changes that take place at the several periods are very important, and are of two opposite kinds — the one of renovation, the other of decay. It is seldom, in such an artificial life as a high state of civilization entails, that the processes of decay which mark the two last epochs can be carefully studied; so disease or other consequent on an artificial state of existence occurring, under which, when chronic, as is generally the case, all the gradual advances of nature toward absolute exhaustion are lost sight of and remain unnoticed, till their concentrated effects are developed, what is known by the popular phrase of a "breaking up of the physical and mental strength." When this decay comes on naturally, it is found to show itself more frequently, and always more strongly, in the man than in the woman; the reason of this is self-evident, from the more active, exciting, and exhausting career of the man than that of the woman. By the *C.* system, 7 years were declared to be the termination of childhood; 14 the term of puberty; 21 of adult age; and 35, or five times seven, as the height of physical and bodily strength; at seven times seven, or 49, the person was said to have reached the height of his mental strength, or intellectual powers; at 63, or nine times seven, he was said to have reached the grand climacteric; and at the tenth return of the seventh year, or 70th year of age, the ordinary limit of human life was said to be reached.

Climac'terical, *a.* Relating to, or denoting, a critical period of human life; climacteric.

Cl'imatal, *a.* Pertaining to, or caused by, climate; a *climatal* disease.

Climatar'chio, *a.* [From Gr. *klimatos*, and *arche* to be chief.] Presiding over climates.

Cl'imate, *n.* [Fr. *climat*; Gr. *klima*, *klimatos*, from *klinō*, *keklimas*, to make to bend, slope, or incline (*Anc. Geog.*) A region or zone of the earth's surface said by the ancients to decline towards the equator, or incline towards the poles.

(*Clim.*) Climate, in its most general acceptation, embraces all those modifications of the atmosphere by which our organs are sensibly affected: such as temperature, humidity, variations of barometric pressure, the tranquillity of the atmosphere or the effects of winds, the purity of the air, or its mixture with gaseous emanations more or less salubrious; and lastly, the habitual diaphanity of the atmosphere — that serenity of the sky so important account of the influence which it exercises not only the development of organic tissues in vegetables and ripening of fruits, but also on the ensemble of moral sensations which mankind experience in the different zones. There are two general causes on which the climate peculiar to any country principally depends — 1st, its distance from the equator; 2d, its altitude above the level of the sea; but their effect is generally modified by many circumstances exerting a partial influence. Among these may be enumerated the configuration and extent of the country; its inclination and local exposure; the direction of the chains of mountains by which it is intersected, or which are in its vicinity; the nature of the soil as it is more or less favorable to radiation, absorption, and evaporation; the proximity to, or distance from seas; the action of winds blending the temperatures of different latitudes; and even the changes produced by cultivation. The appreciation of all these causes, which modify the results deduced from the consideration of latitude and elevation alone, and the effect produced by their combined operation, constitutes the science of *Climatology*. The actual system of climate may be briefly explained. The land takes up heat rapidly in summer, and, in the north, becomes frozen and snow-clad in winter. Land winds may, consequently, be intensely hot or intensely cold; and hence

lands have a tendency to produce extremes of climate. A place on the continents having a mean January temperature of 50° (a very warm temperature for that season) is to be found only in warm latitudes, and one with a mean July temperature of 50° (a cold temperature for the season) only in the colder zones of the globe. The mean January temperature of New York is 31½° F., while the mean July temperature is 73°. Now, in North America the January isothermal line of 50° almost touches the Gulf of Mexico, and the July line of 50° passes near the mouth of Mackenzie River, or the arctic circle. — the extreme winters and intense summers causing this great change. In Asia, again, the January line of 50° runs just north of Canton, near 26° N., and the July line of 50° touches the Arctic Ocean at the mouth of the Lena, in 72° N., making a difference of 46° of latitude, or nearly 3,000 miles, as the effect of the land on the climate. The waters of the ocean remain unfrozen even far into the arctic, unless crowded with lands, their perpetual movement tending to produce a uniformity of temperature over the globe; and hence winds from the oceans or any large body of water are moderating and never very cold. They produce what is called an *insular* climate. Absence of land from high latitudes is equivalent to an absence of the source of extreme cold; and from tropical latitudes, that of extreme heat; and the sinking of all lands would diminish greatly both extremes. But sinking high-latitude lands also diminish the extreme of heat, since the lands become very much heated in summer, and this heat is diffused by the winds. The mean temperature of the Northern hemisphere is stated by Dove at 60° F., and that of the Southern at 56° F., while the extremes for the globe, taking the annual means, are 80° F. and zero. If there were no land, the mean temperature would probably be but little above what it is now, or not far from 60° for the whole globe.

(*Physiol.*) The faculty with which man can adapt himself to every contingency of climate, and not only exist, but flourish, under the most opposite extremes of heat or cold, wet or dry, is one of the most remarkable circumstances connected with the history of human life; and yet the means by which nature has provided for these vicissitudes of temperature are as simple as they are beautiful. Although nature has been thus bountiful in enabling man to live with safety under the gloom of an arctic winter, or on the scorching plains of a torrid zone, some judgment and prudence are demanded from the man himself, if he hopes to pass through his probation in either condition with comfort and safety. That he may not err in his adoption of such necessary rules, he is assisted by a species of instinct and by a number of examples, which, if he exercise the reasoning properties with which he has been so largely endowed, can only through ignorance or inattention cause him to do other than always turn such evidences to his benefit and guidance. The first of these is the natural craving of the system for a dietary in accordance with the temperature of the country in which the individual is placed — that is, according as the stomach and imagination are left unfettered by prejudice or custom to follow an independent course of action. Thus, under a vertical sun, when the exhaustion from heat is excessive, and the circulation of the blood is in advance of the natural course, a full and stimulating diet of animal food is itself not only highly injudicious and uncalled for, but, when persevered in, becomes actually hurtful, and may be, under certain conditions, dangerous to the integrity of the system. Again, if, under the crushing influence of perpetual frost and snow, a man attempt to keep up his animal heat and resist the depressing potency of benumbing cold, by an Asiatic or vegetarian dietary, the consequences would be equally dangerous, and even more rapidly fatal. In the same manner, the color of the natural clothing of the wild animals of the region should appeal to the judgment of man, and instruct him always to dress as nearly as possible in the same tone as that of the native denizens of the bush or plain, the ice-floe or the jungle. Why man can endure with impunity ranges of temperature that, described by the readings of the thermometer, would to many appear perfectly absurd, proceeds entirely from the balance of power kept up between the temperature of the skin and that of the surrounding atmosphere, by the circulation of the blood through the lungs raising the temperature, by the absorption and mixture of oxygen from the air with the carbon in the blood, and the giving off of carbonic acid gas: animal heat being created by the instantaneous change. The more frequently a man breathes, as in running, the greater is the amount of heat the individual experiences. It is from this fact — the generation of an extra amount of animal heat, with a corresponding evaporation from the surface of the body — that the man who some years ago, in France, exhibited himself seated in a baker's oven, while his dinner was being cooked at his feet, was enabled to endure without danger so high a temperature, and for so comparatively long a period of time.

(*Med.*) The influence of climate on the human life is now so universally allowed, that it is quite unnecessary for us to say a word respecting its beneficial action on the animal economy; the benefit resulting from the change from a cold, humid atmosphere, to a warm, dry one, is also as well understood, and as marked in its effects, as a change of treatment from an ignorant to a scientific system is satisfactory and apparent. The influence exercised on the respiratory organs and the skin by a bland atmosphere is not only immediate, but apparent — not merely confined to those organs, but, by the improved condition of the blood, resulting from such a change, reciprocating the benefit acquired on the brain,

by the quicker and livelier state of the imagination — on the nutritive system, by a fuller condition of the body from a perfect digestion; and on the nervous temperament, by the more regular and natural performance of all the functions of the body — the best indication at all times of sound physical health.

Climatic, **Climatic**, *a.* Pertaining to a climate; limited by a climate.

Climaticity, *n.* The property of climatizing.

Climatize, *v. a.* Same as **ACCLIMATIZE**, *q. v.*

Climatography, *n.* [Gr. *klima*, and *graphein*, to describe.] A description of climates.

Climatological, *a.* Pertaining to climatology.

Climatologist, *n.* One skilled in the study of climates.

Climatology, *n.* [Fr. *climatologie*, from Gr. *klima*, and *logos*, doctrine.] The science of climates; a discourse or treatise on climates. See **CLIMATE**.

Climax, *n.* [Gr. *klímaz*, from *klinō*, to make to bend, slope, or slant.] The highest point or degree; as, "The climax of earthly good." — *Bishop Taylor*.

(*Rhet.*) A figure by which several propositions, or several objects, are placed before the mind of the hearer, or reader, in such an order that the proposition, or object, calculated to produce the least impression, shall strike it first, and that the rest shall follow in regular gradation. — *Anti-climax* is the converse figure, in which the ideas sink in succession. This forms a principal cause of that vice of composition of which so many ludicrous illustrations have been given under the name of *bathos*.

Climax, in *Michigan*, a post-township of Kalamazoo co.

Climb, *v. i.* (*imp.* and *pp.* **CLIMBED**; **CLOMB** is used by poetical license.) [A.S. *climan* or *climban*; Ger. *klimmen*; allied to *clamber*, *cling*, and *clutch*.] To rise or ascend by clinging to, clutching, or holding fast; to mount or ascend with labor and difficulty.

"Ah! who can tell how hard it is to climb
The steep where Fame's proud temple shines afar." — *Beattie*.

— *v. a.* To ascend; to mount or ascend with labor, or by a slow motion.

"Climb the steep mountain, in the cavern lie." — *Prior*.

Climbable, *a.* That which may be climbed; as, a *climbable* hill.

Climber, *n.* One who climbs, mounts, or ascends by the action of hands and feet.

"Lowliness is young ambition's ladder,
Whereto the climber upward turns his face." — *Shaks.*

(*Bot.*) A plant that climbs and rises by some support; as, "Ivy, honeysuckles, and other *climbers*." *Mortimer*. (*Zool.*) See **SCANSORES**.

Climbing Perch, *n.* (*Zool.*) See **ANABASIDE**.

Climate, *n.* [Lat. *clima*, from Gr. *klima*, a climate.] A climate; a tract or region of the earth.

"The cold in *clime* are cold in blood." — *Byron*.

Clinanthium, *n.* [Gr., a bed, and *anthos*, a flower.] (*Bot.*) The receptacle of a composite plant. It is the dilated apex of a flowering branch covered over by small flowers enclosed within an involucre.

Clinch, **Clench**, *v. a.* [Du. *klinken*, from *klink*, a rivet, a latch; Swed. and Goth. *klinka*, the latch of a door.] To fix or fasten; to rivet; to grasp or gripe with the hand; to bend the fingers inward to the palm; to bind; as, to *clinch* a nail, to *clinch* the fist.

"Heroes whose . . . hauds yet . . . *clinch* the pointed spear." — *Dryden*.

— To make firm; to determine; to render conclusive; to establish; as, to *clinch* an argument.

— *n.* Act or process of clutching or holding fast; as, to get the *clinch* of a weapon.

— Any word used with a double or ambiguous meaning.

"Pure *clinch*es the suburban muse affords." — *Dryden*.

(*Naut.*) The great ring attached to the mooring-chain. — A half-hitch of rope fastened to its own part.

Clinch, in *Georgia*, a S. co. bordering on Florida; area, about 1,000 sq. m. It is bounded on the W. by Allapaha river. The surface is level, and partly covered with swamps. *Cap. Homerville*. *Pop.* (1890) 6,652.

Clinch Dale, in *Tennessee*, a village of Hawkins co., 250 m. E. of Nashville.

Clinch River. It rises in the S.W. part of Virginia, flows S.W. through Tennessee into the Tennessee River, after a course of about 200 m.

Clincher, *n.* He who, or that which, clinches anything.

— A cramp or holdfast. — A smart, decisive reply in argument, or the person who makes it; as, his rejoinder was a *clinch*er.

Clincher-built, *a.* (*Naut.*) See **CLINKER-BUILT**.

Clinch'er-work, *n.* (*Naut.*) See **CLINKER-WORK**.

Cling, *v. i.* (*imp.* and *pp.* **CLUNG**.) [Swed. and Goth. *klanga*, to climb, grasp, lay hold on.] (*Cling*, from A. S. *clingan*, to wither, is obsolete.) To hang upon by turning round; to adhere closely; to stick to; to hold fast round; to infold; to embrace.

"As two spent swimmers that do *cling* together." — *Shaks.*

— To adhere or attach closely to, as by interest or affection; as, to *cling* to old traditions.

"Most popular he is grown . . . how the rout *cling* to him!" — *Ben Jonson*.

— *v. a.* To canse to closely and firmly adhere, as by twining round or embracing.

"I *cling* my legs as close to his side as I could." — *Swift*.

Clingman's Peak, in *N. C.*, said to be the highest peak of the Black Mountains, and the most elevated land E. of the Mississippi, being 6,951 ft. above the level of the sea. It is situated about 3 m. N. of Mitchell's Peak, and is named in honor of the Hon. Thos. L. Clingman, who determined its altitude in Sept., 1855.

Clingstone, *n.* (*Bot.*) A variety of peach, with the pulp adhering closely to the stone.

Clingy, *a.* Apt to cling; adhesive.

Clinias, the father of Alcibiades, slain at the battle of Coronea, 447 B.C. — Also, a Pythagorean philosopher, a contemporary and friend of Plato; lived about 410 B.C.

Clinic, **Clinical**, *a.* [Fr. *clinique*, from Gr. *klinē*, *ikos*, from *klinē*, a bed, from *klinō*, to cause to recline or lie down.] Pertaining to a bed; relating to a sick-bed; confined to bed; bed-ridden; as, a *clinical* convert.

(*Med.*) Applied to the observation and treatment of diseases at the bedside of the sick; hence, clinical lectures are such as are given at the bedside of the patient, or from notes and observations made at the bedside. This is the most valuable mode of instructing in the art of medicine; the students are taken to the bedside of the patients in a public hospital, and there practically instructed in the various phenomena of disease, taught to observe the characteristics of each individual case, and to study the effects of the various modes of treatment. In modern times, at least, clinical medicine was entirely neglected till about the middle of the 17th century; and it was not till the beginning of the 18th that it began, by Boerhaave, to be systematically carried out. Since that time it has come into general use, and now every good school has an establishment for clinical medicine in connection with it. — *Clinic* is also used as a substantive. See **CLINIQUE**.

Clinical baptism. Baptism as administered to persons on a sick-bed, or who are bed-ridden.

— *n.* A person bed-ridden, or confined to bed by sickness.

Clinically, *a.* In a clinical manner; by the bed-side.

Clinidae, *n. pl.* (*Ichth.*) A family of fishes having an oblong body with pungent dorsal spines.

Clinique, *n.* [Fr. *clinique*.] (*Med.*) A school in which medicine is taught by examining diseases with the patients in person before the class. Thus the French say, "La *clinique* de la charité" (the *clinical* school of the hospital *La Charité*). The term has been introduced into this country, and anglicized **CLINIC**, *q. v.*

Clinium, *n.* See **CLINANTHIUM**.

Clink, *v. a.* [Ger. *klingen*; Swed. and Goth. *klinga*, anciently *klinka*, formed from the sound, and allied to *clang*, *clank*.] To cause to ring or jingle; to strike so as to make a small sharp sound, or a succession of such sounds; to make to ring as by the concussion of sonorous bodies.

"Five years! a long lease for the *clinking* of pewter." — *Shaks.*

— *v. i.* To ring; to jingle; to tinkle; to clank.

"Safe thro' the wet on *clinking* patters tread." — *Gay*.

— *n.* A short, sharp sound made by the collision of small sonorous bodies.

"I heard the *clink* and fall of swords." — *Shaks.*

— The knocker of a door; as, "behind the wicket's *clink*." — *Spenser*.

Clink'ant, *n.* See **CLINQUANT**.

Clink'er, *n.* (*Min.*) Black oxide of iron, obtained in scales from red-hot iron while in process of forging. — In common parlance, the term is applied to the slaggy ferruginous masses that form in furnaces and stoves from the vitrification of the silica and iron contained in the coal. See **BRICK**.

— *pl.* (*Brick-making*.) A term used for bricks, which by the violence of the heat are run together and glazed over. Hard bricks, as made in Holland, are thus called.

Clink'er-bar, *n.* (*Mach.*) The bar fixed across the ash-pit of a steam-engine, for supporting the rods used for clearing the fire-bars.

Clink'er-built, **Clinch'er-built**, *a.* (*Naut.*) Constructed of clinker-work; as, a *clinker-built* ship.

Clink'er-work, **Clinch'er-work**, *n.* (*Naut.*) A disposition of the planks in the side of a ship, in which every upper plank overlaps the lower, like slates on the roof of a house.

Clink'stone, *n.* (*Min.*) A grayish-green felspathic rock, occurring in volcanic districts, and remarkable for its tendency to lamination, which is sometimes such that it affords tiles for roofing.

Clinodiagonal, *a.* [Gr. *klinein*, to incline, and *diagonal*.] (*Crystallog.*) That belongs to, or is in the direction of, the clinodiagonal.

— *n.* The name given to the lateral axis which, in a monoclinic crystal, makes an oblique angle with the vertical axis.

Clin'odome, *n.* [Gr. *klinein*, to incline, and *dome*.] An horizontal prism or dome, parallel to the clinodiagonal.

Clinograph'ic, *a.* [Gr. *klinein*, to incline, and *graphein*, to write.] (*Crystallog.*) Pertaining to that mode of projection in drawing, in which the rays of light are supposed to fall obliquely on the plane of projection.

Clinoid, *n.* [Gr. *kline*, a bed, and *eidos*, form.] (*Anat.*) Something resembling a bed. A name given to certain processes, or projections, like bed-posts. — In the sphenoid bone, one of the bones forming the base of the skull: there are four of these — two anterior and two posterior to the *sella Turcica*, or Turkish saddle.

Clinometer, *n.* [Gr. *klineo*, to slope, and *metron*, a measure.] (*Geol.*) An instrument constructed to enable a geological observer to determine the dip of beds.

Clinomet'ric, **Clinomet'rical**, *a.* (*Geol.*) Relating to clinometry.

Clinom'etry, *n.* The art of measuring the dip of mineral strata.

Cling'uant, **Clink'ant**, *n.* [Fr.] Tinsel finery; false glitter.

— *a.* Glittering; showy; dressed gaudily, or in tinsel finery.

Clin'ton, DE WITT, governor of the State of New York, b. in Orange co., in that State, in 1769. In 1798 he was

elected a senator in the N. Y. legislature, and, in 1802, U. S. senator to Congress. In 1803, C. was appointed mayor of the city of New York, which post he occupied (with the exceptions of the years 1809 and 1810) till 1815. During this period he laid the foundations of several of the most important public institutions of that city; among them the Orphan Asylum, the Academy of Arts, and the Historical Society. At C.'s suggestion, the New York legislature, in 1817, authorized the construction of the Erie Canal, to connect the Hudson River with Lake Erie. He was president of the board of canal commissioners in 1823-4, and in 1826 inaugurated the completion of this great undertaking. It is the noblest monument to his enterprise and sagacity; and its beneficial results to the State, and, indeed, to the country at large, have more than realized his highest expectations. D. 1828.

Clinton, GEORGE, an American general and statesman, b. in Ulster co., New York, Aug. 9, 1739; d. in April, 1812. He first served under Gen. Amherst against the French, and, after the conquest of Canada, devoted himself to the study of law. In 1773, he was a member of the colonial assembly; and being made brigadier-general, he succeeded, though he had a very inferior force, in preventing Sir Henry Clinton from aiding Gen. Burgoyne. Clinton was gov. of N. Y. State from 1777 to 1779, and 1801 to 1803, and was also elected vice-president of the U. S.

Clinton, HENRY FYNES, an English chronologist, b. in Nottinghamshire, 1781. Exempted from pecuniary cares by the possession of a large fortune, he devoted himself entirely to his chosen task. The extent and quantity of his classical readings were prodigious, and the fruits of his labor are shown in his *Fasti Hellenici* and his *Fasti Romani*, which have become authorities. Useful "Epitomes" of these works were afterwards published. D. 1852.

Clinton, SIR HENRY, an English general. He succeeded Sir William Howe as commander-in-chief in America; and his ill success in 1781, and 1782, was so severely advertised upon in England, that he thought it necessary to exculpate himself through the medium of the press. After his return from America, he was for some time governor of Limerick, and had just been appointed governor of Gibraltar, where he died, 1795.

Clinton, in *Alabama*, a township of Greene co., about 120 m. W.N.W. of Montgomery.

Clinton, in *Arkansas*, a post-village, cap. of Van Buren co., on Little Red River, about 60 m. N. by W. of Little Rock.

Clinton, in *California*, a mining-village of Amador co., about 50 m. N.E. of Stockton.

Clinton, in *Connecticut*, a post-village and township of Middlesex co., on Long Island Sound, 23 m. E. of New Haven.

Clinton, in *Georgia*, a village of Gwinnett co.

—A post-village, cap. of Jones co., about 20 m. W. by S. of Milledgeville;

Clinton, in *Illinois*, a S. central co.; area, 420 sq. m. It is intersected by the Kaskaskia River and by Shoal Creek, and also drained by Beaver and Crooked creeks. The surface is generally level, and the soil fertile. It contains a number of prairies alternating with tracts of timber. Cap. Carlyle. Pop. (1890) 17,411.

—A township of De Kalb co.

—A city, cap. of De Witt co., 23 m. S. of Bloomington. Pop. (1897) abt. 3,000.

—A township of Kane co.

Clinton, in *Indiana*, a N.W. county; area, abt. 432 sq. m. It is drained by the forks of Wildcat River and Sugar Creek. This co., which lies in the fertile valley of the Wabash, has a level surface and an alluvial soil. It contains a prairie 12 m. long and 4 m. wide. Cap. Frankfort.

—A township of Cass co.

—A township of Decatur co.

—A township of Elkhart co.

—A township of La Porte co.

—A township of Putnam co.

—A post-village and township of Vermilion co., on the W. bank of Wabash River, 16 m. S. of the city of Newport.

Clinton, in *Iowa*, an E. county, bordering on Illinois; area, 696 sq. m. The Mississippi River forms its E. boundary; the Wapsipinicon traverses the W. part, and forms the S. boundary. The co. has considerable timber and prairie, and the soil is fertile. Cap. Clinton. Pop. (1890) 41,199.

—A city, cap. of Clinton co., on the Mississippi river, 42 m. above Davenport. The river is here crossed by an iron bridge 4,000 ft. long, which is used by several railroads. C. has railroad repair shops and other industries. Pop. (1897) about 29,000.

—A village of Madison co., about 37 m. S.W. of Des Moines.

—A township of Wayne co.

Clinton, in *Kansas*, a post-village and township of Douglas co., near the Wakarusa River, 11 m. W.S.W. of Lawrence.

Clinton, in *Kentucky*, a S. county, bordering on Tennessee; area, about 350 sq. m. Cumberland River washes its N. border, and it is drained by Wolf River and Indian Creek. The surface is hilly and undulating; Poplar Mountain, a spur of Cumberland Mountain, rises in the E. part of this co. to a height of 1,900 feet or more. The soil is fertile, and iron ore and coal abound in the highlands. Cap. Albany.

—A city, the cap. of Hickman co., about 10 m. from the Mississippi River, and 300 m. W. S. W. of the city of Frankfort. Pop. (1897) about 1,500.

Clinton, in *Louisiana*, a post-village, cap. of E. Feliciana parish, 32 m. N. of Baton Rouge.

Clinton, in *Maine*, a post-village and township of Ken-

nebec co., 25 m. N. by E. of Augusta, on the E. side of Kennebec River.

Clinton, in *Massachusetts*, a manufacturing town of Worcester co., on the Nashua River, 35 m. W. by N. of Boston. Manf. Brussels and Wilton carpets, Lancaster gingham, figured counterpanes, Clinton gala-plaids, hoop-skirts, horn combs, wire cloth, machinery, &c. The township covers an area of about 5,000 acres. Pop. (1895) 11,497.

Clinton, in *Michigan*, a central co.; area, about 576 sq. m. It is drained by the Grand, Maple, and Looking-glass rivers. The surface is level and heavily timbered. The soil is fertile. Cap. St. John.

—A post-village of Lewanee co., on the Raisin River, 15 m. N. by E. of Adrian.

—A township of Macomb co.

Clinton, in *Minnesota*, a village of Steele co., about 12 m. S. of Faribault.

Clinton, in *Mississippi*, a post-village of Hinds co., 10 m. W. of Jackson. It is the seat of Mississippi College.

Clinton, in *Missouri*, a N.W. co.; area, about 460 sq. m. It is drained by Smith's Fork and Little Platte River, and by Castle Creek. The general surface is level, and the soil fertile. The county has a large proportion of prairie. Limestone and sandstone are the principal rocks. Cap. Plattsburg.

—A city, cap. of Henry co., on the N. Fork of Salt River, 81 m. N. of Jefferson City. Pop. (1897) about 5,100.

Clinton, (formerly RIVES COURT-HOUSE,) in *Missouri*, a post-village, cap. of Henry co., a few m. N. of Grand River, (of the Osage,) and 107 m. W. by S. of Jefferson City.

Clinton, in *N. Carolina*, a village of Davie co., on the Yadkin River, about 105 m. W. of Raleigh.

—A post-village, township, and cap. of Sampson co., 35 m. E. of Fayetteville.

Clinton, in *Nevada*, a mining-village of Lander co., in the Smoky Valley district, 15 m. S.E. of Austin.

Clinton, in *New Jersey*, a thriving township of Essex co.

—A post-village and township of Hunterdon co., on the S. branch of Raritan River, about 10 m. north of Flemington.

Clinton, in *New York*, a N.E. co.; area, about 950 sq. m. It is bounded on the E. by Lake Champlain, and on the S. by the Rivière-au-Sable, and is drained by the Saranac and Chazy rivers, and other small streams. In the E. the surface is generally level, and the soil fertile. The W. part of the co. is mountainous, and abounds in iron ore. Cap. Plattsburg.

—A township of Clinton county, 30 m. N.W. of Plattsburg.

—A township of Dutchess co.

—A post-village of Kirkland township, Oneida co., sit. on the Oriskany Creek, 9 m. S.W. of Utica, and 100 m. W. N.W. of Albany. It is the seat of Hamilton College, connected with which is one of the finest observatories in the U. States.

Clinton, in *Ohio*, a S.W. co.; area, about 467 sq. m. It is drained by the E. Fork of Little Miami, by Anderson's Fork, and by Todd's and Rattlesnake creeks. The surface is undulating, and the soil very fertile. Cap. Wilmington.

—A township of Franklin co.

—A township of Fulton co.

—A village of Huron co., about 14 m. S.S.E. of Norwalk.

—A township of Knox co.

—A township of Seneca co.

—A township of Shelby co.

—A post-village of Summit co., 118 m. E. of Columbus.

—A township of Vinton co.

—A village of Wayne co., in Clinton township, about 9 m. S.S.W. of Wooster co.

Clinton, in *Pennsylvania*, a N. central co.; area, abt. 1,000 sq. m. It is intersected by the W. Branch of the Susquehanna River, and also drained by the Bald Eagle and Kettle creeks. The surface is mountainous. The soil of the limestone valleys is productive. There is abundance of iron-ore and bituminous coal. Cap. Lock Haven.

—A post-village of Alleghany co., 15 m. W. of Pittsburgh.

—A village of Armstrong co., on the Alleghany River, 33 m. above Pittsburgh.

—A township of Butler co.

—A village of Centre township, Greene co., about 6 m. W. of Waynesburg.

—A township of Lycoming co.

—A township of Venango co.

—A township of Wayne co.

—A township of Wyoming co.

Clinton, in *S. Carolina*, a post-village of Laurens district, about 70 m. W.N.W. of Columbia.

Clinton, in *Tennessee*, a town, cap. of Anderson co., on the Clinch River, 18 m. N. W. of Knoxville, and 175 E. of Nashville. Pop. (1897) about 1,250.

Clinton, in *Texas*, a vill. formerly cap. of De Witt co., about 94 m. S. by E. of Austin. The lands of the Guadalupe Valley are said to be extremely fertile, and the uplands are rolling and diversified in scenery.

Clinton, in *W. Virginia*, a P. O. of Ohio co.

Clinton, in *Wisconsin*, a post-village of Clinton township, Rock co., sit. 14 m. S.E. of Janesville, 60 m. W. by S. of Racine, and 10 m. E.N.E. of Beloit.

—A village of Dane co., on the Koshkonong River, 24 m. E. by S. of Madison.

—A post-township of Rock co., bordering on Illinois, contains the village of Clinton. The greater part of Jefferson prairie is included in it.

—A township of Vernon co., about 10 m. N.E. of Viroqua.

Clin'ton-Col'den Lake, in British N. America, connected with Lake Aylmer on the N. W., and with Artillery Lake on the S., is intersected by the parallel of 64° N., and by the meridian of 107° 30' W.

Clinton Corners, in *New York*, a P.O. of Dutchess co.

Clinton Corners, in *Pennsylvania*, a village of Wyoming co.

Clin'tondale, in *New York*, a post-office of Ulster co.

Clinton Falls, in *Minnesota*, a post-township of Steele co., 2 or 3 m. N. of Owatonna.

Clinton Hill, in *Illinois*, a village of St. Clair co., 5 or 6 m. N. of Belleville.

Clinton Hollow, in *New York*, a P.O. of Dutchess co.

Clinton Lake, in *Minnesota*, a township of Sherburne co.

Clinto'nia, n. (Bot.) A genus of plants, order Campanulaceae. They are procumbent herbs with small leaves, and axillary, solitary flowers. *C. elegans* is a beautiful annual, with flowers of the most brilliant blue, and native of the Rocky Mountains.

Clintonia, in *Illinois*, a township of Dewitt co., contains Clinton the county seat.

Clinton Mills, in *New York*, a P. O. of Clinton co.

Clinton Point, in *New York*, a P. O. of Dutchess co.

Clinton River, in *Michigan*, has its source in the numerous small lakes of Oakland co., and flows through Macomb co., into Lake St. Clair, 6 m. from Mount Clemens. Its length is about 50 miles.

Clintontown, in *N. Jersey*, a town of Hunterdon co.

Clinton Station, in *Ohio*, a village of Clinton co.

Clinton Valley, in *Ohio*, a P. O. of Clinton co.

Clin'tonville, in *Kentucky*, a township of Bourbon co., 9 m. S. of Paris, the county seat.

Clintonville, in *Missouri*, a village of Cedar co., about 65 m. N.W. of Springfield.

Clintonville, in *New York*, a post-village of Au Sable township, Clinton co., on Au Sable River, about 150 m. N. of Albany.

—A village of Onondaga co., 4 or 5 m. E.S.E. of Skaneateles.

Clintonville, in *Ohio*, a post-village of Franklin co., 5 m. N. of Columbus.

Clintonville, in *Pennsylvania*, a village of Lycoming co., 10 m. S.E. of Williamsport, and 80 m. N. of Harrisburg.

—A post-village of Venango co., 175 m. W.N.W. of Harrisburg.

Clintonville, in *W. Virginia*, a post-village of Greenbrier co., 231 m. W. of Richmond.

Clio. [Lat. from Gr. *kleio*, *kleios*, glory, renown.] (Myth.) The muse of history and epic poetry, represented as bearing a half-opened roll of a book. Daughter of Jupiter and Mnemosyne, she was the mother of Iliacanthus and Hymanens.

Clio, n. CLIONIDÆ, n. pl. (Zoölogy.) A genus and family of naked marine molluscs, belonging to the order Pteropoda. They are particularly distinguished by having a pair of fin-like organs, or wings, consisting of an expansion of the mantle on each side of the neck, and furnished with muscular fibres:—a peculiarity of structure by which they are enabled to propel themselves rapidly through the water. So numerous are they in the Northern and Southern oceans, that the water appears literally alive with them; they are called whale's food, and the sea is sometimes so glutted with the Clios that the whales can

CLIO, THE MUSE OF HISTORY.
(After a statue of the Parthenon.)

Fig. 623. — CLIO BOREALIS.

scarcely open their mouths without ingulfing thou sands of them. The *Clio borealis* abounds in the Arctic seas, and the *Clio australis* appears to be equally abundant in the polar regions of the S. hemisphere.

Clio, in *S. Carolina*, a post-village in Marlborough district, about 120 m. N.E. of Columbia.

Clip, v. a. [A. S. *clýpan*, to clasp, make much of; Swed. *klippa*; Icel. *klippi*; *klippa*; Swed. and Goth. *klippa*. Dan. *klippe*, to shear, to crop, to shave; allied to *clasp*. To embrace, by throwing the arms around; as, to *clýp* one's sweetheart.

"Now runs and takes her in his clipping arms." — Sidney.

To nip, cut, shear, or divide; to cut off with shears or scissors; to separate by a cutting stroke; as, to *clip* the hair.

"Philosophy will *clip* an angel's wings." — *Keats*.

To diminish by cutting off; to cut short; to curtail; as, to *clip* coin.

"Mrs. Mayoress *clipped* the king's English." — *Addison*.

v. i. (*Sports*.) In Falconry, to move swiftly; usually followed by *it*.

"Some falcon . . . flies at check, and, *clips* it down the wind." — *Dryden*.

n. An embrace, or act of throwing the arms around; a hug; a clasp.

Act of cutting or shearing sheep. — The product of sheep-shearing; as, a good *clip* of wool.

In the U. States, a quick blow or stroke given by the hand; as, to hit one a *clip*.

(*Furriery*.) The hammered-out upper edge of a horse's shoe, turned up to protect the lower part of the crust.

clipper, n. One who clips; more particularly, one who debases coin by cutting off a portion; as, a money-clipper.

(*Naut.*) A cargo ship, especially constructed for speed. They were built in the first instance for the conveyance of perishable goods, and the fruit-clippers and slave-

Fig. 624. — A CLIPPER SHIP.

clippers became known as the fastest vessels afloat. Of late years, the finest clippers are those of American build, which are employed in the Atlantic. Clippers are usually of narrow beam, with sharply curved bows and of generally an elliptical shape, having a deep draught and lofty raking masts.

clipper Gap, in *California*, a post-village of Placer co., 43 m. N.E. of Sacramento.

clipper Mills, in *California*, a post-village of Butte co., 30 m. E. of Oroville.

clipping, n. The act of encircling with the arms; embracing.

Act or operation of cutting off, curtailing, or diminishing. A piece of anything separated by clipping; as, "the *clippings* of our beards."

clique, (*klēk*), n. [Fr. Etymol. unknown.] A party; coterie; a set; a faction; a cabal; as, a *clique* of politicians. (Used, for the most part, in a disreputable sense).

cliqueish, a. Belonging, or relating, to a clique or coterie; as, *cliqueish* interests.

cliquism, n. Party spirit; the feeling of associating or banding together in cliques, sets, or factions.

clash, v. n. To sound like the clashing of words; to clash.

Clithènes, an Athenian of the family of Alcæon. It is said that he invented the ostracism, and that he was the first who was banished by that institution.

Clitheroe, a town of England, in Lancashire, on the Ribble, 28 m. from Manchester. *Manf.* Cotton fabrics. *Pop.* 14,000.

clitoria, n. (*Bot.*) A genus of twining and generally important plants, order *Fabaceæ*.

clitoris, n. (*Anat.*) A small round organ, situate at the upper part of the vulva, and separated by a small space from the anterior commissure of the labia.

Clitus, a distinguished Macedonian general, who saved the life of Alexander the Great at the battle of Granicus, but who, having expostulated with his imperial master when the latter was in a fit of intoxication, was slain by him, B. C. 323.

Clive, (of Plassey,) ROBERT, LORD, an English general, B. 1725. He greatly distinguished himself in 1751 against the French in India. The state of his health having compelled him to return to England in 1753, he was received with great honor; and in 1755 he was sent out again to India as lieutenant-colonel in the army. He destroyed some nests of pirates on the Coromandel coast, and reached Madras on the 20th June, 1756. On that very day the English in Bengal experienced the heavy disaster of the capture of Calcutta by Surajah Dowlah. Clive fled from Madras to the Hooghly to save the English power in Bengal. He drove the enemy out of Calcutta, and a temporary treaty was made; but hostilities soon recommenced, and on the 23d June, 1757, C. with 3,000 men, utterly routed the nabob's army of 50,000, in the battle of Plassey. This decisive victory secured for the English not only the mastery of Bengal, but a permanent ascendancy over the East. C. gained other important military advantages, and returned to England in 1760, loaded with wealth and glory. He was

enthusiastically received, and created (by an Irish peerage) Lord Clive and baron of Plassey. In 1764 he was a third time sent out to India, where he honorably distinguished himself by his exertions in the more difficult and invidious duty of reforming the gross abuses that abounded in the Indian administration. This made him many enemies; and on his final return to England, in 1767, he became the object of incessant attack in the public press, and ultimately in the House of Commons. Clive was, in fact, far from being a faultless man. Throughout his career in the East, he had, in his negotiations and diplomatic dealings, acted on the maxim, that it was quite allowable to fight the cunning and faithless natives with their own weapons. He said, in his defence, that it was a matter of true policy and justice to deceive such villains. Acts of chicanery, and even of forgery, could thus be truly charged against Clive. But his fearless defence of himself in parliament was very effective. The magnitude of his services was undeniable; and the House of Commons, after a long debate on 23d May, 1773, refused to vote that Lord Clive had abused his power, and came to the resolution, that "Lord Clive has rendered great and meritorious services to his country." But though thus honorably acquitted by parliament, Clive's haughty spirit suffered deeply from the attacks aimed at him; his health also was impaired, and he fearfully aggravated both his mental and physical prostration by the immoderate use of opium. On the 22d Nov., 1774, he committed suicide.

Clivers, n. See CLEAVERS.

Clivity, n. Inclination or declination; gradient.

Clou'ca, n.; pl. CLOACE. [Lat., a sewer.] A common sewer, or conduit carried underground.

—A water-closet; a privy.

(*Antiq.*) Rome was intersected by numerous sewers, some of which were of an immense size; the most celebrated of them was the *cloaca maxima*, the construction

Fig. 625. — CLOACA MAXIMA.

of which is attributed to Tarquinius Priscus. It was formed by three tiers of arches, one within the other, the innermost of which is a semicircular vault of 14 ft. in diameter. The manner of its construction is shown in Fig. 625.

(*Physiol.*) The pouch at the extremity of the intestinal canal, in which the solid and liquid excretions are commingled in birds, fish, and reptiles.

Cloac'al, a. Belonging, or relating, to a cloaca.

Cloac'ina, (*Myth.*) A goddess of Rome, who presided over the cloacæ; the goddess of purification; one of the numerous names given to Venus.

Cloak, old spelling CLOKE. [A. S. *luch*; Flem. *kloke*; Ar. *khalit*, a loose robe.] A loose outer garment worn indiscriminately by man or woman; a mantle; a covering against bad weather.

"He lay like a warrior taking his rest,
With his martial cloak around him." — *Wolfe*.

—A disguise; a pretext; anything intended to hide or conceal; an excuse; a fair-seeming pretence; as, a *cloak* to sin.

"No man is esteemed who wears religion otherwise than as a *cloak*!" — *South*.

—v. a. To cover with a cloak;—metaphorically, to conceal; to hide; to cover; to mask; to veil; as, to *cloak* drunkenness under the guise of teetotalism.

Cloak'-bag, n. A valise; a portmanteau; a bag in which clothes are carried.

"Why dost thou converse with that . . . stuffed *cloak-bag* of guts?" — *Shaks*.

Cloak'edly, adv. In a cloaked or concealed manner.

Cloak'ing, n. Act of hiding or concealing anything to be ashamed of; as, "dissemblings and *cloakings*." — *Styrie*.

—Cloth or material adapted for making cloaks.

Clock, n. [A. S. *clugga*, *clugga*; Fris. *klokke*; D. *klok*; Ger. *glocke*; Icel. *klukka*; Dan. *klokke*; W. *clock*; Armenian *klôk'h*; Fr. *cloche*; O. Ger. *glo'ka*, from *klôhôn*; A. S. *clôcan*, to sound, to strike, to give forth a sound.] A machine which measures time and its divisions, by means of a pendulum and wheels moved by weights, springs, and sometimes by magnetic power, and so named from its striking the hours on a bell; any horological contrivance for keeping record of time. See HOROLOGY.

The flowered or figured work about the ankle of a stocking.

"His stockings with silver *clocks* were ravish'd from him." — *Swift*.

What o'clock is it? A contraction and corruption of what hour of the clock is it?

"What is 't o'clock?"

Upon the stroke of four." — *Shaks*.

Clock, v. a. and v. i. See CLECK.

Clock'-work, n. Machinery and movements of a clock; any machinery resembling that of a clock; well-adjusted work; as, it acts like *clock-work*.

Clock'ville, in N. York, a post-township of Madison co.

Clod, n. A. S. *clud*; D. *kluit*; Ger. *kloss*; Icel. *clod*. See CLOT.] A concreted mass or lump; a hard lump of earth of any kind; a mass of cohering earth or clay; turf.

"Who pounds with rakes the crumbling *clods*?" — *Dryden*.

—The ground; the earth; the soil.

"The *clod*
Where once their sultan's horse has trod" — *Swift*.

—That which is base and earthy, or of a worldly nature, by comparison with things spiritual.

"The spirit of man,
Which God inspired, cannot together perish
With this corporeal *clod*." — *Milton*.

—A dull, stupid, thick-headed, obtuse, gross, empty-brained fellow.

"The vulgar 'a scarce animated *clod*,
Ne'er pleased with aught above 'em." — *Dryden*.

—v. i. To collect into concretions, or a thick mass; to clot.

"Wash off the *clotted* gore." — *Milton*.

—v. a. To pelt with clods; as, to *clod* a policeman.

Clod'-crusher, n. (*Agric.*) An implement used for crushing and pressing the soil. In its general form, it consists of a cylindrical roller divided into many pieces, all strung upon one axle. These pieces actually constitute a number of independent wheels, which are notched on the outer edge, and so formed as to prevent the tearing up of the land, which, when the common roller was employed in rolling a growing crop, was a serious objection.

Clod'dy, a. Consisting of clods; as, a *cloddy* piece of ground.

—Earthy; mean; gross; base.

"Turning . . . the meagre *cloddy* earth to glittering gold." — *Shaks*.

Clod'hopper, n. A countryman; a bumpkin; a boor; a clown; a dolt; a ploughman; as, as vulgar as a *clod-hopper*.

Clod'oald. See CLOUD, (St.)

Clodomir, (*klô'do-mier*), son of Clovis, succeeded, on the death of his father in 511, to the kingdom of Orleans. He fought against Sigismund, king of Burgundy, took him prisoner, and put him to death. He himself was afterwards slain in a battle with Gondomar, Sigismund's successor, in 524. He left three children, of whom two were murdered by their uncle, and the third, Clodoald, saved himself by flight.

Clod'pate, n. A dolt; a thick-pated fellow; a numskull.

Clod'pated, a. Thick-headed; assish; stupid; without brains.

Clod'poll, n. Identically the same as CLODPATE, q. v.

"This letter being so excellently ignorant, he will find that it comes from a *clodpoll*." — *Shaks*.

Clogg. See CLOGG.

Clog, v. a. [From Goth. *ligan*, A. S. *licgan*, to lie, comes the v. a. *gylagan*, to lay, to place upon, whence the Eng. *clog*, something laid on, a burden, impediment.] To load or fill with something that retards or hinders motion; to impede; to obstruct; to choke up; as, to *clog* a gutter.

"His majesty's ships were over-*clogged* with great ordnance." — *Raleigh*.

—To overburden; to encumber, as with a load; to hamper.

"The wings of *clogs* were *clogged* with ice and snow." — *Dryden*.

—To embarrass; to hinder, confuse, or restrain.

"The *clogging* burden of a guilty soul." — *Shaks*.

—v. i. To be loaded or encumbered with anything; as, a *clogging* saw.

—To coalesce; to unite and adhere; as, to *clog* like seeds.

—n. A kind of heavy shoe, usually made of wood. (Called in France, *sabot*.)

"In France, the middle sort makes use of wooden *clogs*." — *Harvey* (1642).

—Anything put, or laid on, which hinders or retards motion; a hindrance; an embarrassment; a stumbling-block.

"Weariness of the flesh is a heavy *clog* to the will." — *Hooker*.

—A weight attached to the leg of an animal to prevent its going astray.

"As a dog . . .
By chance breaks loose, and quits his *clog*." — *Hudibras*.

Clog'guiness, n. State of being hampered or clogged; state of wearing clogs.

Clog'ging, n. The thing which clogs. (R.)

Clog'gy, a. That clogs or has power to clog; thick; gross; lumpy; adhesive; as, *cloggy* soil.

Clog'-head, n. (*Arch.*) A round tower of slender proportions, attached to sundry old churches in Ireland.

Clogheen, in Ireland, a town of Muuster, co. Tipperary, 13½ m. W.S.W. of Clonmel; *pop.* 2,111.

Clog'her, in Ireland, a decayed episcopal city, and disfranchised parliamentary borough, in Ulster, co. Tyrone; *pop.* about 523.

Clois'ter, n. [Fr. *cloître*; A. S. *claustr*; Lat. *claustrum*, from *claudo*, *clausus*, to shut or close, to shut up or in.]

Fig. 626. — CLOISTER OF ARLES, (France.)

A monastery, either inhabited by monks, or by nuns, who are enclosed or shut up from the world. In a more restricted sense, the term is applied to a covered passage running round the walls of certain portions of monasteries. It is usually found extending over three sides of a square or quadrangle, with the outer walls consisting of pillars and arches, and the roof frequently arched and ornamented with tracery. In the ancient monasteries the cloisters were used for several purposes. The monks held their lectures in them, and at certain hours of the day met there and conversed together.

—v. a. To shut up or confine in a cloister or monastery; to confine closely within walls; to immure.

"Go! cloister thee in some religious house."—Shaks.

Clois'teral, Clois'tral, a. Confined to a cloister; retired from the world; reclusive; secluded; as, "clois'teral men."—Walton.

Cloistered, a. Dwelling in cloisters; solitary; secluded; retired from the world.

"I cannot praise a fugitive and cloister'd virtue."—Milton.

—Enclosed; built around with arcades, piazzas, &c.

"The Greeks and Romans had commonly two cloistered open courts."—Wotton.

Clois'terer, n. One who belongs to a cloister.

Clois'tress, n. A nun; a female who has vowed religious retirement.

"Like a clois'tress she will veiled walk."—Shaks.

Cloke, n. See CLOAK.

Clomb, (klōm,) imp. of CLIMB, q. v.

Clomp, n. Same as CLAMP, q. v.

Clon, a prefix to numerous places in Ireland. It signifies a fertile strip of land entirely enclosed by a bog, or by water on the one side, and a bog on the other. The number of names with which it is allied is about 90.

Clonakil'ty, a town of Ireland, co. Cork, situated in a bay of the Atlantic, called Clonakilty Bay, 20 m. S.W. of Cork; pop. 3,108.

Clonard, a town of Ireland, co. Meath, 11 m. from Trim; pop. 4,000.

Clon'es, a town of Ireland, co. Monaghan, 10 m. S.W. of Monaghan; pop. 2,333.

Clon'fert, a parish and village of Ireland, co. Galway, 36 m. from Galway. Pop. 3,884.—The name also of two bogs in the same co., traversed by the Great Canal.

Clon'ic, a. [Fr. *clonique*, from Gr. *klōnos*, any violent, confused motion.] Irregular convulsive motions; convulsions with alternate relaxation; in contradistinction to *tonic*, which signifies a constant rigidity.

Clonmel, a town of Ireland, cos. Waterford and Tipperary, pleasantly situated on the river Suir, 14 m. S. S. E. of Cashell. Manuf. cotton fabrics. Pop. (1895) 8,480.

Clonmell, a town of Pennsylvania, a small village of Lancaster county.

Clontarf, a village of Ireland, prov. Leinster, co. Dublin, 2½ m. from the castle of Dublin; pop. 200. Here, April 23, 1034, Brian Boru, king of Ireland, with a force of 20,000 men, defeated 21,000 Danes, under King Sitric. 7,000 Irish, including Brian and his son, fell in the action. The Danish loss amounted to 13,000.

Clon'thal, or Klon'thal, a lake of Switzerland, 3 m. from Glarus. It is 2 m. long by 1 broad, and is elevated 2,526 feet above the sea.

Cloop, n. [From the sound.] The sound made when a cork is wrrenched from the mouth of a bottle.

Clootz, JEAN BAPTISTE DE, a Prussian baron, better known as ANACHARSIS CLOOTZ, one of the wildest and most violent actors in the early scenes of the French Revolution. He was born at Cleves, in 1755, and very early dissipated the greater portion of his fortune. In 1790, being at Paris, he presented himself at the bar of the National Assembly, attended by a number of men dressed to represent various foreign nations; and, describing himself as the "orator of the human race," he demanded the right of confederation. After making himself conspicuous by a variety of foolish projects set forth in no less foolish speeches, he was in 1792 sent to the National Convention as deputy from the department of the Oise. As might be expected from his previous conduct, he was among those who voted for the death of the unfortunate Louis XVI. His course, however, was now well-nigh run, for, becoming an object of suspicion to Robespierre, he was arrested, and guillotined in 1794.

Cloquet, JULES GERMAIN, (klo-kay,) a French physician, member of the Institute and of the Academy of Medicine, born in Paris, 1790, a brother of the celebrated anatomist, M. Hippolyte Cloquet, who died in 1843. He studied medicine in Paris, took his degrees of doctor in 1817, and after some competition, was, in 1831, elected to the chair of Pathological Surgery. In addition to various theses, which have received high commendation, he was the author of *Anatomie de l'Homme*, 1821-31; of *Pathologie Chirurgicale*, &c., in 1831, and other works. He contributed largely to the *Dictionnaire de Médecine*, was a skillful operator, and invented various useful surgical instruments. Died 1883.

Close, (kloz,) v. a. [Lat. *clausus*, from *claudo*, to shut; Fr. *clos*.] To shut; to move or bring as near as possible together; to make fast by pressing together, or by stopping an open place; to shut up; to block up; as, to close one's eyes.

"Now stir the fire and close the shutters fast."—Couper.

—To end; to finish; to conclude; to complete; to bring to an end or period; as, to close an account.

"One frugal supper did our studies close."—Dryden.

—To inclose; to encompass; to confine; to gather round. "According to the gift which hounteous nature hath in him closed."—Shaks.

—v. i. To come close together; to unite; to coalesce; as, to close a wound.—To end; to terminate, or come to a period; as, the poll closes at five o'clock.

To close on, or upon. To agree upon; to join in; to come to a mutual understanding or agreement; as, "to close upon some measures between them."—Temple.

To close with. To accede to; to come to an agreement with; to comply with; as, to close with certain propositions.—To make an agreement with; to unite with.

"It would become me better, than to close

In terms of friendship with thine enemies."—Shaks.

—To grapple with in wrestling.

—n. [Lat. *clausula*, from *claudo*.] A closing; conclusion; termination; final end; as, the close of a war.

"Speedy death,

The close of all my miseries and the balm."—Milton.

—Manner of shutting; junction; as, the close of a door.

—A grapple in wrestling; as, to make one's adversary come to the close.

(Mus.) End of a musical strain; a double bar marking the end; rest.

"At every close she made, th' attending throng

Replied, and bore the burden of the song."—Dryden.

Close, (klōs,) n. [Fr. *clos*; Lat. *clausus*, from *claudo*, to shut.] An inclosed space; specifically, a small field or square of land surrounded by a fence, rail, or wall; as, a cathedral close.

"I have a tree which grows here in my close."—Shaks.

—In England, a narrow way or passage leading from one street to another, or to a court of houses.

(Law.) An interest in the soil, or in trees or growing crops.

—a. Shut or made fast; tight; closed so as to have no opening; as, a close window.

—Confined; stagnant; oppressive; having no vent; without ventilation; causing lassitude; as, close weather.

—Secret; hidden; confined; secluded; private; pent up.

"Nor could his acts too close a vizard wear."—Dryden.

—Compact; solid; dense; having all the parts amalgamated.

"The inward substance of the earth is of itself an uniform mass, close and compact."—Burnet.

—Viscous; glutinous; tenacious; not volatile.

"This oil . . . is supposed of so close and tenacious a substance."—Wilkins.

—Disposed to be secretive; wary; reticent; cautious; taciturn.

"Constant you are . . . and for secrecy, no lady closer."—Shaks.

—Penurious; stingy; niggardly; parsimonious; as, a close old hunk.

—Near to; adjacent; adjoining; brought to the same neighborhood;—often preceding to; as, close to a wall.

"Some dire misfortune follows close behind."—Pope.

—Familiar; intimate; confidential; brought into contact.

"Mutual amity, so strait, so close."—Milton.

—Strictly adhering to the original; without deviation; literal; strict; as, a close copy.—Precise; careful; attentive; accurate; as, a close observer.—In doubt; evenly balanced; about equal; as, a close contest.

(Her.) Applied to a bird, when its wings are down and close to the body.

Close corporation. A corporate body whose officers are unattainable by the general public.—*Close-vowel.* A vowel pronounced by a contraction of the lips.—*Close to the wind.* (Naut.) Said of a vessel when sailing close-hauled, or as near as possible to the point whence the wind blows.

Close, adv. Closely; nearly; densely; secretly; pressingly.

"Close following pace for pace."—Milton

Close-banded, a. In close order; closely united.

Close-barred, a. Firmly closed by bars.

Close-bodied, a. Setting or fitting close to the body; as, a "close-bodied coat."—Ayliffe.

Close-compacted, a. Being in compact order.

Close-fisted, a. Gripping; covetous; niggardly; stingy; as, a close-fisted employer.

Close-handed, a. Covetous; penurious; parsimonious; close-fisted.

Close-handedness, n. Covetousness; stinginess.

Close-hauled, n (Naut.) A term applied to a ship sailing with her yards braced up so as to get as much as possible to windward.

Closely, adv. In a close manner; nearly; pressingly.

"Follow Fluellen closely at the heels."—Shaks.

Clos'en, v. a. To fasten, bind, or make close. (R.)

"His friends closen the tie by claiming relationship to him." Brit. Quart. Rev.

Close'ness, n. State or quality of being close; compactness; nearness; secrecy; stinginess; oppressiveness; literalness; narrowness; earnestness; as, close'ness of the atmosphere, close'ness of disposition, close'ness of neighborhood, close'ness of imitation, &c.

Clos'er, n. The person or thing which closes; a finisher; a concluser.

(Building.) A brick-bat inserted where the distance will not permit of a brick in length.—The term is also applied to mason's work, and it signifies in that case the piece of stone introduced to fill up a course of ashlaring around a building in such a manner as to secure the breaking of the bond.

Close-stool, n. A chamber-utensil; a bidet, (q. v.)

"And his high helmet was a close-stool pan."—Garth.

Clos'et, n. [dim. of *close*.] A small room or private apartment.

"The taper burneth in your closet."—Shaks.

—Any small room intended for privacy; a cabinet; a private repository.

"He furnishes her closet first, and fills
The crowded shelves with rarities of shells."—Dryden.

—v. a. To shut up or conceal in a closet.

"The heat of thy great love . . . doth closet up itself."—Herbert.

—To take into a private apartment for consultation.

"About this time began the project of closeting."—Swift.

Close'-tongued, a. Reticent; keeping silence; cautious in speech.

Clos'et-sin, n. Privately committed sin.

Closh, n. (Farriery.) A distemper in cattle. S. FOUNDER.

(Games.) Skittles; the game of nine-pins. (Sometimes written *clashy*.)

Clos'ter, n. In New Jersey, a post-village of Bergen co. abt. 20 m. N. by W. of New York.

Clos're, n. [Lat. *clausura*.] Act or operation of shutting; as, the closure of a chink.

—That which closes or shuts; that by which separate parts are made to adhere.

"Without a seal, wafer, or any closure whatever."—Pope.

—An inclosure; that which incloses or confines.

"Within the guilty closure of thy walls."—Shaks.

—A conclusion; an end.

"And make a mutual closure of our house."—Shaks.

Clot, n. [D. *kluit*, *kloot*; Ger. *kloss*. The root is found in *cloddaw*, to dig.] A concretion; a mass of soft fluid matter concreted; as, a clot of blood.

(Chem.) In a few minutes after the blood has been drawn, it begins to assume a gelatinous appearance, the semi-solid mass thus formed separates into a solid portion or *clot*, which continues to shrink for 10 to 12 hours, and a clear yellow liquid or *serum*. It might be supposed that this coagulation is due to the cooling of the blood, but it is found by experiment to take place even more rapidly when the temperature of the blood is raised one or two degrees after it has been drawn, and, on the other hand, if it be artificially cooled, coagulation is retarded. The reason of this remarkable behavior of the blood is not yet understood.

Clot, v. i. To form into clots or clods; to hang together. To concreate; to coagulate; to gather into concretion. To be defiled, or become gross.

"The soul grows clotted by contagion."—Milton.

Clot'-bur, n. (Bot.) The Burdock.

Cloth, n. Regular pl. CLOTHS; but written when used in relation to garments, CLOTHES. [A. S. *clath*; G. *kleid*; Swed. and Goth. *klade*, cloth, a garment; all to W. *clyd*, warm, sheltered, and *clydiam*, to make warm or comfortable. Derived by "Junius," from Gr. *klōtē* to spin.] A manufactured substance consisting of wool, hair, cotton, flax, and hemp, or other vegetable filaments. It is formed by weaving or interlacing threads, and used for making garments or other coverings. The term cloth, when used alone, is generally employed to distinguish woollen cloth from fabrics made of any other textile material. See WOOLLEN MANUFACTURE.

—A piece of any woven fabric set apart for a particular use, as, a table-cloth.

—Any texture used as a covering; as, the green cloth of a billiard-table.

—A term given to the clerical profession generally, virtue of their peculiar garb; as, a brother of the cloth.

Clothaire I., (klo-lair,) king of France, b. 497, was the son of Clovis and Clotilda. He, at first, was only king of Soissons, in 511; but became, in 558, master of the whole of France, on the death of his brothers. D. 560.

Clothaire II., b. about 575, succeeded his father, Clothaire I., in the kingdom of Soissons, at the age of five months. His mother maintained the kingdom for him against the efforts of Chilperic, and afterwards becoming possessed of Austrasia, he reigned over the whole of the kingdom. D. 628.

Clothaire III., b. 652, came to the throne of Burgundy in 655, on the death of his father, Clovis II. But his mother, governed during his minority with great wisdom. D. 670.

Clothaire IV., reigned only in name from 717 to 719. Charles Martel, mayor of the palace, having the power. D. 720.

Clothe, v. a. (imp. and pp. CLOTHED or CLAD.) [Fr. the noun.] To put clothes or garments on. To cover with dress. To furnish with raiment.—To put to invest; to cover; to surround; to encompass; to cover or spread over.

—v. i. To wear clothes.

Clothes, n. pl. of CLOTH. Covering for the body. Whatever covering is worn, or made to be worn, for decency or comfort. Garments; raiment; attire; dress; vestments; apparel.—Blankets, &c., put upon a bed.

Clothes'-horse, n. A frame that is used for hanging clothes on to dry, after they are washed.

Clothes'-press, n. A depository for clothes.

Cloth'ier, n. A maker or seller of cloths or clothes. One who dresses or fuls cloth.

Cloth'ing, a. Covering with, or putting on vestment of any kind; providing with garments; covering.

—n. Garments in general; clothes; dress; raiment; covering.

Cloth'-moth, n. (Zööl.) See TINIA.

Clotho, n. (Zööl.) A genus of spiders which inhabit Egypt and S. Europe, the best known species of which is *Durandi*—above half an inch long, long-legged brown, with black abdomen, marked with five yellow spots—is interesting on account of its habits, and of a sort of tent which it spins for itself. This curious structure is in shape like a limpet-shell, about an inch in diameter, and is fastened to the under side of stones or crevices of rocks, not by its whole circumference, but seven or eight points only. Within this the eggs are deposited in several bags of lenticular form. The parent creeps in and out under the edges of her tent, and supplies the young with food till they are able to dispense with the maternal care.

cloth-shearer, *n.* One who trims the cloth and levels the nap.

clodpoll, *n.* A thickskull; a clodpoll.—*Shaks.*

clotted, *p. a.* Formed into clots; concreted into a mass; adhering in a lump.

clotting, *n.* Same as clot. (*r.*)—Full of clots, or small and masses.

cloud, *n.* [*A. S. hlid, gehlid*; *Ger. liet*, a cover: *A. S. idan*, to cover, *pp. gehlidud, gehlyd*, covered: similarly *Lat. nubes*, a cloud, is from *nubere*, to veil, to cover.] That which covers, obscures, or darkens.—A collection of watery particles, in the state of visible vapor, suspended in the air at some height, obscuring the sun, and throwing the earth into shade.—A collection of smoke dust rising or floating in the air.—Anything resembling a cloud or clouds.—State of obscurity, gloom, or darkness.

"The poets may of inspiration boast,
Their rage, ill govern'd, in the clouds is lost."—*Waller.*

great multitude: a crowd; as, "a cloud of witnesses."
Atterbury.

(*Meteorol.*) *C.* differ from fogs or mists only in occupying a more elevated position: in all cases the origin is the same, namely, the vapors which rise from collections of water, and indeed from the whole surface of the earth. These aqueous vapors are condensed in the higher and colder regions of the atmosphere, and thus lose their transparency and become visible. *C.* differ very greatly in respect of form, magnitude, density, &c. These differences depend on the quantity of vapor of which they are composed, and the situations which they take as they unite with one another; and are determined in great measure by the direction and velocity of the motion communicated to them by the wind. The height at which they float in the atmosphere is determined by their specific gravity, and consequently varies with their density. Thin light *C.* are observed higher than the summits of the loftiest mountains, while those which are dense and thick rise only to a small distance above the surface of the earth. It is very difficult to determine their average elevation: it is supposed to be between two and three miles, but it varies at different times of the year. *C.* are generally distributed into three primary formations—the *Cirrus*, the *Cumulus*, and the *Nimbus*. But besides these there are four other varieties—the *Cirro-cumulus*, the *Cirro-stratus*, the *Cumulo-stratus*, and the *Cumulo-cirrostratus* or *Nimbus*. The *Cirrus* consists of fibres or curling streaks, which diverge in all directions. It occupies the highest region, and is frequently the first cloud which is seen after a continuance of clear weather. The *Cumulus* is a convex aggregate of watery particles, increasing upwards from a horizontal base, and assuming more or less of a conical figure. The *Stratus* consists of horizontal layers, and compre-

Fig. 627.—STRATUS.

ends fogs and mists. It is the lowest of the clouds, its under surface usually resting on the earth or water: and it is considered as the precursor of fine weather. The *Cirro-cumulus* is intermediate between the *cirrus* and *cumulus*, and is composed of small well-defined masses closely arranged. The *Cirro-stratus*, intermediate between the *cirrus* and *stratus*, consists of horizontal masses separated into groups, with which the sky is sometimes so mottled as to suggest the idea of resemblance to the back of the mackerel. The prevalence of the *cirro-stratus* is usually followed by bad weather. The *Cumulo-stratus*, or *twain-cloud*, partakes of the appearance of the *cumulus* and *stratus* or *cirro-stratus*. The *Nimbus*, or *rain-cloud*, is that into which the others solve themselves when rain falls. The above nomenclature is sufficiently fanciful: nevertheless it enables the meteorologist to convey more precise ideas in describing the diversified forms under which masses of clouds present themselves, and their connection with the changes of the weather. These forms are, however, frequently so indefinite and shapeless, that it is difficult, not impossible, to refer them to any one of the preceding modifications. A tendency, however, to one or more of them may in general be traced.

Cloud, *v. a.* To overspread with a cloud or clouds; to obscure; to darken.

"What sullen fury clouds his scornful brow!"—*Pope.*
To variegate with colors resembling clouds.—To give the appearance of sullenness or gloom to.—To tarnish; to sully.

n. To grow cloudy; to become obscure with clouds.

Cloudage, *n.* The state of being cloudy; cloudiness. (*r.*)

Cloud-berry, *n.* (*Bot.*) See *RUBUS*.

Cloud-capt, *n.* Topped with clouds.

Cloud-compeller, *n.* One who collects clouds; a poetical name given to Jupiter.

Cloud-compelling, *a.* An epithet of Jupiter, by whom clouds were said to be collected.

Cloud-eclipsed, *a.* Eclipsed by a cloud.

Cloud-girt, *a.* Girt with clouds.

Cloudily, *adv.* With clouds; darkly; obscurely.

Cloudiness, *n.* State of being cloudy; obscurity; gloom; want of brightness.—Appearance of gloom or sullenness.

Cloudless, *a.* Being without a cloud; unclouded; clear; bright.

Cloudlet, *n.* A little cloud.

Cloud, *St.*, (*Kloo*), or *CLODOALD*, son of Clodomir, and grandson of Clovis, king of France. After the death of his father, and the murder of his two brothers (see *CLODOMIR*), he became a monk, and found refuge in a monastery near Paris, which took from him the name of *St. Cloud*. D. at *St. Cloud*, 560.

Cloud, *St.*, a parish and town of France, dep. Seine-et-Oise, on the limit of Paris; pop. 5,248. The historical associations of this place are intimately connected with the royalty of France. Its palace, which is very beautiful, was originally the property of the dukes of Orleans, and, for a long period, was a summer residence of the kings of France. Its fountains are extremely elegant, and its park extensive. Here, in 1799, Napoleon I. dismissed the Assembly of Five Hundred, and caused himself to be proclaimed first consul; and here, in 1830, Charles X. put his signature to the ordinances which cost him his throne.

Cloud-topt, *a.* Crowned with clouds; cloud-capt.

Cloudy, *adv.* Overcast or obscured with clouds. Consisting of a cloud or clouds.—Obscure; dark; not easily understood.—Indicating gloom, anxiety, sullenness, or ill-nature.—Marked with veins or spots, as marble.—Not bright.

Clough, (*kluf*), *n.* [*A. S.* from *cleofian*, to cleave, to split.] A cleft in a hill; a precipice or rugged ascent.

Clout, *n.* [*A. S. clut*, from *cleofian*, to cleave, to divide or separate.] A patch of cloth, leather, &c.; a rag; a piece of cloth for men's purposes.—An iron plate on an axle-tree.

v. u. To patch; to mend by sewing on a piece or patch. To cover with a piece of cloth.—To join clumsily.

—To cover or arm with an iron plate.

Clouted, *p. a.* Covered with a clout; patched; mended clumsily.

Clouted, or *Clotted Cream*. A kind of cream produced by setting a pan of new milk on a hot hearth.

Cloutierville, in *Louisiana*, a post-village of Natchitoches parish, on the N. bank of Red River, 85 m. W. by S. of Concordia. Here, on April 23, 1864, an engagement took place between the rear-guard of the National army under Gen. T. Kilby Smith, and the Confederates, in which the latter were repulsed with a loss of 100 men.

Clout-nail, *n.* A wrought-iron nail, short, and with a large head, used for the soles of strong shoes, or where clinching is necessary.

Clove, *v. a.* [*See CLOVE.*] (*Zöf.*) Applied to a shell that is thicker at the top than at the base.

Clove, one of the two preterites of *CLEAVE*, *q. v.* (Used principally in poetry.)

Clove, *n.* [*See CLOUGH.*] A ravine; a gap; a break in land.

Clove, *n.* [*Fr. clou*; *Sp. clavo*, from *Lat. clarus*, a nail.] The dried spicy bud of an East Indian tree, so called from its resemblance to a nail. See *CARYOPHYLLUS*.

—*A. S. clufe*, from *cleofian*, to split, to divide. (*Bot.*) One of the small bulbs formed in the axillæ of the scales of a mother bulb, as in garlic.

—In some parts of England, a term used for a weight of quantity; as, a *clove* of wool (about 7 lbs.).

Clove-gillyflower, *Clove Pink*, *n.* (*Bot.*) See *DIANTHUS*.

Clove-hitch, *n.* (*Naut.*) Two half hitches formed round a spar or other rope.

Clove-hook, *n.* (*Naut.*) An iron clasp, in two parts, moving upon the same pivot and overlapping one another, used for bending chain-sheets to the clues of sails.

Cloven, *pp.* of *CLEAVE*, *q. v.*

Cloven-footed, **Cloven-hoofed**, *a.* Having the foot or hoof cleft or divided into two parts, as the ox.

"The cloven-footed fiend is banished from us."—*Dryden.*

Clover, **Clover-grass**, *n.* [*A. S. clofer*, from *cleofian*, to cleave.] (*Bot.*) Trefoil, a grass, of which the leaf appears as if cleft into three lobes or divisions. See *TRIFOLIUM*.

Clovered, *a.* Covered with clover.

Clover, in *Illinois*, a township of Henry co.

Clover, in *Pennsylvania*, a township of Jefferson county.

Clover Creek, in *Pennsylvania*, traverses Blair co., and falls into the Juniata River.

Cloverdale, in *California*, a post-village and township of Sonoma co., on Russian River, 34 m. N.N.W. of Santa Rosa.

Cloverdale, in *Indiana*, a post-village and township of Putnam co., 10 m. S. of Greencastle.

Cloverdale, in *Virginia*, a village of Botetourt co.

Clover Hill, in *New Jersey*, a village of Hunterdon co., 35 m. N. of Trenton.

Clover Hill, in *Tennessee*, a village of Blount co., 25 m. S. W. of Knoxville.

Clover Hill, in *Virginia*, a village, formerly cap. of Appomattox co., 20 m. E. of Lynchburg.

Cloverlaud, in *Indiana*, a post-village of Clay co., 10 m. E. N. E. of Terre Haute.

Cloverport, in *Kentucky*, a city and township of Breckinridge co., on the Ohio river, 110 m. below Louisville. Coal is abundant, and 4 m. from the village are the White Sulphur Springs. Pop. (1847) abt. 1,750.

Clover-weevil, *n.* (*Zöf.*) See *CURCULIONIDÆ*.

Clovesville, in *New York*, a post-village of Delaware co., 65 m. S.W. of Albany.

Clove-wort, *n.* (*Bot.*) See *CARYOPHYLLACEÆ*.

Clovis I., KING OF THE FRANKS, usually called the founder of the French monarchy, was born in 467. He was the son of Childeric I., and succeeded him in 481. During his reign he recovered from the Romans all their possessions in Gaul. He defeated Siagrius, near Soissons, in 486, compelled Alaric, king of the Visigoths, to surrender himself, and had him put to death. *C.* married Clotilda, niece of Guudebald, king of the Burgundians, and through her influence was gradually led to renounce paganism, and profess Christianity. His final decision was made after his great victory over the Alemanni, at Tolbiac, in 496; and he was baptized by St. Remi, with 3,000 of his subjects. In the following year the Armorica united themselves with the Franks. *C.* pursued a crafty policy with the king of the Burgundians and his brother, on the principle "divide and conquer." In 507 he made war on Alaric II., king of the Visigoths, and totally defeated him at the battle of Vouge, killing him with his own hand. *C.* thus added the whole south-west part of Gaul to his dominions. At Tours he soon afterward received ambassadors from Anastasius, emperor of the East, who gave him the titles of patrician and consul. *C.* about that time, settled at Paris, and made it the capital city. He disgraced himself by the unjust and cruel measures he took to get rid of several of his kindred, possible competitors for the crown. D. at Paris, in 511, after dividing his kingdom between his four sons.

Clovis II., second son of Dagobert, king of Neustria and Burgundy, whom he succeeded in 638. D. 655.

Clovis III., son of Thierry III., king of France, whom he succeeded in 691, at the age of nine, and reigned five years, under the guardianship of Pepin d'Heristal, mayor of the palace. D. 695.

Clown, *n.* [*Dan. klont*; *L. Sax. klunt*; *Swed. and Goth. kluns*, a lump, a clod, a clot.] A country fellow; a rustic; a husbandman.

"He came with all his clowns, horsed upon cart-jades."—*Sidney.*
—A churl; a coarse, ignorant, ill-bred man.

"In youth a cockcomb, and in age a clown."—*Spectator.*

—A buffoon; a mimic; a professional fool; a jester in a circus, &c.

v. i. To act as a clown—generally preceding *it*.

Clownish, *u.* Resembling a clown; coarse; ill-bred; rude; rustic; awkward; uncultivated; as, *clownish* manners.

Clownishly, *adv.* After the manner of clowns; rudely; awkwardly; churlishly.

Clownishness, *n.* Quality of being clownish; awkwardness, or rusticity of manner; coarseness of behavior.

"Wipe off that plainness which the a-la-mode people call clownishness."—*Locke.*

Cloy, *v. a.* [*O. Fr. enclayer*; *Fr. enclouer*, to spike, to drive a nail into the touch-hole of a cannon, to render it useless, from *clou*, *Lat. clavis*, a nail; allied to *clug*.] To glut; to satiate; to snuff; to fill to repletion; as, to *cloy* the appetite.

"Nor pinch'd with want, nor cloy'd with wanton ease."—*Roscommon.*

Cloyless, *a.* That which is unable to cloy or satiate.

Cloyne, a town of Ireland, co. Cork, 12 m. S.E. of Cork; pop. 1,800.

Club, *n.* [*Ger. kolben*; *O. Gr. kolbo*; *Icel. kylfa, kolfr*, the bulb of a root; *Swed. klubba*; probably akin to *L. Sax. kloppen*, *Ger. klopfen*, to strike; *W. clab*, a boss, a knob; *Lat. clava*.] A short, heavy, massy stick, of sufficient dimensions for the hand to grasp at one end, and thickening at the other; a cudgel; a mace; a bludgeon.

"Arm'd with a knotty club, another came."—*Dryden.*

—A suit at cards, marked with a figure in form of a club, or, rather, a clover-leaf. (Used generally in the plural.)

"Ensanguin'd hearts, clubs typical of strife."—*Cowper.*

Club, *v. i.* [*A. S. cleofian*, to cleave, to adhere.] To join or contribute a certain share or proportion to a common expense.

—To join or unite together for some common end.

"Let sugar, wine, and cream together club,
To make that gentle viand, syllabub."—*King.*

v. a. To form a club; to unite for the accomplishment of a common end.

"Every part of the body seems to club and contribute to the seed."—*Ray.*

—To pay an equal proportion or quota of a common reckoning or expense.

n. An association of persons united for the promotion of some common object, as for good-fellowship, promotion of literature, science, politics, &c.; as, the *Athenæum Club*.

—The division or quota of expense incurred at a club or social meeting.

"We dined at a French house, but paid ten shillings for our part of the club."—*Pepys.*

Clubbed, *a.* Collected into a sum and averaged, as different expenses; as, the amount was *clubbed* among them.

Clubber, **Clubbist**, *n.* One who frequents a club; a member of a club, or association.

Clubbing, *n.* (*Naut.*) Drifting down the current with an anchor out;—spoken of a ship.

(*Hort.*) See *CABBAGE*.

Club Creek, in *Virginia*, flows S. through Charlotte co., and enters Staunton River a few miles S.W. of Marysville.

Club'-fist, n. A large, heavy fist; hence, a coarse, brutal fellow.

Club'-fisted, a. Having a large, heavy fist.

Club'-foot, n. (Surg.) A distortion of the foot, occasioned by the greater contraction of some muscles than others, by which means the foot is drawn out of its natural position: it may be inwards or outwards, with the elevation of the heel and depression of the toes, or the depression of the heel and elevation of the toes and fore part of the foot. Such deformities are usually congenital; but sometimes they may arise from some disordered state of the system, or be occasioned by convulsions. This deformity may now, in almost every case, be cured by a careful subcutaneous division of the contracted tendons.

Club'-footed, a. Having short, crooked, or deformed feet; as, a *club'-footed* person.

Club'-grass, n. (Bot.) A species of European grass, *Corynephorus canescens*, tribe *Aveneæ*.

Club'-haul, v. a. (Naut.) To bring a vessel's head round on the other tack, by letting go the lee anchor, and cutting or slipping the cable.

Club'-headed, a. Having a thick head; as, "*club'-headed* antenae."

Club'-house, n. A house where a club or a select number of individuals meet, each contributing an equal share of the expenses.

Club'-law, n. Government by violence; the law of brute force; anarchy.

Club'-man, n. One who wields or carries a club.

Club'-moss, n. (Bot.) See LYCOPODIACEÆ.

Club'-room, n. The apartment in which a club meets.

Club'-rush, n. (Bot.) See SCIRPUS.

Cluck, v. i. [A. S. *cluccan* ; formed from the sound.] To make the noise, or utter the voice, of the domestic hen, when calling chickens.

—*v. a.* To call chickens, as a hen.

—*n.* A peculiar articulation of the voice; a clicking sound.

Cluck'-ing, n. Utterance like the voice of a sitting hen; act of calling chickens.

Clue, n. See CLEW.

Clump, n. [Ger. *klump*. See LUMP.] A thick, short, shapeless piece of wood or other solid substance. — A cluster of trees or shrubs.

—The compressed clay of coal-strata.

—*v. i.* To tramp, clamp, or clatter; — used as an English provincialism.

Clumps, n. s. [From *clump*.] A numskull; a dolt; a stupid fellow.

Clump'-sy, a. Consisting of clumps; massive; agglomerated. (Used in some parts of England.)

Clum'-sily, adv. In a clumsy manner; awkwardly.

"He walks very *clumsily* and ridiculously." — Ray.

Clum'-siness, n. Quality of being awkward or clumsy; want of readiness, grace, or dexterity.

Clum'-sy, a. [From *clump*.] Lumpy; heavy; massive; unwieldy; unbandy; awkward; without grace, dexterity, or readiness; as, *clumsy* fingers.

"That *clumsy* outside of a porter,

How could it thus conceal a courtier?" — Swift.

—*ill-made*; badly constructed or executed; as, "*clumsy* verse." — Dryden.

Clunch, n. (Geol.) The hard and often dirty-looking bed of the lower chalk. In the *C.* the silicious particles that were removed to form beds of flint in the white upper chalk are generally found disseminated among the chalk itself, giving it a grayer color and harsher feel. It rests on the upper green sand (an arenaceous bed), and often contains clay.

Clung, imp. of CLING, q. v.

Clung, v. i. To shrink, contract, or shrivel up, as wood. See CLING.

—*n.* Shrivelled; shrunk; wasted.

Clun'-iac, n. One of the reformed Benedictines of CLUNY, q. v.

Clun'-iac, Cluniacens'-ian, a. Of, or pertaining to, the discipline of the Benedictine monks of Cluny.

Cluny, (kloo'-ne,) (anc. *Cluniacum*.) A town of France, dep. Saône-et-Loire, on the Grône, 46 m. N. of Lyons. There are seen the ruins of the celebrated abbey mentioned below. Pop. 4,253.

Cluny, (MONKS OF THE ORDER OF,) were the first branch of the order of Benedictines, and took their name from the above town, where they were first established. The Benedictines having become very lax in their discipline, St. Odo, abbot of Cluny, in 927, not only insisted on a rigorous observance of the rules by the monks under him, but likewise introduced new ceremonies of a severer nature. These new rules soon came to be observed in the principal monasteries in France, Spain, Italy, Germany, and Britain; and by the 12th century the order numbered 2,000 cloisters in different parts of Europe. The order was abolished in 1790.

Clupea, n., CLUPEIDÆ, n. pl. (Zool.) A genus and family of Malacopterygious fishes; distinguished by their wanting the adipose fin, by having the upper jaw composed of the intermaxillary bones in the middle, and the maxillaries at the sides, and by the body being always covered with scales. To the genus *Clupea* belong the *Herring*, *Sprat*, *Shad*, *Whitebait*, &c., q. v. To it also belongs the *Brit*, a small fish, 1 to 4 inches long, found abundantly on the coasts of New England.

Clusia, (kloo'-se-a.) [After Charles de L'Ecluse, a French botanist.] (*Bot.*) A genus of trees, order *Clusiaceæ*. The Balsam-tree of Jamaica is *C. flava*; and this, with the species *C. alba* and *rosea* (Fig. 628), yield a glutinous, resinous matter, used in some parts of the West Indies in place of pitch. In Nevis and St. Kitt's the three species are known indiscriminately by the names of *fat pork*, *monkey apple*, and *mountain* or *wild mango*.

Clusiaceæ, GUTTIFERÆ, n. pl. (Bot.) An order of

plants, alliance *Guttiferales*. DIAG. Simple, opposite leaves, without stipules, symmetrical flowers, equilateral petals, aduate beakless anthers, solitary or few seeds, and sessile radiating stigmas. They consist of tropical trees and shrubs, natives of S. America and S. Africa. They are chiefly remarkable for yielding a

Fig. 628. — CLUSIA ROSEA.

1, an expanded flower; 2, a calyx seen from below; 3, the ovary with a part of the calyx cut away; 4, a transverse section of a fruit.

yellow gum-resin of an acrid and purgative nature. In many cases, however, the fruits are edible, and are held in high estimation for their delicious flavor. There are 32 genera, including 150 species. — See GARCINIA, MAMEA, MESUA.

Ch'sius, (CHARLES DE L'ECLUSE,) a French botanist, b. at Arras, 1526. He travelled extensively in Europe in pursuit of his favorite science, and by over-exertion and numerous grave accidents, he ruined his health and became a cripple. He was made keeper of the Botanical Gardens at Vienna, and in 1593 accepted the chair of Botany at Leyden. His principal works are, *Rariorum Plantarum Historia*; *Exoticorum libri X.*; and *Histoire des Plantes*, a translation from Dodoeus. D. 1609.

Clusone, (kloo'-so'-ni,) a town of N. Italy, 18 m. from Bergamo. Pop. 5,675. — A river of Italy, joining the Po 18 m. from Turin.

Cluster, n. [A. S. *cluster*, *clyster*; Icel. *klistr*, glue; *klistra*, to glue together; Swed. and Goth. *klister*, glue; Dn. *klister*, from *klissen*, to adhere, to stick together.] A bunch, as of grapes; a number of things of the same kind growing, or joined, together.

—A number of similar things massed, or collected together, or found contiguous to each other; as, a *cluster* of islands.

—A number of individuals brought together; a knot of people; a crowd; as, "among the *cluster* of a mob."

Addison.

—*v. i.* To be or to keep close together; to grow in clusters or bunches; to collect together in masses.

"Forth flourish'd thick the *clustering* vine." — Milton.

—*v. a.* To collect into a cluster, close body, or mass; as a *clustering* crowd.

Clustered Columns, (COMPOUND

PIERS,) *n. pl. (Arch.)*

Apier which consists

of several columns or

shafts clustered together.

They are one of the

richest features of Gothic

ecclesiastical architecture.

The columns or

shafts are sometimes

attached to each other

throughout their whole

length, (A, Fig. 629.)

sometimes only at the

base and capital.

Cluster-grape, n.

A small black grape.

(Sometimes called the

currant-grape.)

Clus'-teringly, adv. In

a clustering manner.

Clus'-tery, a. Growing

in clusters. — Prolific of clusters.

Clutch, (kluch,) v. a. [From A. S. *gelaecan*, from *laecan*,

to seize; Scot. *cleik*, to catch, as by a hook; *cleck*, an iron

hook.] To grip; to grasp; to catch or seize hold of.

"And lives to *clutch* the golden keys." — Tennyson.

—To clinch tightly with the hand; to hold closely.

"Not that I have the power to *clutch* my hand,

When his fair angels would salute my palm." — Shaks.

—*n.* A grip; a grasp; a seizure; something that catches or holds fast; as, "The *clutch* of poverty." — Chwyper.

—*pl.* The paws or claws of a rapacious animal; — hence the hands, when used as instruments of rapacity, cruelty, or power.

"'Gainst those who have us in their *clutches*." — Hudibras.

(*Mach.*) An apparatus for engaging or disengaging two shafts; it consists of two pieces of metal formed that, when placed together, projecting pieces on (made to slide to and fro on the shaft, but turn with fit into recesses in the other, which is fixed on the driving shaft, so that the first being pulled back, its sl will remain at rest.

Clutter, n. [See CLATTER.] A clatter; a confusion; bustle; disorder.

"Prithee, Tim, why all this *clutter*?" — Swift.

—*v. a.* To crowd together in disorder; to fill with this in confusion; as, to *clutter* a house.

—*v. i.* To clatter; to make a bustle, or fill with confusion.

Clu'-ver, PHILIP, (CLUVERIUS,) a learned German geographer, b. at Dantzic, 1580. He travelled through principal countries of Europe, and published the fr of his researches in his *Germania Antiqua*; *Siciliæ antiquæ libri II.*; *Italia Antiqua*, &c. He is said to have spoken with fluency nine languages. D. at Leyden, 1

Clwyd, (kloo'-id,) a river of N. Wales, England, runs through Denbighshire and Flintshire, and falling into Irish Sea, about 6 m. N.W. of St. Asaph. The tract country which it waters, called the *Vale of Clwyd*, one of the most fertile and picturesque in Great Brit

Clyde, one of the largest rivers of Scotland, rising in S. part of Lanarkshire, and forming an arm of the called the *Frith of Clyde*, near the castle of Dumbar. It becomes navigable at the city of Glasgow. Len from its source, near Rodger Law, to Glasgow, 70 from Glasgow to the S. point of the island of Bute. In the parish of Lanark are the *Falls of the Clyde*, feet high.

Clyde, COLIN CAMPBELL, LORD, G.C.B., a distinguis British general, b. 1792. He was the son of a Glas tradesman, and early entering upon a military career served throughout the Peninsular war, in the U. St in 1814, and in China in 1842. In 1848-52 he fought the Indian campaigns, and in 1854 commanded the II land brigade of the British army in the battles of Al Balaklava, and Inkerman. In 1857, Sir Colin succeeded to India as commander-in-chief, and while th relieved Lucknow during the Sepoy mutiny, and fin suppressed that revolt. For his long and brilliant vices, he was raised to the peerage, as *Lord Clyde* 1859, and d. 1863.

Clyde, in Iowa, a post-office of Jasper co.

Clyde, in Michigan, a township in Allegan co ty.

—A township of St. Clair co.

Clyde, in New York, a fine town in Galen towns Wayne co., 186 m. N.W. by W. of Albany, on the Cl river. Pop. (1897) about 3,000.

Clyde, in Ohio, an important town of Sandusky co., 120 m. N. of Columbus. Pop. (1897) abt. 2,600.

Clyde, in Wisconsin, a township of Iowa county, on south side of the Wisconsin river, about 44 miles W. N. of Madison.

Clyde Mills, in Michigan, a village of St. Clair co., m. N. N. E. of Detroit.

Clyde River, in New York, formed by the junct of Flint and Mud creeks, traverses Wayne co., flows into Seneca River.

Clyde River, in Vermont, rises in Essex co., and f into Memphremagog Lake, in Orleans co.

Clyde River, in British North America, falling i Baffin's Bay, Lat 70° 10' N., Lon. 69° W.

Clyman, in Wisconsin, a post-township of Do county, about 7 m. S. of Juneau, and 8 m. N. of Wa town.

Clymer, GEORGE, B. of a good family, in Philadelph in 1739. He was chairman of the committee wh prevented the tea sent out by the English govt. fi being sold in that city, and was also a signer of Declaration of American Independence. D. 1813.

Clymer, in New York, a post-village and township Chautauqua co., 18 m. S.W. of Maysville.

Clymer, in Pennsylvania, a thriving township Tioga co.

Clypeus'-tride, n. pl. [Lat. *clypeus*, a buckle, *astrum*, a star.] (Zool.) A family of the order *Echino containing sea-urchins which have the ambulacra p*

loid, and peristome central.

Clypeate, a. (Bot.) Shield-shaped; scutate.

Clypeiform, a. [Lat. *clypeus*, shield, and *form*.] Shield-shaped; clypeate.

Clysmian, a. [From Gr. *klusien*, to wash out.] lating, or pertaining, to the deluge.

Clysmic, a. Cleansing; washing out; as, a *clys apparatus*.

Clyster, n. [Gr. *kluzo*, I wash out.] (Med.) A ns given to certain medicines administered in a liquid fo by means of an injecting syringe, by the rectum, for purpose of procuring evacuation of the bowels, or otl wise affecting the intestines or the system generally See INJECTION.

Clyster-pipe, n. A tube used in injecting clysters

Clysterwise, a. After the manner of a clyster.

Clytemnes'-tra, a daughter of Tyndarus, king Sparta, by Leda, and the wife of the king of Argos, A MEMNON, q. v.

Cnicus, n. (Bot.) A genus of plants, order *Asterac The Blessed Thistle, *C. benedictus*, native of Persia Greece, 2 feet high, with yellow flowers, was forme held in great estimation in medicine, but is now c sidered worthless.*

Cnidium, (nil'-e-um,) n. (Bot.) A gen. of deciduous h laceous plants, order *Apiaceæ*.

Co-, a prefix, denoting with; in conjunction; togeth See CON.

Co-, a contracted method of writing the term compa when applied in a commercial sense; as, Smith and C

Fig. 629. — GOTHIC CHURCH, QUIMPERLÉ, (France.)

C. Coos, and **Cos**, one of the Cyclades, situate near the coast of Asia, about 15 m. from Halicarnassus. It gave birth to Hippocrates and Apelles, and was famous for its fertility, and the wine and silk-worms which it produced. The Turks name it *Stanco*.

Coacer'vate, *v. a.* [Lat. *coacervare*.] To heap up, or pile together. (R.)

Coacervate, *n.* [Lat. *coacervatio*.] The act of heaping on, or piling up or together. (o.)

Coach, (*kôch*), *n.* [Fr. *coche*, *carrosse*; It. *cocchio*, *carroccio*, *carrozza*, from Lat. *carruca*, a sort of four-wheeled travelling chariot; Celt. *car*, a vehicle.] A carriage of pleasure or state, distinguished from a chariot by having seats fronting each other; a close four-wheeled vehicle for commodious travelling. — Though covered wagons or carriages were known to the Egyptians and Romans, the vehicle we denominate by the name of coach appears to have been an Hungarian invention, about 1350. Isabella, wife of Charles VI. of France, was the first who used a coach in that country, hung in coaches. In Francis I.'s time they had become more

Fig. 630. — STATE-COACH OF QUEEN ELIZABETH.

improved, but were only used by ladies, and men too heavy or incapacitated by disease for riding on horseback. In 1540, the first carriages on springs were used in Paris, only three of them being in existence; under Henry III. the fourth coach was introduced. In 1599, the first C. with glass windows was brought from Italy to France. In 1658, there were 520 C. in Paris. In many, the emperors used coaches much earlier; indeed, the middle of the 15th century saw them in general use by the royalty in that part of Europe. The first ever seen in England is said to have been one made 1555 by Walter Rippon for the Earl of Rutland; and 1564 the same builder made for Queen Elizabeth the only vehicle represented in Fig. 630. It is believed to have been in the time of Louis XIV. that C. were first suspended by leather straps, in order to insure ease of motion.

The term applied in schools and universities to a private tutor, or one who takes special supervision of the studies of an undergraduate, preparatory to examination-term, is also used to denote a person who instructs in rowing and other athletic sports.

Coach, (*Sometimes written COACH.*) A room in a ship, the roof of which is formed by the poop.

Hackney-coach, a four-wheeled coach for public hire, called indifferently *car*, *cab*, and *hack*.

Mail-coach, a four-horsed coach for carrying the public mails.

Stage-coach. See **STAGE**.

To convey or carry in a coach.

"The needy poet sticks to all he meets,
Coach'd, carted, trod upon." — *Pope*.

To privately prepare a student for examination for honors. (Used colloquially at Cambridge University, Eng.)

Tutor a hoating-crew; as, to *coach* the University boat.

Coach-box, *n.* The driver's seat on a coach.

Coach'ee, *n.* A slang term for a coachman.

Coach-fellow, *n.* A horse doing duty with another drawing a carriage or coach.

Coach-hire, *n.* Money paid for the use of a hired coach.

Coach-house, *n.* The enclosure or apartment in which a coach or other vehicle is kept from the weather.

Coach-maker, *n.* One whose trade is to make coaches, carriages, &c.

Coachman, *n.* One who drives a coach; he who handles the reins in driving.

"I heard thy anxious coachman say,
It cost thee more in whips than hay." — *Prior*.

Coachmanship, *n.* Skill in driving horses attached to coaches.

Coach-whip Snake, *n.* (Zool.) See **MASTICOPEUS**.

Coaction, *n.* Compulsion; force, either in restraining or compelling.

Coactive, *a.* Having the force of restraint or impulse; as, *coactive power*.

To act conjointly or in concurrence. (R.)

Coactively, *adv.* In a coactive manner.

Coactivity, *n.* Unity or conjunction of action.

Coadaptation, *n.* Concurrent adaptation.

Coadapted, *a.* Adapted mutually, or one to another.

Coadjument, *n.* Mutual aid; reciprocal assistance.

Coadjust, *v. a.* To adjust by mutual adaptation.

Coadjustment, *n.* State or circumstance of being concurrently adjusted.

Coadjutant, *a.* [Lat. *con*, and *adjutus*, from *adjuvare*, to help or assist.] Co-operating; mutually helping or assisting.

Coadjutant, *n.* A fellow-helper or assistant; an associate.

Coadjuting, *a.* Co-operating; mutually helping.

Coadjutive, *a.* Rendering co-operation or mutual assistance.

Coadjutor, *n.* One who co-operates with another; a fellow-helper or assistant; a colleague.

"Away the friendly coadjutor flies." — *Garth*.

—One who is empowered or appointed to the duties of another; a proxy.

(Ecc. Hist.) In the Roman Catholic Church, the assistant of a bishop or other prelate. A C. was equal in rank to the dignitary whose functions he might on occasion supply; hence the C. of a bishop was himself consecrated a bishop in *partibus infidelium*. The celebrated Cardinal de Retz was known by the title of the *Coadjutor of Paris* during the most active period of his career, having the administration of the temporalities of that see, which belonged to his uncle, the Archbishop de Retz. C. usually succeeded their principals in their dignities; hence arose an abuse which tended to make ecclesiastical dignities hereditary; nephews and other relatives of bishops being named their coadjutors. The institution of C. to bishoprics is preserved by the French Concordat of 1801.

(Ecc.) In the Roman Catholic Church, one who acts as assistant to a bishop; a joint prelate.

Coadjutorship, *n.* Co-assistance; state or quality of a coadjutor.

Coadjutress, **Coadjutrix**, *n.* A female helper, assistant, or proxy.

Coadjutant, *n.* (Med.) That ingredient in a prescription which concurs or unites with another.

Coadjutaney, *n.* Joint or concurrent help; co-operation.

Coadjunate, *a.* (Bot.) Two or more parts united at the base.

Coadmixture, *n.* [See **UNITION**.] The conjunction of different substances into one cohesive mass; as, "the coadmixture of particles." — *Hale*.

Coadventure, *n.* An adventure or speculation in which more than one participate.

Coadventurer, *n.* A fellow-adventurer; a co-partner.

Coafforest, *v. a.* [See **FOREST**.] To turn into a forest, as ground. (Opposed to *disafforest*.)

Coagency, *n.* Joint agency; association in common.

Coagent, *n.* A fellow-agent; an assistant or associate in an act.

Coagulability, *n.* Capacity of being coagulated; capable of concretion or congelation.

Coagulable, *a.* That may be coagulated; capable of being concreted or curdled.

Coagulant, *n.* [Lat. *coagulans*.] Any substance susceptible of coagulation.

Coagulate, *v. a.* [Lat. *coagulo*, *coagulatus*, from *cogo*, *con*, and *ago*, to move, to drive, to urge.] To concrete; to curdle; to congeal, as liquids.

"The milk . . . which is coagulated by the rennet." — *Arbutnot*.

—*v. i.* To turn from a fluid into a fixed state; to undergo the process of coagulation.

Coagulation, *n.* [Lat. *coagulatio*.] Act of coagulating; state of being coagulated; the body formed by coagulation; concretion.

Coagulative, *a.* That which has the quality of causing concretion or coagulation; as, "a coagulative power."

Coagulator, *n.* That which causes coagulation.

Coagulatory, *a.* Serving to coagulate.

Coagulum, *n.* [Lat., from *cogo*. See **COAGULATE**.] A curdled or consistent mass, like a jelly, separated from some fluid; as, the coagulum of milk—curds; of the blood—the clot; and of albumen, as the white of an egg, when coagulated by heat, alcohol, or acids.

Coahoma, in Mississippi, a W.N.W. co., bordering on the Mississippi River, which separates it from Arkansas. Area, abt. 750 sq. m. Drained by the Sunflower River. The surface is flat and low, and the W. part frequently overflowed by the Mississippi. Soil, fertile. Cap. Clarksdale and Friar's Point. Pop. (1890) 18,342.

Coahuila, or **Cohanila**, (*ko-a-oo-e-la*), a State of Mexico, bounded N. by Texas, from which it is separated by the Rio Grande, E. by Texas and New Leon, S. by Zacatecas, and W. by Chihuahua and Durango; area, 30,740 sq. m. C. is a mountainous country intersected by fertile valleys, although cattle-rearing is the principal branch of industry. It has some silver mines. Lat. 24°—30° N., Lon. 100°—102° W. C. Saltillo. Pop. 150,000.

Coaid, *n.* A fellow-helper; an assistant.

Coalk, (*Zool.*) See **COAL**.

Coak, *n.* (Naut.) The metal hole in the sheave of a ship's block.

(Ship-building.) A cylindrical piece of spar. See **COAKING**. (Min.) See **COKE**.

—*v. a.* (Ship-building.) To fasten by coaking, (*q. v.*)

Coaking, *n.* (Ship-building.) The act of uniting pieces of a spar by means of tubular projections, formed by cutting away the solid of one piece into a hollow, so as to make a projection in the other in such a manner that they may correctly fit, the butts preventing the pieces from drawing asunder.

Coal, *n.* [A. S. *col*; Ger. *kohle*; Icel. and Swed. *kol*; the root being found in the obsolete Ger. *kol*, fire; Swed. and Goth. *kol*; West Goth. *kylla*, to kindle, allied to Lat. *calor*, heat, *caleo*, to be warm; Heb. *kala*, to parch, to roast; *gachal*, to kindle.] Any combustible thing in a state of ignition; a piece of wood or other combustible substance partially burned; charcoal.

"And his face kindled like a burning coal." — *Dryden*.

(Min.) A mineral which appears to have been formed by a peculiar decomposition or fermentation of buried vegetable matter, characterized by the presence of carbon as a largely predominant constituent, associated with small quantities of hydrogen, oxygen, nitrogen, sulphur, and certain mineral matters which compose the ash. The term coal is applied to various substances, as lignite, bituminous coal, anthracite, &c., each of which will be elaborately and minutely treated, both in a scientific sense, and as important features of natural production, under the general term **MINERAL COAL**, *q. v.* See also **CARBONIFEROUS AGE**, **COAL PERIOD**, **COAL MINING**, &c.

Coal, *v. a.* To burn to coal or charcoal; to char; as, "charcoal *coaled* into great pieces." — *Bacon*. —To make or deliquesce with coal or charcoal.

"He *coal'd* out rhymes upon the wall, near to the picture." — *Camden*.

—To supply or furnish with coal; as, to *coal* a steamer.

—*v. i.* To take in coal; as, the steamer *coaled* at St. Thomas.

Coal, in Pennsylvania, a township of Northumberland co.

Coal Bank, in Washington, a village of Thurston co., 16 m. from Olympia.

Coal-black, *a.* Black as a coal; intensely black.

"Coal-black his colour, but like jet it shone." — *Dryden*.

Coal-box, *n.* A box used for holding coals to supply a fire. (Often called *coal-scuttle*.)

Coalburgh, in Ohio, a post-office of Trumbull co.

Coalburgh, in W. Virginia, a P. O. of Kanawha co.

Coal Creek, in Indiana, traverses Fountain co., and enters the Wabash a little below the outlet of the Vermillion River. Rich mines of coal are found near its mouth.

Coal Creek, in Indiana, a township of Montgomery co.

Coal Creek, in Iowa, a post-office of Keokuk co.

Coal Creek, in Kansas, a post-office of Ottawa co.

Coal'ery, *n.* See **COLLIERY**.

Coalesce, (*ko-al-es'*) *v. i.* [Lat. *coalesco*—*con*, and *alesco*, to grow up, from *alo*, to nourish.] To grow together; to join; to unite, as separate bodies into one body. —To unite or adhere in one body or mass by spontaneous attraction; as, "vapors when they begin to coalesce."

Newton.

—To associate; to confederate; to amalgamate; as, two political parties *coalesce*.

Coalescence, *n.* Act of coalescing; concretion; state of being united; amalgamation.

(Surg.) The adhesion or union of parts previously separated, as in case of wounds and pre-natal adhesions or malformations.

Coalescent, *a.* Coalescing; joined; united; as, *coalescent bodies*.

Coal-field, *n.* A bed or stratum of fossil coal. — A district of country where coal is abundant; as, the Lackawanna coal-field.

Coal-fish, *n.* (Zool.) See **GADUS**.

Coal-fitter, *n.* In England, a person who acts as broker between the coal-proprietor and a merchant-shipper.

Coal-formation, *n.* (Geol.) See **CARBONIFEROUS AGE**.

Coal-gas, *n.* (Chem.) See **GAS**.

Coal Grove, in Kentucky, a village of Pike co.

Coal Grove, in Ohio, a post-village of Lawrence co., on the Ohio River, about 10 m. below Burlington.

Coal-heaver, *n.* A laborer employed in loading and discharging coal into and out of a ship; a coal-carrier.

Coal-hod, *n.* Same as **COAL SCUTTLE**, *q. v.*

Coaling, *n.* Act of taking in coal; as, the *coaling* of a ship.

Coalition, (*ko-al-ish'un*), *n.* [Fr. from L. Lat. *coalitio*. See **COALESCE**.] Act of coalescing; a coming together and uniting, as of separate bodies and parts; as, a "coalition of atoms."

(Polit.) In the beginning of the French Revolution, C. came to be used by the French authors by way of contempt for the alliance of the other powers against France. Since that time the word has come into common use; but there is generally some idea of reproach implied in it. Diplomats make this distinction between *alliance* and *coalition*, — that the former is more general, while the latter is directed against a particular enemy for a particular object. C. is also frequently used in the sense of a union of several parties, or their leaders, against another party; but it still carries with it the idea of reproach.

(French Law.) An unlawful agreement among several persons not to do a thing except on some conditions agreed upon.

Coalitionist, **Coalitioner**, *n.* One who joins or promotes a coalition.

Co-ally, *n.* [Co for *con*, and *ally*.] A joint ally; as, the French and English were *co-allies*.

Coal-measure, *n.* The measure used in determining quantities of coal.

—*pl.* (Geol.) Beds or strata of coal. See **COAL PERIOD**.

Coal-meter, *n.* A person appointed to ascertain the measurement of coals.

Coal-mine, *n.* A mine or pit containing mineral coal.

Coal Mines, in California, a village of Contra-Costa co., 15 m. N.E. of Martinez. The most productive coal-mines in the State are in this vicinity.

Coal-mont, in Pennsylvania, a P. O. of Huntingdon co.

Coal Mountain, in Georgia, a P. O. of Forsyth co.

Coal-monse, *n.* (Zool.) A small kind of black-headed titmouse.

Coal-passer, *n.* One who passes coal to the stoker of a steam-engine furnace.

Coal Period, *n.* (Geol.) The coal, or carboniferous period, succeeding to the sub-carboniferous period, *q. v.*, opened with a marked change over the American continent. The sub-carboniferous limestones and shales, which were formed upon the submerged land, became covered with extensive graves or pebble-beds, or de-

posits of sand; the beds of that epoch, hardened into a gritty rock, make up the millstone grit and sandstone which underlie the coal-measures. Similar conglomerates and sandstones were formed afterwards in the course of the coal-measures; but the rock is prominent for its extent, and for marking the commencement of the coal era. The carboniferous areas of N. America have been pointed out under CARBONIFEROUS AGE, (q. v.) The regions corresponding to the coal period are:—1. The great Appalachian coal-field, covering parts of Pennsylvania, Ohio, Virginia, E. Kentucky, E. Tennessee, and Alabama. The workable area is estimated at 60,000 sq. m. The whole thickness of the formation is 2,500 or 3,000 feet. In the centre of Pennsylvania, between Pottsville and Wyoming, are the famous anthracite beds, divided into many distinct patches; and in the W. part commences the great bituminous coal-field, which spreads into Ohio and stretches on S. to Alabama. 2. The Illinois and Missouri, covering a very considerable part of Indiana and Kentucky, and W. of the Mississippi, portions of Iowa, Missouri, Kansas, and Arkansas. Estimated area, 60,000 sq. m. 3. The Michigan, situated about the centre of the peninsula. Estimated area, abt. 5,000 sq. m. 4. The Texas, covering several of the N. and N.W. counties. 5. The Rhode Island, lying between Providence and Worcester, in Mass., and opened at Cumberland, north of Providence; at Portsmouth, 23 m. S., and also showing thin seams at Mansfield, 15 m. N.E. of Providence, at Wrentham, 5 m. from Mansfield, and at Worcester. Estimated area, 1,000 sq. m. 6. The New Brunswick, covering part of New Brunswick, Nova Scotia, Prince Edward Island, and Newfoundland. Estimated area, 18,000 sq. m. The total number of sq. m. of all the productive coal-fields of the U. States, E. of the Rocky Mountains, is 125,000. The coal-measures include stratified rocks of all kinds,—sandstones, conglomerates, shales, shaly sandstones, limestones; and the limestones are generally impure, or magnesian. They contain generally 50 feet or more of beds of rock to one foot of coal. The abundance of fossil plants is the most striking character of the C. P.; they afford evidences of progress in the life of the globe, and reveal an expansion of some departments of the vegetable kingdom, which would not have been suspected, were it not for the evidence in the rocks. These plants belong, generally, to—

Fig. 631. — LYCOPodium STERNBERGII.

1, *Gymnosperms*, the inferior class of Flowering plants; 2, *Calamites*; 3, *Acrogens* (Fig. 631), the superior class of Flowerless plants. The animal life of the coal-measures is either of land or fresh water, or of marine origin. Most of the limestones and some of the sandstones and shales contain marine fossils; while, on the contrary, other deposits of sand and clay bear evidence that they are not of the sea, any more than is the vegetation which covered the lands. Though a Palaeozoic cast is apparent throughout the animal life, a rise above the peculiarly Palaeozoic, grade in some departments. Thus, among Articulata, the Trilobites are rare, and there are insects and Myriapods (Centipedes); and among Vertebrata, there are some air-breathing reptiles—new types, prophetic of the Reptilian age which was next to follow.—According to the reading of the records, the C. P. was a time of great forests and jungles, and of magnificent foliage, but of few or inconspicuous flowers; of marsh-loving insects, but not the higher insects that live among flowers; of Amphibians, and some inferior species of true reptiles, but no birds, no mammals. Thus far had the world progressed by the close of the coal-period.

Coal-pit, *n.* A pit where coal is dug.—In the United States, a place where charcoal is made.

Coal-plant, *n.* (*Geol.*) An impression of a plant found in fossil coal. See COAL PERIOD.

Coal-port, in Ohio, a village of Meigs co., on the Ohio River, 100 m. S.E. of Columbus, and 1 m. from Pomeroy. Immense beds of coal are worked here on the river-bank.

Coal Port, in Pennsylvania, a village of Alleghany co.

Coal River, in Virginia, rises in Fayette co., and flowing generally N.W., empties into the Great Kanawha River, in Kanawha co., after a course of abt. 60 m.

Coal Run, in Kentucky, a post-office of Pike co.

Coal Run, in Ohio, a post-office of Washington co.

Coal's Bluff, in Pennsylvania, a post-office of Washington co.

Coal-scuttle, *n.* A box or utensil for holding coal, and carrying it to feed a fire. (Sometimes called coal-box.)

Coal-ship, *n.* (*Naut.*) A vessel employed for the storage of coal, and from which other ships draw their supplies.

Coals'mouth, in W. Virginia, a post-village of Kanawha co., on the Kanawha River, abt. 16 m. below Charleston.

Coal-stone, *n.* A kind of cannel-coal.

Coal-tar, *n.* See TAR.

Coal Valley, in Illinois, a post-township of Rock Island co.

Coal Valley, in Pennsylvania, a P.O. of Alleghany co.

Coal-whipper, *n.* In England, a person who raises coal from a ship's hold.

Coal-work, *n.* A colliery; a coal-pit, with all buildings, machinery, and appurtenances belonging thereto.

Coaly, *a.* Like coal; containing coal; pertaining to coal.

"On coaly Tyne, or ancient hallowed Dee."—Milton.

Coam'ings, *n. pl.* (*Naut.*) Raised work around the hatches of a ship, to prevent water from getting down into the hold. (Sometimes improperly written *combings*.)

Co-annex, *v. a.* To annex or attach with something else.

Coan'za, a large river of Congo, W. Africa. After a rapid course of abt. 500 m., it falls into the Atlantic in Lat. 9° 10' S., Lon. 14° 22' E.

Co-apprehend, *v. a.* To apprehend with another person. (*R.*)

Coaptation, *n.* [*Lat. coaptatio.*] The adaptation of two or more parts to each other; as, "the judicious coaptation of the words."—Broome.

(*Surg.*) The act of adapting the two extremities of a fractured bone to each other; or of restoring a luxated bone to its place.

Coari, a river of Brazil, which has its whole course in the prov. Alto Amazonas. It divides near Alvellos into 2 arms, which join the Amazons. Total length, 285 m.

Coarse, (*körs*), *a.* [*Lat. crassus.*] Thick; bulky; gross; rough; as, *coarse bread*, *coarse hair*, *coarse canvas*.

—Crass; crude; unpolished; inelegant; mean; indelicate; not fine; unrefined; not purified; as, *coarse language*, *coarse manners*.

"I feel of what coarse metal ye are moulded."—Shaks.

Coarse-grained, *a.* Having a coarse grain;—hence, deficient in polish or refinement; as, a *coarse-grained* person.

Coarsely, *adv.* In a coarse, inelegant, unrefined manner.

"The good cannot be too much honoured, nor the bad too coarsely used."—Dryden.

Coarsen, (*körs'n*), *v. a.* To render coarse and unpolished. (*R.*)

Coarseness, *n.* Quality or state of being coarse; grossness; rude; roughness; want of polish or refinement; as, the *coarseness* of an illustration.

"There appears . . . a coarseness and vulgarity in all the proceedings of the assembly."—Burke.

Coartienation, *n.* (*Anat.*) The structure of the bones in forming a joint.

Co-assessor, *n.* A joint-assessor.

Co-assume, *v. a.* To assume in concert with another.

Coast, *n.* [*Ger. küste*; *Swed. kust*; *Dan. kust*; *Fr. côte*, for *coste*; *Lat. costa*, a rib, a side.] The sea-side or sea-shore; the sea-board of a country; the land adjoining the sea-shore; margin of the land next to the sea.

The coast is clear. The danger is past; the enemy has left the shore.

—*v. i.* To sail by or near a coast or shore, or in sight of land.

"But steer my vessel with a steady hand,
And coast along the shore in sight of land."—Dryden.

—To sail from port to port in the same country.

—In the U. States, to slide down a hill on a sleigh upon snow or ice; or to ride down on a bicycle with one's feet off the pedals.

Coast'er, *n.* He, or that which, sails along a coast or shore; specially, a coasting-vessel.—Also, the device fastened on each side of the front fork on a bicycle, as a rest for the rider's feet when coasting (*q. v.*)—A bicyclist who indulges in this practice.

Coasting, *v. n.* Sailing along or near a coast, or from port to port on a certain coast.

Coasting-trade, (*Com.*) The trade which is carried on between ports in the same country. Different laws regulate this department of trade in different countries, but, generally, the policy has been maintained of excluding foreigners from all participation in it.

Coasting-vessel, (*or Coaster*), (*Naut.*) A vessel that performs coasting-voyages only;—opposed to a *sea-going* ship.

Coast-line, *n.* The shore-line or sea-board of a country; outline of a coast; as, a bold *coast-line*.

Coast Range, or COAST MOUNTAINS, in California, a range of mountains extending from the Oregon boundary to the town of Los Angeles, and almost parallel with the Pacific coast. The principal peaks are Mt. Ripley, 7,500 ft. high, in lat. 39° 08', Mt. San Bernardino, 11,600 ft., lat. 34° 20'; Mt. San Geronimo, 7,000 ft. lat. 33° 48'.

Coast-walker, *n.* An English custom-house officer, who inspects and reports upon the discharge or shipment of goods in the coasting-trade.

Coastwise, *a.* By way of the coast; along-shore; as, a voyage *coastwise*.

Coat, *n.* [*Fr. cotte*; *It. cotta*, from *Alleman, kutte*; *O. Ger. kotze*; *Bohem. kúze*; the root is found in *Esthonian, kattān*, to cover, to clothe; *Lapp. kaptjet*, to cover, to cover over anything; allied to *Gr. chiton*, a coat; *Finn. katto*, a covering.] An upper or outside garment worn by men; as, a dress-coat, an over-coat, &c.

—The habit or vesture of men, worn as an indication of office.

"Men of his coat should be minding their pray'rs."—Swift.

—External hair or fur-coverings of animals; as, a horse's coat.

"Or, as the snake, with youthful coat repaid."—Milton.

—Any covering, membrane, or integument; as, the coat of the stomach; the coat of an onion; a coat of paint, &c.

"The eye is defended with four coats or skins."—Peacham.

(*Her.*) That on which ensigns armorial are portrayed; as, coat-armor.

"Cropped are the flower-de-luces in your arms;
Of England's coat one-half is cut away."—Shaks.

—One of the figured playing-cards, on which a king, queen, or knave appears; a court-card.

Coat of arms, (*Her.*) A tunic or habit formerly worn by knights over their suit of armor, embroidered with their armorial ensigns and devices.—The surcoat worn by the knight, represented in Fig. 591, is a coat of arms. A delineation of armorial bearings; any heraldic blazon or device.

"Displayed at large
Their master's coat of arms and knightly charge."—Dryden.

Coat of mail, A body-coat of chain-armor covering the upper portion of the body of a mailed knight. (See Figs. 192 and 591.)

—*v. a.* To cover with a coat or upper garment.

—To cover or spread over with a layer of any substance; as, to coat a ceiling; to coat an innuendo.

Coat-armor, *n.* (*Her.*) Armorial ensigns; coats of arms; heraldic blazonry.

Coat-eard, *n.* A playing-card bearing a court-figure; i. e., a king, queen, or knave.

"I am a coat-card indeed."—Rowley.

Coatee, *n.* A little coat; a short, close coat; a coat with short flaps.

Coatesville, in Indiana, a post-village of Hendricks co., 11 m. E.N.E. of Greencastle.

Coatesville, in Pennsylvania, a post-village of Chester co., on the W. branch of Brandywine Creek, 36 m. W. of Philadelphia.

Coati, or **Coati-mondi**, *n.* (*Zoöl.*) A quadruped of the fam. *Ursidae*, bearing some affinity to the racoon, except that the neck and body are longer, the fur is shorter, and the eyes are smaller; but it is more particularly distinguished by the elongation of its snout, to which its scientific name *nasua* refers. By the assistance of this long flexible snout, which is somewhat truncated at the end, it roots up the earth, in the manner of a hog, in quest of earth-worms, &c.

It also preys on the smaller quadrupeds; but it lives more upon trees than upon the ground, and is a destructive enemy of birds' eggs, and unfledged young.

It is equal in size to a large cat; its general color is

cinereous brown; the tail, which is of very considerable length, is annulated with distinct circles of black the ears are round, like those of a rat, and covered with short hair externally, but internally with long whitish hair; the mouth is large, and the under jaw much shorter than the upper. It is a native of Brazil.

Coating, *n.* A covering; any substance spread over for cover, defence, or protection; as, the coating of a pipe.

—Cloth for coats; as, a Tweed coating.

Coat-link, *n.* A pair of buttons connected by a link for holding together the lappels of a coat.

Coatsburg, in Illinois, a post-village of Adams co., in N.E. of Quincy.

Coatzacoalco, in Mexico, a river which, rising in the Sierra Madra, dep. of Oajaca, flows N. between Vera Cr and Tabasco, and enters the Bay of Coatzacoalco (Caribbean Sea) 130 m. S.E. of Vera Cruz, in Lat. 18° 8' 2 N., Lon. 94° 32' 50".

Coax, (*köks*), *v. a.* [From *cog* or *cozen*.] To wheedle; flatter; to soothe; to fawn upon; to appease or persuade by fondling and wheedling.

"I coax! I wheedle! I'm above it."—Farquhar.

Coaxation, *n.* [*Lat. coaxare*, to croak.] Act of coaxing. (*R.*)

Coax'er, *n.* A wheedler; a beguiler; a flatterer; gentle persuader.

Coax'ingly, *adv.* By coaxing.

Cob, *n.* [*W. cob*, a knock, a thump; *cobiaw*, to thum A.S. *cop*; *Ger. kopf*, a cap, top.] A blow; a knock; a thump; as, a cob from a stick.—The top or head; as, a thing large, round, or bulky.—A lump or mass of anything; a cobble-stone; as, a cob of brick.—A stout stiff-built pony used for carrying heavy persons in a saddle; as, a cob with good action. (Used almost exclusively in England.)—A small loaf of bread; a penny-cob.—A spider; (whence the term *cobweb* Chastisement inflicted on the dorsal extremity of a person's body, by means of a strap.—Clay mixed with straw used in building huts.—A kind of wicker-basket for arm.

(*Zoöl.*) [*It. gabbiano.*] A sea-gull.—A Spanish once current in Ireland.—The spike that bears grain of maize; as, a corn-cob. (Peculiar to the U. States.)

—*v. a.* To chastise a person by pulling the ears or hair by striking on the head; as, to give a boy a *cobbi* (Mining.) In Cornwall, Eng., to break or bruise a (Naut.) To inflict punishment on board ship by applying a strap to the buttocks.

Cobae'a, *n.* (*Bot.*) A genus of plants, order POLEMO CEE, q. v.

Co'balt, *n.* [*Ger. kobalt*, from *kobold*, a goblin; *L. goblinus*; *Gr. kobalos*, an impudent rogue, an art-knave;—the name of certain mischievous demons

Fig. 632. — COATI-MONDI.
(*Nasua rufa*.)

were supposed to haunt mines, and to manufacture those ores which looked rich to the eye, but were really of little value. Among these were supposed to be the ores of this metal, and hence its name.] (*Chem.*) Cobalt is a metal very similar to nickel in its physical and chemical properties. It generally occurs in the same ore as nickel, and the separation of the two metals is a task requiring great patience and expertness. *C.* is obtained as a metal either by reducing the oxide by hydrogen, or by calcining the oxalate. In the metallic state it closely resembles steel. It fuses with great difficulty, and oxidizes at a high temperature. It remains unaltered in moist air, dissolves slowly in sulphuric and hydrochloric acid, but readily in nitric acid. It is reddish-gray in color, and is said to be magnetic. It is obtained principally from two ores—*Speiss cobalt*, and *Cobalt glance*. The compounds of *C.* are remarkable for their beauty of color. The two colors, *saffre* and *smalt*, are compounds of *C.* *Zaffre* is an impure oxide of this metal, made by calcining the crushed ore in a reverberatory furnace. The sulphur and arsenic are thus roasted off, and the impure oxide remaining is ground to an impalpable powder with two or three parts of fine sand. *Zaffre* is used largely in the manufacture of stained glass, and in the ornamentation of pottery. *Smalt* is a finely powdered blue glass colored with cobalt. *C.* ore is partially roasted, and combined with an equal quantity of carbonate of potash and twice its weight of well-ground quartz. The whole is melted in suitable pots in a furnace, silicate of potash being formed, in which the oxide of cobalt melts, the other impurities falling to the bottom. The clear blue glass is ladled out, poured into water, and ground, when cool, into an impalpable powder. *Smalt* is used by paper-stainers. With oxygen, cobalt forms a protoxide and a sesquioxide. The *anhydrous protoxide* is obtained by calcining the hydrate or carbonate. It is a black powder, which, when heated in the air, changes into an intermediate oxide, CO_3O_4 . Oxide of *C.* gives to glass a very intense blue, which resists the action of a very high temperature. Dissolved in ammonia, it gives a fine red liquid. Fused with potash, a brilliant blue compound is obtained. With magnesia, alumina, and oxide of zinc, it produces, when used at a high temperature, pink, blue, and green compounds. The last two are used as pigments. The hydrated oxide is a pink precipitate thrown down by adding a solution of potash to the solution of *C.* salt. Protoxide of *C.* forms salts with the acids, which are light blue when hydrated, but turn red when the water is driven off by heat. Protonitrate of *C.* is obtained by dissolving the oxide or the metal in nitric acid. It crystallizes in small deliquescent crystals containing six equivalents of water. A solution of this salt is often employed as a sympathetic ink, being light blue when old, but bright red when the water of hydration is driven off by a gentle heat. The *sulphate of C.* is generally employed as the source of salts of this metal. The *sesquioxide of C.* is a brownish powder obtained by passing chlorine through a dilute solution of potash, in which the protoxide is mechanically suspended. Its salts are at present unknown. *Chloride of C.* is prepared by dissolving the oxide in hydrochloric acid; the pink solution resulting yields, on evaporation, rose-colored octahedra of the hydrated chloride. The other salts of *C.* are uninteresting. A solution of the nitrate is used in lowpipe analysis. A small quantity of the substance to be examined is to be moistened with the solution, and heated in the blowpipe flame; a pink color indicates magnesia, and a green and blue, zinc and alumina respectively. Fremy has formed some interesting compounds by combining the sesquioxide of *C.* with 4, 5, and equivalents of ammonia, forming brown, red, and yellow salts. These double bases he names *fuscobaltia*, *roseobaltia*, and *lutobaltia*. *Thénard's blue* is a beautiful pale-blue pigment, consisting of a mixture of phosphate of *C.* and phosphate of alumina. Equivalent, 8.6; sp. gr. 8.5; symbol, *Co.*—*Cobalt ores.* The principal ores of *C.* are *white cobalt ore*, which is the most common; (it contains *C.* associated with arsenic, iron, and sulphur,) *gray cobalt ore*, containing arsenic, iron, cobalt, and silica; and *glance cobalt*, which is a double disulphide of arsenic and *C.* All the ores of *C.* contain more or less nickel.

Cobalt, in Connecticut, a post-office of Middlesex co.

Cobaltie, *a.* [*Fr. cobaltique.*] Pertaining to cobalt, or consisting of it; resembling cobalt.

Cobaltcyanogen, *n.* (*Chem.*) See CYANOGEN.

Cobaltine, *n.* (*Min.*) An arsenical ore of cobalt, also containing sulphur. It occurs in reddish silver-white rhombohedral crystals, at the mines of Wehna, in Sweden. It contains 33 to 37 per cent. of metal.

Coban, a town of Guatemala, Central America, 60 m. N.W. of Guatemala, and cap. of the dept. of Vera Paz, in the Rio Dulce; pop. about 15,000, mostly Indians.

Cobb, in Georgia, a N.W. county; area, about 450 sq. m. It is bounded on the S. E. by the Chattahoochee River, and drained by Sweetwater, Powder Spring, Pumpkin, Vine, Vickery's, and other creeks. The surface is elevated, and, in some parts, mountainous; Kenesaw Mountain rising 1,828 feet above sea-level. The soil is generally fertile. Granite abounds, and gold, silver, copper, iron and lead are found. Cap. Marietta. Population, 1890) 22,300.

Cobb, in Illinois, a village of Randolph co.

Cobb, in Wisconsin, a post-office of Iowa co.

Cobbett, WILLIAM, an English political writer, b. at Barnham, 1762. Early in life, he served as a private in the army, and devoted all his spare hours to self-education. In 1792, he went to the U. States, and settled in Philadelphia, where he commenced his literary career. In 1800 he returned to England, and, in 1802,

brought out his famous *Weekly Political Register*, which for 33 years became the leading journal of advanced Radicalism. In 1810, he was prosecuted for a libel on the govt., sentenced to imprisonment, and to pay a fine of \$5,000. In 1832, he was returned to the British House of Commons, and died in 1835. Among *C.*'s best-known works are his *English Grammar*, *Cottage Economy*, and *Parliamentary History of England*. *C.*'s reputation rests principally upon his pure and idiomatic use of the English language, of which many of his works are models in composition.

Cobble, *n.* (*Naut.*) See COBLE.

Cobble, **Cobble-stone**, *n.* A cob, or large, heavy pebble, or fragment of stone;—used in paving streets.—A lump of coal, from the size of an egg to that of a foot-ball.

Cobble, *v. a.* [*Dan. kobler*, to mend shoes; Heb. *chabal*, to bind, to bind fast; probably allied to *couple*; Ger. *koppeln*.] To make, mend, or renovate coarsely; to botch in a clumsy manner; as, to *cobble shoes*.

"If you be out, sir, I can mend you.—Why, sir, *cobble you.*" *Shaks.*

—To make or do anything clumsily, unhandily, or in a botchy manner.

"Give thy base poets back their *cobbled rhymes.*"—*Dryden.*

Cobbler, *n.* A coarse mender of shoes.—A clumsy, botchy workman.

"In respect of a fine workman, I am but, as you would say, a *cobbler.*"—*Shaks.*

—A liquor or beverage, prepared by a mixture of constituent parts, as wine, lemon, sugar, and ice; as, a *sherry-cobbler*.

Cobbler-fish, *n.* (*Zool.*) See BLEPHARIS.

Cobbosseecontee Waters, in Maine, a beautiful lake of Kennebec co., connected with a number of smaller pools. Length about 7 m. The Cobbosseecontee River, which rises in this lake, flows into the Kennebec.

Cobbeal, *n.* An Oriental sandal worn by females.

Cob-coals, *n. pl.* (Sometimes written COBBLES.) Large, spherical lumps of coal.

Cobden, RICHARD, an eminent English political economist, b. at Dunford, near Midhurst, in Sussex, 1804. After serving an apprenticeship in a London warehouse, and acting a short time as commercial traveller, he became, in 1830, partner in a firm in the cotton trade at Manchester. In 1834 he set out on a tour through Egypt, Greece, Turkey, and the U. States; and on his return he commenced his career as political economist by the publication of pamphlets, entitled, *England, Ireland, and America*, and *Russia*. About the same time he took an active part in founding the Manchester "Athenaeum," and in procuring the incorporation of that borough. In 1838 the "Anti-Corn-Law League" was formed, and to the furtherance of its object *C.* devoted himself with intense earnestness and unintermitting labor. In 1841 he

Fig. 633.—RICHARD COBDEN.

entered the House of Commons as member for Stockport. His mastery of his chosen theme, his full knowledge, logical precision, good sense, and entire sincerity made him at once a man of weight in parliament; and in 1846 he saw the grand struggle ended by the conversion of Sir Robert Peel, and the repeal of the Corn Laws. He then made a European tour, and was received in the chief cities with high honors. His countrymen made acknowledgment of his services by a national testimonial of \$150,000, and during his absence he was elected M. P. for the West Riding of Yorkshire, 1847. As a member of the Peace Society he attended congresses at Paris, Frankfurt, and London, and steadily advocated the doctrine of non-intervention. His course in reference to the Crimean war, and the war with China, was opposed to the sentiments of the majority of his countrymen, and on the dissolution of parliament, in 1857, he was not re-elected. *C.* then again visited the U. States, and while absent was elected for Rochdale. In 1859 he was offered by Lord Palmerston the presidency of the Board of Trade, which he courteously but conscientiously declined. The latest, and not the least, service he rendered

his country was the successful negotiation of the Treaty of Commerce with France. D. in London, 1865.

Cobden Club, named in honor of R. Cobden, (*q. v.*), formed to advocate his principles and chiefly free-trade.

Cobelligerent, *a.* Engaging in, and carrying on, war in conjunction with another power.

—*n.* A nation, state, or power, that engages in hostilities in unison with another.

Cobentzel, LUDWIG, COUNT VON, an Austrian diplomatist, b. in Brussels, 1753. At the early age of 27 he was intrusted with a mission to Catharine II. of Russia, and his gallantry and compliance with her taste for the theatricals made him a great favorite with her. From 1795 he was concerned in many of the important negotiations between Austria and other powers, until the treaty of Luneville, in 1801. That treaty restoring peace between Austria and France, he was shortly afterwards made minister of state for foreign affairs at Vienna. In 1805 he was dismissed from this office, and he d. 1808.

Cobham, in Pennsylvania, a post-office of Warren co.

Cobham, in Virginia, a post-village of Albemarle co., 14 m. E. of Charlottesville.

Cobi, DESERT OF. See GOBI.

Cobiya, the only legal sea-port of Bolivia, in the dep. La Mar, 112 m. from Atacama, Lat. 22° 34' S., Lon. 70° 21' 2" W. It is a depot for bullion, silver ores, coin, &c., besides mercury, woollen stuffs, and pepper. Pop. 2,380.

Destroyed by an earthquake in May, 1877.

Cobiron, *n.* [*Cob* and *iron*.] An andiron with a knobby head.

Cobishop, *n.* A joint bishop; a bishop-coadjutor.

"Valerius . . . made use of Anstin as a *co-bishop*, for the benefit of the church of Hippo."—*Ayliffe.*

Cobitis, *n.* (*Zool.*) See LOACH.

Coble, **Cobble**, *n.* [*A. S. cuoble*.] (*Naut.*) A fishing-smack; a buss; a vessel used in the herring-fishery.

Coblentz, a (anc. *Confluentes*, a city of Rhenish Prussia, cap. of a govt. of same name, beautifully situated at the junction of the Rhine and the Moselle, and the bul-

Fig. 634.—COBLENZ.

wark of Germany against France. *C.* is defended by extensive fortifications, forming a military camp capable of affording accommodation for 100,000 men. For defensive purposes, *C.* is connected with the almost impregnable castle of Ehrenbreitstein (see Fig. 634), on the opposite side of the Rhine. Several detached forts also guard the city at various points. *C.* is a free port, and its favorable position secures it a very active commerce in wine, corn, iron, mineral waters, millstones, &c. Its principal manufactures are linen and cotton fabrics, japan-ware, and furniture. Pop. 27,112.

Cobleskill, or **COBUSKILL**, in New York, a creek in Schoharie co., rises in a natural well, and following a subterranean passage through several miles of its course, falls into the Schoharie River.

—A town and twp. of Schoharie co., 4 m. W. of Albany; drained by Cobleskill Creek. Pop. (1897) abt. 2,200.

Cobloaf, *n.* See COB.

Cob Moo Sa, in Michigan, a post-office of Oceana co.

Cobnut, *n.* A kind of large nut.—A game played with nuts by children.—The conquering nut in the game.

Coboose, *n.* (*Naut.*) See CABOOSE.

Cobourg, or COBURG, in prov. of Ontario, a town and port of entry, cap. of the united counties of Northumberland and Durham, on the N. shore of Lake Ontario, 91 m. W. by S. of Kingston. Pop. 4,442.

Cobra de Capello, *n.* (*Zool.*) See VIPERIDE.

Cobras, in Brazil, an island and fort in the bay of Rio de Janeiro, about 1 m. from the city of Rio, of which the fort is one of the principal defences.

Cobre, in Cuba, a town of the E. department, famous for its copper mines (whence the name *Cobre*); pop. abt. 2,876.

Cobstone, *n.* See COBBLE.

Cobswan, *n.* The head or leading swan.

Coburg, a town of central Germany, cap. of a prov. of same name in the duchy of Saxe-Coburg-Gotha, on the Itz, Lat. 50° 15' N., Lon. 10° 58' E. In the old castle of the dukes of Coburg are still exhibited the room and bed which Luther occupied when in concealment here in 1530. *Manf.* Woollens, linen, cotton, gold and silver articles, &c. Pop. (1895) 17,106.

Coburg, FREDERICK JOSIAS, DUKE OF SAXE, an Austrian general in the coalition against France, born 1637. He gained the battle of Neerwinde over Dumouriez, 1793; and was defeated by Moreau at Tourcoing, and by Jourdan at Wattignies, 1795. D. 1815.

Coburg, in New Jersey, a village of Monmouth co.

Coburg Peninsula, an irregular strip in Australia

separated from Melville Island by Dundas Strait, and connected with the mainland by a narrow isthmus. Ext. 50 m. by 20. Lat. $11^{\circ} 22' S.$, Lon. $132^{\circ} 10' E.$

Cob'-wall, *n.* A wall constructed of unburnt clay, intermixed with straw.

Cob'web, *n.* [See COB.] A spider's net or web.—Any snare, or insidious trap or inveiglement.

"Laws are like cobwebs, which may catch small flies, but let wasps and hornets break through."—Swift.

—Anything rubbishy or worthless; as, "the cobwebs of that uncivil age."—Sir P. Sidney. [wall.]

Cob'webbed, *a.* Covered with cobwebs; as, a cobwebbed (Bot.) Covered with loose hair resembling cobwebs, as a plant.

Cob'webby, *a.* Covered with cobwebs, or anything

Co'ca, a drug obtained from the leaves of *Erythroxylon coca*, a plant native to Peru and Bolivia, and now cultivated in India, Java, and Ceylon. It has long been used by the natives of Peru as a nervous stimulant, and now yields various official preparations, especially the wine of *C.* and the fluid extract of *C.* In poisonous doses it gives rise to great nervous excitement, attended by delusions and hallucinations, and ending in collapse and very high temperature. It needs to be used very cautiously. It contains an alkaloid known as cocaine (*q. v.*).

Coc'as, (ARRAIAL DE) in Brazil, a mining village, prov. Minas Geraes; alt. Lat. $20^{\circ} S.$, Lon. $44^{\circ} W.$

Cocaigne, **Cocagn**, **Cockagne**, (*kōk-ān*), *n.* [O. Fr. *cocaigne*.] In the old French romances, a land of imaginary luxury and delight.—In modern parlance, a cant term for the City of London,—i. e. Cockney-land. See COCKNEY.

Cocaine, an alkaloid ($C_{17}H_{21}NO_4$) obtained from coca (*q. v.*). It crystallizes in colorless, odorless prisms, its taste being slightly bitter. In 1884 it was discovered that *C.* is capable of producing local anesthesia, and since then it has been very usefully employed in surgical operations upon the eye and in minor surgery generally. Its effect is confined to the peripheral sensory nerves of the mucous membrane, not reaching the nerves beneath the skin. In the U. S. some persons have used *C.* in excess as a stimulant, but the effects are not sufficiently agreeable to make the practice common. A number of fatal cases of poisoning have been caused by *C.*, many of them following its local use. Internally it acts as a stimulant to the brain and the spinal cord, and also as a muscle poison.

Cocciferous, *a.* [Lat. *coccum*, a berry, and *ferre*, to bear.] Berry-bearing; bacciferous; as, a cocciferous plant.

Coccinella, *n.*, **Coccinella**, *n. pl.* [From Gr. *kōkkinos*, scarlet.]

(Zool.) A genus and family of Coleopterous insects, including many small species, usually ornamented with scarlet spots, and familiarly known as lady-birds, lady-cows, &c. In France, these small beetles are called *Bêtes du bon Dieu* (Beasts of the good God). They are, in fact, of great service to the agriculturist, and especially to the hop-grower; for they destroy the *Aphides*, or plant-lice, in vast numbers, feeding on them both in the larva and perfect state.

Coccolite, *n.* [Gr. *kōkkos*, a grain, and *lithos*, a stone.] (*Min.*) A kind of Pyroxene found in small translucent granules of various shades of green, which are slightly coherent, and hard enough to scratch glass. It is chiefly met with in the iron mines of Sweden and Norway.

Coccoloba, *n.* [Gr. *kōkkos*, a berry, *lobos*, a lobe.] (Bot.) A genus of plants, order *Polygonaceae*. From the leaves, wood, and bark of *C. uvifera*, a very astringent extract, commonly known as Jamaica kino, is obtained. The fruit, called the seaside grape, is edible, and has an agreeable acid flavor.

Cocculus, *n.* (Bot.) A genus of plants, order *Menispermaceae*. The flowers in this genus have 12 sepals and petals, disposed in four rows. The male and female flowers are on separate plants. The *C. palmatus* furnishes the CALUMBA, *q. v.* The plant is not cultivated; the root is collected where it grows wild in dense forests. The very poisonous seed known by the name of COCCULUS INDICUS (*q. v.*), belongs to a plant of a different but allied genus.

Cocoste'ns, *n.* [Gr. *kōkkos*, and *osteon*, bone.] (*Pal.*) A genus of Placognoid Devonian fishes in which the external ganoid surface of the bickler plates is ornamented with small hemispherical tubercles, whence the generic name.

Cocculus Indicus, *n.* [Lat. *Indian-berry*.] (Bot.) The fruit of the *Anamirta paniculata*. It has some resemblance to the bay-berry, and is largely imported from the Eastern archipelago. *C. I.* is chiefly used for adulterating cheap beer; and it is really wonderful in how many ways it is fitted to disguise a liquid prepared from insufficient quantities of malt and hops; thus, it imparts to the sophisticated liquor an intensely bitter taste, a darkness of color, and a fulness of body, while it adds to its inebriating qualities. It is scarcely necessary to state that it is never used by respectable brewers. In large doses it is poisonous to all animals, and it has been used by poachers for stupefying fish and game. In medicine it has been used as an external remedy for certain skin-diseases. It owes its active

properties to a very poisonous crystalline alkaloid called *picrotoine* ($C_{12}H_{14}O_6$). The names *Levant nut* and *Bacca Orientalis* are sometimes applied to this narcotic berry. From the pericarp of the same fruit has been extracted the no less formidable alkaloid principle *Menispermine*.—The genus *Anamirta* belongs to the order *Menispermaceae*, and is closely allied to the genus *Cocculus*, *q. v.*

Coc'cus, *n.*; *pl.* Cocci. [From Gr. *kōkkos*.] (Zool.) A genus of Hemipterous insects, in which the males are much smaller than the females, and are furnished with wings, of which the females are destitute. The cocci are found on the leaves and bark of various plants; hence they become injurious to many exotics in hot-houses and conservatories. They are allied to the *APHIS*, *q. v.*, although in many respects very different. By far the most important of all is the *Coccus cacti*, or COCHINEAL, *q. v.*

(Bot.) The name given to the closed carpels into which many fruits split, as those of *Euphorbia* and *Verbena*.

Coc'cyx, COCCYGIS-BONE, *n.* [Gr. *kōkkyx*, cackoo, whose bill it is said to resemble.] (*Anat.*) The last bone in the spinal column (or more properly an assemblage of small bones), the termination of what is called the *sacrum*, and, bending inwards, assists to close the cavity of the pelvis below, and support the various organs contained in that space. It is in this bone where the acute pain is felt from a kick, or the sudden fall backwards of a person, when he comes in contact with a stone or other hard substance.

Coccy'zns, *n.* [From Gr. *kōkkyx*.] (Zool.) A genus of birds, family CUCULIDÆ, *q. v.*

Cochabam'ba, in Bolivia, a river which rises near the parallel of $18^{\circ} S.$, flows S.E., and after receiving numerous tributaries, assumes the name of Rio Grande in Lat. $19^{\circ} 42' S.$, Lon. $64^{\circ} W.$

—A dep. inclosed by the departments La Paz, Sacre, and Santa Cruz de la Sierra. Area, 55,120 sq. m. Desc. Fertile, producing sugar, cotton, dye-woods, timber, and the precious metals. Lat. between 17° and $19^{\circ} S.$, Lon. between 65° and $68^{\circ} W.$ Pop. 349,892.

—A town, cap. of the above dep., at the foot of the Andes. $145 m. N. W.$ of Chiquisaca, on both sides of the Rio de Rocha. Manf. Cotton fabrics and glass-ware. It is the most important city of Bolivia. Pop. 40,678.

Coche, (*kōsh*), in S. America, a small island of Venezuela, between the island of Margarita and the mainland.

Coche'ton, in New York, a post-township of Sullivan co., on the Delaware River, about 100 m. S.W. of Albany, and 141 m. from New York city.

Coches'ett, in Massachusetts, a P. O. of Plymouth co.

Coch'in China, or **Annam** (frequently written ANAM), a territory occupying the eastern portion of Indo-China, between $9^{\circ} 41'$ and $23^{\circ} 22'$ N. lat., and forming an empire, which since 1885 has been under a French protectorate. The names *C. C.* and *Annam* are interchangeably used, the whole region being sometimes known as *C. C.*, with *Annam* and *Tong-King* (Tonquin) as sub-divisions; sometimes as *Annam*, with *Tong-King* and *C. C.* as sub-divisions. *C. C.* was the name given by early navigators for the whole east coast region of the peninsula. *Annam*, a name given by the Chinese in the 3d century, was adopted as the official name for the whole country.—*Gen. Desc.* The entire coast of this country presents a succession of bold headlands and safe and commodious bays, with many clusters of small islands, while inland a mountain-chain of considerable altitude runs parallel to the seaboard and throws off many branches. *C. C.* has in all an area of about 103,000 sq. miles, and a population of about 21,000,000, of which its northern part, *Tong-King*, or *Tonquin*, has 60,000 or 70,000 sq. miles and about 12,000,000 population. South of this lies *Dang-Kong*, or *Annam proper*; and in the extreme S.E. *Champa*, or *Tsiampa*. In addition there is included the territory of the *Moi*, or hill tribes, and *Loas*, a subject country, lying north of Cambodia. The lower section, now specifically known as French, or Lower, Cochin China, was detached from *Annam* in 1863 and is now a French colonial province. Cambodia, lying S.W. of *Annam*, on the lower course of the *Mekong*, was until recently a vassal state of Siam, but is now under French control.—*Tong-King*, the N. province, is mountainous in the N.W., but eastward forms an extensive alluvial plain, watered by the *Song-coi*, or *Red river*, which flows by several branches into Gulf of Siam. These branch streams are connected by a network of channels, natural and artificial, and the whole delta crossed by dykes or embankments, hundreds of miles in extent, and often 60 or more feet wide, and 20 or 30 feet high, their tops serving as highroads. The red soil deposited by the *Song-coi* is rapidly enlarging the delta, and Hanoi, a seaport of the 8th century, is now 100 miles inland. The delta soil is highly fertile, its chief crop being rice, though various other crops are grown. Minerals abound in the mountain region, gold, silver, iron, copper and tin being mined, while there are extensive coal deposits, as yet hardly touched. Useful woodlands, of various species, cover the mountains. The climate is on the whole pleasant, though in June and July the moist heats are intolerable.—The central portion of *C. C.* is less known than its northern and southern portions. It seems to be largely mountainous and infertile, yielding sparse crops of rice and dependent largely for supplies on the northern and southern provinces. Hné, the capital, is rather a citadel than a city, though the fortress is surrounded by a considerable population.—*French Cochin China*. Lower *C. C.*, now a French possession, has an area of about 23,000 sq. miles, and largely consists of the recently-formed delta of the *Mekong* river. The various channels of this river are

connected by numerous channels, natural or artificial, which give great facility for communication. The flat, marshy lowlands are occasionally broken by granitic heights, which were formerly islands in the gulf which has been silted up by the river. In places the surface of the plain is said to be below the level of the sea, while the numerous streams and the slight slope of the great plain leads to its frequent overflow. The coast regions are covered with a dense growth of mangroves. The mean temperature is high ($83^{\circ} F.$), and the humidity is always high, with little difference between day and night. The chief crop is rice, but coconuts, sugar and tobacco are grown. Of the total area not more than a sixth part is under cultivation.—*Inhab.* The natives of *C. C.* closely resemble the Chinese in general characteristics, possess the same religious beliefs, a similar type of language, and analogous legal and political systems.—*Hist.* This country was originally occupied by Chinese colonists, but gradually gained its freedom. After 1428 A.D., China only possessed a nominal suzerainty. In 1517 the Portuguese, and afterward the Dutch, came into the country, the latter establishing a trading settlement at Hanoi. In 1789, with French aid, the Emperor of Annam united *Tong-King* and Lower Cochin China under his rule, and in 1809 a part of Cambodia was annexed. Subsequently the French missionaries suffered much persecution, and in 1847 a French squadron destroyed the batteries and native fleet at Touron. New persecutions took place in 1858, many Catholic missionaries being cruelly put to death. As a result, in 1859, a French and Spanish fleet bombarded Saigon, which was surrendered, and in 1862 three provinces were annexed to France. Insurrections followed, and in 1867 the remaining three provinces were annexed and the whole of Lower Cochin China made French dependency. Cambodia came under a French protectorate in 1863.—*Tong-King and Annam*. France soon made aggressive movements in the N., and in 1873, Dupuis, with 100 soldiers, captured Hanoi. It was again taken in 1882, by Major Rivière, and despite the protests of China, *Annam* and *Tong-King* in 1884, came under the suzerainty of France. Some conflicts took place with China, but by the treaty of Tien-Tsin, June 9, 1885, that country agreed to respect the French protectorate. Thus the whole of *C. C.* became practically a dependency of France, though, with the exception of Lower *C. C.*, still nominally an empire. There are now in French *C. C.* 51 miles of railway, from Saigon to Vinh-Loug, and 1,840 miles of telegraph line. The population is estimated at 1,858,807, of whom 2,000 are Europeans, 50,000 Chinese, and the remainder principally Annamese. There is an army of 5,600 French troops and about 2,800 Annamese soldiers. The annual cost to France of maintaining the colony is about \$650,000; the imports about \$8,000,000, the exports about \$16,000,000, of which 70 per cent. is in rice.

Fig. 636.

A NOBLE OF COCHIN CHINA.

LADY-BIRD, WITH LARVA & PUPA.
(*Coccinella septempunctata*.)

Fig. 637.—COCHINEAL INSECT.

(Coccus cacti.)

a, Male; b, Female; c, Females feeding on a portion of nopal.

Cochineal, (*kōch'e-nēl*), *n.* [*Sp. cochinita*; Fr. *cochineille*.] (Zool.) An insect of the genus *coccus*, *C. cacti*, or *cochineal cactus*, celebrated for the beauty of the color which it yields. It is a native of S. America, and was

for a long time confined to Mexico, where it feeds on the nopal, a species of *Opuntia*, q. v. The female official *C.* insect, in its full-grown pregnant or torpid state, swells or grows to such a size, in proportion to that of its first or creeping state, that the legs, antennae, and proboscis, are so small with respect to the rest of the animal as hardly to be discovered by the naked eye; so that on a general view it bears a great resemblance to a seed or berry; hence arose that difference of opinion which at one period subsisted among writers; some maintaining that *C.* was a berry, while others contended that it was an insect. When the female insect is arrived at its full size, it fixes itself to the surface of the leaf, and envelops itself in a kind of white down, which it spins or draws through its proboscis in a continued double filament. The male is a small and rather slender two-winged fly, about the size of a flea, with jointed antennae and large white wings in proportion to the body, which is of a red color, with two long filaments proceeding from the tail. When the female insect has discharged all its eggs, it becomes a mere husk, and dies; so that great care is taken to kill the insects before that time, to prevent the young from escaping. The operation of collecting the insects, which is exceedingly tedious, is performed by women. Wild *C.* is collected six times in the year; but that which is cultivated is only collected thrice during the same period. The insects, of which there are about 70,000 in a pound, being detached from the plants on which they feed, by a blunt knife, are put into bags, and dipped in boiling water to kill them, after which they are dried in the sun. It is principally used in the dyeing of scarlet, crimson, and other esteemed colors. (See *CARMINE* and *CARMINE ACID*.) It is imported in bags, each containing about 200 lbs., and has the appearance of small, dry, shrivelled, rugose berries or seeds. The best have a purplish-gray color, the blackish varieties being less valuable. *C.* is sometimes adulterated by the admixture of a manufactured article composed of colored dough. This is detected by the action of boiling water, which dissolves and disintegrates the imitation, but has little effect upon the real insect. A variety found in Todd's Valley, California, has all the properties of the *C.* of Brazil and the S. parts of Mexico, the only apparent difference being that the article found in California is a light pink, while that of other regions is of a deep scarlet.

ochineal-fig. *n.* (*Bot.*) The nopal, on which the cochineal insect feeds. See *OPTUNIA*.

ochituate, in *Massachusetts*, a post-village of Weymouth, Middlesex co., about 16 m. from Boston. Near it is the small *Cochituate Lake*, from which the city of Boston is supplied with water.

ochlea, (*koch-le-ah*), *n.* [Lat.: Gr. *kochlias*, a snail with a shell.] (*Anat.*) A portion of the internal ear, which in mammals is shaped like the common snail-shell, with its base resting on the bottom of the internal meatus, and perforated to receive some filaments of the acoustic nerve. It is traversed by a conical column, called *modiolus*, around which a spiral canal makes two turns and a half. This canal is divided into two ramps, or *coale*, by a partition of bone called the *lamina spiralis*. At the base of the cochlea one scala communicates with the vestibule, the other with the tympanum; they communicate with each other at the apex of the cochlea.

ochlean, *COCHLEAR*, *a.* [Lat. *cochlea*, a screw.] (*Bot.*) A term used in describing the aestivation of a flower, to express one piece being larger than the others, and hollowed like a helmet or howl, covering all the others, as in *Acemium*, &c.

ochlea're, *n.* [Lat., from *cochlea*, a cockle; the bowl of a spoon being supposed to resemble one of the valves of that shell.] (*Med.*) *C. magnum*, *C. medium*, *C. minimum*, are professional terms used by physicians in writing their prescriptions, and signifying a table, dessert, and tea-spoonful.

ochlearia, (*koch-le-a-re-ah*), *n.* [Lat. *ochlearium*, from Gr. *kochliarion*, a spoon; referring to the concave leaves.] (*Bot.*) A genus of plants, order *Brassicaceae*. They are generally natives of Europe. *C. armoracia*, the horse radish, is a common garden-herb, stem 2-3 feet high, angular, smooth, branching; radical leaves nearly a foot long, on long, channelled petioles; flowers small, white, in corymbose racemes. The root, fleshy, large, white, very acid, is a well-known condiment for roast-beef and other viands. *C. officinalis*, the Scurvy-grass, has an acid and penetrating taste, and, when rubbed, it evolves a pungent odor. It has been long esteemed for its antiscorbutic properties.

ochlea'riform, *a.* Spoon-shaped.

ochlea'ris, *n.* (*Anat.*) A gelatinous-looking tissue, seen on opening the *cochlea*, by which the membranous one is connected, at its outer or convex margin, with the outer wall.

och'leary, **Coch'leate**, **Coch'leated**, *a.* [Lat. *cochleatus*, from *cochlea*; Gr. *kochlos*, a shell-fish with a spiral shell.] Twisted like a snail-shell; having the form of a screw; spiral; as, "cochleary turnings."

(*Bot.*) A term used in describing the general form of bodies, to denote any that are twisted in a short spire, so as to resemble the convolutions of a snail-shell; as the pod of *Medicago cochleata*. It also means a concave body like that of one of the valves of a cockle-shell, as in *Epidendrum cochleatum*.

och'lite, *n.* [Gr. *kochlias*, a snail, and *lithos*, a stone.] (*Pal.*) A fossil shell having a mouth like that of a snail.

och'ran, in *Indiana*, a post-village of Dearborn co., 2 m. W. of Aurora.

och'ran's Grove, in *Illinois*, a village of Shelby co., about 70 m. E. S. E. of Springfield.

och'ran's Mills, in *Penn.*, a P. O. of Armstrong co.

och'ranville, in *Pennsylvania*, a P. O. of Chester co.

Coch'ransville, in *Tennessee*, a post-village of Marshall co., 48 m. S. of Nashville.

Coch'ranton, in *Ohio*, a post-village of Marion co., 56 m. N. by W. of Columbus.

Cochranton, in *Penn.*, a post-vill. of Crawford co., on French Creek, 11 m. S. E. of Meadville.

Cochranville, or **COCHRANSVILLE**, in *Pennsylvania*, a village of Chester co., 60 m. S. E. of Harrisburg.

Cocinic Acid, *n.* (*Chem.*) A crystalline fatty acid, into which the fatty matter of cocoa-nut oil is converted by saponification. *Form.* $C_{25}H_{48}O_4$.

Cock, *n.* [*A. S.* *cocc*; *coq*.] The male of the common domestic fowl, or dunghill-cock.—See *GALLUS*.

—The male of any other bird; as, a turkey-cock, a black-cock, a cock-sparrow.

—A weathercock; a vane in the shape of a cock.

—A person having any of the characteristics of a cock; a chief man; a leader; as, the cock of the company.

"At fists I was always the cock of the school."—*Swift*.

—A valve for drawing off or discharging liquids; a stop-cock; as, the cock of a tap.

—The brim or projecting curve of a hat; as, the *Ramifies cock*.

—The gnomon or style of a dial.

—The needle of a balance.

—The act of setting or turning up anything, and the effect thereby produced; as, a cock of the eye, nose, or hat.

—The protecting piece of a balance in a watch.

—A cap or conical pile of new-mown hay.

—The top loft of a house, over the garret.—See *COCK-LOFT*.

(*Mil.*) That part of the lock of a musket or fowling-piece which holds the flint, or is the hammer of a percussion lock; as, a gun at half-cock.

(*Naut.*) A skiff; a small boat. See *COCK-BOAT*.

Cock-a-hoop, [*Fr.* *coq-a-la-huppe*, crested cock.] Exulting; triumphant.

"And having routed the whole troop,

With victory was cock-a-hoop!"—*Hudibras*.

Cock-and-bull. A tedious, doubtful, or fictitious assertion or narrative; as, a *cock-and-bull* story.

—*v. a.* To sit erect, as a cock holds his head; to turn up.

"Dick would cock his nose in scorn."—*Swift*.

—To set the brim of a hat so as to make sharp corners.

—To fix the hat upon the head in a fashion indicating pertness and menace.

"If two roisterers met, they cocked their hats in each other's faces."—*Macaulay*.

—To set or draw back the cock of a gun in order to fire.

—To raise hay in small conical heaps; as, "under the cocked hay."—*Spenser*.

—*v. i.* To hold the head erect menacingly; to strut in a pert or jaunty manner; to look big and self-conceited.

"Every one cocks and struts upon it, and pretends to overlook us."—*Addison*.

—To train or use fighting-cocks.

"Cries out 'gainst fighting-cocks, since he cannot bet."—*Ben Jonson*.

Cockade, *n.* [*Fr.* *cocarde*, a corruption of *coquarde*, from *coq*, a cock. Polish and Hungarian soldiers wearing a plume of cock's feathers in their caps.] A ribbon or knot of ribbon, or something similar, worn on the hat by officers, but frequently assumed by others as a badge or party symbol.—In France, a *C.* in the shape of a flat disc of metal, with the eagle and the national colors disposed concentrically, is an essential part of the military equipment.—The *White Cockade* was the device assumed by the adherents of the Stuart dynasty in England.

Cockaded, *n.* Wearing a cockade; as, a *cockaded* hat.

Cock'al, *n.* A game played with sheep's bones instead of dice.—The bone used in playing the game.

Cock'atoos, *n. pl.* (*Zool.*) A genus of birds of the *Psittacidae*, or Parrot family. They are distinguished from all other parrots by a crest, or tuft of elegant

feathers, on the head, which they can raise or depress at pleasure. They are in general natives of Australia and the Indian islands, inhabiting the woods, and feeding upon seeds and fruits. They make their nests in decayed trees, and if taken at an early age, are easily tamed. One of the most elegant specimens is the *Broad-crested Cockatoo*, *Psittacus cristatus*, (fig. 638.) It is about the size of a common fowl; the color white, with a faint tinge of rose-color on the head and breast, and of yellow on the inner wing-coverts and tail-feathers; on the head is a very ample crest, consisting of large and long feathers arching over the whole head, which the bird can readily raise or depress; these feathers are white above, but of a fine scarlet hue beneath; the tail is short in proportion to the size of the body, and even at the end; the bill very large, strong, and of a bluish black; the orbits of the eyes bare, and of a deep-ash color, and the legs deep cinereous. It is of a mild and docile disposition, but can rarely be taught to articulate any other word than its own name, which it pronounces with great distinctness. New-Holland is its locality.

Cockatrice, *n.* [*A. S.* *cocc*, a cock, and *attr*, alter, an adder; *Fr.* *cocatrix*, from *coq*.] A fabulous serpent imagined to be incubated by a serpent from a cock's egg; whose breath and look were by the ancients esteemed to be fatal; the basilisk.

"They will kill one another by the look, like cockatrices."—*Shaks*.

—A cant term applied to a pert brawling woman by way of reproach.

"My wife! 'tis she, the very cockatrice!"—*Congreve*.

Cock'bill, *v. a.* (*Naut.*) To place the yards at an angle with the deck.—To suspend an anchor to the cat-head by the ring only.

Cock'boat, *n.* (*Naut.*) A small boat; a cock.—A toy-boat for children.

Cock'brained, *a.* Rash; impulsive; giddy.

Cock'-broth, *n.* (*Cookery*.) Broth made by boiling a cock; chicken-broth.

Cock'burn, SIR GEORGE, an English admiral, b. 1772. He entered the navy in 1801, and served with distinction in the East Indies, and in the Mediterranean and West India stations. In 1813-1814, he was actively engaged in the war against the U. States, taking a conspicuous part in the burning of the capitol at Washington. Upon the close of the war, he was deputed to convey Napoleon to his living tomb of St. Helena, and entered Parliament in 1818. D. 1833.

Cock'chafer, (*MAY-BEETLE*, *MAY-BUG*), *n.* [*Scot.* *clock*, a beetle, and *chafer*. See *CHAFER*.] A beetle, numerous varieties of which compose the genus *Luchanosterna*, family *Scarabæida*. The May-beetle or cockchafer, found in summer on most of the deciduous trees, is about an inch long, chestnut-brown, smooth, but finely punctured, and each wing-case has 3 slightly elevated longitudinal lines; breast clothed with yellowish down. The grub is white, with a brownish head, attains almost the size of one's little finger, and feeds upon grass roots, committing ravage among these vegetables, so as sometimes to totally disappoint the best-founded hopes of the husbandman.

Cock'crow, **Cock'crowing**, *n.* Early morning; the time at which cocks crow.

Cocke, in *Tennessee*, an E. co., bordering on N. Carolina. Area, abt. 270 sq. m. It is traversed by Big Pigeon River, and bounded N. E. by French Broad River. Surface, mostly mountainous, especially near the S. E. boundary, which is formed by the Iron or Smoky Mountain. Cap. Newport.

Cock'er, *v. a.* [*W.* *cocru*, to indulge; O. *Fr.* *coquiner*.] To fondle; to indulge; to treat with tenderness; to pamper.

"Most children's constitutions are spoiled by cockering."—*Locke*.

—*n.* One who follows the sport of cock-fighting.

—A kind of brogue or country-made half-boot.

"His cockers were of cordwin!"—*Drayton*.

—A small kind of spaniel, used for starting feathered game, as woodcocks, &c.

Cock'erel, *n.* A young cock. Specifically, a young cock trained to fight.

"What wilt thou be, young cockerel, when thy spurs are grown to sharpness?"—*Shaks*.

Cock'ermouth, a town of England, in Cumberland, 25 m. S. W. of Carlisle, at the confluence of the Derwent with the Cocker, which takes its rise in Lake Buttermere. *Manf.* Hats, coarse woollen cloths, &c. *Pop.* 8,000. It is the birthplace of the poet Wordsworth.

Cock'erwit, in Nova Scotia, a seaport in the S. W. of Shelburne co., about 125 m. S. W. of Halifax.

Cock'et, *n.* (*Law*.) In English law, a custom-house document certifying to the proper entry of, and payment on, goods liable to duty.—A room in a custom-house where such goods are entered.

Cock'et-bread, *n.* The finest kind of wheaten bread.

Cock'eye, *n.* A squinting eye.

Cock'eysville, in *Maryland*, a post-village of Baltimore co., 40 m. N. of Annapolis.

Cock'-feather, *n.* (*Sports*.) That feather upon an arrow which stands vertically above the cock, or notch.

Cock'-fight, **Cock'-fighting**, *n.* (*Sports*.) A battle, main, or match of game-cocks. It is said to have been a common pastime in Athens and other parts of Greece, and it seems to have been afterwards adopted from that country by the Romans. It is probable that cock-fighting was first introduced by the Romans into England, where it became a great national sport; and though more than once prohibited, it received encouragement and countenance from several of the crowned heads. The celebrated national cock-pit at Westminster is said to have been erected by Henry VIII., and James I. and Charles II. were both encouragers of the sport.

Fig. 638 — BROAD-CRESTED COCKATOO.
(*Psittacus cristatus*.)

It was forbidden by one of the acts of Cromwell. At present, cock-fighting is prohibited under penalty, but it is still largely carried on, particularly in the colliery districts in the N. of England. It is also a favorite sport in the island of Cuba, and occasionally in some of the U. States. Cocks for fighting are selected with the greatest judgment, and trained with the utmost care. For the combat, they are carefully trimmed and armed with steel or silver spurs. The place appropriated for fighting is called the pit; and the battle is conducted by two setters, who place the cocks beak to beak. When once pitted, neither of the setters can touch his cock so long as they continue to fight, unless their weapons get entangled. In what is called the "Welsh main," a number of cocks are pitted against each other, and then the conquerors are pitted against each other, until only one remains alive. Like many other cruel sports, this amusement is indulged in by many persons in comparatively good standing both here and abroad.

Cock-horse, n. A child's rocking-horse. — A high, tall horse. (R.)

—a. Lifted up as one is on horseback.

—Elevated in one's own esteem; proud; upstart; self-complacent; as, "Cock-horse peasantry." — Marlowe.

Cock-ing, n. A main of cocks; cock-fighting.

Cockle, (kòk'l.) a. [A. S. *coccol*, probably from *accocan*, to choke.] (Bot.) See CORN-COCKLE.

Cockle, n. [Fr. *coque*, *coquille*; Lit. *cochlea*, a spiral; Gr. *kochlís*, a shell-fish with a spiral shell; *kongchē*, a mussel or cockle; Sansk. *canklī*.] (Zool.) See CARDIUM.

(Min.) Among Cornish miners, the name given to a laminated mineral substance of a blackish-brown color, like tin; short. (Called in Sweden, *skiorl*; and in Germany, *schorl*.)

—The body, or fire-place of an air-stove.

—A kiln for drying hops.

—v. a. To contract into wrinkles; to shrink, pucker, or wrinkle, as cloth, or the shell of a cockle.

"Show's soon drench the camlet's cockled grain." — Gay.

—v. i. To assume a wrinkled or ridgy form; as, a *cockling* sea.

Cock-led, a. Cochleary; wrinkled; turbinated.

"Love's feeling is more soft and sensible
Than are the tender horns of cockled snails." — Shaks.

Cock-le-oast, n. The fire-place of an oast or hop-kiln.

Cock-ler, n. One who gathers or sells cockle-fish.

Cock-le-shell, n. The shelly covering of a cockle.

Cock-le-stairs, n. pl. Stairs made winding or spiral.

Cock-loft, n. The top loft of a house or building; the upper room over the garret; a cock; a lumber-room.

"My cock-lofts, indeed, are very indifferently furnished." — Swift

Cock-master, n. A person who breeds game-cocks.

"A cock-master bought a partridge, and turned it among the fighting-cocks." — L'Estrange.

Cock-match, n. A cock-fight; a match of cocks.

Cockney, a. A nickname, or term of contempt, applied to a Londoner, which has been long in use, occurring in verse as early as the reign of Henry II. Its origin is doubtful. According to some, it is derived from *coquina*, a kitchen, and denoted the luxuriousness for which London was celebrated even in early times; or from *Cokeigne*, or *Cocaigne* (probably from the same root), the name of a Utopian country of luxury and ease. According to some, it denotes one coaxed or cockered, and made a fool or nestle-cock; or, according to others, one utterly ignorant of rural affairs or husbandry. The latter probably originated in the well-known story of the Londoner, who, when on a visit to the country, being told that the horse neighs, afterwards spoke of the cock neighing, hence *cockneigh*, *cockney*. The modern mark of cockneyism is an abuse of the letters *h* and *r*; as, *hair* for *air*, *sofar* for *sofa*. The Cockney school of literature was a term applied in the earlier numbers of "Blackwood's Magazine," to Leigh Hunt, Hazlitt, Keats, and other young authors. The *King of the Cockneys* was an important personage in the sports and shows formerly held in the hall of the Middle Temple on Childermas-day, and had his marshal, butler, constable, and other officers, who were ordered to be entertained with due service in "honest manner and good order." See COCAIGNE.

—An effeminate, ignorant, despicable citizen.

"I am afraid this great lubber the world will prove a cockney." — Shaks.

Cockney, a. Resembling, or relating to, a cockney, or cockneys.

Cockneydom, n. The native region of cockneys; cocaigne.

Cockneyfy, v. t. To form on the model, or after the type, of a cockney.

Cockneyish, a. Cockney-like; after the cockney manner.

Cockneyism, n. Quality, condition, or manners of a cockney; a cockney idiom or phrase.

Cock-paddle, u. (Zool.) The Scottish term for the lump-fish (*Cyclopterus lumpus*).

Cock-pit, n. A pit or arena where game-cocks fight one another.

—In England, the privy-council chamber at Westminster; — so called because built on the site of the old cock-pit of Whitehall palace.

(Naut.) An apartment in a ship of war appropriated to the use of the surgeon, being the place where he dresses the wounded; it is near the hatchway under the lower gun-deck.

Cock of the Plain, Cock of the Woods, n. (Zool.) See GROUSE.

Cock-roach, n. (Zool.) See BLATTIDÆ.

Cock-run, n. In Mississippi, a village of De Soto co., abt. 200 m. N. of Jackson.

Cock's-comb, n. The comb of a cock. — A fop; a dandy; a vain fellow. See COXCOMB.

(Bot.) See CELOSIA.

Cock's-foot Grass, n. (Bot.) The orchard grass. See DACTYLIS.

Cock's-head, n. A popular name of SAINFOIN, *q. v.*

Cock'spur, n. The spur attached to the leg of a game-cock.

(Bot.) See CRATEGUS.

Cock'sure, a. Confidently certain; without doubt or fear. (Vulgar.)

"I thought myself *cocksure* of his horse, which he readily promised me." — Pope.

Cockswain, (kòks'n,) n. [*Cog*, or *cock*, a small boat, and *swain*, a boy, a servant.] (Naut.) An officer on board a ship, who has charge of a boat and crew; as, the captain's *cockswain*. — The person who steers, and directs the course of a row-boat.

Cock-water, n. (Mining.) Among English miners, a stream of water brought into a trough to wash away the sand from tin-ore.

Cocles, (kò'klees,) HORATIUS, a hero of ancient Rome, who alone, in 506 B. C., opposed the whole army of Porsenna at the head of a bridge, while his companions were destroying it behind him. When this was effected, C. though wounded by the darts of the enemy, and impeded by his arms and armor, leaped into the Tiber, and swam safely across.

"Still is the story told, —

How well Horatius kept the bridge

In the brave days of old." — Macaulay.

Co'coa, or Ca'cao, n. (Bot.) The chocolate-tree. See THEOBROMA.

—(A corruption of, and often spelled CACAO, *q. v.*) A preparation, made from the ground-nuts of the chocolate-tree, and used as a beverage.

Co'coa, or Co'co-nut, n. See COCOS.

Cocoa-nut Fibre, n. (Manuf.) The seeds of the cocoa-nut palm (*cocos nucifera*), well known under the name of Cocoa-nuts, are contained in a large husk composed of solid woody fibres. These fibres were woven into fabrics of various sorts by the natives of Ceylon and India from time immemorial; but it is only within the last 20 years that this material has been used in Europe and in this country. It is now applied most successfully to the manufacture of mats, matting, cordage, brushes, brooms, &c., &c. Latterly, a method of introducing color into the manufacture has been devised by dyeing the fibre; and some very fine combinations of color have been formed, which contrast successfully with similar manufactures in the finest hemp. Cocoa-nut fibre has been used for bedding with great advantage. It does not become knotty or hard, does not harbor vermin, and is not affected by variation of climate. The refuse of the husk forms a perfect material for fern-beds, being much less liable to give out an offensive odor than spent tan, which is often used for this purpose. Cocoa-nut fibre is also called COIR (*q. v.*), and has long been used for ropes and cordage under this name.

Cocodrie Bayou, or CROCODILE BAYOU, in Louisiana, traverses Concordia parish, between the Washita and Mississippi rivers and is connected with Red River.

Co'coae, n. pl. (Bot.) A tribe of plants, ord. *Palmaceæ*, of which the genus *Cocos* is the type. — See COCOS.

Cocolamus Creek, in Pennsylvania, enters the Juniata in Perry co.

Cocoon, n. [Fr. *cocou*, from Gr. *kokkos*, a berry or kernel.] The silky, oblong ball or case in which the silkworm involves itself during the period of its metamorphosis. See SILK-WORM.

—The envelope of the larvæ of other insects.

Cocoon'ery, u. A place set for silk-worms while engaged in forming cocoons.

Co'cos, n. [Gr. *kokkos*, a kernel.] (Bot.) A genus of trees, order *Palmaceæ*, distinguished by having primate

Fig. 639. — COCOA-NUT TREE.
(*Cocos nucifera*.)

leaves, and male and female flowers on the same tree the female flowers at the base of each spadix; a simple 3-celled ovary, which is succeeded by a coarse, fibrous, 1-celled drupe, two of the cells becoming abortive. There are about 18 known species, the most important of which, *C. nucifera*, is found all over the tropical regions but generally growing within the reach or influence of the sea or salt water, and often taking root on sand banks or thinly covered reefs, almost directly after the appear above high-water. The tree rises from 60 to 100 feet in height, and affords food, drink, oil, clothing, and shelter to the natives; has a soft, fibrous stem, marked on its bark by rings, produced by the fall of its leaves, two leaves falling off annually; so that the age of the tree can always be told by counting its rings, half the number of the whole giving its age. The top of the tree is always crowned by a plume of from 12 to 15 long leaves, like gigantic ostrich-feathers, about 15 ft. long. The fruit, or nut, hangs in clusters under the crown plume, and consists of a shell, enveloped in a strong, fibrous pericarp, or capsule. In hot climates, every part of the tree is made use of: the natives chew the root as a substitute for the areca; the stem is used as upright and supports for houses, and for fashioning many domestic implements; the leaves form a thatch, or are made into umbrellas, baskets, buckets, and lanterns; their ashes yield potash in abundance, and their ribs are used as oars and even brushes. The fibre from the nut is woven into cloth, ropes, mats, sackings, and even cloths (see COCOA-NUT FIBRE). By fermentation the juice of the stem is made into a palm-oil, and by distillation into an ardent spirit, and also a coarse sugar, called *jaggery*; while the pith, dried, ground, and washed forms a farinaceous food similar to sago. The *jaggery* or coarse sugar, when mixed with lime, forms a durable compost that takes a polish like marble. The fruit itself is a wholesome food, and its milk a cooling beverage, and forms the chief aliment of many of the natives. The fibre of the shell, called *coir*, is used also for brushes; the shell is turned and polished into drinking cups and measures, while the substance of the nut itself, when pressed, yields a large quantity of oil, which is used largely for lamps and flambeaux; and, lastly, the unexpanded buds, when boiled, form a delicate and much esteemed food. See COPRA.

Co'cos Islands, two small islands near the W. coast of Sumatra, Lat. 12° S., Lon. 96° 53' E. They were discovered in 1609 by Keeling. — The name also of several small islands in the Pacific and Indian oceans.

Co'cos-wood, n. A wood brought from the W. India, and principally used in the manufacture of musical reed-instruments.

Coc'tible, a. That which is capable of being baked or boiled.

Coctile, a. [Lat. *coctilo*, from *coquo*, to cook.] Made by baking, or by exposing to heat, as a brick.

Coction, (kòk'shun,) n. [Lat. *coctio*, from *coquo*, to cook.] Act of boiling, or exposing to the action of heated liquid.

(Med.) A word sometimes used to express the function of digestion, so far as the process of chymification, or the formation of chyme, is concerned.

Coc'y'tus. (Myth.) One of the rivers of Hades; — according to Homer, a branch of the Styx.

C. O. D. (Com.) An abbrev. for *collect or cash on delivery*.

Cod, Cod'fish, n. [L. Lat. *cadus*; Gr. *gados*.] (Zool.) The common name of the genus *Morrhua*, the true cod. The American cod, *M. Americana*, is from 24 to 36 inches long, olive-green above, dusky-white beneath, and the back and sides marked with yellowish spots. There are several varieties, differing in the color markings. — The fish is, perhaps, the most important to the human family, of all the inhabitants of the deep. It affords labor and food for thousands of men, and is one of the most

Fig. 640. — AMERICAN COD.
(*Morhua Americana*.)

important national resources, — one which, owing to the wonderful provision of nature with regard to the fecundity of this fish, is not likely to diminish for a considerable period. For more than four centuries has the cod-fishery been carried on, without any interruption; yet the supply at the present day is something stupendous. A single fisherman has been known to capture 500 of the fish in a day of ten hours. Now, as the cod frequently attains a weight of 50 lbs., this haul of the fisherman even setting it down at a moderate rate, must have amounted to something like 20,000 lbs. of fish; and multiply this by several thousand, and we get the amount of cod which is daily obtained during the season. The great supply of cod is from the ports of Newfoundland, Canada, Nova Scotia, and from most of the towns on the Massachusetts coast between Cape Ann and Cape Cod; and in the Pacific, chiefly from the coasts of Washington territory. There are more than 2,000 vessels with a tonnage of over 100,000 tons, and employing upwards of 10,000 men and boys, engaged in the bank-cod-fishery of the U. States. The product of these is annually about 600,000 cwt. of fish, valued at about \$2,000,000; the oil from the livers is valued at \$1,000,000. All the cod is caught by hooks and lines; the bait used commonly consists of limpets, whelks, and pieces of various fishes. Our wonder at the extraordinary supply of the fish is considerably diminished when we examine the mode of the cod. By those who have taken the trouble

satisfy themselves, it has been calculated, that, when one devours a cod's roe, he also devours no less than about 180,000,000 lbs. of food, supposing it were allowed to arrive at maturity. One's brain reels at the late idea of reckoning what might be the condition of cod-dom if these fishes were left alone for a few years. The cod is a very voracious fish. It is not particular in its diet, but devours indiscriminately all the small fish it can catch. For the deep-sea fishing very long lines are used; these are fixed to the bottom by means of a small anchor, the other end being supported by a buoy, and the hooks are placed at the extremities of short lines, usually about six feet in length, attached at intervals to the main line. The long lines are usually left for about six hours, or for a whole tide, when they are taken up and examined. Since 1880, however, there has been introduced in this country the Norwegian gill net, with which no bait is needed. With it as already improved by American fishermen, much more and larger fish are caught than with bait. See COD-LIVER OIL.

cod, *n.* [A. S. *codd*; W. *cod*, *cud*; Icel. *kodde*; Swed. and Goth. *kudde*, a little sack; Scot. *cod*, a pillow. Etymol. uncertain.] Any husk, envelope, or case containing the seeds of a plant; a pod.

"Where in full *cods* last year rich peas did grow."—*May*.

(Anat.) The scrotum.

In some districts of England, a pad, pillow, or cushion. **o'da**, *n.* [It., tail.] (*Mus.*) The passage which serves to close or end a movement, after the regular form has been completed. In some cases it consists of merely one phrase, in others it is carried to a great extent. At the conclusion of a canon, it often serves to end the piece, which might otherwise be carried on to infinity.

oda'rium, *n.* [Gr. *odarium*, a leathern pouch.] (*Bot.*) A gen. of plants, sub-order *Casalpiniceæ*. *C. acutifolium* and *obtusifolium*, both natives of Sierra Leone, yield fruits known as the brown and the velvet tamarinds. The pulp of each kind is eaten, and has an agreeable taste.

od'ded, *a.* Inclosed or enveloped in a cod.

od'der, *n.* One who gathers peas-cods.

od'dle, *v. a.* [From *caudle*; Fr. *chaud*; Lat. *cululus*, warm.] To parboil, or make soft by heated water.

To fondle; to pamper or make delicate by over-nursing.

od'dy-mad'dy, *n.* A gull in its first year's feathers.

ode, *n.* [Fr. *ode*; Lat. *codex*, *caudex*.] A compilation of laws made by public authority. Several collections of the Roman law are designated by this name, the chief of which are: the *Gregorian* and *Hermogenian codes*, made by two celebrated juriconsults, Gregorius and Hermogenes, and containing the constitutions of the emperors from Hadrian to Constantine; the *Theodosian code*, published in 428 by command of the emperor Theodosius II.; and the *Justinian code*, prepared by command of the emperor Justinian, and first published in 529, and a second time, after revision, in 534. There are several of the modern systematic collections of laws designated by the title of *code*, the chief of which are the code of Frederick the Great of Prussia; that of Catherine of Russia (confined to criminal jurisprudence); that of Joseph II. of Austria; and the celebrated *Code Napoléon* in France. In the latter country, before 1789, there was no uniform system of legislation; in some parts the Roman law prevailed, in others ancient custom, both being supplemented by royal ordinances. These having been abrogated at the revolution, several attempts were made to form a code of laws in accordance with their altered circumstances; but, on account of the unsettled state of society at that period, nothing of a satisfactory nature was effected. At length Napoleon, after he became first consul, appointed certain commissioners to draw up a project of a civil code, which was printed in the early part of 1801, and copies thereof transmitted to the different courts of France for their observations and suggestions. The whole was then laid before the legislative section of the council of state, and various points successively discussed. Napoleon himself taking an active part in the debates. After being submitted to the tribunate, it was at length promulgated as the civil law of France, in 1804. When Napoleon was raised to the empire, the title of *Code civil des Français* was changed to *Code Napoléon*. In 1816 the former title was restored, and in 1852 the title of *Code Napoléon* was again given to it. This code, which regulates the civil rights of the people, as regards person and property, in its general arrangement and distribution resembles the *Institutions* of Justinian. It is divided into three books, the first of which treats of the civil relations of individuals; the second, of property in its various kinds and modifications; and the third, of the various modes in which property is legally acquired. Besides the *Code civil*, the French written law comprises five other codes. The *Code de Procédure civile* relates to the forms of process and the modes of procedure before the various civil courts. The *Code de Commerce*, as its name indicates, bears upon commercial transactions. It consists of four books, the first of which treats of commerce in general, of the various classes of commercial men, of partnerships, &c.; the second, of maritime commerce; the third, of bankruptcies; and the fourth, of commercial tribunals. *Code d'Instruction criminelle* regulates the forms of procedure in criminal cases. The *Code pénal* defines the various kinds of crimes, and their several punishments. This and the preceding were promulgated in 1810; but important changes have been made upon them by subsequent enactments, particularly in 1832. The sixth and last of these is the *Code forestier*, which was published in 1827, and relates to the administration of the woods and forests. In this country the most complete code which has been enacted is that of Louisiana. This State was at one time a French, at another a Spanish colony; and after its cession to the U. States a radical revision of its

law became necessary. The first code (1808) was superseded by that of 1824, the chief part in the compilation of which was the work of Mr. Edward Livingston. It is based on the Code Napoléon, and contains 3,522 articles numbered like those of the French codes, in one series, for greater convenience of reference. In several other States, where the common law has prevailed, revisions of the statutes have been repeatedly made, in which many modifications of the common law have been incorporated. One of the more complete revisions of this kind is the *Revised Statutes* of the State of New York.

Code'ine, *n.* [Gr. *kodrin*, *kodē*, a poppy-head.] (*Chem.*) An alkaline substance, discovered in 1832 by Robiquet in opium.

Code'ta, *n.* [It., dim. of *coda*.] (*Music.*) A short passage which connects one section with another, and not composing part of a regular section.

Co'dex, *n.*; *pl.* CODICES. [Lat., a manuscript.] In its original sense, the inner bark of a tree, which was used for the purpose of writing. The word was thence transferred by the Romans to signify a piece of writing, on whatever material; *e. g.* with the stylus on tablets lined with wax, or on a roll of parchment or paper. In modern Latin, a manuscript volume. *Codex rescriptus* or *palimpsestus* is a manuscript consisting of leaves, from which some earlier writing has been erased in order to afford room for the insertion of more recent writing. Many such codices exist; and from the imperfect nature of the erasing process, the earlier writing has in some instances been restored.

(*Med.*) [Lat., a book; — a collection of laws.] A collection of approved medical formulæ, with the processes necessary for forming the compounds referred to in it. The French Pharmacopœia is styled *Codex medicamentarius*.

Cod'fish, *n.* See Cod.

Cod'-fisher, *n.* A person or ship employed in the cod-fishery.

Cod'-fishery, *n.* The occupation or business of fishing for cod; as, the Newfoundland codfishery.

Codger, *n.* [Possibly a corruption of *cottager*. Etym. uncertain.] A singular, odd, or eccentric old man; as, a queer codger.

—A covetous, mean, or penurious person; a hunk.

Co'dical, *a.* Pertaining to, or consisting of, a code or codex.

Cod'icil, *n.* [L. Lat. *codicillus*, dim. from *codex*.] (*Law.*) An addition or supplement to a will, for the purpose of altering, explaining, or adding to its contents. Of C., as of wills, the latter prevails where it contains provisions contradictory to those of a former. Every C. must be executed in the same manner as is thereby made requisite in the case of a will; viz., signed by the testator in the presence of two witnesses at one time.

Codiciliary, *a.* After the manner of a codicil; of the nature of a codicil; as, a *codiciliary* testament.

Codification, *n.* [Fr.] Act or process of reducing laws to a code.

Cod'ifier, *n.* One who reduces laws to a code.

Cod'ify, *v. a.* [Fr. *codifier*; Lat. *codex*, and *facio*, to make.] To reduce to a code.

Cod'illa, *n.* [From Lat. *cauda*, a tail.] (*Cm.*) The coarsest fibre of hemp or flax; — used in making some kinds of cordage.

Codille, *n.* [Fr.; Sp. *codillo*.] (*Games.*) A term used in playing at ombre, when the game is won.

Cod'ist, *n.* A framer of codes; a codifier.

Cod'le, *v. a.* Same as COD'ILE, *q. v.*

Cod'tin, **Cod'ling**, *n.* An apple not quite ripe; a cooking-apple.

Cod'-line, *n.* An 18-thread line, used in the cod-fishery.

Cod'ling, *n.* A young codfish.

Cod-liver Oil, *n.* (*Med.*) The oil obtained from the liver of the common cod (*q. v.*), and other allied species, has long been a popular remedy for rheumatism and some other complaints, but its use by medical practitioners is of comparatively recent date. The market is almost entirely supplied with this article from Newfoundland, where the fishing begins in June and October. The livers are either pressed, or they are boiled in water, and the oil afterwards filtered, the color of it varying according to the mode of preparation and the species of fish from which it is derived. Besides the usual constituents of fish-oil, traces of bromine and of iodine (iodide of copper) are said to have been discovered in it, and to these agents its efficacy may perhaps be ascribed, though it has often been doubted whether it possesses any virtues beyond those of fat oils in general. In the dose of a tablespoonful or two daily, it generally acts slightly on the bowels; and though nauseous and disagreeable at first, the repugnance to it is soon overcome. Rheumatism, scrofula, chronic gout, skin affections, phthisis, and mesenteric emaciation are the diseases in which it has been principally prescribed. One or two tablespoonfuls twice or three times a day for adults, and a teaspoonful night and morning for young children, are the usual doses. Coffee, warm table-beer, dill, pepper-mint, and other aromatic waters, are the best vehicles for covering its nauseous flavor.

Co'do, in Brazil, a town of the prov. of Maranhão, at the confluence of the Codo with the Itapicuri, 50 m. N.W. of Caxias.

Codogno, (*ko-dōn'yo*), a town of N. Italy, prov. Milan, cap. of dist. in a fertile country between the rivers Po and Caddo, 15 m. S.E. of Lodi. It is well built, and has manufactures of silk stuffs. It is the principal mart in Italy for the cheese misnamed Parmesan. Population 10,582.

Codo'rus Creek, in Pennsylvania, traverses York co., and flows into the Susquehanna about 10 m. from Columbia.

Cod'piece, *n.* A part of male attire formerly worn in front of the person.

Cod'rington, SIR EDWARD, G.C.B., an English admiral, b. 1770. At the age of 13 he entered the navy, and in 1805 commanded a line-of-battleship at the battle of Trafalgar. He subsequently assisted at the bombardment of Flushing, served in the Scheldt expedition, and defended Cadiz when besieged by the French. In 1814, C. participated in the attack on New Orleans, and, in 1826, he was appointed to command the English fleet, that, in conjunction with those of France and Russia, destroyed the Turco-Egyptian fleet at the battle of Navarino, in 1827. D. in London, 1851.

Co'drus, the 17th and last mythical king of Athens. When the Heracidae invaded Attica, C. devoted his life to save his country. He went, unknown, into the midst of the army of the Heracidae, and was slain; a sacrifice he was led to make by the oracle, which pronounced that the leader of the conquering army must fall. At his death, it is said that the Athenians, deeming no one worthy to be the successor of their patriotic monarch, established the government by archons. D. about 1070 B.C., according to tradition.

Coe, in Michigan, a township of Isabella co.; *pop.* about 322.

Co-efficiency, *n.* The power of two or more things uniting together to produce an effect; joint efficacy.

Co-efficiency, *n.* Co-operation; the state of acting together to some single end.

Co-efficient, *a.* [Lat. *con*, and *efficiens* — *eficio*, to effect — *ex*, and *facio*, to make.] Jointly efficient; co-operating; acting in unison to the same end.

—That which co-operates, or joins in action with something else to produce the same effect.

(*Algebra*.) One of two, simple or compound, factors whose product constitutes a term. Thus in the term $2ab^2c$, $2ab^2$ is the co-efficient of c , $2a$ of b^2c , and 2 of ab^2c . In the latter case, 2 is frequently called the *numerical co-efficient* of the term, the others being distinguished as *literal co-efficients*. In an algebraical expression, and especially in quantities whose terms involve constant as well as variable factors, it is usual to restrict the term *co-efficient* to the former, and to refer to the latter as *facients*.

Co-efficiently, *adv.* In co-operation; by a method of joint action.

Coe'horn, **Co'horn**, *n.* (*Mil.*) A small mortar made of bronze, named from its inventor, COE'HORN, *q. v.*

Cœ'acanth, *a.* [Gr. *kailos*, hollow, and *acanthos*, spine.] (*Zool.*) Hollow-spined, as some fishes.

Co-eld'er, *n.* An elder possessing equal rank and station with another.

Cœlentera'ta, *n.* [Gr. *kailos*, hollow, *teras*, an anomaly.] (*Zool.*) A class of animals formerly included in Cuvier's group of *Radula*, and embracing the *Hydros* and *Actinozoa*, familiarly known as jelly-fish, or medusæ, coral animals, polyps, &c. They are sac-like animals, with no distinction between the digestive and body cavities.

Cœle-Syria, (*s'el-sir'e-ā*), a valley of Syria, between the mountain-ranges of Anti-Libanus and Lebanon. It is traversed by the river Libani, the ancient Leontes, and contains the town of Balbec, and other towns of less importance.

Cœ'liac, **Cœ'liac**, *a.* [Lat. *cœliacus*; Gr. *kailiakos*, from *kailia*, the belly.] (*Surg. and Med.*) Appertaining to the belly.

C. Artery. The first branch given off from the aorta in the cavity of the abdomen. It sends branches to the diaphragm, stomach, liver, pylorus, duodenum, omentum, and spleen.

C. Flux, **C. Passion**. A species of diarrhœa, in which the food is discharged by the bowels in an undigested condition. It is, in general, symptomatic of tubercular disease of the mesenteric glands.

C. Plum, is formed of numerous nervous filaments, which proceed from the semilunar ganglia of the great sympathetic; and it is seated around the trunk of the cœliac artery, behind the stomach.

Cœ'loeline, *n.* (*Bot.*) A genus of plants, order *Ananaceæ*. The species *C. polycarpa* is the Berberine, or yellow dye-tree of Sudan. Its bark yields a beautiful yellow color, which is much used for dyeing in certain parts of Africa. When reduced to a coarse powder, this bark is a valuable topical remedy in the treatment of ulcers. It contains the alkaloid *berberine*, to which its medicinal virtues are probably due.

Cœlosperm'us, *a.* [Gr. *kailos*, and *sperma*, seed.] (*Bot.*) Having seeds curved on the inner side, by the bending inward toward each other of the top and bottom, as some umbelliferous plants.

Cœ'lim, *n.* (*Arch.*) According to Vitruvius, a soffit or ceiling.

Cœ'us, or **Ura'nus**, (*Myth.*) The heavens personified, and the most ancient of the gods, was, at the same time, the offspring and the husband of Terra, the earth, by whom he had eighteen children. Among them were Saturn, the Cyclops, and the Titans. His children rebelling against him, wounded him; and from the blood which sprinkled the ground, sprang the giants, furies, and nymphs.

Coemption, *n.* [Lat. *coemptio* — *coemere*.] The act of buying up the whole quantity of anything.

"Monopolies and coemption of wares for re-sale, are great means to enrich." — Bacon.

Cœnæ'ulum, *n.* [*Antiq.*] The eating- or supper-room of the Romans.

Cœnæ'sthesis, *n.* [Gr. *koinos*, common, and *aisthesis*, sensation.] (*Physiol.*) A sixth sense, which, according to some writers, is the feeling of self-existence or individuality, and is manifested by the sense of buoyancy &c.

depression, which we experience without any known cause;—by involuntary shuddering, feeling of chill or glow, &c.

Co-enjoy', *v. a.* To enjoy in concert with another.

Co-enobite, *n.* See **CENOBIITE**.

Co-equal, *a.* [Lat. *con*, and *equalis*.] Jointly equal; equal to another person or thing; of the same rank, power, or dignity; as, "his cap *co-equal* with the crown."

—One who is equal to, or in parity with, another.

Co-equal'ity, *n.* [Lat. *coequalitas*.] The state of being on a term of equality with another; as, *co-equality* of station.

Co-e'qually, *adv.* With joint equality.

Coerce', *v. a.* [Lat. *coerceo*—*com*, and *arceo*, to shut up, to inclose, to keep at a distance—root *arc*, to keep, to cover, to ward off; Sansk. *ruksh*, to keep, defend, rule, allied to Gr. *arkeō*, to ward off.] To restrain; To confine; to compel; as, to *coerce* obedience to the law.

"A prisoner of war is to be on no account *coerced* with fetters." *Str W. Scott.*

Coer'cible, *a.* That may or ought to be restrained or compelled.

Coer'cibleness, *n.* State of being coercible.

Coer'cion, *n.* Act of coercing; restraint; check; force; compulsion.

"Government has *coercion* . . . upon such as neglect their duty." *South.*

Coer'citive, *a.* Having power to coerce or restrain. *Coercitive*, or *Coercive Force*. (*Magnetism*.) The power or force which in iron or steel produces a slowness or difficulty in imparting magnetism to it, and also interposes an obstacle to the return of a bar to its natural state when active magnetism has ceased. It plainly depends on the molecular constitution of the metal.

Coer'cive, *a.* That which has power to coerce; compulsory; constraining; forcing; as, *coercive* measures.

Coer'cively, *adv.* By constraint or compulsion.

Coesse', in *Indiana*, a post-village of Whitley co., about 15 m. W.N.W. of Fort Wayne.

Co-essen'tial, *a.* Jointly essential; partaking of the same essence.

"We bless and magnify that *co-essential* spirit . . . which is the Holy Ghost." — *Hooker.*

Co-essen'tial'ity, *n.* Participation of the same essence.

Co-essen'tially, *adv.* In a co-essential manner.

Co-estab'lishment, *n.* A joint establishment.

Co-estate', *n.* An estate of equality of rank; an estate held by two or more persons in conjunction.

Co-etane'ous, *a.* [Lat. *coetaneus*—*con*, and *etas*, age.] Of the same age with another; contemporary in origin;—generally followed by *to* or *with*.

"Every fault hath penal effects, *co-etaneous* to the act." *Govt. of the Tongue.*

Co-etane'ously, *adv.* Of or from the same age or origin.

Co-eter'nal, *a.* Equally eternal with another.

"Or of the eternal *co-eternal* heart!" — *Milton.*

Co-eter'nally, *adv.* With equal eternity.

"Arius had dishonored his *co-eternally* begotten son." — *Hooker.*

Co-eter'nity, *n.* Equal eternity; existence from eternity equal with another eternal being.

Cœur D'Alene. [Fr. *awl*-hearts.] A tribe of Indians of the Selish family, who inhabit Idaho and Washington Territories, and call themselves Skizoomish, or Skitzumish.

Cœur D'Alene, in *Idaho*, a mining town of Kootenai co. *Pop.* (1897) about 1,000.

Cœur, Jacques, (*kūr*), a merchant and royal treasurer of France, b. towards the end of the 14th century. His vast commercial enterprise attracted the attention of Charles VII., who appointed him treasurer and intrusted him with diplomatic missions in Italy. C. contributed \$200,000 to help the king in rescuing Normandy from the English. His influence became so great as to give offence to envious persons. They unjustly charged him with having poisoned Agnes Sorel, the mistress of the king, and caused him to be arrested, and his vast property to be confiscated, 1451. In 1453, he effected his escape from prison, and repaired to Rome, where he was kindly received by Pope Calixtus III., who selected him as captain-general of a fleet against the Turks. C. died in this expedition, 1456.

Co'e'val, **Co'e'vons**, *a.* [Lat. *coevus*—*con*, and *ævum*, uninterrupted, never-ending time, eternity, age.] Of the same duration or age; co-existent; contemporary; contemporaneous;—commonly preceding *with* or *to*.

"Silence, *coeval* with eternity!" — *Pope.*

—*n.* One of the same age; one who begins to exist at the same time; as, "All your *coevals* in wit." — *Pope.*

Co-exec'utor, *n.* A joint executor; one who acts as executor in concert with another.

Co-exec'utrix, *n.* A joint executrix.

Co-exist', *v. i.* To exist together; to exist at the same time with another;—followed by *with*.

Co-exist'ence, *n.* Existence at the same time with another;—preceding *with*.

"We can demonstrate . . . their *co-existence* with him." — *Grew.*

Co-exist'ent, *a.* Existing at the same time with another.

"The law of *co-existent* vibrations." — *Whewell.*

Co-exist'ing, *a.* Existing at the same time with another person or thing. (Always preceding *with*.)

Co-expand', *v. i.* To expand to an equal extent.

Co-extend', *v. a.* To extend equally; to extend through the same space or duration with another.

"Every motion is, in some sort, *co-extended* with the body moved." — *Grew.*

Co-exten'sion, *n.* Act or state of extending through the same space or duration with another.

Co-exten'sive, *a.* Having equal extent with another. "Consciousness is not *co-extensive* with knowledge." — *Hamilton.*

Co-exten'sively, *adv.* Of equal extent.

Co-exten'siveness, *n.* Equally extensive.

Coeymans, in *New York*, a post-village of Albany co.; *pop.* 3,077.

Coeymans Hollow, in *N. York*, a P.O. of Albany co.

Côfer, *n.* (*Mining*.) A small wooden trough, used by the Cornish miners to receive the tin when cleansed from its slime or impurities.

Coff, *n.* A term used by English fishermen to denote the offal of pilchards.

Coffachique', or **COFACHIQUE**, in *Kansas*, a village of Allen co., on the Neosho River, abt. 6 m. N. of Humboldt.

Coffade'liah, in *Mississippi*. See **COFFODELIAH**.

Coffea, *n.* [Probably from *Cassa*, a province of Abyssinia.] (*Bot.*) A genus of plants, order *Cinchonaceæ*.

The species *C. arabica* is the coffee-plant, or *cahwa* of the Arabs, the seeds of which, when roasted and ground, are used to prepare the daily and most cherished drink of probably more than a hundred millions of human beings. The plant is said to be a native of Arabia Felix and Southern Abyssinia. From the former region it has been carried to various countries within the tropics, and at the present time it is cultivated wherever the climate is suitable. In some countries it seldom attains a greater height than 8 or 10 feet; but in others, its average height, when full-grown, is from 15 to 20 ft. It is covered with dark, smooth, shining, and evergreen foliage. It is raised from the seed in nurseries, and is transplanted when about 6 months old. In 3 years, it comes into full bearing, and, under favorable circumstances, will continue to bear for 20 years. It blossoms throughout the year, so that mature fruit and opening flower-buds may be seen at the same time. The roasted seed or bean has been used to form a beverage in Abyssinia from time immemorial. In Persia it is known to have been in use as early as the year 875. From Abyssinia it was introduced into Arabia in the beginning of the 15th century, and about the middle of the following century it began to be used in Constantinople, where, in spite of the violent opposition of the priests, it soon became an article of general consumption. In 1652, the first London coffee-house was opened in George Yard, Lombard Street, by a Greek named Pasqua; and 20 years after, the first in France was established at Marseilles. Its culture was introduced into Java from Arabia by the Dutch between 1680 and 1690, and it was thence extended throughout the East India islands. In 1715, Louis XIV. received from the magistrates of Amsterdam a fine coffee-tree, then bearing both green and ripe fruit. This, according to Du Tour, was the stock of the West India coffee. Since the middle of the 18th century, both the culture and consumption of coffee have continually increased. The U. S. imported in the year 1895, 652,208,975 lbs., valued at \$96,130,717. The Arabia or Mocha coffee is small, and of a dark yellow color; the Java and East India are larger and of a paler yellow; the Ceylon, West India, and Brazilian (or Rio), have a bluish or greenish-gray tint. The best coffee of commerce is the Mocha, and next to this the Java; but the principal supply of the U. States is derived from Brazil, which furnishes 75 per cent. of the whole import. C. owes its valuable properties chiefly to the presence of an alkaloid called *caffeine*, and a volatile oil. It is remarkable that tea should contain precisely the same principle, *theine* and *caffeine* being identical. The sensible properties and effects of C. like those of tea, are too well known to require to be stated in detail. It exhilarates, arouses, and keeps awake; it counteracts the stupor occasioned by disease, by fatigue, or by opium; it allays hunger to a certain extent; gives to the weary increased strength and vigor, and imparts a feeling of comfort and repose. Its physiological effects upon the system, so far as they have been investigated, appear to be, that, while it makes the brain more active, it soothes the body generally, makes the change and waste of matter slower, and the demand for food in consequence less. In Sumatra and some of the neighboring islands an infusion of the roasted leaf is used as a substitute for tea, and is called coffee-tea. The leaf contains the same principles as the seed, and therefore has analogous properties. Besides the real *C. Arabica*, some other species are cultivated for their seeds; as, *C. Ghennalensis*, grown in Nepal; *C. Mozambicana*, on the coast of Mozambique; and *C. Mauritanica*, in the Mauritins.

Coff'ee, *n.* [Ar. *cahwa*, from *kāwal*, strength, vigor; Turk. *cahach*; Du. *colij*; Ger. *kaffee*; Fr. *café*; It. *caffè*] The seeds of the *coffea*, or coffee-tree. — Also the invigorating beverage made by a decoction from those seeds roasted and ground. — See **COFFEE**.

Coffee, in *Alabama*, a S. co. bordering on Florida. *Area*, abt. 900 sq. m. It is intersected by the Pea River. The

Fig. 641. — COFFEA ARABICA.

surface is moderately uneven; the soil mostly sandy and unproductive. Pine timber is abundant. *Cap. Elba. Pop.* (1895) 14,000.

Coffee, in *Georgia*, a S. co. *Area*, abt. 1,000 sq. m. It is bounded on the N. by the Ocmulgee River, on the S. W. by Allapaha, and also drained by the Satilla River. The surface is nearly level, and the soil sandy. *Cap. Douglas.*

Coffee, in *Indiana*, a post-office of Clay co.

Coffee, in *Tennessee*, a S.E. co. *Area*, abt. 360 sq. m. It is drained by the head streams of Duck River. The surface is diversified and elevated, the county occupying the lower plateau of Cumberland Mountain. The soil is fertile. *Cap. Manchester.*

Coffee-colored, *a.* Having a brownish tint like that of a mixture of coffee and milk, or *café au lait*.

Coffee-house, *n.* [Fr. *café*.] A house where coffee and other refreshments are supplied; a house of public entertainment; an inn.

Coffee Landing, in *Tennessee*, a P.O. of Hardin co.

Coffee-man, *n.* The keeper of a coffee-house.

"Did you ever hear that they preferred a *coffee-man* to Agestilaus?" — *Addison.*

Coffee-mill, *n.* An apparatus for grinding coffee.

Coffee-pot, *n.* A covered pot in which coffee is boiled or in which it is served at table.

Coffee-room, *n.* A public room in an inn or hotel where guests are supplied with coffee or other refreshments; a reading-room.

Coffeeville, in *Alabama*, a post-village and township of Clarke co., on the E. bank of the Tombigbee River. 131 m. S. by W. of Tuscaloosa.

Coffe'ville, in *Mississippi*, a post-village, cap. of Yalobusha co., 130 m. N. by E. of Jackson; *pop.* abt. 800.

Coff'er, *n.* [Fr. *coffre*; Ger. *koffer*; Gael. and Ir. *kofra*, armor; *koufr*, from *kof*, the belly; W. *caf*, a void or hollow.] A hollow trunk; a chest or box; specifically, a chest used as a repository for money or other valuables.

"The lining of his *coffers* shall make coats To deck our soldiers for these Irish wars." — *Shaks.*

—(Used figuratively.) *Treasure*; funds; bullion.

"He would discharge it without any hurthen to the queen's *coffers*." — *Bacon.*

—A lock for receiving a barge.

(*Arch.*) A sunken or deeply indented panel in a dome (*Fortif.*) A particular kind of *CAPONIERE*, *q. v.*

—*v. a.* To deposit in a *coffer*, as money.

"Treasure, as a war might draw forth, so a peace succeeding might *coffer* up." — *Bacon.*

Coffer-dam, *n.* (*Civil Engineering*.) A hollow space formed by a double range of piles, made water-tight with clay rammed in between, for the purpose of constructing an entrance-lock to a canal, dock, or basin, or for the piers of a bridge. See **SECTION II**.

Cofferer, *n.* One who deposits in a *coffer*. *Cofferer of the Royal Household*. In England, a former officer of state, subject to the comptroller, charged with the supervision of the subordinate officers of the household. This office is now absorbed in that of *Treasurer of the Household*.

Cof'fey, in *Kansas*, a S. E. co. *Area*, abt. 576 sq. m. It is intersected by the Neosho River, which divides it into two nearly equal parts, and also drained by several creeks. The surface is undulating, and the soil very fertile, being made up of extensive prairie lands, and has a growth of timber along its streams; coal and limestone are abundant. *Cap. Burlington. Pop.* (1890) 15,752.

Coff'in, *n.* [Fr. *coffre*, a *coffer*; O. Fr. *cofin*, a basket, from Lat. *cophinus*, Gr. *kophinos*, a basket; A. S. *cof*, a cove, a cave, a repository.] The chest, box, or case in which a dead human body is buried or entombed.

"The ship their *coffin*, and the sea their grave." — *Waller.*

—Anything hollow, or which incloses in the manner of a *coffin*.

(*Cookery*.) The raised mould of paste for a pie.

"Of the paste a *coffin* will I rear, And make two pasties of your shameful heads." — *Shaks.*

—A conical paper case used by grocers, for holding sugar, &c.

(*Farriery*.) The hollow part of a horse's hoof.

(*Mining*.) A term applied in Cornwall, Eng., to old tin-workings which were all worked open to grass, without any shafts, by digging and casting up the thin stuff from one stall of boards to another.

—*v. a.* To put into, or inclose in, a *coffin*; to confine; to cover.

Coffin-bone, *n.* (*Farriery*.) The foot-bone of a horse, enclosed within the *coffin* of the hoof.

Coff'inless, *a.* Without a *coffin*.

Coffin's Grove, in *Iowa*, a post-township of Delaware co., 60 m. N. of Iowa City.

Coffin's Island, in the *Gulf of St. Lawrence*, one of the Magdalen Islands; Lat. 44° 3' N., Lon. 64° 36' W. It is the largest of the group, being 25 m. long, and, in some places, 3 m. wide.

Coffle, (*kōf'l*) *n.* [Ar. *kafala*, a caravan of persons.] A gang of African slaves sent to market.

Coffode'liah, in *Mississippi*, a post-village of Neshoba county.

Co-found'er, *n.* A joint founder.

Cog, *v. a.* [W. *cogiaw*, to make void, to deceive; from *cog*, empty, vain.] To delude; to wheedle; to seduce by artifice; to soothe by adulation.

"I'll mountebank their loves, Cog their hearts from them, and come home beloved." — *Shaks.*

—To obtrude by deception or falsehood.

"Fustian tragedies . . . have been *cogged* upon the town for master-pieces." — *Dennis.*

To cog a die. To cheat in playing dice; to secure a die so as to direct its fall.

"But then my study was to cog the dice." — *Dryden.*

c. To deceive; to cheat; to lie; to wheedle.

Mrs. Ford, I cannot cog; I cannot prate, Mrs. Ford."—*Shaks.*

Cog, *n.* [Swed. *kugg*, the cog of a wheel; Swed. and Goth. *kugg*, a prominence, a cog.] The wooden tooth of a large wheel. Cog teeth are formed of different material from the body of a wheel: a timber tooth on a cog-wheel is one made of wood, when the teeth stand perpendicularly to the plane of the wheel.

a. To fix a cog into the rim of a wheel; to furnish with cogs.

Cog, *n.* [W. *cawg*; Gael. *cogan*; Swed. and Goth. *kogg*, a kind of boat.] A kind of yawl or fishing-boat.

Cogan House, in Pennsylvania, a post-township of Wyoming co.

Cogency, *n.* [Lat. *cogens*, from *cogo*—*con*, and *ago*, to drive.] Quality of being cogent; urgency; united force; strength; conviction; compelling power; moral or logical force.

Cogent, *a.* Forcible; resistless; powerful; urging.

"The cogent force of nature."—*Prior.*

Convincing; pressing on the mind; forcible; demonstrative; having the power to compel conviction; as, a cogent answer.

"This most cogent proof of a deity."—*Bentley.*

Cogently, *adv.* With resistless force; forcibly; convincingly.

Cogger, *n.* One who practises cogging; a wheedler; a flatterer.

Cogery, *n.* Deception; dissimulation; artifice; falsehood.

Cogle, *n.* A small stone. See COBBLE.

small boat. See Cog.

Cogitability, *n.* Conceivableness; capacity of being edited.

Cogitable, *a.* [Lat. *cogitabilis*.] That which may suggest thought, conception, or meditation.

Cogitabund, *a.* [Lat., from *cogitare*, to think.] Full of thought. (B.)

Cogitate, *v. i.* [Lat. *cogitare*.] To think; to meditate; reflect; to engage in earnest and protracted thought. He that employeth the faculty of his fancy, also cogitateth."—*Bacon.*

Cogitation, *n.* Act of thinking; thought, meditation, or reflection; contemplation.

"His cogitative faculties immersed
In cogitabundity of cogitation."—*Carey.*

Cogitative, *a.* Thinking much; having the power of thinking, meditating, or reflecting; as, "cogitative substance."

Even to thought and deep meditation; as, a "cogitative nature."

Cogman, *n.* A vender of coarse cloths.

Cognac, (*kô-ne-yâk*.) a town and river-port of France, p. Charente, cap. arrond., on the navigable river Charente, 22 m. W. by N. of Angoulême. The brandy for which this town is celebrated, and which is everywhere known by its name, is made from white wine, that made from red wine being very inferior. In good years, wine yields about 1-5th parts of its volume of *eau-de-vie*, whereas, in bad years, it does not yield more than from 10th to 1-11th part. All the brandy of Charente is sold under the name of *Cognac*; but the best qualities are produced in the canton of that name, and in those Blansac, Jarnac, Rouillac, Aigre, and Ruffec. Francis of France was B. here, in 1494.

Cognate, (*kog-nât*.) *a.* [Lat. *cognatus*—*con*, and *natus*, to be born.] Sprung from the same source; allied by blood or birth; akin.—Related to in origin; the same nature; allied by natural affinity; as, a cognate idea.

(*Law.*) In civil and Scots law, a relation through a female side. One related to another by blood relationship.—Any of a kindred origin to another; as, a cognate letter.

Cognateness, *n.* Cognation; state of being cognate.

Cognati, *n. pl.* [Lat.] (*Law.*) Collateral heirs through males; relations in the line of the mother.

Cognition, *n.* [Lat. *cognatio*.] Kindred; relation

descent from the same source. Natural affinity; participation of the same nature.

(*Law.*) Consanguinity between persons descended from the same parents;—used in contradistinction to

COGNATION, *q. v.*

Cognition, *n.* [Lat. *cognitio*, from *cognosco*, *cognitus* *con*, and *nosco*, to know.] A taking pains to acquire knowledge or information.—Knowledge, or complete conviction, as from personal view or experience.

"I will not be myself, nor have cognition
Of what I feel."—*Shaks.*

Cognitive, *a.* Having the power of knowing or apprehending by the understanding.

Cognizable, *a.* [Fr. *connaissable*.] That may be known, perceived, or apprehended; that falls or may fall under notice or observation.—That which may be tried, tried, or determined judicially; as, a cognizable offence.

Cognizably, *adv.* In a cognizable manner.

Cognizance, *n.* [Fr. *connaissance*.] Knowledge; observation; perception; comprehension; recognition.

Judicial notice, knowledge, or jurisdiction; trial, or right to try and determine; as, the cognizance of the law. (*Her.*) A crest, coat of arms, or similar badge of distinction, appertaining to a person or family.

(*Law.*) An acknowledgment of a fine, of taking a distress, &c.—The power which a court has to hear and determine a particular species of suit.

Cognizant, *a.* Having knowledge of; as, to be cognizant of a mischief.

Cognomen, *n.* [Lat. *con*, and *nomen*, name.] The last of the three names by which all Romans, at least those of good family, were designated, e. g., *Publius Virgilius Maro*. It served to mark the house (see *FAMILIA*) to which they belonged, as the other two names, viz. the *prænomen* (*Publius*), and *nomen*, served respectively to denote the individual and the class (see *GENS*) to which his family belonged.

Cognominal, *a.* [Lat. *con*, and *nominalis*, from *nomen*.] Pertaining to a cognomen or surname.

Cognominatio, *n.* [Lat. *cognominatio*.] A surname, or family name.

—A name added to a nomenclature proper, by some accident or quality.

"Pompey deserved the name Great; Alexander, of the same cognominatio, was generalissimo of Greece."—*Brown.*

Cognoscence, *n.* [L. Lat. *cognoscentia*.] Knowledge; act or state of knowing.

Cognoscente, *n.*; *pl.* COGNOSCENTI. [It., from Lat. *cognoscere*, to know.] A connoisseur; a virtuoso; a person of much knowledge. (Generally in the plural.)

Cognoscibility, *n.* State or quality of being cognoscible.

Cognoscible, *a.* That which is known or noticed.—Susceptible to judicial observation and jurisdiction; as, a cognoscible crime.

Cogno-vit, *n.* [See COGNITION.] (*Law.*) A confession whereby a defendant admits that the plaintiff's cause of action against him is just (*cogno-vit actionem*), and suffers judgment to be entered against him without trial.

Cogs'well, in Illinois, a village of McHenry co., 140 m. N.N.E. of Springfield.

Cog-tooth, *n.* (*Mach.*) See Cog.

Cog-guardian, *n.* A joint guardian; one who is guardian in association with another.

Cogue, (*kôg*.) *n.* [See Cog.] A small wooden vessel.

Cogware, *n.* A kind of coarse frieze worn by the English peasantry in the 16th century.

Cog-wheel, *n.* (*Mach.*) An iron wheel with wooden teeth or cogs.

Cohabit, *v. i.* [Lat. *con*, and *habito*, to dwell.] To dwell or live together; to dwell with or live together; to inhabit and abide in company in the same place.

"The Philistines . . . were not able to cohabit with that holy thing."—*South.*

—To live together as husband and wife, though not legally married.

"He knew her not to be his own wife, and yet had a design to cohabit with her as such."—*Fiddes.*

Cohabitant, *n.* [Lat. *cohabitans*.] One who resides with another; an inhabitant of the same place.

"The oppressed Indians protest against that heaven where the Spaniards are to be their cohabitants."—*Decay of Piety.*

Cohabitation, *n.* Act or state of cohabiting, as man and wife; state of inhabiting the same place with another.

Cohabiter, *n.* A cohabitant; one who resides with another.

Cohahuila, in Mexico, a state bounded on the E. and N.E. by the Rio Bravo del Norte, (which separates it from Texas,) E. by Nuevo Leon, S. by Zacatecas, and W. by Chihuahua and Durango, bet. Lat. 24° 17' and 30° 5' N., and Lon. 100° and 104° W.; length 390 m.; greatest breadth 270 m. Area, 56,370 sq. m. The vegetation is in general scanty, and the soil is nowhere extensively cultivated. Cap. Saltillo. Pop. 67,691.

Cohahuila, or MONTELOVEZ, in Mexico, a town of the State of Cohahuila, about 150 m. N. of Monterey; pop. 4,000.

Cohansey, in New Jersey, a river rising in the S.E. part of Salem co., flows first S., and then W. falls into Delaware Bay in Cumberland co.

Cohansey, in New Jersey, a township of Cumberland co.; merged in 1868 in Bridgeton township.

Cohasset, in Massachusetts, a post-township of Norfolk co., 15 m. S.E. of Boston.

Co-heir, *n.* [Lat. *coheres*—*con*, and *heres*, an heir.] A joint heir; one who inherits along with another or others; as, co-heirs in Christ.

Co-heiress, *n.* A joint heiress.

Co-herald, *n.* A joint herald.

Cohere, *v. i.* [Lat. *cohereo*—*con*, and *heres*, to stick, to cleave.] To stick, cleave, or hang together; to hold fast together by mutual attraction; to remain in contact; to adhere, as parts of the mass.

"None want a place for all, their centre found,
Hung to the goddess, and coher'd around."—*Pope.*

—To be suited in connection or by sympathy; to be fitted or suitable; to follow regularly in order, as a discourse.

"Had time coher'd with place, or place with wishing."—*Shaks.*

Coherence, **Coherency**, *n.* Union of parts of the same body, or a cleaving together of two bodies, by means of attraction.

"The middle degrees between extreme fixedness and coherency."—*Bentley.*

—Connection; dependence; consistency; cohesion; mutual relation of parts or things to each other; as, a "coherence of discourse."—*Locke.*

Coherent, *a.* Sticking or cleaving together, as the parts of bodies, solid or fluid.

"Where all must fall, or not coherent be."—*Pope.*

—Connected; united; consistent; observing due order and arrangement.

"A coherent thinker and a strict reasoner is not to be made at once by a set of rules."—*Watts.*

—Suitable or suited; regularly adapted.

"Instruct my daughter,
That time and place . . . may prove coherent."—*Shaks.*

Coherentific, *a.* Pertaining, or inducing cohesion; as, "coherentific force."—*Coleridge.*

Coherently, *a.* In a coherent or connected manner.

Cohesibility, *n.* Cohesiveness; cohesion.

Cohesible, *a.* [See COHERE.] That which is able to cohere.

Cohesion, *n.* [Fr. *cohésion*; Lat. *con*, and *hæreo*, hæsum, to stick, to cleave.] Act of sticking together; state of being united by natural attraction.—Connection; dependence; coherence; as, "natural cohesion of ideas."—*Locke.*

(*Physics.*) The force or attraction with which the particles of homogeneous bodies are kept attached to each other, or with which they resist separation. Cohesion is thus distinguished from *adhesion*: the latter term denoting the attractive force existing between two different bodies brought into contact, as a drop of water on a plate of glass; or between two bodies of the same matter, as two lumps of lead when their smooth surfaces have been pressed together. The three different forms which matter assumes—solid, liquid, and gaseous—are determined by the degree of cohesive force existing among the elementary particles. In solids this force is greatest, and, in fact, is that which causes solidity; in liquids it is less powerful, but still sufficiently manifest in the drops or globular forms assumed by small quantities of water or mercury poured on a table. In the case of æriform fluids, it may be regarded as negative, the particles having a tendency to repel each other. The cohesive force of the elementary particles of matter depends on the distances of the particles from each other; but of the law according to which its intensity increases or diminishes nothing is known, excepting that the force decreases rapidly as the distance increases, and vanishes altogether when the distance becomes so great as to be appreciable to the senses. It is a problem of very great importance to determine the cohesive power of the materials employed in mechanical structures. Many experiments have been made for this purpose; and their results have not only a practical utility, but throw much light on the constitution of bodies. When a bar of metal, a beam of wood, or a rope, is stretched lengthwise, the tension which it bears, or the cohesive power exerted, is equal to the accumulated attraction of all the particles in any transverse section. The longitudinal distention which takes place before disruption is at first proportional to this attraction, but afterwards increases in a more rapid progression. A bar of soft iron will stretch uniformly by continuing to append to it equal weights till it be loaded with half as much as it can bear; beyond that limit, however, its extension will become doubled by each addition of the eighth part of the disruptive force. Suppose the bar to be an inch square, and 1,000 inches in length; 36,000 lbs. avoirdupois will draw it out one inch, but 45,000 lbs. will stretch it 2 inches, 54,000 lbs. 4 inches, 63,000 lbs. 8 inches, and 72,000 lbs. 16 inches, where it would finally break.

Cohesive, *a.* That has the power of sticking or cohering; tending to unite in a mass, and to resist separation.

Cohesively, *adv.* In a cohesive manner.

Cohesiveness, *n.* Quality of cohering, or being cohesive; act of adhering together, as two natural bodies.

Cohoc'tah, in Michigan, a post-township of Livingston co., abt. 28 m. E. of Lansing.

Cohoc'ton, in New York, a twp. of Steuben co.

Cohoes, in New York. See CAHOES.

Cohorn, *n.* See COEBORN.

Cohorn, MENNO, BARON VAN, an engineer, surnamed the Dutch Vauban, b. at Friesland, 1641. The fortifications at Bergen-op-Zoom are considered his masterpiece. D. 1704.

Cohort, *n.* [Lat. *cohors*, *cohortis*; anciently, *chors*; allied to Gr. *choros*, an inclosed place; Fr. *cohorte*.] (*Rom. Antiq.*) A company of soldiers numbering about 500 men, or the tenth part of a legion. The *Prætorian C.* was a body of picked troops who attended the general, and is said to have been first instituted by Scipio Africanus.

—A body of warriors. (Used poetically.)

"And his cohorts were gleaming in purple and gold."—*Byron.*

Cohutta Springs, in Georgia, a post-village of Murray co., at the base of the Cohutta Mountain, 90 m. N. by W. of Atlanta.

Coif, *n.* [Fr. *coiffe*; Armor. *koef*, hood; Lat. *caput*, Gr. *képhale*, the head; Sansk. *kapāla*.] A kind of cap, cap, or covering worn on the head; as, a judge's coif.

—*r. a.* To cover or dress with a coif.

Coiffure, *n.* [Fr., from *coiffe*. See COIF.] A head-dress.

"I am pleased with the coiffure now in fashion."—*Addison.*

Coigne, (*koin*.) *n.* See COIGN.

Coigue, *n.* Money obtained by extortion. (A term formerly used in Ireland.)

"Extortion of coigne, and livery, and pay."—*Davies.*

Coil, *v. a.* [Fr. *cueillir*; Lat. *colligo*—*con*, and *lego*, to gather.] To gather, as a line or cord, into a circular form; to wind into a ring, as a rope or serpent; as, to coil a hawser.

—*n.* A rope gathered into a ring; a convolution of a series of rings into which a thing is wound; as, the coils of a grape-vine.

—Tumult; turmoil; bustle; confusion; noise.

"When we have shuffled off this mortal coil."—*Shaks.*

Coil of a gun. Is formed by winding a bar of iron, at a welding heat, round a mandrel, which is afterwards removed. The rough coil so formed is welded, bored, and turned to the required size. A great part of the Armstrong gun is formed of these coils.

Coila, in New York, a P. O. of Washington co.

Coiling, *n.* (*Naut.*) A serpentine winding of ropes, &c., by which they occupy but a small space, and are not liable to be entangled in working the sails of a ship.

Coimbatore, a British prov. of S. Hindostan, pres. Madras, between Lat. $10^{\circ} 8'$ and $12^{\circ} 40' N.$, and Lon. $76^{\circ} 50'$ and $78^{\circ} 10' E.$, having N. the Mysore dominions, E. Salem and the Carnatic, and W. Cochin and Malabar. *Surface*. Generally open and flat; but skirted by the Ghats and Neigherry hills. *Prin. Rivers*. Cavery, Bowany, &c. *Soil*. Fertile, producing rice and tobacco. *Climate*. Healthy and pleasant. *Min.* Salt and nitre. *Manuf.* Coarse cloths. In parts of this prov. the ox is worshipped by the natives. *Cap.* Coimbatore. *Pop.* Estimated at 1,000,000.

COIMBATORE, an inland town of S. Hindostan, and cap. of above prov., on an affluent of the Cavery, 90 m. S.S.E. of Mysore, and 270 S.W. of Madras; Lat. $10^{\circ} 52' N.$, Lon. $77^{\circ} 5' E.$ It is tolerably well built, and has a mosque built by Tippoo Saib, who sometimes resided here. In 1783, *C.* was taken by the British.

Coim'bra, a walled city of Portugal, prov. Beira, built on a steep precipice, 115 m. N.N.E. of Lisbon. This is a very ancient, ill-built, dirty place, but possesses a good university, which is the only one in Portugal. *Manf.* Earthenware, woollens, and linen cloths. *Pop.* 18,147.

Coin, *n.* [Sp. *cuña*; Fr. *coin*, a corner, a die, a wedge; L. Lat. *coinus*, a die for stamping money; Lat. *cuneus*, a wedge.] Money stamped; a piece of metal, as gold, silver, copper, &c., legally stamped, and made current as money. See MONEY, and NUMISMATICS.

—That which serves for payment or compensation.

"The loss of present advantage to flesh and blood is repaid in a nobler coin."—Hammond.

(Building and Arch.) See QUOIN.

—A wedge. See QUOIN.

—*v. a.* To stamp a piece of metal legally, and convert it into money; to mint; to fashion or form by stamping; as, to coin silver.

—To make; to invent; to forge; to fabricate; to originate; as, to coin an idea, to coin a falsehood.

"A term is coined to make the conveyance easy."—Atterbury.

Coin'age, *n.* The act, art, or practice of stamping metallic money. See MINT.

"Gold pieces of different coinages."—Sir W. Scott.

—Metal legally stamped and rendered current as money; coin; coins of a particular stamp.

"This is believed to be a coinage of some Jews."—Broune.

—Expense or cost of coining money.

—New production; invention; fabrication; as, coinage of words.

"This is the very coinage of your brain."—Shaks.

Coincidence, *n.* Many symptoms betokening the same cause.

Coincide, *v. i.* [Fr. *coincider*, from Lat. *coincido*—*con*, in, and *cado*, to fall.] To fall in or meet and agree together, as two things; to fall upon and agree with the same point, line, or surface; to agree in position;—sometimes before *with*.

"If the equator and the ecliptic had coincided, it would have rendered the annual revolution of the earth useless."—Cheyne.

—To concur; to agree with; to be consistent with; as, to coincide in opinion.

"The rules of right judgment, and of good ratiocination, often coincide with each other."—Watts.

Coincidence, *n.* Act of coinciding, or agreeing in position; as, "the coincidence of infinite centres."

—Act of concurrence; consistency; agreement; correspondence of events, &c.

"A 'strange coincidence,' to use a phrase.

By which such things are settled now-a-days."—Byron.

Coincidence, *n.* Coincidence.

Coincident, *a.* [Lat. *coincidentes*.] Having coincidence; falling on the same point; meeting and agreeing, as lines, surfaces, or bodies; concurrent; corresponding; consistent; accordant;—often followed by *with*.

"Coincident with the ruling principles of a virtuous man."—South.

Coinciden'tal, *a.* Coincident; having a coincidence.

Coincidentally, *adv.* In a coincident manner; with coincidence.

Coincider, *n.* One who, or that which, coincides.

Coin'er, *n.* A person employed in a mint in the making of money.—A fabricator of base or counterfeit coin.

"They had acquired a less honorable renown as coiners of bad money."—Macaulay.

—One who invents or newly produces; as, a coin'er of etymologies.

Co-inhabitant, *n.* A person dwelling with another, or with others.

Co-inheritance, *n.* Joint inheritance.

Co-inheritor, *n.* A co-heir; one who inherits jointly with another.

Coin'ing, *n.* The act or art of stamping metal into money; coinage.—In a modern sense, it is generally interpreted to signify the act of fabricating bad or counterfeit money.

"They cannot touch me for coining: I am the king."—Shaks.

Coin'joek, in *N. Carolina*, a P. O. of Currituck co.

Co-instantaneous, *a.* Happening at the same instant.

Coir, *n.* See COCOA-NUT FIBRE.

Coire, in Switzerland. See CHUR.

Cois'tril, *n.* [Probably a corruption of KESTREL, *q. v.*] A mean young fellow; a poltroon; a knave.

"He's a coward and a cois'tril that will not drink to my niece."—Shaks.

Coit, *v.* and *n.* See QUOIN.

Coition, (*ko-ish'un*), *n.* [Lat. *coitio*—*con*, and *co, itum*, to go.] A coming or meeting together; copulation; sexual intercourse.

Coits'ville, in *Ohio*, a post-township, forming the N.E. extremity of Mahoning co.

Co'ix, *n.* [Lat. and Gr., a palm.] (*Bot.*) A genus of tropical plants, order *Gramineæ*. The hard stony fruits of *C. lachryma*, Job's-tears, have been supposed to be strengthening and diuretic.

Co-join, *v. a.* and *v. i.* To associate; to connect; to join together; to conjoin.

Co-ju'ror, *n.* A fellow-juror; one who swears to another's credibility.

Cojutepec, (*ko-hoot'-peik*), a town of San Salvador, Central America. It is situated 15 m. S. of the city of San Salvador. *Pop.* 15,000.—At the distance of a few miles, a lake of the same name measures 12 m. in length, by 5 m. in average breadth; and in windy weather it assumes a green hue, often casting on its shores vast quantities of dead fish.

Coke, (*kök*), *n.* [Probably from Lat. *coquo*, to cook, to bake, to burn, to parch; Ice. *koek*, a cook; Swed. and Goth. *koka*, to cook.] Mineral coal burned to charcoal, or fossil coal charred and deprived of volatile matter. The most valuable of the secondary products of a gas establishment is *C.* The best kind is obtained from coal when carbonized in large masses, in ovens constructed on purpose. In a gas manufactory, the production of *C.* being of minor importance to the formation of good gas, it is generally of an inferior quality to that made in coke-ovens, where it is the primary, and indeed sole object for which the coal is carbonized. But gas-coke is excellent for many purposes in the arts and manufactures, producing a clear fire as that of the first quality, though it is neither so lasting nor so free from slag; for domestic use, however, it is unobjectionable, and may be burnt both in the drawing-room and kitchen with economy and comfort. The distinguishing characters of good *C.* are: First, a clean, granular fracture in any direction, with a pearly lustre, inclining to that exhibited by cast-iron. Secondly, density, or close proximity of its particles, which adhere together in masses, and a specific gravity of 1.10, or rather higher. Thirdly, when exposed to a white heat, it consumes entirely away, without leaving either slag or ashes. It is invariably the case that the quality of the *C.* is inversely as that of the gas. The manufacturer must not expect to produce both of the best quality. The process by which the best gas is made generally leaves the *C.* light, spongy, and friable, although an increase of quantity is gained; for the simple reason, that the degree of heat and other circumstances required to form perfect *C.* must be entirely changed when gas of a high specific gravity is to be obtained. Thus large masses of coal exposed to a red heat in close vessels are acted upon by slow degrees, the external portions preventing heat from penetrating into the interior until most of the bituminous portions are given off in condensable vapor, or as charcoal and free hydrogen; the after products being light carburetted hydrogen, carbonic oxide, and carbonic acid gases. The residue is a carbon of a dense granular composition.

—*v. a.* To convert into coke, as coal.

Coke, SIR EDWARD, an eminent English legist, and institutional writer, b. in Norfolk, 1552. He was called to the bar in 1578. Next year he began his career of fame and practice by being appointed recorder of Lyons Inn. He was appointed recorder of Norwich in 1586, and of London in 1592. He had not, however, held the office for a year, when he resigned it on being appointed solicitor-general. In 1594 he became attorney-general. He had in such difficult times much very serious and laborious business to transact as a crown lawyer. He has been subject not unjustly to reproach for his overbearing and insulting demeanor to the unfortunate victims of the crown prosecutions, and especially towards Sir Walter Raleigh. He was a man of haughty manners, severe spirit, and irritable temper, and he had little toleration for anything standing in the path of what he deemed his duty. But his severity was not dictated by subserviency to the court, and no influence in the corrupt reign of James could prompt him to go out of the line of his duty. He was made chief-justice of the common pleas in 1606, and of the king's bench in 1613. After spending his old age in wealthy retirement, he died in 1633. His celebrated *Institutes of the Laws of England*, which grew out of a commentary on "Littleton's Treatise on Tenures," has made him the great oracle of English law. His expressions, however antiquated they may appear, are deemed sacred, and are always embodied where their substance has not been superseded by changes of the law, in the works of subsequent commentators.

Coker Creek, in *Tennessee*, a village of Monroe co., 155 m. E.S.E. of Nashville.

Co'ker-nut, *n.* (*Com.*) A corrupted spelling of COCOA-NUT, *q. v.*

Cokesbury, in *S. Carolina*, a village and township of Abbeville district, 50 m. S. of Greenville.

Col, *n.* [Fr., a neck.] The name, with various postfixes, of many passes across the Alps of Savoy and Piedmont; as, the *Col de Balme*.

Colamo'ka, or KOLEMOKEE CREEK, in *Georgia*, traverses Early co., and enters the Chattahoochee River a few m. below Fort Gaines.

Col'ander, *n.* [Lat. *colum*, a strainer, a vessel for straining; *colo, colatus*, to filter, to strain.] A culinary utensil used for straining liquors, &c.; a sieve.

Colapoor, a small rajahship of Hindostan, pres. Bombay, divided by the W. Ghats, ceded to Great Britain in 1829.—COLAPOOR, cap. of above dist., in a semi-circular valley, 125 S.S.E. of Poona; Lat. $16^{\circ} 19' N.$, Lon. $74^{\circ} 25' E.$ The town is neatly built and well fortified.

Col'ar, a town of Hindostan, in Mysore, 40 m. N.E. from Bangalore, in Lat. $13^{\circ} 8' N.$, Lon. $78^{\circ} 10' E.$ It contains about 700 houses.

Col ar'co, [It.] (*Mus.*) With the bow, in contradistinction to *pizzicato*.

Col'arin, *n.* (*Arch.*) The small frieze of the capital the Tuscan and Doric column, placed between the triglyph and the annulets.

Cola'tion, *n.* The act of filtering or straining liquor passing it through a colander, or other perforated utensil.

Co-lat'itude, *n.* The complement of the latitude, the difference between this and 90° .

Col'ature, *n.* Act of straining; colation.—The matter strained.

Col'berg, a fortified sea-port town of Prussia, reg. C. lin, in Pomerania, on the Persante, near its embouchure into the Baltic Sea. Shipping, and the salmon and lake prey fisheries form its chief sources of trade. *Pop.* 12,900.

Col'bert, JEAN BAPTISTE, MARQUIS DE SEIGNELAY, French statesman, b. at Rouen, 1619. He served his apprenticeship in a woollen-draper's shop, and afterwards went to Paris, where his talents introduced him to Mazarin, who soon employed him in most important affairs of state. On his death-bed, Mazarin warmly recommended *C.* to Louis XIV., who, in 1661, appointed him controller-general of finances. *C.*'s administration came a blessing to France. Order was restored in the finances, the revenue increased, and the royal treasury was soon enabled to furnish the means for foreign wars as well as for internal improvements. Commerce was extended, and roads and canals—including that of Languedoc—were made. He organized anew the colonies in Canada, Martinique, and St. Domingo, and found others at Cayenne and Madagascar. Made minister of marine in 1669, he found France with a few old rotten ships; three years later, she had a fleet of 60 ships of the line, and 40 frigates. *C.* improved the civil code, introduced a marine code of laws, as well as the so-called *Code Noir* for the colonies; and statistical tables of the population were first made out by his orders. While tending to material interests, he did not neglect the arts and sciences; all men of learning and genius found in *C.* a generous patron. The Academies of Inscriptions, Sciences, and Architecture were founded by him. In short, *C.* was the patron of industry, commerce, art, science, and literature—the founder of a new epoch in France. Notwithstanding the ingenuity of *C.*, the unbounded extravagance of his master led him to raise money in ways objectionable to his judgment, and to maintain wars in time of peace. He d. 1683, bitterly disappointed, because his great services were but ill appreciated by the king. The people, enraged at the oppressive tax which would have torn *C.*'s dead body in pieces, but for the intervention of the military, and his burial by night. Abate in his temper, repelling in his manners, and destitute of feeling in carrying out his plans, *C.* was, however, a great man, and posterity has placed him among the most eminent statesmen of any age or country.

COLBERT, JEAN BAPTISTE, MARQUIS DE SEIGNELAY, son of the above, b. 1651, succeeded his father as minister of marine, and minister of the king's household. By his capacity and energy, he raised the French navy to the highest power, and in 1684 he led in person the maritime expedition against Genoa. He d. 1690.

Col'bert, in *Mississippi*, a village of Lowndes co., on the Tombigbee River.

Col'burn, WARREN, an American mathematician, b. Dedham, Mass., 1793. He is the author of a series of valuable text-books on elementary mathematics, the best of which is his *First Lessons in Intellectual Arithmetic*. D. 1833.

Col'byville, in *Kentucky*, a post-village of Clarke co., 39 m. S.E. of Frankfort.

Colcha'gua, a dep. of Chili, lying mostly between Lat. 31° and $35^{\circ} S.$, stretching from the Andes to the Pacific Ocean; having N. and S. the departments of Santa Cruz and Maule. *Area*, 8,120 sq. m. Its plains are fertile and watered by the Maule and Maypu rivers. *P.* 142,438.

Col'chester, a borough, and sea-port of England, Essex, 50 m. N.E. of London. This is a very ancient flourishing place, and possesses some fine architectural remains. *Manf.* Silk. It has a large oyster-fishing trade and exports of corn and malt. In 1648, *C.* stood a memorable siege of 11 weeks against the parliamentary forces who eventually starved out the royalist garrison, and hung the leaders.

Col'chester, in *Connecticut*, a post-village and township of New London co., 20 miles N.W. of New London.

Colchester, in *New York*, a post-township of Delaware county, on the Popacton River, about 20 miles S. Delhi.

Colchester, in *Vermont*, a post-township of Chittenden county, on Lake Champlain, 35 miles N. W. of Montpelier.

Colchester, a co. of Nova Scotia, bordering on Miramichi and Colquid bays, and extending W. along Mines Channel to the Bay of Fundy. The interior is mostly level, though its shores are rocky. *Cap.* Truro. *Pop.* 23,331.

Col'chicine, *n.* (*Chem.*) An alkaloid obtained from and probably constituting the active principle of *Colchicum autumnale*.

Colchicium, (*kol'ishe-kum*) [After Colchis, its native country.] (*Bot.*) A genus of perennial plants, or *Melanthaceæ*. They are indigenous in most parts of Europe. The name *C.* is generally applied to the common bulb of the *Colchicum autumnale* or Meadow Saffron, which is largely collected for medical use. *C.* bears cuscus-like flowers in autumn, followed in spring by shining sword-shaped leaves. It was much employed formerly as a diuretic in dropsy; it then fell into disuse, but it has been recently again largely prescribed for the cure of gout, the fact having been ascertained that the co-

brated French remedy for gout, called *Eau Medicinale d'Hussou*, was a tincture of C.

Colchis, or COLCHOS, a former country of Asia, to the S. of Asiatic Sarmatia, E. of the Euxine Sea, N. of Armenia, and W. of Iberia. In ancient history it is famous for the expedition of the Argonauts, and for being the birth-place of Medea. It was fruitful in poisonous herbs, and produced excellent flax. In the 15th cent., it was subdivided into several principalities, and is now comprised in the Russian govt. of Trans-Caucasus.

Colcothar, *n.* (*Chem.*) A red oxide of iron, being the residue of the distillation of green vitriol and sulphate of iron.

old, *a.* [*A. S. cold; Frisian, kald; Icel. kaldr; Dan. kold; Ger. kalt; Swed. and Goth. kalt; Goth. kabl; Lat. gelidus, from gelu; Sansk. gila, cold, from root kil, to be cold.*] Not warm or hot: stiffening: gelid: frigid: deprived of heat; as, a cold diutier.

"And the cold marble leapt to life a god."—Dean Milman.

Chill: chilly: shivering; without the sensation of warmth; as, a cold day.

Having cold qualities: not volatile nor acrid: as, a cold plant.

Frigid: Indifferent: reserved: wanting in ardor, warmth, passion, zeal, or sympathy: spiritless: unconcerned: inactive; as, a cold heart.

"No cold relation is a zealous citizen."—Burke.

Stoical: unaffecting: exciting no interest or feeling: dull: ineffectual: wanting power of motion, stimulus, or excitement: as, a cold reply, a cold spectator.

"The cold neutrality of an impartial judge."—Burke.

Chaste: prudish: virtuous: free from vicious appetite; as, a cold coquette.

In cold blood. Deliberately, without hesitation, excitement, or passion: as, killed in cold blood.

Cold shoulder. Premeditated avoidance or neglect: as, to give an acquaintance the cold shoulder.

n. [*A. S. cele, cyl, cyle.*] Absence or privation of heat. See HEAT.

"Fair lined slippers for the cold."—Shaks.

Sensation produced by the escape of heat: cause of the sensation; coldness: chilliness.

"A deadly cold ran shivering to her heart."—Dryden.

(*Med.*) A disease or indisposition of the animal system occasioned by cold: a CATARRH, *q. v.*

old-blooded, *a.* Having cold blood. —Hard-hearted: without sensibility or feeling: callous: as, a cold-blooded murder.

oldbrook, *n.* In New York, a post-village of Herkimer co., 90 m. N.W. of Albany.

oldbrook Springs, *n.* In Massachusetts, a post-village of Worcester co., on a small stream of the same name.

old-chisel, *n.* A piece of steel flattened and sharpened at one end, which is properly tempered, so that it may be used for cutting metal.

old Cream, *n.* A term applied to a preparation of fatty substances, which is used as a mild and cooling dressing for the skin. It may be prepared by heating gently four parts of olive-oil, and one part of white wax, till a uniform liquid mass is obtained, when a little color and scent may be added: the mixture is then allowed to cool, but must be stirred the whole time, so as to prevent the concretion and consequent separation of the wax. Another variety is prepared with the addition of hog's lard, but the latter sometimes contains common salt, and is liable to become more or less rancid. C. C. softens the skin, and tends to promote the healing of wounds and of chapped hands.

old Creek, *n.* In Indiana, enters the White River, abt. 15 m. above Indianapolis.

old'en, *n.* In New York, a post-township of Erie co., abt. 20 m. S.E. of Buffalo.

old Fire Creek, *n.* In Alabama, traverses Pickens co., and falls into the Tombigbee River.

old Har'bor, *n.* In Virginia, a village of Hanover co., abt. 10 m. N.E. of Richmond. See COOL ARBOR.

old-hearted, *a.* Wanting feeling: indifferent: callous: insensible to passion or sympathy.

old-heartedness, *n.* Want of sensibility or warmth of feeling; indifference: callousness.

old-ish, *a.* Cool: somewhat cold.

old'itiz, or KOLDITZ, a town of Saxony, on the Mulde, 25 m. from Leipzig; pop. 5,000.

old'ly, *adv.* In a cold manner: indifferently: negligently: without animation, feeling, or expression.

"So idly spoken, and so coldly heard."—Bulwer Lytton.

old'ness, *n.* State or quality of being cold: want of heat: as, the coldness of ice.

"Dryness moistens, coldness heat resists."—Denham.

Frigidity of temper or disposition: disregard: unconcern: indifference; as, coldness of manner.

"It betrayed itself in . . . coldness to her best friends." Addison.

Chastity: coyness: prudery: exemption from sensual appetites.

"The sister stream her virgin coldness keeps."—Pope.

old-short, *a.* Brittle and impure when cold: as, cold-short iron.

old Spring, *n.* In Georgia, a village of Meriwether co., abt. 90 m. S.W. of Milledgeville.

old Spring, *n.* In Illinois, a township of Shelby co., abt. 25 m. N. by E. of Vandalia.

old Spring, *n.* In Kentucky, a township of Campbell county.

old Spring, *n.* In Massachusetts, a post-office of Middlesex co.

old Spring, *n.* In Minnesota, a post-village of Stearns co., on Sauk river, abt. 16 m. S.W. of St. Cloud.

Cold Spring, *n.* In Missouri, a post-village of Douglass co., abt. 150 m. N.W. of Jefferson City.

Cold Spring, *n.* In Missouri, a village of Phelps co.

Cold Spring, *n.* In New Jersey, a post-village of Lower township, Cape May co., abt. 10 m. S.S.W. of Cape May C. H.

Cold Spring, *n.* In New York, a township of Cattaraugus co.

Cold Spring, *n.* In New York, a post-village of Phillips-town township, Putnam county, on the Hudson River.

Cold Spring, *n.* In Pennsylvania, a P. O. of Wayne co.

Cold Spring, *n.* In Wisconsin, a post-village of Jefferson co., abt. 35 m. from Madison.

Cold Spring City, *n.* In California, a post-village of El Dorado co., abt. 5 m. W. of Placerville.

Cold Spring Harbor, *n.* In New York, a post-village, and port of entry of Suffolk co., on the bay of Long Island Sound, abt. 35 m. E. by N. of New York city.

Cold Spring Mills, *n.* In New York, a village of Stenben co., abt. 4 m. N.E. of Bath.

Coldstream, a border town of Scotland, co. Berwick-on-the-Tweed, 14 m. S.W. of Berwick-on-Tweed. This place was the scene of many memorable historical events. The ford of Tweed, so celebrated in history as the crossing-place of the former armies of England and Scotland, is in the vicinity. Pop. 1,834.

Coldstream, *n.* In W. Virginia, a post-village of Hampshire co., abt. 20 m. N.W. of Winchester.

Coldstream Guards, (*MIL.*) The oldest regiment of English Foot-Guards, raised by Gen. Monk, in 1660.

Coldwater, *n.* In Michigan, a fine manuf. city, cap. of Branch co., on the E. branch of Coldwater river, 115 m. W. by S. of Detroit. An important trading center; seat of State Public School. Pop. (1897) abt. 5,500.

Coldwater, *n.* In Missouri, a post-village of Wayne co.

Coldwater, *n.* In Ohio, a post-office of Mercer co.

Coldwater, *n.* In Tennessee, a village of Lincoln co.

Coldwater Creek, *n.* In N. Carolina, enters Rocky River 10 m. S. of Concord, in Cabarras co.

Coldwater-pump, *n.* (*Steam-Engineering.*) The pump for supplying the water for condensation.

Coldwater River, *n.* In Michigan, traverses Branch co., and enters the St. Joseph River.

Coldwater River, *n.* In Mississippi, rises in the N. part of the State, and flowing W.S.W. and S. enters the Tallahatchee River in Tallahatchee co.

Coldwell's Store, *n.* In Kentucky, a post-office of Anderson co.

Cole, *n.* [*A. S. caul, cawl, or cavel; Lat. caulis; Gr. kaulos.*] (*Hort.*) A variety of cabbage (*Brassica napus*), which has heart-shaped leaves.

Cole, THOMAS, an American landscape-painter, b. in Lancashire, England, 1801. His father, in 1819, emigrated to the U. States, and C. early evincing a predilection for art, established himself at Philadelphia, in 1823, as a landscape-painter. In 1825 he removed to New York, where he speedily attained distinction in his art. In 1831 he visited Italy, and, again, in 1841. D. 1845. His principal works are, the *Course of Empire*, *Dream of Arcadia*, *Voyage of Life*, *Garden of Eden*, and the *Expulsion*. Critics have, however, averred that his chief excellence lay in his fine pictures of American scenery, notably those taken in the country about the Hudson River.

Cole, *n.* In Missouri, a central co.; area, abt. 410 sq. m. It is bounded on the N.E. by the Missouri River, and S.E. by the Osage, and is also drained by Moreau Creek. The soil is in some parts fertile, but generally the surface is rocky and broken. Limestone and burrstone are abundant. Cap. Jefferson City. Pop. (1890) 17,300.

Col'borne, *n.* In prov. of Ontario, a village of Northumberland co., abt. 16 m. from Cobourg.

Colebrook, *n.* In Connecticut, a post-township of Litchfield co., abt. 31 m. N.W. of Hartford.

Colebrook, *n.* In New Hampshire, a post-village and one of the caps. of Coos co., on the Connecticut river, 110 m. N. of Concord. Pop. (1897) abt. 1,800.

Colebrook, *n.* In Ohio, a township of Ashtabula county.

Colebrook, *n.* In Pennsylvania, a township of Clinton co.

—A village of Lancaster co.

—A post-office of Lebanon co.

Colebrookdale, *n.* In Pennsylvania, a post-township of Berks co., 17 m. E. of Reading.

Colebrooke, *n.* In prov. of Ontario, a village of Addington co., 21 m. N.W. of Kingston.

Colebrook Furnace, *n.* In Pennsylvania, a village of Lancaster co.

Colebrook River, *n.* In Connecticut, a post-village of Litchfield co., on the Farmington River, abt. 3 m. N.W. of Hartford.

Cole Camp, *n.* In Missouri, a post-village of Benton co., abt. 66 m. W. by S. of Jefferson City.

Cole Creek, *n.* In Indiana, a post-township of Montgomery co.

Cole Creek, *n.* In N. Carolina, flows S. through Davidson co., into the Yadkin River.

Co-legatee, *n.* One who is joint legatee with another.

Colegrove, *n.* In Pennsylvania, a P. O. of McKean co.

Colegrove's Point, *n.* In California, a village of Sutter co.

Coleman, *n.* In Texas, a W. central county; area, 950 sq. m. It is watered by affluents of the Colorado. Cap. Coleman. Pop. (1890) 6,200.

Colemansville, *n.* In Kentucky, a post-village of Harrison co., on the S. fork of Licking river, abt. 50 m. N. E. of Frankfort.

Coleman's, JOHN WILLIAM, an English theologian, born 1814, was made bishop of Natal in 1854. His *Pentateuch*

and *Book of Joshua Critically Examined* (1862), in which he denies the divine origin of the first books of the Old Test., caused an attempt to depose him. D. 1884.

Coleophyllous, *a.* [*Gr. koleos, sheath, and phyllon, leaf.*] (*Bot.*) Having the leaves inclosed within a sheath.

Coleoptera, *n. pl.* [*Gr. koleos, and pteron, a wing.*] (*Zool.*) The Beetles, a sub-ord. of insects, comprehending those in which the 1st pair of wings have the consistence of horn, and serve as defensive coverings to the 2d pair or true wings, which are of large size and folded transversely when not in use. By means of this mechanism the *Coleoptera* are enabled to burrow in the soil, or bore the trunks of trees, without injury to their delicate organs of flight, which are the true or second pair of wings. These, being of ample size, are peculiarly

Fig. 643. — HORN-BUG.

(*Lucanus dama.*)

folded, being bent at nearly right angles, so as to pack up in small compass beneath the elytra or wing covers, when the beetle is at rest. In some species the membranous wings are wanting, but the elytra are always present; although in this case, as they are never required to be extended for flight, they are generally soldered together by a straight suture at the middle line. In ordinary cases the inner straight margins of the wing covers are simply but accurately applied to each other. The *Coleopterans* are of all the sub-orders of insects the most numerous, and the best known. Their singular forms, the brilliant and handsome colors which many of them present, the large size of some of the species, the solid consistence of their integuments, which renders their preservation easy, and the regular series of affinities traceable through several of the groups, all combine to render them objects of peculiar interest and attention. The head supports two antennae of various forms, but almost always consisting of eleven joints. They have two compound eyes, but no ocelli. The mouth is composed of six principal pieces; of which four, called the mandibulae and maxillae, move transversely in pairs, while the remaining two are fixed, and close the mouth vertically. The uppermost of the two vertical pieces is called the *labrum*; the lowermost is termed the *labium*, and is itself subdivided into the *mentum* and *lingua*, and together with the maxillae or the lowest of the vertical pieces supports a pair of articulated processes, called *palpi* or *feelers*. The anterior segment of the thorax, or *manitruink*, supports the first pair of feet, and greatly surpasses in extent the two other segments which form the alitrunk. The abdomen is sessile, and is united to the trunk by a great part of its breadth. It is externally composed of six or seven rings. The *tarsi* vary as to the number of their joints, in some *Coleoptera* having but three, in others four, in others five—modifications upon which Latreille founds his primary division of the order: *Pentamera*, *Tetramera*, *Trimera*. The C. undergo complete metamorphosis. The larva resembles a worm: the head is encased in a firm horny substance: the mouth is analogous in the number and functions of its parts to that of the perfect insects; it has also generally six feet, but some species have instead only simple tubercles. When perfect, the larva generally burrows in the earth, and excavates an oval cell, within which it undergoes its change into an inactive pupa: this is generally of a whitish color, with the wings and legs folded upon the breast. The habitation and manner of life of these insects vary much, both in their immature and perfect stages. In this work, the classification of Le Conté has been adopted.

Coleop'teral, Coleop'terous, a. (Zööl.) Having wings covered with a case or sheath, as insects of the beetle tribe.

Coleop'teran, n. One of the COLEOPTERA, *q. v.*

Coleop'terist, n. One learned in the study of coleopterous insects.

Cole'perch, n. (Zööl.) A small species of perch.

Cole'rain, n. in Georgia, a village of Camden co., on St. Marys River, abt. 24 m. W. of St. Marys.

Colerain, n. in Ohio, a post-township of Belmont county.

—A village and township of Hamilton co., about 16 m. N.W. of Cincinnati.

—A township in Ross co.

Colerain, n. in Pennsylvania, a township of Bedford co.

Coleraine', n. a flourishing seaport of Ireland, co. Londonderry, on the Lower Bann, 47 m. N.N.W. of Belfast. *C.* has a large export of Irish produce, and a valuable fishing trade. *Manuf.* Linens. A fine and safe harbor has been formed at Portrush, in its vicinity. *Pop.* 7,251.

Coleraine, n. in Massachusetts, a post-village and township of Franklin co., on a branch of the Deerfield River, abt. 100 m. W.N.W. of Boston.

Coleraine, n. in N. Carolina, a township of Bertie co., on the Chowan River, 140 m. E. by N. of Raleigh, and 22 N. of Plymouth.

Coleraine, n. in Pennsylvania, a post-township of Lancaster county, on Octorara Creek, 18 m. S.E. of Lancaster.

Cole'rain Forge, n. in Pennsylvania, a post-village of Huntingdon co., abt. 106 m. W. of Harrisburg.

Cole'ridge, n. HARTLEY, an English poet, the eldest son of Samuel Taylor Coleridge, b. at Clevedon, 1796. Imagination was predominant in him, and he displayed it when a boy in the composition of long and extraordinary romances. He entered Oxford University in 1815, and became Fellow of Oriel. Unhappily, he soon lost his fellowship, chiefly through a habit of intemperance, and his fortunes were blighted. After a brief stay in London, he went back to the north, tried his hand at the task of schoolmaster, but failed, and spent his remaining years in literary labors. His poems, many of which are of rare excellence, and his *Worthies of Yorkshire and Lancashire*, with two volumes of *Essays and Marginalia*, are the only written remains of his sad life. D. 1849.

Cole'ridge, SAMUEL TAYLOR, an English poet, philosopher, and theologian, b. 1772. He was educated at Christ's Hospital, London, and at Jesus Coll., Cambridge, early distinguishing himself by his classical acquirements, and an extraordinary passion for metaphysical studies. Quitting Cambridge in 1792, he settled soon after at Bristol, and projected with Southey, and others, a model colony, "Pantisocracy," on the banks of the Susquehanna; but, eventually, stayed in England and devoted himself to a literary life. He visited Germany to acquaint himself more fully with the German language and literature, and then settled in the Lake District. He visited Malta in 1804, and in 1810 he left his family at Keswick and went to London, and soon after entered the house of his friend Gillman, at Highgate, where he spent the rest of his life. The literary life of *C.* began with the publication of his poems, in 1794. His first volume was soon followed by others. *Remorse*, a tragedy, *The Ancient Mariner*, and *Christabel*, are among the best known of his poems. He published also a very admirable translation of Schiller's *Piccolomini*, and *Death of Wallenstein*. He projected a periodical entitled *The Watchman*, which did not succeed; preached occasionally, gave popular lectures, and contributed political and literary articles to some of the newspapers. The *Friend* began to appear as a periodical in 1809, and after his settlement in London appeared the completed work, the *Biographia Literaria*, *Lay Sermons*, *Aids to Reflection*, &c. Other works remained unpublished till after his death: these are the *Confessions of an Inquiring Spirit*, *Literary Remains*, and *Table-Talk*, edited by his nephew and son-in-law, Henry Nelson Coleridge; and *Essays on his own Times*, and *Notes on Shakespeare and the Dramatists*, edited by his daughter, Sara Coleridge. As philosopher and theologian, the influence of *C.* has been very great, and probably is so still, notwithstanding the apparent predominance of a

five, he was yet a bold speculator on the highest themes, and a genuine liberal in sentiment towards the good and great of all parties. For long years his life was saddened by ill health and pecuniary difficulties. He suffered much, too, from the habit of taking opium, which grew up from an innocent beginning, and became unconquerable. Pure love of truth, rare simplicity of nature, warm affections, love of social intercourse, and a most extraordinary power of eloquent talking without premeditation, were some of his most striking characteristics. D. 25th July, 1834.

Coles, n. in Illinois, a S.E. central co.; area, abt. 550 sq. m. The Kaskaskia and Embarrass rivers traverse it. The surface is mostly rolling prairie almost destitute of trees. *Cap.* Charleston. *Pop.* (1890) 30,400.

Coles'burg, n. in Iowa, a post-village of Delaware co., 35 m. W.N.W. of Dubuque.

Coles'burg, n. in Kentucky, a village of Hardin co., on the Rolling Fork and Salt river.

Colesburgh, n. in Pennsylvania, a village of Potter co.

Cole's Corners, n. in Indiana, a village of De Kalb co.

Cole's Creek, n. in Pennsylvania, a post-village of Columbia co.

Cole's seed, n. (Bot.) Cabbage-seed.

Cole's Ferry, n. in Virginia, a P. O. of Charlotte co.

Co-lessee', n. A partner in a lease taken of property.

Co-lessee', n. A partner in the granting of a lease.

Coles'town, n. in New Jersey, a village of Burlington co., about 12 m. S.W. of Mount Holly.

Cole's stuff, n. See COAL-STUFF.

Coles'ville, n. in N. Carolina, a post-office of Stokes co.

Coles'ville, n. in Maryland, a post-village of Montgomery co., about 40 m. W. by N. of Annapolis.

Coles'ville, n. in New Jersey, a post-office of Sussex co.

Coles'ville, n. in New York, a post-township of Broome co., on the Susquehanna River, 10 m. N.E. of Binghampton.

Cole'to Creek, n. in Texas, rises in De Witt co., and flows S.E. into the Guadalupe River, abt. 8 m. S. of Victoria.

Cole-wort, n. [A. S. *cawhwyr*.] See COLE. A young cabbage, cut before the head is properly indurated.

Col'fax, n. SCHUYLER, an American statesman, and Vice-President of the U. States, b. in New York City, March 23, 1823. He was grandson of Gen. Wm. Colfax, who commanded Gen. Washington's Life-Guard during the Revolutionary war, and losing his father before his birth, was in early life placed in a mercantile store in New York. In 1836 his family removed to Indiana, and settled at New Carlisle, in that State, where *C.* again took employment as a clerk. In this position he remained till 1840, in which year he was appointed deputy county auditor. Afterwards, removing his place of residence to South Bend, he there commenced the study of the State laws, and in 1845 became editor and proprietor of a journal called "The St. Joseph Valley Register." In 1848, *C.* was appointed delegate to, and secretary of, the Whig National Convention, which nominated Gen. Taylor for the Presidency; and, in 1850, became a member of the Constitutional Convention of Indiana. In 1852, *C.* was a member of the Whig National Convention, promoted the candidature of Gen. Scott for the Presidency, and subsequently strongly exerted himself in favor of Mr. Pierce's election to the same office. In 1854, *C.* was chosen representative in Congress for his district, and re-elected in 1858. In 1860 he espoused the nomination of Mr. Lincoln to the Presidential chair, and largely contributed to the consequent success of Republican principles achieved by his election. In Dec., 1863, *C.* was chosen Speaker of the House of Representatives, and in this office comported himself with dignity and ability. In Nov., 1868, *C.* was elected Vice-President of the U. States, in conjunction with the presidency of Gen. Grant. D. 1885.

Col'fax, n. in Indiana, a post-village of Clinton co.

Colfax, n. in Nebraska, a county organized in 1859. *Pop.* (1897) about 12,000. *Cap.* Schuyler.

Col'ias, n. (Zööl.) A genus of Butterflies, family *Pieridae*, containing the common yellow butterfly, *C. philodice*, seen in great numbers in fields and by road-sides. The caterpillars, found upon clover and allied plants, are green, slightly downy, and form a straw-colored chrysalis.

Colibri, n. See HUMMING-BIRD.

Colic, n. [Lat. *colicus*; Gr. *kolikos*, from *kolon*, the colon, part of the great intestines extending from the *cæcum* to the *rectum*.] (*Med.*) A name given to several diseases which are characterized by severe pain of the bowels, with distention or flatulence, sickness, and sometimes vomiting; and as the hardness and distention of the belly increases, cramps or spasms occur, either in the abdominal muscles, or in those of the thighs and legs. The only disease with which colic can be confounded are cholera and inflammation of the bowels. From the first it is distinguished by the absence of diarrhoea; and from the last by the pain being relieved by pressure; and finally, from all painful affections of the abdomen, by the twisting pain at the navel. There are few diseases attended with more pain and inconvenience than this comparatively harmless affection; for though its symptoms are very urgent and even severe, *C.* very seldom proves fatal. Physicians have made almost as many varieties of *C.*, with a distinctive name to each variety, as there are symptoms to the disease. Avoiding this unnecessary confusion of terms, we shall confine our remarks to the common colic.—The exciting causes are extremely numerous, and may be either external or internal. Of the first, the sudden application of a wet or damp portion of clothing next to the skin of the abdomen, cold or wet feet, or unbuttoning the coat when violently heated, and admitting cold air to the

part, are among the most general of the external causes inducing this disease. The internal are either from partaking of too much unripe or acid fruit, from accumulation of undigested food in the stomach, acid drinks, an excess of bile in the system, crude vegetable aliment, the eating of poisonous fungi, worms, and from a long costive state of the bowels. The treatment will, in each case, depend very much upon the cause; generally, the first object is to procure an evacuation of the bowels by mild and unirritating aperients. Opiates may be resorted to in order to allay the spasms, and the warm bath and fomentations are often of great service. It is usually necessary to persist in a course of mild aperients for some time, and all irritating substances in the food are to be avoided.

Printers' Colic. See LEAD.

Col'ic, Col'ic'al, a. Affecting the bowels.

"Intestine stone and ulcer, colic pangs." — Milton.

Col'icky, a. Affected with, or pertaining to, colic.

Colig'ny, n. GASPARD DE CHÂTILLON, SIRE DE, admiral of France, and leader of the Huguenots in the civil war, was b. in 1517. His father, also named Gaspard, was marshal of France, and took part in the invasion of Italy by Charles VIII., and in the conquest of the Milanese by Louis XII. and Francis I. His mother was Montmorency. He entered the army at an early age, distinguished himself at the battle of Cerisole, at the taking of Carignan, and at the battle of Rentz. He was made admiral of France in 1552, by Henry II. At the siege of St. Quentin he was taken prisoner by the Spaniards. On the death of Henry II. he returned to his estates, became a convert to the reformed faith, and when the war broke out put himself at the head of the Protestants, with the Prince of Condé. They were defeated by the Duke de Guise at the battle of Dreux; the decisive battle of St. Denis followed, and the Protestants were defeated at Jarnac, and Moncontour. In 1570, after the treaty of St. Germain, *C.* was flatteringly received by Catherine de Medici, and a few days later his assassination was attempted by an emissary of the Duke de Guise. The king, Charles IX., visited him and professed his regret. On the signal being given for the massacre of St. Bartholomew, Aug. 24, 1572, De Guise with a party of assassins, went to the house of the Admiral; by these he was stabbed and thrown out of window at the feet of the Duke. The corpse was exposed for three days to the mob, and then hung head downwards. See *Besant's Life of C.*

Coli'ua, n. a name of various application in Mexico.—A volcano of the Cordilleras, with an elevation of about 12,000 feet, in Lat. 20° N., and not far from the western coast of the republic.—2. A territory of the Confederation, containing 48,649 inhabitants, extending about 10 miles along the shores of the Pacific, in Lat. 19°–20° N. 3. The capital of the territory, comprising 31,000 members of its population, stands in a fertile plain to the south-west of the volcano.—4. A seaport on the Pacific about 40 miles to the south-west of the capital.

Col'in, n. (Zööl.) See ORTYX.

Colise'um, Colosse'um, n. [From Lat. *colosseus*, colossal.] (*Antiq.*) The name given to the theatre of Vespasian, at Rome, either from its magnitude, or from the colossal statue of Nero it contains. See AMPHITHEATRE. This term is also applied to certain large public buildings of modern construction.

Coli'tis, n. See COLONITIS.

Collabor'ation, n. Joint labor.

Collaborator, n. [Fr. *collaborateur*, from Lat. *col* and *laboro*, laboratus, to labor.] An associate in labor, particularly literary and scientific.

Collaburgh, n. in New York, a village of Orange co.

Coll'amer, n. in Connecticut, a village of Windham co. abt. 45 m. E. by N. of Hartford.

Collamer, n. in Illinois, a village of Kane co., about 16 m. N.N.E. of Springfield.

Collamer, n. in Indiana, a post-village of Whitley co., on the El river, 30 m. W. of Fort Wayne.

Collamer, n. in New York, a post-office of Onondaga co.

Collamer, n. in Ohio, a village of Cuyahoga co.

Collamer, n. in Pennsylvania, a post-office of Chester co.

Collamer, n. in Wisconsin, a village of Sauk co., on the Wisconsin River.

Collapse', n. [Lat. *collapsus*, from *collabor*—*com*, labor, *lapsus*, to slide or fall.] A falling together; closing by falling together; as, the collapse of a scheme (*Med.*) A wasting of the body, or a sudden or extreme depression of its strength and energies.

—*v. i.* To fall together, as the two sides of a hollow vessel: to close by falling together.

Collap'sion, n. [Lat. *collapsio*.] Act of closing or collapsing; state of shrinking.

Collar, n. [Lat. *collare*, from *collum*, the neck.] Something worn round the neck as part of a person's dress or an animal's harness; a necklace or something in the form of a collar, or resembling it, used as an ornament or yoke; as, a shirt-collar, a horse's collar, &c.

"His locked, lettered, braw brass collar,
Shewed himself the gentleman and scholar." — Burns.

(*Her.*) An ornament worn round the neck by members of a knightly order, from which a badge or jewell device is generally dependent; as, the collar of the Golden Fleece.

(*Arch.*) The astragal of a column.—A cincture.

(*Turnery.*) A ring inserted in the puppet for holding the end of the mandril next the chuck, in order to make the spindle run freely and exactly.

(*Mach.*) A plate of metal screwed down upon the stuffing-box of a steam-engine, with a hole to allow the piston-rod to pass through.

(*Mining.*) The timber and boarding used to secure

Fig. 644.—COLERIDGE'S COTTAGE.

less spiritual philosophy than his. Although he did not live to complete the grand system of religious philosophy which he appears to have projected, the "massive fragments" he has left us suffice to show more than the outlines of the vast whole. Churchman and conserva-

Samuel Taylor Coleridge

1772-1834

the uppermost part of a shaft in loose rubble from falling in.

(Bot.) Same as COLLET, *q. v.*

(Zool.) The colored ring round the neck of birds.

(Naut.) An eye in the end or bight of a shroud or stay, to go over the mast-head. — A strap formed of rope to which the deadeyes are secured.

Collar of brawn. The quantity of brawn, or spiced oar's head, packed up in one parcel. (England.)

To slip the collar. To get free; to escape; to get away from any difficulty or entanglement.

a. To seize or hold by the collar; as, to collar a thief. To put a collar on; as, to collar a dog.

To collar beef, or other meat. To roll it up, and bind it hard and close with a string or cord. (Used in England.)

Collage, n. A tax formerly levied on horses' collars in England.

Collar-beam, n. (Arch.) A beam framed across and between two principal rafters.

Collar-bone, n. (Anat.) The CLAVICLE, *q. v.*

Collar-day, n. A day on which knights wearing orders are appointed to attend court in their collars of nighthood; as, a collar-day at St. James's.

Collared, a. Having a collar on the neck; wearing the collar of a knightly order.

Collared up into a cylindrical form, and bound with a string; as, collared brawn, beef, eels, &c. (Used in England.)

Collatable, a. That may be collated.

Collate, v. a. [Lat. *collatum, collatus*, from *confero* — *m.* and *fero, latum*, to bear, carry, or bring.] To bring together and compare, by examining, as manuscripts, books, &c.

"I must collate it . . . with the original Hebrew." — Coleridge.

o. confer; to bestow.

"The spirit of God, there consigned, exhibited, and collated." — Taylor.

To collect and place in form, as the sheets of a book for binding.

(Eccl.) To present to a benefice; (followed by *to*;) as, to be collated to a diocese.

"He thrust out the invader, and collated Amsdorf to the benefice." — Atterbury.

i. To place in a benefice, as by a bishop.

Collateral, a. [Lat. *collateralis* — *com.* and *latus, lateris*, a side.] Being by or on the side of; placed side by side; running parallel or together; not direct; as, collateral facts.

"In his bright radiance and collateral light." — Shaks.

In a genealogical sense, descending from the same stock or ancestor, but not one from the other; — used in contradistinction to *lineal*; as, a collateral heir.

Concurrent; connected; conjoined; as, collateral length.

Collateral assurance. That which is over and above the deed itself. — *Collateral issue.* (Law.) An issue taken upon some matter aside from the general issue in the case. — *Collateral security.* A separate obligation attached to another contract to guarantee its performance. — The transfer of property, or of other contracts to insure the performance of a principal engagement.

A collateral relation or kinship. — Security given over and above the bond.

Collaterally, adv. In a collateral manner or relation; not lineally. — Side by side, or by the side; indirectly.

Collateralness, n. State of being collateral.

Collation, n. [Lat. *collatio*. See COLLAPE.] Act of collating; that which is collated; comparison and examination of books, manuscripts, &c. — Act of conferring or bestowing a gift.

(Eccl.) Act of presenting to a benefice, as a clergyman to a bishop. — (Law.) The comparison of a copy with its original, in order to ascertain its correctness and conformity. — The report of the officer who made the comparison. — The supposed or real return to the mass of the succession, which an heir makes of the property received in advance of his share or otherwise, in order that such property may be divided together with the other effects of the succession.

A collection of several kinds of food or provisions for a repast; a luncheon taken between regular meals; as, a collation.

Collationer, n. (Printing.) One who examines the sheets of a newly printed book, to verify their correctness.

Collative, a. Relating to church-livings, where the bishop and patron are one and the same person.

Collator, n. One who collates, compares, or bestows.

"To read the titles they give an editor or collator of a manuscript, you would take him for the glory of letters." — Addison.

Collé, a town of Italy, in Tuscany, on the Elsa, 22 m. S.W. of Florence; pop. 6,376.

Colleague, n. [Lat. *collega* — *con.* and *lego*; Gr. *lego*, to choose.] A partner or associate in office, employment, &c.; a coadjutor; a collaborator.

"The regents upon demise of the crown, would keep the peace without colleagues." — Swift.

i. To unite with in the same duty; to associate with another or others.

"Collegued with this dream of this advantage." — Shaks.

Collegueship, n. Partnership in office; coadjutorship.

Collect, v. a. [Lat. *colligo, collectum* — *con.* and *lego*, to gather.] To gather or bring together; to gather or bring into one body, place, or sum; to assemble; to muster; to amass; as, to collect subscriptions of money. To gain by observation or information.

"The reverent care I bear unto my lord, Made me collect these dangers in the duke." — Shaks.

—To gather or deduce from certain premises; to infer as a consequence.

"Which consequence, I conceive, is very ill collected." — Locke.

To collect one's self, to recover from surprise or embarrassment; to regain self-control and composure.

"Be collected; no more amazement." — Shaks.

v. i. To run together; to accumulate; as, water collects in a pool. — To infer; to deduce; to conclude.

Collect, n. A short comprehensive prayer in church-service, collected out of the epistle and gospel of the day; a short prayer adapted to a particular day or occasion.

Collectanea, n. pl. [Lat.] Things selected; a selection of passages from various authors; miscellanies; anthology.

Collectanea, n. a. [Lat. *collectaneus*.] Collected; gathered; compiled.

Collected, a. Cool; firm; composed; not disconcerted; as, a collected rejoinder.

Collectedly, adv. In a composed or collected manner.

Collect-edness, n. A collected state of mind; recovery from embarrassment or surprise.

Collectible, a. That may be collected, deduced, or inferred.

Collection, n. [Lat. *collectio, collectionis*.] Act of collecting or gathering together. — That which is collected; an assemblage; a compilation; a gathering together; as, a collection of facts, a collection of pictures.

"Fairiest collection of thy sex's charms." — Prior.

—A contribution; a sum gathered together for a benevolent purpose; as, a collection at church. — Act of deducing from certain premises; ratiocination; corollary; conclusion; consequence.

"These her collections, not the senses are." — Davies.

Collective, a. [Lat. *collectivus*.] Formed by gathering; gathered into a mass, sum, or body; congregated or aggregated; united; as, a collective idea.

"The people collective or representative, who may be called the commons." — Swift.

—Reasoning; inferring; deducing consequences; as, "critical and collective reason."

(Gram.) Expressing a number or multitude united; as, a collective noun.

—Tending to collect.

"A central point, collective of his sons." — Young.

Collectively, adv. In a mass or body; in a collected state; in a state of combination; unitedly; in the aggregate.

"Although we cannot be free from all sin collectively." — Hooker.

Collectiveness, n. A mass; in an aggregate state; union.

Collector, n. One who collects, gathers, or compiles; as, a collector of books.

(Polit.) One who collects revenue duties, taxes, &c.; as, a collector of customs.

—At Oxford University, Eng., a bachelor of arts who directs certain scholastic duties during Lent Term.

(pl.) (Bot.) Dense hairs covering the styles of some species of composite, &c., and acting as brushes to clear the pollen out of the cells of the anther.

Collectorate, Collectorship, n. The office of a collector of customs-duties, taxes, &c.; as, the collectorship of New York, the collectorate of Poonah, (India.)

Collegatary, n. [Lat. *collegatarius*.] One who is left a legacy in common with one or more persons.

College, n. [Fr., from Lat. *collegium*, from *collega* — *con.* and *lego*, to choose. See COLLEAGUE.] Primarily, this word denoted an association or body of men united together by the same laws or customs, or in the same office or employment. Hence, among the Romans, we find the word applied not only to corporations enjoying certain rights, as the priests, augurs, &c., but to men in the same office, as consuls, quaestors, tribunes, — to any body of merchants or mechanics, or even to an assemblage of the meanest citizens or slaves. In a more limited sense it was applied to a corporation or association of persons, of which there were many at Rome, and which required confirmation by special enactment. They possessed property as a corporate body, and had a common chest. In modern acceptance, a college is a society of persons existing as a corporate body, either by prescription or by grant of the sovereign, and frequently possessing peculiar or exclusive privileges; as the colleges of physicians and surgeons in England, or the C. of the cardinals at Rome. A C. is also an academical institution, endowed with revenues, and subject to a private code of laws. Its particular form and constitution depend upon the terms of the foundation. The C. of France are very different from those of this country, being educational institutions established throughout the country, and bearing some resemblance to the German gymnasia. There are about 320 in all, and they are under the control of the University of France. In general, a C. is an institution for the advancement of learning; a university is for the conferring of degrees; but both terms are now often confounded, and in the usage of the U. States there is no fixed distinction between colleges and universities. All American C. confer degrees in the arts, and the older and more flourishing of them have faculties and give instruction also either in medicine, divinity, or law, or in a few instances in all the professional studies.

College, in Iowa, a township of Linn co.

College, in Ohio, a township of Knox co.

College Corner, in Ohio, a post-village of Butler co., about 35 m. N.N.W. of Cincinnati.

College Hill, in Massachusetts, a R.R. station of Middlesex co. P. O. Tuft's College.

College Hill, in Ohio, formerly a post-village of Hamilton co., now part of Cincinnati. Farmers' College and the Ohio Female College are here located.

College of Justice. In Scottish law, a term applied to the supreme civil courts, composed of the lords of council and session; together with the advocates, clerks of session, clerks of the bills, writers of the signet, &c.

College of New Jersey. See PRINCETON.

College of St. James, in Maryland, a village of Washington co., about 6 m. S.E. of Hagerstown. It receives its name from the Protestant Episcopal college here located.

College Point, in New York, a town of Queens co. Has manuf. of hard rubber and silk ribbons. Pop. 6,127.

Collegeville, in Arkansas, a post-village of Saline co., about 14 m. S.W. of Little Rock.

Collegial, a. Relating, or pertaining, to a college; possessed by a college.

Collegian, n. A member of a college; an inhabitant of a college; an undergraduate; a university man.

Collegiants, n. pl. (Eccl. Hist.) A religious sect formed among the Arminians and Baptists in Holland about the beginning of the 17th century. They received the name of C. because they called their assemblages colleges. They assemble twice a week, and any one is allowed to expound the Scriptures or offer up prayer. They hold sacred conventions twice a year at Rheinsburg, near Leyden; whence they are sometimes called Rheinsbergers.

Collegiate, a. Pertaining to a college; containing a college; instituted after the manner of a college; as, a collegiate school, a collegiate society.

Collegiate church, (Eccl.) A church built and endowed for a body corporate, as an adjunct to a cathedral, and presided over by a dean, canons, and prebendaries. In the U. States, a church in community with others under the joint pastorate of several ministers.

n. A collegian; a member of a college; a university man.

Collar, n. [Fr. *collet*, from Lat. *collum*, the neck.] The part of a ring in which the stone is set, and which surrounds the stone as a collar does the neck.

(Bot.) The line of junction between the primary stem and root.

Colleterial, a. Of, or pertaining to, the colletarium of insects.

Colleterium, n. (Zool.) An organ containing a whitish, glutinous matter for cementing together the ejected ova found in the females of insects.

Colletie, a. [Lat. *colletivus*; Gr. *kolletikos*, from *kolla*, glue.] An agglutinant; a viscous substance producing cohesion.

Colleton, in S. Carolina, a S. co., bordering on the Atlantic Ocean; area, about 1,670 sq. m. It is drained by the Edisto, the Salkehatchee, the Ashepoo, and the Combahee rivers, the latter of which forms its S. boundary. The surface is level, and the soil alluvial. Cap. Walterborough. Pop. (1890) 40,300.

Colletsburg, in N. Carolina, a post-village of Caldwell co., about 16 m. W. by N. of Raleigh.

Colley, in Pennsylvania, a post-office of Sullivan co.

Collide, v. i. [Lat. *collido* — *con.* and *laedo*, to strike]. To strike or dash against; to come into collision; — generally preceding *with*.

Collie, n. A shepherd dog. See COLLY.

Collier, n. [From coal.] A worker in coal-mine; a digger or getter of coal. — A coal-merchant; a coal-vender; a dealer in coal.

(Naut.) A vessel employed in the coal-carrying-trade, especially a steamship so engaged.

Colliers, in New York, a village of Otsego co., on the Susquehanna River, about 73 m. W. by S. of Albany.

Collier's Mill, in New Jersey, a P. O. of Ocean co.

Collierstown, in Virginia, a post-village of Rockbridge co., about 154 m. W. of Richmond.

Colliersville, in New York, a village of Sullivan co., about 75 m. W. by S. of Albany.

Colliersville, in Tennessee, a post-village of Shelby co., about 20 m. E. of Memphis.

Colliery, Coal-ery, n. A coal-mine, with all buildings, machinery, and all appurtenances belonging thereto. — See MINE.

(Com.) The coal-trade.

Colliflower, n. Old spelling of CATTIFLOWER, *q. v.*

Colligation, n. A binding together; as, the "colligation of vessels." — Brown.

Collimating, a. (Optics.) Pertaining to collimation. *Collimating eye-piece.* See EYE-PIECE.

Collima'tion, n. [Lat. *collimare*, to aim.] The act of aiming at a mark; aim; act of fixing the eye on a direct object.

(Astron.) The line of C. in a telescope, is the line of sight, or straight line which passes through the centre of the object-glass and the intersection of the wires placed in its focus. The error of collimation is the difference between the actual line of sight and the position which that line ought to have in reference to the instrument.

Collima'tor, n. (Astron.) A fixed telescope with a system of wires at its focus. If the cross-wires of the C. be illuminated, the rays from them will issue parallel, and consequently be in a fit state to be brought to a focus by the object-glass of any other telescope, in which they will form an image as if they came from a celestial object. Hence the intersection of the cross-wires of the C. may be used as a standard point of reference, always visible, and the least change in the position of a movable instrument in any direction observed. In large observatories the transit C. are arranged opposite to each other, so that when the large telescope is raised, the image of the cross-wires of the other is viewed superposed, or nearly so, on the system proper to each when the large telescope is in position, it can look into both. By these

means, in a reversible instrument, all errors or changes of position may be detected.

Col'tin, or **Kolix**, a town of Austria, in Bohemia, on the Elbe, 30 m. E.S.E. of Prague; pop. 7,727. In the vicinity was fought, 1757, the battle in which Frederick the Great was defeated by the allied Austrian and Saxon armies under Marshal Daun.

Col'tin, in *Texas*, a N. co.; area, 916 sq. m. It is drained by the E. fork of Trinity River, and Little Elm and Pilot Grove creeks. The surface consists of prairie and timber land. Cap. McKinney. Pop. (1890) 36,800.

Collinear, *a.* (*Geom.*) Two figures, or systems of points, are said to be *C.* when the relation between them is such that to any point in either system corresponds but one point in the other, while to the several points of a right line in either system correspond those of a right line in the other system. In establishing such a relation between two *plane* figures, four pairs of corresponding points may be chosen arbitrarily; this being done, however, all other pairs are defined. It is always possible to give the planes of two collinear figures such a position, that the one figure shall be the projection of the other with respect to some centre of projection in space. The term *C.* includes the relations of *affinity* and *similarity*, and is identical with the *homographic* relation.

Collineation, *n.* Same as **COLLIMATION**, *q. v.*

Col'lington, in *Maryland*, a P. O. of Prince George co.

Collin'gual, *a.* [From Lat. *con*, and *lingua*, the tongue.] Having, or pertaining to, the same tongue or language.

Col'lingwood, CUTHBERT, LORD, an English admiral, b. 1750. He distinguished himself at the blockade of Toulon, the battle of Cape St. Vincent, the blockade of Brest, and especially at Trafalgar, where he succeeded to the command on the death of Lord Nelson. D. 1810.

Col'lingwood, in *Ontario*, a town of Simcoe co., on Nottawasaga Bay, 95 m. N.N.W. of Toronto; pop. 2,829.

Collingwood, in *New Jersey*, a village of Camden co.

Col'lins, ANTHONY, an English free-thinker, b. at Heston, Middlesex, 1676. He was the intimate friend of Locke, who very highly esteemed him; he had a long controversy with Dr. Samuel Clarke, and provoked by some of his writings innumerable replies. His principal works are: *Priestcraft in Perfection*; *Essay on the Thirty-Nine Articles*; *Discourse on Free-Thinking*, which was savagely attacked by Bentley; *Philosophical Inquiry concerning Liberty and Necessity*; and *Grounds and Reasons of the Christian Religion*. D. 1729.

Collins, WILLIAM WILKIE, a popular English novelist, b. in London, 1824. He wrote a large number of popular works of fiction:—*Antonina*, or *the Fall of Rome*; *Basil*; *After Dark*; *The Dead Secret*; and *The Queen of Hearts*. In 1859–60 his *Woman in White* appeared in "All the Year Round," followed by *No Name*. His latest works were: *Armadale* (1866); *The Moonstone* (1868); *Man and Wife* (1870); *Poor Miss Finch* (1872), and *The Law and the Lady* (1876). In 1874 C. made a successful lecturing tour of the United States. D. 1889.

Collins, WILLIAM, a distinguished English painter, b. in London, 1797. His most popular works are: *Happy as a King*, *the Stray Kitten*, *Putting Salt on the Bird's Tail*, and *The Newly Found Nest*. D. 1874.

Col'lins, in *Iowa*, a township of Story co.

Collins, in *New York*, a post village and township of Erie county, on Cattaraugus creek, about 22 miles south of Buffalo.

Collins, in *Pennsylvania*, a township of Alleghany co.; now a part of Pittsburgh.

Col'linsburg, in *Louisiana*, a post-office of Bossier co.

Collins Centre, in *New York*, a post-village of Erie co., about 25 m. S. of Buffalo.

Collins Depot, in *Massachusetts*, a village of Hampden co.

Collinsonia, *n.* (*Bot.*) A genus of plants, order *Laminales*, including the Horse Balm, *C. canadensis*, a tall herb with large leaves and yellow flowers, and compound racemes; found in woods and fields, from Canada to Kentucky and the Carolinas.

Collins River, in *Tennessee*, a village of Grundy co.

Collins River, in *Tennessee*, traverses Warren co., and enters the Caney fork of Cumberland River.

Col'linsville, in *Alabama*, a P. O. of DeKalb co.

Collinsville, in *California*, a village of Solano co., on the N.E. shore of Suisun Bay, about 60 m. N.E. of San Francisco.

Collinsville, in *Connecticut*, a post-village in Canton township, Hartford co., on the Farmington River, about 15 m. N.W. by W. of Hartford.

Collinsville, in *Illinois*, a city of Madison co., 86 m. S. by W. of Springfield, and 14 m. E.N.E. of St. Louis. Pop. (1897) abt. 4,000.

Collinsville, in *New York*, a post-village of Lewis co., near Black River, about 37 m. N. by W. of Utica.

—A village of Otsego co.

Collinsville, in *Ohio*, a post-village of Butler co., abt. 10 m. N.N.W. of Hamilton.

Collinsville, in *Pennsylvania*, a village of Blair co., about 122 m. W. of Harrisburg.

—A post-office of Lycoming co.

Colliquament, (*kol-lik'-wa-ment*), the first generative endiment of an embryo.

Colliquation, *n.* Act of melting.

"Glass may be made by the bare colliquation of the salt and earth remaining in the ashes of a burnt plant." — Boyle.

Colliquative, *a.* (*Med.*) Melting; dissolvent; causing rapid waste. Excessive evacuations are so termed, which appear to melt down the strength and substance of the body.

Colliquefaction, *n.* [From Lat. *colliquefacere*, to melt.] A melting or fusion of bodies into one mass.

"The incorporation of metals by simple colliquefaction." — Bacon.

Collision, (*köl-lish'um*), *n.* [Lat. *collisio*. See COLLIDE.]

Act of meeting and striking together; the meeting and mutual striking of two or more bodies; state of coming into violent contact together; as, a railroad collision.

—State of contrariety and interference; conflict; clashing of will or opinion; encounter.

"The mutual collision of well-meant zeal." — Decay of Piety.

(*Mech.*) The impact of two bodies, one or both of which were previously in motion. The laws of the direct impact of two spherical bodies are deduced from the principle that the sum of the momenta of the impinging bodies, estimated in a fixed direction along the line of motion, is not altered by the collision. The velocities of the bodies after impact, however, depend upon the hardness and elasticity of these bodies. If perfectly hard, they will move, after impact, as one body with a velocity, and in a direction which is ascertained by dividing the algebraical sum of their previous momenta by that of their masses. If not perfectly hard, a certain compression takes place on collision, and is immediately followed by a more or less perfect restitution of form, according to the degrees of elasticity which the bodies possess. In the case of perfectly elastic bodies, this force of restitution is equal to that of compression, and the loss or gain in the velocity of each body which occurred at the moment of collision or commencement of compression, at which moment the bodies may still be regarded as perfectly hard, is precisely repeated. In all cases of collision the state of the centre of gravity, whether at rest or in motion, remains the same after the impact as it was before. If it was at rest, it remains in that state; and if it was in motion, it continues to move in the same direction with the same velocity, notwithstanding the impact. This is the case both in respect of non-elastic and elastic bodies; and it is a constant law, in whatever manner the bodies act on each other, and whatever be their respective natures.

Collit'igant, *n.* One who engages in litigation with another.

Collocate, *v. a.* [Lat. *colloco*, *collocatus* — *con*, and *loco*, to place or set.] To set or place together; to set; to station; to place.

—*u.* Set; placed; stationed.

"Take the parts wherein that virtue is collocate." — Bacon.

Collocat'ion, *n.* [Lat. *collocatio*.] Act of collocating; a setting; the act of placing; disposition in place.

—State of being placed, or placed with something else.

"In the collocation of the spirits in bodies, the collocation is equal or unequal." — Bacon.

Collo'dion, *n.* [From Gr. *kolla*, glue, and *eidos*, resemblance.] (*Chem.*) A solution of pyroxylin in a mixture of ether and alcohol. When this solution is exposed to the air, the ether and alcohol evaporate, leaving behind a thin, tough pellicle. It is used exclusively in pharmacy, for forming an artificial skin on excoriated surfaces, and in PHOTOGRAPHY, *q. v.*

Collo'dionize, *v. a.* To treat with collodion; to form with collodion.

Collogue, *v. a.* [See COLLOCUTION.] To address in a wheedling or flattering manner.

—*v. i.* To talk privately; to address with delusive intentions.

"He had been colloquing with my wife." — Thackeray.

Colloid, *n.* [Gr. *kolla*, glue, and *eidos*, form.] Resembling glue, or any gelatinous substance.

Col'lop, *n.* [Ger. *klops*, from *klöpfen*, to beat; Swed. and Goth. *kollops*.] A small slice or chop of meat, made tender by beating, and to be cooked on the coals; as, minced collops.

"What signifies Scotch collops to a feast?" — King.

—A fleshy piece of any animal; a lump of flesh.

"The lion is upon his death-bed; not an enemy that does not apply for a collop of him." — *L'Estrange*.

—A part or piece of anything; a slice; a share.

"This . . . cut two good collops out of the crown-land." — Fuller.

Collo'quial, *a.* Pertaining to colloquy, familiar conversation, or mutual discourse; — used in contradistinction to formal or stilted conversation; as, colloquial talents.

Collo'quialism, *n.* A colloquial form of expression; a familiar figure of speech.

Collo'quially, *adv.* By mutual conversation.

Colloquist, *n.* One who speaks in a dialogue.

Colloquy, *n.* [Lat. *colloquium* — *con*, and *loquor*, to speak.] A speaking together; mutual discourse of two or more; dialogue; conversation; conference.

"In that celestial colloquy sublime." — Milton.

Collore'do, a noble Austrian family, originating in the 10th cent., and taking their name from the castle of Collore'do, in Friuli. Several members of the two branches, *C. Mansfeld* and *C. Wenzel*, greatly distinguished themselves as field-marshal, chiefly during the Seven Years' War, and in that against Napoleon I. The *C. Mansfeld* rank as princes of the empire.

Collet D'Herbois, JEAN MARIE, (*kol'lo dair-bwaw*), one of the most sanguinary leaders in the French revolution, b. at Paris, 1750. Before the revolution he was a clever strolling player. He joined the club of the Jacobins, and soon gained a great ascendancy; won the prize for his *Almanach du Père Gerard*; and became a member of the Convention, and of the Committee of Public Safety. He was charged with several provincial missions, and made himself a name of infamy by his execution of them. In 1793 he went to Lyons, where he had more than 16,000 persons put to death, and made it a capital crime to look sad or pitiful. An attempt

was made to assassinate him, which only made him more popular, and he contributed powerfully to the fall of Robespierre. He was soon after denounced, arrested and in March, 1795, transported to Cayenne, where he b. 1796.

Col'low, *n.* and *v.* See COLLY.

Collude, *v. i.* [Lat. *colludo* — *con*, and *ludo*, to play.] To play into the hand of each other; to conspire in fraud; to act in concert; as, "colluding with sedition" — Burke.

Collud'er, *n.* One who participates in a fraud.

Collum, *n.* (*Bot.*) See COLLAR.

Collu'sion, *n.* [Lat. *collusio*.] Act of colluding; secret agreement and co-operation for a fraudulent purpose; artifice; fraud by concert.

"These miracles were done . . . in the face of the world, that there might be no room to suspect artifice or collusion." — Atterbury.

Collu'sive, *a.* Partaking of collusion; tricky; fraudulently concerted between two or more; as, a *collusive* divorce.

Collu'sively, *adv.* By collusion, or secret fraudulent understanding.

Collu'siveness, *n.* State or quality of being collusive.

Collu'sory, *a.* [Lat. *collusorius*.] Collusive.

Collu'vies, *n. sing.* and *pl.* [Lat. *colluere* — *con*, and *luere*, to wash.] Filth; refuse matter; a mass of garbage.

Col'ly, **Col'low**, *n.* The smut of coal or burnt wood.

"Besmeared with soot, colly, perfumed with opopanax." — Burton.

—*v. a.* To grime or besmirk with coal or soot.

"Brief as the lightning in the collied night." — Shaks.

Col'ly, **Col'lie**, *n.* In Scotland, a shepherd's dog.

Col'ly, in *Missouri*, a village of Pulaski co., abt. 60 S. of Jefferson City.

Colly'rio, *n.* (*Zoöl.*) A genus of birds of the *Lanius* family, distinguished by having the bill shorter than the head, the tip of the lower mandible bent upward, legs stout, wings rounded, and claws very sharp. The *Gr. Northern Shrike*, or *Butcher-bird*, *C. borealis*, of North America, (*Fig.* 1512), is nearly 9 in. long, its color above light-bluish ash, and the under parts white. It has the power of imitating the sounds of other birds, especially those indicating distress; and has the singular habit of impaling birds and insects upon the points of twigs and thorns; but for what object is not well understood.

Colly'rium, *n.*; *pl.* COLLYRIA. [Lat., from Gr. *kollyria* — a liquid eye-salve.] (*Med.*) A topical remedy for the eyes.

Col'man, GEORGE, an English dramatist, b. abt. 1717 at Florence, while his father was the British minister there. He is remembered as the author of two stock comedies, *The Jealous Wife*, and *The Clandestine Marriage*, the latter of which was in part written by Garrick. D. 1794. — C., GEORGE, his son, b. 1762, followed the same career, and with no less success. Possession of the stage is still kept by some of his comedies and farces such as *John Bull*; *The Iron Chest*; *The Mountaineer*; *The Heir at Law*. D. 1836.

Col'mar, a city of Germany, cap. of Upper Alsace (formerly of the French dep. Haut Rhin), on the Ill, 36 m. N. E. of Strasburg. This is a well-built and handsome city. Manuf. Cotton stuffs, silks, ribbons, &c. In 1871 it was annexed to Germany, with the rest of Alsace. Pop. 23,669.

Col'mar, in *Illinois*, a post-village of McDonough co., abt. 45 m. N.E. of Quincy.

Colmenar de Ore'ja, a town of Spain, prov. Madrid, 13 m. E.N.E. of Aranjuez. Manf. Woollens, potteries and millstones. Pop. 5,316.

Colne, (*kön*), a manufacturing town of England, Lancashire, on the Colne, 26 m. N. of Manchester, and 239 N. of London. This is an ancient town, and one that has of late years become important through its extensive cotton manufactures.

Colob'us, *n.* [Gr. *kolobos*, mutilated.] (*Zoöl.*) A genus of long-tailed Quadrumanes, or monkeys; so called, because the fore-hands are deficient in, and, as it were, mutilated of, a thumb. In this respect the *Colobi*, which are exclusively limited to the African continent, resemble the spider-monkeys (*Ateles*) of South America, but they have not a prehensile tail to compensate the imperfection of the hands; their long caudal pendage is, on the contrary, terminated by a tuft of hair. The *Colobi* differ also from the *Ateles* in having five molar teeth instead of six on each side of each jaw, and in having cheek-pouches.

Coloca'sia, *n.* (*Bot.*) A genus of plants, order *Asclepiaceæ*. The species *C. esculenta* and others have large fleshy corms, which are much used as food in Madagascar and the West Indies, where they are known as *coco eddoes*, or *yams*. (See DIOSCOREA for the true yams.) *himalensis* has also edible corms, which are used as food in the Himalayas. *C. antiquorum* in Egypt, and *C. crorrhiza* in the South Sea Islands, also yield corms which are eaten.

Colocotron'is, THEODOROS, a Greek patriot, and commander in the revolution which established the independence of Greece. B. 1770; d. 1843.

Colocynth, (*kol'o-sinth*), *n.* [Gr. *kolokynthis* — *kölē* the colon, or *koilia*, the belly, and *kínōō*, to move.] (*Med.*) The pith of the bitter-apple; the fruit of the *Citrullus Colocynthus*, which is violently purgative. It is imported dried, and generally peeled, from Turkey, and is rarely used alone. One of the most valuable purgatives is the compound extract of *C.*, which is a combination of the drug with aloes, scammony, cardamom, seeds, and so on. In large doses, *C.* is an irritant poison.

Colocynth'ine, *n.* (*Chem.*) The bitter, purgative principle of colocynth.

Cologne, [Ger. *Köln*.] an ancient and celebrated city of Germany, in Prussia, formerly the cap. of the electors

of the same name, and now of the Rhine provs., on the left bank of the Rhine. *C.*, one of the most prosperous cities of Prussia, is connected by a magnificent iron bridge with the town of Dentz on the opposite shore of the Rhine. It is built in the form of a crescent, and is strongly fortified and garrisoned. This city bears, generally, a mediæval aspect, and possesses some fine old structures, conspicuous among which is the Cathedral, or Minster, of St. Peter, a vast and imposing Gothic edifice, begun about 1245. It is about 400 feet in length, and the choir rises to the height of 180 ft. It was completed in 1550, and inaugurated (Oct. 15) in presence of the Emperor, and most of the ruling princes of Germany. Its total cost is about \$10,000,000. *C.* formerly bore a very unsavory reputation among travellers with sensitive olfactory organs, if the poet Coleridge is to be believed, who writes of this city:

"The river Rhine, it is well known,
Doth wash your city of Cologne;
But tell me, nymphs! what power divine
Shall henceforth wash the river Rhine?"

C. is well furnished with those literary, social, and educational institutions applicable to a large and populous city, and has also a good port on the Rhine, being the principal entrepôt of the extensive and increasing commerce between the Netherlands and the countries of the German Zollverein. *Manuf.* Cotton yarn, and stuffs, stockings, bonnets, velvets, silks, hats, lace, thread, locks, tobacco, and soap. The most esteemed product of the numerous distilleries here is the well-known Eau-de-Cologne. (*q. v.*) *C.* was an ancient Roman colony, and in the Middle Ages was much more populous and wealthy than at present. It was for a lengthened period one of the most important cities belonging to the Holy Roman Empire. The population of *C.*, at the last census was 281,273.

Cologne. *Cologne-water.* (*ko-lôn')* *n.* See *Eau-de-Cologne*.

Cologne'-earth. *n.* [From *Cologne*.] (*Painting*.) A pigment similar to the Vandyke brown in its use and properties as a color.

Colite. *n.* [Gr. *kolon*, colon, and *lithos*, a stone.] (*Pal.*) worm-like fossil; petrified intestines of fishes.

Colo. in S. America, a mountain-peak of the Andes, near the boundary of Peru and Bolivia, in Lat. 14° 57' S., lon. 69° 16' W. It is about 17,930 feet high.

Colma. in California, a post-village and township of Alameda co., on the S. fork of the American River, 10 m. N.W. of Placerville.

Colma. in Indiana, a post-office of Parke co.

Colma. in Iowa, a village of Marion co., about 34 m. S.E. of Des Moines.

Colma. in Kansas, a post-office of Woodsen co.

Colma. in Michigan, a post-office of Berrien co.

Colma. in Missouri, a post-village of Carroll co., about m. N. of Carrollton.

Colma. in Wisconsin, a post-township of Waushara co.

Colombia. *Republic of.* (formerly NEW GRANADA,) a nation of South America, forming the N. W. corner of that continent, and lying between the River Amazon and the Pacific Ocean, having N. the Caribbean Sea, with the gulfs of Santa Marta and Darien, and on the W. the Pacific, with the bays of Panama and Choco; the N.W. it touches the confines of Costa Rica; Venezuela and Brazil form its E. and S.E. boundaries, and Ecuador its S. boundary. It extends, by the latest official statement, from 5° 8' S. to 12° 25' N. Lat., and from 74° to 82° 41' W. Lon., having an area of 513,938 sq. m., inclusive of hundreds of islands and keys.—*Gen. Desc.* This country is cut through by the Andes chain of mountains, which trifurcate into 3 minor ranges, the E. central, and W. Andes, forming in their interstices fruitful and highly fertile valleys. This mountainous character applies mainly to the W. and central portions of the country; those in the N. and E. consisting of *nos*, or grassy plains. The highest mountain summit is the Peak of Tolima, rising to an altitude of 18,200 feet above sea-level. *C.* is watered principally by the Magdalena and Cauca rivers, which take a N. course, and do their outlet in the Caribbean Sea; those watering the E. and S. parts are all affluents of the Amazon and Amazonian. —*Soil.* Fertile, but without proper cultivation; grain may be sown at any time of the year, and the chief productions may be summed up as coffee, sugar, cacao, rice, cotton, wheat, and maize. Tropical fruits flourish in this, their native zone, in great variety and qualified richness. Peruvian bark, many kinds of woods, and drugs are produced in plenty, and, with few, form considerable items of export. The climate of *C.* is variable: on the higher plateaux, it is that of an arid spring, while on the coast, and in the low river-bottoms, it is excessively hot, rife with malaria, and at certain seasons of the year, very unhealthy.—as the summer when yellow fever makes its regular ravages. The fauna of this country is similar to that of most inter-tropical regions; bears lurk in the mountains and ravines, deer browse on the plains and tablelands, and vast herds of wild cattle have their habitat in the llanos. The streams are generally infested withigators, while the entomological nuisances peculiar to the climate, as mosquitoes, centipedes, sand-flies, gallipers, &c., swarm in anything but agreeable proportion. *C.* possesses few good roads. Its railroads comprise the Panama line and several short lines from cities to navigable streams. In the mountainous defiles, Indians are used for the purpose of carrying travellers over rough and dangerous localities. *C.* possesses considerable mineral wealth, as gold, silver, copper, &c., but this is as yet unproductive, enterprise being in a

stagnant state, and the country, speaking generally, a hundred years behind the times. The inhabitants of *C.* comprise the usual Hispano-American varieties of race; and to the educated Creole class must be conceded the merit of being in the first rank of native S. Americans in point of mental culture. This republic is divided into nine departments; viz., Antioquia, Bolivar, Boyaca, Cauca, Cundinamarca, Magdalena, Panama, Santander, and Tolima. The Roman Catholic religion is that of the State, but other creeds are tolerated.—*Prim. towns.* Bogotá (the capital), Medellin, Bucaramanga, Cali, Cartageua, Santa Marta, Chagres, and the sea-ports of Aspinwall and Panama on the Panama Isthmus.—*Hist.* New Granada was discovered by Ojeda in 1499, and the first settlement was made by the Spaniards in 1510. The people proclaimed their independence in 1811. The State was united with Venezuela and called Colombia, in 1819, and with our S. American States in 1823. This union was dissolved in 1829. New Granada then became an independent republic, and Gen. Santander was installed president in 1833. A new treaty of union was concluded by the plenipotentiaries of the States of New Granada, in 1861, when the republic took the name of the UNITED STATES OF COLOMBIA. Proposals being made to Ecuador to join this union, and rejected, a war ensued, which resulted in the triumph of Colombia, and a treaty of peace, signed Dec. 30, 1863, by which Gen. Mosquera, on the part of *C.*, abandoned the project of bringing in Ecuador by force. From 1864 to 1875 civil war was almost continuous, and in 1886, the federal constitution having proved unsatisfactory, a more centralized government was formed under the name of the REPUBLIC OF COLOMBIA. *Pop.* (1887) 4,600,000.

Colombo. or COLUMBO, a fortified sea-port town of Ceylon, the modern cap. of the island, and seat of govt., on the S. extremity of the W. coast of the island; Lat. 6° 55' N., Lon. 79° 45' E. The town within the walls is regularly laid out in the European style, with one-story houses, faced with verandahs. It possesses some fine public buildings, and is, taken altogether, a handsome and flourishing place. The harbor of *C.* is now excellent, owing to the building of a substantial stone breakwater, at a cost of about \$5,000,000. The first stone whereof was laid in 1875, but is now completed and *C.* is now the depôt for nearly all the foreign trade, and also possessing a large up-country traffic. In 1517, the Portuguese effected a settlement; in 1656 it was captured by the Dutch, and was then a prosperous place; in 1796 the Dutch were dispossessed by the British, who still retain possession. *Pop.* 1891, 125,926.

Colon. *n.* [Fr., from Gr. *kolon*.] (*Anat.*) The central and the largest portion of the large intestine. The *C.* commences at the cæcum, and ascending up the right side of the abdomen, crosses in front of the stomach, and then descending on the left side, after a zigzag curve terminates in the rectum. See *INTESTINES*.

(*Gram.*) A point or character formed thus (:), and is used to mark a pause less than that of a period, and greater than that of a semicolon; or rather it may be said to be used where the sense of a passage is complete, but the sentence is not concluded. It distinguishes a member of a sentence which would make a complete sentence of itself, but is followed by an additional part, making it more full and complete. It is also used before passages, etc., to which direct mention has been made. In practice, even among the best writers of the present day, the colon and semicolon are frequently confounded; and, indeed, the former is now going very much out of use.

Colon, in Central America. See *ASPINWALL*.

Colon. in Michigan, a post-village and township of St. Joseph co., about 32 m. S.W. of Marshall, and 1½ m. S.W. of St. Joseph River.

Colona. or COLONA STATION, in Illinois, a township of Henry co., about 12 m. E. of Rock Island.

Colonel. (*kôr-nel*), *n.* [Fr. *colonel*, from *colonne*—Lat. *columna*, a column. Literally, the commander of a column of troops.] (*Mil.*) The chief commander of a regiment of troops next in rank below a brigadier-general, and above a lieutenant-colonel.

"Captain, or colonel, or knight in arms."—*Milton*.

Coloneley. *Colonelship.* (*kôr-nel-ee*, *kôr-nel-ship*), *n.* (*Mil.*) The office, rank, or commission of a colonel; as, *colonel by brevet*.

Colonel's Creek. in S. Carolina, enters the Wateree from Richland district.

Colonel's Fork. in S. Carolina, a post-village of Pickens' district.

Colonial. *a.* Pertaining, or relating, to a colony; as, *colonial trade*.

Colonial Law. *n.* The name applied to the body of law in force in the colonies of America at the time of the commencement of her independence, which was, in general, the common law of England, with such modifications as colonial experience had introduced. The *C. L.* is thus a transition state through which our present law is derived from the English common law.

Colonist. *n.* An inhabitant of a colony.

Colonicitis. *n.* (*Med.*) Inflammation of the colon; colitis; dysentery.

Colonization. *n.* [Fr. *colonisation*.] Act of colonizing, or state of being colonized; as, the *colonization* of Liberia.

Colonization Society. *n.* A society founded in 1816, in the U. States, with a view "to promote and execute a plan for colonizing (with their consent) the free people of color residing in this country, either in Africa or some other place, as Congress shall deem expedient." Its principal work has been the colonization of Liberia, to which word we refer for more ample information.

Colonizationist. *n.* One who favors colonization.

Colonize. *v. a.* To plant or establish a colony in; to settle in; as, to *colonize* a newly discovered country.

—*v. i.* To migrate to or settle in a new country, as inhabitants.

Colton. in Michigan, a post-village of Colon township, St. Joseph co., on Swan Creek, about 155 m. W. by S. of Detroit. *Pop.* (1897) 500.

Colonna. a village in the Papal States, which gave its name to one of the most powerful and celebrated aristocratic Roman families. The Colonna produced in the Middle Ages many distinguished members, among whom, besides Pope MARTIN V. (*q. v.*), we quote the following: C. PROSPERO, son of Antonio Colonna, prince of Salerno. He assisted Charles VIII. of France to conquer Naples, but subsequently aided in retaking it for the House of Aragon. He served under the great Gonsalvo, and was charged by him to conduct Cesare Borgia prisoner to Spain. In 1513, Prospero defeated the Venetians near Vicezza, was captured by the French two years later, but won several victories over them in 1521 and the following years. D. 1523.

C. POMPEO, nephew of the above, a restless and intriguing Roman cardinal. He quarrelled in succession with the Popes Julius II., Leo X., and Clement VII., and had part in all the troubles of the Court of Rome. When Clement VII. was the prisoner of the Constable de Bourbon, Pompeo exerted his influence for his liberation. He at length became viceroy of Naples. D. 1532.

C. VITTORIA, an Italian poetess, daughter of Fabrizio Colonna, high constable of Naples, b. 1490. When 4 years old, she was betrothed to a boy of the same age, Fernando d'Avalos, son of the Marchese di Pescara. At 17 they were married. After her husband's death in the battle of Pavia, (1525,) Vittoria C. found her chief consolation in solitude, and the cultivation of her poetical genius. During 7 years of her widowhood, she resided alternately at Naples and Ischia, and then removed to the convent of Orvieto, and afterwards to that of Viterbo. In her later years, she left the convent, and resided in Rome, where she died in Feb. 1547. Her poems were chiefly devoted to the memory of her husband, (see *AVALES*.) Among them, the *Rime Spirituali* (Venice, 1548) are remarkable for truth of sentiment and enlightened piety.—The C. palace (It. *Palazzo C.*) situated at the base of the Quirinal at Rome, is celebrated for its splendid picture-gallery and magnificent gardens.

Colonnade. *n.* [It. *colonnata*, from *colonna*, a column.] (*Arch.*) A row of columns which are generally placed in front of a large building, and support a roof projecting from the building itself; thus forming a portico.

Fig. 645.—COLONNADE OF THE LOUVRE.

When a colonnade is continued around the whole of the exterior of a building, or the interior, if it be a quadrangle with a court in the centre, it is called a peristyle. The most celebrated modern *C.* is that of the Louvre, at Paris, constructed by Perrault.

Colony. *n.* [Fr. *colonie*; Lat. *colonia*, from *colo*, to cultivate.] An establishment formed in foreign countries by a body of men who emigrate from their mother-country, but retain with it a certain political connection. The name is applied either to the body of inhabitants in a territory colonized, or to the territory itself. Various motives have, at different periods, led to the formation of colonies. Sometimes, as in the case of most parts of the ancient Greek colonies, they were formed by citizens driven from their native country by the violence of political factions; sometimes, as in the case of the Roman colonies, they were formed for the purpose of bridling subjugated provinces; the latter, indeed, were a species of camps or military stations, forming, as it were, the advanced posts of that mighty army which had its headquarters at Rome. Sometimes, again, as in the case of the Phœnician colonies, and of most of those established in modern times, they have been formed for commercial purposes, or in the view of enriching the mother country, by opening new markets from which she might, if she chose, exclude foreigners. Most of the Greek colonies being founded by private adventurers, who received no assistance from the government of the parent state, were really independent; the duty which they owed to their metropolis being such only as is due to kinsmen and friends, and not that due by subjects to their rulers. The Roman colonies, on the other hand, being founded by the State for an important political purpose, were always dependent upon Rome. They formed the great bulwarks of the empire. Nor was the conquest of any province ever supposed to be completed, till colonies had been established in it, and roads had rendered it accessible to the legions. The colonies established for commercial purposes have generally been subjected to such regulations as were deemed most for the advantage of the parent state. Their growth has thus in many instances been retarded; and they have been rendered less serviceable to their founders than they would have been had they been treated with greater liberality.

Colony. in Missouri, a post-village of Knox co., about 36 m. W.S.W. of Keokuk.

Colony. in Iowa, a post-township of Delaware co.

Colophany. See COLOPHONY.

Colophene, n. (Chem.) A liquid obtained by the distillation of colophony. It boils at 600°, and its sp. gr. is 0.940, being so much heavier than turpentine, from which it is also distinguished by its indigo-blue color, when seen obliquely, though it is colorless by directly transmitted light.

Colophon. (Anc. Geog.) A town of Ionia, at a small distance from the sea, first built by Mopsus, the son of Manto, and colonized by the sons of Codrus. It was the native country of Minernus, Nicander, and Xenophanes, and one of the cities which claimed the honor of having given birth to Homer. Apollo had a temple in it.

Colophon, n. [From the Greek proverb, "to put the Colophon to it;" i. e., to terminate an affair; in allusion to that famous Colophonian cavalry, whose charge was usually the finishing-stroke in battle.] (*Bibliog.*) An inscription on the last page of a book, before title-pages were used, containing the place or year, or both, of its publication, the printer's name, &c.

Colophonite, n. (Min.) A coarse, granular variety of Garnet, of a resinous lustre.

Colophony, n. (Chem.) Common resin, or *rosin*. The non-volatile portion of crude turpentine, so named after Colophon, in Ionia, whence resin was obtained by the Greeks.

Coloquin'tida, n. Same as COLOCYNTH, *q. v.*

Color, Colour. (kū'ler, n.) [Lat. *color*; Fr. *couleur*; etymol. uncertain.] The appearance which bodies present to the eye, or a sensation caused by the rays of light reflected from bodies: as, a gay *color*; a sad *color*.—Specious appearance to the mind; semblance; false show; palliation; pretext; pretence; superficial aspect; that which conceals the real character or quality of anything.

"Their sin admitted no *colour* or excuse."—King Charles I.

—Kind; species; variety of character.

"Boys and women are, for the most part, cattle of this *colour*."—Shaks.

—In the U. States, the distinguishing title applied to people of pure or mixed black blood; as, a person of *color*.—Any hue or tint other than white. Colors are divided into *primary*, *secondary*, and *tertiary*. The first are red, blue, and yellow; the second are orange, green, and purple; the third, citrine, olive, and russet; all of which exist in a great variety of tints or hues. See PRIMARY COLORS.

—Paint; dye; pigment; that which is used to give color; as, painters' *colors*.

(*Painting.*) That quality of a body which affects our sensation in regard to its hue. *Local colors* are those which are natural to a particular object in a picture, and by which it is distinguished from other objects. *Neutral colors* are those in which the hue is broken by partaking of the reflected colors of the objects which surround them. *Positive colors* are those unbroken by such accidents as affect neutral colors. See COLORING-MATTERS.

—*ph. (Mil.)* The banners or flags of regiments of infantry, on which are borne the devices, distinctions, badge, and motto of the regiment, and its number, in gold characters. The colors of a regiment are always saluted with the utmost respect by a guard, and it is customary for officers on the staff to salute colors when they are borne past at a review. The banners of regiments of dragoons are called *guidons*, and those of other cavalry regiments *standards*.

Color, v. a. To give some kind of color to; to tint; to dye; to tinge; to paint; to stain; as, to *color* a photograph.

"The rays, to speak properly, are not *coloured*."—Newton.

—To give a specious appearance to; to set in a fair light; to palliate; to excuse; to make plausible; to exaggerate in representation; as, to *color* a description.

"I would not favour or *colour* in any sort his former folly."—Raleigh.

—To *color* a stranger's goods. To allow a foreigner to enter goods at the custom-house in the name of a citizen, to avoid the alien's duty.

—*v. i.* To show color as a sign of confusion; to turn red in the face; to blush.

Colorable, a. Designed to cover or conceal; specious; plausible.

"They have now a *colourable* pretence to withstand innovations."—Spenser.

Colorableness, n. Plausibility; speciousness.

Colorably, adv. Speciously; plausibly.

Colorado, a W. central state of the U. States, bounded N. by Wyoming and by the State of Nebraska, E. by the latter and Kansas, S. by the territory of New Mexico, and on the W. by Utah. This territory lies between Lat. 37° and 41° N., and Lon. 102° and 109° W., having a length, E. to W., of about 375 m., by a width of 275 N. to S. *Area*, 103,475 sq. m., or 67,723,250 acres. *Gen. Desc.* C. presents, for the most part, a mountainous surface, being pierced through its centre by the Snowy Range of the Rocky Mountain chain. About 50 peaks are found in C. over 14,000 feet above sea level—Pike's Peak, for instance, having an altitude of 14,186 feet. Several of the higher summits wear a cap of eternal snow. Elevated plains, or plateaux, cover the E. and N.W. portions of this territory; while, between the ramifying *antennae* of the chief mountain system, large, and fertile valleys occur, which bear the local name of "Parks," and present the appearance of vast elliptical bowls of verdure. Of these parks, the most noticeable are the "North," "South," and "Middle,"—named according to their geographical position, and San Luis Park, the finest of all. The South Park covers in length about 60 m. of good pasture land, although as yet

largely uncultivated except where those fertile lands bordering on the river-banks have tempted a partial husbandry. Geologically speaking, the San Luis Park promises to far surpass its above-mentioned congeners in importance; this tract of country presents a concave area of 18,000 sq. m., with a perfectly flat bottom, honey-combed (so to speak) by not less than 35 mountain streams, and scarped in by an almost circular wall or "barranca," culminating in high mountain-peaks. This natural amphitheatre is well timbered with pine, fir, spruce, hemlock, oak, cedar, and other forest-trees of enormous size, and broken up in numberless sections of rich meadow land, covered with heavy and nutritious grasses. The geological aspect of this "Park" is rich in the extreme; from the primary rocks to the sedimentary drift around San Luis Lake, all the elements of the geologic series seem to be represented. The crevices of the secondary rocks on the mountain sides are charged with the richest ores; the source of the golden detritus found in the gulches below. These deposits become diluted and impoverished as the slope of the mountain descends. The downward terraces possess a fauna and flora increasing in richness and variety; cereals, flax, vegetables, and fruits flourish upon the bottom plain, and sheep and cattle attain a superior development upon the grassy acclivities. The products of the dairy, the orchard, and the garden give promise of future value to be realized by a systematic industry. Beneath the surface is a sub-soil of almost inexhaustible peat. This "Park" is irrigated principally by the rivers Rio del Norte, Culebra, and Costilla, and their affluents. The elements of C. as an agricultural country are as yet variously reported. Irrigation is the great need. Already, in 1887, she had 800 m. of first-class irrigating canals, 3,500 m. of secondary and 40,000 m. of smaller ditches, which will irrigate 2,200,000 acres. Since then the length has much increased. The largest canal is taken from the Rio del Norte. It is 98 ft. wide at the top and 75 ft. on the bottom, with a carrying capacity of 207,000,000 cubic ft. daily. The main line is 20 m. long. Stock raising is carried on to a large extent. The mineral wealth of C. is extraordinary. Gold, silver, iron, zinc, copper, salt, gypsum and coal abound. Of the latter, veins have been found near Denver 16 feet thick, with a percentage of fixed carbon of 55.31. No accurate estimate can be made of the amount of gold obtained from C. during the earlier days; but probably not less than \$30,000,000 between 1859-1868. From 1868 to 1897 the total yield is estimated at \$40,000,000. Silver is also found associated with the gold-bearing strata. In 1866 immense veins were found separated from the gold, upon the W. of the Rocky Mountains. The total bullion yield to 1897 was over \$95,000,000. At Denver are found some of the finest smelting works in the world. The State is drained by the Colorado, Arkansas, the Platte,

Fig. 646. — GOLD DIGGINGS, BLACK-HAWK.

Bear, Kansas and Grand Rivers.—*Polit. Div.* C. has 55 counties. Its arable lands comprise about 15,000 sq. m., and its grazing lands not less than 47,000. The mountain slopes are generally covered with forests of pine, spruce and other coniferous trees, but these are being rapidly reduced by the processes of lumbering. The native grasses of C. are rich and nutritious, and render grazing a profitable industry. The climate of C. is reported beneficial for lung and throat troubles. The range of the thermometer at Denver is from 17° to 100°—average rainfall for 3 years, 14 inches. Bayard Taylor says of the climate, "An air more delicious to breathe cannot anywhere be found." The Denver and Rio Grande R.R. crosses the Veta Pass at an elevation of 9,339 feet above tide water, said to be the highest point reached by any R.R. in North America. The maximum grade is 211 feet per mile.—*Hist.* Gold was discovered in C. in 1857. C. was organized into a territory in March, 1861, admitted into the Union Feb., 1875, and a Constitution was ratified July, 1876, hence called the Centennial State. The legislature meets biennially. The Judiciary is elective. C. abounds in Chalybeate, Soda, Sulphur and Thermal Springs, at some of which excellent hotel accommodations are found, and are frequented by visitors from all parts of the U. S., indeed, for salubrious air, excellent hotels, and beautiful scenery, these resorts are equal to the best in the country. Denver, the capital of C., is one of the most progressive cities of this progressive country. It was one of the first to introduce the electric light. *Population* (1880) 194,649; (1890) 412,198; (1897) 480,000.

Colorado, in Texas, a S.E. co.; *area*, abt. 1,020 sq. m. The Colorado River traverses it. The soil is in part alluvial and very fertile. *Cap.* Columbus.

Colorado Springs, in Colorado, cap. El Paso co., of the Denver and Rio Grande R.R., 75 m. S. of Denver and 5,975 feet above tide. Much beautiful scenery and fine residences adorn the city, with Pike's Peak in close view. *Pop.* 1890, 11,140.

Colorado, or Rio Colorado, (sometimes called also, the COLORADO OF THE WEST, to distinguish it from the Texan Colorado,) a large river of the U. States rising in the Rocky Mountains, and having its principal headwaters in Colorado, W. of that chain, forming two forks, the Green and Grand rivers, which meet together in about Lat. 35° 30' N., and Lon. 112° 55' W. Thence, taking successively a S.W., W., and due S. course, this river emerges into the sea at the head of the Gulf of California, in about Lat. 32° 10' N., Lon. 114° 20' W. Its length, including its chief affluent, Green River, is estimated at about 1,200 m. The name of "Rio Colorado," by which it is not unfrequently known, is derived from the generally red color of its waters, the result of the disintegration of the reddish-clayey soil which they drain in their course. From its embouchure at Port Isabel, the C. runs through an open, and well timbered, and seemingly fertile country; which, as it approaches Fort Yuma, assumes a higher, but still cultivable, surface. The navigation of the stream hitherto has the advantage of flood-tides for the greater part of the distance, but is constantly liable to be impeded by shifting sand-bars. Ascending to La Paz, the C. presents a very crooked course, with a width of channel varying from 1/8th to 1/3d of a mile, and an average depth of from 4 1/2 to 8 feet. Fertile bottoms fringe its sides in the locality, until reaching the Barriers, the first rapids met with, about half-way to La Paz. At the Barrier navigation is practicable by two channels, one of which, usable at low water, is about 100 feet wide, and has considerable depth, with a rapid current. Past the rapid the country on either side consists of an elevated gravelly plateau, called the "Mesa," breaking off here and there into fertile gulches. Bottom-lands characterize the remainder of the way up to La Paz. After leaving this place, we find the stream acquiring a still greater width and lesser curvature, but with an occasional series of sand-bars. This aspect continues without change as far as Mohave Cañon. Here, the river cuts its way through almost perpendicular cliffs for several miles, and then flows on between accumulated rock debris, still, however, preserving a navigable channel, having deep water to the very feet of the rocks on either hand. Above the Cañon, and up to Fort Mohave, the state of things is not varied, but after leaving the latter, low mesas, sparsely vegetated, skirt the banks some places, while in others, fine, low, and wood-farm-lands come into appearance. The river continues passable to Cottonwood Island, now flowing through poor country, and taking a straight and easy position. About this island, a fertile, grassy, and well-wooded tract of land prevails. After passing El Dorado Cañon, we reach the famous Roaring Rapids, where the water makes a clean shoot through a narrow channel in the centre. Higher up are more rapids, but not of any consequence. The river now takes a smooth, slack current through but an indifferently fertile territory, as far as Callville. At a short distance from Graceton, higher up the C. becomes lost in a sequence of cañons, or, more properly speaking, a single one in reality, viz., Grand Cañon. An expedition under the command of Col. Powell left Chicago in the spring of 1868, to explore the upper waters of the C., and more particularly the great cañon system attaching to it. He reported that he descended the Great Cañon for a distance of 400 miles, where the river flowed on either side through a gorge overhung by precipitous walls of rock from 2,000 to 4,000 feet above the bed of the stream; and further that the territory in which the cañon is located presents an almost indescribable barren and worthless aspect, and is therefore quite impracticable for purposes of cultivation and settlement. Again, Col. P. further reported his inability to find any indications of mineral wealth, excepting an odd deposit of marble, and that accessible to working. Since Col. Powell's exploration others have investigated the Grand Cañon region, which is now acknowledged to be the most extensive and unvaluable example of river denudation upon the face of earth. The cañon walls throughout their upper part are from 4,000 to 7,000 feet in perpendicular height, some points rising sheer from the water, at others a talus of fallen rocks or a strip of fertile soil on one or both sides. The total area of the Colorado river basin about 240,000 sq. miles. It was formerly much better adapted to human habitation than at present, as proved by the presence of great numbers of prehistoric dwellings, perched on cliffs within a cañon, or on a ridge or mesa, for protection from foes. This country now is mainly barren and desert, and incapable of supporting human life, but it nevertheless presents prospect of endless enjoyment, to the scientific tourist especially, such as is not elsewhere to be found.

Colorado River, in Texas, rises in the San Geronimo Mountains, Lat. 32° N., Lon. 109° 30' W.; flows for the 200 m. in an E., then in a S.E. direction, until it empties into Matagorda Bay, and by a small branch discharges into the Mexican Gulf, after a course of over 900 during which its average width is about 250 feet. A beautiful, clear stream, flowing through a highly fertile region. It may be navigated, during a portion of the year only, as far up as Austin by steamers of 1 draught.

Colorado River, COBU LEUBO, or COBU LEOPU RI

in the *Argentine Republic*, rises in the Andes, near Lat. 36° S., flows S.E. through an imperfectly known country, and enters the Atlantic in Lat. 39° 51' S., Lon. 32° 4' W. In its upper portion it is also known as the Mendoza and the Desaguadero. Its total length is about 900 miles.

lora'dos, (Los,) in the Gulf of Mexico, a cluster of rocks and islets off the N.W. side of the island of Cuba, n. Lat. 22° 15' N., Lon. 84° 40' W.

lora'tion, n. Act or practice of coloring. (R.)

l'orature, n. [Lat. *coloratura*.] (Mus.) Graces in music from variation of tone.

l'or-blind, a. Having an indistinct perception of color.

l'or-blindness, or ACHROMATOPSY, n. (Med.) A curious affection, which renders one incapable of distinguishing colors, or, at any rate, certain colors. In some cases the insensibility is complete, while in others some colors only can be well distinguished. Persons affected in this manner can distinguish the outlines of bodies without difficulty, and they can also discriminate between light and shade, but they are unable to distinguish the different tints.

l'ored, Coloured, a. Having color; dyed; tinged, stained or streaked; striped; as, a *colored engraving*.

l'aving a specious or plausible aspect or character.

Colored people, people possessing African or negro blood, whether pure or mixed.

l'or-guard, n. (Mil.) A body of soldiers told off for the service of protecting regimental colors.

lorific, a. [Fr. *colorifique*; Lat. *color*, and *facio*, to make.] Producing or communicating color; able to give color or tint to other bodies.

l'oring, n. [Fr. *coloris*.] (Painting.) That part of the art which especially regards the effect of colors; the art of disposing colors so as to produce the desired effect. Specious appearance; as, "the crafty coloring of this mischief."

l'oring-matters, n. pl. (Painting.) All nature bounds in these principles, and art has added to the number. The colored appearance is not an inherent property of the body itself, but due to its effect upon ordinary light, which, as is well known, is composed of rays of all colors. If a body absorbs nearly all the light, it appears black. If it absorbs scarcely any, but reflects or throws it off, it will appear white. But if the body contains any substance (pigment) that has the power of decomposing white light, its color will depend upon which of the rays it absorbs and which it reflects. Strictly speaking, therefore, the color of a pigment is due to light which it cannot absorb, and which is reflected to the eye of an observer.—See PRIMARY COLORS.

l'orist, n. [From Lat. *colorare*, to color.] One who colors; specifically, a painter whose pictures excel in coloring.

l'orless, a. Destitute of color; undistinguished by color; transparent; as, a *colorless face*.

l'or-man, n. A vender of paints, colors, &c.

l'or-sergeant, n. (Mil.) A non-commissioned army officer who acts as color-bearer of a regiment of infantry, or a brigade of artillery.

l'ossal, Colosse'an, a. [See *Colossus*.] Like a colossus; gigantic; huge; very large; as, a *colossal figure*.

(*Fine Arts*.) The term *colossal* is applied to any work of art remarkable for its extraordinary dimensions. It is, however, more applied to works in Sculpture than in other arts. It seems probable that *C.* statues had their origin from the attempt to astonish by size at a period when the science of proportion and that of imitation were in their infancy. *C.* statues of the divinities were common both in Asia and Egypt. By the description of the palace or temple attributed to Semiramis, it is bounded with *C.* statues, among which was one forty feet in height. In Babylon we learn from Daniel that the palaces were filled with statues of immense size, and in the present day the ruins of India present with statues of extraordinary dimensions. The Egyptians surpassed the Asiatics in these gigantic monuments; considering the beautiful finish they gave to such a hard material as granite. Sesostris is said to have been the first who raised these *C.* masses; the statues of himself and his wife having been 30 cubits in height. This example was imitated by his successors, the ruins of Thebes sufficiently testify, the two Memnon being still in existence. The taste for *C.* statues prevailed also among the Greeks. The statue of the Sun at Rhodes was executed by Chares, a disciple of Lysippos; and the great Phidias contributed several works of this order. The colossus at Tarentum by Lysippos was less than 40 cubits in height; and the difficulty of moving it, rather than the moderation of the conqueror, prevented Fabius carrying it off with the Hellenes from the same city. Before the time of the Romans, statues were frequently executed in Italy. The first monument of this nature set up in Rome was one placed in the capitol by Sp. Carvilius after his victory over the Samnites. This was succeeded in after-times by many others, of which those now on Monte Cavallo, said to be of Castor and Pollux, are well known to most persons. The principal Roman colossus was the figure of himself, the Sun, set up by Nero, before the Golden House, near the site of the temple of Venns at Rome; it was in bronze, the work of Zenodorus, and if, as Pliny says, it was 110 feet high, it was larger than the colossus of Rhodes. The great Roman amphitheatre known as the *Colosseum* is supposed to have been so called because it was built on the site or place of this figure. In modern times, the largest that have been erected are those of Carlo Borromeo, at Arona near Milan, and the

bronze *Barbaria* of Schwanthaler at Munich, cast by Stiglmeier, nearly 60 feet high.

Colos'se, or Colossæ. (Anc. Geog.) A city of Phrygia, situated on a hill near the junction of the Lycus with the Meander, and not far from the cities Hierapolis and Laodicea, at a small distance from the modern village *Chomus*. It was destroyed by an earthquake about A. D. 65, while Paul was yet living.

Colos'see, in New York, a post-village of Oswego co., abt. 20 m. E. of Oswego.

Colosse'um, n. See AMPHITHEATRE, COLISEUM, and COLOSSEAL.

Colos'sians. (EPISTLE TO THE.) (Eccl. Hist.) One of the smaller canonical epistles of the New Testament, addressed by St. Paul to the Christians of Colossæ, a city of Phrygia. The evidences in favor of the authenticity of this epistle are so strong, that few even of the extreme rationalists of the present day have ventured to deny it. It is generally believed to have been written by the apostle Paul from Rome about A. D. 62. There is a very close connection between this epistle and that addressed to the Ephesians. They were both written about the same time, and the condition of both churches was somewhat similar. The chief object of the apostle in this epistle was evidently to counteract certain philosophic or Judaistic doctrines that had crept into the Colossian church, and which he regarded as endangering the purity of the Christian religion. He exhorts them steadfastly to adhere to the doctrines which he taught, and to reject all such errors. From the allusions made to them in this epistle, we gather that in many respects they resembled the dreamy speculations of the Jewish Essenes, moulded and extended by contact with the false philosophy which, under the form and name of Gnosticism, prevailed over the East.

Colos'sus, n.; Lat. *pl.* COLOSSI, Eng. *pl.* COLOSSESSES. [Lat.; Gr. *kolossos*.] A gigantic brazen statue at Rhodes, and formerly esteemed one of the seven wonders of the world. Its feet rested on two moles, which formed the entrance of Rhodes harbor, and ships passed full sail between its legs. It was 70 cubits, or 105 feet high. A winding staircase ran to the top, from which it is said that, by the help of glasses, the shores of Asia Minor could be discerned. It was partly demolished by an earthquake, 224 B. C., and remained in ruins for nearly 900 years. In 672 it was sold by the Saracens, who were masters of the island, to a Jewish merchant, who loaded 900 camels with the brass, the value of which has been estimated at \$150,000.

—Any statue or figure of giant-like proportions.—See COLOSSEAL.

Colos'trium, n. [Lat.] (Med.) The first lacteal secretion after confinement; the thin, saline, and laxative milk formed in the mother's breast after every delivery; and intended by nature to act as an aperient on the infant, and cleanse its stomach and bowels, and prepare both for the richer aliment secreted by the breasts on the following days.

Colportage. (kol'pör-tāj.) n. [Fr., from *colporteur*.] The system of distributing religious and moral tracts, &c., by the agency of colporteurs.

Colporteur, Colporter. (kol'pör'ter.) n. [Fr. *colporteur*, from Lat. *collum*, the neck, and *porto*, to carry.] Originally, a pedlar who carried his goods in a pack suspended from his neck. A term applied, in late years, to persons who travel for the purpose of selling and distributing tracts and religious books.

Col'quitt, in Georgia, a S.W. co.; area, abt. 600 sq. m. It is bounded on the E. by Little River, and is also drained by the Ocklockonee River. The surface is nearly level. Cap. Moultrie.

—A post-village, cap. of Miller co., abt. 100 m. E. of Columbus.

—A village of Montgomery co., at the forks of the Oconee and Ocmulgee rivers, abt. 100 m. W. by S. of Savannah.

Col'staff, Cole'staff, n. [From Lat. *collum*, the neck, and Eng. *staff*.] A staff or pole used by two persons for the carriage of loads upon their shoulders.

Colt, n. [A. S. *colt*; Swed. and Goth. *kullt*, a boy; probably allied to A. S. *cild*, cold.] A young male of the equine genus, or horse kind:—opposed to filly; as, a two-year-old colt.

"To break the stubborn colt, to bend the bow."—Dryden.

—A young, foolish fellow; a harum-scarum lad, a bobbledoyley.

"Ay, that's a colt, indeed; for he doth nothing but talk of his horse."—Shaks.

Colt, SAMUEL, an American inventor, b. at Hartford, Connecticut, 1814, is chiefly known as the inventor of the REVOLVER, *q. v.* Mr. C. was also one of the inventors of the submarine telegraphic cable, having laid and operated with perfect success, in 1844, such a cable from Coney Island and Fire Island to the city of New York, and from the Merchants' Exchange to the mouth of the harbor. D. 1862.

Colt'er, Coult'er, n. [A. S. *cultor*; O. Fr. *coulter*, from Lat. *cultus*, a ploughshare, from *colo*, to till; W. *cylltawr*, from *cull*, that which separates.] (Agric.) The cutter; the fore cutting-iron of a plough.

Colt'-evil, n. (Farriery.) A disease of young horses, which consists in a swelling of the sheath.

Colt'harp's, in Texas, a P. O. of Houston co.

Col'tish, a. Like a colt; wanton; frolicsome; frisky; gay.

Col'ton, CALEB C., an English author, b. 1780, was educated at Eton, and King's Coll., Cambridge, where he graduated and obtained a fellowship. He wrote a satirical poem, entitled *Hypocrisy*, and another on *Napoleon*, but he obtained his chief reputation from *Lacon*, or *Many Things in Few Words*, which he published in 1820. Though a benefited clergyman, holding the vicarage of

Kew, with Petersham in Surrey, he was a well-known frequenter of the gaming-table; and having absconded, to avoid his creditors, in 1828, a successor was appointed to his living. He then went to America; but subsequently lived in Paris, a professed gamester; and it is said that he gained by this vicious course of life, in two years only, the sum of \$125,000. He blew out his brains while on a visit to a friend at Fontainebleau, in 1832. We copy from his own *Lacon* the following apophthegm: "The gamester, if he die a martyr to his profession, is doubly ruined. He adds his soul to every other loss, and, by the act of suicide, renounces earth to forfeit heaven!"

Colton, WALTER, an American author, b. in Rutland, Vt., 1797. In 1822, he was ordained a Congregational clergyman. In 1828, he became editor of the *American Spectator*, published at Washington, and an intimate friend of General Jackson, who gave him a chaplaincy in the navy. After several voyages, he was ordered to the squadron for the Pacific, and, a short time after his arrival at Monterey, he was appointed alcalde of the city. He also established the "Californian," the first newspaper printed in California. Besides other works, he is the author of the following popular volumes of travels: *Ships and Shore; Visit to Constantinople and Athens; Deck and Port; Three Years in California; Land and Lee*, and *the Sea and the Sailor*. D. 1851.

Col'ton, in New York, a post-village and township of St. Lawrence co., on the Racket River, abt. 7 m. S. by E. of Potsdam.

Col'tou, in Ohio, a post-office of Henry co.

Colt's Foot, n. (Bot.) See TUSSELLAGO.

Colt's Neck, in New Jersey, a post-village of Monmouth co., abt. 5 m. N.E. of Freehold.

Colt's Station, in Pennsylvania, a village of Erie co., about 15 m. E. of Erie.

Colt's-tooth, n. An imperfect or superfluous tooth in young horses.—A love of youthful pleasures.

"Your colt's-tooth is not cast yet?"—Shaks.

Col'uber, n. [Lat., a serpent.] (Zool.) A family of Ophidian reptiles comprising all serpents, whether venomous or not, whose scales beneath the tail are arranged in pairs; but restricted, according to Cuvier's arrangement, to the harmless snakes. Among the genera, which are very numerous, is the genus *Bascanion*, containing

Fig. 647. — BLACK SNAKE.
(*Bascanion constrictor*.)

the *Black Snakes*. The common Black Snake, *B. constrictor*, is found throughout the U. States. The color is black, inclining to slate-color beneath, with the throat and lips white. It grows to the length of six feet; the scales are smooth, and its motions are rapid. It climbs trees and branches, and devours the young of birds, but is perfectly harmless to man.

Colu'bridae, n. pl. (Zool.) The Coluber family. See COLUBER.

Colu'brine, a. Serpent-like; crafty; cunning.

—Relating to the coluber, or to serpents generally.

Col'uguape, in Patagonia, a lake in Lat. 47° S., Lon. 72° W. Length abt. 35 m. It is supposed to be the source of Port Desire River.

Colum'ba, n. See CALUMBA.

Colum'ba, n. (Zool.) A genus of birds of the *Columbidae* family, distinguished by having the head large, and the tail short, broad, and rounded. It comprises the Band-tailed Pigeon, *C. fasciata*; the Red-billed Dove, *C. flavirostris*; and the White-headed Pigeon, *C. leucocephala*, of Florida Keys.

Colum'bæ, n. pl. (Zool.) The Doves, a sub-order of birds, order *Rasores*, comprising those which have the bill shorter than the head, the basal portion covered by a soft skin in which the nostrils are situated, the hind toe on the same level as the others, and the anterior toe without a basal membrane. They live in pairs, lay generally but two eggs for a brood, but breed often, and feed their young, which are hatched in a very feeble condition, with macerated food from their own crops. This sub-order is chiefly represented by the *Columbidae* or Dove family.

Colum'ba, (St.) often called the patron-saint of the Scots Highlanders, b. in Ireland about 521. In 565 he left his country with the intention of preaching the gospel to the Picts, and established himself in the Island of Hy, which was given to him by Bridius, the Pictish king, and afterwards called Iona, in allusion to his name; Iona being derived from a Hebrew name signifying a dove. After having accomplished many miracles, he buried in his island two Scottish kings—Covallins and Kinnatil,—and crowned a third. He d. abt. 597. Many years after, his body was translated to Down, and deposited beside the remains of St. Patrick and St. Bridget.

Colum'ba Noa'chi, n. (Astron.) A small constellation formed by Halley in the S. hemisphere, near the hinder feet of "Canis Major."

Colum'bauns, (St.) a monk, b. in Ireland about 540. He went to France in 590, and founded the celebrated monastery of Luxeuil, over which he presided for 20 years. The enmity of Queen Brunehaut caused him to be ordered back to Ireland, from whence he journeyed into Italy, where he founded the monastery of Bobbio in 615. The order of the Columbans was united to that of the Benedictines in the beginning of the 8th century.

Columbarium, n.: *pl.* COLUMBARIA. (*Arch.*) A subterranean sepulchre, or crypt, in the walls of which were recesses for cinerary urns.—Also, applied to the recesses themselves.—The holes left in the walls of a building for the insertion of the ends of timbers; so called from resembling the niches of a pigeon-house.

Fig. 648. — COLUMBARIUM.
(Discovered at the Villa Ruffini, 1822.)

Col'umbary, n. [*Lat. columbinus*, from *columba*, a dove.] A dove-cot; a pigeon-house.

"The earth of columbaries, or dove-houses, is much desired in the artifice of saltpetre."—*Brownie*.

Col'umbate, n. [*Fr. columbate*.] (*Chem.*) A salt formed of columbic acid and a base.

Colum'bia, n. a name given to the United States.

Colum'bia, in Alabama, a township of Henry co., on the Chattahoochee, 120 m. from Montgomery.

Colum'bia, in Arkansas, a S.W. co., adjoining Louisiana. The Dorcheat River and other smaller streams drain it. Surface level, and soil productive. *Cap.* Magnolia.

—A post-village, cap. of Chicot co., on the Mississippi River, abt. 115 m. S.S.E. of Little Rock.

Columbia, in California, a post-town of Tuolumne county, on the Stanislaus River, 4 miles N. of Sonora.

Columbia, in Connecticut, a post-village and township of Tolland co., 20 m. E. by S. of Hartford.

Columbia, in Florida, a N.E. co., adjoining Georgia; *area*, abt. 1,000 sq. m. The Suwanee River forms its W. and N.W. boundary, as the Santa Fé does its S. The surface is mostly level and covered with pine timber, and the soil sandy. *Cap.* Alligator.

Columbia, in Georgia, an E. co.; *area*, abt. 580 sq. m. The Savannah River, which bounds it on the N.E., also separates it from S. Carolina. The surface is uneven, and the soil moderately fertile. Gold has been found. *Cap.* Appling.

—A village of Columbia co.

Columbia, in Illinois, a post-village of Monroe co., abt. 200 m. S. by W. of Springfield.

Columbia, in Indiana, a township of Du Bois county.

—A post-village and township of Fayette co., about 5 miles E.S.E. of Indianapolis.

—A township of Gibson co.

—A township of Jennings co.

—A township of Martin co.

—A township of Whitley co. Also the title of many other villages and post-offices in the U. S.

—A city, cap. of Whitley co., on a branch of the Eel river, about 105 m. N. N. E. of the city of Indianapolis. *Pop.* (1897) about 4,000.

Columbia, in Iowa, a post-office of Marion co.

—A township of Tama co.

—A village and township of Wapello county, on the Des Moines River, about 70 miles S.W. of Iowa City.

Columbia, in Kentucky, a township, cap. of Adair co., abt. 100 m. S.S.W. of Frankfort.

Columbia, or Columbus, in Louisiana, a post-village, cap. of Caldwell parish, on the Washita River, abt. 230 m. N. by E. of Baton Rouge.

Columbia, in Maine, a post-village and township of Washington co., on Pleasant River, abt. 130 m. E. by N. of Augusta.

Columbia, in Michigan, a village of Ingham co., on Grand River, about 12 m. S. by W. of Lansing.

Colum'bia, or COLUMBIANVILLE, a post-village of Lapeer co., on Flint River, about 40 m. N. by W. of Pontiac.

—A post-township of Jackson co.

—A township of Tuscola co.

—A township of Van Buren co.

Colum'bia, in Mississippi, a post-village, cap. of Marion co., on Pearl River, 90 m. S. by E. of Jackson.

Columbia, in Missouri, a township and post-village, cap. of Boone co., about 35 m. N.N.W. of Jefferson City, and about 10 from the Missouri River. It is the seat of the State University.

—A village of St. Louis co., at the mouth of Missouri River.

Columbia, in N. Carolina, a township of Randolph co., on Deep River, a few m. from Ashborough.

—A twp. of Tyrrel co., abt. 182 m. E. of Raleigh.

Columbia, in New Hampshire, a post-township of Coos co., on the Connecticut River, about 110 m. N. of Concord.

Columbia, in New Jersey, a village of Chatham township, Morris co., about 13 m. W. of Newark.

—A village of Mercer co., about 17 m. N. of Trenton.

—A post-village of Warren co., on the Delaware River, by Paulinskill Creek, about 10 m. N. of Belvidere.

Columbia, in New York, an E.S.E. co.; *area*, about 620 sq. m. It adjoins Massachusetts on the E., and is bounded by the Hudson River on the W. In the E. part the surface is hilly; the W., generally level and fertile. Iron and lead ores are found; also limestone, slate, and marble. The warm springs of New Lebanon, in the N. E. part, are a favorite public resort. *Cap.* Hudson. *Pop.* (1890) 46,200.

—A post-township of Herkimer co., about 70 m. W. by N. of Albany.

Columbia, in Ohio, a post-village and township of Hamilton co., on the Ohio River, about 5 m. above Cincinnati.

—A village of Licking co., 16 m. E. of Columbus.

—A township of Lorain co.

—A township of Meigs co.

—A village of Putnam co., 45 m. N.N.W. of Bollefontaine.

Columbia, in Oregon, a N.W. co.; *area*, about 600 square miles. It borders on Washington on the N., from which it is separated by the Columbia River. It is traversed by the Klaskanine and Scappoose rivers. The surface is varied by mountains and valleys; the former being covered with forests of hemlock, cedar, fir, and maple. The soil in the valleys is very fertile. Iron ore is found in large quantities, and salt springs abound. *Cap.* Saint Helen.

Columbia, in Pennsylvania, an E. central co.; *area*, about 375 sq. m. The N. branch of the Susquehanna River, and the Catawissa and Fishing creeks, traverse it. The surface is broken by the Knob and Catawissa mountains, and the Muncey Hills of the Alleghany range. The limestone basis of the valleys renders the soil very fertile. *Cap.* Bloomsburg.

—A village and township of Bradford co., 24 m. W. by N. of Towanda.

—A post-borough in W. Hempfield township, Lancaster co., on the Susquehanna River (which is here nearly a mile wide), about 28 miles S.E. of the city of Harrisburg.

—A post-office of Lancaster co.

Columbia, in S. Carolina, a city, cap. of the State, and seat of justice for Richland district, on the E. bank of the Congaree River, below the junction of the Broad and Saluda rivers, 124 m. N.N.W. of Charleston, and 500 from Washington. *Lat.* 35° 57' N., *Lon.* 81° 7' W. It is built in a fine situation, and is one of the handsomest towns in the State, being well laid out with rectangular streets and squares, and covering an area of over 2 m. The greater part of the houses are built of wood, sheltered by parterres of trees. *C.* is the seat of the College of S. Carolina, founded in 1804, which is enriched by good endowments, and contains a large and valuable library. The other noticeable public buildings are, the State House, Insane Asylum, Court House, Market House, many fine churches (of various denominations), 3 banks, and the State Arsenal. Eight newspapers are in flourishing existence, and the city possesses several literary and educational institutions. *C.* is at the head of river-navigation, and connects with Charleston, Wilmington, Augusta, &c. by various railroads. *Pop.* (1897) abt. 16,000.

Columbia, in Tennessee, a township and post-village, cap. of Maury co., on Duck River, 41 m. S. by W. of Nashville.

Columbia, in Texas, a post-village and township of Brazoria co., on the Brazos River.

Columbia, in Wisconsin, a S. central co.; *area*, about 727 sq. m. The Wisconsin and Neenah rivers traverse it. The surface is undulating and the soil fertile. *Cap.* Portage City. *Pop.* (1897) about 30,000.

Columbia, British, the Pacific province of the Dominion of Canada, bounded S. by the U. S., E. by Athabasca and Alberta, N. by the Northwest Territory, and W. by the Pacific ocean and Alaska, its N. boundary being the parallel of 60° N. It includes the important islands of Queen Charlotte and Vancouver (*q. v.*) *Area*, 382,300 sq. miles. The eastern part of the province is traversed by the Rocky mountains, whose highest peaks are Mt. Brown and Mt. Hooker (nearly 16,000 feet high). The E. districts are broken up into immense valleys, which are watered by the Columbia, while the W. district is traversed by Frazer, on whose lower waters is much fertile soil, while the climate is mild though rainy. In the interior the surface is very rugged and the climate severe. A marked feature of the coast line is the presence of fiords, locally called "cauals," which penetrate into the mountains of the Coast Range, here of moderate elevation. The lakes of British *C.* are similar in character, being as a rule very

long and narrow, and walled in by parallel mountains. On the Middle Frazer river and on the affluents of the Columbia there is much good grazing ground, and the abundance of water power affords unusual facilities for lumbering, the mountains being covered with valuable timber. For a long period before its invasion by civilization this region yielded to the Hudson's Bay Company large quantities of valuable furs, and it is still rich in fur-bearing animals. Fish are very abundant, especially salmon, but also cod, haddock, halibut, herring, sturgeon, &c., and the fisheries are of much importance. The country is rich in minerals, including gold, silver, copper, &c., while there is abundance of iron and coal. It was the discovery of gold in 1857 that led to the establishment of the colony in 1858, and brought thither an enterprising population. The yield of gold has been considerable, and various other minerals are mined. Victoria, on Vancouver Island, was made capital of the colony in 1868, and in 1871 British *C.* became a province of the Dominion of Canada.—*Many* These have become somewhat active. In 1891 there were 755 establishments, with a capital of \$14,349,149 and a production of \$11,916,928. Since then there has been considerable increase. Until 1885, when the Canadian Pacific Railroad was completed, British *C.* was isolated from the remainder of Canada, but it is now in easy and constant communication, and its population in consequence rapidly increasing and its resources being developed. Lines of steamers pass between Vancouver and Hong-Kong, and a telegraph cable under the Pacific ocean is in contemplation. The principal towns are Victoria, the capital, Nanaimo, New Westminster, and Vancouver, the terminus of the Canadian Pacific Railway. The province is represented in the Dominion Senate by 3 members, and in the House by 6. It has a Lieutenant-Governor and a Legislature of 27 members. *Pop.* (1891) 97,612.

Columbia University, an institution of learning in New York city, chartered in 1754, under the name of King's college, which name was changed to Columbia College in 1784, and to Columbia University in 1897. It has made several changes of location, and was in 1896 removed to the plot of ground between 116th and 120th streets, Amsterdam avenue and the Boulevard, where, on an area of about 17½ acres, new and commodious buildings had been erected. It embraces eight distinct scientific courses of study, schools of law, philosophy, medicine, &c., and has 275 instructors, while its classes in 1896 embraced 1,871 students. The library contains 223,000 volumes, and the income of the college from all sources is about \$650,000 annually. *President* (1897), Seth Low, LL.D.

Columbiad, n. [*From Columbia*, or the U. State (*Gun.*) A kind of heavy cannon, invented by the American Col. Bomford, and combining certain qualities of the gun, howitzer, and mortar. It was used in the war of 1812, but is now out of use, at least in its original form.

Columbia, (District of.) See DISTRICT OF COLUMBIA.

Columbia Falls, in Maine, a twp. of Washington co.

Columbian, a. [*From Columbus*, the discoverer of America.] Pertaining to America, or to the U. States.

Columbiana, in Ala., a twp. of Shelby co.

Columbiana, in Illinois, a village of Greene co., on the Illinois River, about 78 m. S.W. of Springfield.

Columbiana, in Ohio, an E.N.E. county, bordering on the Ohio River, which separates it from Pennsylvania; *area*, about 490 sq. m. It is intersected by the Little Beaver River and the Sandy and Yellow creeks. The surface is partly level and partly undulating. The soil is very fertile. Limestone, iron ore, and stone are found. *Cap.* New Lisbon.

Columbian College, Washington, D. C. Incorporated in 1821. In 1873, its name was changed to that of COLUMBIAN UNIVERSITY.

Columbian Grove, in Virginia, a post-township of Lunenburg co.

Columbia River, or OREGON, the largest stream on the W. side of N. America, with an extremely tortuous course. It rises in the Rocky Mountains, in about 116° W. Lon. It takes a course first N. by N. Lat., and 116° W. Lon. It then nearly S. for abt. 24 m. till about 53° N. Lat.; and then nearly S. for abt. 24 m. till its junction with the Flathead or Clarke's River. It then pursues a W.S.W. course, being precipitated by some very high falls, till it reaches Fort O'Kane, about 48° N. Lat. and 120° W. Lon., when it flows on about 48° N. Lat. and 120° W. Lon., where it is joined by the Great Snake River from the S.E. After receiving the latter, the *C.* turns to the W.; and pursuing that direction during the remainder of its course, falls to the Pacific Ocean, between Cape Disappointment and Cape Mudge, and Point Adams on the S.; in 46° 18' N. Lat. and 124° W. Lon. Its embouchure is 5 or 6 m. in width. It has not, where deepest, more than from 4½ to 5 fathoms water over its bar, on which the sea breaks with considerable violence, making its ingress and egress, to sailing-vessels, a work always of much difficulty, and practicable only, it is said, at certain seasons. Vessels ascend the *C.* to Fort Vancouver about 100 m. from its mouth; and vessels of very light draught advance about 80 m. further.

Columbia Station, in Ohio, a P. O. of Lorain co.

Columbia Village, in New York, a village of Lawrence co., on the Grass River, about 21 m. E. of Ogdensburg.

Columbiaville, in Indiana, a village of Martin co., about 95 m. S.S.W. of Indianapolis.

Columbiaville, in New York, a village of Stockport township, Columbia co., at the confluence of the Ki hook and Claverack creeks, a few m. N. of Hudson

Christopher Columbus

1446(?)–1506

Columbidæ, *n. pl.* [From Lat. *columba*, a dove.] (*Zoöl.*) The Dove family, sub-order *Columbæ*, comprising doves which have the bill horny at the tip, 12 and sometimes 14 tail-feathers, and the plumage more or less adorned with metallic lustre. About a dozen species are found in N. America, and all but 2 or 3 belong to the S. or S.W. States. See PIGEON.

Columbine, *n.* [Lat. *columbinus*, from *columba*, a dove.] A little dove.

(*B.t.*) See AQUILEGIA.

(*Dramatic.*) In pantomimes, the name given to the female performer in the harlequinade.

—*a.* Like, or pertaining to, a pigeon or dove; of a dove-color, or like the neck of a dove.

Columbite, *n.* [Fr. *colombite*.] (*Min.*) A rare, dark-gray, hard, crystalline mineral, containing nitric acid combined with the oxides of iron and manganese.

Columbinum, *n.* [From *Columbia*, America.] (*Chem.*) The former name of NIOBITE, *q. v.*

Columbo, *n.* See CALUMBA.

Columbus, CHRISTOPHER. [The Latinized form of the It. *Columbo*; Sp. *Colón*.] The discoverer of America, b. in Genoa, 1435 or 1436, (others say 1446.) It is said that his father followed the trade of wool-comber, but, in fact, we have no definite information about the family and early life of C. He went to sea at the age of 14. Little is known of him till we find him at Lisbon, in 1470. He was then about 35 years of age, tall, and well-formed, of dignified carriage, and engaging manners (see fig. 103). Already his hair had become quite white; doubtless in consequence of the hardships and anxieties of his early days. About this time he married Felepe Mónica de Palestrello, daughter of a deceased Italian navigator. He now occupied himself in constructing maps and charts, made several voyages to the coast of Africa, visited the Canaries and Azores, and, eager to pass the bounds of existing knowledge, made a voyage, in 1477, to the northward of Iceland. Before this time, however, he had conceived the design of reaching India by a westward course. Judging from the latest and best accounts, he gave by far too great an extension to the east of Asia; and, on high authority, took the size of a degree considerably below the truth, thus greatly under-estimating the earth's size. It followed that the Atlantic might easily be traversed. The scheme was a magnificent one; but it is difficult for us now, in the advanced state of our knowledge, to look at it in all its grandeur and boldness. He supported his views by the authority of Aristotle and other ancient writers, who had suggested that India might be reached by going west from the Pillars of Hercules; and by traditions and rumors concerning land to the west, and objects seen floating in the Atlantic, or cast ashore by westerly winds. Copious memoranda of all the grounds of his persuasion were found among his papers. To reach India by sea was still the great problem of geography. C. offered to John II. of Portugal to solve it by sailing westwards; and would most probably have prevailed upon the king to send out an expedition, had it not been for the secret counter-plotting of some of the council, whose duplicity, winked at by the monarch, so disgusted C., that he took his departure for Spain. This was in 1484 or 1485; his only companion was his son Diego, then about eleven years old, his wife having died some time previously. Though entering Spain in great poverty, he soon made friends, and got an introduction to the king and queen. They hesitated to undertake so great an enterprise, and several councils reported unfavorably; still C. persevered in new applications, and for seven years was kept in a painful state of suspense. At length, after a last trial, in February, 1492, he left the residence of the court, and set out on his way to France. Two of his friends got an immediate interview with the queen—overcame her scruples—and C. was brought back. Isabella had offered to pledge her jewels, but the king was afterwards prevailed upon to furnish the greater part of the funds, C. himself undertaking an eighth, and getting the same part of the profits. He was to have one-eighth of all metals, gems, and merchandise, the office of admiral, with descent of title, and to be viceroy and governor-general of the new lands. The articles of agreement were signed on April 17, 1492. On Friday, August 3, 1492, the expedition sailed from Palos, near Moguer on the Tinto; it consisted of three small vessels, two without decks (see fig. 104), and 120 men, who had been procured with the utmost difficulty, owing to the general dread of the voyage. The celebrated brothers Pinzon commanded the two smaller vessels, of about fifty tons each, named the Pinta and Nina; the admiral, the Santa Maria. The only difficulty encountered was the mutinous tendency of the crews, excited by their terrors. C. repressed these with extraordinary tact; he was, besides, a skilful sailor, and had helped a few years before did not exist. The compass had been receiving more attention, and the astrolabe, an instrument like our sextant, had been lately introduced.—Sitting on the high poop of his vessel, at 10 o'clock on the night of Oct. 11, 1492, gazing earnestly ahead, C. plainly saw moving lights upon some land. Four hours of most exciting suspense followed. At 2 A. M. Rodrigo Triana, a sailor in the Pinta, which was a little in advance, saw the land itself. Dawn revealed a lovely island—Guahani, or San Salvador, one of the Bahamas. He afterwards discovered Cuba and Hayti; and deeming all these portions of Asia—a delusion under which he labored till his latest hour,—he called the inhabitants Indians; a name which became general before the truth was known. The discovery produced an extraordinary sensation in Europe; and C. was received by the sovereigns, and in every part of Spain, with the highest honor.—On Sept. 25, 1493 he sailed from Cadiz with a fleet of

seventeen ships and 1,500 men, and discovered the Windward Isles, Jamaica, Porto Rico, &c., and founded a colony in Hispaniola. Disappointed in their hopes of making rapid fortunes, many of the adventurers who went out with him became discontented, and returning home, spread calumnies against the admiral. Leaving his brother Bartholomew governor, he returned home, was received with favor, and refuted all the charges preferred by his enemies. His third voyage, entered upon May 30, 1498, was rewarded by the discovery of Trinidad, the Orinoco, and the coast of Paria. He found the new colony in a disorganized state, and remained some time to restore order. Complaints, however, still reached Spain, and a commissioner named Bobadilla was sent out to institute inquiries. He exceeded his powers, and sent C. home in irons, with his two brothers, Bartholomew and Diego. There was a general burst of indignation in Spain: the king disclaimed complicity, and the queen bestowed her usual favor. Bobadilla was recalled, but the admiral was not reinstated. This favor he long sought in vain, and till the day of his death he got no redress, though there was not the semblance of proof against him. C. had served the king's purpose, who now repented that he had bestowed such powers and privileges. The admiral was, however, sent upon a fourth voyage, May 9, 1502, to search for a passage from the Caribbean Sea into what was supposed to be the great Indian Sea, from which Vasco de Gama had recently returned laden with the richest treasure. The voyage was disastrous; and the constitution of C., on which the infirmities of age had already made inroads, never recovered from the shock which it sustained. In coasting Central America, he got a hint, which, if followed up, might have led to the discovery of Mexico and the Pacific, and shed new lustre on his declining years. He returned at the end of the year 1504, and renewed his appeals to the justice and generosity of the king. While urging them in person, or by means of his son, brother, and other friends, he was seized with a violent attack of gout, and expired on May 20, 1506, in full possession of his faculties, and in a very pious frame of mind. In his latter days, his connection with, and neglect of, Beatrice Enriquez, of Seville, mother of his natural son Fernando, weighed heavily on his con-

Fig. 649. — HOUSE IN WHICH COLUMBUS DIED, (at Seville.)

science," and on his death-bed he made provision for her. Fernando was now eighteen years of age; he became the biographer of his father, by whom he had always been treated with the same affectionate regard as his other son. The latter, Don Diego, renewed the application for redress; and, at length, commenced a law process against the king, before the "high council of the Indies." This court decided against his majesty; and, about the same time, a mutual attachment having sprung up between the young admiral and the Donna Maria de Toledo, niece of the celebrated duke of Alba, who was cousin-german to Ferdinand, and high in his favor, such influence was brought to bear, that the king was obliged to yield; though not so far as to restore fully the dignities and privileges at first conferred. As vice-queen of Hispaniola, this lady behaved with great dignity, propriety, and spirit, and did excellent service to her husband, who, like his father, was never free from the persecution of enemies. Her eldest son, Don Luis, resigned all claim to the former titles for a handsome pension, with the titles of Duke of Veragua and Marquis of Jamaica. His eldest daughter married Don Diego, her cousin; and they jointly enjoyed the honors and estates, but died without issue;—and the legitimate male line became extinct. At length, in 1608, the property and titles passed into a branch of the house of Braganza, in the person of Don Nufiez de Portugallo, who was grandson of Isabella, third daughter of Don Diego C., by his wife, Donna Maria de Toledo. The remains of C. were taken in 1536 to Santo Domingo, and deposited in the cathedral of that city, whence they were conveyed with great pomp in 1795 to the cathedral of Havana. It has been, however, lately alleged that the bones conveyed to Havana are those of Diego, son of Christopher, and that the true remains of the great C. are those contained in a crypt discovered in 1877 in the cathedral of San Domingo. The transference of the remains in 1795 was made with so much caution and solemnity, that it would require overwhelming proof to conclude that a blunder was then made, and the wrong body carried away.

Columbus, in *Arkansas*, a village of Hempstead co., about 10 m. W. of Washington, the county seat.

Columbus, in *Florida*, a post-village of Columbia co., on the Suwanee River, about 80 m. E. of Tallahassee.

Columbus, a flourishing city of *Georgia*, cap. of Milledgeville co., on the E. bank of the Chattahoochee River, 90 m. W. S. W. of Macon, 128 W. S. W. of Milledgeville, and 290 W. of Savannah. The Chattahoochee is navigable hence to Apalachicola, on the Mexican Gulf, during 8 months of the year, and conveys vast quantities of cotton to that port for foreign shipment. C., as a city and nucleus of trade, ranks about third in the State; it is well and handsomely built, and the streets (of rectangular form) are pleasantly shaded by foliage. A fine bridge spans the river here, and connects the city with the village of Girard, on its opposite bank. C. contains some spacious and handsome public buildings, and has manufactures of cottons, woollens, paper, implements of farm-husbandry, &c., besides possessing an active business in iron-founding. Several railroads have their termini in this city. Pop. (1897) abt. 20,000.

—in *Ill.*, a p.-v. and twp. of Adams co., 15 m. N.E. of Quincy.

—in *Ind.*, a v. of Adams co., abt. 100 m. W. of Springfield.

—A city, cap. of Bartholomew co., on the E. fork of White river, 41 miles S.S.E. of Indianapolis. Pop. (1897) abt. 7,500.

—A village of Madison co., about 6 m. S.E. of Anderson.

Columbus, in *Iowa*, a post-village of Allamakee co., on the Mississippi river, about 85 m. above Dubuque.

—A twp. of Louisa co.—A village in this twp., abt. 22 m. S.W. of Muscatine, and about 3 m. W. of the Iowa river.

—in *Kansas*, a city, cap. of Cherokee co., on the Missouri river, about 10 m. N.N.W. of St. Joseph, Mo. Pop. 2,400.

—in *Kentucky*, a p.-v. and twp. of Hickman co., on the Mississippi river, about 300 m. W.S.W. of Frankfort.

Columbus, in *Michigan*, a p.-v. and twp. of St. Clair co., on Belle river, about 40 m. N.N.E. of Detroit.

—A village of Ingham co., on Grande river, about 12 m. S. by W. of Lansing.

Columbus, in *Minnesota*, a village of Columbus twp., Anoka co., about 22 m. N. of St. Paul.

Columbus, in *Mississippi*, a city, cap. of Lowndes county, on the Tombigbee river, about 140 m. N.E. of Jackson. Pop. (1897) abt. 5,500.

Columbus, in *Missouri*, a post-village and township of Johnson county, about 106 m. N. by W. of Jefferson City. Pop. (1897) abt. 5,200.

Columbus, in *North Carolina*, a S. co., bordering on S. Carolina; area, about 600 sq. miles. The Lumber river bounds it on the N.W., and it is also drained by the Waccamaw river. The surface is level, and in some parts marshy. Cap. Whitesville. Pop. (1890) 17,850.

—A post-village, cap. of Polk co., about 90 m. W. of Charlotte.

Columbus, in *Nebraska*, a city, cap. of Platte co., on the Loupe fork of Platte river, about 86 m. W. by N. of Omaha. Pop. (1897) abt. 4,500.

Columbus, in *Nevada*, a P. O. of Esmeralda co.

Columbus, in *New Jersey*, a post-village of Mansfield township, Burlington co., about 12 m. S.E. of Trenton.

Columbus, in *New York*, a post-township of Chenango county, on the Unadilla River, about 33 m. S.W. of the city of Utica.

Columbus, the capital of *Ohio*, and seat of justice of Franklin co., is pleasantly located on the E. bank of the Scioto River, 90 m. from its outlet, 116 m. N.E. of Cincinnati, and 350 m. from Washington; Lat. 39° 57' N., Lon. 83° 3' W. C. may be deemed the third city of the State in point of size and importance, yielding only, in these essentials, to Cincinnati and Cleveland. It was laid out in 1812, and established as the seat of govt.; and in 1834 was incorporated as a city. It is built on the rectangular plan, and laid out with considerable taste and uniformity. Its finest public edifice is, undoubtedly, the State House, or Capitol. This is a noble structure, having dimensions of 304 ft. in length, by a width of 134, and covers an area of 55,936 sq. ft. It is reared of gray limestone, giving it the appearance of a marble structure, and presents a chaste and elegant outside appearance—a quality in no wise deteriorated from in the aspect and arrangements of its interior fittings and accommodations. Besides this, C. brings forward to notice the U. S. Barracks and her fine and extremely well-ordered Penitentiary. Asylums for the deaf and dumb, the blind, the idiotic, and the lunatic, are here conducted on the largest and most improved scale; while some 80 churches, the Starling Medical College, the State University, and an assortment of literary, educational, and scientific institutions, attest the patriotic vigor and mental spirit of her citizens. C. keeps pace with her sister cities, requiring for her intelligent needs not fewer than 4 daily newspapers, 19 weeklies, and 9 monthly journals; besides being intersected by eleven different railroad lines. A branch of the great Ohio Canal also keeps this city in inter-communication with the major part of the State. C. as the center of a rich farming country, is naturally a place of active and prosperous business operations. Her manufacturing interests are large and steadily increasing, and include blast-furnaces, rolling mills, terra-cotta pipe works, car works, wagon and carriage factories, &c. C. is a thriving city and rapidly growing. Pop. in 1897 abt. 100,000.

Columbus, in *Pennsylvania*, a post-village and township of Warren co., on Coffee Creek, about 33 m. E.S.E. of Erie.

Columbus, in *Tennessee*, a village of Jackson co.

—A village of Polk co., on the Hiawasee river, about 170 m. E.S.E. of Nashville.

Columbus, in *Texas*, a city, cap. of Colorado co., on the Colorado, 95 m. S.E. of Austin. Pop. 3,200.

Columbus, in *Wisconsin*, a city of Columbia co., on the Crawfish river, on the Chicago, Mil. and St. Paul R. R., about 30 m. N.E. of Madison. It is in a rich agricultural district. Pop. (1897) abt. 3,000.

Columbus City, in *Iowa*, a village and township of Louisa co.; also called COLUMBUS, *q. v.*

Columbus Grove, in *Ohio*, a post-village of Putnam co., about 100 m. N. W. of Columbus.

Columella, *n.* [From Lat. *columna*, a column.] (*Bot.*) The axis, or central column, of a pod or spore-case.

(*Zoöl.*) The central column, taking its rise from the basal centre, in most of the univalve shells.

Columellia'ceæ, *n. pl.* (*Bot.*) A small order of plants, alliance *Cinchonales*. DIAG. Epipetalous stamens, sinuous anthers bursting longitudinally, and unsymmetrical flowers.—The order consists of a single genus, *Columellia*, which includes 3 species of evergreen shrubs, natives of Mexico and Peru. Their properties and uses are unknown.

Columelliform, *a.* Of the shape of a columella, or small column.

Column, (*kol'um*), *n.* [Lat. *columna*, *columnen*; W. *colofn*, from *colof*, a stem or stalk, a prop or support.] (*Arch.*) A member of a cylindrical form, placed upright for support of

Fig. 650.

1, fillet;—2, cyma recta;—3, corona;—4, ovules;—5, cavetto;—6, tenia;—7, upper fascia;—8, lower fascia;—9, abacus;—10, ovolo;—11, neck;—12, astragal;—13, apophyses;—14, torus;—15, plinth.

Peculiarities in the *C.* used in the architecture of different countries and periods will be noticed in the articles devoted to each style of architecture, and to each part of a *C.* as pointed out in Fig. 650.—Among the most celebrated triumphal columns of antiquity is Trajan's column, erected in Rome, in the centre of the Forum Trajani; dedicated to the emperor Trajan, as a commemoration of his victory over the Dacians, and executed, as it is believed, by Apollodorus, A. D. 115. It is of the Doric order, and 132 feet in height. The shaft is constructed of 34 pieces of Greek marble, joined with scraps of bronze, and, for beauty of style, and elegance of proportion, is considered a masterpiece of art. 2,500 figures are sculptured on the entire work; they are 2 feet in height at the shaft, and gradually increase to a height of 4 feet at the top.

—An erect or elevated structure resembling a column; any body pressing perpendicularly on its base; as, a column of water, the vertebral column.

(*Mil.*) A large body of troops drawn up in deep files, so as to present a narrow front. The term "in column" is diametrically opposed to that of "in line," when troops present an extended front.

(*Naut.*) A fleet of ships arranged in sailing line of succession.

(*Printing.*) A perpendicular section of a page.

(*Arith.*) A set of arithmetical numbers, placed for addition in a tabulated form; as, a column of figures.

(*Bot.*) The consolidated stamens and pistils of Orchidaceæ.

(*Anat.*) The term is applied to longitudinal portions or tracts of the myelon, of which there are three in each lateral moiety, called, from their situation in the upright posture of man, *anterior*, *middle*, and *posterior* columns.

Columnar, *a.* [Lat. *columnaris*.] Formed in columns; having the form of columns; like the shaft of a column; as, *columnar* spar.

Columnar'ity, *n.* State or position of being columnar.

Columnated, *a.* Columned; having columns.

Columned, (*kol'umid*), *a.* Possessing columns; columnated.

Column-rule, *n.* (*Printing*) A thin rule of brass, used to divide vertically columns of printed matter.

Colure, *n.* [Gr. *kolouros*—*kolos*, mutilated, and *ouros*, tail.] (*Astron.*) One of the two imaginary great circles of the celestial sphere intersecting the poles of the world; one passing through the equinoctial points of Aries and Libra and the pole of the equator; and the other through the solstitial points of Cancer and Capricorn, and the poles both of the ecliptic and equator. For this reason the first is called the *equinoctial*, and the second the *solstitial* colure. The name is supposed to have been given to them because a portion of these circles is always concealed from view under the horizon.

Colusa, in *California*, a N.W. co.; area, about 2,890 sq. m. The Sacramento River bounds it on the E., as does the Red Creek, partly on the N. It is also drained by the Elder, Tombs, Stone, and Syracuse creeks. The coast range passes along its W. border. Soil. Fertile. Cap. Colusa.

—A city, the cap. of the above co., about 90 m. N. N. E. of Benicia. Pop. (1897) about 1,800.

Colutea, *n.* (*Bot.*) A genus of plants, order *Fabaceæ*. They are shrubs with unequally pinnate leaves. *C. arborescens*, the bladder-senna, is a hardy, free-flowering shrub, native of Italy, &c., and growing almost alone on the summits of Mount Vesuvius. Its leaves are used instead of senna.

Colville, in *Kentucky*, a post-office of Harrison co.

Colville Valley, in *Washington*, a valley that takes its name from an English fort in Columbia, Lat. 48°. It is about 50 m. long, and 3 wide, and large quantities of very rich land are unoccupied. Pinckney City (called also Colville) has recently been established, and already has a pop. of over 300. Near it are the U. States military post (Fort Colville), and the Indian reservation. This vicinity, since 1854, has attracted much attention as a gold-mining region. Gold is found in all the streams and bars from the Spokane River to the N. boundary, and up the Pen d'Oreille to the Catholic Mission.

Colvin's Creek, in *N. Carolina*, a post-office of New Hanover co.

Colymbidæ, *n. pl.* (*Zoöl.*) The Divers, a family of birds, order *Natantes*. They inhabit the northern regions, and are distinguished by their legs being placed

so far back, that they always assume an erect position when standing. Their feet are large and webbed; they are rapid and powerful divers; and they feed both on fish and vegetables.—The genus *Colymbus*, or Divers proper, has the bill compressed and acute, tail short and rounded. Birds of this genus excel all others in diving, and in making progress beneath the surface of the water. They are solitary, keen-sighted, and wary. The Great Northern Diver, or Loon, *C. torquatus*, of N. America, is 31 inches long, and the wing 14 inches. The Black-throated Diver, *C. arcticus*, of the northern regions, is about 28 inches long, and the wing 12 inches.—The genus *Podiceps*, or Grebes, has the bill long, slender, and pointed; the head in the spring ornamented with tufts. These birds frequent lakes, rivers, and the sea-coast. When alarmed, they remain beneath the surface of the water, exposing only the bill. The Crested Grebe of N. America, *P. cristatus*, sometimes called Cargoose, is 23 inches long, umber brown above, silvery white below.

Colza, *n.* See RAPE.

Com-, a Latin prefix, used in composition for *cum*, before the letters, *b*, *p*, and *m*, signifying *to*, *with*, or *against*. See CON.

Co'ma, *n.* [Gr. *kōma*, from *koimāō*, to hush or hush to sleep.] (*Med.*) A state of drowsy insensibility, in which the patient, as if overcome by a deadly sleep, is incapable of being roused. *C.*, though frequently the result of a congested state of the brain, as in apoplexy, may arise from the narcotic influence of opium, hemlock, belladonna, and other drugs acting on the nervous system; from large quantities of spirits taken into the stomach; or from the formation of abscess on the brain, and the effusion of puss or serum on the surface of that organ; or it may proceed from injury to the skull or head, as from falls, blows, &c. *C.*, in whatever state found, is always a mere symptom, its treatment falling under that pursued in apoplexy, poisoning by narcotic drugs, &c.

Co'ma, *n.* [Lat.; Gr. *komē*, tail of a comet.] (*Astron.*) The nebulous atmosphere surrounding the nucleus of comet.

(*Bot.*) The assemblage of branches forming the head of a forest-tree.—Also used to denote bracts that are empty and terminate an inflorescence, as in *Salvia Helminum*.

Co'ma Beren'iens, *n.* (*Astron.*) A constellation of the N. hemisphere, abt. 5° of the equinoctial colure and midway between Cor Coroli on the N.E., and Denbola on the S.W. The principal stars are of the 4th and 5th magnitude.

Comacchio, (*ko-mak'ke-o*), a fortified town of Central Italy, 30 m. E.S.E. of Ferrara; pop. 6,000.

Comack, in *New York*, a post-village of Suffolk co. abt. 187 m. S.E. of Albany.

Comal, in *Texas*, a W. central co.; area, abt. 1,080 sq. m. It is drained by the Guadalupe and Cibola river and by Comal Creek, an affluent of the Guadalupe. The surface is generally hilly. Cap. New Braunfels. Pop. (1890) 6,400.

Comal Town, in *Texas*, a village of the above co. near the junction of Comal Creek with the Guadalupe River.

Comana, (*Anc. Geog.*) a city of Cappadocia, (supposed to be the modern *Elbostan*), on the river Sarus; celebrated in antiquity for its temple of Artemis Tauropolia.—A city of Pontus, (now Tokat,) equally celebrated for its devotion to the goddess Artemis.

Comanche, in *Texas*, a central co.; area, abt. 1,000 sq. m. It is traversed by the Leon river, and the Rush and Buckeye creeks. Cap. Comanche. Pop. (1890) 16,400.

—A fine town, cap. of the above co. Pop. (1897) 1,500.

Comanche Indians. A formerly large and warlike tribe of American Indians, of the Shoshone family, who roamed over the prairie lands of Texas and northern Mexico, their range extending from the Gulf of Mexico to the E. slope of the Rocky Mountains, and northward to the Arkansas and Missouri rivers. They had no villages or fixed habitations, being nomadic in character, and probably the finest horsemen in the world. In fact they almost lived in the saddle, and considered it beneath their dignity to walk. The tribe possessed the admirable characters of honesty, truthfulness, self-respect, and a strict regard for chastity, and physically, the *C.* are among the best developed of the American Indians. They were, however, in their former con-

Fig. 653.—COMANCHE BEARING AWAY A CAPTIVE.

dition, cruel and treacherous, making annual raids into Mexico, where they committed great depredations. They made no male prisoners, but carried off number of Mexican women to their lodges, their raids being so regular in their occurrence as to have acquired the name of the "Mexican Moon." In Texas they did not pursue so successful a career, the Texan Rangers being their mortal enemies. In 1783 the *C.* were nominally subjected to Spanish authority through the action of General Anza, who killed thirty of their chiefs, and for the time put an end to their depredations. At a later date they again became troublesome, resuming their raids and harassing Texas and Mexico until finally brought under control by U. S. forces and settled on a reservation. In 1872 part of the tribe, called the Staked-Plains Comanches, had to be reduced by military operations. In 1847 the *C.* were estimated to number 12,000. In 1890 there were 1,598 of them on their Indian Territory reservation. Their plundering habits at an end, the good qualities of the *C.* began to tell, and they are now among the most tractable and progressive of the "blanket Indians." They are to some extent addicted to intoxication, obtaining a beverage from a species of cactus which has narcotic properties; but, on the whole, give the government very little trouble.

Fig. 651.—COLUMN OF TRAJAN.

oman'dra, *n.* [Gr. *komē*, hair, and *andres*, stamens.] (*Bot.*) A genus of plants, order *Santalaceae*. They are very smooth, suffrutescent plants of N. America; pedicels axillary and terminal; flowers small, umbellate. *C. umbellata*, the Bastard Toad-flax, is found in rocky woods throughout the U. States.

oman's Well, in Virginia, a P. O. of Sussex co. (*Bot.*) [Gr. *komaros*, the strawberry-tree, which this plant resembles.] A genus of plants, order *Rosaceae*. *C. palustre*, the Marsh cinquefoil, is found in swamps from Wisconsin to the Arctic Circle.

mate, *a.* [Lat. *comatus*, from *coma*, hair.] Hairy; uncombed with a bushy appearance, like hair.

mate, *n.* A fellow-companion; a comrade.

"My co-mates and brothers in exile." — *Shaks.*

matose, **Comatous**, *a.* [From Lat. *coma*, lethargy.] Relating to, or resembling, coma; preternaturally disposed to sleep; lethargic; drowsy; as, *comatose fever*. **Mayagua**, (formerly *Valladolid*), the cap. of the republic of Honduras and of a dep. of same name, on the Uloa River, 192 m. E. of Guatemala; Lat. 14° 23' N., lon. 87° 39' E.; pop. about 8,000.

mb, **Combe**, **Coomb**, **Coombe**, *n.* [A.S. *comb*; *r. kambos*; W. *cwm*, a hollow, a deep valley.] A valley; hollow depression of land; a circular dell; as, *Ilframbie*.

One of the cells in which bees lodge their honey; an assemblage of such cells; as, a *honey-comb*.

mb, (*kōm*), *n.* [A.S. *du. kam*; Ger. *kamm*; O. Ger. *kamp*; Icel. *kamb*. Probably from ancient Ger. *kam*, the hand; applied to things having incisions similar to the hand, such as a comb, the crest of a cock, &c.] An instrument with teeth, for separating and adjusting hair, wool, or flax; as, a *hair-comb*, a *curry-comb*.

"By fair Ligea's golden comb." — *Milton*.

The red, fleshy crest of a cock, so called from its pectinated indentations.

"High was his comb, and coral-red withal." — *Dryden*.

Any instrument resembling a comb.

1. England, a dry measure containing four hushels, sometimes written *COOMB*.

2. The top or crest of a wave; a comb.

3. *a.* To separate, disentangle, cleanse, and adjust with a comb; as, to *comb* wool.

"She with ribbons tied

His tender neck, and *comb'd* his silken hide." — *Dryden*.

To *comb* the noddle or hair. A cant expression, denoting to assault, or inflict blows upon the head, as a rascal attacking her husband.

"Her care shall be
To *comb* your noddle with a three-legged stool." — *Shaks.*

4. (*Naut.*) To roll over: to present a curving ridge; break into masses of white foam; a comb; as, a *rolling wave*.

mbahee, in S. Carolina, a small river forming the boundary between Beaufort and Colleton districts, and entering the Atlantic through St. Helena Sound.

mbat, *v. i.* [Fr. *combattre*—*com* for *con*, and *battre*, to beat.] To contend with an opposing force; to resist; to contest: to act in opposition.

"Pardon me, I will not *combat* in my shirt." — *Shaks.*

5. To oppose by force; to contend against; to resist: to *combat* an enemy.

"Love yields at last, thus *combated* by pride." — *Lansdowne*.

6. A fight; a battle; a contest; an engagement; a duel.

"The combat deepens. On, ye brave,
Who rush to glory, or the grave." — *Campbell*.

single combat. A duel: a contest fought between two persons.

mbatable, *a.* [Fr. *combattable*.] That may be combated, disputed, or opposed.

mbatant, *a.* Contending; disposed to contend.

Her. Applied to two beasts which, in a coat of arms, set their faces to each other, in an attitude of fighting.

One who combats: a fighter; a champion; a duellist.

"Men become *combatants* for those opinions." — *Locke*.

mbater, *n.* One who combats: a combatant.

mbative, *a.* Disposed or inclined to combat; pugilious.

mbativeness, *n.* (*Phren.*) Disposition or propensity to fight or contend.

mb-broach, *n.* The tooth of a wool-comb.

mb-brush, *n.* A brush used for cleaning combs.

Combe, ANDREW, an English physician and writer on medicine, &c.; b. at Edinburgh, 1797. His principal works are, *The Moral and Physical Management of Infancy*; *The Principles of Physiology applied to the Preparation of Health and to Education*; and *The Physiology of Digestion*. D. 1847.

Combe, GEORGE, brother of the preceding, b. at Edinburgh, 1788; was educated for the legal profession, in which he practised for upwards of 20 years. In 1816 he became a convert to the views of Dr. Spurzheim, who then on a visit to Edinburgh, and in the course of years had so familiarized himself with the subject that he published *Essays on Phrenology*, which he afterwards expanded into his *System of Phrenology*; and, in 1821, founded the *Phrenological Journal* as the means of propagating his views. In 1828 he gave to the world his ablest work, the *Organization of Man*. This work excited a wide and deep impression. In 1837, C. devoted himself exclusively to literature, visited the U. States, Germany, and though himself in delicate health, spent his whole time to the promulgation of his moral, social, and philosophical views by means of lectures and the press. Besides the above works, C. is the author of *Notes on America*, 1841; *Notes on the Reformation in Germany*, 1846; the *Life of his brother, Dr. Andrew Combe*, and various other works. D. 1858.

Comber, (*kōm'ber*), *n.* One who combs; a wool-comber; one who combs flax, &c.

—A high-crested wave rolling over and breaking into foam. — See *BEACH-COMBER*.

Combermere, STAPLETON COTTON, VISCOUNT, an English field-marshal, b. 1773. He served in India, and afterwards in the Peninsular war, in which he commanded the British cavalry, participated in the great battles of Talavera, Fuentes d'Onor, and Salamanca (where he was severely wounded), the Pyrenees, Orthes, and Toulouse; and attained great distinction for the brilliant courage, and skilful strategy he displayed throughout the campaign. Lord C. was raised to the peerage in 1814. In 1822, he was appointed commander-in-chief in India, and in that position captured the important and almost impregnable city of Bhurtpore. In 1852, Lord C. was appointed Constable of the Tower of London, and in 1855 made a field-marshal. D. 1865.

Combin, (*kōm'bā*), one of the culminating peaks of the Pennine Alps, 9 m. from Marigny. Height, 14,124 feet.

Combinable, *a.* That may be combined.

Combinableness, *n.* State or quality of being combinable.

Combinant, *n.* (*Math.*) According to Sylvester, a covariant (or invariant) of two or more quantities, which possesses the additional property of remaining unaltered, a factor excepted, when the quantities are replaced by linear functions of themselves.

Combination, *n.* [Lat. *combinatio*.] State of being combined; union of two or more persons or things to accomplish some object; alliance; confederacy; association; coalition; as, a *combination of forces*.

(*Chem.*) Union of two or more substances in such a manner as to form a new compound. — For the laws of C., see *ATOMIC THEORY*.

(*Algebra*.) *pl.* The different arrangements of a number of objects (letters) into groups of a given nature. In combinations, no regard is paid to the order in which the objects are arranged in each group; whilst in variations and permutations this order is respected.

Combination room. An apartment in colleges at Cambridge University, England, used by the fellows as a withdrawing-room, or snuggery.

Combina'tive, **Combinatory**, *a.* Tending to, or influencing combination. (*R.*)

Combine, *v. a.* [Fr. *combiner*, from L. Lat. *combinō*—*com*, and *binī*, two and two, or double.] To unite or join two or more things together; to link closely together; to cause to unite; to bring into union or confederacy.

"And all *combin'd*, save what thou must combine
By holy marriage." — *Shaks.*

—*v. i.* To come into close union; to unite, agree, or coalesce: to league together; to confederate.

"When had men *combine*, the good must associate." — *Burke*.

—To unite chemically by natural affinity, and form a new compound.

Combin'er, *n.* The person who, or thing which, combines.

Comb'ing, *n.* Act of using a comb; as, the *comb'ing* of wool.

—False hair combed over the forehead where bald.

Comb'ings, *n. pl.* (*Naut.*) See *COAMINGS*.

Comb'less, *a.* Wanting a comb or crest.

Comboloio, (*kōm-bo-lō'yo*). A rosary of 99 heads used by Mohammedans.

"And by her *comboloio* lies
A Koran of illumined dyes." — *Byron*.

Comboocoennum, a town of Hindostan, prov. Carnatic, dist. Tanjore, 20 m. N.E. of the latter city. C. was anciently the cap. of the Cholas, one of the most famous of the old Hindoo dynasties, and who gave their name to the whole coast of *Cholamundul* or *Coromandel*. It presents many remains of its former splendor. Pop. Estimated at 140,000.

Com'bourg, a town of France, dep. Ile-et-Vilaine, 20 m. S.E.E. of St. Malo; pop. 5,434.

Combretaceae, *n. pl.* (*Bot.*) The Myrobalans, an ord. of plants, alliance *Myrtales*. Diag. 1-celled ovary, pendulous ovules, dotless leaves, seeds without albumen, and convolute cotyledons. There are 22 genera, and abt. 200 species, which are exclusively natives of the tropical parts of America, Africa, and Asia. Trees or shrubs with exstipulate entire leaves, and flowers either perfect or unisexual. In the flower we may remark a superior calyx, with a 4-5-lobed deciduous limb; petals equal in number to, and alternate with, the lobes of the calyx; stamens inserted with the petals on the calyx, generally twice as numerous as the lobes of that part, though sometimes thrice as many, and sometimes equal to them in number. The order is remarkable for the presence of an astringent principle, which renders the barks of some species, and the fruits and flowers of others, useful for tanning and dyeing. — *Combretum butyrosum*, a native of S.W. Africa, produces a kind of vegetable wax, which is called *Chiquito* by the Caffres, who make use of it to dress their victuals.

Comb-shaped, *a.* (*Bot.*) Pectinate; toothed like a comb.

Combustible, *a.* [Fr. *combustible*, from Lat. *comburo*, *combustus*—*con*, and *buro*—*uro*, to burn.] That will take fire and burn; capable of catching fire; inflammable; as, *combustible materials*.

"Sin is to the soul like fire to *combustible* matter." — *South*.

—Hot-tempered; quick to take offence; easily excited; irascible; as, a *combustible* temper.

—*n.* A substance easily set on fire, or that readily takes fire and burns.

Combustibleness, **Combustibility**, *n.* Quality of being combustible; capability of taking fire and burning; aptness to kindle.

Combustion, *n.* [Lat. *combustio*.] The operation of fire on inflammable substances, by which it smokes, flames, and is reduced to ashes.

(*Chem.*) This term is generally applied to the phenomena exhibited by burning bodies, and which depend upon the rapid union of the *combustible* with the oxygen of the air. The evolution of heat and light which attends this process announces intense chemical action; and we consequently find that C. is always attended by the production of new compounds. — See *HEAT*.

Spontaneous human C. is a subject that has from time to time given rise to a considerable amount of discussion among its believers and disbelievers. Numerous apparently well-authenticated cases are given of this phenomenon: but the difficulties of accounting for the chemical changes involved in such a case have caused many eminent persons to reject the whole matter, and contend that none of the cases have been sufficiently well authenticated. On a point where doctors differ so much, we may well refrain from giving an opinion. The cause to which it is usually traced is gross intemperance. The victim is almost invariably a woman, fat, and rarely under 60 years of age. The flame is described as of a bluish color, obscure in the light, and extinguished with difficulty by water. Sometimes the body is said to have been consumed so as to crumble to pieces when moved, without the clothes being burned; in other cases the C. has extended to neighboring objects. The ashes are always a fatty kind of soot; and a similar greasy matter, of fetid odor, is deposited on objects around.

Combustive, *a.* Inflammable; combustible; easy to take fire.

Come, (*kum*), *v. i.* (*imp.* *CAME*; *pp.* *COME*.) [A.S. *cuman*, *cwiman*; Ger. *kommen*; Goth. *griman*, *komen*; O. Ger. *queman*; probably from Sansk. *gam*, to go.] To move toward or hitherward; to draw nigh; to approach; to advance nearer from any distance; — in contradistinction to *go*.

"Come one, come all! this rock shall fly
From its firm base as soon as I." — *Sir W. Scott*.

—To arrive; to reach; to be present; to advance from one stage or condition to another; to attain to any state or character; to arrive at some habit or disposition; to happen; to fall out; to occur.

"Come what come may,
Time and the hour runs through the roughest day." — *Shaks.*

—To appear; to appear in sight; to become manifest or evident.

"She comes unlook'd for, if she comes at all." — *Pope*.

To *come*, in the future: yet to arrive; as, in days to *come*. To *come about*, to come to pass; to arrive: to take its place in the order of occurrences; to fall out.

"And let me speak . . . how these things *come about*." — *Shaks.*

—To change; to come round; as, the ship *comes about*.

They are *come about*, and won to the true side." — *Ben Jonson*.

To *come again*, to return. — To *come after*, to follow; to succeed.

"If any man will *come after* me, let him deny himself."
Matt. xvi. 24.

—To come to obtain, or procure; as, to *come after* a runaway wife. — To *come at*, to reach; to get within reach of; to obtain; to gain; as, to *come at* knowledge.

"We always prize those women most who are hardest to *come at*." — *Addison*.

—To come toward, in attack or onslaught.

To *come away*, to depart; to leave; to part company with. — To *come by*, to acquire; to gain; to possess; as, to *come by* a fortune.

"Love is like a child
That longs for everything that he can *come by*." — *Shaks.*

To *come down with*, to pay over; to hand over to another; as, he *came down with* the money. — To *come home*, to come or press closely; to touch one's interest, reason, or sympathies; to recoil upon; as, "Lies like chickens *come home* to roost." *Eng. Proverb*. — (*Naut.*) Said of an anchor when it is loosened from the ground, and drags; as, the anchor *comes home*.

To *come in*, to comply; to yield; to hold out no longer; as, deserters *come in* by hundreds. — To *come into* fashion; to become the mode; to be brought into use.

"Silken garments did not *come in* till late." — *Dryden*.

To *come in for*, to inherit; to acquire a share of; to accrue from; as, to *come in for* a good thing. — To *come into*, to join with; to take part in; to bring help to; to agree; to comply with; as, to *come into* a scheme. — To *come nigh or near*, to approach in place; to be equal to; to resemble in excellence.

"With such admirable invention that nothing ancient or modern seems to *come near* it." — *Temple*.

To *come of*, to proceed or issue from, as a descendant from an ancestor. — To *issue from*, as effect from cause.

"I told you what would *come of* this." — *Shaks.*

To *come off*, to escape; to get away from; to be carried through.

"If they *come off* safe, call their deliverance a miracle." *Addison*.

—To take place; as, the wedding *comes off* next week.

"*Came off* with glory and success." — *Hudibras*.

To *come on*, to advance; to make progress; to thrive; as, he *comes on* well.

"Come on, and do the worst you can." — *Dryden*.

"They mend their pace as night *comes on*." — *Gracille*.

To *come over*, to pass from one side to another.

"A man in changing his side, . . . is seldom esteemed by those he *comes over to*." — *Addison*.

—To rise, and pass over, in distillation.

"Liquor that is wont to *come over* in this analysis." — *Boyle*.

To *come out*, to be made public; to be revealed; as, a new book has *come out*. — To *come to an issue*; as, to *come out well* in the end. — To *come out with*, to dis-

close; to give publicity to; to reveal, or publish; as, *to come out with a story*.—*To come short*, to be wanting; as *he came short of his dinner*.—*To come to*, to consent or yield; to become reconciled again.

"What is this, if any parson will not come to?"—*Shaks.*

To come to, to amount to; as, *it comes to a large sum*.—*To come to one's self*, to recover; to be restored to consciousness or composure.

To come to pass, to fall out; to occur; to happen.—*To come up*, to rise; to ascend. *To spring up*; to shoot above the ground; as a flower *comes up*.—*To come into use*, as a style, mode, or fashion; as, velvet coats are *coming up* again.

To come up. (*Naut.*) To slack off a rope or tackle.—*To come up the capstan*, to reverse its proper action, so as to slacken a rope or hawser.—*To come up the tackle-fall*, to gently ease off the tackle.—*To come up to*, to rise to; to be on a par with; to vie with; as, *to come up to another in dress or appearance*.—*To come up with*, to overtake; as, *to come up with a ship at sea*.—*To come upon*, to fall on; to make an attack or onslaught; to invade; as, *to come upon the enemy*.

(In the imperative, *come* is often used interjectionally, to encourage, excite, or command attention.)

Comedian, *n.* [*Fr. comédien*; see COMEDY.] A comic actor or player; one who plays comedies or comedy parts.—Rarely, a writer of comedies; in this sense, now obsolete.

Comedienne, *n.* A female comedian.

Comedy, *n.* [*Lat. comedia*; *Gr. komōidia*, probably from *kō-mē*, a village, and *ō-dē*, a song.] A species of drama, of which the characteristics in modern usage are, that its incidents and language shall reproduce or nearly approach those of ordinary life, that its termination shall be happy, and that it shall be of greater length and more extended and intricate plot than the lighter theatrical piece called *farce*. The original *C.* of Greece did not answer to this description, it being in form rather a burlesque on the tragedy of the age, and in substance a satire on the political and other prominent people of that period. Greek comedy had much the same origin as Greek tragedy, both arising from the festivals to Bacchus and being the outgrowth of rude village enjoyment. At the harvest home festivals of the villagers it was the custom for a band of revellers to march in procession, bearing aloft the emblems of fertility, while the leader sang a broad convivial song and his followers joined in a boisterous chorus. From this rustic origin comedy arose, the band of revellers in time becoming an organized company of buffoons, to whose songs and satirical jests Sisaron of Megara is said to have first given a dramatic form. Eventually the primitive hymns to Bacchus developed into a regular dramatic entertainment, the art arising both in Sicily and Attica. Aristotle gives to the Sicilians the credit of originating comedy, but the only examples of the older comedy which we possess came to us from Athens, where three famous writers, Cratinus, Eupolis and Aristophanes, appeared in succession, and brought the art to the perfection of its original form. The characteristic feature of this first school of *C.* is personality. It is totally unlike modern *C.*, being loose in structure and incomplete in plot, and depending for its effect on ludicrous situations, satirical attacks on prominent persons, and witty allusions to the prevailing follies. Practical jokes and ridicule of public leaders form the staple of the humor of these productions. No one was safe from the attacks of the comedians. Creon, the demagogue, and Socrates, the philosopher, were alike virulently assailed, and neither virtue nor patriotism could save any one from attack. Of those ancient comedies we possess no examples except from the pen of Aristophanes, the most famous of the Greek comic authors. But his works sustain all we have said, and show how great a degree of license in satire was permitted by the public opinion of the age. Their extreme personality, however, in time provoked the interference of the law, and in what is known as the Middle Comedy they were followed by a series of productions whose satire was directed against the follies of classes, and in which attacks on individuals ceased. Its satire also was more devoted to literary and philosophical than to political subjects. At a later date (from about 336 to 291 B. C.) flourished what is known as the New Comedy. In this the form more nearly approached modern ideas of comedy, plots were more regular and consistent, and the former wild spirit of mirth was restrained and mingled with seriousness that often recalls that of tragedy. The most distinguished writer of this school was Menander, but unfortunately no example of the Middle and New Comedy is extant, though Menander's works numbered 109 in all.—*Rome*. In Roman comedy we possess two famous names, Plautus and Terence, a number of whose productions fortunately survive. Their works were based on those of the comedians of Greece, and Nævius, an early writer, tried to produce works in the vein of Aristophanes on the Roman stage, but he did not find the Roman temper suited for such unrestrained satire, and was finally banished from the city. The Romans liked their comedy, and perhaps their tragedy also, full of the bustle and action of a complicated fable, and their writers gratified them in this by paraphrasing the most active of the Greek plays, or by combining two Greek dramas into one Roman adaptation. In this respect Plautus did his best to please their taste. He borrowed very freely from Greek authors, particularly from Menander and other writers of the New Comedy, but made his characters distinctively Roman, and displayed in his works a keen appreciation of life and manners in Rome. The plays of Plautus are marked by a rapid and incessant action,

not surpassed by the most active of modern plays, have skillfully constructed plots, and teem with life, bustle and surprise. Unexpected situations follow each other rapidly, while the play hurries from incident to incident, from jest to jest, with a rapidity and vivacity which few modern playwrights have equalled, and which have induced later dramatists to make frequent use of his plots. Terence, the second celebrated comedian of Rome, was more sober and sedate. His works are of the purest Latin in language, and in style are devoid of the grossness and immorality displayed by those of Plautus. They do not equal the latter in activity and humor, but display a far more refined taste, and are superior in consistency of plot and character, and in tenderness of sentiment, witty expressions and metrical skill.—*Modern Comedy*. The *C.* of modern times is only in a minor sense a continuation of that of classic times. While in Italy and France the ancient models were imitated, in Spain and England new schools of *C.* grew up, yielding works of the most abundant richness of plot and incident, however greatly they transgressed the classic unities of time, place and action. The dramatists of Spain showed a striking independence of classic models, their works developing into romantic drama of the freest kind, while they invented a *C.* of fashionable life and intrigue which is marked by a prodigal display of ingenuity far more than by any attention to probability. In Lope de Vega and Calderon, Spain produced two dramatists of unequalled fertility, and only surpassed in genius by the greatest writers of other hands. Their works were borrowed or imitated throughout Europe, fully half the plots of the most famous French plays of the classical period being borrowed from Spain, while England also availed herself freely of this prolific field. In France appeared a comedian who had no equal in his age, and has had scarcely an equal in the world in pure and unadulterated comedy, the famous Molière, a man remarkable, not merely for his wonderful comic talent, but for his admirable delineation of human nature as it appears in all countries and ages. Hallam tells us that "Shakespeare had the greater genius, but, perhaps, Molière has written the best comedies," and further says, that "in just and forcible delineation of character, skillful contrivance of circumstances, and humorous dialogue, we must award him the prize." The *C.* of England, like that of Spain, was a native production, and had taken on its full and original form before the classic models had an opportunity to influence its authors. From the mediæval moralities, mysteries and interludes, which were full of humorous situations, despite their religious origin, gradually emerged a secular drama, of which the first *C.* examples were the *Ralph Roister Doister*, of Nicholas Udall, and the *Gammer Gurton's Needle*, of Bishop Still. These are rude, farcical productions, but both exhibited a marked advance from the preceding interlude towards true *C.* No long time passed before English drama suddenly blossomed into its richest development, and in the hands of such writers as Jonson, Beaumont and Fletcher, and their numerous contemporaries, and above all, Shakespeare, the *C.* of England reached a lofty level of perfection, and displayed a rich quality of humor, skill in formation and literary excellence nowhere else surpassed if equalled. Nothing need be said here of the excellence of the Shakespearean *C.*, alike in its exuberant spirit of fun, its skill in plot, perfection in character delineation and poetical richness of language. In those respects it stands without a peer, and Shakespeare, alike in *C.* and tragedy, has taken his place as the greatest dramatist of all time. In the period of the Restoration, *C.* lost much of its stately grace, and in the hands of Wycherley, Congreve, Vanbrugh, Farquhar and others, devoted itself to the habits and intrigues of fashionable society, which it handled with a liveliness of dialogue which is unfortunately vitiated by its prevailing immorality. Coming to a later period, we meet with the works of Goldsmith and Sheridan, the last two great names in English *C.*, the latter in particular displaying a keenness and profusion of wit which stand unrivaled in the history of the stage. Meanwhile, Italy had produced various works of merit; and France, though still hampered by the classic idea, was developing a modern drama of which we possess striking examples in the works of Hugo, Dumas, De Musset and various other authors, in whom the romantic school has triumphed over the long dominance of that of Greece and Rome. Germany had, meanwhile, produced little of value in the field of *C.*, and during the present century France has been the central field of the comic drama, foreign nations having been far busier in producing adaptations of her prolific productions than doing original work of their own. Of English productions later than those named, the

Fig. 654.
SCENE OF A GREEK COMEDY.
(British Museum.)

comedies of Bulwer (Lord Lytton) have held the stage most effectively, and continue to-day among the most successful of modern plays. In conclusion, it may be said that the *C.* of recent production has thrown many of the trammels that formerly more or less constrained it, and adapted itself purely and simply to single purpose, that of effective representation upon the stage. The tradition of the unities, which so long fettered the freedom of the French and Italian stage has fairly vanished; the attempt to make a drama poem as well, as agreeable for reading and for representation, is now rarely considered, and the modern *C.* has taken the form of a simple reproduction of life upon the stage, the sole purpose of authors being to produce the best effect upon audiences, without a thought as to how their productions will read as works of literature. In this effort great attention is being paid to scenic effects, naturalness in the setting of the play; the costume of the actors, and the movement and situations of the drama, being important constituents of any successful play, the effort being to produce the most exact and consistent realistic effects, while not losing sight of the requisites of a natural and interesting plot, unlooked for situations, witty dialogue and the various conditions of romantic or actual life. *C.*, as thus presented, has, in many respects degenerated, and few would care to read some of our most successful plays, most of which have become dramas, pure and simple, and have ceased to be works of literature. And in much of the so-called *C.* now presented the farce has replaced the true *C.* spirit, and the play presented to the public is simply an attenuated farce, its attenuated plot being filled out with series of adventitious elements which have nothing to do with the play, and have no proper business upon the stage at all. We may here briefly mention the color light opera, now so popular, in which the elements of *C.* and musical entertainment are closely combined and which may be looked upon as one of the latest and most agreeable outcomes of the evolution of *C.*

Comeliness, *n.* State or quality of being come that which is becoming, fit, or suitable in form or manner: gracefulness; symmetry; harmony of attractive parts.

Comely, *a.* Becoming; fit; suitable; decent; appropriate.

—Handsome; graceful; attractive; well-proportioned; a comely lass.

Comely, *adv.* In a comely manner; handsomely; gracefully.

"To ride comely, . . . to dance comely, be very necessary a courtly gentleman."—*Asham*.

Come-off, *n.* Evasion; subterfuge; excuse.

Com'er, *n.* One who comes.—(*Shang*.) One who is progressing, developing, or attaining success in a line.

Comessation, *n.* [*Lat. comessatio*.] Revelry; feasting; debauch.

Comestibles, *n. pl.* [*Fr.*, from *Lat. com*, and *edere*, to eat.] Eatables; viands; food.

Com'et, *n.* (*Astron.*) See SECTION II.

Cometarium, **Com'etary**, *n.* (*Astron.*) A machine constructed to represent the revolution of a comet around the sun.

Com'etary, *a.* Relating to a comet.

Cometography, *n.* [*Gr. komētēs*, a comet, and *graphein*, to write.] The history and description of a comet or comets.

Com'fit, *n.* [*Lat. conficere, confectus*, to make up together; *Sp. confite*; *Fr. confiture*; *It. confettura*.] A sweetmeat; a confection.

—*v. a.* To preserve dry with sugar.

Com'fort, *n.* That which gives strength, encouragement, and support in distress; consolation; encouragement; solace.

—Ease; rest; relief; that which gives consolation; tranquil enjoyment; freedom from that which disturbs or annoys.

(*Law*.) Support; assistance; countenance; as, *to give comfort to rebels*.

—A comfortable or comforter; a woollen wrap; a wadded quilt. See COMFORTER.

—*v. a.* [*Fr. conforter*, from *L. Lat. conforto*—*con* (intensive), and *fortis*, strong.] To strengthen, encourage, solace, console, or cheer.

(*Law*.) To assist; to relieve, as an accessory.

Com'fortable, *a.* Susceptible of comfort; possessing comfort; being in a state of ease or modern enjoyment; that affords or may afford comfort, ease or enjoyment; as, a comfortable bed; a comfortable salary.

—Tranquil; without actual pain or discomfort;—said of an invalid or sick person.

"For my sake be comfortable; hold death a while at the arm's end."—*Shaks.*

Com'fortable, *n.* A wadded bed-quilt; a comfortable.

Com'fortably, *adv.* In a comfortable or easy manner.

Com'forter, *n.* One who, or that which, administers comfort; a consoler; a strengthener and support of the mind in time of sickness or trouble.

"Miserable comforters are ye all."—*Job xvi. 2.*

(*Scrip.*) The Almighty, with regard to his power of affording strength and support to those who believe.

"The Comforter which is the Holy Ghost."—*John xiv. 26.*

—A knitted woollen wrap or tippet to encircle the throat and neck.—A comfort; a wadded bed-quilt.

Com'fortless, *a.* Destitute of comfort; forlorn; wretched; miserable.

Com'frey, *n.* (*Bot.*) See SYMPHYTUM.

Com'ic, **Com'ical**, *a.* [*Lat. comicus*.] Relating to comedy, in opposition to tragedy; as, the comic nature

entrance; arrival.

"I know thy going-out and thy coming-in." — 2 Kings xix. 37.

Comitan', or **COMITAN'**, in Mexico, a town of the State of Chiapa, on the Grijalva River, 40 m. S.E. of Ciudad Real. Pop. 10,000.

Comite, in Louisiana, a small river, rising in E. Feliciana parish, and flowing S. into the Amite, about 15 m. E. of Baton Rouge.

Comitia, (*ko-mish'ya*), *n. pl.* [Lat. sing. *comitium*, from *comen*, for *coco*.] (*Rom. Hist.*) The public assemblies of the Roman people, at which all the most important business of the State was transacted, as the election of magistrates, the passing of laws, the declaring of war, the making of peace, and, in some cases, the trial of persons charged with public crimes. There were 3 kinds of *C.*, according to the 3 different divisions of the Roman people, viz.: 1. The *Comitia Curiata*, or assembly of the *Curia*, the institution of which is assigned to Romulus; 2. The *Comitia Centuriata*, or assembly of the centuries, in which the people gave their votes according to the classification instituted by Servius Tullius; 3. The *Comitia Tributa*, or assembly of the people according to their division into the local tribes. The first 2 required the authority of the senate, and could not be held without taking the auspices; the last did not require these sanctions. **Comitial**, *a.* [Lat. *comitalis*.] Relating, or pertaining, to the comitia. — Of, or pertaining to, assemblies of the people.

Comity, *n.* [Fr. *comité*, from Lat. *comitas*, from *comis*; probably from *com* for *con*, and *mitis*, mild.] Mildness; affability; suavity of manners; courtesy; civility; politeness; as, the *comity* of nations.

Comma, *n.* [Gr. *komma*, from *kuptō*, to chop or cut off.] In punctuation, the point marked thus (,) noting the subordinate clauses of a sentence, or the shortest pause in reading.

(Mus.) A small interval in music, as the difference between a major and a minor half-stop.

Command', *v. a.* [Fr. *commander*; Lat. *con* (intensive), and *mando* — *manus*, the hand, and *do*, to give.] To commit or intrust to the care of another; to enjoin authoritatively; to bid; to direct; to order; to charge; to dictate to; to lay injunction upon.

"We will sacrifice to the Lord our God, as he shall command us." — Exod. viii. 27.

To have supreme power and authority over; to hold in subjection or obedience; to govern; to lead, as a general; as, to *command* an army.

"Those he commands move only in command, Nothing in love." — Shaks.

To overlook; to be subject to the eye; to have within a sphere of control or influence; as, a *commanding* view.

"His eye might there command." — Milton.

To claim; to challenge; to secure; to exact or enforce by moral power or influence; as, to *command* esteem.

"Tis not in mortals to command success." — Addison.

i. e. To have or to exercise supreme authority; to possess the chief power; to govern.

"Those two commanding powers of the soul, the understanding and the will." — South.

Supreme power or authority; control; sway; influence.

He assumed an absolute command over his readers." — Dryden. Mandate; order; charge; direction; injunction; authoritative message.

As there is no prohibition of it, so no command for it." — Taylor. Act or exercise of control or authority.

"Command and force may often create, but can never cure, an version." — Locke.

Power of overlooking; subjection to the scope of vision; ability to watch, survey, or control; as, *command* of eyesight. — A body of troops; any division of naval or military forces, forming a particular officer's charge; as, *the command* of the Army of the Potomac.

"While yet my soldiers are in my command." — Shaks.

Command'able, *a.* That may be commanded.

Commandant', *n.* [Fr.] A commander; a commanding officer of a place, or of a body of troops; as, lieutenant-colonel *commandant*.

Command'er, *n.* One who commands; a leader; a chief; the chief officer of an army or of any division thereof; as, a *commander-in-chief*.

"Supreme commander both of sea and land." — Waller.

(Naval.) An officer in the navy who ranks between lieutenant and captain; as, a *post-commander*.

A pavior's beetle, or heavy wooden mallet, used in paving.

The chief of certain orders of knighthood; as, a *commander* of Malta.

Command'ership, *n.* Office of a commander. **Command'ery**, *n.* [Fr. *commanderie*.] The manorial demesne, and all rights and privileges pertaining thereto, belonging to an order or body of knights; as, a *commandery* of Knights Templars. Sometimes called *PRECEPTORY*.

Command'ing, *a.* Calculated to overawe, influence, control; as, a *commanding* presence.

Command'ingly, *adv.* In a commanding manner.

Commandite, *n.* (*French Law*.) A partnership in which one furnishes money, and another, or others, their experience, skill, and labor in lieu of capital; a special *LIMITED PARTNERSHIP*, *q. v.*

Commandment, *n.* A command, mandate, charge, bidding, or precept given by authority.

"They plainly require some special commandment for that which is exacted at their hands." — Hooker.

Authority; use of controlling or coercive power.

"Therefore put I on the countenance Of stern commandment." — Shaks.

(Script.) One of the laws of the decalogue given by God to Moses.

"And he wrote upon the tables the words of the covenant, and the ten commandments." — Exod. xxxiv. 28.

The ten commandments. A cant expression for the nails of the ten fingers.

"Could I come near your beauty with my nails, I'd set my ten commandments in your face." — Shaks.

Command'ress, *n.* A woman invested with supreme authority.

"Queen or sovereign *commandress*, over all other virtues." — Hooker.

Comm'atism, *n.* [From *commat*.] Conciseness or brevity in writing.

Commensurable, (*kom-mēzh'ur-abl*.) *a.* [Lat. *con*, and Eug. *mensurable*.] Commensurate; reducible to the same measure; as, "a *commensurable* grief." — Walton.

Commelyna'ceæ, *n. pl.* (Bot.) An order of plants, alliance *Axyridales*. DIAG. 3 sepals opposite the carpels, 3 petals, 6 or 3 stamens, axile placentæ, and a trochlear embryo half immersed in fleshy albumen. There are 16 genera, which include 260 species, chiefly natives of India, Africa, Australia, and the West Indies. They have flattened, narrow, and usually sheathing leaves. The perianth is inferior, more or less irregular, in six parts, arranged in two whorls; the outer parts being green, persistent, and opposite to the carpels; the inner petaloid. There are 6 or 3 stamens hypogynous, some being generally abortive; their properties are unimportant. The rhizomes of some species, as *Commelyna tuberosa*, *angustifolia*, and *striata*, contain much starch, and in a cooked state are edible. Some species have been reputed astringent and vulnerary, and others emmenagogue.

Commemorable, *a.* [Lat. *commemorabilis*.] Worthy to be commemorated or remembered; memorable; deserving of honorable mention.

Commemorate, *v. a.* [Lat. *commemoro*, *commemoratus* — *con*, and *memoro*, from *memor*, mindful.] To keep or preserve in the mind; to call to remembrance by a solemn act; to celebrate with honor and solemnity.

"Such is the divine mercy which we now commemorate; and, if we commemorate it, we shall rejoice in the Lord." — Fiddes.

Commemoration, *n.* [Lat. *commemoratio*.] An act of public celebration; act of publicly honoring some person or event; as, the *commemoration* of peace.

Commemorative, *a.* Tending to preserve the remembrance of some person or event.

"The original use of sacrifice was commemorative of the original revelation." — Forbes.

Commem'orator, *n.* One who, or that which, commemorates.

Commem'oratory, *a.* Commemorative; tending to commemorate.

Commence', *v. i.* [Fr. *commencer*, from Lat. *con*, and *indie*, *initiatum*, to begin, to originate; It. *cominciare*.] To make the first motion or step; to begin to take rise or origin; to begin to be.

"Man ... cannot be without concern for that state that is to commence after this life." — Rogers.

—To take the first degree in a university.

v. a. To begin; to enter upon; to originate; as, to *commence* law-proceedings.

"Most shallowly did you these arms commence." — Shaks.

—To initiate; to perform the first act of; to begin to appear; as, the play is about to *commence*.

"We commence judges ourselves." — Coleridge.

Commence'ment, *n.* Beginning; rise; origin; first existence; as, the *commencement* of a new state of things.

"The third day from the commencement of the creation." Woodward.

—The first day of a university term, when degrees are conferred upon students and others.

Commend', *v. a.* [Lat. *commendare* — *con* and *mando*. See *COMMAND*.] To intrust or commit to the care, custody, or charge of another; to deliver up to with confidence.

"To thee I do commend my watchful soul." — Shaks.

—To recommend; to represent as worthy of notice, regard, or assistance; as, to *commend* a theory.

—To praise; to mention with approbation.

"Something to blame, and something to commend." — Pope.

—To make acceptable; to recommend to kindly reception or remembrance.

"Signor Antonio commends him to you." — Shaks.

Commend'able, *a.* That may be commended; worthy of praise or approbation; laudable, as; a *commendable* act.

Commend'ableness, *n.* State of being worthy of commendation.

Commend'ably, *adv.* Laudably; in a praiseworthy manner.

Commend'dam, *n.* [From L. Lat. *commendare*.] (*Eccl.*) The holding of a vacant benefice interim, before the collation of a new incumbent.

—The intrusting of the revenues of a benefice to a layman for a certain time and purpose.

Commend'atary, *n.* [Fr. *commendataire*.] One who holds a church-living in commendam.

Commenda'tion, *n.* [Lat. *commendatio*.] Act of commending; praise; eulogy; recommendation; approval.

"Good nature is the most godlike commendation of a man." Dryden.

—A message of love or respect; a complimentary service.

"Mrs. Page has her hearty commendations to you too." — Shaks.

Commend'ator, *n.* [It. *commendatore*.] The holder of a benefice in commendam.

Commend'atory, *a.* [Lat. *commendatorius*.] That

serves to commend; presenting to favorable notice or reception; containing praise or recommendation; as, "Letters *commendatory*." (*Bacon*.) — Holding a church-living in commendam; as, a *commendatory* priest.

n. A eulogy; a recommendation; a favorable report.

"Commendatories to our affection." — Sharp.

Commend'er, *n.* One who praises or commends; as, "The same *commenders* and disprovers." — Wotton.

Commensurability, *n.* [Fr. *commensurabilité*.] The capacity of being commensurable, or of being measured by another, or of having a common measure.

Commensurable, *a.* [Fr.: from Lat. *con*, and *mensura*, measure, from *metior*, *mensus*, to measure.] That has a common measure; that may be measured by the same number or quantity, as two or more numbers or quantities.

C. numbers or quantities. (*Math.*) Two or more quantities of the same kind are said to be commensurable when each contains an exact number of times, some other quantity of a like kind. Hence *C. quantities* are always proportional to certain whole numbers, and, conversely, all quantities are *C.* which are proportional to any series of whole numbers, or, we may add, fractions; since the latter, after a reduction to a common denominator, are proportional to their numerators. In the expression of quantities by numbers, therefore, the commensurability of the former is tacitly assumed, whereas it can be shown that, in general, they are not so. No measure of the side of a square, for instance, however small the same may be, is contained an exact number of times in its diagonal. Hence arises an imperfection in the application of algebra, or arithmetic to geometry; an imperfection which Euclid has avoided in his admirable fifth book. It is evident that the sum or difference of any multiples of two *C. quantities* must be *C.* with each; and, on the other hand, that every common measure of one or two quantities, and the sum or difference of any multiples of these quantities, must also be a measure of the second quantity. See *INCOMMENSURABLE*.

Commensurableness, *n.* Commensurability; proportion.

"There is no commensurableness between this object and a created understanding." — Sir Matthew Hale.

Commensurably, *adv.* In a commensurable manner.

Commensurate, *a.* [L. Lat. *commensuratus*.] Commensurable; having a common measure; reducible to a common measure or proportion; as, *commensurate quantities*.

—Equal; proportional; having equal measure or extent.

"Matter and gravity are always commensurate." — Bentley.

v. a. [Lat. *commensurare*.] To reduce to a common measure.

"The aptest terms to commensurate the longitude of places." Browne.

Commensurately, *adv.* In a commensurate manner; with the capacity of measuring, or being measured by, some other thing. — With equal measure or extent.

Commensurateness, *n.* Quality of being commensurable.

Commensuration, *n.* State of having a common measure; proportion; or proportion in measure.

"All fitness lies in a particular commensuration, or proportion of one thing to another." — South.

Comment, *v. i.* [Lat. *commentor*, intensive of *commentor*, *commentus* — *con*, and *mens*, *mentis*, the mind.] To write notes on an author's productions; to explain; to annotate; to expound; to make remarks, observations, or criticisms; preceding on or upon; as, his conduct is *commented upon*.

n. An expository or explanatory note; annotation; explanation; exposition; that which explains or illustrates; remark; observation; criticism; as, a Scriptural comment.

"And let your comment be the Mantuan muse." — Pope.

Commentary, *n.* [Lat. *commentarius*; Fr. *commentaire*.] A comment; exposition; explanation; illustration; a book of comments or annotations.

"In religion, Scripture is the best rule; and the Church's universal practice the best commentary." — King Charles I.

—A memoir or narrative of a particular occurrence or transaction; as, Caesar's *Commentaries*.

Commentary, *Commentate*, *v. i.* To comment upon, or annotate. (*R.*)

Commentation, *n.* Act or process of commenting, criticising, or annotating.

"The spirit of commentation turns to questions of taste." Whewell.

—The results of an annotator or commentator.

Commentator, *n.* One who comments; an annotator; one who writes criticisms, or expositions.

"How commentators each dark passage shun, And hold their farthing candle to the sun." — Young.

Commentatorial, *a.* Pertaining to the making of commentaries.

Commentatorship, *n.* Office or duty of a commentator.

Comment'er, *n.* A commentator; one who makes comments.

"Silly as any commenter goes by Hard words or sense." — Donne.

Commentitious, (*kōm-men-tish'us*.) *a.* Fictitious; imaginary; unreal; invented; as, "commentitious inanity."

Commerce, *n.* [Fr. *commerce*; Lat. *commercium* — *con*, and *merx*, *mercis*, goods, wares, merchandise.] An interchange or mutual change of goods, wares, productions, &c., between nations or individuals, either by barter, or by purchase and sale; trade; traffic; mercantile transactions.

—Social intercourse; dealings of one class of society with another; fellowship; familiar interchange of the social observances of common life.

"The ordinary commerce and occurrences of life."—Addison.

—Sexual intercourse; coition.

(Games.) A game at cards, which is played thus:—Each player deposits an equal stake in the pool, and the banker (dealer) gives 3 cards all round, and asks, "Who'll trade?" The players, beginning with the elder hand, either "trade for ready money," or "barter." By the first is meant, giving a card and counter to the dealer, who places the card under the remainder of the pack, which is called the "stock," and gives a card from the top in exchange. The counter is passed to the banker, who then trades with the stock free of expense. "Barter" means exchanging a card with the right-hand player. Barter cannot be refused, unless the player of whom the exchange is requested decides to stand on his cards without trading or bartering. The trading and bartering is concluded by one having the highest "tricon," which wins the pool. The object of the trading or bartering is to obtain—1, a *tricon* (three like cards, like a pair-royal in cribbage); 2, a *sequence*, or 3 following cards of the same suit; 3, a *point*, or the smallest number of pips on 3 cards of the same suit. The ace reckons for 11, the tens and court-cards for 10 each, and the other cards according to the number of their pips. The highest *tricon* wins the pool; if no *tricon* is shown, then the highest *sequence*, or the best *point* in failure of a *sequence*. The banker reckons as eldest hand in case of ties; and if he holds a lower *tricon* or *sequence* than either of the others, he loses the game, and pays a counter to each player higher than himself.

—v. a. To hold intercourse with.

"And looks commercing with the skies,
Thy rapt soul sitting in thine eyes."—Milton.

Com'merce, in *Michigan*, a post-village of Commerce township, Oakland co., on the Huron River, abt. 32 m. N.W. of Detroit.

Com'merce, in *Mississippi*, a post-village of Tunica co., on the Mississippi River, about 200 m. N. by W. of Jackson.

Com'merce, in *Missouri*, a post-village, cap. of Scott co., on the Mississippi River, about 35 m. above Cairo, Ill., and 170 below St. Louis.

Com'merce, in *Tennessee*, a township of Wilson co., about 35 m. E. of Nashville.

Commer'cial, *a.* Pertaining to commerce or trade; mercantile; trading; proceeding from trade; as, *commercial statistics*, *commercial interests*.

Commer'cially, *adv.* In a commercial manner or view.

Commer'cial Town, in *Ohio*, a village of Adams co., about 15 m. S.W. of Portsmouth.

Com'mercy, (*kom-mër-së*), a town of France, dept. Meuse, on the river Mense, 20 m. E. of Bar-le-Duc; pop. 4,099.

Com'mere, (*kom'mär*), *n.* [Fr.] A godmother; a foster-mother; a gossip old woman.

Com'merson, L'HILBERT, a French traveller and botanist, b. 1727. To him we are indebted for the beautiful flower *Hortensia*, which came originally from China. D. 1773.

Com'mettsburg, in *Pennsylvania*, a post-office of Washington co.

Com'migrate, *v. i.* To move or migrate in a body from one country to another.

Commigra'tion, *n.* [Lat. *commigratio*—*con*, and *migro*, *migratus*, to migrate.] A migrating together; migration in a body.

"Both the inhabitants of that, and of our world, lost all memory of their commigration thence."—Woodward.

Commiation, *n.* [Lat. *commination*—*con*, and *minor*, *minatus*, to threaten.] A threat or threatening; a denunciation of punishment or vengeance.

"Those thunders of commination... die away in fruitless echoes."—Taylor.

(Eccl.) The recital of God's threatenings, made on stated days.

Commia'tory, *a.* Threatening; denouncing punishment; as, a *commia'tory sermon*.

Commingle, (*kom-ming'gl*), *v. a.* [Lat. *com* for *con*, and *minglo*, to mingle.] To mingle or mix together in one mass, or intimately; to blend.

"Blest are those

Whose blood and judgment are so well commingled."—Shaks.

—To mix or unite together, as different substances.

Comm'inate, *v. a.* [Lat. *commينو*, *comminutis*—*con*, and *minuo*, to lessen, from *minus*, less.] To make small or fine; to pulverize; to triturate.

Comm'inated, *p. a.* (*Surg.*) Anything broken very small. A comminuted fracture is when a bone, by means of a heavy wheel passing over it, or some other cause, is broken into minute splinters. Such accidents, especially when occurring to the hip and thigh, are very serious, generally resulting in amputation, and frequently in death.

Comm'ination, *n.* Act of comminuting, or of reducing to a fine powder, or to small particles; trituration; as, *comm'ination of meat*.—Attenuation, by gradual abstraction of particles.

"The jejuneness or extreme comminution of spirits."—Bacon.

Commis'erable, *a.* Worthy of compassion or commiseration; pitiable; deserving to excite sorrow or sympathy; as, a *commis'erable person*.

Commis'erate, *v. a.* [Lat. *commiseror*, *commiseratus*—*con*, and *misereor*, to pity.] To feel sorrow, pain, or regret for another in distress; to pity; to compassionate; to feel for; to condole with; as, to *commis'erate* the poor.

Commisera'tion, *n.* Act of commiserating; a sympathetic feeling of pain or sorrow for the wants, afflictions, or distresses of others; pity; compassion; fellow-feeling.

"Partly out of commiseration, and partly out of curiosity."—Swift.

Commis'erative, *a.* Feeling or showing commiseration or sympathy.

Commis'eratively, *adv.* Feelingly; compassionately.

Commis'erator, *n.* One who entertains a feeling of compassion.

Commis'sarial, *a.* Pertaining to a commissary; as, a *commis'sarial department*.

Commis'sariat, *n.* [Fr.; Sp. *comisariato*.] (*Mil.*) Office or employment of a commissary; or, the whole body of officers in the commissary's department.—That branch of a military service which has the charge of supplying provisions for the troops.

Commis'sary, *n.* [Fr. *commissaire*; from Lat. *committo*, *commissus*—*con*, and *mitto*, to send.] One to whom anything is committed or intrusted; a commissioner; a delegate; a deputy.

(Eccl.) An officer belonging to an episcopate, who exercises ecclesiastical jurisdiction in remote parts of a diocese.

(*Mil.*) The term is applied to officers holding various positions, and exercising different offices,—especially to those charged with furnishing provisions, &c., for an army.

Commis'sary-gen'eral, *n.* (*Mil.*) The head or chief of the department of provisions, military stores, &c.

Commis'saryship, *n.* Office or duties of a commissary.

Commission, (*kom-mish'un*), *n.* [Fr. *commission*; Lat. *commisso*, from *committo*, *commissus*. See *COMMIT*.] Act of committing, doing, performing, or perpetrating;—generally understood in a bad sense; as, the *commission of crime*. (The antithesis to *omission*.)

—A formal act of trust; a warrant by which any trust is held or authority exercised; office; employment; as, a *divine commission*.

"He bore his great commission in his look."—Dryden.

—A written document, investing a person with an office, a certain rank, or authority.

—A certificate issued by authority by which a military officer is constituted; as, a captain's *commission*.

—A body of persons joined in an office or trust, or their appointment; as, a *lunacy commission*.

"A commission was at once appointed to examine into the matter."—Prescott.

(*Com.*) Order or authority by which one person trades for another; as, a *commission to buy cotton*.—Brokerage, allowance, or compensation made to a factor, agent, &c., for transacting the business of another; as, one per cent. *commission on sales*.—See *DELCREDERE*.

Commission of Bankruptcy, (*Law*.) A commission appointed to investigate the facts relative to an alleged bankruptcy, and to secure all available assets and effects for the creditors concerned.

To put a ship into commission. (*Naut.*) To send forth a vessel of war on public service, after laying up in ordinary, and being repaired and refitted.

To put the Great Seal into commission, to place the seal of State in the hands of empowered commissioners during the period, *ad interim*, that the office of Lord Chancellor is vacant. (*Eng.*)

—v. a. To commit to; to give a commission to; as, a *commissioned officer*.

—To send with a mandate or authority; to appoint; to depute; to authorize; to empower; as, to *commission* an agent.

"He first commissions to the Latin land"—Dryden.

Commis'sion-agent, **Commis'sion-merchant**, *n.* (*Com.*) An agent, merchant, or broker who transacts business for others, at a certain percentage, as commission and recompense for his services.

Commis'sional, **Commis'sionary**, *a.* Appointed by warrant, authority, or commission.

Commis'sioner, *n.* One who has a commission or warrant from proper authority to perform some office or execute some business; as, a *boundary commis'sioner*.

—An officer of state who has charge and control of a department of the public service; as, a *commis'sioner of taxes*, a *commis'sioner of patents*, &c.

Commis'sioners of Highways, Officers having certain powers and duties concerning the highways within the limits of their jurisdiction. In some of the States they are county officers, and their jurisdiction is co-extensive with the county. In others, as in New York, Michigan, Illinois, and Wisconsin, they are town or township officers. They have power to establish, repair, or vacate highways, and it is their duty to cause them to be kept in good order.

Commis'sioner's Creek, in *Georgia*, traverses Wilkinson co., into the Oconee River, about 10 m. E. of Irwinton.

Commis'sionship, *n.* Office or station of a commis'sioner.

Commis'sive, *a.* Committing.

Commis'sural, *a.* Belonging, or relating, to a commis'sure or a joining.

Commis'sure, *n.* [Lat. *commisura*, from *committo*, *commissus*. See *COMMIT*.] (*Arch.*) In masonry, the joints between two stones.

—A joint, seam, or closure; the place where two bodies or parts of a body meet and unite; an interstice or cleft between particles or parts.

(*Anat.*) An anatomical phrase, signifying a seam or fold in a membrane, as in those of the brain, forming a process which, depending into the substance of the brain,

separates the right from the left hemisphere.—*BRAIN*, and *DURA MATER*.

(*Bot.*) The inner face of the carpels of umbellifer also a point where many parts are united together.

Commit, *v. a.* [Lat. *committo*—*con*, and *mitto*, to send.] To put into the hands or power of another; to intrust to consign; to deposit; to send to prison; as, to *commit* one's self to God.

"Bid him farewell, commit him to the grave."—Shaks.

—To do; to enact; to perform; to perpetrate; to effect, as, to *commit* a felony.

"A creeping young fellow committed matrimony with a br gamesome lass."—*L'Estrange*.

—To endanger; to put to hazard; to place beyond or control; to pledge by some act or step; used, for most part, reflexively; as, he is *committed* to his party.

"You might have satisfied every duty of political friendship without committing the honor of your sovereign."—*Junius*.

—To join, as for a contest; to match.

"Seasonably commit the opponent with the respondent."—*M*

To commit a bill, (in legislation,) to transfer a bill to the consideration of a special committee.

To commit to memory, to learn anything by heart.

—v. i. To be guilty of incontinence or adultery.

Commit'ment, *n.* Act of committing, or placing safe custody; more especially, the act of sending to prison.

—An order for the incarceration or imprisonment of a person.

—Act of handing over, or referring to a special committee for consideration and report.

—Commission or perpetration of something wrong or excusable, as a crime or blunder.

—Act of pledging and exposing one's self to ulterior consequences.

Commit'tal, *n.* Act of committing; state of being committed to custody; as, the magistrate signed his *commit'tal*.

—A pledge actually given, or implied.

Commit'tee, *n.* [Fr. *comité*.] The person or persons to whom anything is committed. A body of persons appointed to examine, consider, manage, or report any matter; as, to move for a special *commit'tee*.

Commit'tee of the whole House, is when the entire legislative body of the House of Representatives resolve itself into a committee; in such cases the speaker leaves the chair, which is occupied, for the time being, by one of the members, denominated the *chairman of committee*. (*Law*.) A guardian, charged with the safe custody of another.

Committee of Public Safety, *n.* (*Hist.*) SALUT PUBLIC, (COMITÉ DE.)

Commit'teeship, *n.* Office or power of a committee.

Commit'ter, *n.* One who commits; one who does or perpetrates; as, a *commit'ter of burglary*.

Commit'tible, *a.* Liable to be committed; that may be committed.

"Besides the mistakes committible in the solary compute."—*Bacon*.

Commix', *v. a.* [Lat. *commisco*, *commixtus*—*con*, and *misceo*, to mix.] To mix or mingle together; to blend; to mix, as different substances.

"A dram of copper in aqua fortis commixed."—*Bacon*.

Commix'tion, *n.* [Lat. *commixtio*.] Union or mixture of various substances in one mass; incorporation of one compound.

Commix'ture, *n.* Act of mixing together; the state of being mingled; incorporation; union in one mass.—The mass formed by mingling different things; a position; compound.

"There is scarcely any rising but by a commixture of good and evil arts."—*Bacon*.

Comm'odate, *n.* (*Scots Law*.) A loan, gratuitously rendered.

Comm'ode, *n.* [Fr.; Lat. *commodus*. See *COMMODO*.] A convenient article of household furniture; as, a *comm'ode*.

—A kind of small sideboard with drawers, shelves, &c.

—A kind of head-dress formerly worn by ladies.

Comm'odious, *a.* [Lat. *commodus*—*con*, and *modus*, a proper measure; Fr. *commode*.] Adapted to its use or purpose; convenient; suitable; fit; proper; useful; comfortable; as, a *comm'odious house*.

"Muro's muse... commodious precepts gives."—*Phil*

Comm'odiously, *adv.* In a commodious manner; conveniently; suitably; fitly.

Comm'odiousness, *n.* State of being commodious; suitability for its purpose; fitness; convenience; as, the *comm'odiousness of the harbor*.

Comm'odity, *n.* [Fr. *commodité*; Lat. *commodus*, from *commodus*—*con*, and *modus*.] That which affords convenience or advantage; any article of commerce; everything movable that is bought or sold.

(*pl.*) Merchandise; wares; goods; produce of land and manufactures; as, excisable *commodities*.

Comm'modo, an Italian painter, b. at Florence, 30, where he passed the greater part of his life, and in 1638. The *General Judgment* is called his masterpiece.

Comm'modore, *n.* [It. *comandatore*; L. Lat. *commendator*—*con*, and *modo*. See *COMMAND*.] (*Naut.*) In the English navy, the officer who commands a squadron or detachment of ships, sent on a particular service.

—He holds the temporary rank of rear-admiral. It is also a title of courtesy given to the senior captain, or two or more ships of war are cruising in company.

—In the United States, an officer who ranks next to rear-admiral.

Comm'modus Anton'ius, LUCIUS AURELIUS, Roman emperor, b. 161 A. D., was the son of the wise and virtuous Marcus Aurelius. He was most carefully

educated, and accompanied his father on several military expeditions. He succeeded him in 180, and, after a short period of orderly government, he dismissed his wisest counsellors, and gave himself up to the lowest society, and the most shameless habits. The administration was in the hands of a series of his favorites, and confiscations and murders were the ordinary occurrences of the day. He went so far in defiance of decency as to fight in the circus like a gladiator, and then gave himself out to be a god, and would be worshipped as Hercules. He was at last poisoned by Marcia, (one of his concubines, whose life he had intended to take, and then strangled by an athlete. The vices and misgovernment of Commodus contributed powerfully to hasten the fall of the empire. D. Dec. 31, 192.

Common, *a.* [Lat. *communis*—*com*, and *munus*, a duty, a gift, a service, a favor; Fr. *commun*.] That belongs as a privilege or right equally to more than one, to many, or to the public at large: free to all: general: universal: public: having no separate owner; as, the common weal.—Popular; usual; customary; habitual; frequent; often met with; as, a common occurrence.—Ordinary; ignoble; mean; vulgar; trite; of little value; of scarce; as, the common people.—Prostitute; given to lewd and abandoned habits; as, a common harlot.

(*Law*.) *C. bail*. Fictitious sureties entered in the proper office of the court.—*Common bar*, a plea to compel the plaintiff to assign the particular place where a trespass has been committed.—*C. bench*, the ancient name of the court of *C. Pleas*.—*C. carrier*, see *CARRIER*.—*C. council*, the more numerous house of the municipal legislative assembly in some American cities.—*C. highway*, see *HIGHWAY*.—*C. informer*, see *INFORMER*.—*C. lawyer*, one who is learned in common law.

(*Gram*.) See *GENDER*, *NOUN*, *VERB*, &c.

(*Math*.) *C. measure*, a quantity which is contained an exact number of times in each of two or more given quantities.—*C. divisor*, see *DIVISOR*.

In *common*, to be participated in equally by a certain number; equally with another or others; as, to share things in *common*.

Common, *n.* An open tract of ground, the use of which is not appropriated to one individual, but belongs to the public, or to a number of persons.

Does any one respect a common as much as he does his garden?—*South*.

(*Law*.) An incorporated hereditament, consisting in profit which one man has in connection with one or any others in the land of another. *C.* is chiefly of four kinds:—1. *C. of pasture*, itself divided in *appurtenant*, *vicinage*, *ingross*, and *incro*. 2. *C. of piscary*. 3. *C. of turbary*. 4. *C. of estovers*, for which result "Washburn, on Real Property," &c.

1. To have a joint right with others in common ground.

2. To eat at table in common: as, the students *commoned* together.

Common, *adv.* Commonly; ordinarily.

"I am more than common tall."—*Shaks*.

Commonable, *a.* Held in common.

"Forests and chases, and other commonable places."—*Bacon*.

That may be pastured on common land; as, "commonable beasts."—*Blackstone*.

Commonage, *n.* The right of pasturing on a common: a joint right of using anything in common with others.

Commonalty, *n.* The common people, as distinguished from the nobility: the bulk of mankind.

"Bid him strive to gain the love of th' commonalty."—*Shaks*.

Commoner, *n.* One of the common people: a person under the degree of nobility.

"This commoner has worth and parts."—*Prior*.

—member of the English House of Commons: a member of Parliament; as, Pitt, the great *Commoner*.—One who has a joint right in common ground.

—student of the second rank in the university of Oxford, England; as, a gentleman-commoner.—A prostitute: a common woman.

Common Law, *n.* This term, somewhat ambiguous, used in various senses, according to the objects with which it is contrasted; it being so contradistinguished, sometimes from the statute law, sometimes from the canon law, sometimes from the mercantile law, and frequently from equity. Many use it to designate simply law common to all the country. The English, which the base of the American common law in all the states except Louisiana, traces its origin to the early ages and customs of the aboriginal Britons, and was necessarily augmented, in different ages, by the admixture of some of the laws and usages of the Romans, the Saxons, the Danes, and the Normans, who read themselves over the country. "The English," says Hallam (*Mid. Ages*, ii. 465), "becoming assimilated as the English language."—The common law includes those principles, usages, and rules of action, applicable to the government and security of person and property, which do not rest for their authority upon express or positive declaration of the will of the legislature. In many of the States, the *C. law* and the statutes of England in force in the colony at the time of its independence, are by the State constitution declared to be the law of the State until repealed. Hence, when a question in the courts of one State turns upon laws of a sister State, if no proof of such law is adduced, it is, in general, presumed that the common law, as it existed at the time of the separation of this country from England, prevails in such State.

Commonly, *adv.* Usually; generally; ordinarily; frequently; for the most part; as, that thing is commonly done.

Commonness, *n.* State or quality of being common; usual; frequent occurrence.

—Equal participation among many.

"Now can the commonness of the guilt obviate the censure."—*Govt. of the Tongue*.

Commonplace, *a.* Ordinary; common; trite; not new or striking; as, a commonplace action.

—*n.* A common topic; an idea common to different subjects: a source of argument, or ground of proof.—A usual or ordinary remark on any topic; a memorandum; a trite expression.

Commonplace-book, *n.* A book in which things to be remembered are recorded, and ranged under general heads.

"I turned to my common-place-book and found his case."—*Tatler*.

Commonplaceness, *n.* State or quality of being trite or commonplace.

Common Pleas, *n.* (*Law*.) Pleas brought by private persons against private persons, or by the government, when the cause of action is of a civil nature.—In England, and in many States of the U. States, a court having jurisdiction generally in civil actions.

Common Prayer Book, *n.* (*Eccl.*) A book or formulary of public worship; especially, the book containing the forms of public worship and administration of the sacraments, and other rites and ceremonies according to the use of the Church of England.

Commons, *n. pl.* The commonalty, or common people, as distinguished from the nobility or titled classes. (*England*.)

"Hath he not passed the nobles and the commons?"—*Shaks*.

—In England, the lower body of Parliament, consisting of the representatives of counties, universities, and boroughs, elected by those of the people who possess a voting qualification; as, the House of *Commons*. See *PARLIAMENT*.

—Food or fare provided at a common table; as, to dine at *commons*. (Used at the English universities).—A club or society where all the members take their meals at a common table.

"The doctor likes both his company and commons."—*Swift*.

To be on short commons. A colloquialism, denoting to be placed on a stinted allowance of food.

Doctors' Commons. In London, the British metropolis, a former court composed of doctors of civil law, who exercised jurisdiction in all matters pertaining to probate of wills, marriage-licenses, and divorce-cases.

Common Sense, *n.* That degree of intelligence, sagacity, and prudence, which is common to most people.

Common Time, *n.* (*Mus.*) That time in which every measure or bar contains an even number of subdivisions, such, for example, as two minims, four crotchets, eight quavers, and so on. It is marked thus:

Fig. 656.

Commonty, (*Scots Law*.) The common right of pasturage exercised on land belonging to two or more proprietors.

Commonweal, **Commonwealth**, *n.* (*Common and weal*; A. S. *wela*, *wala*, prosperity, bliss. The public good, prosperity, and happiness.) A State or body politic: a form of government (generally republican) conducted on terms of universal equality and co-operation.

"Commonwealths were nothing more in their original than free cities."—*Temple*.

—The whole body of people in a State; the citizens or public at large; as, the *Commonwealth* of Pennsylvania.

(*Hist*.) The name given to that form of government established in England on the death of Charles I., in 1649, and which existed during the protectorate of Oliver Cromwell and his son Richard, until the abdication of the latter and the restoration of monarchy again in the person of Charles II., in 1660.

Commonwealth's-man, *n.* (*Eng. Hist*.) A supporter of the policy of Oliver Cromwell, and of the Commonwealth established by him: a republican.

Commonrance, **Commonrancy**, *n.* Habitation; abode; residence; place of dwelling.

"The very quality, carriage, and place of commonrance."—*Hale*.

(*Amer. Law*.) Temporary residence.

Commonrant, *a.* [Lat., from *commarari*, to abide.] (*Law*.) Abiding; resident; dwelling; inhabiting.—(*Amer. Law*.) One residing in a particular town, city, or district.

Commonmother, *n.* [Lat. *com* for *con*, and *mother*.] A godmother; a gossip. (*R.*)

Commotion, *n.* [Lat. *commotio*—*com*, and *moveo*, *motus*, to move.] Violent motion or agitation of the elements, or of human passions; as, *commotion* of the waters.

"Some strange commotion
Is in his brain; he bites his lips, and starts."—*Shaks*.

—Tumult; popular agitation, disturbance, or disorder; public excitement or perturbation.

"When ye shall hear of wars and commotions, be not terrified."—*Luke xxi. 9*.

Commotioner, *n.* A disturber of the peace; one who causes commotions. (*R.*)

Commov, *v. a.* To put into violent motion; to disturb; to agitate; to unsettle. (*R.*)

"Commov'd around, in gathering eddies play."—*Thomson*.

Communal, *a.* Pertaining to a commune.

Commune, *v. i.* [Fr. *communier*; Lat. *communico*. See *COMMUNICATE*.] To converse; to confer; to talk together familiarly; to communicate; to hold mental intercourse with one's self; to meditate.

"I will commune with you of such things
That want no ears but yours."—*Shaks*.

—To receive the holy communion: to partake of the Lord's Supper.

Commune, *n.* [Fr.] In France, a small territorial subdivision of the country, less than a canton, and corresponding in some measure to an English parish. A *C.* includes sometimes a single town, and sometimes several villages; and each has a mayor and a communal municipality.

Commune of Paris (The). See *FRANCE*.

Communicability, *n.* The quality of being communicable.—Capability to be imparted.

Communicable, *a.* [Fr., from Lat. *communicabilis*.] That may be communicated; capable of being imparted from one to another.—That may be narrated or recounted to another.

Communicableness, *n.* State of being communicable; communicability.

Communicably, *adv.* With communication.

Communicant, *n.* [Lat. *communicans*.] One who communicates.

—A partaker, with others, at the Lord's table; one who is entitled to partake of the sacrament of the Lord's Supper: a church-member.

"A never-failing monthly communicant."—*Atterbury*.

Communicate, *v. a.* [Fr. *communiquer*; Lat. *communico*, *communicatus*, from *communis*, common.] To make common; to cause to be common to others; to bestow; to confer, as a joint possession; as, to *communicate* a disease.—To disclose; to impart, as information; to publish, as knowledge; as, to *communicate* intelligence;—generally before *to*.

—*v. i.* To share, participate, or enjoy in common with others.

—To have a communication, passage, or means of intercourse from one to another.

"A system of such canals which all *communicate* with one another."—*Arbuthnot*.

—To partake of the holy sacrament.

"The primitive Christians *communicated* every day."—*Taylor*.

Communication, *n.* [Lat. *communicatio*.] Act of communicating or imparting; that which is communicated or imparted; participation; intercourse; information; correspondence.

"The reception and communication of learned knowledge."—*Holder*.

—Means whereby intercourse is carried on: a passage or means of passing from one place to another; as, an easy *communication*.

—Intelligence: news: interchange of knowledge or information; as, to send a written *communication* to a person.

(*Rhet*.) A trope, in which *we* is used for *you* or *I*.

Communication-valves, (*Mach*.) The valves in a steam-pipe which connect two boilers of an engine, for cutting off communication between either boiler and the engine.

Communicative, *a.* [Fr. *communicatif*.] Ready to communicate or impart; inclined to impart or disclose; unreserved; open; free of speech; as, a *communicative* tongue.

Communicativeness, *n.* Quality of being communicative, or of imparting knowledge or intelligence to others; freedom from reserve.

Communicator, *n.* One who, or that which, communicates.

Communicatory, *a.* Imparting knowledge or information.

Communio, *n.* [Fr., from Lat. *communio*, from *communis*, common.] A mutual participation in anything; mutual intercourse; interchange of transactions or offices; a state of giving or receiving; fellowship; union; agreement; concord; converse.

"They eat, they drink, and in communion sweet
Quaff immortality and joy."—*Milton*.

—Union in religious worship, or in doctrine and discipline;—hence a person is said to be in *C.* with a church who declares his acquiescence in its doctrine, and participates in its worship.

—A body of Christians, having one faith and discipline; as, the Baptist *Communion*.—Different churches, too, are said to be in *C.* when they are united in doctrine and principle.

—The Lord's Supper; celebration or participation of the Eucharist or Holy Sacrament; as, to administer the *Communion*. See *EUCCHARIST*.

Communion-table, (*Eccl*.) See *ALTAR*.

Communio, *n.* A member of the same communion.

Communipaw, in *New Jersey*, formerly a village of Bergen co., on the W. shore of New York bay; now part of Jersey City. Has extensive docks and R.R. terminals.

Communism, *n.* See *SOCIALISM*.

Communist, *n.* (*Pol.*) One who advocates the doctrine of community of things, or the abrogation of all individual rights of property. See *SOCIALISM*.

Communistic, *a.* Relating, or pertaining, to communism; as, a *communistic* arrangement.

Community, *n.* [Fr. *communauté*; Lat. *communitas*, from *communis*, common.] Common possession or enjoyment; fellowship; mutual participation and enjoyment;—used in an opposite sense to *appropriation*; as, a *community* of goods.

—The commonwealth; the body politic; society at large.

"The love of our country is impressed on our minds for the preservation of the community."—*Addison*.

—A society or association of persons living under the same laws and social regulations; as, a monastic *community*.

(*French Law*.) A species of partnership that man and woman contract when they are lawfully married to each other. The *C.* embraces the profits of all the effects of which the husband has the administration and enjoyment, either of right or fact; of the produce of the

reciprocal industry and labor of both husband and wife, and of the estates that they may acquire, either by donation or purchase. The debts contracted during the marriage enter into the *C.*, and must be acquitted out of the common fund. *Legal C.* is that which takes place by virtue of the contract of marriage. It is the common law in France. *Conventional C.* is that which is formed by express agreement in the contract of marriage.

Communitability, *n.* Quality of being commutable. **Commutable**, *a.* [Lat. *commutabilis*.] That may be commuted, or exchanged, or mutually changed; that may be given for another.

Communtation, *n.* [Lat. *commutatio*.] Act of giving one thing for another; barter.

"The whole universe is supported by giving and returning, by commerce and commutation." — *South*.

—Act of passing from one state to another; change; alteration.

"So great is the commutation, that the soul then hated only that which now only it loves." — *South*.

—Any sum paid down as an equivalent for a *pro rata* payment; as, a *commutation* of church-tithes. — The purchase in lump of any vested privilege, in lieu of paying for the same in instalments; as, a *commutation* of railroad-fare for a year.

(*Law*.) The substitution of a less for a greater degree of punishment; as, a *commutation* of sentence.

(*Astron.*) The angle of *C.* of a planet is the angle formed at the earth by a straight line drawn from the earth to the sun, and the orthographic projection on the plane of the ecliptic of the straight line which joins the earth with the planet. It is measured by the difference between the sun's longitude and the concentric longitude of the planet.

Communtation, *a.* Pertaining to, or obtained by, acquired right of communting; as, a *commutation*-ticket.

Communtation of Tithes, *n.* See **TITHES**.

Communtative, *a.* [Fr. *commutatif*.] Relating to exchange; interchangeable; mutually passing from one to another; as, "*communtative justice*." — *Burke*.

Communtatively, *adv.* By way of reciprocity of exchange.

Commute, *v. a.* [Fr. *commuer*; Sp. *commutar*; Lat. *commuto* — *con*, and *muto*, to change.] To put one thing in the place of another; to give or receive one thing for another; to change; to exchange; — generally used in the sense of to exchange one punishment or penalty for another of less severity; as, to *commute* a sentence of death to imprisonment for life. — To pay a less sum in the aggregate than would be required in separate payments; — used in reference to periodical travelling; as, to *commute* a year's passage by steam-boat.

—*n. i.* To atone; to bargain for exemption.

—To enter into an arrangement to pay in a lump sum; as, to *commute* a half-year's passage-money.

Commutter, *n.* One who commutes for travelling expenses.

Communtual, *a.* [Lat. *com* — *con*, and *mutual*, *q. v.*] Reciprocal; mutual. (Used mostly in poetry.)

Comnenus, a celebrated Byzantine family, who furnished 6 emperors to Constantinople, 1 to Heraclea, and 10 to Trebizond. The 6 emperors of Constantinople are: *Isaac C.*, 1057–1059; *Alexis C. I.*, 1081–1118; *John C.*, 1118–1143; *Manuel C.*, 1143–1180; *Alexis C. II.*, 1180–1183; and *Andronicus C.*, 1183–1185. (See **ALEXIS**, **ISAAC**, &c.) Andronicus was dethroned by Isaac Angelus, and his family lost forever the throne of Constantinople. David, his grandson, became king of Paphlagonia, Heraclea, and Pontus; at the same time that a third *Alexis C.* founded at Trebizond the dynasty of princes who ruled in that city till its conquest by Mohammed II., 1462. Some members of this family took refuge in the Morea and in Corsica; and at the beginning of the present century some descendants of it were yet living in France, and in Italy. See **ABRANTES**.

Como, (anc. *Larius Lacus*), a lake of N. Italy, in Lombardy, lying at the foot of the Lepontine and Rhaetian Alps, chiefly formed by the river Adda, which enters it at its N. and issues from its S.E. extremity. The total length of the lake from *C.* to Riva is about 35 m. About 15 m. from its N. extremity, the promontory of Bellagio divides it into two branches, the longer of which is

is the general designation. The greatest breadth of the lake is not more than 3 m.; and through the principal part of its length it is much less. The beauty of the surrounding scenery, and the salubrity of the climate, have made the Lake of *C.* the most celebrated and most resorted to in Italy; its shores being everywhere studded with fine villas.

Como, (anc. *Comum Norum*), an old city, at the S. extremity of the above lake, 20 m. N. of Milan. *Manuf.* Velvet, taffetas, gloves, stockings, &c. *Pop.* 20,826.

Como, in *Illinois*, a post-village of Whitesides co., on Rick River, about 150 m. N. of Springfield.

Como, or **COMO DEPOT**, in *Mississippi*, a post-village of De Soto co., about 44 m. S. of Memphis.

Como, in *Nevada*, a mining village of Lyon co., about 10 m. S.E. of Dayton.

Como, in *Tennessee*, a post-office of Henry co.

Comodo, an island of the Malayan Archipelago, occupying nearly the entire width of the strait which separates the much larger islands of Sumbawa on the W., and Flores on the E.; Lat. of N.E. extremity, 8° 22' S., Lon. 119° 37' E. It is 35 m. in length, and 16 m. in average breadth.

Comorin, (CAPE.) See **CAPE COMORIN**.

Comorn, or **KOMORÓ**, (Magyar *Kom'aron*), a royal free town of Hungary, 48 m. N.W. of Buda. Its citadel has the reputation of being impregnable, and justified it in the Hungarian war, when the Austrians besieged it in vain from Oct. 1848 to Sept. 1849, and only became masters of it at last by virtue of a capitulation. — *Manf.* Woollens and leather. *Pop.* 11,951.

Comorn, in *Virginia*, a post-office of King George co. **Comoro Islands**, or **COMOROS**, a group in the Mozambique Channel, between Madagascar and Africa. It consists of several mountainous and fertile islands, producing all the crops of a tropical climate. Large herds of cattle are reared upon them, and the rivers abound in fish. Lat. between 11° and 13° S., Lon. between 43° and 45° 30' E. The islands, which are of volcanic origin, are called Angaziga (or Great Comoro), Anjouan (or Johanna), Mayotta, and Mohilla.

Comose, *a.* [Lat. *comosus*, hairy.] (*Bot.*) Ending in a tuft or kind of brush.

Compact, *a.* [Lat. *compactus*, from *compingo* — *con*, and *pango*, *pactus*, to fasten, fix, or drive on.] Joined, united, or fastened together, closely and fixedly; firm; solid; dense; as, a *compact* arrangement, a *compact* body.

"The lunatic, the lover, and the poet,

Are of imagination all compact." — *Shaks.*

—Brief; pithy; close; not diffuse or verbose; as, a *compact* treatise.

"Where a foreign tongue is elegant, expressive, close, and compact, we must study the utmost force of our language." — *Felton*.

Compact, *n.* [Lat. *compactum*, from *compaciscor* — *con*, and *paciscor*, *pactus*, to make a bargain.] An agreement or bargain made with any one; a union, league, treaty, covenant, or contract, — whether of individuals or of states.

"Wedlock is described as the indissoluble compact." — *Macaulay*.

—*v. a.* To thrust, drive, or press closely together; to join firmly; to consolidate; to make close.

"Now the bright sun compacts the precious stone." — *Blackmore*.

—To unite or connect firmly; to mass into a system.

"We see the world so compacted, that each thing preserveth other things, and also itself." — *Hooker*.

Compactedly, *adv.* Closely; in a compact manner.

Compactedness, *n.* State of being compact; close union of parts; closeness; firmness; density.

"Sticking or compactedness being natural to density." — *Digby*.

Compacter, *n.* One who enters into a compact.

Compactable, *a.* Susceptible of being compacted.

Compaction, *n.* [Lat. *compactio*.] State of being made compact.

Compactly, *adv.* Closely; deusely; with close union of parts.

Compactness, *n.* State of being compact; close union of parts; closeness; firmness; density.

"By reason of the compactness of terrestrial matter." — *Woodward*.

Compages, (*kom-pa-jez*), *n. sing. and pl.* [Lat. See **COMPACT**.] A system of many parts united.

"The organs in animal bodies are only a regular compages of pipes and vessels." — *Ray*.

Companion, *n.* [Fr. *compagnon*; Sp. *compañon*; L. Lat. *compagus*, *compaganus* — *con*, and *paganus*, from *pagus*, a district, a village.] A comrade; one who keeps company with another; one whom a person frequently associates and converses with; a fellow; a chum; an associate; a mate; a partner; a confederate; an accomplice.

"When, musing on companions gone,

We doubly feel ourselves alone." — *Scott*.

Companion, or **Companion-ladder**, (*Naut.*) The staircase in a ship by which officers descend into the cabin, and ascend to the quarter-deck. — **Companion-hatch**, the wooden porch, or cover over the entrance to the staircase of a ship's cabin. — **Companion-way**, the front staircase to a ship's cabin. — **Knights Companions**, (*Her.*) Members of a knightly order, in rank next below **Knights Commanders**.

Companionable, *a.* Qualified to be an agreeable companion; fit for good-fellowship; sociable; entertaining.

Companionableness, *n.* Sociableness; qualification of being companionable.

Companionably, *adv.* In a companionable manner.

Companionless, *a.* Without a companion.

Companionship, *n.* Fellowship; association; close intimacy.

"It shall hold companionship in peace

With honour, as in war." — *Shaks.*

—In England, the lowest rank of a knightly order; as, the *Companionship* of the Bath.

—Company; retinue; train.

"Aleibiades, and some twenty horse,

All of companionship." — *Shaks.*

Company, (*kim'pā-ne*), *n.* [It. *compagnia*; Fr. *compagnie*. See **COMPANION**.] A number of persons associated together, or assembled together, for mutual pleasure or entertainment; society; a group; a circle; as, a *company* of wits.

"A crowd is not company." — *Bacon*.

—An association; a firm; a corporation of persons united for the purpose of carrying on some enterprise for the common benefit; as, the Union Pacific Railroad *Company*. See **JOINT STOCK COMPANY**; **PARTNERSHIP**.

—Certain persons united in a trading firm, but whose names are not included in the published title; as, *Smit, Jones & Company* (abbreviated *Co*).

—State of being a companion or intimate associate; as, of accompanying; society; fellowship; as, to sail in *company*.

—A body of persons associated, whether in a permanent or transient state; as, a *company* of actors.

(*Mil.*) A subdivision of a regiment, consisting of from 60 to 100 men, under the command of a captain, as, a grenadier *company*.

(*Naut.*) The entire complement of a ship's crew, including the officers; as, to pay off a ship's *company*.

To bear *company*. To accompany; to attend; to go with.

"His faithful dog shall bear him company." — *Pope*.

To keep *company*. To be in intimate relations with; to frequently associate with; to accompany; to attend; as, to keep *company* with one's betrothed wife.

"Why should he call her company?" — *Shaks.*

—To frequent taverns, or places of public entertainment.

—*v. a.* To associate with.

"I wrote to you not to *company* with fornicators." — *1 Cor. v.*

—To have sexual intercourse.

Company's Shops, in *North Carolina*, a former post-office of Alamance co.

Comparable, *a.* [Fr., from Lat. *comparabilis*.] That may be compared; worthy of comparison; being of equal regard.

"There is no blessing of life comparable to the enjoyment of discreet and virtuous friend." — *Addison*.

Comparableness, *n.* Quality of being comparable.

Comparably, *adv.* In a manner or degree worthy to be compared, or of equal regard; as, when one thing comparably better than another.

Compare, *n.* (*Logic*.) One of two things compared together.

Comparative, *a.* [Lat. *comparativus*.] Estimated comparison; not positive or absolute; as, a *comparative* good.

—Having the power of comparing different things.

"It is the comparative faculty which notes it." — *Glanville*.

(*Gram.*) Expressing more or less, as distinguished from *positive* and *superlative*. See **COMPARISON**.

Comparative Anatomy. See **ANATOMY**.

Comparatively, *adv.* In a state of comparison.

"With but comparatively few exceptions." — *Prescott*.

Compare, *v. a.* [Lat. *comparo* — *con*, and *paro*, to make equal, from *par*, equal; Fr. *comparer*.] To set or bring things together, to examine the relations they bear to each other, with a view to ascertain their agreement or disagreement, their relative proportions, quantities or qualities; to measure or estimate one thing by another.

"To compare small things with greatest." — *Milton*.

—To liken; to represent as similar; as, to compare a beautiful woman to Venus.

(*Gram.*) To form an adjective in its several degrees of signification; as, *light*, *lighter*, *lightest*.

—*v. i.* To hold comparison; to be like or equal.

"I should compare with him in excellence." — *Shaks.*

—*n.* State of being compared; possibility of entering into comparison; comparative estimate; comparison.

"Oh, things without compare!" — *Sir John Suckling*.

Comparer, *n.* One who makes a comparison, or compares one thing with another or others.

Comparison, *n.* [Fr. *comparaison*.] Act of comparing; state of being compared; comparative estimate; proportion.

(*Rhet.*) A figure of speech, which appears to differ from *metaphor* only in form: the resemblance being stated in the first case, while it is implied in the second. This is the sense in which the term *C.* is used and defined by Aristotle, in his *Art of Rhetoric*. Frequent use of the same idea furnishes at the same time both *C.* and *metaphor*; as in the following line, "They melted in the field as snow." The word *melted* is used by transferring the property of the snow to a multitude of individuals: so far, therefore, the phrase is a metaphor; but the additional words "as snow," transform it into a direct comparison. It will generally be found that the every language the earliest writers, especially the poets, are the most addicted to the use of comparisons and metaphors of a highly figurative and bold character.

is especially observable with respect to the poetry of the Old Testament, and to Homer; while as language advances in cultivation, the metaphor comes more and more into ordinary use, and forms, as it were, the basis of composition, while at the same time it gradually loses the energetic and poetical cast which at first distinguished it.

(*Gram.*) The means by which is denoted the degree in which the quality expressed by an adjective is increased by the substantive with which it is coupled. The

Fig. 657. — LAKE OF COMO.

between 18 and 20 m.; the other branch is about 12 m. long. The three arms of the lake sometimes receive different names—the upper part, as far as Bellagio, being called the *Lake of Bellano*; the longer branch, on which the town of *C.* is built, the *Lake of Como*; and the shorter, the *Lake of Lecco*. Lake Como, however,

are three degrees of *C.*: the *positive*, *comparative*, and *superlative*. The positive expresses the quality singly, without any *C.*: as *good*, *wise*, *prudent*; and, hence, some do not consider this as a degree of *C.* The comparative expresses that the quality is possessed in a higher degree by that object than another; as, *John is taller than James*. The superlative expresses the possession of this quality in the highest degree, or in a higher degree than it is possessed by a number of others: as, *Solomon was the wisest man*; *James is the best scholar in his class*. In English, there are two ways of expressing these degrees: either by an inflexion or change on the word itself, as *wise*, *wiser*, *wisest*; or by the addition of a word, as *prudent*, *more prudent*, *most prudent*. In many cases either form may be adopted; but where the former would produce a harsh word, or be difficult to be pronounced, the latter mode is adopted. Adverbs are compared in the same way as adjectives.

Compart', v. a. [Fr. *compartir*, from Lat. *compartire*.] To divide, or mark into several parts, sections, or subdivisions.

"I make haste to the casting and *comparting* of the whole work." — *Wotton*.

Compartition, (kom-par-tish'un.) n. [Lat. *con*, and *partitio*, from *partior*, to divide, from *pars*, a part, a hare.] Act of dividing into parts. — Division; part divided; a separate part.

(Arch.) Division or distribution of the ground-plan of an edifice into its various apartments.

"Their temples and amphitheatres needed no *compartitions*." — *Wotton*.

Compart'ment, n. A division or separate part of a general design; a design composed of different figures, disposed with symmetry, for ornament: as, the *compart'ment* of a wall.

"In the middle was a large *compartiment* composed of grotesque work." — *Carver*.

(Ship-building.) Separate divisions of a ship's hull; as, *water-tight compartments*.

Compass, n. [Fr. *compas* — *com* for *con*, and *pas*, a pace, a step; Lat. *passus*.] A moving or passing round; circle; a circuit or circular course.

"My life has run its *compass*." — *Shaks*.

Limit or boundary of time or space, and the space included; space; inclosure; circumference; as, within the *compass* of a year.

"And in that *compass* all the world contains." — *Dryden*.

Moderate bounds; due limits; as, "I speak within *compass*." — *Darwin*.

(Mus.) Extent or limit of the voice, or of sound; range of notes in a musical instrument.

"Through all the *compass* of the notes it ran." — *Dryden*.

(Naut.) A name given to instruments contrived to indicate the magnetic meridian, or the position of objects with regard to that meridian. According to the purposes to which the instrument is chiefly applied, it assumes the *mariner's compass*, the *azimuth compass*, and the *variation compass*, each particular application requiring some peculiarity of construction; but whatever modifications it may receive, the essential parts are the same in all cases. These are a magnetized bar of steel, called the *needle*, having fitted to it at its centre a cap, which is supported on an upright pivot, made sharp at the point in order to diminish the friction as much as possible, and allow the needle to turn with the slightest force. The *mariner's compass* has a circular card attached to its needle, which turns with it, and on the

age himself to be standing within it. The entire circumference is divided into 32 equal portions by lines diverging from the centre, called points, or rhumbs. The points marked N. S. E. W. are called the *cardinal points*, (q. v.) The N. point is distinguished by a *fleur-de-lis*. It will be readily seen, on an inspection of the diagram, (Fig. 658,) how the notation of the points between any 2 of the cardinal points is managed: thus the point midway between N. and W. is called N.W., or north-west, — a combination of the letters of the cardinal points between which it lies being used to denote it; that between N.W. and N. is called N.N.W., or north-north-west; and that between N. and N.N.W., N.W., or N. by W., as it is usually written, meaning north by west. It may be remarked that whenever a hyphen or connecting mark is used between any two letters in the diagram, the word "by" must be expressed when reading the points of the compass; and it will be seen that the points which lie on either side of the cardinal points, and the points that are midway between these, must be read in this way. The angular distance between any two points is $11^{\circ} 15'$, as the horizon is divided into 360° , and each space between the rhumbs is consequently represented by 360° divided by 32. Different shapes have been adopted for the needle at various times; but it seems to be now acknowledged that it should be as light as possible, and in the shape of a very thin prism, placed in such a manner that its narrow sides are turned upwards and downwards; one towards the eye of the spectator, and the other towards the card. The great requisites in a good compass are, that the motion of its needle should be steady, as well as active and sensible, without oscillation; and that it should be so contrived that it may be easily corrected when deviation is caused by any local attraction. Many attempts have been made to correct disturbances arising from local causes, — chiefly from the iron used in the construction of vessels, — by surrounding the compass with bars of soft iron or magnets, that will attract the needle in a contrary direction to that in which it is drawn by the metal on board, and so counteract and neutralize its effects; but the correction of local attraction seems, under any circumstances, to be attended with considerable difficulty and uncertainty. Generally, when compasses have been placed on board a vessel, they are corrected, for the influence of local attraction, by what is termed "swinging" the ship. The ship's head is brought round to every point of the compass successively, and the differences in the bearings, indicated by the compass on board and an azimuth compass on shore, under the charge of an intelligent officer, are carefully noted and registered. The results thus obtained form what is called a *correcting card* for the vessel in question. The Chinese assert that the mariner's compass was invented by the Emperor Houang-ti, about 2634 B. C., and that it was then used to enable them to direct their course to any distant point on land. The sailors who navigated the Indian Ocean and Eastern seas were well acquainted with its use in the third century after the Christian era, when it was quite unknown in Europe, where it is said to have been introduced by Marco Polo on his return from his travels in the East, about 1260. Flavio Gioja, a Neapolitan sailor, effected considerable improvements in it, and brought it into the form in which we now have it, about 1300. Columbus is said to have discovered the variation of the compass in 1492; but this is considered to be doubtful. The inclination or *dip* of the needle (see NEEDLE, DIPPING) was found out by Robert Norman, of London, in 1576. — The *azimuth compass*, being intended to show the bearing of objects in respect of the magnetic meridian, has its circle divided merely into degrees, instead of the rhumbs used in navigation; and is provided with sights to allow the angles to be taken more accurately. — The *variation compass* is designed to exhibit the diurnal changes in the deviation of the magnetic from the true meridian; and the needle is generally made of much greater length than in the mariner's compass, in order to render minute variations more sensible.

pl. (The use of *pl.* is motivated by the two similar parts of the instrument, as in scissors, &c.) (Math.) Compasses are mathematical instruments, principally used for drawing circles, arcs of circles, ellipses, &c., and for measuring and transferring distances. The *common compasses* consist of two pointed legs, connected by a pivot-joint; the lower part of one leg is generally movable, to admit of the substitution of a drawing-pen or pencil. *Triangular compasses* have 3 legs working on 2 pivots; so that the distances between the 3 points of any triangle can be measured at once and transferred. *Proportional compasses* consist of two legs, pointed at either end, fastened together by a clamping screw, and presenting the form of the letter X when open. The length of the legs can be regulated by means of a scale engraved on the side, and set to measure and transfer distances in any desired proportion. The *beam compass* is a bar, on which two sliding sockets travel, that can be fixed at pleasure, and are provided with pen, pencil, and steel points. They are used for measuring long distances, and describing the arcs of large circles in the projections of maps. — See CALIPERS.

Com'pass, v. a. To pass, go, or move round; to stretch round; as, to *compass* a city.

"And compassed by the insolate sea." — *Tennyson*.

— To enclose; to encircle; to surround; to environ; — sometimes preceding *around* or *about*.

"The crowds that *compass* him around." — *Dryden*.

— To beleague; to besiege; to block; to invest; as, to *compass* an enemy's camp. — To obtain; to attain to; to procure; to get within reach, or within one's power; to accomplish.

"How can you hope to *compass* your designs?" — *Dryden*.

— To purpose; to plot; to contrive; as, to *compass* a person's death.

Com'passable, a. Susceptible of being compassed or attained.

Com'pass-card, n. (Naut.) The circle-card of a mariner's compass, whereon are marked the 32 points.

Com'pass-dial, n. A small pocket-compass, fitted with an horological dial.

Com'passes, n. pl. (Math.) See COMPASS.

Com'pass-headed, a. Circular; — used in ancient architecture.

Com'passing, n. Act or process of bending timber into a curved form.

Compassion, n. [Fr., from Lat. *compassio* — *con*, and *patior*, *passus*, to suffer.] A suffering with another; fellow-suffering; fellow-feeling; pity; sympathy; commiseration.

Compassionate, a. Inclined to compassion; ready to pity; piteous; sympathizing; merciful; tender-hearted.

— *v. a.* To have compassion for; to pity; to commiserate.

"Compassionates my pains, and pities me." — *Addison*.

Compassionately, adv. With compassion; mercifully.

Compassionateness, n. Quality of being compassionate and pitiful.

Compassless, a. Having no compass.

Compass-plane, n. (Joinery.) A tool similar to the smoothing-plane in size and shape, but with a convex sole, and the convexity in the direction of the length of the plane. The use of the *C.* is to form a concave cylindrical surface, when the wood to be wrought upon is bent with the fibres in the direction of the curve, which is in a plane surface perpendicular to the axis of the cylinder; consequently, *C.* must be of various sizes, in order to accommodate different diameters.

Compass-roof, n. (Arch.) A roof in which the braces of the timbers are inclined so as to form a sort of arch.

Compass-saw, n. (Joinery.) A tool for cutting the surfaces of wood into curved surfaces: for this purpose it is narrow, without a back, thicker on the cutting-edge, as the teeth have no set; the plate is about an inch broad next to the handle, and diminishes to about a quarter of an inch at the other extremity; there are about five teeth in the inch; the handle is single.

Compass-signal, n. (Naut.) A signal denoting a point of the compass.

Compass-timber, n. (Ship-building.) Curved timber or bends.

Compass-window, n. (Arch.) A bay-window, or oriel.

Compatibility, n. [Fr. *compatibilité*.] Quality of being fit, compatible, or congruous; as, a *compatibility* of properties.

Compatible, a. [Fr. *compatible*, from *compatir*; Lat. *con*, and *patior*, to bear or suffer.] That may abide or agree together; that may bear or endure with; that may exist with; not incongruous; consistent; suitable; fit; agreeable.

"The object of the will is such a good as is *compatible* to an intellectual nature." — *Hale*.

Compatibleness, n. Compatibility; fitness; congruity.

Compatibly, adv. Fitly; suitably; consistently; as, *compatibly* with common sense.

Compa'triot, n. [Fr. *compatriote*; Lat. *compatriota*, from *con*, with, and *patria*, one's country.] A fellow-patriot; one of the same country, and having like interests and feelings.

— *a.* Of the same race and country.

"Britain rears to freedom an undaunted race."

Compa'triot, zealous, hospitable, kind. — *Thomson*.

Compa'triotism, n. State or condition of being a compatriot.

Compeer, n. [Lat. *compar* — *con*, and *par*, equal.] An equal; a companion; an associate; a mate; a colleague.

"Base servitude, and his dethroned *compeers*." — *Philips*.

— *v. a.* To be equal with; to vie with; to match.

"By me invested, he *compeers* the best." — *Shaks*.

Compel', v. a. [Lat. *compello* — *con*, and *pello*, to drive.] To drive or cause to move together; to drive or urge with force, or irresistibly; to force; to constrain; to necessitate; as, to *compel* obedience, to *compel* payment. — To take by force or violence; to seize; as, to *compel* a subsidy. — To seize, hold, or overpower.

"But easy sleep their weary limbs *compell'd*." — *Dryden*.

Compellable, a. That may be driven, forced, or constrained.

Compellably, adv. By constraint or compulsion.

Compella'tion, n. [Lat. *compellatio*, from *compello* — *compellatus*, to accost, to address.] An addressing or accosting; a ceremonious appellation, as *Sire*, &c.

"The style best fitted for all persons . . . to use, is the *compellation* of Father, which our Saviour first taught." — *Luppa*.

Compellative, n. (Gram.) The title by which a person is addressed or accosted.

Compellatory, a. Compulsory; without option.

Compeller, n. One who forces or compels another.

Compend, Compen'dium, n. [Lat. *compendium* — *con*, and *pendo*, to weigh.] A saving; an abridgment; a summary; an epitome; a brief compilation or composition.

"Abstract them into brief *compend*s." — *Watts*.

"A short system or *compendium* of a science." — *Watts*.

Compendious, a. Of the nature of a compendium; short; summary; abridged; comprehensive; brief; concise; not circuitous; as, a *compendious* method of writing.

Compendiously, adv. In a short or brief manner; summarily; in brief; in epitome.

Fig. 658. — MARINER'S COMPASS.

circumference of which are marked the degrees, and also the 32 points, or rhumbs, likewise divided into half and quarter points. The pivot rises from the centre of the bottom of a circular box, called the *compass-box*, or *binde*, which contains the needle and its card, and is covered with a glass top to prevent the needle from being disturbed by the agitation of the air. The compass is suspended within a large box, by means of two concentric horizontal circles or *gimbals*; the outer one being acted by horizontal pivots, both to the inner circle which carries the compass-box, and also to the outer box; the two sets of axes being at right angles to each other. By means of this arrangement the inner circle, with the compass-box, needle, and card, always retains a horizontal position, notwithstanding the rolling of the ship. The diagram on the card, the circle represents the horizon, and the person using the compass must im-

Compensatiousness, *n.* Shortness; conciseness; brevity; comprehension in a narrow compass.

Compensatiousness, *n.* See **COMPENSATION**.

Compensate, *v. a.* [Fr. *compenser*; It. *compensare*; Sp. *compensar*; Lat. *compensare* — *con*, and *penso*, to weigh carefully, from *pendo*, to weigh.] A balance; to give an equivalent in value to; to make equal return to; to recompense; to requite; to remunerate; as, to *compensate* a person for his labor or trouble. — To make amends for; to be equal in effect to; to make good; to counterbalance; to be equivalent in value to.

"The pleasures of life do not *compensate* the miseries." — *Prior*.

—*v. i.* To make amends for; to render an equivalent; (preceding *for*;) as, to *compensate* you for my negligence.

Compensation, *n.* [Fr., from Lat. *compensatio*.] Act of compensating.

—Something given or obtained as an equivalent; recompense; equilibrium; remuneration; indemnification; amends; as, *compensation* for injury.

(*Civil Law*.) A doctrine of the law of Scotland, France, and other States of Europe, corresponding to the common law *set-off*. It provides that when two parties are mutually creditors and debtors, their debts shall extinguish each other, if equal, and if unequal, leave only a balance due.

Compensation balance. See **PENDULUM**.

Compensative, *a.* Granting or affording compensation.

Compensatory, *a.* Serving for compensation; making amends; as, a *compensatory* clause.

Compete, *v. i.* [Lat. *competo* — *con*, and *peto*, to seek.] To carry on competition or rivalry; to strive; to contend; to claim to be equal; to come into competition with; as, to *compete* for a public office.

Competence, **Competency**, *n.* [Fr. *compétence*, from Lat. *competentia*.] Agreement; suitability; fitness; ability; adequacy.

"To make them zealously is not in the *competence* of law." — *Burke*.

—Sufficiency of worldly goods without superfluity; such means of subsistence as are necessary for the common comforts of life; sufficiency; as, a modest *competence*.

"Reason's whole pleasure, all the joys of sense,

Lie in three words, health, peace, and *competence*." — *Pope*.

(*Law*.) The legal fitness or ability of a witness to be heard in the trial of a cause. The quality of written or other evidence, which renders it proper to be given on the trial of a cause. — (*French Law*.) The right in a court to exercise jurisdiction in a particular case.

Competent, *a.* [Lat. *competens*, from *competo*.] Fit; convenient; sufficient; adequate; qualified; as, a *competent* judge.

"The clergy have gained . . . a *competent* knowledge of the world." — *Atterbury*.

—Belonging; having adequate power or right; falling within the competency of; incident; consistent with; preceding to.

"The Infinite Author of things, who . . . is not *competent* to any finite being." — *Locke*.

Competently, *adv.* Sufficiently; adequately; suitably; reasonably.

"I think it hath been *competently* proved." — *Bentley*.

Com'petine, in Iowa, a post-township of Wapello co., abt. 8 or 9 m. N.E. of Ottumwa.

Competition, *n.* [Fr. *compétition*, from L. Lat. *competitio*, from *competo*.] Mutual contest for the same object; strife for gain or superiority; rivalry; rivalry; contention; emulation; double claim; or, according to the excellent definition of Dr. Johnson, "the act of endeavoring to gain what another endeavors to gain at the same time."

(*Pol. Econ*.) People work, or embark in trade, avowedly for the purpose of making money. It is the object of the law of the land, as well as of religion and morality, to prevent money-making by immoral means; but within the bounds thus drawn around it, money-making is the object of man's exertion. When the money is made, the next point, always within the same bounds, is to make it go as far as it will. *C.* works through the co-operation of these motives. The purchaser wants the best article he can get at the lowest price; the producer strives to beat all his fellows, and offer the best article for the price. As a result of *C.*, we see the necessities and comforts of life every day increasing, and the wealth of the community in incessant progression. There are, doubtless, evils connected with *C.*, and of these, perhaps, the chief is the propensity which some tradesmen have to carry rivalry to the extent of vicious excitement, and to endeavor rather to get the better of each other than to make their separate fortunes. From this spirit, it frequently happens that when one man has established a successful business in some new locality, another, instead of trying a different business in the same place, or the same business in some other and similar place, sets himself down as a rival, and ruins both. But, wherever *C.* is not, monopoly exists, and monopoly, in all its forms, is the taxation of the industrious for the support of indolence, if not of rapacity. On the establishment of the French provisional government of 1848, an attempt was made to do away with a natural system of *C.* among workmen, and to remunerate a number of workmen alike, but the experiment was very unsuccessful. Louis Blanc, in his *Organisation du Travail*, supposes three competitors for a job. A has a wife and family; he wants \$5 as wages. B has a wife only; \$4 will suffice him. But C is a bachelor, who can subsist on \$3; therefore, he gets the job, and the others starve. But he leaves out entirely one side of the bargain. Employers compete to get work, as much as workmen compete for employment. If the work of B or C be worth, in the market, \$5, they will get that, whether they have fami-

lies or not; and it is not the practice of the working-man, any more than of the rest of the human species, to give his work at a third less than its value, because he is a bachelor. — See **SOCIALISM**.

Competition, in Missouri, a post-office of Laclede co., in Virginia, a post-village of Pittsylvania co., on a branch of the Bauister River, 160 m. S.W. of Richmond.

Competitive, *a.* Relating to, or making, competition.

Competitor, *n.* [Lat.] One who competes; a rival; an opponent.

Competitory, *a.* Acting in competition; out of emulation.

Competitress, **Competitrix**, *n.* A female competitor.

Compiègne, (*kom'pe-ain*.) a town of France, dep. Oise, on the Oise, 35 m. from Beauvais. This place has a considerable historical importance. Its palace was built by Louis XV., after designs by Gabriel, and restored by Napoleon I. The parks and forests by which it is encompassed cover 30,000 acres. The other chief buildings are the abbey of St. Corneille, the Pont Neuf, and the Hôtel-de-Ville. Here Joan of Arc was, in 1430, made prisoner, and sold to the English; and here Napoleon I., in 1810, married the archduchess of Austria. Pop. 12,882.

Compilation, *n.* [Lat. *compilatio*. See **COMPILE**.] Act or method of compiling, or collecting together from various sources; as, the *compilation* of a book.

—That which is compiled; a collection gathered from various authors; a literary work made up of parts collected from sundry authors or sources. — *C.* is an object of copyright, when it requires in its execution taste, learning, and intellectual labor.

Compile, *v. a.* [Lat. *compilo* — *con*, and *pilo*, to pilage.] To collect or gather from various sources, in order to form an aggregate. To form a literary work, by collecting parts from the same or from different authors; to compose; to arrange.

"In poetry they *compile* the praises of virtuous men and actions, and satires against vice." — *Temple*.

Compilement, *n.* Concavation; act of piling together, or of heaping up; as, "a natural or artificial *compilement*."

Compiler, *n.* One who compiles; a person who makes a collection from the works of authors, and forms a book of them; as, a painstaking *compiler*.

Complacence, **Complacency**, *n.* [L. Lat. *complacencia* — *con*, and *placere*, to please; Fr. *complaisance*.] State of being pleased or gratified; pleasure; gratification; satisfaction.

"Others proclaim the infirmities of a great man with *complacency*." — *Addison*.

—The cause of pleasure, satisfaction, or joy.

"O thou, my sole *complacency*!" — *Milton*.

—Complaisance; civility; softness or urbanity of manners.

Complacent, *a.* Pleasing; civil; affable; kind; complaisant; displaying gratification; as, a *complacent* air.

"They look up with a sort of *complacent* awe to kings." — *Burke*.

Complacential, *a.* Marked by complacency.

Complacentially, *adv.* In an accommodating manner.

Complacently, *adv.* Softly; in a complacent manner.

Complain, *v. i.* [Fr. *complaindre*, from Lat. *con*, and *plango*, *plangere*, to strike, from the root *plag*.] To proclaim, express, or manifest grief, sorrow, pain, or distress; to lament; to bewail; to repine; to murmur; to grieve; to express dissatisfaction, or a sense of injury or wrong; — generally preceding *of*; as, to *complain* of one's misfortune.

"I will *complain* in the bitterness of my soul." — *Job* vii. 11.

—To make a charge; to bring a formal accusation; to assert a sense of wrong or injury; (with *of* before the cause of sorrow;) as, to *complain* of a person to others.

"Now, Master Shallow, you'll *complain* of me to the council." — *Shaks.*

Complainable, *a.* That which may be complained of. (*R.*)

Complainant, *n.* [Fr. *complainant*.] One who makes complaint.

(*Law*.) One who commences a legal prosecution by complaint against another or others. — The party who urges a suit in equity, answering to the plaintiff at common law.

Complain'er, *n.* One who complains, laments, or murmurs.

"Complainers never succeed at court, though railers do." — *Swift*.

Complain'ful, *a.* Full of complaint. (*R.*)

Complaint, *n.* [Fr. *plainte*; L. Lat. *complains*.] Representation of pains or injuries; expression of grief, regret, pain, censure, or resentment; lamentation; murmuring; a finding fault; as, a person full of *complaint*.

"Against the goddess these *complaints* he made." — *Dryden*.

—Cause or subject of complaint or fault-finding. — Cause of bodily complaint, pain, or uneasiness; illness; malady; disease; sickness; as, bowel *complaint*. (Usually denoting the milder forms of disorders.)

(*Law*.) The allegation made to a magistrate or proper officer that some person, whether known or unknown, has been guilty of a designated offence, with an offer to prove the fact, and a request that the offender may be punished.

Complaisance, *n.* [Fr.] Complacency; a pleasing deportment; desire of pleasing; courtesy; civility; concension; urbanity; politeness.

"In *complaisance* poor Cupid mourn'd." — *Prior*.

Complaisant, *a.* [Fr.] Attentive and pleasing in

manners; desirous to please; courteous; affable; civil; obliging; polite; as, a *complaisant* courtier.

Complaisantly, *adv.* With complaisance or courtesy.

Complaisantness, *n.* Quality of complaisance. (*R.*)

Complanate, *a.* [From Lat. *complanare*.] Reduced to a level surface.

Complane, **Complane'**, *v. a.* [Lat. *complanare*.] To make level; to reduce or flatten to an even surface.

"The vertebrae of the neck and back-bone are made short and *complanated*." — *Derham*.

Complement, *n.* [Lat. *complementum* — *con*, and *plere*, to fill.] That which fills up or completes; completion; what is wanting to complete or fill up; full quantity or number; as, a ship's *complement* of sailors.

"His *complement* of stores and total war." — *Pope*.

—An appendage, or something adventitiously added in way of ornamentation.

(*Astron*.) The distance of a star from the zenith, compared with its altitude.

(*Her*.) The full moon; as, "azure the moon in *her complement*."

(*Mus*.) The necessary interval for completing *an octave*; as, the fourth is the *complement* of the fifth, and the sixth of the third, &c.

(*Math*.) The complement of any magnitude is second magnitude which, added to the first, gives a sum equal to a given third magnitude. This third magnitude is purely arbitrary and conventional. Thus the complement of an angle is its defect from a right angle. The complement of a common logarithm is its defect from 10 thus: — comp. log. 2 = 10 — 30103 = 9.6987. The arithmetical complement of a number is its defect from the next higher power of *ten*; thus: ar. com. 873 = 1000 — 873 = 127.

Complemental, *a.* That fills up or completes; supplying a deficiency; completing.

Complementary, *a.* Completing; supplying a deficiency; complementary; as, *complementary* numbers.

C. Colors. (*Optics*.) Two colors are said to be *C.* each other when they are such that the blending together of the two gives rise to the perception of whiteness. Thus the red and green colors of the prismatic spectrum give, when blended together, white light do also blue and orange.

Complete, *a.* [Lat. *completus*, from *compleo* — *con*, and *pleo*, to fill.] Filled up or full; having no deficiency brought to an end, or conclusion; as, everything is *complete*. — Finished; perfected; entire; absolute; fact; as, the work is a *complete* success.

(*Bot*.) A complete flower consists of the essential organs of reproduction (viz., stamens and pistils), rounded by two sets of leaves or envelopes which protect them.

—*v. a.* [Fr. *completier*; Lat. *compleo*, *completus* — *con*, and *pleo*, to fill.] To finish; to end; to perfect; to accomplish; to perform; to consummate; as, to *complete* a work.

—To effect; to execute; to achieve; to fulfil; to perform.

"He . . . *completes* the nation's hope." — *Blackmore*.

Complete'ly, *adv.* Fully; perfectly; entirely.

Completeness, *n.* State of being complete; perfection.

"These parts go to make up the *completeness* of any subject." — *Locke*.

Completion, *n.* [Lat. *completio*.] Act of completing; state of being complete; as, the *completion* of a serial novel.

"The divine prediction, receiving their *completion* in Christ." — *Scott*.

—Fulfillment; accomplishment; utmost extent; perfect state; realization.

Completive, *a.* [Fr. *completif*.] Making complete; as, *completive* touches.

Completo'ry, *a.* Fulfilling; accomplishing.

—*n.* (*Eccl*.) In the Roman Catholic Church, the oblation, or evening service.

Complex, *a.* [Fr. *complexe*; Sp. *complejo*; Lat. *complexus*, from *complector* — *con*, and *plecto*, to plait, to braid, or interweave, from *plico*, to fold; Gr. *plekō*.] Made up of two or more particulars or parts; connected; opposite; not simple; as, a *complex* idea. — Knit or connected together; interwoven; intricate; involved; complicated; as, a *complex* subject.

—*n.* Complication; collection; mass.

"This parable comprehends in it the whole *complex* of the blessings . . . exhibited by the gospel." — *South*.

Complexed, *a.* Same as **COMPLEX**, *q. v.*

Complexedness, *n.* Complication; involution of many particular parts in one integral mass; intricate texture; connexion; involution; connection of particulars; as, the *complexion* of an argument.

—General appearance of any thing, or circumstance, the *complexion* of the sky, the *complexion* of an affair.

—The color of the face and skin; as, a fair *complexion*. — Formerly, and, we believe, more properly, the term was applied to the temperament, and natural disposition of the body.

(*Physiol*.) Formerly, the human skin was supposed to consist of only two parts, — the *cuticle*, or epidermis, and the *cutis*, or real skin; but Malpighi showed that between these two was a soft gelatinous cellular texture, which he distinguished by the title *rete mucosum*. On this discovery that anatomist offered a suggestion as to the color of negroes. The *rete mucosum* is of a different color in different nations; and the difference of its color corresponds so exactly with the difference of their complexions, that there can be little doubt at

is the principal seat of the color of the human complexion. The different colors observed among mankind may be classified as follows:—Black,—Africans under the line, and the inhabitants of New Guinea and New Holland. Swarthy,—the Moors in the northwest parts of Africa, and the Hottentots in the southern parts. Copper-colored,—the East-Indians. Red-colored,—the American Indians. Brown-colored,—the Tartars, Persians, Arabs, Africans on the Mediterranean coast, and Chinese. Brownish,—the inhabitants of Southern Europe, Sicilians, Spaniards; and also the Abyssinians in Africa. The Turks, Samoides, and Laplanders are also brownish. White,—most of the European nations, including the Swedes, Danes, Poles, Germans, French, English, Dutch, Austrians, Italians, &c., with their descendants in this country; also the Russian tribes of the Caucasus.

Complexional, *a.* Depending on, or having relation to, complexion; as, a *complexional* prejudice.

Complexionally, *adv.* By complexion.

Complexionary, *a.* Pertaining to the complexion.

Complexioned, *a.* Having a complexion, or a certain temperament or state; as, "a flower is the best-complexioned grass."—*Fuller*.

Complexity, *n.* State of being complex; complexity; intricacy; as, the *complexity* of human affairs.

Complexly, *adv.* In a complex manner; not simply.

Complexness, *n.* State of being complexed; complexity.

Complexure, *n.* The involution or complication of a thing with others.

Complexus Musculi, *n.* [Lat.] (*Anat.*) A muscle,uate at the hind part of the neck, where it extends to the interval that separates the two prominent ridges of the posterior surface of the os occipitis, to the transverse and articular processes of the last six cervical vertebrae, as well as to those of the first five dorsal. It serves to straighten, incline, and turn the head.

Compliable, *a.* Compliant; apt to yield.

Compliance, *n.* [See COMPLY.] Act of complying or yielding; submission; concession; assent or consent; obedience; performance.

Compliant, *a.* Complying; yielding; bending; submissive; as, "The compliant boughs."—*Milton*.

Complaisant, *civil*; obliging; yielding to others.

Complaisantly, *adv.* In a yielding manner.

Complicacy, *n.* State of being complex or intricate.

Complicate, *v. a.* [Lat. *complicare*, *complico*—*com*, and *plac*, to fold.] To fold together; to interweave; to fold together; as, *complicated* sinews.

Complicate, *v. a.* To make complex; to involve; to entangle; to make intricate; as, a *complicated* state of affairs.

Complicate, *a.* Complex; complicated.

Complicately, *adv.* In a complicate manner.

Complicatedness, *n.* State of being complicated; intricacy; perplexity.

Complication, *n.* Act of complicating; state of being complicated; that which consists of many things involved, or mutually united; entanglement; involution; intricacy; as, a *complication* of ideas, a *complication* of cases.

Complication, *n.* (*Med.*) *C.* means the presence of several diseases, or of several adventitious circumstances foreign to the primary disease.

Complicative, *a.* Tending to involve.

Complie, (*kom'plis*), *n.* [Fr.] See ACCOMPLICE.

Complie, (*kom'plis*), *n.* [Fr. *complie*.] State or condition of being an accomplice.

Complier, *n.* One who complies, yields, or obeys.

Compliment, *n.* [Fr. See COMPLY.] A courteous compliance with the will or wishes of another; an expression that pleases or gratifies; act or expression of civility, respect, or regard; delicate flattery; a present or bestowal; as, a genteel *compliment*.

Compliment, *v. a.* To stand on *compliment*, to treat ceremoniously.

Compliment, *v. a.* To address with expressions of approbation, esteem, respect; to pay a *compliment* to; to congratulate; to bestow a present or favor; to delicately flatter; to praise; as, to *compliment* a woman on her looks.

Compliment, *v. a.* To should *compliment* their foes and shun their friends.—*Prior*.

Compliment, *v. a.* To utter or exchange compliments; to use ceremonious or conventional expressions of esteem, respect, regard; to employ adulatory language.

Complimental, *a.* Expressive of respect or civility; forming a *compliment*; as, a *complimental* phrase.

Complimentally, *adv.* In the nature of a compliment; civilly; with ceremonious respect.

Complimentary, *a.* Containing compliment; expressing civility, regard, or praise; gratulatory; flattering; as, a *complimentary* address.

Complimentary, *a.* Complimentary. (*R.*)

Complimenter, *n.* One given to compliments; a flatterer.

Compline, *Complin*, *n.* [Fr. *compline*, from Lat. *complanare*.] (*Eccl.*) The last act of daily service in the Roman Catholic Church; the last prayer at night, to be said at eight o'clock.

Conplot, *n.* [Fr. *con* or *com*, and *plot*.] A plotting; a conspiracy; a confederacy.

Conplot, *v. a.* and *i.* To conspire; to plot together; to enter into a confederacy in some concealed design.

Conplot, *v. a.* To plot, contrive, or *conplot* any ill.—*Shaks*.

Conplotment, *n.* Conspiracy; a plotting together.

Conplotter, *n.* A joint plotter; a conspirator; a confederate.

Conplottingly, *adv.* By conplotting; in a conplotting manner.

Compluten'sian, *a.* Relating to the *Complutensian Bible*, (*q. v.*)

Complutensian Bible, *n.* (*Bibliol.*) A polyglot Bible published at Alcalá de Henares, the ancient *Complutum*.—See ALCALÁ DE HENARES.

Compluvium, *n.* [Lat.] (*Arch.*) In ancient architecture, the interval between the roofs of porticoes which surrounded the centre or *cavadium* of Roman houses. The rain was admitted through this opening and fell upon the area below, which was termed by some authors the *impluvium*.

Comply, *v. i.* [Lat. *com* for *con*, and *ply*, (*q. v.*)] To bend to the wishes of another; to act in accordance with the will or wishes of another; to yield or assent to; to fulfil, perform, or execute; to accord, to be obsequious; to acquiesce. (Followed by *with*.)

Compone, *a.* (*Her.*) See COMPANY.

Compo'nent, *a.* [Lat. *componens*, from *compono*—*con*, and *pono*, to set or place.] Composing; constituting; forming one of the elements of a compound.

"The component parts of natural bodies."—*Newton*.

Compo'ny, *a.* A constituent part, as of a compound.

Compo'ny, *Compo'ny*, or **Gobony**, *a.* (*Her.*) Applied to a bordure, pale, bend, or other ordinary, when made up of two rows of small squares, consisting of alternate metals and colors.

Comport, *v. i.* [Fr. *comporter*; Lat. *comporto*—*con*, and *porto*, to bear or carry.] To agree with; to suit; to accord;—sometimes preceding *with*.

"How far... charity may comport with prudence."—*L'Estrange*.

Comport, *v. a.* To bear or carry one's self; to behave or conduct;—used with the reciprocal pronoun.

"Comport yourself at this rantipole rate!"—*Congreve*.

Comportable, *a.* Consistent; fit; suitable; as, a *comportable* method.

Compose, *v. a.* [Fr. *composer*; It. *comporre*; Sp. *componer*; Lat. *compono*, *compositus*—*con*, and *pono*, to set, place, or lay.] To put, lay, set, or place together; to form a compound, or one entire body.

"Zeal ought to be composed of the highest degrees of all pious affections."—*Sprat*.

Compose, *v. a.* To form; to place anything according to its proper form or method; to make up; to constitute; as, to *compose* an alloy.

Compose, *v. a.* To invent and put together in order, as words, sentences, &c.; to make, as a discourse or writing; to write and invent, as an author; as, to *compose* a poem, &c.

Compose, *v. a.* To calm; to quiet; to appease; to tranquillize; to soothe; to make free from agitation; as, to *compose* one's nerves.

"We beseech thee to compose her thoughts."—*Swift*.

Compose, *v. a.* To settle; to adjust; to regulate; to put in proper form; to reduce to order; as, to *compose* a difference.

"A hearty desire to compose all feuds."—*Bishop Taylor*.

Compose, (*Printing*.) To place in proper order for printing, as types; as, to *compose* from copy.

Compose, (*Music*.) To form or invent an air or piece of music, according to the specific laws of melody, time, and harmony.

Composed, *p. a.* Calm; serious; tranquil; quieted; free from agitation or mental disturbance; as, a *composed* mind.

Composedly, *adv.* Calmly; seriously; sedately; as, to answer *composedly*.

Compos'edness, *n.* State of being composed; calmness; sedateness; tranquillity.

Composer, *n.* One who composes; an author, especially a musical author; as, a *composer* of operas.

Composer, *n.* One who appeases, calms, or soothes; one who puts to rights a difference, misunderstanding, or difficulty.

"Sweet composers of the pensive soul."—*Gay*.

Compos'ite, *n. pl.* [Lat., compounded.] (*Bot.*) A Linnaean order of plants, corresponding to the *ASTERACEAE*, *q. v.*

Composite, (*kom-pos'it*), *a.* [Lat. *compositus*. See COMPOSE.] Compounded; made up of parts; as, a *composite* language.

Composite, (*Arch.*) A term denoting the last of the five orders of Architecture. As its name implies, it is composed of 2 orders, the Corinthian, and the Ionic. Its capital is a vase with two tiers of acanthus leaves, like the Corinthian; but, instead of stalks, the shoots appear small, and adhere to the vase, bending round towards the middle of the face of the capital; the vase is terminated by a fillet, over which is an astragal crowned by an ovolo. The volutes roll themselves over the ovolo, to meet the tops of the upper row of leaves, whereon they seem to rest. The corners of the abacus are supported by an acanthus leaf bent upwards; and the abacus itself resembles that of the Corinthian capital. In detail, the Composite is richer than the Corinthian, but it is less light and

Fig. 659.—COMPOSITE ORDER.

delicate in its proportions. Its architrave has only two fasciae, and the cornice varies from the Corinthian in having double modillions. The column is 10 diameters high. The principal ancient examples of this order are the temple of Bacchus at Rome, the arch of Septimius Severus, that of Titus, and the baths of Diocletian. The example in Fig. 659 is from the arch of Titus.—*Composite arch*. See POINTED ARCH.

(Arith.) A number which can be divided by some other number greater than 1, in opposition to a prime number, which cannot be thus divided. Thus, 12, 15, and 27 are composite numbers; whilst 11, 47, 89, are not composite.

—n. Composition; combination; that which consists of an aggregate of parts.

Compos'ing, *n.* (*Printing*.) That branch of the art which consists in taking the type from the cases, and setting them up in such an order as to fit them for the press. The instrument in which they are set up and adjusted is called a *composing-stick*, and the workman who arranges them a *compositor*. To facilitate the arrangement and the removal of the types, a piece of brass rule, as wide as the types are high, cut to the length of the line, and called *composing-rule*, is laid in the *composing-stick*.

Composition, (*kom-po-zish'un*), *n.* [Lat. *compositio*.]

Act of composing or compounding, or forming a whole or integral; that which is composed; the whole body, mass, or compound, formed of different things, parts, or ingredients; as, the *composition* of matter.

Composition, *n.* Adjustment; agreement; orderly disposition of parts or things; regulation; combination; conjunction; state of being put together, united, or composed; as, a chemical *composition*.—Mutual agreement to terms or conditions, for the adjustment of a difference, difficulty, or controversy.

"I crave our composition may be written And sealed between us."—*Shaks*.

—Consistency; congruity.

"There is on composition in these news, That gives them credit."—*Shaks*.

(Law.) An agreement entered into, upon a sufficient consideration between a debtor and creditor, whereby the latter agrees to accept a portion of the debt due to him in full satisfaction of the whole; as, a deed of *composition*.

(Logic and Math.) Synthesis, as opposed to analysis.

(Mech.) *C. of forces*, or *motion*, signifies combining or uniting several forces or motions, and determining the result of the whole. If a body is solicited by two forces which act in the same direction, the *resulting* force, or *resultant*, is equal to the sum of both; that is to say, the effect produced is the same as would be produced by a single force acting in the same direction, and equal to their sum. If the two forces act in opposite directions, the resultant is equal to their difference, and the body will move in the direction of the greater. If the lines of direction of the two forces make an angle with each other, the resultant will be a mean force in an intermediate direction.

(Painting.) A tasteful and proper distribution of the objects of a picture; in grouping, in the attitudes, in the draperies, and in the management of the perspective.

(Arch.) The several parts which constitute an edifice ought to be subject to the laws of symmetry, the principles of which should be familiar to all who profess the architectural art. Symmetry results from proportion, which, in the Greek, is termed *analogia*. Proportion is the commensuration of the various constituent parts with the whole, in the existence of which symmetry is found to consist, for no building can possess the attributes of *C.*, in which symmetry and proportion are disregarded, nor unless that perfect conformation of parts exists which may be observed in a well-formed human being.

(Mus.) The art of disposing and arranging musical sounds into airs, songs, &c., either in one or more parts, for voices, or instruments, or both. Zarlino defines it to be the art of joining and combining concords and discords, which are the matter of music.

(Gram.) The joining of two words together, or prefixing a particle to a word, to augment, diminish, or change its signification.

(Lit.) The art of forming and combining ideas, and clothing them with language suitable to the nature of the subject.

(Print.) Arrangement of, or act of setting types in a composing-stick.

Compos'itive, *a.* [Lat. *compositivus*.] Compounded; having the power of compounding or composing.

Compos'itor, *n.* [Lat.] One who composes or sets in order.

(Printing.) A type-setter. See COMPOSING.

Compos Men'tis, *a.* [Lat. *compos*, having the mastery, control, or power over, and *mento*, *mentis*, the mind.] Of sound mind. See INSANITY.

Compos'sible, *a.* Able to exist along with another thing. (*R.*)

Compost, *n.* [It. *composta*; Lat. *compositum*, from *compono*.] A composition or mixture. (*R.*)

(Agric.) A manure in which the dung of animals, or other organic matter, is mixed largely with earth, mould, lime, and other inorganic substances. See MANURE.

—a. Combined; mixed together.

—v. a. To apply compost to land as a manure.

Compostel'la, or **St. JAGO DE COMPOSTELLA**, a town of Spain, in Galicia, on the Soria, 98 m. from Astorga. The principal church is the cathedral, in which it is asserted that St. James (Sp., *St. Jago*) was buried. It has a university founded in 1532. Pop. 15,000.

Compostel'la, or **COMPOSTELA**, a town of Mexico, for

merly cap. of the dep. Jalisco, 100 m. W. of Guadalajara. It has silver mines, but is nearly deserted on account of its unhealthy climate.

Compostella, St. JAGO DE, or St. JAMES OF THE SWORD, an ancient order of knighthood in Spain, the chief of the four military orders (Compostella, Calatrava, Alcántara, Manresa), probably founded either by Alphonse IX. of Castile (1158, 1214), or Ferdinand II. of Leon (1157, 1188). It originally began from the voluntary association of certain knights to defend the great road leading to the celebrated shrine of St. James, deposited in the cathedral of Compostella. Pope Alexander III. gave the order its rules of government. In most of the great battles between the Christians and Moors, the red cross of St. Jago was conspicuous. The order possessed at one period eighty-four commanderies, with two cities, and numerous boroughs and villages. This immense wealth and power of the order excited the jealousy of the crown, in which, in 1522, the grand-mastership was permanently vested by the pope. Having thus become merely honorary and dependent on the crown, the order rapidly decreased in importance. The knights take the vows of poverty, obedience, and chastity.

Compos'to, [It.] (*Mus.*) Compounded or doubled.

Compos'nre, *n.* [From *compose*.] Act of composing; a composition or compound.

"Their own forms are not like to be sound . . . as forms of public composure." Cross of the order of King Charles I. St. James of Calatrava.

Fig. 660.

—A settled frame of mind; calmness; mental equilibrium; tranquillity; sedateness.

"To whom the virgin majesty of Eve, . . . With sweet, austere composure thus replied." — Milton.

Compo'tion, *n.* The act of drinking, fuddling, or tipping together. (*R.*)

"The fashion of *compo'tion* was still occasionally practised in Scotland." — Sir W. Scott.

Com'potator, **Compo'tor**, *n.* A fellow-tippler; one who has a drinking-bout with another. (*R.*)

"Our companions and *compo'tators*." — Pope.

Com'pote, *n.* [Fr.] A jelly, or preparation of fruity syrup.

Compound, *v. a.* [Fr. *composer*; It. *comporre*; Sp. *componer*; Lat. *compono*—*con*, and *pono*.] To put, lay, or place together, as things, parts, or ingredients; to combine; to mix or mingle; to unite; as, to *compound* a medicine.

—To arrange or settle amicably; to adjust, settle, or pay by agreement; to discharge a debt by paying a part, or giving some equivalent; as, to *compound* with one's creditors.

—To unite two or more words so as to form one; as, to *compound* a substantive.

To *compound* a felony. (*Eng. Law.*) To enter into an agreement with a felon, that he shall not be prosecuted on the condition that he surrenders the objects of his felony; to take a reward for forbearing to prosecute.

—*v. i.* To agree upon concession; to come to terms; to bargain; to agree; to come to terms by granting something on each side; to settle by compromise; generally with *for* or *with*; as, to *compound* for a ransom.

Compound, *a.* Composed of two or more ingredients, parts, divisions, or elements; not simple; as, a *compound* word, a *compound* metal.

(*Arch.*) A *C. arch* is that which has the archivolt moulded or formed into a series of square recesses and angles, on the principle, according to Prof. Willis, that "it may be resolved into a number of concentric archways, successively placed within and behind each other."

(This adj. is found prefixed to many other scientific words, under which proper definitions will be found.)

Com'pound, *n.* A mass or body composed or formed of two or more elements, ingredients, or different substances; the result of composition; as, a chemical *compound*.

[From Pg. *campania*.] A term given in India to the enclosed space around a building or bungalow.

Compoundable, *a.* That may be compounded.

Compound'er, *n.* One who compounds or mixes together; as, a *compounder* of drugs.—One who endeavors to bring parties to terms of agreement.

"Sweeteners, *compounders*, and expedient-mongers." — Swift.

—One who compounds a debt, obligation, or felony.

—A collegian of a university who pays double fees before taking a degree.

Comprador, *n.* [Sp., buyer.] In China and the E. Indies, a domestic officer who performs the duties of a purveyor or house-steward, and paymaster to a household. It is sometimes applied to a shipping-master, or a person through whose agency ships are furnished with seamen.

Comprehend, *v. a.* [Fr. *comprendre*; It. *comprendere*; Sp. *comprender*; Lat. *comprehendo*, to hold, contain; probably allied to Goth. *handas*, *hand*; Icel. *hönd*; Dan. *haand*, the hand.] To comprise; to embrace within limits; to contain; to include by construction or implication; to imply; as, nature *comprehends* all things. "An art which *comprehends* so many different parts." — Dryden.

—To take into or contain in the mind; to apprehend; to conceive; to have mental perception of; to understand; to grasp the meaning of; as, to *comprehend* a learned disquisition.

Comprehensibility, *n.* State of being comprehensible.

Comprehensible, *a.* [Fr.; from Lat. *comprehensibilis*.] That may be comprehended, comprised, or included; as, "any part not *comprehensible* by axiom." Bacon.—Capable of being comprehended or understood; intelligible; conceivable by the mind.

Comprehensibleness, *n.* Capability of being comprehended or seized by the mind.

Comprehensibly, *adv.* With comprehension.

Comprehension, *n.* [Fr. *compréhension*; Lat. *comprehensio*.] Act or quality of comprehending, including, or comprising.

"The *comprehension* of an idea regards all essential modes and properties of it; so a body, in its *comprehension*, takes in solidity, figure, quantity, mobility." — Watts.

—An including or containing anything within a narrow compass; summary; epitome; compendium; abstract; abridgment.

"The sum and *comprehension* of all (human happiness)." — Rogers.

—Power of comprehending; mental power or capacity to understand, and to admit knowledge; power of the mind to seize hold of and contain ideas; as, it lies within ordinary *comprehension*.

(*Phil.*) That act of the mind whereby it apprehends, or knows, any object presented to it on all the sides on which it is capable of being apprehended or known.

(*Rhet.*) A figure by which the name of a whole is put for a part, or that of a part for a whole, or a definite number for an indefinite.

Comprehensiveness, *a.* Having the quality of comprehending or comprising much, or including a great extent; capacious; extensive; large; wide; compendious; as, "*comprehensiveness* ideas."

—Having the power to comprehend or understand many things at once; as, a *comprehensiveness* nature.

"His *comprehensiveness* head all interests weigh'd." — Pope.

Comprehensively, *adv.* In a comprehensive manner.

Comprehensiveness, *n.* Quality of being comprehensive, or of comprising a large extent; as, the *comprehensiveness* of the eyesight.

—Quality of much in a small compass, or few words.

"Compare the beauty and *comprehensiveness* of legends on ancient coins." — Addison.

Compress, *v. a.* [Lat. *compressus*, from *comprimere*—*con*, and *primo*, *pressus*, to press; Fr. *comprimer*.] To press or squeeze together by force; to condense or force into a smaller compass or space; to crowd; to press; to squeeze; as, to *compress* air.

"Events of centuries . . . *compressed* within the compass of a single life." — D. Webster.

—To embrace sexually or carnally.

"And in his cave the yielding nymph *compress*." — Pope.

Compress, *n.* (*Surg.*) A bolster of soft linen cloth, with several folds, used in surgical operations, and so contrived as to make a due pressure upon any part.

Compressibility, *n.* [Fr. *compressibilité*.] The quality of bodies in virtue of which they can be reduced to small dimensions. All bodies, in consequence of the porosity of matter, are compressible, though liquids resist compression with immense force; quality of being capable of compression into a smaller space.

Compressible, *a.* Capable of being compressed, forced, or driven into a narrower compass.

Compressibleness, *n.* Compressibility; susceptibility to close pressure.

Compression, *n.* Act of compressing; state of being compressed; condensation.

Compressiveness, *a.* Having power to compress.

Compressor, *n.* That which serves or is adapted to compress.

(*Anat.*) A name applied to those muscles which press together the parts on which they act.—*C. naris* is a muscle of the nose, which compresses the alæ towards the septum nasi, particularly when we want to smell acutely. It also corrugates the nose, and assists in expressing certain passions.

(*Surg.*) An instrument invented by Dupuytren, for compressing the femoral artery.

Compressure, *n.* The act or force of one body pressing against another.

"We tried whether heat would, notwithstanding so forcible a *compressure*, dilate it." — Bacon.

Comprint, *v. i.* To print together.

Comprint, *n.* (*Law.*) The surreptitious printing of a work belonging to another.—The work so printed.

Comprisal, *n.* Act of comprising or comprehending; an epitome.

Comprise, *v. a.* [Fr. *compris*, pp. of *comprendre*; Lat. *comprehendo*. See **COMPREHEND**.] To comprehend or include within itself; to embrace; to contain; to inclose. "Friendship does two souls in one *comprise*." — Roscommon.

Compromise, *n.* [Fr. *compromis*, from Lat. *compromissum*. See the verb.] (*Law.*) A mutual promise of parties in controversy to refer their differences to the decision of arbitrators.—An amicable agreement to settle differences by mutual concessions; mutual agreement; adjustment.

—*v. a.* [Lat. *compromitto*, *compromissus*—*con*, and *promitto*, to promise.] To promise mutually to abide by the decision of an arbitrator or referee, or to settle differences by mutual concessions; as, to *compromise* a case.

—To involve; to commit; to put to hazard; to pledge by some act or declaration; as, to *compromise* one's character.

"All who had been *compromised* in the late disturbances." — Motley.

Compromiser, *n.* One who compromises.

Compromissorial, *a.* Relating or pertaining to a compromise. (*R.*)

Compromit, *v. a.* [Fr. *compromettre*; It. *compromettere*; Lat. *compromitto*.] To promise, pledge, or en-

gage, by some act or declaration.—To risk or hazard, by some previous and irrevocable step; as, to *compromit* the honor of a family.

Comprovin'cial, *n.* One who belongs to the same archiepiscopal province.

—*a.* Belonging or pertaining to the same province.

Comp'ton, in pr. of Quebec, a co. bordering on Maine, New Hampshire, and Vermont. Its surface is diversified, and the soil moderately fertile. *Cap.* Compton, a village abt. 11 m. S.S.E. of Sherbrooke. *Pop.* of co. 13,665.

Comp'ton, in Georgia, a village of Jasper co., on the Ocmulgee River, abt. 40 m. W.N.W. of Milledgeville.

Compto'nia, *n.* [From Henry Compton, Lord Bishop of London, who was very fond of Botany, and d. 1713. (*Bot.*) A genus of plants, order *Salicaceae*. The Sweet Fern, *C. asplenifolia*, is a well-known, handsome, aromatic shrub, 2 feet high, common in dry woods and hills.

The main stem is covered with a rusty, brown bark which becomes reddish in the branches, and whit downy in the young shoots. Leaves numerous, on short peduncles, divided nearly to the mid-vein into numerous rounded lobes so as to resemble those of the spleenwort. Stipules in pairs, acuminate. Barren flowers in erect cylindric catkins, terminal and lateral. Fertile flower in a dense, rounded burr or head, situated below the barren ones. Fruit, a small, ovate, brown, 1-celled nut. It blossoms in May.

Comptrol. See **CONTROL**.

Comptroller, (*kont'rôler*), *n.* (*Law.*) A controller; director; a supervisor; an intendant; a public officer appointed to examine, check, and verify certain accounts—so written when used in a legal or technical sense.

Compulsative, *a.* Compulsatory. (*R.*)

Compulsatively, *adv.* By compulsion or constrain

Compulsatory, *a.* Having the power of compelling

coactive (*R.*); as, "*compulsatory* terms." — Shaks.

Compulsion, *n.* [Fr., from L. Lat. *compulsio*, from *compello*, *compulsus*. See **COMPEL**.] A driving or urging by force or constraint; act of compelling; violent force, or constraint applied; forcible agency.—State of being forcibly constrained or compelled; as, to do an thing under *compulsion*.

Compulsive, *a.* Having power to enforce or compel driving; urging; constraining; as, *compulsive* motive.

Compulsively, *adv.* By compulsion or force.

Compulsorily, *adv.* In a compulsory or forcible manner; by force, violence, or constraint.

Compulsory, *a.* Having the power or quality compelling; forcible; driving by violence; constraining; as, to adopt *compulsory* measures.

Compunction, *n.* [Fr. *compunction*; It. *compunzione*; Lat. *compunctio*, from *compungo*—*con*, and *pungo*, to prick.] A pricking of conscience; remorse; contrition; penitential sorrow.

"He acknowledged his disloyalty to the king, with expression of great *compunction*." — Clarendon.

Compunctionless, *a.* Without compunction.

Compunctious, *a.* Pricking the conscience; giving pain for offences committed; repentant.

Compunctiously, *adv.* Remorsefully; with compunction.

Compurgation, *n.* [Lat. *compurgo*—*con*, and *purgo*, to purge.] In England, an ancient practice of justifying a man's veracity by the oath of others.

Compurgator, *n.* One who bears testimony swears to the veracity or innocence of another.

Computable, *a.* Capable of being computed; computable numbers.

Computation, *n.* [Fr., from Lat. *computatio*.] or process of computing, numbering, reckoning, or estimating; reckoning; calculation; estimate; account; sum; amount.

"By just *computation* of the time." — Shaks.

Compute, *v. a.* [Fr. *computer*; Lat. *computo*—*con*, and *puto*, to reckon, to count.] To sum up; to reckon; to calculate; to count; to number; to estimate; to estimate; to rate; as, to *compute* an account.

"What's done we partly may *compute*." — Burns.

Comput'er, **Comput'ist**, *n.* One who computes; a reckoner; a calculator.

Comrade, *n.* [Fr. *camarade*; It. *camerata*, from *camera*, a chamber.] A chamber-fellow; a companion; an associate; a chum; a fellow; a mate.

Comrade Bayou, in Louisiana, of Rapides parish, flows S.E. into Calcasieu River.

Comradeship, *n.* State of being a comrade or comrades.

Coms, **Cooms**, **COOMES**, or **CHIVES**, *n. pl.* The pods of the radicles of malted grain, which after kilndrying drop off during the process of turning. They are sold by maltsters under the name of *malt dust*, and are considered excellent manure.

Com'stock, in Iowa, a post-office of Wapello co.

Comstock, in Michigan, a post-village and town of Kalamazoo co., on the Kalamazoo River, abt. 13 m. W. of Detroit; *pop.* 2,018.

Comstock, in New York, a post-village of Washington co., about 70 m. N. of Albany.

Comte, AUGUSTE, a French philosopher, and the founder of the School of *Positivism*, b. at Montpellier, 1798. After leaving college he became acquainted with the celebrated Saint-Simon, and joined the band of brilliant disciples which the genius and ambition of that distinguished social reformer gathered around him. On the death of his founder, in 1825, Comte deserted the Saint-Simon school, to found one of his own; and during the next years devoted himself to the elaboration of an original system of scientific thought—since known as the *Positive Philosophy*. The great text-book of his system is titled *Cours de Philosophie Positive*, extending to

thick volumes, gradually appeared at intervals between the years 1830 and 1842. During this time he led a quiet, scientific life, as professor of mathematics in the École Polytechnique. Whatever may be thought of the Positive Philosophy, it cannot be denied that to Comte belongs the honor of being the first who grasped the true principle for the co-ordination of the sciences; that in an age of vast speculative and scientific activity he first rose from the empirical classification of facts to a genuine science of principles. The serious defect of his system on the moral side, its omission to recognize and provide for the religious element in man, was felt at last by Comte himself. In his last years he made a desperate effort to remedy it by projecting a new worship. His *Culte Systematique de l'Humanité* is an elaborate attempt to actualize the vague idea of hero-worship. He expounded his views on this worship of man by man still further in the *Caléchisme Positiviste*, and the *Traité de Sociologie*, and gave himself out to be chief priest of the new religion. A condensed translation of M. Comte's great work has been published by Miss Martineau. An important work, entitled *Auguste Comte and Positivism*, by John Stuart Mill, was published in 1865. D. 1857.

omus, *n.* (*Myth.*) The god of revelry, feasting, and nocturnal entertainments. He is represented as a youth, flushed with drinking, and crowned with roses.

on, an abbreviation of Lat. *contra*, against; as, to discuss a matter *pro* and *con*, i. e., *for* and *against*.

on-, a Latin preposition used as an inseparable prefix, and signifying *with* or *against*.

on, *v. a.* [A. S. *kunnan*, to know, know how, to be able; *cunnan*, to inquire, search into; O. Ger. *kunnen*; Goth. *kunnan*, to know; Sansk. *gan*, to shine.] To learn; to study; to make one's self master of; to fix in the mind or commit to memory; as, to *con* a lesson.

on-a'-re, *v. a.* To sub-let a portion of a farm, for a single crop.

o, Relating to the partial sub-letting of a farm.

on Amore, [*It.* with love.] (*Mus.*) With expression; with sentiment.

on-ation, *n.* The faculty of voluntary agency.

Sir W. Hamilton.

onative, *a.* [From Lat. *comatus*, to attempt.] Attempting; endeavoring; as, "The exertive and *conative* powers." — *Sir W. Hamilton.*

onatus, *n.* [Lat., to attempt.] An attempt, effort, or endeavor. — The tendency of a body towards any given point.

oncamerate, *v. a.* [Lat. *concamerare*. See CHAMBER.] To arch over; to vault; to lay a concave over.

oncameration, *n.* [Lat. *concameratio*.] (*Arch.*) Arched work; an arch or vault.

oncan', a narrow tract of country of S. India, prov. Bombay, comprising a portion of the ancient Hindoo subdivision of *Kankana*, whence its name. It is bounded E. by the Western Ghats, and W. by the Arabian Sea. Ext. 340 m. long, with a varying breadth of from 25 to 32. Lon., between 72° 52' and 73° 45' E. Rugged, rocky, and intersected by ravines; the country is covered with jungles, and the fields are fertile in rice. Pop. Unascertained.

oncatenate, *v. a.* [L. Lat. *concateno*, *concatenatus* — Lat. *con*, and *catena*, a chain.] To link together; to unite in a successive series or chain; as things depending on each other.

oncatenation, *n.* Act of linking; a series of links; as, "A *concatenation* of causes." — *Goldsmith.*

oncavation, *n.* Act of making concave.

oncave, *a.* [Lat. *concausus*, *con*, and *causus*, hollow. See CAVE.] Hollow; without elevations or protuberances, as the inner surface of a bowl or sphere; vaulted; arched; — opposed to *convex*; as, a *concave* recess.

(*Math.* and *Optics*.) A curve or surface is said to be *concave* on the side on which straight lines drawn from point to point in it fall between the curve, or surface, and the spectator; that side is convex on which the curve, or surface, falls between the lines and the spectator. Thus, the inner surface of a hollow sphere is *concave*, while the outer surface is *convex*. — The terms *meavo-concave*, or *double concave*, are applied to lenses which are concave on both sides; when one side is plane and the other concave, the lens is said to be *plano-concave*. — The terms *concavo-convex*, or *meniscus*, are applied to a lens having one side concave and the other convex. When one side is plane and the other convex, the lens is said to be *plano-convex*; and if both sides be convex, it is a *double convex*.

oncave, *n.* A hollow; a cavity; an arch or vault.

"Up to the fiery *concave* towering high." — *Milton.*

on, *a.* To make arched or hollow.

oncaveness, *n.* Hollowness.

oncavity, *n.* [Fr. *concavité*; *It.* *concavità*; *L. Lat.* *concavitas*.] A hollow; a cavity; the internal surface of a hollow spherical or spheroidal body; as, the *concavity* of a mould.

oncavous, *a.* [Lat. *concausus*.] Concave.

oncavously, *adv.* With hollowness; after the manner of a concave surface.

onceal, *v. a.* [L. Lat. *concelo* — *con*, and *celo*, to hide.] To hide completely; to hide; to cover; to screen; to withdraw from observation; as, to *conceal* a treasure.

"Double griefs afflict *concealing* hearts." — *Spenser.*

on, to keep secret or hidden; to withhold from knowledge or observation.

oncealable, *a.* That may be concealed, or kept close.

onceal'edly, *adv.* In a manner to prevent detection.

onceal'edness, *n.* State or condition of being concealed; privacy.

onceal'er, *n.* One who, or that which, conceals.

"The *concealer* of the crime was equally guilty." — *Clarendon.*

Conceal'ment, *n.* Act of concealing; state of being concealed or kept out of sight.

"She never told her love,
But let *concealment*, like a worm i' th' bud,
Feed on her damask'd cheek." — *Shaks.*

—Hiding-place; privacy; retreat from sight; secrecy.

(*Law*.) The improper suppression of any fact or circumstance by one of the parties to a contract from the other, which in justice ought to be known. When fraudulent, it avoids the contract, or renders the party refusing it liable for the damage arising in consequence thereof.

Concede, *v. a.* [Fr. *conceder*; Lat. *concedo* — *con*, and *cedo*, to go or walk.] To yield, give up, or surrender; as, a *conceded* authority.

"This must not be *conceded* without limitation." — *Boyle.*

—To grant, allow, or admit; to suffer to pass unquestioned; as, to *concede* a point in argument.

—*v. i.* To admit; to grant; to make concession to.

"I wished you to *concede* to America, at a time when she prayed concession at our feet." — *Burke.*

Conceição, (*kon-sa-sa'ô*.) in Brazil, a village, prov. of Alagoas, on the Curaripe, abt. 4 m. from the sea.

—A city on the Palma River, 340 m. N.N.E. of Goyaz, Lat. 12° S., Lon. 48° 5' W.

Conceição-da-Serra, a town of Brazil, prov. Espírito-Santo, near Victoria; pop. 2,000.

Conceição-de-Lagoa, a town of Brazil, on the island of Santa Catharina, E. of Desterro; pop. 4,000.

Conceição-de-Nogue'ga, a town of Brazil, prov. Minas Geraes, abt. 85 m. N.N.E. of Ouro Preto; pop. 1,500.

Conceição d'Itamar'ca, a town of Brazil, prov. Pernambuco, abt. 16 m. N. of Olinda. Pop. of the district of Itamarca (of which this town is the cap.), 15,000.

Conceição-do-Ser'ro, a town of Brazil, prov. Minas Geraes.

Conceit, *n.* [O. Fr. *concept*; *It.* *concelto*; Lat. *conceptum*, from *concupio*, *con*, and *capio*, to take.] That which is taken hold of within the mind; conception; idea; thought; imagination.

"His grace looks cheerfully and smooth this morning.
There's some *conceit*, or other, likes him well." — *Shaks.*

—A fantastical whim or notion; a pleasant fancy; an odd or quaint sentiment or freak; as, a lively *conceit*.

"His wit is as thick as Tewkesbury mustard; there is no more *conceit* in him than is in a mallet." — *Shaks.*

—Favorable or self-flattering opinion; a lofty or vain conception of one's own person or consequence; as, self-*conceit*.

"Wiser in his own *conceit* than seven men that can render a reason." — *Prov.* xxvi. 16.

Out of conceit with, no longer pleased with.

To put a person out of conceit with, to cause him to look unfavorably upon a thing.

—*v. a.* To conceive; to imagine; to invent; to fancy.

"He *conceits* himself to be struck at, when he is not so much as thought of." — *L. Etrange.*

Conceit'ed, *a.* Having conceit; entertaining a flattering opinion of one's self; vain; boastful; assuming; egotistical; as, a *conceited* fop.

Conceit'edly, *adv.* In a conceited or self-sufficient manner; fantastically.

Conceit'edness, *n.* State or quality of being conceited; conceit; vanity; self-esteem.

Conceiv'able, *a.* That may be conceived; that may be thought or imagined; capable of being formed in the mind; that may be understood or believed.

Conceiv'ableness, *n.* State or quality of being conceivable.

Conceiv'ably, *adv.* In a conceivable or intelligible manner.

Conceive, *v. a.* [Fr. *concevoir*; Lat. *concupio* — *con*, and *capio*, to take.] To admit into the womb, to form the embryo of in the womb.

"I was shapen in iniquity, and in sin did my mother *conceive* me." — *Psalms* li. 5.

—To take in, or hold within the mind; to form a full idea of in the mind; to devise; as, to *conceive* an idea. — To comprehend; to apprehend; to perceive; to imagine; to suppose; to understand; to believe; to think; as, to *conceive* the drift of an argument, the plot of a novel, &c.

—*v. i.* To become pregnant; to breed in the womb.

"The beauteous maid . . .

Conceiving as she slept, her fruitful womb
Swell'd with the founder of immortal Rome." — *Addison.*

—To have or form an idea; to understand, comprehend, or mentally picture; to have a complete idea of; followed by *of*.

"*Conceive* of things orderly, or in a proper method." — *Watts.*

Conceiv'er, *n.* One who, or the thing which, conceives, or comprehends.

Concent, *n.* [Lat. *concentus*, from *con*, with, and *canto*, to sing.] Concert of voices; harmony; concord of sounds; as, "*concent* of notes." — *Bacon.*

Concentrate, *v. a.* [Fr. *concentrer*; Lat. *con*, and *centrum*, centre.] To force or cause to move to a common centre, or to a closer union; to bring nearer to each other; to increase the density of; as, to *concentrate* bodies of troops.

Concentrated, *p. a.* Brought together or to a centre; as, "*the concentrated* beams of the sun." — *Boyle.* — Condensed into a small compass, as the active principle or ingredient of any drug.

(*Med.*) *C* essences are medicinal preparations in which the strength of the medicine is so condensed, that a few drops mixed with half a pint of water yield a compound possessing all the usual strength of that quantity of an infusion or decoction, with this advantage, that a mixture can be thus instantly prepared which in the usual

course would take hours to effect. Quinine and morphia, the active principles of bark and opium, are, in this sense, *C* essences of those drugs.

Concentration, *n.* Act of concentrating; state of being concentrated; condensation; compression into a narrow compass; as, *concentration* of light.

(*Chem.*) Reduction of a liquid substance to its greatest density or strength, by evaporation or otherwise.

Concen'trative, *a.* Tending to concentrate; as, a *concentrative* act.

Concen'trativeness, *n.* (*Phren.*) The organ demonstrating the presence of intellectual force; as, the bump of *concentrativeness*.

Concen'tre, *v. i.* [Fr. *concentrer*. See CONCENTRATE.] To come or tend to a centre or point, or to meet in a common centre.

"All is *concentred* in a life intense." — *Byron.*

—*v. a.* To concentrate; to contract towards a common centre.

"In the *concentring* all their precious beams." — *Milton.*

Concen'tric, **Concen'trical**, *a.* [Fr. *concentrique*; *It.* *concentrico*; Lat. *con*, and *centrum*.] Having a common centre; as, a *concentric* circle.

"For they are all *concentric* unto thee." — *Donne.*

Concen'trically, *adv.* In a concentric manner.

Concentric'ity, *n.* State or quality of being concentric.

Concent'nal, *a.* Having harmony. (*R.*)

Concepcion, (*kon-thep'the-on*.) a city of Chili, cap. of a prov. of same name, on the Biobio, 8 m. E. from its mouth, and about 270 m. S.S.W. of Santiago; Lat. 36° 43' 25" S., Lon. 73° 5' 33" W. It was formerly a flourishing city, but it has suffered much from Indian attacks, and from earthquakes. Pop. 13,958. — The Bay of *C* is a large square inlet, open on the N. by a mouth divided into 2 channels by the island Quirinquina, which lies across it.

Concep'cion, or CONCEPTION, in Central America, an island and headland on the N. side of the Isthmus of Panama, about 78 m. E. of Puerto Bello.

Concepcion, a town of Bolivia, prov. Tarija or Tariha, 240 m. S.E. of Chuquisaca; pop. 2,500.

—Another town, prov. Chiquitos, 145 m. N.E. of Santa Cruz-de-la-Sierra; pop. 3,000.

Concepcion, a town of the U. States of Colombia, on the frontier of Costa Rica, 70 m. W.S.W. of Chagres.

Concepcion, a town of the Argentine Republic, prov. Cordova; pop. 500.

—Another town, prov. Corrientes, near the Uruguay River, 190 m. W. by S. of the city of Corrientes.

Concepcion, or VILLA REAL DE LA CONCEPCION, a town of Paraguay, cap. of a department of its own name, on the Paraguay River, 135 m. N.N.E. of Assumption; pop. 2,500.

Concepcion-del-Arroy'o-de-la-China, a town of the Argentine Republic, prov. Entre-Rios, on the Uruguay River, 197 m. N.W. of Montevideo; pop. about 5,000.

Concepcion-del-Pao, a town of Venezuela, 110 m. S. of Barcelona.

Con'cept, *n.* A thing conceived; a conception; an idea; a notion. — A concept is the result of the act or process of conception or mental representation, as distinguished from the process.

Concep'tacle, *n.* That in which anything is contained; a vessel.

(*Bot.*) A name applied to the capsular fruits of many cryptogamous plants. Thus it is given to a second form of fruit which occurs in the rose-colored sea-weeds distinct from tetrasperms; to certain organs in fungi containing both spores and their accessories; and sometimes even to the cases containing the spores of ferns.

Conception, (*kon-sep'shun*.) *n.* [Lat. *conceptio*, from *concupio* — *con*, and *capio*, to take. See CONCEIVE.] Act of conceiving, or a becoming pregnant.

"Thy sorrow I will greatly multiply
By thy *conception*." — *Milton.*

—State of being conceived; the thing conceived.

"Joy had the like *conception* in our eyes,
And at that instant, like a babe sprung up." — *Shaks.*

—Act of forming an image, idea, or notion in the mind; apprehension.

"Consult the acutest poets and speakers, and they will confess that their quickest, most admired *conceptions* were such as darted into their minds, like sudden flashes of lightning." — *South.*

—Image, notion, or idea formed within the mind; sentiment; rational belief or judgment.

(*Phil.*) The simple apprehension or perception that we have of any object, without proceeding to affirm or deny anything regarding it.

Concep'tion, or CONCEPTION, in the West Indies, an island of the Bahamas, 25 m. S.E. of San Salvador.

Concep'tion Bay, in N. America, an inlet of Newfoundland, on its E. coast, N.W. of St. John's, Lat. 48° N., Lon. 53° W. Its principal harbor is Harbor-Grace.

Concep'tion Strait, in S. America, an inlet of Terra-del-Fuego, between Hanover Island and Madre Archipelago, and continuous with Mesier Channel.

Concep'tionalist, *n.* A conceptualist.

Conception, (IMMACULATE.) (*Theol.*) See IMMACULATE CONCEPTION.

Conceptive, *a.* Susceptible of conceiving; as, a "*conceptive* constitution."

Concept'ual, *a.* Relating, or pertaining, to conception.

Concept'ualism, *n.* [Lat. *conceptus*.] (*Phil.*) The system which, in the scholastic philosophy of the Middle Ages, allowed the real existence of universals, but only as ideas conceived by the mind. This was the system of Abelard, as distinguished from the nominalism of Roscelin (who denied the existence of any universals).

except as words or propositions), and the realism of the Greek philosophers.

Conceptualist, *n.* An upholder of the theory of conceptualism.

Concern, *v. a.* [Fr. *concerner*, from Lat. *con*, and *cerno*, to separate, to sift.] To relate or belong to; to affect the interest of.

"Count Claudio may hear; for what I would speak of concerns him." — *Shaks.*

—To awaken interest or feeling in; to touch nearly; to be of importance to.

"Our wars with France have . . . concerned us more than those with any other nation." — *Addison.*

—To engage by feeling or sentiment; to make interested.

"They think themselves . . . no longer concerned to solicit his favor." — *Rogers.*

—To make anxious, disturbed, or uneasy; as, to be concerned for another's welfare.

To concern one's self. To busy one's self in another person's affairs; to intermeddle.

—*n.* That which relates or belongs to one; business; affair; as, the concerns of every-day life.

"Let early care thy main concerns secure,
Things of less moment may delays endure." — *Denham.*

—Interest; care; importance; moment; solicitude; consequence; regard; anxiety.

"'Tis all mankind's concern that he should live." — *Dryden.*

(*Com.*) Persons connected in business, or their affairs in general; as, a solvent concern.

Concern'dly, *adv.* Interestedly; solicitously; in a concerned manner.

Concern'ing, *prep.* Pertaining to; regarding; respecting; having relation to.

"I am free from all doubt concerning it." — *Tillotson.*

Concernment, *n.* The thing in which one is concerned or interested; affair; business; interest; concern.

"Leaving our great concernment to the last." — *Denham.*

—A particular relation to, or interest in, anything.

"He justly fears a peace with me would prove
Of ill concernment to his haughty love." — *Dryden.*

—Concern; interposition; meddling with regard to what belongs to another.

"Without any other approbation . . . or concernment in it." — *Lord Clarendon.*

—Mental emotion, passion, or solicitude.

"Their ambition is manifest in their concernment." — *Dryden.*

Concert, *v. a.* [Fr. *concerter*; It. *concertare*; Lat. *consero*, *concertus* — *con*, and *sero*, to join or bind together, from Gr. *eirō*, to tie, join, or fasten.] To tie, join, or bind into a whole; to frame by mutual communication of opinions or propositions.

"And we, with Nature's heart in tune
Concerted harmonies." — *Motherwell.*

—To plan, contrive, arrange, settle, or adjust.

"Mark how, already, in his working brain,
He forms the well-concerted scheme of mischief." — *Rowe.*

—*i.* To consult with; to contrive; to combine in harmony.

Con'cert, *n.* Agreement in a design or plan; union formed by mutual communication of views and opinions; accordance in a scheme; co-establishment of measures.

"All those discontents . . . have arisen from the want of a due communication and concert." — *Swift.*

—Harmony; musical accordance.

"Visit by night your lady's chamber-window,
With some sweet concert." — *Shaks.*

(*Mus.*) A musical entertainment, in which a number of musicians, both vocal and instrumental, unite in the exercise of their various talents. Concerts sometimes consist of vocal music only. These are distinguished by the name of *vocal concerts*.

Concertante, *n.* [It., from *concerto*.] (*Mus.*) A term expressive of those parts of a musical composition that are especially prominent throughout the piece; as distinguished from those that play only in accompaniment, or subordinate parts.

Concerted, *p. a.* Mutually planned or contrived.

Concerted Piece, (*Mus.*) A composition wherein several solo voices or instruments take prominent parts.

Concertina, *n.* [It., from *concerto*.] (*Mus.*) A musical instrument of modern invention, the sounds of which are produced by free vibrating springs of metal, as in the accordion. The scale of the concertina is very complete and extensive, beginning with the lowest note of the violin, G, and ascending chromatically for three and a half octaves to C. Violin music can be performed on the concertina with good effect. Every sound in the scale is double, and can be produced either by pulling the bellows open, or by pressing them together.

Concertion, *n.* Act or quality of concerting. (*R.*)

Concerto, *n.*; *pl.* CONCERTOS. [It. See CONCERT.]

(*Mus.*) A piece composed for a particular instrument, such as the pianoforte, violin, clarinet, &c., which bears the chief part in it, and is usually accompanied by the full band. The *C.* consists of three movements, each of which, like the whole, has a certain character, and, like the symphony or the sonata, requires a clear development and treatment of the motives, and a strict adherence to the rules of form. When the form is in any way abridged, it is then called a *concertino*.

Con'cert-pitch, *n.* (*Mus.*) The pitch generally adopted for some one given note, and by which every other note is governed.

Concession, *n.* [Lat. *concessio*, from *concedo*. See CONCEDE.] Act of conceding, granting, or yielding. — The thing yielded; a grant.

—In France, a right or privilege granted by government to some company engaged in the formation or construction of a public work.

Conces'sionary, *a.* [Fr. *concessionnaire*.] Formed by concession.

Conces'sionist, *n.* An advocate of concessionary measures.

Conces'sive, *a.* Implying concession.

Conces'sively, *adv.* By way of concession; yieldingly.

"Some have written . . . concessively." — *Browne.*

Conces'sory, *a.* Conceding; yielding; granting.

Conceit, *n.* [It. *concelto*.] Affected conceits found in poetry. (*R.*)

Conceit/to, *n.*; *pl.* CONCEITTI. [It. See CONCEIT.] (*Lit.*) Ingenious thought or turn of expression, point, jeu d'esprit, &c., in serious composition. In the 16th century, the taste for this species of brilliancy, often false, and always dangerous, spread rapidly in the poetical compositions of European nations, especially in Spain and Italy. Tasso is not free from conceit. After his time they became offensively prominent in Italian poetry. In France, the mode of conceit was equally prevalent in the 17th century, and was peculiarly in vogue with the fair critics of the Hôtel Rambouillet, so well known by Molière's *Précieuses Ridicules*. In England, Donne and Cowley are instances of a style full of conceit.

Conch, (*kongh*), *n.* [Lat. *concha*; Gr. *kong-chē*; Sansk. *cankhā*.] A marine shell. — One of the inhabitants of the Bahamas and adjacent islands; so called from the commonness of the conch-shell there. (*Colloq.*)

(*Arch.*) The concave ribless surface of a vault. (Sometimes written *concha*.)

Con'cha, *n.* [Lat.] (*Anat.*) The winding cavity in the temporal bone, forming a portion of the organization of the inner ear. See EAR.

Con'cha, DON JOSÉ DE LA, Marquis of Havana, a Spanish general, B. 1809. After twice holding the office of Captain-General of Cuba, he became Spanish war minister, and, in 1864, president of the Senate. — His brother, DON MAÑUEL GUTIERREZ DE LA CONCHA, MARQUIS DEL DUERO, B. 1808, after holding high command in the first Carlist war, was made field-marshal in 1840, and in 1843 he compelled Espartero to resign the regency of the kingdom. In Sept., 1868, he was appointed by the Queen prime minister, but too late to save her throne. In 1875, he aided in the Bourbon restoration.

Conchifer, *n.* (*Zoöl.*) One of the CONCHIFERA, *q. v.*

Conchifera, *n. pl.* [Lat.] (*Zoöl.*) A name applied by Lamarck, Schweigger, and Latreille, to all molluscs which are protected by a bivalve shell. See LAMELLIBRANCHIATA, and BRANCHIOPODA.

Conchiferous, *a.* [Lat. *concha*, shell, and *fero*, to bear.] Producing or having shells.

Conchiform, *a.* [Lat. *concha*, and *forma*, form.] Conch-shaped; having the form of a conch.

Conchite, *n.* [Fr., from Lat. *concha*.] (*Pal.*) A petrified shell or conch.

Concho, in Texas, a W. central co., bounded on the N.E. by the Colorado River, and also drained by the Rio Concho.

Conchoid, *n.* [Lat. *concha*, shell, and Gr. *eidōs*, form.] (*Geom.*) The name given to a curve invented by Nicomedes in the attempted solution of the two famous geometrical problems of antiquity — the duplication of the cube, and the trisection of an angle.

Conchoid'al, *a.* (*Min.*) A term denoting that the fractured surface of a mineral exhibits curved concavities, more or less deep, and bearing a resemblance to the valve of a shell. Many of the brittle minerals, as Flint, Rock-crystal, Sulphur, Anthracite, &c., exhibit this appearance in a very perfect manner.

Conchological, *a.* Relating to conchology.

Conchologist, *n.* One who is versed in conchology.

Conchology, *n.* [Gr. *konchos*, a shell, and *logos*, a discourse.] The science of shells: that department of Malacology which treats of the nature, formation, physiological relations, and classification of the hard parts or skeletons of the molluscan animals. The presence or absence of a shell having been found not to constitute one of the most important characters which distinguish different classes of molluscs. *C.* is now considered as of little importance in the study of molluscan animals. Yet the relations between shells and the molluscs which possess them are such, that the labors of the merest conchologists have contributed to the real advancement of science, both zoological and geological. It is upon the knowledge of these relations that many of the conclusions of the geologist are founded. In systems of *C.*, shells were usually divided into three orders, *Univalves*, *Bivalves*, and *Multivalves*, according to the number of pieces — one, two, or more — of which they are composed. See MOLLUSCA.

Conchometer, *n.* [Gr. *konchos*, and *metron*, measure.] An instrument used to measure the spiral angle of shells.

Concho-spiral, *n.* A kind of spiral curve found in shells.

Conchucos, a town of Peru, cap. of a province of its own name, on the W. slope of the Andes, and on a branch of Santa River, abt. 85 m. S.E. of Truxillo. Pop. of prov. about 60,000.

Conchylia'ceous, *a.* Belonging to, or consisting of, shells.

Conchylia'ceous, *a.* Resembling, or pertaining to, a shell.

Conchylologist, *n.* Same as CONCHOLOGIST, *q. v.*

Conchylology, *n.* See CONCHOLGY.

Conchyl'ious, *a.* Of the nature of shells, or their species.

Concia'tor, *n.* [Lat. *concio*, to assemble together.] (*Glass Manuf.*) One who proportions the materials to be made into glass, and who works and tempers them.

Concierge (*kon-sârj*), *n.* [Fr., from Lat. *concergius*.] A hall-porter; a janitor; a custodian; a door-keeper.

Concil'iable, *n.* [Lat. *conciliabulum*.] An obscure council of ecclesiastics.

Concil'iate, *v. a.* [Lat. *concilio*, *conciliatus*, from *concilium*, from *concio*, to bring or assemble together — *con*, and *cio*, to make to go, to move or put in motion.] To gain over; to win, as the favor, affections, or consent; to bring to a state of friendship; to reconcile; to propitiate; to pacify.

"It was accounted a philtre, or plants that conciliate affection." — *Browne*

Concilia'tion, *n.* [Fr., from Lat. *conciliatio*.] Act of conciliating, or of winning or gaining, as esteem, favor or affection; reconciliation.

Concil'iator, *n.* [Lat.] One who conciliates or reconciles.

Concil'atory, *a.* [It. *conciliatorio*.] Pacific; tending to conciliate; kind; winning; engaging; persuasive as, a conciliatory policy.

Conci'ni, CONCINO. See ANCRE, (MARSHAL D'.)

Concin'uity, *n.* Mutual fitness or adaptation of parts

"An exact concinnity and evenness of fancy." — *Howell.*

Concin'nous, *a.* Becoming; pleasant; harmonious agreeable. (*R.*)

(*Mus.*) Applied to a performance in concert, which is executed with delicacy, grace, and spirit.

Con'cionative, *a.* Relating to public preaching. (*R.*)

Concise, *a.* [Fr. *concis*, *concise*; Lat. *concisus*, from *cocido* — *con*, and *cædo*, *cæsus*, to cut.] Shortened; brief

short; abbreviated; abridged; comprehensive; as, a concise remark.

"The concise style, which expresses not enough, but leave somewhat to be understood." — *Ben Jonson.*

Concise'ly, *adv.* Briefly; in few words; comprehensively.

Concise'ness, *n.* Quality of being concise; brevity in speaking or writing.

"That version, which has more of the majesty of Virgil, has less of his conciseness." — *Dryden.*

Conci'sion, *n.* [Lat. *conci'sio*.] A cutting off or separating; excision; — hence, a fraction.

(*Script.*) A term of reproach, applied to certain Judaizing teachers at Philippi, as mere cutters of the flesh in contrast with the true circumcision. (*Phil.* iii. 2.)

Concitat'ion, *n.* [Lat. *concitatio*.] The act of stirring up, or putting in motion; as, "concitation of humors."

Concit'izen, *n.* [Lat. *con*, and *citizen*.] A joint citizen a fellow-citizen. (*R.*)

Conclave, *n.* [Lat. *con*, and *clavis*, a key.] (*Eccl.*) The assembly of cardinals, especially so called when they meet for the election of a pope. It begins the day following the funeral of the deceased pontiff. The cardinals are locked up in separate apartments, and meet once a day in the chapel of the Vatican (or other pontifical palace where their votes, given on a slip of paper, are examined. This continues until two-thirds of the votes are found to be in favor of a particular candidate. The ambassadors of France, Austria, and Spain have each the right to put in a veto against the election of one cardinal, who may be unacceptable to their respective courts.

—A private meeting; a close assembly; as, a conclave of politicians. See *Curwright's Pupal Conclaves*.

Con'clavist, *n.* An attendant whom a cardinal takes with him into the conclave for choosing a pope.

Concli'mate, *v. a.* To acclimate. (*R.*)

Conclude, *v. a.* [Fr. *conclure*; Lat. *concludo* — *con* and *claudo*, to shut.] To collect by ratiocination; to deduce; to infer; to determine or close, as an argument.

"But no frail man, however great or high,
Can be concluded best before he die." — *Addison.*

—To end, finish, or close.

"I will conclude this part with the speech of a counsellor state." — *Bacon.*

—To make a final judgment; to decide or determine; bring to a definite end; as, to conclude a peace.

—*i.* To come to a conclusion; to end; to infer, as consequence; to close or terminate. — To determine; settle opinion; to form a final judgment.

"We'll tell when 'tis enough,
Or if it wants the nice concluding bout." — *King.*

Conclud'er, *n.* One who concludes.

Conclud'ingly, *adv.* In a conclusive manner; incontrovertibly.

"Examine whether the opinion . . . be conclusively demonstrated or not." — *Digby.*

Conclu'sion, *n.* [Fr., from Lat. *conclusio*.] That which is concluded; determination; close; termination.

"O, most lame and impotent conclusion!" — *Shaks.*

—Final determination, decision, or result.

"But this denoted a foregone conclusion." — *Shaks.*

—Collection from premises; consequence; inference; deduction.

"Then doth the wit
Bring fond conclusions on those idle grounds." — *Davies.*

—Experiment; that from which a conclusion may be drawn.

"She has pursued conclusions infinite
Of easy ways to die." — *Shaks.*

(*Law.*) Making the last argument or address to court or jury. — An estoppel; a bar; the act of a party by which he has confessed a matter or thing which can no longer deny.

Conclu'sive, *a.* [Fr. *conclusif*, conclusive.] That which concludes or determines; decisive; final; ending debate or discussion; convincing; consequential; as, a conclusive argument.

Conclusive evidence, (*Law.*) That evidence which is incontrovertible, or uncontrollable by any other. — **Conclusive presumption**, (*Law.*) A rule of law determining the quantity of evidence requisite for the support of

particular averment which is not permitted to be overcome by any proof that the fact is otherwise.

Conclu'sively, *adv.* Decisively; with final result or determination.

Conclu'siveness, *n.* Quality of being conclusive or decisive.

Conclu'sory, *a.* Conclusive; convincing. (R.)

Concoag'ulate, *v. a.* To curdle or congeal one thing with another. (R.)

Concoagulation, *n.* [Lat. *con*, and *coagulation*, *q. v.*] A coagulation, as of different bodies into one mass. (R.)

Concoct, *v. a.* [Lat. *concoquo*, *concoctum*—*con*, and *coquo*, to cook, to boil.] To dissolve or digest by the stomach, so as to convert food into nutriment; as, "The food is concocted."—*Cheyne*.

—To bring to perfection; to mature; to ripen; to purify or sublime by heat; as, "High concocted venom."

Thomson.

—To devise; to plot; to plan; to devise, form, and prepare, as a scheme or any undertaking; as, to concoct a conspiracy.

"He was . . . unable to concoct any great fortune."—*Hayward*.

Concocter, *n.* A person who concocts or devises.

Concoction, *n.* [Lat. *concoctio*.] Digestion or solution of food in the stomach.—Maturation; act of ripening or bringing to maturity.

"From crudity to perfect concoction."—*Bacon*.

—Act or process of devising or preparing anything; as, the concoction of a plot.

Concoctive, *a.* Digestive; having the power of digesting or maturing.

Concom'itance, Concom'itancy, *n.* [Fr. *concomitance*; L. Lat. *concomitantia*—*con*, and *comitor*, *comitans*.] State of being concomitant; accompaniment; a going or being together, or in connection with another thing.

"To argue from a concomitancy to a causality, is not infallibly conclusive."—*Glanville*.

Concom'itant, *a.* [Fr., from Lat. *con*, and *comitans*, *comitor*, to accompany, from *comes*, one who goes with another.] Accompanying; conjoined with; concurrent; attending.

(*Math.*) A term of modern algebra, applied to a quantity which is related to a given system of quantities.

Concom'itant, *n.* That which accompanies, or goes and comes with; that which is conjoined with, or collaterally connected with; a companion; a person or thing that accompanies another, or is collaterally connected.

"And for tobacco, who could bear it?"

Filthy concomitant of claret."—*Prior*.

Concom'itantly, *adv.* In company with others; bearing relation to another.

Concord, *n.* [Fr. *concorde*; Lat. *concordia*, from *concor*—*con*, and *cor*, *cordis*, the heart.] Union in feelings, sentiments, opinions, &c.; agreement; harmony; peace; unity; state of mutual good-will; harmony between persons or things.

"Till heart with heart in concord beats."—*Wordsworth*.

—Compact; treaty; agreement by stipulation.

"It appeareth by the concord made between Henry and Roderick the Irish king."—*Davies*.

(*Gram.*) Agreement of words in construction.

(*Mus.*) The union of one or more musical sounds, which, by harmonizing and agreeing together, produce an agreeable effect upon the ear. When any two single sounds bear so much relation to one another that, on being sounded together, they make a compound sound, that relation is called *concord*. Concords are of two kinds,—perfect and imperfect. Perfect concords consist of the fifth and eighth, and imperfect concords of the third and sixth. These last have another distinction,—that of the greater and lesser third and sixth. Concords are again divided into consonant and dissonant. The consonant concords are the *perfect concords* and their derivatives; every other is dissonant. This term is also often applied to voices or instruments, with respect to their tuning; as, for instance, we say, "That instrument is not in concord," or "not in tune;" "Those voices do not harmonize and agree."

Con'cord, in *Alabama*, a post-office of Lawrence co.

Con'cord, in *Delaware*, a post-village of Sussex co., abt. 46 m. S. of Dover.

Con'cord, in *Georgia*, a village of Baker co., about 28 m. W. of Albany.

Con'cord, in *Illinois*, a twp. of Adams co.—A twp. of Bureau co.—A twp. of Iroquois co.—A vill. of Iroquois co., on the Iroquois River, abt. 11 m. E. by N. of Middleport.—A twp. of Morgan co., 50 m. W. of Springfield.

Con'cord, in *Indiana*, a twp. of De Kalb co.—A twp. of Elkhart co.—A post-vill. of Tippecanoe co., abt. 11 m. S.E. of Lafayette.

Con'cord, in *Iowa*, a twp. of Dubuque co.—A vill. and twp. of Louisa co., on Iowa River, 18 m. S.W. of Muscatine.

Con'cord, in *Kentucky*, a post-village and twp. of Lewis co., on the Ohio River, 6 m. above Maysville.

Con'cord, in *Maine*, a post-village and township of Somerset co., about 50 m. N. by W. of Augusta.

Con'cord, in *Massachusetts*, a twp. of Middlesex co., on Concord River, 20 m. N.W. of Boston. *Manuf.* Cotton and woollen flannels, black-lead pencils, carriages, &c. Here, on April 19, 1775, the day of the battle of Lexington, was shed perhaps the first blood in defence of American independence. A granite obelisk, 28 feet high, was erected in 1835, on the spot where it is said that the first British soldiers fell.

Concord School of Philosophy was established at Concord, Mass., abt. 1878. Sessions held during summer. Emerson, Bronson Alcott, Thoreau, Bartol, Harris, and others well known, became prominent

participants. The object was to foster metaphysical thought. No scheme of theology was put forth, but there was a tendency toward a broad Christian theism, and to penetrate through conventional forms to something beyond.

Con'cord, in *Michigan*, a post-office of Concord township, Jackson co., on the Kalamazoo river, about 90 m. W. of Detroit.—A township of Jackson co.

Concord, in *Minnesota*, a township of Dodge co., on a branch of the Zumbro river, about 22 m. W.N.W. of Rochester.

Concord, in *Mississippi*, a village of Calhoun co.

Concord, in *Missouri*, a post-village of Callaway co., about 33 m. N. N. E. of Jefferson City.

Concord, in *Nebraska*, a village of Cedar co., on the Missouri river, about 44 m. W. N.W. of Dakota.

Concord, in *N. Carolina*, a manuf. city, the capital of Cabarrus co., on an affluent of the Rocky river, about 145 m. W. by S. of Raleigh. Pop. (1897) about 5,000.

Concord, in *New Hampshire*, a city, seat of justice of Merrimac co. and cap. of the State. It is situated on the right bank of the Merrimac river, 59 m. N.N.W. of Boston. The town consists chiefly of two streets, extending for above 2 m. along the river which is here crossed by several bridges. It contains the State House, a handsome building, and the State prison. It is the center of a considerable trade. Pop. (1890) 17,004.

Concord, in *New York*, a thriving township of Erie county.

Concord, in *Ohio*, a thriving township of Delaware county.

—A township of Champaign co.

—A village of Clarke co., about 8 m. S.S.E. of Springfield.

—A township of Fayette co.

—A township of Highland co.

—A post-township of Lake co.

—A village of Licking co., about 27 m. N.E. of Columbus.

—A township of Miami co.

—A village of Muskingum co., about 14 miles E. by N. of Zanesville.

—A township of Ross co.

Concord, in *Pennsylvania*, a township of Butler county.

—A post-township of Delaware co., 22 miles W. by S. of Philadelphia.

—A township of Erie co.

—A village of Erie co., about 6 m. W.S.W. of Corry.

—A post-township of Franklin co., in Path Valley, 28 m. N. of Chambersburg.

—A village of Lancaster co.

Concord, in *Tennessee*, a post-village of Knox co., near the Tennessee River, about 13 m. W.S.W. of Knoxville.

—A post-village of Lincoln co., about 50 m. S. by E. of Nashville.

Concord, in *Texas*, a post-office of Leon co.

Concord, in *Vermont*, a post-village and township of Essex co., on the Connecticut River, 40 m. E. by N. of Montpelier.

Concord, in *Wisconsin*, a post-village and township of Jefferson co., abt. 44 m. E. of Madison.

Concordable, *a.* [Lat. *concordabilis*.] Susceptible of concord; harmonious; disposed to agreement.

Concordably, *adv.* With concord or agreement.

Concordance, *n.* [Fr., from L. Lat. *concordantia*, from *concorde*, to harmonize, to agree mutually. See CONCORD.] State or quality of being accordant; agreement; accordance.

(*Lit.*) A dictionary or index of principal words in a Bible or other book, with the chapter and verse in which each occurs. The importance of this class of works was early appreciated, and a vast deal of labor has been expended in compiling them. Concordances have been made of the Greek Septuagint, the Greek Testament, the Latin Vulgate and the English Old and New Testaments; a full list of which will be found in Watt's *Bibliotheca Britannica* and in Orme's *Biblio. Biblica*. The first concordance was compiled by Hugues de St. Cher, who died in 1262. The best Bible C. in English is that of Cruden, which appeared in 1757, and still maintains its ground as an authority.—A Shakespeare Concordance, by Mary Cowden Clarke, is the only important work of its character in existence.

Concordant, *a.* [Lat. *concordans*, from *concorde*; Fr. *concordant*.] Agreeing together; united; agreeable; harmonious; correspondent; consonant; as, *concordant* points of argument.

—*n.* Concordance, that which is apposite or harmonious.

Concordantly, *adv.* In conjunction; in an accordant manner.

Concordat, *n.* (*Eccles. Hist.*) Any covenant, compact, or agreement entered into. An agreement or convention upon ecclesiastical matters made between the Pope and some temporal sovereign, as that between Pius VII. and Napoleon I. in 1802, by which the Roman Catholic religion was re-established in France; on which occasion the Pope recognized the new division of France into sixty sees, instead of the much greater number which had existed before the revolution; the payment of the clergy from the national revenues, and the appointment of the bishops by the civil authority. Originally the term was applied to agreements regulating mutual rights between bishops, abbots, priors, &c. Many of the German powers possess concordats with the see of Rome; but the most celebrated is that of August 18, 1855, between Austria and the Pope. By it the papal power was widely extended over all the Austrian dominions, and greater privileges conceded to it than had ever before been granted by any German sovereign. By it not only has the Church sole power in ecclesiastical matters, independent of the State, but all institutions for educational purposes are under its control; and

it has the power of preventing the dissemination of works of a dangerous character. The execution of this C. gave rise to so many difficulties, that the Emperor of Austria abrogated it without asking the consent of the Pope, in 1870.

Con'cord, in *Vermont*, a village and township of Essex county, about 38 m. W. by N. of Montpelier. It has important manufactures, and carries on a large business.

Concordia, in *Kentucky*, a village of Meade co., on the Ohio River, about 110 m. W. by S. of Frankfort.

Concordia, in *Louisiana*, a N.E. parish on the W. bank of the Mississippi River. Area, about 790 m. It is bounded on the W. and S.W. by the Washita and Red rivers. The surface is low and frequently inundated. Cap. Vidalia.

Concordia, in *Missouri*, a post-office of La Fayette co.

Concordia, in *Ohio*, a village of Darke co., about 38 m. N.W. of Dayton.

Concordia, in *Tennessee*, a township of Fayette co., abt. 170 m. S.W. of Nashville.

Concor'dia, (*Myth.*) The Roman goddess of Peace. The dictator Camillus first raised a temple to her. She was generally represented as a matron holding in her right hand an olive-branch, and in her left hand a cornucopia. Her symbols were 2 hands clasped together, and 2 serpents entwined about a wand.

Concordia Village, in *Louisiana*. See VIDALIA.

Concordist, *n.* One who compiles a concordance.

Con'cord River, in *Massachusetts*, is formed by the junction of the Assabet and Sudbury rivers, and traverses Middlesex co. in a N.E., then by a N. course to the Merrimac River, which it enters at Lowell.

Concord Station, in *Pennsylvania*, a post-office of Erie co.

Con'cordville, in *Pennsylvania*, a post-village of Delaware co., about 83 m. E.S.E. of Harrisburg.

Concorporate, *v. i.* To unite into one body. (R.)

"Thus we chastise the god of wine . . .

Until the cooler nymph abate

His wrath, and so incorporate."—*Cleveland*.

Concorporation, *n.* Union in one mass; close admixture. (R.)

Con'course, *n.* [Fr. *concours*; Lat. *concursum*—*con*, and *curro*, *cursum*, to run.] A moving, flowing, or running together; confluence.

"With such a concourse comes the flood of ill."—*Dryden*.

—A meeting; an assembly of persons; an assemblage of things; as, a *concourse* of people.

"The noise and busy concourse of the mart."—*Dryden*.

Concreate, *v. a.* [From Lat. *con*, and *creare*, to create.] To create at one and the same time.

"God did concreate grace with Adam."—*Bp. Taylor*.

Concrement, *n.* [Lat. *concrementum*. See CONCRETE.] A mass formed by concretion; a collection of spontaneous growth; as, the "concrement on a pebble of flint."

Hall.

Concre'scence, *n.* [Lat. *concre'scentia*—*con*, and *cresco*, to grow.] Growth or increase; act of growing by spontaneous union, or the coalescence of separate particles.

Concre'scible, *a.* Capable of congelation or concretion.

Concre'scive, *a.* Growing spontaneously together, or into union.

Concrete, *a.* [Lat. *concretus*, from *concre'sco*.] United together; composed of particles or parts united in one mass; congealed; coagulated; as, a *concrete* mass or matter.

(*Logic.*) A term is so called when the notion of an attribute is regarded in conjunction with the object that furnished the notion; as *foolish*, or *fool*. When the attribute is regarded in itself, it is called an *abstract term*; as *folly*.

—*n.* A mass formed by concretion; a compound.

(*Masonry.*) A hard mass formed by mixing lime, sand, pebbles, &c., together,—used for the foundation of buildings, &c.

Concrete, *v. n.* To grow together; to unite or coalesce, as separate particles, into a mass or solid body, chiefly by spontaneous cohesion, or other natural process.

—*v. a.* To form into a mass by the cohesion or coalescence of separate particles.

Concrete'ly, *adv.* In a concrete manner.

Concrete'ness, *n.* State of being concrete; coagulation.

Concre'tion, *n.* Act or process of concreting; state of being concreted.—A mass concreted; a clot; a lump.

(*Med.*) A calculus or solid substance formed within the body. See CALCULUS.

Concre'tionary, *a.* Pertaining to, made up of, or producing concretions.

Concre'tive, *a.* Cansing to concrete; having power to produce concretion; tending to form a solid mass from separate particles.

Concre'tively, *adv.* In a concrete manner.

Concu'binacy, *n.* The practice of concubinage; fornication.

Concu'binage, *n.* [Fr. See CONCUBINE.] The state or practice of living together as husband and wife without being married.

(*Hist.*) In early times this was a common practice; and men of means had frequently, besides several wives, a number of concubines, as we read of in the Old Testament. The latter did not enjoy the same rights as a wife, and could be repudiated and dismissed at any time. Both among the Greeks and Romans concubinage was allowed; but it was not legally sanctioned among the latter until the time of Augustus. By the Lex

Julia and the Lex Papia Poppæa concubinage was legally permitted to unmarried men; but not more than one concubine was allowed, and she must be a person of mean descent—an actress or the like. The children were not considered as legitimate, but were called *natural*, and the right of inheritance was very much limited. With the introduction of Christianity, concubinage ceased, and Constantine the Great made laws against it. In all Christian countries it is now considered unlawful; yet there exists in Germany a peculiar kind of institution under the name of half-marriage, or left-hand marriage, in allusion to the manner of its being contracted, the man giving the woman his left hand instead of his right. It is a real marriage so far as the parties are bound to each other for life; but the woman cannot bear the husband's name or title, neither can her children succeed to his property. The common law of Germany permits to princes and the nobility this kind of marriage, also called *morganatic* marriage.

Concubinal, *a.* Pertaining to concubinage.

Concubinary, *a.* Relating to concubinage.

—*n.* One who practises concubinage.

Concubine, *n.* [Fr.; Lat. *concubina*, from *concubo*—*con*, and *cubo*, *cubitus*, to lie.] A woman who cohabits with a man, but who is not his wife; a mistress.

Concupiscence, *n.* [Fr., from Lat. *concupiscentia*, from *concupisco*—*con*, and *cupio*, to desire.] An eager desire or longing for; unlawful or irregular desire of sexual pleasure; inclination for unlawful enjoyments.

Concupiscent, *a.* [Fr.] Libidinous; lecherous.

Concur, *v. n.* [Lat. *concurro*—*con*, and *curro*, to run; Fr. *concourir*.] To run together; to meet in the same point; to join or unite, as in an action or opinion; to agree; to unite; to combine; to coincide; to acquiesce; to assent to.

Concurrence, **Concurrence**, *n.* [Fr. *concurrency*.] Act or state of concurring; a meeting or coming together; union; conjunction; agreement; combination.

(*French Law*.) The equality of rights, or privilege which several persons have over the same thing.

Concurrent, *a.* [Lat. *concurrents*.] Concurring; meeting; uniting; acting in conjunction; agreeing in the same act; accompanying; conjoined; associated; coincident; united.

—*n.* That which concurs; joint or contributory cause.

"All affairs of importance there are three necessary concurrents . . . time, industry, and faculties."—*Decay of Piety*.

Concurrently, *adv.* With concurrence; unitedly.

Concurrentness, *n.* State of being concurrent.

Concurring, *p. a.* Running or acting together; uniting in action; consenting; agreeing; meeting in the same point.

Concussion, *n.* [Fr., from Lat. *concussio*, from *concutio*, *concussus*—*con*, and *cutio*, to shake.] Act of shaking violently by the stroke or impulse of another body; state of being shaken; a shock; agitation.

(*Med.*) A violent commotion or shock communicated to the brain, or the whole nervous system, by collision of the body with some external object. It is one of the most serious accidents to which the head is subject. The causes of *C.* are very numerous; a slight accident, such as the slipping off a step, may produce it as effectually as the violent collision of two railway trains. It may also be induced by a blow, a fall, or anything that violently shakes the body. The symptoms differ with the violence of the cause, and are in proportion to it. Usually all sense and power of motion are instantly suspended, the pulse is reduced to a thread, the breathing is imperceptible, the pupils dilated, and the body cold.—All cases of complete *C.* are divided into three stages:—In the 1st, there is total insensibility, the patient cannot feel the pinching of his skin, or hear the loudest noises, though made at his ear; the pulse intermits, and the extremities become cold. In the 2d stage, the pulse is a little more regular, the breathing more evident, a slight degree of warmth is diffused over the body, the skin becomes slightly sensible to pain, and the patient can hear, but is inattentive to sounds unless bawled into the ear, when he will reply for an instant if the question concerns his sufferings; if not, he answers incoherently. The 3d stage is indicated by the passing off of much of the stupor and insensibility, and the setting in of the inflammatory stage, always the most critical of the three. Vomiting generally succeeds a *C.* of the brain, and the contents both of the bowels and bladder are at different periods passed unconsciously. In some cases, the patient, after a few hours' insensibility, recovers entire consciousness, the body being restored to complete health without one adverse circumstance; in others, the coma and insensibility endure for a dozen or fourteen days, and the patient is ever after affected with a partial or complete loss of memory, or an irritability of stomach that defies all ordinary treatment.—As any interference with the patient while in the first, or insensible stage, would be highly dangerous, he must be left till reaction sets in, and nature begins to reassert her empire, by the freer breathing, increased warmth, and returning consciousness. To expedite this certain effort of nature, it was formerly the custom to give stimulants, or, rather, force them down the passive throat; but as this was generally found to increase the danger of the third stage, it has very properly been discontinued, and bottles of water, or hot bricks, applied to the feet and body of the patient, is now all, except in rare cases, that is done till the inflammatory period sets in, when bleeding both from the system and the head, cold applications to the scalp, hot bricks to the feet, a low and unexciting diet, with a dark room, absolute repose, and solitude, become the sole means and remedies by which we have any chance of restoring the patient

to his former health.—Though bleeding is the chief agent on which the medical man depends for the recovery of his patient, the greatest judgment is necessary in knowing when, and how much blood to take away; for, should he bleed before reaction has set in, and some amount of consciousness is restored, he is morally certain to extinguish the life of his patient.

(*Civil Law*.) The unlawful forcing of another by threats, or by the abuse of office or rank, to yield up something of value.

Concussive, *a.* Having the power or quality of shaking; agitating.

Concussy, *a.* (*Com.*) Applied, in the timber trade, to the knots which are at the roots of limbs that have decayed, and are destitute of bark; in consequence of which the rottenness extends to the trunk, and into the heart of the tree. (*Local U. S.*)

Condé, (*kou-dai*), a town of France, dep. Nord, at the confluence of the Hague with the Escaut (Scheldt), 25 m. S.E. of Lille. The town is strongly fortified by works constructed by Vanban. Pop. 6,238.

Condé, in Brazil, a town and sea-port at the mouth of the Inhambique, prov. Bahia; pop. 2,500.

—A town in prov. Parahiba, between the Japoquinha and Japoca rivers; pop. 1,000.

—A town in prov. Para, on the Tocantine River.

Condé, the name of a French family, the younger branch of the Bonbons, who took their name from the town of Condé, dep. Nord. One Godfrey de C., about the year 1200, was in possession of a part of the barony of Condé. His great-granddaughter, Jeanne de C., married in 1335, Jacques de Bourbon, Comte de la Marche, and the barony of C. went to their second son, Louis de Bourbon, Comte de Vendôme, whose great-grandson, Louis de Bourbon, Prince of C., in virtue of his blood-relationship to the royal family, assumed the title of prince, and is regarded as the founder of the new house of this name. Its more celebrated members in history are the following:

C., LOUIS I. DE BOURBON, PRINCE DE, son of Charles, duke de Vendôme, was born in 1530. He married the grand-niece of the Constable de Montmorency. He served his early campaigns in Piedmont, but first distinguished himself at the defence of Metz, besieged by Charles V. in 1552. Affronted at court, and hated by the Guises, he joined his brother, the King of Navarre, at Nérac, and became a Protestant. In 1560 he was arrested and sentenced to death, but was discharged after the death of Francis I. He soon after appeared as head of the Protestants, and was defeated and captured at the battle of Dreux. He was again wronged and insulted by the refusal of the office of lieutenant-general of the kingdom, to which he was entitled. In 1567 he fought the battle of St. Denis without decisive result. Two years later the Protestants were defeated, and Condé was slain at Jarnac.

C., HENRI II., PRINCE DE, who at the request of Henry IV. became a Catholic, was born in 1588. In 1616 he was sent to the Bastille, where he remained for three years. After the death of Louis XIII. the prince was liberated, and was made minister of state to the regent. D. 1646.

C., LOUIS II. DE BOURBON, PRINCE DE, called THE GREAT, was son of the preceding; B. at Paris, 1621. He married a niece of Cardinal Richelieu, and was at first known as the Duc d'Enghien. His first great achievement was the victory over the Spanish army at Rocroi, in 1643. The capture of Thionville soon followed. The following year was marked by the battle of Freiburg, which lasted three days, and the great victory over the Imperialists at Nordlingen. After taking Dunkirk, in 1646, Condé was, through envy, sent into Catalonia, where, with inferior troops, success forsook him. It was necessary soon to recall him to Flanders, where he won the victory of Lens over the archduke Leopold, in 1648. Having offended the first minister, Cardinal Mazarin, he was imprisoned for more than a year, and after his liberation he led the army of the *Fronde*, began the siege of Paris, and encountered Turenne and the royalists in the Faubourg St. Antoine. Soon after he entered the service of Spain, and contended with varying success against his countrymen in Flanders. After the Peace of the Pyrénées he returned to Paris, and was employed in the conquest of Franche Comté. In the war with Holland, in 1672, he was wounded at the passage of the Rhine, the only time he received a wound. His last great exploit was the victory over William, Prince of Orange (William III.), at Senef, in 1674. A martyr to the gout, he retired in the following year to his charming seat at Chantilly, enjoying there the society of some of the most eminent men of letters, among them Racine, Boileau, and Molière. D. 1686. Bossuet delivered his funeral oration, which is considered a masterpiece of eloquence.

C., LOUIS JOSEPH, PRINCE DE, B. at Paris, 1736, was brought up by his uncle, the Count of Charolais, served in the Seven Years' War, and distinguished himself at the battles of Hastenbeck, Minden, and Jannisberg. He became the associate of the Dauphin, and occupied himself with literary and scientific pursuits. After the fall of the Bastille he emigrated, watching every opportunity for assisting the partisans of the monarchy. The murder of his young grandson, the Duc d'Enghien, by Napoleon, affected him profoundly. At the Restoration, he returned with Louis XVIII. to France, lived again at Chantilly, and was the author of an *Essai sur la vie du grand Condé*. D. 1818.—The great family of Condé became miserably extinct, Aug. 27, 1830, in the person of the Duc de BOURBON, LOUIS HENRI JOSEPH, q. v.

Condemn, *v. a.* [Lat. *condemno*—*con*, and *damno*, to doom; Fr. *condamner*; It. *condannare*.] To declare or pronounce to be utterly wrong or guilty.—To censure;

to blame; to reprehend; to reprove; to reprobate; to disallow; to disapprove; to reject.—To declare to be forfeited.—To doom or adjudge to punishment or penalty; to sentence.

(*Mar. Law*.) To declare a vessel a prize. To declare a vessel unfit for the service.

Condemnable, *a.* That may be condemned; blamable; culpable.

Condemnation, *n.* [Lat. *condemnatio*; Fr. *condamnation*.] Act of condemning; state of being condemned. Sentence of punishment.—Blame; censure; cause of blame.

(*Civil Law*.) A sentence or judgment which condemns some one to do, to give, or to pay something, or that declares that his claims are unfounded.

(*Mar. Law*.) The sentence of a competent tribunal which declares a ship unfit for service.—The sentence or judgment of a court of competent jurisdiction that ship or vessel taken as a prize on the high seas was liable to capture, and was properly and legally captured and held as prize.

Condemnatory, *a.* Condemning; bearing condemnation or censure.

Condemnedly, *adv.* In a manner to be condemned.

Condemner, *n.* One who condemns or censures; censurer.

Condensability, *n.* [Fr. *condensabilité*.] That able to be condensed.

Condensable, *a.* Capable of being condensed.

Condensate, *v. a.* [Lat. *condenso*.] To condense; thicken. (*R.*)

Condensation, *a.* [Fr., from L. Lat. *condensatio* from *condenso*, *condensatus*.] The rendering of a body more compact, denser, or of more specific gravity, causing its particles to come into closer contact. The term is usually applied to the process of converting vapor or gas into a fluid by application of cold or pressure.

Condensative, *a.* Having the power or tendency to condense.

Condense, *v. a.* [Fr. *condenser*; Lat. *condenso*—*con*, and *denso*, to make thick or dense, from *densus*, thick, close. See DENSE.] To make very dense, close, thick, compact; to cause the particles of a body to approach or to unite more closely; to reduce into a smaller compass or bulk.—To thicken; to crowd; to compress; to contract.

—*v. n.* To become very dense, close, or compact.—To approach or unite more closely.—To grow thick.

Condenser, *n.* He who, or that which, condenses.

(*Chem.*) Any apparatus used for cooling heated vapors and reducing them to a liquid form. In ordinary distillation, the worm-tub is the condenser most generally adopted. It consists of a spiral tube, which passes through a tub constantly filled with cold water. The vapor enters the tube at the top, and being condensed in its passage runs out as liquid at the bottom. The condenser of a steam-engine is that part attached to the cylinder where the steam is condensed. The pneumatic condenser or syringe worked on the same principle as the force-pump by which a large quantity of air can be forced into given space.

Condensing, *p. a.* Making very dense, close, or compact; compressing; thickening; growing dense or more dense.

Condensivity, *n.* Denseness; density. (*R.*)

Condescend, *v. n.* [Fr. *condescendre*; It. *condescendere*; Lat. *con*, and *descendo*, to descend. See DESCEND.] To descend or come down to the level of another.—To descend from the privileges of superior rank or dignity to submit or yield, as an inferior.—To descend; to stoop to yield; to submit; to deign.

"Can they think . . . my mind ever will condescend to such absurd commands?"—*Milton*.

Condescendence, *n.* [Fr. *condescendance*; It. *condescendenza*; Sp. *condescendencia*.] Voluntary submission to a state of equality with inferiors. (*R.*)

Condescending, *a.* Yielding to inferiors; courteous; obliging; kind; accommodating.

Condescendingly, *adv.* By way of yielding to inferiors; by way of kind concession; courteously.

Condescension, *n.* Act of condescending; voluntary descent from superiority; kind and courteous submission to inferiors; courtesy; complaisance.

Conde-sur-Noireau, a town of France, dep. Calvados, 28 m. S.S.W. of Caen. *Manf.* Woollen, cotton and linen articles. Pop. 6,643.

Condign, (*kon-din'*), *a.* [Lat. *condignus*—*con*, and *ignis*, worthy.] Wholly deserving or deserved; very worthy; well merited; suitable. (It is only used of something deserved by crimes.)

"Unless it were a bloody murderer, I never gave them condign punishment."—*Shaks.*

Condignly, *adv.* According to merit.

Condillac, ETIENNE BONNOT DE, (*kon-de'-yak*), a French philosopher, B. at Grenoble, 1715. He was early attached to metaphysical studies, and adopted the system of Locke, carrying, however, the doctrines of the Sensational School further than his master did. He was very grave manners, and lived mostly in studious retirement. Rousseau and Diderot were among his friends. He was named tutor to the young duke of Parma, grandson of Louis XV., and was admitted to the French Academy. His principal works are: *Essai sur l'Origine des Connaissances Humaines*; *Traité des Sensations*; *Cours d'Etude du Prince de Parme*. A French work titled *Condillac l'Empirisme et le Rationalisme*, by Réthoré, was published in 1865. D. 1780.

Condiment, *n.* [Fr., from Lat. *condimentum*, from *condio*, to make savory, from *condo*—*con*, and *do*, to give.] Seasoning; sauce; that which is used

give relish to meat or other food, and to gratify the taste, as salt, pepper, cinnamon, &c. Almost all the condiments are possessed of stimulant properties.

ondisciple, *n.* [Fr., from Lat. *condiscipulus*—*con*, with, and *discipulus*, a disciple.] A school-fellow; a fellow-disciple.

on'dit, *n.* *Ohio*, a post-office of Delaware co.

ondit, *n.* *Oregon*, a post-village of Marion co., 12 m. S.E. of Salem.

ondite', *v. a.* [Lat. *condio*; It. *condire*.] To pickle, to preserve. (R.)

ondition, (*kon-dish'un*), *n.* [Lat. *conditio*, from *condo*, to put or place together—*con*, and *do*, datum, to give.] A putting or setting together; state in which things are put together or fixed.—State; quality; attribute; property.—A particular mode of being; external circumstances.—Situation; position; station; rank; case; predicament.—Temper; temperament.

(*Civil Law*.) A restraint annexed to a thing, so that by the non-performance the party to it shall receive prejudice and loss; and by the performance, commodity and advantage; or it is a restriction of an act, qualifying or suspending it, and making it uncertain whether it shall take effect or not; also, it is defined to be what is referred to an uncertain chance which may happen or not happen. There are conditions of divers kinds; viz., *conditions in deed* and *in law*, *conditions precedent* and *subsequent*, *conditions inherent* and *collateral*, &c. for which consult Washburn, *On Real Property*; Parsons, *On Contracts*.

ondition', v. n. To make terms; to stipulate; to bargain.

ondition', a. Containing or depending on a condition, or conditions; made with limitations; not absolute; made or granted on certain terms.

(*Logic and Gram.*) A *conditional proposition* is one which asserts the dependence of one categorical proposition on another; e. g. "If the wind changes, it will rain." The proposition from which the other results is termed the *antecedent*; the resulting proposition, the *consequent*. A *conditional syllogism* is one in which the reasoning depends on a conditional proposition. It is of two sorts, *constructive* and *destructive*; as, 1. If A=B, then C=D; but A=B, therefore C=D. 2. If A=B, then C=D; but C is not equal to D, therefore A is not equal to B. The connection between the antecedent and consequent of a conditional proposition is termed the *consequence*.

onditionally, adv. With certain limitations; on particular terms or stipulations; not absolutely or positively.

onditionate, v. a. To make conditional.

onditioned, a. Having a certain condition, state, or quality.

"The dearest friend to me, the kindest man,
The best condition'd."—*Shaks.*

onditioned, pp. Containing a condition or conditions; stipulated; containing terms to be performed.

* Having a certain condition, state, or quality.

onditioning, ppr. Making terms or conditions.

ondolatory, a. Expressing condolence.

ondole', v. n. [Lat. *condoleo*—*con*, and *doleo*, to grieve.] To grieve or lament with another or others; to feel pain, to grieve, at the distress or misfortunes of another; to sympathize. (Followed by *with*.)

ondolument, n. Act of condoling; condolence; sympathetic grief.

ondolence, n. Act of condoling; grief felt or expressed for the sorrows of another; sympathy; commiseration.

ondoler, n. One who condole.

ondoling, n. Expression of condolence; condolence.

ondom, a town of France, dep. Gers, on a height, the top of which is washed by the Baise, 23 m. N.W. by N. of Auch. It has a brisk trade in corn, wines, and brauery. It was formerly the seat of a bishopric, once filled by Bossuet. Pop. 8,140.

ondonation, n. [Lat. *condonatio*.] The act of pardoning; forgiveness.—It is chiefly applied, as a legal term, to the conditional forgiveness or remission, by a husband or wife, of a matrimonial offence which the other has committed, as adultery.

ndone', v. a. [Lat. *condono*.] To pardon; to forgive. (R.)

"The public will gladly condone his earlier errors."—*Qu. Rev.*

ndor, n. [Sp.] (*Zool.*) The largest of known birds, belonging to the gen. *Vulture*, and found in the highest and most inaccessible parts of the Andes. It is generally 4 ft. long, and has a spread of wing of 9 ft.; but it is said that in some cases the spread is 14 ft. Their habits are almost invariably on overhanging ledges of high and perpendicular cliffs, where they both sleep and feed, sometimes in pairs, but frequently in colonies of 10 or 30 together. They make no nest, but lay 2 large white eggs on the bare rock. The young ones cannot see their wings for flight until many months after they are hatched; being covered, during that time, with only blackish down, like that of a gosling. They remain on the cliff, where they were hatched, long after having acquired the full power of flight, roosting and hunting in company with the parent birds. Their food consists of carcasses of guanacos, deer, cattle, and other animals. The condors may often be seen at a great height, soaring over a certain spot in the most graceful spires and circles. Besides feeding on carrion, they will frequently attack young goats and lambs; hence the shepherd-dogs are trained, the moment the enemy passes over, to run out, and looking up, to bark violently. The people of hill destroy and catch great numbers. Two methods are used: one is to place a carcass within an enclosure of sticks, on a level piece of ground; and when the con-

dors are gorged, to gallop up on horseback to the entrance, and thus enclose them; for when this bird has not space to run, it cannot give its body sufficient momentum to rise from the ground. The second method is to mark the trees in which, frequently to the number of five or six together, they roost, and then at night to climb up and noose them. They are such heavy sleepers, that this is by no means a difficult task. The C. like all the vulture tribe, discovers his food at a great distance; the body of an animal is frequently surrounded by a dozen of them, almost as soon as it has dropped

Fig. 661. — CONDOR.

dead, although, five minutes before, there was not a single bird in view. Whether this power is to be attributed to the keenness of his olfactory or his visual organs, is a matter still in dispute; although it is believed, from a minute observation of its habits in confinement, to be rather owing to its quickness of sight.

Condorcet, MARIE JEAN ANTOINE NICOLAS DE CARITAT, MARQUIS DE, (*kon-dor'sai*), a French mathematician and philosopher, b. at Ribemont, Picardy, 1743, was educated at the college of Navarre. When only 22 years of age he distinguished himself among mathematicians by the publication of his work *Du Calcul Intégral*. Two years afterwards he published the treatise *Du Problème des Trois Corps*, and the following year his *Essai d'Analyse*. In 1769 he was chosen member of the Academy, and in 1773 became its secretary, in which situation he distinguished himself by the elegance of his *Eloges*. In 1791, he became a member of the National Assembly, and of the Jacobin Club; and he soon became as noted for his political violence as he had already been eminent for his scientific genius. When proscribed by Robespierre, he voluntarily left the house of the friend who had received him, and wandered about for some time in the country. He was at last recognized, arrested, and thrown into prison, where, on the third morning, (March 28th,) he was found dead, if from hunger and privation or from self-administered poison, is unknown. As a philosopher and social reformer, C. was a devoted follower of Voltaire. He expounded his own views on the brilliant *Equisse Historique de l'Esprit Humain*. D. 1794.

Condottieri, n. pl. [It., leaders.] (*It. Hist.*) A class of mercenary adventurers in the 14th and 15th centuries, who commanded military bands, amounting to armies, on their own account, and sold their services for temporary engagements to sovereign princes and states. The bands under command of the C. were well armed and equipped. Their leaders had in many instances considerable military skill; but, as they took no interest in national contests, except to receive pecuniary advantages, the wars between them became a sort of bloodless contests, in which the only object of each party was to take as many prisoners as possible for the sake of the ransom. This singular system of warfare was only put an end to by the more serious military operations of the French, who invaded Italy under Charles VIII. Although many C. acquired much honor as well as emolument, one only attained to high rank and independent power: this was Francesco Sforza, originally a peasant, who in 1451 made himself duke of Milan, and transmitted that sovereignty to his descendants.

Conduce', v. n. [Lat. *conduco*—*con*, and *duco*, to lead; Fr. *conduire*.] To draw, to bring, or lead together; to lead or direct to the same end or purpose; to tend to some end or object; to contribute; to promote; to subserve. (Often followed by *to*.)

"He was sent to conduce thither the princess."—*Wotton*.

Conducibility, n. Quality of being conductible. (R.)

Conducible, a. [Lat. *conducibilis*.] Having the power of conducting; leading or tending to; promoting; conducive.

Conducibleness, n. Quality of being conducive; conductivity. (R.)

Condu'cive, a. That may conduce or contribute; having a tendency to promote.

"An action conducive to the good of our country."—*Addison*.

Conduciveness, n. The quality of being conducive; conducibleness.

Con'duct, n. [Lat. *conductus*, from *conduco*—*con*, and *duco*, ductum, to lead; Fr. *conduite*; Sp. *conducta*.] Act of leading; guidance; command.—Guidance of one's

self; personal behavior; carriage; deportment; manner of life; demeanor.—Management; administration.—Convey; escort; as, a letter of safe-conduct.

Conduct', v. a. [Lat. *conduco, conductus*; Fr. *conduire*.] To accompany as a leader or guide.—To lead, bring along, or guide, as a general.—To guard on the way; to escort.—To manage; to direct; to regulate; to govern; to command.—To behave.—To convey; to afford a passage to.

Conductibility, n. Quality of being conductible.

Conductible, a. That may be conducted or conveyed.

Conduct'ing, p. a. Leading; escorting; commanding; behaving; managing; transmitting; conveying.

Conduction, n. [Lat. *conductio*.] (*Phys.*) Transmission by a conductor; property by which certain bodies transmit heat or electricity through their substance.

Conduc'tive, a. (*Elect.*) That conducts; non-electric, and conducting electricity.

Conductivity, n. The quality of being conductive.

Conduct'or, n. One who conducts; a leader; a guide; a chief; a commander; a director; a manager; an overseer.—One who has charge of a public travelling carriage, as a car, or train of cars, on a railroad or trolley line.—Something that conducts or guides; as a lightning-conductor.

(*Mus.*) The person placed at the head of a band of musicians to lead the performance and beat the time. In Germany, the term *Dirigent* is used, which is more expressive. The French name is chief of the orchestra (*Chef d'Orchestre*).

(*Elect.*) *C.* and *non-C.* of electricity are terms applied to substances according to whether they receive and communicate electricity, or not. When a rod of metal is made to touch the prime C. of an electric machine after it has been charged, all the electricity passes through the rod, and through the body of the experimenter into the ground. The metal in this case is said to be a *conductor*. If, however, a rod composed of glass or shell-lac is used, the electricity will not be carried off. In this case the glass or shell-lac is said to be a *non-conductor*. All substances conduct electricity in the same manner from metals to lac and gases, but in different degrees; and the term *non-conductor* only signifies that the substance has a very low power of conducting. In frictional electricity, the best conductors are the metals; after which come graphite, seawater, spring-water, and rain-water. Ice is a worse C. than fluid water. Alcohol, ether, paper, dry wood, and straw are also inferior conductors. Among the substances reckoned as non-conductors are shell-lac, amber, resin, sulphur, glass, silk, wool, hair, feathers, &c. In galvanic electricity the substances that are found to conduct frictional electricity in a feeble manner are almost, if not altogether, non-conductors; and the metals which are nearly alike in conveying frictional electricity differ widely in their powers of conveying that obtained from the galvanic battery. When heated, the conducting power of metals is weakened; but in nearly all other substances the effect of heat is to increase the power of conduction. Shell-lac, wax, amber, and sulphur become conductors when fused; and glass conducts readily at a red heat. A C. is said to be *insulated* when it rests upon non-conducting supports. In electrical apparatus glass is the non-conductor most employed. It requires to be kept very dry, as any moisture on its surface weakens its insulating power. The discovery of the identity of lightning and electricity has not been without its practical results; amongst which may be reckoned the application of *lightning-conductors* to buildings and ships. For buildings, Franklin's original proposition is that generally adopted. It consists in erecting a continuous metallic rod by the side of any building. The rod is pointed at each end, and extended above the highest part of the place to be protected at one extremity, the other penetrating deep into the earth, or in contact with water. The highest point of the rod is generally made of copper, which does not rust. Iron points are very liable to acquire a coating of rust, which is a non-conductor, and diminishes their efficacy.

Conduc'tress, n. A female who leads or directs; a directress.

Conduit, (kon'dit), n. [Fr. *conduit*; Lat. *conduco, conductus*—*con*, and *duco*, to lead.] That which leads or conducts.—A channel or pipe to convey water, &c., or to drain off filth.

(*Arch.*) An internal or subterranean passage for secret communication between apartments.

Condu'plicate, a. (*B t.*) Bombed or folded together, as some leaves in the bud.

Condu'r'rite, n. (*Min.*) An arsenite of copper, named after the Condurrow Mine in Cornwall, England, where it was originally discovered.

Con'dyle, n. [Gr. *kondylos*, the knuckle.] (*Anat.*) The epiphysis or knuckle portion seen to protrude in some of the long bones. The most prominent of these condyles is that at the inner side of the elbow, on the bone of the arm; a blow on which produces a very benumbing sensation. It is this process that is so frequently fractured with young children, as, till 10 or 12 years of age, the condyles are seldom completely ossified, being merely attached to the bone by cartilage.

Con'dyloid, a. [Gr. *kondylos*, and *eidos*, form.] (*Anat.*) Pertaining to, or resembling, a condyle.

Condylo'ma, n. [From Gr. *kondylos*, a knot, an eminence.] (*Med.*) A soft, fleshy excrescence, of an indolent character, which appears near the orifice of the genital organs and rectum, and occasionally on the fingers and toes. It is a consequence of the syphilitic virus.

Con'dylop, Condylo'ped, a. [Gr. *kondylos*, and *pous, podos*, a foot.] (*Zool.*) A name given by Latreille

to that subdivision of encephalous articulate animals which have jointed feet. The acephalous Cirripeds are excluded from this group, which consequently includes the Myriapods, Insects, Arachnids, and Crustaceans.

Condylura, *n.* [Gr. *kondylos*, a joint, and *oura*, a tail.] (*Zoöl.*) A genus of the *Talpidae* or Mole family, native of N. America, and distinguished by the fringe of elongated caruncles encircling the end of the nose.

Cone, *n.* [Fr. *cône*; Lat. *conus*; Gr. *konos*.] (*Geom.*) A surface generated by a right line of unlimited length which moves in any manner so as always to pass through a fixed point. The right line is termed the *generator*, *side*, or *edge* of the cone, and the fixed point its *vertex*. — There are various kinds of cones, but the term is usually applied only to those having circular bases. The most common kind of circular *C.* is the *right C.*, which may be conceived as being generated by the revolution of a right-angled triangle round one of its legs. The line from the apex of a *C.* to the centre of the base is called the *axis*, and, in the right *C.* it is perpendicular to the base. In the *oblique C.* the axis is inclined to the plane of the base at an angle other than a right angle. A *truncated C.* is the lower part of a *C.* cut by a plane parallel to the base. — Four curves, called the *Conic Sections*, may be formed by cutting the right *C.* in different directions. If the *C.* be cut by a plane parallel to the base, the section is a *circle*; if the plane cut the *C.* across, making any angle other than a right angle with its axis, the section is an *ellipse*; if the cutting plane be parallel to the side of the *C.*, the section will be a *parabola*. In every other case than those stated, the section will be a *hyperbola*. (See Fig. 932.)

(*Bot.*) A collective more or less elongated fruit, com-

Fig. 662. — PITCH-PINE.
(*Pinus rigida*.)

posed of a number of indurated scales, each of which bears one or more naked seeds. The fruit is seen in the fir, larch, spruce, and many other plants of the order *Pinaceæ*, (see Fig. 662.)

Conecogue Creek, in *Pennsylvania*, rises in the S. part of Franklin co., and flowing S. through Maryland, enters the Potomac at Williamsport.

Concuh, in *Alabama*, a S. co.; *area*, abt. 1,430 sq. m. It borders on Florida, and is drained by the Sepulga and Conecuh rivers, from the latter of which it receives its name. *Surface*, broken; *soil*, poor. *Cap.* Sparta. *Pop.* (1890) 14,201.

— A small river, which rises in Pike co., and, flowing S.W. into Florida, joins the Escambia near the boundary of the two States.

Conedogwin't Creek, in *Pennsylvania*, rises in Franklin co., and, after traversing Cumberland co., enters the Susquehanna River at Harrisburg.

Conegliano, (*ko-nel-yo'no*), a town of N. Italy, 15 m. N. of Treviso; *pop.* 7,000.

Conejos, (*ko-ná'höz*), in *Colorado*, a S.W. co.; *area*, about 6,000 sq. m. The Rio Grande del Norte bounds it on the E., and it is also drained by the Rio San Juan and several of its branches. The Sierra La Plata traverses its central part.

— A post-village, *cap.* of the above co.

Conemaugh, (*kon'e-maw*), in *Pennsylvania*, a post-borough of Cambria county, about 170 miles W. of Harrisburg.

— A township of Cambria co.

— A township of Indiana co.

— A township of Somerset co.

Conemaugh River, in *Pennsylvania*, rises in Cambria co., flows W. between Indiana and Westmoreland counties, into the Loyalhanna River, near Saltsburg.

Cone of Rays, *n.* (*Optics*.) It includes all the rays which fall from a near luminous point, or from a single point of a near luminous object, upon a given surface; for example, the object-glass of a telescope; also the rays thrown by the object-glass to its focus.

Co'ne-Pale, CO'NE-PAL, *n.* (*Zoöl.*) A Brazilian name for the American skunk.

Conequenessing Creek, in *Pennsylvania*, rises in Butler co., and joins Shippery Rock Creek in Mercer co.

Conestoga, in *Pennsylvania*, a village and township of Lancaster co., on the Susquehanna River, abt. 36 m. S.E. of Harrisburg.

Conestoga Creek, in *Pennsylvania*, traverses Lancaster co., and enters the Susquehanna abt. 12 m. below Columbia.

Conesus, in *New York*, a post-village and township of Livingston co., bordering on Conesus and Hemlock lakes, abt. 10 m. S.E. of Genesee.

Conesus Lake, in *New York*, in the central part of Livingston co., 8 m. long, and abt. 1 wide.

Conesville, in *Ohio*, a village of Coshocton co., on the Muskingum River, abt. 8 m. S. by W. of Coshocton.

Conesville, in *N. York*, a post-village and township of Schoharie co., abt. 40 m. S.W. of Albany.

Conewa'go, in *Pennsylvania*, a village of York co.

Conewa'go Creek, in *Pennsylvania*, rising in Adams co., flows through York co. to the Susquehanna River below York Haven.

Conewan'go, in *New York*, a post-village and township of Cattaraugus co., about 45 m. S. by W. of Buffalo, on the Conewango Creek.

Conewango Creek, in *New York*, rises in Cattaraugus co., and enters the Alleghany river in Warren co., Pennsylvania.

Conewin'go, in *Maryland*, a village of Cecil co., near the Susquehanna river.

Co'ney Island, in *New York*, near the S.W. extremity of Long Island, about 4 m. long and 1 m. wide at its widest part. It is a highly popular summer resort for the people of New York and Brooklyn, and during the summer season presents a very lively and picturesque appearance. There are a number of large hotels, abundant bathing accommodations, concerts, driveways, and all facilities for enjoyment. It was annexed to Brooklyn in 1894, and is connected with it by two fine driving avenues, the Boulevard and the Ocean Parkway, terminating in a wide esplanade called the Concourse.

Confab, *n.* A colloquial contraction from CONFABULATION, *q. v.*

Confab'ular, *a.* That relates to talk; conversational. (*R.*)

Confab'ulate, *v. a.* [See CONFABULATION.] To talk easily or carelessly together; to chat; to prattle. (*R.*)

Confabula'tion, *n.* [Lat. *confabulatio*; from *confabulator*—*con*, and *fabulator*, *fabulatus*, to speak.] Familiar talk; easy, unrestrained conversation; chat.

Confalou, *n.* (*Ecdl.*) In the Roman Catholic Church, a member of the confraternity of the seculars PENITENTS, *q. v.*

Confeet', *v. a.* [Lat. *conficio*; Fr. *confire*.] To make up into sweetmeats; to preserve with sugar.

— *n.* A sweetmeat; a confection.

Confection, *n.* [Lat. *confectio*—*con*, and *facio*, *factum*, to make.] Anything prepared by mixing certain ingredients together; a mixture; a sweetmeat; a preserve.

Confectionary, *a.* Made in the form of a confection.

— *n.* Same as CONFECTIONER, *q. v.*

Confectionery, *n.* A place where sweetmeats and similar things are made, kept, or sold; sweetmeats in general.

Confectioner, *n.* One whose occupation is to make or sell sweetmeats, &c.

Confectionery, *a.* Relating to confections.

Confederacy, *n.* [L. Lat. *confederatio*—*con*, and *fædero*, *fæderatus*, from *fædus*, a league; Fr. *confédération*.] A league, covenant, or treaty between two or more persons, parties, or states; a contract; a compact; a combination; an alliance; a confederation.

"Judas sent them to Rome, to make a league of amity and confederacy with them."—1 Macc. viii. 17.

— The persons or States united by a league.

Southern Confederacy. See CONFEDERATE STATES.

Confed'erate, *v. a.* [Fr. *confédérer*; It. *confederarsi*; from Lat. *con*, with, and *fædero*, to establish by league.] To unite in a league; to join in a mutual contract or covenant.

— *v. n.* To unite in a league; to be allied.

Confed'erate, *a.* [Fr. *confédéré*; L. Lat. *confederatus*.] United in a league; allied by treaty; engaged in a confederacy.

— *n.* One who is united with others in a league; a person or nation engaged in a confederacy.

Confed'erated, *p. a.* United in a league or confederation; allied.

Confed'erating, *n.* Alliance.

Confederat'ion, *n.* [Fr. *confédération*.] Act of confederating; a league; a compact for mutual support; alliance, particularly of princes, nations, or states. The states united by a confederacy.

Confederation of the Rhine. (*Hist.*) A confederacy of 34 of the secondary states of Germany, formed in 1806 under the protection of Napoleon I. On the fall of the emperor of the French, these united with the other German states to constitute the Germanic Confederation.

Confederation, (*THE GERMANIC*.) See GERMANIC CONFEDERATION.

Confed'erator, *n.* One who confederates; a confederate.

Confer', *v. n.* [Lat. *confero*—*con*, and *fero*, to bear, to bring; Fr. *conférer*.] To consult together; to counsel or advise with.

"When they had commanded them to go aside out of the council, they conferred among themselves."—Acts iv. 15.

— *v. a.* To give or bestow; to grant; to present.

Conference, *n.* [Fr. *conférence*.] Act of conferring; a formal or serious discourse between two or more; oral discussion; conversation; a discoursing between two or more for the purpose of instruction, consultation, or deliberation; a meeting for consultation, discussion, or instruction, or for the adjustment of differences.

Conferen'tial, *a.* Relating to a conference. (*R.*)

Confer'able, *a.* That may be conferred.

Conferree', *n.* One who is conferred with.

Confer'rer, *n.* He that bestows; a bestower.

Confer'ring, *n.* The act of bestowing.

"The conferring of this honor upon him."—Clarendon.

Confer'ru'minate, **Confer'ru'minated**, *a.* [Lat. *confer'ru'mino*, to cement.] (*Bot.*) Noting parts so united together that they are inseparable.

Confer'va, *n.*; *pl.* CONFERVÆ. (*Bot.*) Same as CONFERVACEÆ, *q. v.*

Confer'vaceæ, *n. pl.* [Lat., from *conferveo*, to heal.] The confervas, an order of plants, alliance *Algae*. — *DIAG.* Vesicular, filamentary or membranous bodies, multiplied by zoospores generated in the interior, at the expense of their green matter. — They are water-plants.

Fig. 663. — OSCILLATORIA DISTORTA.
a, natural size; *b*, magnified.

not commonly of a green color, but occasionally olive violet, and red, inhabiting the ocean in some instances but more commonly found in fresh water. Cells solitary or many, globose, elliptical, cylindrical, or tubular sometimes variously branched; sometimes formed in slimy matter, in which they are scattered, or irregularly shaped.

Confer'void, *a.* [Lat. *conferva*, a marine plant, an Gr. *idos*, form.] (*Bot.*) Resembling a conferva.

Confess', *v. a.* [Fr. *confesser*; Lat. *confiteor*, *confessus*—*con*, and *fateor*, from *fari*, to speak, from Gr. *phaō*, to make known or evident, as by words.] To acknowledge as a crime, a fault, a charge, a debt. — To own; to admit; to grant; to recognize; to avow; to assent. — To disclose the state of the conscience to a priest. — Publicly to declare a belief in, and adherence to. — To declare to be true; not to deny. — To hear a confession, *q. v.*

— *v. n.* To make confession; to disclose.

Confess'edly, *adv.* By confession or acknowledgment; avowedly; undeniably.

Confess'er, *n.* A CONFESSOR, *q. v.*

Confession, *n.* Act of confessing; that which is confessed. — Acknowledgment of a crime or fault; open declaration of guilt, failure, debt, accusation, &c. — A vocal profession. — Disclosure of sins or faults to a priest. — A formula of articles of faith; a creed.

(*Theol.*) The verbal acknowledgment which a penitent makes of his sins to God, or to a fellow-creature. Among the Jews, it was the custom on the annual feast of expiation for the high-priest to make confession of sins to God, in the name of the whole people. Beside this general confession, the Jews were enjoined, if the sins were a breach of the first table of the law, to make confession of them to God; but violations of the second table were to be acknowledged to their brethren. Confession seems to have been early introduced into the Christian church; but at first it took place openly, and was chiefly in the case of such as had apostatized themselves or been guilty of any flagrant offence, and were desirous of being re-admitted into the Church. The practice of private or *auricular* confession seems to have gradually crept in about the 5th century; and Innocent III., in the fourth Lateran council (1215), made it obligatory on every adult person to confess his sins to a priest at least once a year. The person confessing is allowed to conceal no sin—at least no mortal sin—that he remembers to have committed, and not to have already confessed, and the father confessor is bound to perpetual secrecy. Confession obtains also in the Lutheran church but with this difference, that, while in the former case it is obligatory, it is here only recommended as a means by which a contrite sinner may obtain advice and consolation.

(*Law*.) *C.* is where a prisoner indicted of an offence and brought to the bar to be arraigned, upon the indictment being read to him, and the court demanding what he can say thereto, confesses the offence and indicts himself to be true. Confession, in civil cases, is where the defendant confesses the plaintiff's right; or, in prosecutions under penal statutes, by which confession the may be a mitigation of a fine against the penalty of statute, though not after a verdict.

Confes'sional, **Confes'sionary**, *n.* The seat where a priest or confessor sits to hear confessions.

Confes'sionalist, *n.* One who sits in the confessional; a confessor.

Confes'sor, *n.* [Fr. *confesseur*; Sp. *confesor*.] One who confesses; one who acknowledges his sins. — One who makes a profession of his faith in the Christian religion. — A priest who hears the confessions of others and has power to grant them absolution.

(*Ecdl. Hist.*) The title given to those who have undergone persecution for Christianity short of death. They were peculiarly honored in the primitive church, together with the memory of those who had actually suffered (martyrs).

Confes'sorship, *n.* The office of a confessor.

Confest', *pp.* or *a.* Confessed.

Confidant, *n.* **Confidante**, *n. f.* [Fr. *confidant*, *confidente*. See CONFIDE.] One in whom another confides; one intrusted with secrets; a confidential or bosom friend.

confide, *v. n.* [Lat. *confido*—*com*, and *fido*, to trust.] To trust wholly; to rely or depend upon; to have a firm faith in; to credit; to give credit to; to believe in with assurance. (Followed by *in*.)

"He alone won't betray, in whom none will confide."—*Congreve*.
v. a. To intrust; to commit to the charge of, with a firm belief in the fidelity of, the person intrusted.

confidence, *n.* [Lat. *confidentia*, from *confidens*, from *confido*; Fr. *confiance*.] A firm trust or reliance; firm belief in the integrity, stability, or veracity of another, in the truth and reality of a fact.—Self-reliance; boldness; courage.—He, or that which, supports; assurance of safety; security.—Excessive boldness; assurance; audacity.

confidence, in Iowa, a post-office of Wayne co.

confident, *a.* [Fr. from Lat. *confidens*.] Having confidence; having full belief; trusting; relying; fully assured; positive; dogmatical; without suspicion; having an excess of assurance.

One intrusted with secrets; a confidant.

confidential, *a.* Enjoying the confidence of another; trusty; that is to be treated or kept in confidence; private; as, *confidential* correspondence.—Admitted to special confidence; as, a *confidential* friend.

confidentially, *adv.* In confidence; in reliance on secrecy.

confidently, *adv.* In a confident manner; with firm trust; with strong assurance; positively.

confidentness, *n.* Confidence.

confider, *n.* One who confides; one who intrusts to another.

confiding, *p. a.* Trusting; reposing confidence; as, *confiding* heart.

confidingness, *n.* Quality of being confident; trustfulness.

configure, *v. n.* [Lat. *configurare*, from *con*, and *figurare*, to form.] To take form or position, as the parts of a complex structure, or as the aspects of heavenly bodies with reference to each other.

configuration, *n.* [Fr.; Lat. *configuratio*, from *con-* and *figuratus*—*con*, and *figuro*, from *figura*, a form, shape, or figure. See **FIGURE**.] Resemblance of one figure to another; external form, figure, shape; the mere which bounds a body.

"Different effects . . . result from the so differing configuration and agitation of the particles."—*Granville*.

(*Astron.*) The position which the planets occupy relatively to each other.

configure, *v. a.* [See **CONFIGURATE**.] To dispose into form, by adaptation.

"Mother Earth brought forth legs, arms, and other members of a body, . . . which, coming together, cementing, and so configuring themselves into human shape, made lusty man."—*Bentley*.

confine, *a.* That may be confined or limited.

confine, *n.* [Fr. *confins*; Lat. *confinis*. See the verb.] border adjoining another border; a common boundary; limit; edge; exterior part. (Generally used in the plural.)

"Distances beyond the confines of the world."—*Locke*.

confine, *v. a.* [Fr. *confiner*; Lat. *con*, and *finis*, a boundary, a limit.] To restrain within limits; to bound; limit; to shut up; to imprison; to restrain.—To restrict; to tie up; to inclose; to keep close; to fasten in.

"Fie! you confine yourself most unreasonably; Come, you must go visit the good lady."—*Shaks.*

confined, *p. a.* Restrained within limits; imprisoned; limited; secluded; close.

confineless, *a.* Boundless; unlimited; without end.

confinement, *n.* Act of confining; state of being confined; restraint within limits; imprisonment.

restraint of liberty; voluntary restraint; restriction.

confiner, *n.* He who, or that which, confines.—A borderer; one who lives upon territorial confines; a neighbor.

confinity, *n.* [Fr. *confinité*.] Nearness; neighborhood; contiguity. (*R.*)

confirm, *v. a.* [Lat. *confirmo*—*con*, and *firmo*, from *firmus*, firm.] To make firm or more firm; to add strength to; to fix more firmly; to settle or establish; to make certain by additional evidence; to corroborate; to put past doubt; to fix.—To strengthen; to verify; to satisfy.—To admit to the full privileges of a Christian, by imposition of hands.

confirmable, *a.* That may be confirmed, established, ratified.

confirmation, *n.* Act of confirming; that which confirms.—Additional evidence; proof; convincing testimony.—Assurance; establishment.—Ratification; as, the *confirmation* of a treaty.

(*Eccl.*) The laying on of hands by the bishop, for the conferring of the grace of the Holy Spirit; a rite by which a person arrived at years of discretion takes upon himself the performance of the baptismal vow made for him by his sponsors. In the early ages this ceremony seems to have been accompanied very generally by theunction of the forehead. It is retained in the Christian church generally, and is regarded as a sacrament by the church of Rome.

(*Law*.) A deed of conveyance at common law, whereby an estate or right which is voidable is made firm and unavoidable, or a particular state is increased, or possession made perfect; and, it is a strengthening of an estate formerly made which is voidable, though presently void.

confirmative, *a.* [Fr. *confirmatif*, from Lat. *confirmatus*.] That has power to confirm.

confirmator, *n.* [Lat.] A confirmer.

confirmatory, *a.* That serves to confirm; giving additional strength, force, or stability; assurance or evidence.

Confirmed, *p. a.* Made more firm; strengthened; established.—Having received confirmation.

Confirm'edness, *n.* State of being confirmed.

Confir'mee, *n.* (*Law*.) One to whom anything is confirmed.

Confirm'er, *n.* He or that which confirms.

Confirm'ingly, *adv.* In a corroborative manner.

Confirm'or, *n.* (*Law*.) One who confirms something to some one.

Confis'cable, *a.* That may be confiscated; liable to forfeiture.

Confiscate, *v. a.* [Lat. *confisco*, *confiscatus*—*con*, and *fiscus*, a basket or bag, a money-basket or bag, the state treasury, the public revenue; Fr. *confisquer*; It. *confiscare*; Sp. *confiscar*.] To seize as forfeited to the public treasury, or to the government, or state.—In the U. States the broad principle has been assumed, "that war gives to the sovereign full right to take the persons, and confiscate the property of the enemy, wherever found. The mitigations of this rigid rule, which the policy of modern times has introduced into practice, will more or less affect the exercise of this right, but cannot impair the right itself."—*S. Cranck*, 122.

Confiscate, *a.* Adjudged to the public treasury, as forfeited goods or estates.

"Thy lands and goods
Are, by the laws of Venice, *confiscate*
Unto the state of Venice."—*Shaks.*

Confiscated, *p. a.* Same as **CONFISCATE**, *q. v.*

Confiscating, *ppr.* Adjudging to the public use.

Confiscation, *n.* [Fr.] Act of confiscating, or condemning as forfeited.

(*Civil Law*.) The punishment of forfeiture of goods or land to the public purse.

Confiscator, *n.* One who confiscates.

Confiscatory, *a.* Consigning to forfeiture.

Confлагrant, *a.* [See **CONFLAGRATION**.] Burning together; as, "the *confлагrant* mass."

Conflagration, *n.* [Fr. from Lat. *conflagratio*, from *conflagro*, *conflagratus*—*con*, and *flagro*, to flame, blaze, or burn. See **FLAGRANT**.] A burning up; a great fire; a great burning, as of many houses or a forest.—The general burning of the world at the consummation of all things.

Conflagrative, *a.* Producing conflagration.

Conflation, *n.* [Lat. *conflatio*—from *con*, and *fluo*, *flatus*, to blow.] The act of blowing many instruments together.—A casting or melting of metal.

Conflict, *n.* [Lat. *conflictus*, from *confligo*; Fr. *conflict*.] A violent collision, or opposition, as of two substances undergoing a chemical change.—A striking or dashing against each other: violent collision; a combat; a fighting; a fight between two. (It is seldom used of a general battle.)

"It is my father's face,
Whom in this *conflict* I unawares have killed."—*Shaks.*

—A striving to overcome; contest; contention.

—Mental struggle; distress; anxiety; agony; pang.

"With what labor and *conflict* must he accomplish it!"—*Rogers*.

Conflict of laws. The opposition between the municipal laws of different countries, in the case of an individual who may have acquired rights, or become subject to duties, within the limits of more than one state.

Conflict, *v. n.* To strike or dash against.—To meet in opposition.—To fight; to contend or contest; to resist.—To strive and struggle for victory.—To be in opposition.

Conflict'ing, *p. a.* Being in opposition; contrary; contradictory.

Confluence, *n.* [Lat. *confluentia*, from *confluo*, *confluent*—*con*, and *fluo*, to flow.] The meeting or junction, or place of junction, of two or more streams or rivers; as, "the *confluence* of Tigris and Euphrates."

—The act of crowding to a place.

"You see this *confluence*, this great flood of visitors."—*Shaks.*

—A concourse; a multitude crowded into one place.

"This will draw a *confluence* of people from all parts."—*Temple*.

—Collection; concurrence; union.

"The *confluence*, perfection, and perpetuity of all true joys." *Boyle*.

Confluent, *a.* [Fr. from Lat. *confluent*.] Flowing together; meeting in their course, as two streams; running together and spreading.

(*Bot.*) Running into one another, or growing together.

(*Med.*) Applied to eruptive diseases in which the pimples or pustules are not detached, but are so numerous as to form confluent patches, or even to cover the whole surface of the body; hence the term *confluent small-pox*.—A stream or river running into a larger one.

Conflux, *n.* [Lat. *confluxio*, from *confluo*, *confluxum*.] A flowing together; a meeting of two or more currents of a fluid; a confluence.—A concourse; a collection; a crowd.

"To the gates cast round thine eye, and see
What *conflux* issuing forth, and entering in."—*Milton*.

Confluxibility, **Conflux'ibleness**, *n.* Tendency or aptness to flow or run together, as fluids.

Conflux'ible, *a.* Having a tendency to run or flow together.

Conform, *v. a.* [Lat. *conformo*—*con*, with, and *formo*, to form, from *forma*, form; Fr. *conformer*.] To shape, form, fashion, or put together; to cause to be of the same form as another; to make like in external appearance; to reduce to a like shape or form with something else.—To adapt; to make suitable; to make to be in uniformity with.

v. n. To be of the same form or likeness as another.—To comply with, or yield to.—To live or act according to; to obey. (Followed by *to*.)

Conform'able, *a.* Having the same or a similar form or shape as another; correspondent; like; resembling.—In accordance or uniformity.—Adapted; agreeable; suitable; consistent; compliant.

Conform'ableness, *n.* State of being conformable.

Conform'ably, *adv.* With or in conformity; suitably; agreeably.

(*Geol.*) When after the deposit of mineral matter the mass of deposits has consolidated itself, and assumed the definite features that distinguish it from other rocks, it frequently undergoes a change of position before another deposit is thrown down upon it. If the new deposit is parallel to the old one, it is said to be *conformably* upon it; if it is not parallel, it is described as *unconformable*. These terms are in common use among geologists in reference to all stratified formations. The same terms are used whether the want of conformability is caused by elevation, or by denudation of the lower bed.

Conform'ance, *n.* Act of conforming; conformity. (*R.*)

Conform'ate, *a.* [It. *conformato*.] That has the same form; conformable.

Conforma'tion, *n.* [Fr. from Lat. *conformatio*, from *conformo*.] A fashioning, forming, or putting together; the manner in which a body is formed; form; structure; particular make or construction.

"Varieties are found in the several *conformations* of the organs."—*Holder*.

—Act of conforming, or of producing suitableness or conformity; with *to*.

"The *conformation* of our hearts to the duties of religion." *Watts*.

Conformed, *p. a.* Made to resemble; reduced to a likeness of; made agreeable to; suited.

Conform'er, *n.* One who conforms.

Conform'ing, *p. a.* Adapting; complying with; yielding; adhering.

Conform'ist, *n.* [Fr. *conformiste*.] One who conforms; one who complies with the worship of the Church of England.

Conform'ity, *n.* State of being conformed; likeness; correspondence; resemblance; agreement; congruity; consistency; compliance with.

Confound, *v. a.* [Fr. *confondre*; Lat. *confundo*—*con*, and *fundo*, to pour.] To pour, mingle, or mix together; to mingle or blend, so that the things are no longer distinguishable; to confuse; to disorder.—To perplex; to abash; to disconcert.—To dismay; to astonish; to amaze; to stupefy.—To destroy; to overthrow.

"Let them be *confounded* in all their power and might, and let their strength be broken."—*Daniel* xxi.

Confound'ed, *p. a.* Mixed or blended in disorder; perplexed; stupefied; abashed; dismayed; put to shame and silence; astonished.—Hateful; detestable; odious. (*Vulgar*.)

"He was a most *confounded* Tory."—*Swift*.

Confound'edly, *adv.* Hatefully; shamefully. (*Vulgar*.)

Confound'edness, *n.* State of being confounded; confusion.

Confound'er, *n.* One who confounds.

Confratern'ity, *n.* [Fr. *confraternité*; It. *confraternita*; Lat. *con*, and *fraternitas*, from *frater*, a brother.] A brotherhood; a society or body of men united for some purpose, or belonging to some profession.

Confrication, *n.* [Lat. *confricatio*, from *con*, and *frico*, *fricatus*, to rub.] The act of rubbing against anything; friction.

Confront, *v. a.* [Fr. *confronter*; It. *confrontare*; Lat. *con*, and *frons*, *frontis*, front.] To stand front to front, or face to face, in presence of; to face; to stand in direct opposition to; to oppose; to set face to face.—To bring into the presence of; to set together for comparison; to compare.

Confronta'tion, *n.* [Fr.] Act of confronting; a standing or setting face to face.

(*Law*.) The act by which a witness is brought into the presence of the accused, so that the latter may object to him, if he can, and the former may know and identify the accused and maintain the truth in his presence. No man can be a witness unless confronted with the accused, except by consent.

Confront'er, *n.* One who confronts.

Confront'ment, *n.* The act of confronting.—*Todd*.

Confuc'ian, *a.* Belonging to Confucius.

Confuc'ian, **Confucian'ist**, *n.* A follower of Confucius.

Confuc'ius, the Chinese philosopher. See **KUNG-FUTSE**.

Con Fu'ria, *a.* [It.] Furiously.

Confus'able, *a.* That may be confused.

Confusability, *n.* The capacity of being confused.

Confuse, *v. a.* [Lat. *confusus*, from *confundo*. See **CONFUND**.] To pour or mingle together; to mix or blend things, so that they cannot be distinguished.—To throw into disorder.—To perplex; to render indistinct; to derange; to obscure.—To abash; to confound.—To disconcert; to stupefy.

Confused, *a.* That is in confusion; mixed so as not to be distinguishable.

Confus'edly, *adv.* In a confused manner.

Confus'edness, *n.* Want of distinctness; want of clearness; as, "The *confusedness* of our notions."

Confu'sion, *n.* [Fr.] State of being confused; irregular mixture; tumultuous medley; indistinct combination.

"By tongues *confusion* was to ruin brought."—*Davies*

—Disorder; tumult; disturbance; perturbation.

"God is not a God of sedition and *confusion*, but of order and peace."—*Hooker*.

—Overthrow; destruction; ruin.

"The strength of their illusion
Shall draw him to his confusion." — *Shaks.*

—Astonishment; distraction of mind.

"Confusion dwelt in every face,
And fear in every heart." — *Spectator.*

—Abashment; shame.

Confu'table, *a.* That may be disproved or confuted.

Confu'tant, *n.* One who confutes.

Confuta'tion, *n.* Act of confuting; disproving, or proving to be false or invalid; refutation; overthrow.

Confuta'tive, *a.* That tends to confute; disproving.

Confute', *v. a.* [Fr. *confuter*; Lat. *confuto* — *con*, and *futis*, a water-vessel, from *fundo*, to pour.] To abate, check, or repel the force of argument; to prove to be false, weak, wrong, or fallacious; to convict or convince of error; to disprove; to overthrow; to refute.

Confut'ed, *p. a.* Disproved; proved to be false, defective, or unsound; overthrown by argument, fact, or proof.

Confuter, *n.* One who confutes.

Cong, *n.* See CONGIUS.

Congaree' Creek, in *S. Carolina*, traverses Lexington district, and enters the Congaree River near Columbia.

Congaree River, in *South Carolina*, is formed by the Saluda and Broad Rivers, and after a S.E. course of abt. 50 m. it joins the Wateree to form the Santee.

Con'ge, *n.* [Fr. *congé*: from Lat. *commeatus*, a going to and fro, passage, leave of absence, furlough, from *com-meo*, to go and come — *con*, and *eo*, to go.] Leave; license; farewell; parting ceremony; act of reverence or civility; courtesy; parting bow.

(*Arch.*) A name applied to the *echinus* or quarter-round, (swelling conge,) and to the *cavetto*, (hollow conge.)

—*v. n.* To take leave with the customary civilities; to bow or courtesy.

"I have congeed with the duke, and done my adieu with his nearest." — *Shaks.*

Con'geable, *a.* [Fr., from *congé*, permission, leave.] (*Law.*) Lawful, or lawfully done; done with permission; as, *congeable* entry.

Congea'l, *v. a.* [Lat. *congelare* — *con*, and *gelo*, from *geluo*, icy coldness, frost, cold; Fr. *congeler*.] To cause to freeze wholly; to turn into ice; to turn by frost, or cold; cooling from a fluid to a solid state. — To bind or fix, as with cold.

"Too much sadness bath congeal'd your blood." — *Shaks.*

—*v. n.* To freeze wholly; to be turned into ice, as a liquid; to grow hard, stiff, or thick from loss of heat; to pass from a fluid to a solid state; to concreate into a solid mass.

Congea'lable, *a.* [Fr. *congéable*.] That may be congealed.

Congea'lableness, *n.* Quality of being congealable.

Congealed', *p. a.* Frozen; converted into ice, or a solid mass, by the loss of heat or other process; concreated.

Congea'edness, *n.* State of being congealed. — *More.*

Congea'ling, *p. a.* Changing into ice, or from a liquid to a solid state; concreting.

Congea'lment, *n.* Act of congealing; congelation. A clot or concretion; that which is formed by congelation.

"Tell them your feats, whilst they with joyful tears
Wash the congealment from your wounds." — *Shaks.*

Congé d'élire, *n.* [Fr., leave to choose.] (*Eccl.*) In England, the sovereign's writ or license to the dean and chapter to choose a bishop in the time of vacancy of the see; a mere formal proceeding.

Congee', *n.* Water in which rice has been boiled. — In India, a jail, a lock-up.

Congela'tion, *n.* [Fr. *congélation*; Lat. *congelatio*.] Act or process of congealing; state of being congealed; a change from a fluid to a solid state by cold or cooling. The mass congealed; concretion.

(*Chem.*) *C.* is the process of passing from a fluid to a solid state, whether through the effect of pressure or the lowering of the temperature. Until lately, the latter cause was held to be the chief reason of *C.* It is now very apparent that temperature is only one element. Water may be cooled many degrees below 32° Fahr., and yet retain its liquid state. — See ICE.

Con'gener, *n.* [Lat. *congener* — *con*, and *genus*, *generis*, origin, race, kind; Fr. *congénère*.] One of the same origin or kind; a thing of the same genus, kind, or nature.

Congener'ie, **Congener'ieal**, *a.* Being of the same genus, kind, or nature.

Congénial, *a.* [Fr. *congénial*; from Lat. *con*, and *genialis*, from *genius*, fondness for good living, taste, appetite, inclination.] Of similar taste and inclination. — Partaking of the same kind or nature with another. — Similar; kindred; cognate. — Belonging to the nature; natural; adapted.

"Smilt with the love of sister arts we came,
And met congenial, mingling flame with flame." — *Pope.*

Congéniality, *n.* State or quality of being congenial; participation of the same genus, nature, or origin. — Cognation; natural affinity; suitability.

Congénialize, *v. a.* To render congenial.

Congénialness, *n.* Congeniality.

Congénious, *a.* Of the same kind; congeneric. (*R.*)

Congénital, **Congén'ite**, *a.* [Fr. *congénital*; Lat. *congenitus* — *con*, and *genitus*, from *gigno*, to beget.] Of the same birth; born with another; cognate; begotten together. — Pertaining to an individual from his birth.

(*Med.*) Applied to the diseases which infants have at birth; hence, *C. affections* are those that depend on faulty conformation, as *C. hernia*, &c.

Cou'ger, **Con'ger-eel**, *n.* (*Zoöl.*) See EEL.

Con'geries, *n. sing. and pl.* [Lat., from *congero*, to bring together — *con*, and *gero*, to bear, carry, or bring.] A heap, pile, or mass; a collection of several particles or small bodies in one mass or aggregate.

Conges'tion, *n.* [Fr.; Lat. *congestio*, from *congero*, I amass.] (*Med.*) When there is an unnatural accumulation of blood in the capillary vessels of any part of the sanguiferous system, the organ in which it takes place is said to suffer under *congestion*; it induces a morbid condition of the vessels of the part affected, which when once established is difficult of removal. Congestion of the brain, liver, or lungs is a frequent effect of fevers, though generally consequent upon a previous morbid condition of the organs.

Conges'tive, *a.* Indicating congestion, or an accumulation of blood in some part of the body.

Congius, *n.* (*Antiq.*) A Roman liquid measure, which contained 6 sextarii, or the 5th part of the amphora = 5.9471 pints Eng. In the early times of the Roman republic the *congius* was the usual measure of oil or wine, which was, on certain occasions, distributed among the people; and thus *congiarium* became a name for liberal donations to the people in general, whether consisting of oil, wine, corn, money, or other things; while donations made to the soldiers were called *donativa*.

(*Med.*) A professional term for a gallon, or four quarts; often written *cong*.

Conglacia'tion, *n.* Same as CONGELATION, *q. v.*

Conglob'ate, *a.* [Lat. *conglobatus* — *con*, and *globo*, *globatus*, from *globus*, a ball or globe.] Formed or gathered into a ball or globe.

—*v. a.* To gather, collect, or form into a ball, or hard round substance.

Conglob'ated, *p. a.* (*Bot.*) Collected into a spherical form.

Conglob'ately, *adv.* In a spherical form.

Congloba'tion, *n.* Act of forming into a ball; a round body.

Conglob'ulate, *v. n.* [Lat. *con*, and *globulus*, dimin. of *globus*.] To gather into a little round mass or globule.

Congleton, a town of England, co. Chester, on the Dane, 8 m. S.W. of Macclesfield. *Manuf.* Silks, ribbons, and cottons. *Pop.* 12,981.

Conglomerate, *v. a.* [Fr. *conglomérer*; Lat. *conglomerare*, *conglomeratus*, from *con*, and *glomus*, *glomeris*, a ball or clue.] To roll, wind, or gather into a ball or round body; to collect into a round mass.

—*n.* (*Geol.*) A rock made up of rounded fragments of various rocks cemented together and re-formed. Conglomerates are sometimes called *pudding-stones*, *q. v.* The cementing medium of a *C.* may be carbonate of lime, silica, or oxide of iron. Sometimes the cement is strong enough to hold the stones and rocks together so firmly that they break more readily than the cement. Conglomerates are of no special geological age, but are met with in various formations.

—*a.* Rolled, gathered, or wound into a ball or round body. (*Anat.*) Applied to glands which are made up of many small glands, the ducts of which unite into one, as the salivary glands.

(*Bot.*) Thickly clustered; crowded together.

Conglomera'tion, *n.* Act of conglomerating; state of being conglomerated; collection; accumulation.

Conglu'tinant, *a.* Gluing together; uniting; healing.

—*n.* (*Med.*) A healing medicine; one that tends to unite parts disjointed by accident.

Conglu'tinate, *v. a.* [Fr. *conglutiner*; from Lat. *conglutino*, *conglutinus*, from *con*, and *gluten*, *glutinis*, glue.] To glue together; to unite by some glutinous or tenacious substance.

—*v. n.* To coalesce.

Conglu'tinate, *a.* Glued together; united by a tenacious substance.

Conglutina'tion, *n.* [Fr.] Act of gluing together; a joining by means of some tenacious substance.

(*Med.*) A healing by uniting the parts of a wound; union.

Conglu'tinative, *a.* [Fr. *conglutinatif*.] Having the power of uniting by glue, or other substance of like nature.

Conglu'tinator, *n.* That which has the power of uniting wounds.

Con'go River. One of the great rivers of the world and, next to the Nile, the longest river in Africa, the knowledge of which is due to the recent explorations of Stanley and other travellers. All that was formerly known of the Congo was the lowland section from the present station of Vivi to its mouth, a distance of 90 miles. It descends from the plateau region in a series of falls and rapids which render it unnavigable from Vivi to Stanley Pool, a distance of over 200 miles, around which a railroad is now being constructed. The Congo has no delta; in this respect differing from the Nile, Niger, and Zambesi, the other large African rivers. Its total length, as now estimated, is about 2,900 miles, half of which is unnavigable. Its basin has an area of about 1,200,000 square miles, traversed by numerous large affluents which permit navigation throughout a great section of interior Africa. The Congo, which is known by various names in different parts of its course, appears first as the Chambezi river, whose source is in the mountains south of Lake Leopold, between Lakes Tanganyika and Nyassa, in about 9° S. Lat., and 32° E. Lon. This stream flows S.W., entering Lake Baniba, or Bangueolo, from which it emerges under the name of Luapula. Entering Lake Moero, it reappears as the Luvua, and flows N. to Lake Lanchi, an unexplored sheet of water. Just before reaching this lake it receives one of its main affluents, the great Lualaba, which many regard as the main stream. This

river, discovered and partly explored by Livingston, rises far south (about 12° S. Lat. and 25° E. Lon.), and flows northward through a succession of lakes. After emerging from Lake Lanchi, the combined stream known as the Lualaba, and flows northerly until it has passed the equator. From this part of its course it was explored by Stanley to its mouth, and identified as the Congo, thus adding another to the mighty rivers of the world. Its exploration extends from about 4° S. Lat. from which point it is a noble stream, well filled with islands, and occasionally dividing into two or more sections. Where it crosses the equator there occurs a series of falls and cataracts, which are known collectively as the Stanley Falls. Its course is now northward to 2° N. Lat., then southwestward for over

Fig. 664.—HAIR-DRESS OF A CONGOESE GIRL.

1,000 miles to Stanley pool, in lat. 4° S. For this distance it is navigable. Stanley Pool stands at the head of the series of falls and rapids by which the stream descends from the highlands to the lowland region already spoken of. The Congo receives many tributaries, which yield a length of navigable streams estimated at over 3,000 miles in extent, forming a series of water-ways rarely rivalled. The two largest of the affluents are the Kassai, or Kwa, from the south, and the Moganbi, or Ubangi, from the north. The two next in size are the Lubilash, from the south, and the Nové, from the north. This stream, called the Aruwim, its mouth, is the one followed by Stanley in his notable journey to the Albert Nyauza. The Congo discharges a tremendous volume of water into the ocean second only to that of the Amazon. Some idea of the force of this gigantic current may be had from the fact that debris from its mouth can be traced more than 1,000 miles from land.

Con'go, *n.* (*Com.*) A species of black tea from China. Also written *Congou*.

Congon'has-de-Sabara (ARRIAL DE), a mining village of Brazil, province Minas-Gerás; *population* 2,500.

Congonhas-do-Cam'po, a town of Brazil, province Minas-Gerás, about 16 miles W. of Queluz; *population* 4,000.

Congoon', a seaport town of Persia, prov. Fars, on the Persian Gulf.

Congo Snake, *n.* (*Zoöl.*) See PSEUDOSAURIA.

Congrat'ulant, *a.* Rejoicing in participation; expressing participation in another's joy.

Congrat'ulate, *v. a.* [Fr. *congratuler*; from Lat. *con*, with, and *gratulo*, to wish joy to.] To express one's sympathy in the good fortune or happiness of another; to profess one's pleasure or joy to another on account of an event deemed happy or fortunate; to felicitate.

—*v. n.* To rejoice in participation; to share another's joy.

Congratula'tion, *n.* [Fr.] Act of congratulating; an expressed wish of sympathetic joy at the happiness or good fortune of another; felicitation.

Congrat'ulator, *n.* [It. *congratulatore*.] One who offers congratulation.

Congrat'ulatory, *a.* Containing or expressing congratulation.

Congregate, *v. a.* [Lat. *congrego*, *congregatus*, from *con*, and *grex*, *gregis*, a flock or herd.] To assemble or collect together, as a flock or herd; to collect several persons or things into an assemblage; to assemble or gather.

—*v. n.* To come together; to assemble; to meet.

Congregate, *a.* Collected; assembled in one place; clustered together. (*R.*)

Congregating, *p. a.* Collecting; assembling; bringing together.

Congregation, *n.* Act of congregating or assembling; a collection; an assemblage; an assembly; a company.

(*Eccl.*) An assembly of persons met together for the purpose of religious worship. In the Roman Catholic Church it is applied to certain boards of cardinals, prelates, and others intrusted with the management of particular branches of the affairs of the Church. There are 21 of these *C.*, 15 for spiritual and 6 for temporal purposes; the chief of them being the *C. de Propaganda Fide* for consulting as to the advancement of the Catholic religion throughout the world; the *C. of the Index* for examining books, and deciding upon their fitness for general perusal; the *C. of Sacred Rites*, for regulating all matters relating to ceremonies and ritual of worship; the *C. of Relics*, for inquiring into the authenticity of sacred relics; the *C. of the Holy Office*, &c.

Inquisition, for taking cognizance of heresies and all novel opinions; the *C. of Religious Discipline*; and the *Consistorial C.* These congregations act as a check to the power of the pope; for though their proceedings are usually sanctioned by him, he cannot put a veto upon them without weighty reasons.—A company of monks or religious persons, forming a subdivision of an order, is also called, in the Roman Catholic Church, a *C.*—"The *C. of the Lord*" was a title assumed by the first Scotch Presbyterian reformers, in contradistinction to the Church of England, which they called the "*C. of Satan*." They appeared first in 1557 under the Earl of Argyll, and at a later period were led by the celebrated John Knox.

Congregationalism, *n.* That form of church govt. which maintains the independence of each particular congregation of Christians, and their sufficiency to perform all needful ecclesiastical acts. This policy, in its general principles, may be connected with any form of worship, and is adopted by different sects, as the Baptists, American Unitarians and Universalists, &c.; but the term is usually only applied to the doctrine of the CONGREGATIONALISTS (*q. v.*).

Congregationalists, *n. pl.* (*Ecc. Hist.*) A Christian denomination especially distinguished from others by the emphasis placed on its polity. This polity represents two principles—self government by the local church, and fellowship among churches. *C.* maintain that "those believers who dwell together in one place become a church by their recognition of each other and their mutual agreement to observe Christ's ordinances in one society." The only permanent officers are pastors and deacons, though each church usually appoints a clerk and various committees. *C.* hold that persons thus covenanting together as a local church are fully capable of directing its affairs, and need no superiors to dictate what they shall believe or how they shall be governed. They also advocate the communion and coöperation of all churches, and welcome all believers, of whatever name, into such fellowship.

History.—The first *C.* of modern times appeared in England and became known as Separatists, because they declared themselves separated from the Church of England. As early as 1567 a small congregation of these persons used to meet in London. But such assemblies first began to attract notice as a definite movement in ecclesiastical history about the year 1582, when Robert Browne's *Statement of Congregational Principles* was published. The first known modern Congregational church to be completely and formally organized was established in London in 1592. For some time afterwards *C.* were commonly called Brownists. They suffered severe persecutions. Some were martyred. Many took refuge in Holland, where churches were maintained in Amsterdam, Leyden and other places. The Leyden church and for its pastor John Robinson, who wrote extensively, modifying the principles set forth by Browne. Robinson's name stands first in the history of modern Congregationalism. A portion of the Leyden church turned to England in 1620 and, with others, embarked on Plymouth for America. They landed at Plymouth, New England, Dec. 21 of that year, founded a colony, and became known as the Pilgrims. In 1628 an extensive exodus of Puritans from England began, and continued till 1643. They founded the Massachusetts Bay colony and afterwards the other New England Colonies. They adopted a church polity substantially the same as that of the Pilgrims. Thus Congregationalism in New England began with the first settlement of the country and became a dominant factor in its history. This denomination, for a long period the only one in New England, was closely identified with the civil government, whose form and earlier methods of administration suggested. In Connecticut it was not completely separated from the State till 1818, and in Massachusetts 1833.—In England *C.* became known as Independents. They enjoyed comparative freedom from 1638 till 1662, Cromwell himself being an Independent. At the time of the Toleration Act in 1689 they were again allowed to meet openly, but their growth was small till the great revivals of religion in the next century, led by Whitefield and Wesley. Since that time they have advanced steadily in numbers and strength.

Doctrine.—Each church has its own creed. But they agree in belief that the Holy Scriptures are the sufficient and only infallible rule of religious faith and practice: their interpretation thereof being in substantial accordance with the great doctrines of the Christian faith, commonly called evangelical, held in our churches in the early times." The second general synod of England churches, held in Cambridge in 1648, and concerning the doctrinal part of the Westminster Assembly's Confession of Faith, then just adopted and published by the British Parliament, that they "do zeal to be very holy, orthodox and judicious in all matters of faith; and do therefore freely and fully content themselves for the substance thereof." This declaration remained unmodified till the National Council of 1865, which, while affirming "adherence to the faith of the apostolic and primitive churches held by our fathers," set forth its belief in simpler and fewer terms than those of the ancient formulas. In 1844 a creed was published by a commission of twenty clergymen appointed by the National Council, which, though not passed on by the Council, has been universally adopted by local churches. The Council of 1862 unanimously declared that "each Congregational Church has its own confession of faith, and there is no authority to impose any general confession upon them, or our ministers required to subscribe to any

specified doctrinal standards. But as a basis of fellowship we have certain creeds of acknowledged weight, to be used, not as tests, but as testimony; and we have also, in ecclesiastical councils and associations of churches, a recognized organ for expressing this fellowship and declaring the faith held by our churches to be essential, as well as guarding the liberty of thought generally allowed in our churches."

Fellowship.—As above indicated, Congregational churches, especially in the United States, have united in closer fellowship as they have increased in numbers and as the territory occupied by them has been extended. From their beginning in New England it has been customary to call councils of churches to assist in ordaining, installing and dismissing ministers, in organizing churches, and to give advice in matters of "common concernment." These councils dissolve as soon as the object for which they have been called is accomplished. Permanent associations and conferences of churches, representing local districts, States and provinces, are now organized throughout the United States and British Provinces in North America. The Triennial National Council was organized in 1871, representing all the Congregational churches in the United States. The Congregational Union of England and Wales, which meets semi-annually, includes the churches of those countries. In 1891 the first International Council was held in London, all parts of the world being represented. None of these bodies exercises any judicial authority.—Congregational churches in the United States coöperate in their six national benevolent societies. The oldest of these is the American Board, which maintains twenty missions in foreign lands. In 1896 it had under its care 471 churches, 135 colleges and higher schools, and 922 common schools with 52,654 pupils. The other societies maintain educational and missionary work in the United States. *C.* have been pioneers and leaders in establishing colleges. They founded Harvard, Yale, Dartmouth, Bowdoin, Amherst and most of the other colleges in New England, with many prominent institutions of learning throughout the land. They maintain seven theological seminaries in the United States, and sixteen in the British Empire.

Statistics.—The denomination in the United States considerably more than doubled during the thirty years from 1866 to 1896, and increased more rapidly during the last ten years than in the preceding twenty years. In 1897 there were 5,347 ministers, 5,482 churches with 602,580 members, and 754,437 in Sunday schools. The total amount raised for home expenses and benevolence was \$8,894,663. In Great Britain there were 4,821 churches and stations, and 3,096 ministers. In all countries outside of the United States there were reported, in 1894, 6,602 churches and stations, and 3,263 ministers.—See Dunning's *Congregationalists in America*; Walker's *History of Congregationalism*; The *Congregationalist's* annual, entitled *The Year Book*, and the *Council Manual for a Congregational Church*.

Congress, *n.* [Lat. *congressus*, from *congrēdi*—*con-* with, and *gradi*, to step, to go; Fr. *congrès*; It. *congresso*; Sp. *congreso*.] (*Pol.*) A meeting of the sovereigns of States, or their representatives for the purpose of arranging international matters. The first general European congress was after the conclusion of the Thirty Years' War in Germany, at Münster and Osnabrück, 1648, which was followed by the peace of Westphalia. Of remarkable general congresses there have been, viz.:—1. Of the Pyrenees, 1659; 2. Aix-la-Chapelle, 1668; 3. Niméguen, 1678; 4. Ryswick, 1697; 5. Utrecht, 1713; 6. Aix-la-Chapelle, 1748; 7. Teschen, 1779; 8. Paris, 1782; 9. Versailles, 1785; 10. The Hague, 1790; 11. Rastadt, 1797; 12. Erfurt, 1808; 13. Vienna, 1814, concluded at Paris, 1815; 14. Aix-la-Chapelle, 1818; 15. Troppau, 1820; 16. Laybach, 1821; 17. Verona, 1822; 18. Paris, 1856; 19. Frankfurt, 1863; 20. Berlin, 1878.—Sometimes applied to an assembly of persons meeting for the promotion of some object of general interest; as, "a peace congress."

Congress, (*United States*). The title of the national legislature of this country. It consists of a House of Representatives, and of a Senate. The former is composed of members chosen every second year. The qualification of electors is the same with that required in their respective States for electors to the lower house in the State Legislature. The number of representatives in Congress is fixed by law at 232, and they are apportioned according to the population of each State, and is altered every ten years, when the census is taken by authority. No person can be a representative until he has attained the age of twenty-five years, and has been seven years a citizen of the United States, and is at the time of his election a citizen and inhabitant of the State in which he is chosen.—The Senate is composed of two members from each State; the senators are chosen for six years by the legislature of the State.—The House of Representatives chooses its own speaker; the Vice-President of the United States is, *ex officio*, president of the Senate. Bills for revenue purposes must originate in the House of Representatives; but are liable to the proposal of amendments by the Senate. The Senate has the sole power of trying impeachments; but it can only convict by a majority of two-thirds of the members present, and its sentence extends only to removal from office, and incapacitation for holding it. The regular meeting of Congress is on the first Monday in December, annually. Every bill which passes the two Houses is sent to the President for approval or disapproval; in the latter case, he returns it, with his reasons, to the House in which it originated; if, on reconsideration, it is passed again by a majority of two-thirds in each House, it becomes law. In Congress are invested all the legislative powers granted by the Constitution, enumerated

in art. 1. s. 8, and separated from those of the various State legislatures.—**History.** The delegates from 12 colonies, to the number of 55, assembled in Philadelphia, September 5, 1774. They passed a declaration of rights, and other measures, and separated October 26. The second Congress met May 10, 1775, and issued the Declaration of Independence, July 4, 1776. The Congress removed to Baltimore towards the end of 1776. The first Congress of the United States met in New York in 1789. Its sittings were transferred to Philadelphia in 1790, and were removed to Washington, where they have been since held, in 1800.

Congress, in *Ohio*, a thriving township of Morrow county.

—A post-village and township of Wayne co., about 85 m. N.E. by E. of Columbus.

Congression, *n.* [Lat. *congressio*.] A meeting together; an assembly. (*R.*)

Congressional, *a.* Pertaining to a congress; more especially to the Congress of the United States, and corresponding to the word *parliamentary* in England.

Congressive, *a.* Coming together; meeting; encountering.

Congressman, *n.* A member of the United States congress.

Congreve, WILLIAM, an English dramatist, b. near Leeds, 1670. He entered himself as a student at the Middle Temple, but, like many more, both before and since, abandoned the law for literature. His first piece, written at the age of 17, was a romance, entitled *Incognito, or Love and Duty Reconciled*. In 1693, being then only 23 years old, he wrote his first comedy, *The Old Bachelor*. This produced him not only great reputation, but also the substantial benefit of a commissionership in the hackney-coach office, which was given to him by the Earl of Halifax, who afterwards still further patronized and favored him. He wrote also *Love for Love*, *The Double Dealer*, *The Mourning Bride*, *The Way of the World*, an opera; and some poems. Died, 1729. Witty and spirited as Congreve's plays are, they are too licentious to keep possession of the stage at the present day; and in his own time they received severe castigation from the celebrated Jeremy Collier.

Congreve, SIR WILLIAM, BART., son of an English lieutenant-general, and the inventor of the Congreve rockets, was born in 1772, and early entered the military service, in which he obtained the rank of lieutenant-colonel. He possessed much inventive talent, which he applied to the mechanic arts; and for several years the rocket which bears his name, and which was first used in the attack on Boulogne in 1806, was considered a grand auxiliary in warlike operations, although it has now fallen into comparative disrepute. D. 1828.

Congreve, *n.* A kind of match, called also *congreve light*, prepared with phosphorus, chlorate of potash, sulphur, and sugar, and lighted by friction.

Congreve Rocket, *n.* See ROCKET.

Congruence, *n.* [Lat. *congruentia*, from *congruus*; probably from *con*, and *gruo*, to rush, hasten, with *g* interposed.] A rushing or hastening together; agreement; fitness; suitability of one thing to another; consistency.

Congruency, *n.* Agreement.

Congruent, *a.* Suitable; fit; agreeing; harmonious; correspondent.

Congruity, *n.* [Fr. *congruité*, from L. Lat. *congruitas*.] State of being congruous; agreeableness; suitability; the relation of agreement between things; fitness; pertinence; sufficient reason; consistency.

"A whole sentence may fail of its congruity by wanting one particle."—*Sidney*.

(*Geom.*) A term applied to lines and figures which exactly correspond when laid over one another.

Congruity, in *Pennsylvania*, a post-office of Westmoreland co.

Congruous, *a.* [Lat. *congruus*.] Accordant; concordant; suitable; consistent; agreeable to; rational; fit.

(*Arith.*) Two numbers are said to be *C.*, with respect to a third, when their difference is exactly divisible by it. Thus, 12 and 7 are *C.* with respect to 5;

$$\text{as } \frac{12-7}{5} = 1; \text{ and so are } 27 \text{ and } 12, \text{ as } \frac{27-12}{5} = 3.$$

The numbers considered must be whole numbers. When two numbers are *C.* to a third, either is called a *residual* of the other with respect to the third. *C.* numbers possess many curious properties, which have been applied by Gauss and other writers in the investigation of the properties of numbers.

Congruously, *adv.* Suitably; pertinently; agreeably; consistently.

Congruousness, *n.* Fitness; congruity.

Conhoc'ton, in *New York*, a township of Steuben co.; pop. abt. 4,000.

Conhoc'ton River, in *New York*, rises in Steuben co., and unites with the Tioga to form the Chemung Riv.

Co'ni, **Co'neo**, a town of N. Italy, in Piedmont, cap. of a prov. of its own name, stands at the junction of the Stura and the Gesso, in a pleasant, fruitful, and well cultivated district, 48 m. S.W. of Turin. The principal street is handsome, with arched piazzas; and there are several large churches, convents, and palaces. Its chief manufactures are silk and woollen cloths. Owing to its position on the road between Nice and Turin, it enjoys a brisk traffic, and is the entrepôt for merchandise from Nice destined for Lombardy, Switzerland, and Germany. *C.* was once a fortified place, and had to undergo several sieges. After being taken and retaken, the victory of Marengo gave it into the hands of the French, who demolished the fortifications and turned them into promenades. Pop. 21,142.

Coniah, a king of Judah. See JEROTACHIN.

Con'ic, Con'ical, a. [Lat. *conicus*. See CONE.] Having the form of a cone; pertaining to a cone, or to the sections of a cone.

Con'ically, adv. In the form of a cone.

Con'icalness, n. The state or quality of being conical.

Con'ico-cylind'rical, a. Formed as a cylinder, but tapering to a point.

Con'ico-hemispher'ical, a. Having a form between conical and spherical.

Con'ico-ovate, a. Being between egg-shaped and conical.

Con'ico-sul'culate, a. Awl-shaped and conical; tapering to a point.

Con'ics, n. (Math.) That part of geometry which treats of the cone, and the curves which arise from its sections.

Conic Sections, n. pl. (Geom.) The curves formed by the intersection of a right or oblique cone and a plane. See CONE, CIRCLE, ELLIPSE, PARABOLA, and HYPERBOLA.

Conid'ia, n. (Bot.) A term sometimes used in describing Lichens, to denote the bodies which constitute the powdery matter called *soredia*, lying upon the surface of the thalli. By others they are called the *propagula*. Also the little reproductive cells of certain fungi.

Conifereæ, n. pl. [Lat. *conus*, a cone, and *fero*, to bear.] (Bot.) The Pine family, an important order of plants, described in this work under the name PINACEÆ, adopted by Lindley.

Coniferous, a. [Lat. *conifer*, *coniferus* — *conus*, and *fero*, to bear or produce.] Bearing cones, or seed-vessels of a conical figure, as the pine, fir, &c.

Con'iform, a. In the form of a cone; conical.

Con'ine, n. [Fr. *conine*, from N. lat. *conium*; Gr., hemlock.] (Chem.) An alkaloid existing in hemlock (*Conium maculatum*). It is a colorless volatile oil of powerful odor and acrid taste, obtained by distillation of the plant with alkaline water. It is intensely poisonous.

Conirost'ers, n. (Zool.) One of the CONIROSTRES, *q. v.*

Conirost'al, a. (Zool.) Having a thick, conical beak, as the birds of the tribe *Conirostres*.

Conirost'es, n. pl. [Lat. *conus*, cone, and *rostrum*, beak.] (Zool.) A tribe of birds, of the order *Incessores*, or *Passeres*, including those birds which have a strong conical bill, the margin of which is not toothed or indented. The greater part of these are omnivorous; but some are exclusively granivorous. Cuvier observes that they live more or less exclusively upon seeds, in proportion as their bill is more or less thick. Crows, Starlings, and Finches are examples of this tribe.

Con'ite, n. [Gr. *konis*, powder.] (Min.) A magnesian carbonate of lime, found associated with certain zoilites, in the form of a powder.

Con'ium, n. (Bot.) The Hemlock, a genus of plants, ord. *Apiaceæ*. The most important species is *C. maculatum*, an indigenous plant, which is extensively employed in medicine to relieve pain, relax spasm, and compose general nervous irritation. It owes its properties chiefly to the presence of a colorless oily liquid, with a penetrating mouse-like odor, to which the name of *Conia* has been given. In improper doses, hemlock is a powerful poison, and many fatal accidents have arisen from its having been mistaken for harmless umbelliferous plants; it may, however, be readily distinguished by its botanical characters. The stem is large, round, and smooth, with spots upon it of a purplish-black color, the leaves are dark green, and shining; the general involucre consists of from 3 to 7 leaflets, the partial involucre of 3 leaflets; the fruit has undulated, crenated primary ridges, and contains no *vittæ*; and the whole herb, when bruised, evolves a disagreeable smell, which has been likened by some to that of mice, and by others to that of cat's urine. No chemical antidote is known for hemlock.

Conject'urable, a. That may be conjectured or guessed.

Conject'ural, a. [Lat. *conjecturalis*.] Depending on conjecture; done or said by guess.

Conject'uralist, n. One who deals in conjectures.

Conjectural'ity, n. State of being conjectural.

Conject'urally, adv. By conjecture; by guess.

Conject'ure, n. [Fr.; Lat. *conjectura*, from *conjicio*, *conjicere* — *con*, and *jacio*, to throw.] A casting about in the mind for something unknown; a presumption; a guess; supposition; opinion without proof; surmise; idea; notion.

Conject'ure, v. a. To form a conjecture or conjectures concerning; to judge by guess, or on slight evidence; to entertain an opinion of upon bare probability; to guess; to surmise; to suppose or imagine.

—*v. n.* To form conjectures.

Conject'ured, pp. Guessed; surmised.

Conject'urer, n. One who forms an opinion without proof.

Conjoin', v. a. [Fr. *conjoindre*, from Lat. *con*, with, and *jungo*, to yoke.] To join closely together; to unite in close connection; to unite in marriage.—To associate or connect.

—*v. n.* To league; to unite.

Conjoined', p. a. Joined together; joined to or with; united; associated.

Conjoint', a. United; connected; associated.

(Mus.) *C. degrees*, a term used of two or more notes which immediately follow each other in the order of the scale.—*C. tetrachords*, two tetrachords or fourths, in which the same note is the highest of one and the lowest of the other.

Conjointly, adv. Jointly; unitedly; in union; together.

Con'jugal, a. [Fr., from Lat. *conjugal*, from *con*, and *jugum*, a yoke, a bond.] Pertaining to the marriage-bond

or union by marriage; belonging to marriage; matrimonial; connubial; as, *conjugal* rights.

Conjugal'ity, n. The conjugal state. (R.)

Conjuga'ly, adv. Matrimonially; connubially.

Conjugate, v. a. [Lat. *conjugo*, *conjugatus* — *con*, and *jugum*, a yoke, a bond.] To distribute the parts or inflections of a verb into the several voices, moods, tenses, numbers, and persons.

—*a.* A word agreeing in derivation with another word.

(Geom.) A conjugate axis or diameter.

—*a.* (Bot.) Joined in pairs, as leaves.

(Gram.) Noting words of the same stock or derivation.

(Geom.) Applied to an axis or diameter which is parallel to a tangent at the vertex of the principal or transverse axis, as in the ellipse.

(Math.) Frequently used in pure and applied mathematics, with reference to two quantities, points, lines, curves, &c., which present themselves simultaneously, and have reciprocal properties.

Conjuga'tion, n. [Lat. *conjugatio*; Fr. *conjugaison*.]

(Gram.) A regular distribution of the several inflections of verbs into their different voices, moods, tenses, numbers, and persons. See VERB.

Conjuga'tional, a. Relating to conjugation.

Conjugal', a. [Lat. *conjugal*, equiv. to *conjugal*.] See CONJUGAL.

Conjunct', a. [Lat. *conjunctus*; pp. of *conjungere*.]

Conjoined; concurrent; united. (R.)

Conjunct'ion, n. [Lat. *conjunctio*, from *conjugo*, *conjunctus*; Fr. *conjonction*. See CONJOIN.] Act of joining together; state of being joined or united; union; connection; association; congress.

(Gram.) An indeclinable word or particle which serves to unite words, sentences, or clauses of a sentence, and to show their relationship or dependence upon one another; as, "Day ends, and night begins. William and John learn Latin. Charles and James carried the basket between them." In the first sentence, and connects two separate affirmations into one compound sentence. The same is true in the second — the separate affirmations being "William learns Latin," and "John learns Latin." In the third sentence, and connects only the two words, "Charles" and "James," as it cannot be affirmed of either of them alone that he "carried the basket." In most cases, however, it can be shown that, logically at least, two affirmations are involved, and that the conjunction really connects the affirmations. It is not easy to distinguish *C.* from adverbs. In fact, *C.* were all originally other parts of speech; and the greater part of them are still really adverbs, and owe their conjunctive effect to their signification as adverbs. In *and* and *but*, whatever may have been the original meaning, we now attend only to the conjunctive effect; or is a shortened form of the pronominal adjective *other*; and *nor* is *or* with the negative prefixed. In such a sentence as, "I believe that you are wrong," *that* is the demonstrative pronoun, equivalent to — I believe *this*, viz., "you are wrong." This is clearly seen in the corresponding words in other languages: Ger. *dass*, Fr. *que*, Lat. *quod* (for the relatives were originally demonstrative pronouns). All the rest might be called Adverbial *C.*, or Conjunctive Adverbs. Ex., "He is industrious; therefore he is happy" — that is, "he is happy for that." This adverb, or adverbial phrase, expressive of the cause of the happiness, by referring us back for its meaning to the former assertion, has the effect of connecting the two assertions in the mind. Again, "The messenger arrived while he was speaking." Here *while* is equivalent to *at the time at which* (he was speaking). As an adverbial phrase, this simply indicates the time of the act of "arriving;" but as it also expresses that the speaking was going on at the same time, it thus conjoins the two assertions.

(Astron.) When two heavenly bodies have the same longitude or right ascension (see ASCENSION), they are said to be in *C.* If they also had the same declination, or latitude, N. or S. of the celestial equator, the nearer heavenly body would apparently cover the disc of that which is more remote. When any heavenly body is in a line between the earth and the sun, it is said to be in *C.* with the latter; but it is said to be in opposition to it when the earth comes between the body in question and the sun. Geocentric *C.* is the *C.* of two heavenly bodies as viewed from the earth; but when heliocentric *C.* is spoken of, the *C.* is understood to be considered as if viewed from the sun. True *C.* is the observation at the earth's surface reduced to what it would be if witnessed from the centre of the earth.

Conjunct'ional, a. That relates to a conjunction.

Conjunct'iva, n. [Lat.] (Anat.) A thin, transparent, delicate membrane, that lines the internal superficies of one eyelid, and is reflected from thence over the anterior part of the bulb, then reflected again to the edge of the other eyelid. That portion which covers the transparent cornea cannot, without much difficulty, be separated from it. Inflammation of this membrane is called *ophthalmia*.

Conjunctive, a. Closely united; connecting together; subjunctive; uniting; serving to unite. (R.)

"She's so conjunctive to my life and soul,
That as the star moves not but in his sphere,
I could not but by her." — *Shaks.*

C. mood. (Gram.) That modification of the verb which expresses the dependence of the event intended on certain conditions; the SUBJUNCTIVE, *q. v.*

Conjunctively, adv. In union or conjunction.

Conjunctiveness, n. The quality of joining or uniting.

Conjunct'ly, adv. In union; jointly; together.

Conjunct'ure, n. [Fr. *conjoncture* — Lat. *con*, and *junctura*, a joining, from *jungo*, *junctus*, to join.] A

joining together; a combination, or union; connection; concurrence.

"To perceive the conjunctures of letters in words." — *Holden*.

—A combination of important events, or critical circumstances.

"I never met with more unhappy conjunctures of affairs." — *King Charles*.

—A critical time; a crisis; an occasion.

"Such censures always attend such conjunctures." — *Clarendon*.

Conjura'tion, n. [Fr., from Lat. *conjuratio*.] The form or act of summoning another in some sacred name.

"We charge you, in the name of God, take heed;

Under this conjuration speak, my lord." — *Shaks.*

—A magical flow of words; an incantation; an enchantment.

"Your conjuration, fair knight, is too strong for my poor spirit to disobey." — *Sidney*.

—A plot, bargain, or compact, made by a number of persons under oath, to do some public harm; a conspiracy.

Conjura'tor, n. (O. Eng. Law.) One bound by oath with others; a conjuror.

Conjure, (kūn'jūr), v. a. [Fr. *conjure*; Lat. *conjuro*, *con*, and *juro*, to swear.] To call upon or summon by sacred name; to enjoin solemnly, or by the most binding sanctions.

"I conjure you! Let him know

What'er was done against him, Cato did it." — *Addison*.

—To act upon by conjuration or by supernatural influence to bewitch; to charm; to enchant.—To summon by invocations and enchantments.

"What black magician conjures up this fiend,
To stop devoted charitable deeds?" — *Shaks.*

—*v. n.* To practise the art of a conjuror; to use charm magic, or sorcery.

Conjurer, n. One who practises conjuration; an enchanter; a juggler.

Conjur'or, n. (Law.) One bound by oath with others.

Conkey's Store, in Illinois, a former P. O. of Vermilion county.

Conk'lin, in New York, a village and township of Broome co.

Conklingville, in New York, a post-office of Saratoga county.

Con'logue, in Indiana, a former post-office of Jackson county.

—*In Illinois,* a post-office of Edgar co.

Connas'cence, Connas'cency, n. [Lat. *con*, and *nasco*, to be born, from *nascor*, to be born.] State of being born at the same time with another; a common birth or origin.

(Bot.) A growing together.

Connas'cent, a. Born together; produced at the same time.

Con'uate, a. [Lat. *con*, and *natus*, from *nascor*, to be born.] Born with another; being of the same birth or origin.

(Bot.) Applied to the congenial union of homogeneous parts, or to the coalescence of heterogeneous parts.

(Anat.) Applied to the condition under which ossification of the common fibrous or cartilaginous parts of two bones proceed from one point or centre, and converts such bones into one bone; as, *e. g.*, the *radius* and *ulna*, or the tibia and fibula of the frog. The structures are each to the eye single bones; but mind transcending the senses, recognizes such substance as being essentially two. The centrams of the middle segments of the skull in fishes are connate.

Con'uate-perfo'liate, a. (Bot.) Applied to sessile leaves united at their bases around the stem, so that the latter appears to grow through them, as the upper leaves of the honeysuckle (fig. 509).

Connat'ural, a. Of the same nature with another; connected by nature; united in nature; born with another.

Connatural'ity, n. Participation of the same nature; natural inseparability.

Connat'uralize, v. a. To make natural.

Connat'urally, adv. In coëxistence with nature; originally.

"Notions connaturally engraved in the soul." — *Hale*.

Connat'uralness, n. Same as CONNATURALITY.

Con'naught, a prov. of Ireland, bounded E. by L. Lough, W. by the Atlantic Ocean, N. and N.W. by the O. and Ulster, and S. by Munster. Its extent is about 100 m. long, and 84 broad. *C.* is mountainous in the W. and S., but almost level in the centre. On the W. there are a great many peninsulas indented with bays, while off the coast are numerous islands. Rivers, the *Arrow*, *Bonnes*, *Moy*, *Clare*, *Renicon*, and the *Shannon*. *Lakes.* The *Conn*, *Corrib*, *Carra*, and *Mask*. *Prod.* usual cerealia, vegetables, and roots. This was formerly one of the kingdoms of the Irish heptarchy. In 1800 it was brought under the administration of the Empire, and divided into the counties *Galway*, *Leitrim*, *Donegal*, *Roscommon*, and *Sligo*.

Con'neaut, in Ohio, a post-borough and township of Ashtabula co., on a creek of its own name, and 2 m. from Lake Erie.

Conneant, in Pennsylvania, a township of Crawford co.

—A township of Erie co.

Con'neaut Creek, in Pennsylvania, rises in Crawford co., and flows N. into Lake Erie near the village of Conneant.

Conneant'ville, in Pennsylvania, a post-borough of Spring township, Crawford co., about 105 m. N.N. of Pittsburgh.

Connect', v. a. [Lat. *connecto* — *con*, and *necto*, to tie, or fasten.] To knit, fasten, tie, or link together; to conjoin; to unite; to combine; to join; to associ-

conn. To join, unite, or cohere together. — To have a close relation.

connected, p. a. Linked together; united.

connectedly, adv. In a connected manner.

connecticut, one of the smallest of the U. States, and one of the 13 original States, between Lat. 40° 58' and 42° 21' N., Lon. 71° 53' and 73° 50' W., having N. Mass., E. R. Is., W. N. Y., and S. Long Island Sound. Length E. to W. 90 m., and its average breadth abt. 52 m. A. 4,730 sq. m.—*Desc.* Surface undulating, often mountainous; some of the peaks are 1,600 ft. abv. sea, and one 2,300. The Green M. enter by the N. W. from Mass., run in detached eminences, through the western part of the State. These mountains, the Talcot or Green-woods range, which cross the State in the N., and a ridge E. of the Connecticut River that appears to be a continuation of the White Mountains of New Hampshire, are of inconsiderable height. Most of the State is drained by 3 principal rivers with their branches, the Connecticut in the central, the Housatonic in the western, and the Thames in the eastern parts. Besides these, there are various small streams which flow into Long Island Sound. Of these, the Quinepiac, which rises between Farmington and New Britain, and empties into N. Haven harbor, is the largest, and the only one which extends half across the State. The soil of the central valley of C. is alluvial and diluvial, and embraces the most fertile and the poorest land in the State. The alluvial of the C. and Farmington River valleys is a rich loam seldom equalled for continuous tillage and productiveness. Much of the remainder is a diluvial, light, sandy or gravelly soil, especially towards New Haven, and unproductive, unless artificially fertilized. The section of the State watered by the Housatonic River, extending into New York and Massachusetts, is very broken and mountainous; the craggy mountains and hills are still covered with woods, but yet large portions afford excellent pasturage for cattle, sheep, and horses. The whole sea-coast, except across New Haven harbor, is of primitive formation, and difficult of cultivation. Much of it is suitable for grazing, but it is the most valuable for the production of fruit and vegetables.—*Clim.* The climate is very variable; an extreme degree of heat and cold is experienced at different seasons; but the sky is usually serene, and the country healthy. Observations covering a period of 20 years show the mean temperature in winter to be 29.92°; summer, 69.27°; range for any month, 55.82°.—*Min.* C. is rich in mineral resources. Gold has been found in Middlesex county, and silver is obtained from the argentiferous lead ore of the Middletown mines, which are extensively worked. Copper exists in considerable quantities, but has not been profitably mined. Lead occurs in different localities. Iron is mined at Salisbury. Bismuth is found, chiefly at Monroe; and cobalt and nickel are the objects of extensive mining operations near the town of Chatham. There are also other precious or rare minerals, such as chrysoberyl, beryl, columbite, &c.—*Mineral Waters.* There is mineral spring at Stafford, 24 m. from Hartford, which has obtained more celebrity than any other in New England. Its principal ingredients are iron and carbonic acid. It, consequently, belongs to the class of acidulous chalybeates.—*Agric.* The principal products of C. are butter and cheese, live stock, Indian corn, oats, &c., market products, tobacco, wool, and Irish potatoes. The official statistics give the following figures for the crop of 1894, the total value being \$11,427,937:

Products.	Amount of crop.	Total acreage.
Indian corn.....bushels...	1,404,269	45,299
Wheat....."....."	64,878	3,956
Oats....."....."	207,664	16,098
Barley....."....."	606,352	23,502
Buckwheat....."....."	64,878	3,956
Potatoes....."....."	2,054,948	26,012
Tobacco.....pounds...	10,176,908	6,713
Lard.....tons.....	450,398	517,699

In 1895 the total number and value of live stock were: horses, 43,478, value \$2,660,304; milch cows, 137,582, value \$4,042,159; oxen and other cattle, 73,042, value \$2,085,911; sheep, 37,934, value \$123,243; swine, 52,172, value \$603,940; total value of live stock, \$9,515,537. Of the total area of C., about 1,700,000 acres are improved and 2,200,000 acres are unimproved, the latter being largely in the mountainous region of the State.—

Industry. The natives of C. have ever been distinguished by their disposition to traffic, and indefatigable enterprise. It is their genius to attend to a multiplicity of pursuits, and it may be said that nearly all the inhabitants are directly or indirectly interested in some kind of manufacture. The most enterprising manufactures are those of iron, clocks, carriages, India-rubber goods, cotton and woolen goods. Ship-building is also an important item of industry. The clocks manufactured in command the market all over the country, and in great part of the civilized world; the Collin's axes are unsurpassed; the Colt's revolvers and Sharp's rifles have world-wide celebrity; and in the manufacture of carriages, C. may compete with any other of the U. States. The other most noticeable manufactures are those of agricultural and mechanical implements, wooden-ware, umbrellas, buttons, leather, boots and shoes, paper, saddlery, cabinet furniture, silver and plated ware, jewelry, powder, glass, soap, &c. Besides the coasting-trade, which considerable, C. has a large trade with the W. Indies and other foreign countries, chiefly carried through the ports of N. Y. and Boston. Exports, heavy castings, machinery, small hardware, firearms, clocks and watches, and free stone for building, of which extensive quarries

exist near Patland and Middletown, and manuf. goods.—**Counties and Towns.** C. is divided into 8 counties, viz.

Fairfield, Hartford,	Litchfield, Middlesex,	New Haven, New London,	Tolland, Windham.
-------------------------	---------------------------	---------------------------	----------------------

The principal towns are: New Haven, 86,045; Hartford (the capital), 53,230; Bridgeport, 48,866; Waterbury, 33,202; Meriden, 25,423; Norwich, 23,048; Danbury, 19,473; New Britain, 19,007; Norwalk, 17,747; Stamford, 15,700; Middletown, 15,205; New London, 13,757; Ansonia, 10,342; Willimantic, 8,648.—**Education.** The school fund, founded in 1821, from the sale of the lands in Ohio known as the Western Reserve, is among the largest of any in the Union, amounting to over \$2,000,000. The whole income for public schools in 1895 was \$2,458,274, and the total number of pupils enrolled 138,882, out of a total school population of 170,589. Besides the public schools, there are numerous private schools of a high order, and three universities or colleges, Yale (g. v.), in New Haven; Trinity College, in Hartford, and Wesleyan University, in Middletown. Yale University, founded in 1700, one of the most numerously attended of all colleges in the U. S., has perhaps the finest cabinet of minerals in the Union, and a library of 240,000 volumes. There is a Normal school under the patronage of the State at New Britain; and the literary institutions are numerous.—**Religion.** The prevailing denominations are congregational.—**State Institutions.** Normal School; Reform School, for boys, Meriden; Industrial School, for girls, and the Conn. Hospital for the Insane, at Middletown; State Prison, Wethersfield; Storrs' Agricultural School, Mansfield.—**Public Institutions, not State.** Yale University, Sheffield Scientific School, Hartford Theological Seminary, each at New Haven; Trinity College, Hartford; Wesleyan University, Middletown.—**Private Institutions of Note.** Asylum for the Education of the Deaf and Dumb, Hartford; Gen. Hos. Soc'y of Conn., New Haven; Hartford Hospital; Retreat for the Insane, Hartford.—**Government.** The General Assembly consists of a Senate and a House of Representatives. Since 1844, the legislature meets biennially. The representatives, governor and lieutenant-governor are all elected by the vote of all male citizens who have resided one year in the State and have attained the age of 21. The Judiciary consists of a Supreme Court of Errors, consisting of a Chief Justice and four Associate Justices, who are also Judges of the Superior Court. It holds four sessions at Hartford, two at Norwich, and two at New London, annually. A Superior Court, consisting of eleven judges, including the Supreme Court judges. This Court is always open in each county for certain purposes. Courts of Common Pleas exist in Hartford, New Haven, New London, Fairfield and Litchfield counties. Judges of the Supreme and Superior Courts are appointed by the General Assembly and nomination of the Governor; of Courts of Common Pleas by the General Assembly alone.—**Finances.** The State debt was, on Dec. 1, 1881, \$4,967,600, which had been reduced to \$2,501,781 on Sept. 30, 1894. The amount raised by State taxation is about \$1,800,000 annually.—**History.** This State derives its name from its chief river, the Connecticut, a name which, in the Indian language, means the long river. The C. river was discovered in 1613, by Block, a Dutch navigator, and, in 1631, Dutch traders built a fort and trading-house at Hartford. Nevertheless, the English colony founded at Windsor in 1633, is generally considered the first settlement in C. Hartford was founded by English emigrants in 1633; Wethersfield in 1636; and New Haven in 1637. In 1637, the settlers were much annoyed by the Pequod Indians, but the savages were almost destroyed in different engagements at Mystic and Fairfield, and since then no serious trouble occurred in the colony. In 1661, Charles II. granted a charter to C. In 1686, Sir Edmund Andros was sent over by King James II. to resume the charters granted to the colony. In Oct., 1687, he came to Hartford, while the Assembly was sitting, and demanded the charter. It was produced and laid over the table. The discussion was protracted into the evening. Suddenly the lights were extinguished, and Capt. Joseph Wadsworth seized and carried away the charter, and hid it in the famous charter-oak (fig. 666) which stood in the city of Hartford, till August, 1856, when a storm blew it down. The charter, resumed after the death of James II., and the consequent deposition of Andros, continued in force till the adoption of the present constitution in 1818. C. distinguished it-

Fig. 665.—SEAL OF THE STATE.

self in the war of independence, as much by the bravery of its soldiers, as by the wisdom of its statesmen. Since then, her history is one of incessant progress and uninterrupted prosperity.—*Pop.* In 1800, the pop. of C. was 251,002; 400,147 in 1860; 537,454 in 1870; 622,683 in 1880; and 746,258 in 1890.

Connecticut Farms, or Union, in New Jersey, a village of Essex co., abt. 6 m. S.W. of Newark.

Connecticut Lake, in New Hampshire, a post-office of Coos co.

Connecticut River, [IND., Quon-et-to-cut, or quon-ek-la-cut, the long, or without-end, river.] The largest river in New England, rises at 1,600 feet above the level of the sea, a few miles N. of Connecticut Lake near Canada, and flowing between Vermont and New Hampshire, and through Massachusetts and Connecticut, discharges its waters into Long Island Sound, at Saybrook, in Lat. 41° 16' 15" N., Lon. 72° 21' W. Its total length is about 410 m. Its principal affluents are: on the W., the Passumpsic, the White River, the Deerfield, the Westfield, and the Farmington; on the E. the Ammonoosuck, the Miller's, and the Chicopee. C. is navigable to Hartford for vessels of 8 feet draught, and to Middletown for vessels drawing 10 feet of water. Shad of superior quality is taken in large quantities in this river, and forms the object of an important trade.

Connecting, p. a. Uniting; conjoining.

Connection, n. [Lat. *connexio*; Fr. *connexion*.] Act of connecting; state of being connected; union; coherence; junction; association; dependence; intercourse; commerce; communication.—A relation by blood or marriage; affinity; relationship.

Connective, a. Having the power of connecting; tending to connect.

—n. (Gram.) Something which connects; a word that connects other words and sentences; a conjunction.

(Bot.) That portion of the stamen which connects the cells of the anther.

Connectively, adv. In conjunction.

Connector, n. He or that which connects.

Connelville, in Pennsylvania, a post-borough and twp. of Fayette co., on the Youghiogheny River, 57 m. S.E. of Pittsburg. It is connected with New Haven by a bridge.

Connemara, a district of Ireland, occupying the W. portion of the co. Galway, and consisting mostly of bogs, mountains, and lakes. It is 30 m. long, with a varying breadth of 15 to 20, and its pop. is extremely scattered.

Connequenessing, in Pennsylvania, a township of Butler co.; pop. about 1,400.

Conner, n. (Zool.) See CTENOLABRUS.

Conner, DAVID, a distinguished officer in the U. S. navy, b. at Harrisburg, Dauphin co., Pa., about 1792. He entered the navy as midshipman in 1809, and, Feb. 24, 1813, as acting lieutenant, he took part in the action between the Hornet and the Peacock. The Peacock surrendered in a sinking condition, and C., charged with the dangerous duty of removing the prisoners, succeeded in saving most of them, and was one of the last to leave the vessel, after having lost 3 of his men. He became lieutenant in 1813, was dangerously wounded in the action against the Penguin in 1815, and, for his gallant conduct in that action, he was presented with a medal by Congress, and a sword by the legislature of Pennsylvania. He was promoted to the rank of captain in 1835, and, at the opening of the Mexican war, being then in command of the squadron of the W. India station, he rendered the most efficient service. In May, 1846, he blockaded the Mexican ports on the gulf; captured the port of Tampico on Nov. 14, and, on March 9, 1847, directed the landing of the army under Gen. Scott, at Vera Cruz. His impaired health compelled him to return home. He took afterwards the command of the Philadelphia Navy Yard, and d. 1856.

Conner's Creek, in Michigan, a former P. O. of Wayne co.

Conner's Creek, in S. Carolina, traverses Pickens county and enters the Kiowee river, about 8 m. S.W. of Pendleton.

Connersville, in Indiana, a city, the cap. of Fayette co., on the Whitewater river, 50 m. E. S. E. of Indianapolis. Has carriage and furniture factories. Pop. abt. 6,000 in 1897.

Connasauga River, in Georgia, rises in Gilmer co., near the Blue Ridge, and joins the Coosawatee near New Echota to form the Oostenaula.

Connexion, n. Same as connection.

Connexive, a. Same as connective.

Connivance, n. [Fr. *connivence*, from Lat. *conniventia*. See CONNIVE.] Act of winking or conniving at; voluntary blindness to an act; pretended ignorance; intentional forbearance to see, generally implying consent.

"Every vice interprets a connivance in approbation."—*South.*

(Law.) An agreement or consent, indirectly given, that something unlawful shall be done by another.

Connive, v. n. [Fr. *conniver*, from Lat. *conniveo*—*con*, and *niveo*, allied to *nico*, to beckon, and *nicto*, to wink.] To close the eyes; to wink; to tolerate, permit, or allow by pretending ignorance or blindness; to forbear to see; to overlook a fault. (Generally followed by *at*.)

Connivency, n. Connivance.

Connivent, a. (Bot.) Used figuratively in describing the direction of organs, to denote a gradual inward direction, as in many petals. It is the same as *converging*.

(Anat.) Applied to those valvular folds of the lining membrane of canals which are so disposed as to retard, while at the same time they permit, and, as it were, connive at, the passage of the contents of such canals as the *valvulae conniventes* in the human intestine.

Fig. 666.—THE CHARTER-OAK.

Conniver, *n.* One who connives.

Conniv'ing, *v. a.* Closing the eyes against faults to pass uncensured.

(*Bot.*) Same as connivent.

Connoissement, *n.* (*French Law.*) A bill of lading.

Connoisseur, (*kon-nis-soor'*), *n.* [*Fr.*, from *Lat. cognoscere* — *con*, and *nosco*, to know.] A knowing or skillful person; one who is well versed in any subject; a critical judge or master of any art, particularly of painting and sculpture.

Connoisseur'ship, *n.* The skill of a connoisseur.

Con'notate, *v. a.* [*Lat. con*, and *notare*, *notatum*, to mark.] To designate something besides itself; to imply; to infer.

Connota'tion, *n.* [*Fr.*] Implication of something besides itself; inference; illation.

Con'notative, *a.* [*Sp. connotativo.*] Connoting; denoting; implying; attributive.

Con'note, *v. a.* To imply; to betoken; to include.

Conn's Creek, in *Missouri*, a village of Camden co., about 50 m. S. by W. of Jefferson City.

Connubial, *a.* [*Lat. connubialis*, from *con*, and *nubo*, to marry.] Pertaining to marriage; nuptial; conjugal; matrimonial.

"Should second love a pleasing flame inspire,
And the chaste queen connubial rites require."—*Pope*.

Communeration, *n.* [*Lat. connumerare, connumeratus*, to number with.] A reckoning together.

Communitious, *a.* Nutritious by force of habit.

Con'ny, *a.* [*A. S. connan*; *O. Eng. conne*, to know, to be able.] Brave; fine; pretty. (Used in the N. of England.)

Co'no, in *Iowa*, a township of Buchanan co.; *pop.* about 242.

Conocar'dium, *n.* (*Pal.*) A genus of fossil bivalves, distinguished by their long siphonal tube.

Conocar'pus, *n.* (*Bot.*) The Button-tree, a genus of trees, order *Combretaceæ*. The different species, chiefly natives of the W. Indies, yield an excellent timber.

Conococheague, in *Maryland*, a post-office of Washington co.

Conoche'lix, *n.* [*Gr. konos*, a cone, and *elix*, a spiral.] (*Zoöl.*) A genus of turbinated mollusca, intermediate between the cones and the volutes.

Co'noid, *n.* [*Gr. kônoi-dês* — *kônos*, and *eidos*, form.] (*Geom.*) A body or figure resembling a cone; a solid formed by the revolution of a conic section about its axis.

Co'noid, **Conoid'al**, *a.* Resembling a cone; pertaining to a conoid.

Conoid'ic, **Conoid'ical**, *a.* Approaching to a conic form; conoidal.

Conol'oway Creek, in *Pennsylvania*, rises in Fulton co., and joins the Potomac in Washington co., Maryland.

Conominee', *n.* [*From co* for *con*, and *nominee*, *q. v.*] A joint nominee.

Co'nou, an Athenian general, was the son of Timotheus. Having been defeated in a naval engagement at Ægospotamos by Lysander, he for a time went into exile; but being aided by Artaxerxes, king of Persia, he returned and defeated the Spartans near Cnidus, 394 B. C. C. then began to rebuild the fortifications of Athens, and restored it to liberty and security; but being sent on a political mission to Tiribazus, a Persian satrap, he was imprisoned, and it is not known what became of him.

Co'nops, *n.* [*Gr. konops*, a gnat.] (*Zoöl.*) A Linnean genus of Dipterous insects, characterized by having an elongated, slender, pointed proboscis.

Conot'ou, in *Ohio*, a post-village of Harrison co., abt. 32 m. W. of Steubenville.

Conotton Creek, in *Ohio*, rises in the E. part of the State, and enters the Tuscarawas River near Dover.

Con'over, in *Ohio*, a post-village of Miami co., 10 m. E. of Piqua.

Conowin'go, in *Maryland*, a post-office of Cecil co.

Co'ney, in *Pennsylvania*, a village and township of Lancaster co., on the Susquehanna, about 18 m. S. E. of Harrisburg.

Conquad'rate, *v. a.* [*Lat. conquadratus*, pp. of *conquadrare*, from *con*, and *quadrare*, to make square.] To reduce to a square. (*R.*)

Con'quer, *v. a.* [*Fr. conquérir*; *Lat. conquero* — *con*, and *quero*, to seek.] To gain, acquire, or take by force; to vanquish; to subdue.

"We conquer'd France, but felt our captive's charms;
Their arts victorious triumph'd o'er our arms."—*Pope*.

—To surmount; to overcome by a mental effort; as, "he conquered his reluctance."

—*v. n.* To overcome; to gain the victory.

"And both resolved to conquer or to die."—*Waller*.

Con'querable, *a.* That may be conquered, overcome, or subdued.

Con'querableness, *n.* The quality of being conquerable.

Con'quered, *p. a.* Overcome; subdued; vanquished; gained; won.

Con'querness, *n.* She who conquers.

Con'quering, *p. a.* Overcoming; subduing; vanquishing; obtaining.

Con'queringly, *adv.* In a conquering manner.

Con'queror, *n.* One who conquers; a vanquisher.

Con'quest, *n.* [*Fr. conquête*, for *conqueste*; *L. Lat. conquesta*; *Lat. conquistus*, from *conquiro*.] Act of conquering; success in arms; the overcoming of opposition. — That which is conquered; possession gained by force; a gaining or regaining by effort or struggle; victory; subjugation; subjection.

The Conquest. (*Hist.*) The name usually given to the invasion of England by William of Normandy, who, having overcome Harold II. at the battle of Hastings, Oct. 15, 1066, obtained the crown of England, and became the founder of the Norman dynasty.

Con'quest, in *New York*, a post-village and township of Cayuga co., about 15 m. N. of Auburn, on the Seneca River; *pop.* 1,881.

Conrad I., COUNT OF FRANCONIA. In 911 he was elected king of Germany, but Arnulf, duke of Bavaria, and Henry, duke of Saxony, disputed his title, and engaged the Huns to overrun Germany. Conrad is said to have received a mortal wound in combat with these revolted chiefs. D. 918.

CONRAD II., son of Henry, duke of Franconia, was elected king of Germany in 1024. Attempts were made to displace him, but without success, and in 1027 was crowned emperor at Rome, in the presence of Canute, king of England, and Rudolph, king of Burgundy. As heir to Rudolph, who died in 1033, Conrad became king of Burgundy. D. 1039.

CONRAD III., duke of Franconia, of the house of Hohenstauffen, B. in 1093, was elected emperor in 1138. His title was disputed by Henry the Proud, duke of Saxony, and the rivalry of these two princes was the germ of the factions afterwards so famous under the names of Guelfs and Ghibellines. In 1146, at the diet held at Spire, Conrad was persuaded by the eloquence of St. Bernard to undertake a crusade, on which he set out the following year. It was fruitless and disastrous, and Conrad returned with the wreck of his army in 1149. D. 1152.

CONRAD IV., duke of Suabia, chosen king of the Romans in 1237, was son of the great Emperor Frederick II., and like him was excommunicated by the pope, Innocent IV., who set up a rival emperor in William, count of Holland. On the death of his father, in 1250, Conrad marched into Italy to recover the towns which had declared against him. He took Naples, but could not get the investiture of the kingdom of Sicily from the pope. Died suddenly in Italy, 1254. See CONRADIN.

Con'rad, ROBERT T., an American author, B. in Philadelphia, 1810. He studied the law, and was successively judge, president of an important Western railroad, and Mayor of the city of Philadelphia. While attending to his public duties, he wrote several poems and tragedies. His tragedy of *Aylmere* has been very successful on the stage, both in America and England. D. 1858.

Con'rad, TIMOTHY ABBOTT, an American conchologist and paleontologist, B. in New Jersey, 1803; is author of *Fossil Shells of the Tertiary Formations of the United States* (1832); *Monography of the Unionide of the United States* (1834); *Paleontology of the State of New York*, (1838-40); *Paleontology of the Pacific Railroad Survey in California* (1854); and *Paleontology of the Mexican Boundary Survey* (1854). Died 1877.

Con'radin, the son of Conrad IV., Duke of Suabia, and the last of the house of Hohenstauffen, B. 1252. As the greatest part of the possessions of his family had been swept away, C. accepted the invitation of the Italian Ghibellines to place himself at their head. He crossed the Alps with 10,000 men; was well received at Verona, and, notwithstanding the treason of his relatives Meinhard and Louis of Bavaria, who left him with but 3,000 men, he entered South Italy. Charles d'Anjou, on whom the crown of Naples had been bestowed by Pope Urban IV., met C. at Tagliacozzo, defeated him, and caused him to be beheaded, 1268. C. was only 16 years old.

Consanguin'eal, *a.* Of the same blood; consanguineous. (*R.*)

Consanguin'eous, *a.* [*Lat. consanguineus*, from *con*, and *sanguis*, *sanguinis*, blood; *Fr. consanguin*.] Of the same blood; related by birth; descended from the same parent or ancestor.

Consanguin'ity, *n.* [*Fr. consanguinité*; *Lat. consanguinitas*.] (*Law.*) The relationship between persons descended from a common ancestor; and is either lineal, between persons of whom one is descended in a direct line from the other (son, father, grandfather, &c.), or collateral, between such as lineally descend from the same ancestor (brothers, cousins, &c.). In lineal consanguinity, the father is related in the first degree to the son, the grandfather in the second, and so forth. In collateral, the computation is by beginning at the common ancestor and reckoning downward to the more remote of the persons compared; thus brothers are kindred in the first degree; uncle and nephew, or first cousins, in the second degree, and so forth.

Conscience, *n.* [*Fr.*, from *Lat. conscientia*, from *con*, and *scio*, *sciens*, *scientis*, to know; *Ger. gewissen*.] A knowing of a thing along with another or others; joint or twofold knowledge—the one of a divine law or rule felt in the heart, and the other of a man's own act; internal knowledge or judgment of right and wrong. — The moral sense; the faculty within us by which our actions are tried and judged by the divine law or standard, either revealed or written in the heart, and by which they are instantly approved or condemned. The estimate or determination of conscience; justice; honesty; real sentiment; private thoughts; truth.

(*Ethics.*) According to its ancient usage among the Latins, the word *conscientia* was primarily applied to being privy to, together with another; and in its secondary meaning it bore a moral signification, or knowledge of one's own conduct, whether right or wrong. The modern use of the word is more extensive in its sense, denoting not only what the Latin moralists signified by it, not only the sense of the difference between right and wrong in our own and others' conduct, but containing likewise the important element of the feeling of human responsibility. Thus conscience, as it is at present accepted, is not only applied to the moral judgment which accompanies all moral actions, as to whether they are right or wrong, but it denotes, besides, that feeling of approbation or disapprobation, of rectitude or contrition, which invariably accompanies all moral

actions. Thus a judgment and an emotion lie at the root of what is known as the conscience; for not only are men accustomed to say, "My conscience cannot prove of such and such conduct," but they likewise are to being disturbed by certain "qualms of conscience" on occasion of any violation of rectitude, either in their own or in others' experience. Thus conscience and the moral faculty mean almost the same thing; although the former, as it is unquestionably the more ancient term, so it seems to be the one which is ordinarily employed in common conversation instead of its heavier and more learned rivals of the moral sense, the moral nature, and so forth. Nearly all writers are agreed to the existence of some sort of a conscience in human nature, whether or not they are prepared to subsume to the moral faculties, and moral senses, and moral natures of other writers. The ethical philosopher, of course, is bound to inquire into the nature of the distinction between right and wrong in human conduct, and into the complexion and character of those feelings with which right and wrong are contemplated by man, but conscience, in so far as it is a portion either of ethical or of the practical conduct of man, merely requires ascertain that there is such a principle as right and wrong in human nature, and that there are such feelings as those of responsibility and of remorse, which approve or disapprove of human actions. As to the precise theory of the moral sentiments which may be maintained, or as to the exact criterion of morality which may be held, the inquirer into the nature of conscience as such, gives himself but little trouble. Suffice it say, that this principle in human nature has been analyzed into a judgment and an emotion; one gives himself little anxiety as to the ultimate origin of this judgment, or as to the final elements of which this affect may be composed. The unrepented pleasure, accordingly, of Socrates; the variously modified views of man's happiness of Plato and Aristotle; the mere reverence for morality or bare acts of duty of the Stoics; pleasure theory of Epicurus and his school; the human will and the Divine will of the schoolmen; the great happiness principle of Jeremy Bentham; the eternal fitness of Clarke; the refined view of the selfish system of Leibnitz, &c., are all views, more or less precise, more or less closely allied to the truth, of the real theory of our moral nature, be it what it may. The moral faculty or conscience is the supremely regulative principle of our constitution. Give the laws which govern activity free scope, the most beautiful harmony and propriety of conduct will ensue; violate these laws, and direct confusion in character and in conduct is the result.

Conscience. (*Courts of.*) In England, were courts for the recovery of small debts. They have been recently abolished, and replaced by the county courts, whose jurisdiction extends to the recovery of debts under £100.

Conscience, HENDRIK, a very distinguished Flemish novelist, B. at Antwerp, 1812. To gratify, as much as possible, his avidity for reading, C. became a private teacher, and was thus engaged when the Belgian revolution of 1830 broke out, upon which he entered the army, and served six years as a volunteer. An active military life had a wholesome effect on his dreamy disposition, and he became the poet of the army. His French songs, full of point and spirit, were very popular among his comrades. He was discharged in 1836, after having attained the rank of sergeant-major; but through a misunderstanding he quarrelled with his family, and was by turns a working gardener, an employee in the archives of Antwerp, and clerk to an academy of sciences. After quitting the military service, he allied himself to a party which had in view the establishment of a Flemish literature, in opposition to the French literature of the 18th century. To this task he devoted all his powers, and his first work, *The Year of Miracles*, published in 1837, contains a series of brilliant dramatic pictures of the Spanish rule in Flanders. It was received by the public with great favor. The success of this publication excited the resentment of his father, who renounced him completely; but, by the kindness of a friend, the painter Wappers, he obtained a small pension from Leopold II., which saved him from destitution, and enabled him to publish in 1837 another volume, *Phantasia*, a collection of Flemish poetry and legends; *Leeuw van Vlaender*, (the "Lion of Flanders,") a truly original work, which will sustain his reputation as a national romance writer. He appeared in 1838. In 1845 he obtained the appointment of Assistant Professor in the University of Ghent, where he instructed the royal children in the Flemish language and literature. C. has produced a variety of interesting sketches, illustrative of Flemish manners, such as *Evening Hours*; *The Executioner's Child*; *The New Man*; *The Conscript*; *The Poor Gentleman*; *Quintin Maes*; *Pages from the Book of Nature*; *Jacob van Arter*; *Blind Rosa*, &c., which have been translated into English, German, Danish and even the Italian. D. 1881.

Con'scienced, *a.* Having conscience.

Con'sciencedless, *a.* Having no conscience.

Conscien'tious, *a.* Governed by a strict regard to the dictates of conscience; regulated by conscience; scrupulous; just; exact.

Conscien'tiously, *adv.* According to the dictates of conscience; with a strict regard to right and wrong.

Conscien'tiousness, *n.* Quality of being conscientious; a scrupulous regard to the decisions of conscience; a sense of justice.

Con'scious, *a.* [*Lat. conscius*, from *con*, and *scio*, to know.] Knowing something along with another or others, or by one's self; self-knowing; possessing the faculty or power of knowing one's own thoughts or operations.

"Matter is not conscious of its own existence."—*Bentley*.

Knowing from memory.

"The damsel then to Tancred sent,

Who, conscious of th' occasion, feared th' event. — Dryden.

knowing by consciousness, or internal perception or persuasion; appraised; aware; sensible.

"The queen was conscious to herself that he had been encouraged by her." — Clarendon.

(n'sciously, adv.) In a conscious manner.

(n'sciousness, n.) [Fr. *conscience*; Ger. *bewusstsein*.] State of being conscious; knowledge or perception of what passes in one's own mind. The act of the mind which makes known an internal object. Internal sense — knowledge of guilt or innocence.

(Philo.) *C.* is the recognition by the mind of its own acts. While it is thus a comprehensive term for the complement of all our mental energies, it, nevertheless, on its high generality, cannot at all be defined. It is elementary that it is impossible to resolve it into any notion more simple than itself. But while *C.* cannot logically be defined, it may still be philosophically analyzed. The forms under which this condition of all thinking operates, are: *I know that I know, I know that I feel, and I know that I desire*; or, in other words, *I am conscious that I know, feel, and desire*. And while this so, the act necessarily involves, 1. a knowing mind; 2. a known object; 3. a recognition by the mind of its object. It accordingly appears that *C.* and knowledge mutually involve each other; they are not opposed as actually diverse. It is somewhat remarkable, that a term all ways so important and convenient, should have escaped the subtle Greeks and the rhetorical Latins, and at it should have been reserved for Descartes, a Frenchman, to introduce the term *conscientia*, or consciousness, in its modern signification. An instance or two of the modern use of the word may, no doubt, be found in Quinian and the Latin fathers; but no consistent adoption it is to be met with before the time just specified. Among the Romans, if two individuals or more had a common knowledge of some circumstance, such a knowledge was called *conscientia*, (or *con-scio*.) *knowledge together with*; but, except this, the term was always employed in a moral sense, as equivalent to our word *conscience*. The general conditions that attach to *C.* in its modern acceptation, are obvious and palpable: 1. That a knowledge which it implies is actual, and not merely potential. For example, if I say of my friend that he knows the shape of the dome of the Capitol in Washington, that it is round, and not square, I mean that he is not conscious of the fact at the present moment, but that he may be rendered conscious of it by giving his attention drawn to the circumstance. We are, in truth, conscious only of the present. 2. The knowledge which it implies is immediate, and not distant. Thus, while I am conscious of the dome of St. Paul's while I look at it, I am unconscious of it when it is out of my mind, having to ransack the arcana of memory to bring it up into consciousness as often as I wish to recall it. Again, in the third place, I am only conscious in so far as I am conscious of some definite object, contrasted either with no object, or with another object different from the present one in its qualities and modifications. Thus, suppose I am conscious of the ink at which I write, I am only so as taking the present ink in contrast with some other supposable desk, such one of a banking-house, at which several men write the same time. In the fourth place, there is always judgment in every act of consciousness, or the affirmation or negation of one thing being or not being, having, or wanting the qualifications of another. We cannot, in truth, discriminate without judging; so that this fourth condition might stand as a corollary to the third. Every act of mind, in truth, implies a judgment, as every act of consciousness implies an act of affirmation or negation. The fifth undeniable act of consciousness is memory; for I cannot be conscious of an object without discriminating it from another state of mind to which the present one was only a successful phenomenon. I distinguish all the separate acts of consciousness, I can only distinguish them by the aid of memory. I can only discriminate them by the help of judgment. As the fourth condition of *C.*, this one holds the position of being a second corollary to the third. Leibniz truly has remarked, in his *Nouveaux Essais* (lib. ii. 7, s. 13), that "if our immediate internal experience is not certain, there can be no truth of fact of which we can be assured." All speculators agree in this, both optical and dogmatical. But not only is consciousness evidence and authority of all legitimate speculation; likewise the source and spring from which it flows, the criterion of philosophy, it must be clear and unalterable; and hence, there emerge three great laws that regulate its legitimate development. These are: 1. that it be charged with no fact but what is simple and ultimate; 2. that all the facts ascribed to consciousness be taken without reserve in coming to any conclusion; and 3. that nothing but the facts, or what these imply, be accepted as legitimate in any process of inquiry. As one illustration of the fertility of acceptance or of rejecting these leading laws, may be mentioned a circumstance, that on the duality or unity of the fact of consciousness hangs altogether the entire system of speculation which any inquirer may adopt. In saying that *I perceive a stone*, I do not recognize that there are two independent objects in this act, my perceiving mind, and the stone which I perceive, as two separate independent existences, but maintain, with Berkeley, Fichte, and Ferrier, that what seems a stone is really a stone, but only a *mode* of my mind or of another mind, then I deny the duality of the substances, and assert their unity. And if I do so, I deny

the doctrines of realism, and accept those of idealism, and, possibly, of pantheism.

Con'script, a. [Lat. *conscriptus*, from *conscribo* — *con*, and *scribo*, to write.] Written down together; registered; enrolled.

Conscript Fathers (patres conscripti), in Roman antiquity, was an appellation of the senators, from their names being registered together.

—*n.* One enrolled to serve as a soldier in the army. See CONSCRIPTION.

Con'scription, n. [Lat. *conscriptio*.] An enrolling or registering; a compulsory enrolment of individuals for military or naval service. — The *C.* in the Roman commonwealth was made, not by lot, but by arbitrary selection by the consuls from among the bulk of the citizens when a levy was required. In France, the *C.* was established during the Revolution, before which period the armies of that country had been recruited by voluntary enlistment. The word is first used in a law of 1798. According to the law as at present established, all citizens are liable to the *C.* at the age of 20. Each arrondissement has its contingent allotted to it out of the total number required for the service, and this number is filled up by lot from the youths liable to the *C.* There are, however, various claims for exemption recognized by the law. A similar system was occasionally resorted to in this country, during the civil war.

Con'sceon, in Canada W., a post-village of Prince Edward co., abt. 22 m. W. of Belleville, and 15 m. from Brighton; pop. abt. 350.

Con'secrate, v. a. [Lat. *consecro*, *consecratus* — *con*, and *sacro*, from *sacer*, sacred; Fr. *consacrer*.] To make or declare to be sacred. — To appropriate to sacred uses; to set apart, dedicate, hallow, or devote to the service of God. — To canonize.

Con'secrate, a. Sacred; devoted; consecrated.

"That consecrate place." — Milton.

Con'secrated, p. a. Made sacred; separated from a common to a sacred use; dedicated to the service of God.

"That consecrated roof." — Shaks.

Con'secratedness, n. State of being consecrated.

Con'secrator, n. Same as CONSECRATOR, *q. v.*

Con'secrating, ppr. or a. Making sacred; appropriating to a sacred use; dedicating to the service of God; devoting.

Consecra'tion, n. Act of consecrating, or of separating from a common to a sacred use, or of devoting and dedicating a person or thing to the service and worship of God. — Canonization.

(Eccles.) A newly-built church is consecrated with certain ceremonies, varying in different communities. The admission of a bishop to his office is called his *consecration*.

Con'secrator, n. One who consecrates.

Con'secratory, a. That makes sacred. (R.)

Con'sectane'ous, a. [Lat. *consectaneus*. See INFRA.] That follows of course.

Con'sectary, a. [Lat. *consecrarius*, from *consecrari*, to follow after eagerly, from *con*, and *secri*, to follow eagerly, from *sequi*, *secutus*, to follow.] Consequent; consequential; following by consequence. (R.)

Con'sectary, n. Deduction from premises; consequence; corollary.

Consecu'tion, n. [Lat. *consecutio* — *con*, and *sequor*, *secutus*, to follow.] A following of one thing after another; a following or sequel; train of consequences or deductions; succession.

Con'secutive, a. [Fr. *consécutif*; It. *consecutivo*.] Following in train; succeeding one another in a regular order; successive; following; consequential; succeeding.

"The actions of man, consecutive to volition." — Locke.

Con'secutively, adv. By way of consequence or succession.

Con'secutiveness, n. Quality of being consecutive.

Consequi'na, or QUESIGUINA, in Central America, a volcano of Nicaragua, on the E. side of Conchagua Gulf. Its height is abt. 4,000 feet from the mean level. The last eruption occurred in January, 1835.

Con'senes'cence, Con'senes'cence, n. [From Lat. *conesenscens*, ppr. of *conesenscere*, to grow old together, from *con*, and *senescere*, to grow old.] Decay, in all parts, through age.

Con'sensual, a. [Lat. *consensus*, to agree.] (Civil Law.) A contract is *consensual* when completed by the consent of the parties merely, without any further act.

(Physiol.) When one motion gives rise to the production of another motion contrary to or independent of the will, the latter is called a *consensual movement*; as, *e. g.*, the contraction of the iris when the eye is voluntarily directed inwards.

Consent, n. [Lat. *consensus*. See the verb.] A sense or feeling in unison with that of another. — An agreement or yielding of the mind or will to what is proposed; accord of minds; unity of opinion or sentiment; agreement; harmony; sympathy; concord; assent; acquiescence; concurrence; joint operation.

(Law.) *C.* is implied in every agreement. It supposes a physical power to act, a moral power of acting, and a serious, determined, and free use of these powers. *C.* is *express*, when directly given, either *viva voce* or in writing. It is *implied*, when manifested by signs, actions, or facts, or by inaction or silence, which raise a presumption that the *C.* has been given.

—*v. n.* [Lat. *consentio* — *con*, and *sentio*, to discover by the senses, to think, to feel; Fr. *consentir*.] To think in unison with another; to be of the same mind; to agree or accord; to harmonize. — To yield; to accede; to acquiesce; to assent; to comply; to allow; to admit; to grant; to concede.

Consentane'ity, n. Mutual agreement; consentaneousness.

Consenta'neous, a. Agreeable to; consistent with. **Consenta'neously, adv.** Agreeably; consistently; suitably.

Consenta'neousness, n. Agreement; consistence.

Consenter, n. One who consents.

Consent'ient, a. [Lat. *consentiens*.] Consenting; agreeing in mind; accordant in opinion.

Consent'ing, n. The act of one who consents. "Avoidable consentings." — Bp. Taylor.

Consent'ingly, adv. In a consenting manner.

Con'sequence, n. [Lat. *consequentia*, from *con*, and *sequor*, *sequens*, to follow.] That which follows from any act, cause, principle, or series of actions; an event or effect produced by some preceding act or cause; a result, or issue. — Inference; deduction; connection of cause and effect. — Importance; moment; distinction; as, a person of *consequence*.

"The anger of Achilles was of such consequence, that it embroiled the kings of Greece." — Addison.

(Logic.) The conclusion of a syllogism, or that which results from the premises.

Con'sequent, a. [Fr., from Lat. *consequens*.] Following, as the natural effect.

(Logic.) Following by necessary inference or rational deduction.

—*n.* That which follows a cause; effect; result; consequence.

(Logic.) Inference; deduction; consequence. Used in opposition to *antecedent*.

(Math.) The second term of a ratio.

Con'sequent'ial, a. Following as the effect or consequence. — Assuming the air of a person of consequence; vainglorious; conceited; pompous.

(Log.) Having the consequence justly connected with the premises; conclusive.

Con'sequent'ially, adv. With just deduction of consequences; by consequence; not immediately; eventually.

—With assumed importance; with conceit.

Con'sequent'ialness, n. Quality of being consequential.

Con'sequent'ly, adv. By consequence; in consequence of something; according; therefore.

Con'sequentness, n. Regular connection of propositions; consecution of discourse.

Con'sertion, n. [Lat. *consertio*, from *conserere*, *consertum*, to join together, from *con*, and *serere*, to join.] Junction; adaptation. (R.)

Con'servable, a. That may be kept or preserved from decay or injury.

Con'servancy, n. [L. Lat. *conservantia*, from Lat. *conservans*, from *conserro*, to preserve.] Conservation; preservation.

Con'servant, a. Lat. *conservans*.] Preserving; having the power or quality of preserving from decay, or destruction.

Con'servation, n. [Fr., from Lat. *conservatio*.] Act of conserving or preserving, guarding, or protecting; preservation; the keeping of a thing in a safe or entire state.

Con'servational, a. That tends to preserve; preservative. (R.)

Con'servatism, n. [For *conservativism*, from *conservative*.] (Polit.) The principles of the conservative party.

Con'servative, a. Preservative; having power to preserve in a safe and entire state, or from loss, waste, or injury. — Adhering to existing institutions; opposed to political changes.

—*n.* (Polit.) One who aims to preserve from ruin, innovation, injury, or radical change; one opposed to political changes in the state or government.

Con'servatoire, n. [Fr., from It. *conservatorio*.] A name given to schools instituted for the purpose of advancing the study of music, and maintaining its purity. The most celebrated is the French *C. de Musique*, founded in Paris, 1784. The course of study is divided over 66 different classes, in which all appertaining to music and also declamation is taught by the best masters. The elementary works published by this *C.* for all instruments are known over the whole world. Next to the *C.* of France come those of Milan, Warsaw, Prague, Brussels, and Vienna, which last was established in 1816. In 1842, a *C.* was established in Leipsic, under the auspices of Mendelssohn, which is reckoned the most important in Germany at the present day. In Cologne a similar *C.* was founded in 1849.

Con'servator, n. [Lat.; Fr. *conservateur*.] A preserver; one who preserves from injury or violation.

(Law.) A guardian. (So used in Connecticut.)

Con'servatory, n. A place for preserving anything in a state desired.

(Hort.) A glass house for the reception of tender plants that require protection from the weather. A conservatory requires a little artificial heat from a stove placed within it in winter only; and this constitutes the chief point of difference between the conservatory and hot-house, which is heated by pipes, and an apparatus for the transmission of hot air, throughout the year, as well as by a bark-bed. Conservatories are often rendered an ornamental feature in a building when attached to it, and connected with one of the principal apartments, or forming the entrance.

—A gratuitous school of music and declamation. See CONSERVATOIRE.

Con'servatrix, n. [Lat.] A woman who preserves from injury, &c.

Con'serve, v. a. [Fr. *conserver*; Lat. *conserro* — *con*, and *serro*, to save, to preserve, to keep.] To keep together; to keep in a safe or sound state; to save; to

preserve.—To defraud.—To candy or pickle for preservation.

Con'serve, *n.* That which is conserved, or preserved, particularly fruits, by means of sugar, &c.; a preserve.

Conserv'er, *n.* One who conserves or preserves; one who prepares preserves.

Conschock'en, *n.* In Pennsylvania, a borough of Montgomery co., on the Schuylkill river, 13 m. N. W. of Philadelphia. *Pop.* about 6,200 in 1897.

Consid'er, *v. a.* [Fr. *considérer*; Lat. *considero*, from *con*, and the root *sid*, allied to Gr. *eidō*, *ido*, to see, to perceive, to know.] To look at closely, earnestly, carefully; to observe and examine; to view with care and attention; to fix the mind on; to reflect or meditate on carefully; to weigh; to ponder; to revolve; to study; to contemplate.—To have respect or regard to; to respect or regard; to take into view or account.

—*v. n.* To think seriously, maturely, or carefully; to revolve in the mind; to deliberate; to reflect; to ponder.

Consid'erable, *a.* [Fr. *considérable*.] That may be considered; worthy of consideration.—Worthy of regard, respect, or attention.—Deserving of notice; of some distinction.—Important; valuable.—Moderately large; not small; more than little.

Considerableness, *n.* Importance; dignity; moment; value; desert; a claim to notice.

"By being heirs, they acquire a *considerableness*, and are forcibly imposed upon the company."—*Govt. of the Tongue*.

Considerably, *adv.* In a degree deserving notice; in a degree not trifling or unimportant.

Considerance, *n.* [Lat. *considerantia*; Pr. *consideransa*; It. *consideranza*.] Quality of being considerable. (*R.*)

Considerate, *a.* [Lat. *consideratus*, from *considero*. See *CONSIDER*.] Given to consideration, or to sober reflection; circumspect; careful; thoughtful; serious; prudent; deliberate; moderate.

"The expediency may appear to every *considerate* man."—*Addison*.

Considerately, *adv.* In a considerate manner.

Considerateness, *n.* The quality of being considerate; prudence.

Consideration, *n.* [Lat. *consideratio*.] Act of considering; mental view; mature thought; serious deliberation.

"Let us think with *consideration*, and consider with acknowledging, and acknowledge with admiration."—*Sidney*.

—Contemplation; meditation upon any thing; as, "the *consideration* of her virtues."—*Sidney*.

—Importance; claim to notice; worthiness of regard; respect; as, "an author of *consideration*."—*Addison*.

—Motive of action; ground of conduct.

"He was obliged, antecedent to all other *considerations*, to search an asylum."—*Dryden*.

—Equivalent; compensation.

"We are provident enough not to part with any thing serviceable to our bodies under a good *consideration*, but make little account of our souls."—*Ray*.

(*Law*.) The material cause of a contract, without which it is not binding on the party. *C.* is said to be either *expressed* or *implied*. An *express C.* is where the motive or inducement of the parties to the contract is distinctly declared by its term, as where a man bargains to sell his land for \$100. It is *implied*, where an act is done, or a legal demand forborne, at the request of another, without an express stipulation; in which case, the law presumes an adequate *C.* for the act or forbearance to have been the inducement of the one party, and the offer of the other; as where a person comes to an inn and makes use of it, intention to pay for the accommodation is presumed. *C.* is also either *valuable*, that is, for money or an equivalent; or it is of *natural affection*, certain degrees of relationship affording in some cases sufficient consideration for a gift.

Considerator, *n.* One who considers or reflects. (*R.*)

Considerer, *n.* A man of reflection; a thinker.

Consider'ing, *prep.* Taking into account or consideration; making allowance for.

—*n.* The act of pondering or reflecting; thought; reflection.

Consideringly, *adv.* With consideration or deliberation.

Consign', *v. a.* [Lat. *consigno*—*con*, and *signo*, from *signum*, a sign, seal, or mark.] To deliver over to another by a formal agreement; to transfer; to give in trust; to commit, as a charge or trust; to intrust; to give, grant, or deliver; to commit; to deposit.

Consign'ature, *n.* [O. Fr.] A full or joint signature or stamping.

Consigne, (*kōng'sin*), *n.* [Fr.] (*Mil.*) Countersign; watchword; a sentinel.

Consignee, *n.* [Fr. *consigné*, pp. of *consigner*.] One to whom a consignment is made.

Consign'er, *n.* One who consigns; a consignor.

Consignificant, *a.* Expressing joint signification.

Consignification, *n.* [Lat. *con*, Eng. *signification*, *q. v.*] Joint signification.

Consignificative, *a.* [Lat. *con*, and Eng. *significative*, *q. v.*] That has the same meaning.

—*n.* A word, syllable, or character which has the same signification as some other.

Consignify, *v. a.* [Lat. *con*, and *significare*, from *signum*, a sign, *facere*, to make.] To mark or denote in connection with something else.

Consign'ment, *n.* Act of consigning; the thing consigned.

(*Com.*) Goods sent or delivered to a factor for sale.—The writing by which anything is consigned.

Consignor, *n.* One who makes a consignment.

Consign'ence, *n.* [Lat. *con*, and *salire*, to leap.] Coincidence; concurrence.

Consim'ilar, *a.* [Lat. *con*, and Eng. *similar*, *q. v.*] That has a common resemblance. (*R.*)

Consimil'itude, *a.* [Fr. *consimilitude*. See *SIMILITUDE*.] Joint resemblance; similitude. (*R.*)

Consist', *v. n.* [Fr. *consister*; Lat. *consisto*—*con*, and *sisto*, to cause to stand, from *sto*, to stand; Gr. *histēmi*, to cause to stand; Sans. *tisthāmi*, from *stā*, to stand.] To stand or stay together; to be in a fixed or permanent state, as a body composed of parts in union or connection; to subsist; to remain coherent; to be comprised; to lie; to be composed or made up; to co-exist; to be compatible; to agree.

Consist'ence, **Consist'ency**, *n.* [Fr. *consistance*.] A standing or staying together; a being fixed in union; that state of a body in which component parts remain fixed.—A degree of density; substance; make.—Firmness of constitution; agreement or harmony of parts; agreement or harmony with one's self, or with itself; congruity; uniformity; accordancy.

Consistent, *a.* [Fr. from Lat. *consistens*.] Standing or staying together; fixed; firm; not fluid; not contradictory; compatible; congruous; suitable; uniform; accordant; consonant; conformable.

Consistently, *adv.* In a consistent manner.

Consisto'rial, **Con'sistory**, *a.* Pertaining or relating to a consistory.

Consisto'rian, *a.* Relating to an order of Presbyterian assemblies. (*R.*)

Consisto'rinn, *n.* [Lat.] See *CONSISTORY*.

Con'sistory, *n.* [Lat. *consistorium*, from *consisto*; Fr. *consistoire*.] An assembly of ecclesiastical persons; also certain spiritual courts holden by the bishops in each diocese. At Rome the consistory denotes the judicial court constituted by the college of cardinals. The representative body of the reformed church in France is styled consistory.

Conso'ciate, *v. a.* [Lat. *consocio*, *consociatus*—*con*, and *socius*, a companion.] To unite or join together; to associate; to cement or hold in close union.

—*v. n.* To unite; to coalesce.

—*n.* A partner; an associate. (*R.*)

Conso'ciation, *n.* Act of consociating; intimate union of persons; association; fellowship; alliance; companionship; union of things.

—In the U. States, a union of Congregational churches by their pastors and delegates; an ecclesiastical body or convention.

Conso'ciational, *a.* That relates to a consociation.

Conso'latable, *a.* That may be consoled or comforted.

Conso'lation, *n.* [Fr., from Lat. *consolatio*, from *consolor*, *consolatus*. See *CONSOLE*.] A consoling or soothing; solace; comfort; alleviation of misery or distress of mind; refreshment of mind or spirits; that which comforts; the cause of comfort.

Conso'lation, in Kentucky, a post-village of Shelby co., about 41 m. E. of Louisville.

Conso'la'to del Ma're, *n.* [It., the consulate of the sea.] (*Marit. Law*.) A code of sea-laws compiled by order of the ancient kings of Aragon. This code has been translated into every language of Europe, and was reprinted, Paris, 1831, in the collection of *Lois maritimes*, by J. M. Pardessus; a collection of sea-laws which is very complete.

Con'solator, *n.* [Lat.; It. *consolatore*; Fr. *consolateur*.] One who consoles; a comforter. (*R.*)

Conso'latory, *a.* [Lat. *consolatorius*.] Tending to give solace, consolation, or comfort; refreshing to the mind; assuaging grief.

Console', *v. a.* [Fr. *consoler*; Lat. *consolor*—*con*, and *solor*, to comfort, to solace. See *SOLACE*.] To give solace to another; to comfort; to cheer the mind in distress or depression; to alleviate grief; to soothe; to encourage; to support.

Con'sole, *n.* [Fr., from Lat. *consolidare*, to make firm or solid—*con*, and *solidus*, solid.] (*Arch.*) A richly ornamented bracket in the form of a corbel (see *CORBEL*),

Fig. 667. — CONSOLE.

fastened to a wall to form a support for busts, statuettes, candelabra, &c., or used to support a cornice as a modification.—The name console-table is applied to a semicircular table projecting from the wall, and supported on brackets terminating in a solid foot, or fixed to the wall. There are other forms of console-tables, but this is the most common.

Consol'idant, *a.* [Lat. *consolidans*, ppr. of *consolidare*; Fr. *consolidant*.] That tends to consolidate.

Consol'idate, *v. a.* [Fr. *consolider*; Lat. *consolido*, *co*, *solidatus*—*con*, and *solidus*, solid.] To make wholly so or firm; to press together loose or separate parts a form a compact mass; to harden or make dense a firm; to unite into one; to unite parts that have been separated; to compact; to compress; to combine.

—*v. n.* To grow solid; to grow firm and hard; to unite and become solid.

—*a.* Consolidated. (*R.*)

Consol'idated, *p. a.* Made solid, hard, or compactly united.

Consolida'tion, *n.* Act of consolidating; state of being consolidated; solidification.

Consol'idative, *a.* [Fr. *consolidatif*; Pr. *consolidatif*. Sp. and It. *consolidativo*.] (*Med.*) A consolidating medicine. — *Bailey*.

Con'sols, *n. pl.* [From *CONSOLIDATE*. Fr. *consolid*.] The chief English funded government security form of the three per cent. consolidated annuities: i. e. annuities payable to bond-holders by way of interest their deposits in the public funds, and bearing interest at par of three per cent. (They are colloquially termed in England the *three per cents*.)

Con'sonance, **Con'sonancy**, *n.* [Fr., from *I consonantia*—*con*, and *sono*, *sonans*, to sound.] Agreement; consistency; unison; congruity; suitability. (*Mus.*) A sounding together or in unison; accord; agreement of simultaneous sounds; concord; harmony.

Con'sonant, *a.* [Lat. *consonans*.] Having agreement or consistency; congruous; suitable;—usually preceded with or to; as, *consonant* to nature. (*Mus.*) Composed of consonances; accordant; harmonious.

—*n.* A letter sounded along with a vowel, and which is not sounded by itself. (*Physiol.*) A breath, or sound produced in the larynx which suffers more or less interruption in its passage through the vocal tube.

Consonantal, *a.* Relating to, or partaking of the nature of, a consonant.

Con'sonantly, *adv.* By consonance; consistently; agreement.

Con'sonantness, *n.* Consistency; congruity; state of being consonant or harmonious.

Con'sonous, *a.* [Lat. *consonus*.] Agreeing in sound; symphonious.

Con Sord'ni. [It., with deafness.] (*Mus.*) A direct to perform a passage, if on a pianoforte, with the fingers down, or on a violin with the mute on; it is usually written short, *C. S.*

Con'sort, *n.* [Lat. *consors*—*con*, and *sors*, *sortis*.] He, she, or that which shares the same lot with another; a companion; a partner; an intimate associate; a husband;—applied in a modern sense chiefly to sons of royal degree or position, in countries where women are able to reign; as, a queen-consort; a prince-consort; i. e. the wife of a reigning monarch, or spouse of a queen-regnant.

(*Naut.*) A term applied to a ship sailing in company with another.

(*Eng. Law*.) The queen consort, the wife of the reigning king, is, in all legal proceedings, looked upon as a single, not as a married woman. She may purchase, convey lands, grant leases, and do other acts of ownership without the intervention of the king. She also sue and be sued in her separate person, and possesses courts and officers distinct from those of the king. She pays no toll, and is free from any fine which a husband could impose upon women in general; but in other respects she is on a similar footing with the other subjects of the king. In her life and person, however, she is under the same protection as the king, it being high treason to design the death of either. The husband of a queen-regnant is not endowed by the constitution with any distinctive rights or privileges. All his privileges, honors, therefore, must emanate from the crown, in the form of warrant, grant, patent, &c., or else be conferred by act of parliament introduced after a message on the subject. Up to 1857, when the title Prince Consort was bestowed upon him by letters-patent, the late Prince Albert possessed no distinctive title, no place in court ceremonial but such as was accorded to him by courtesy.

—*v. i.* To partake of the same lot with another; to be in company; to keep company with; to associate;—preceding with; as, to *consort* with bad company.

—*v. a.* To unite or join, as in affection, marriage, company, &c.

Con'sortship, *n.* State or condition of a consort in fellowship.

Con'sonud, *n.* (*Bot.*) See *SYMPHITUM*.

Con'specific, *a.* Belonging, or pertaining to, the same species.

Con'spec'tus, *n.* [Lat.] A synopsis, epitome, or general sketch of any subject.

Conspicu'ity, *n.* Brightness; clearness of comprehension to the vision.

Conspic'uons, *a.* [Lat. *conspiciuus*, from *conspicere*, and *specio*, to see.] Visible; open to the view; obvious to the eye; easy to be seen; apparent; manifest; clearly perceived or understood mentally; prominent; eminent; illustrious; distinguished; as, a *conspicuous* fault, or virtue.

Conspic'uously, *adv.* In a conspicuous manner; prominently.

Conspic'uonsness, *n.* State of being conspicuous; openness or exposure to the view; a state of being visible at a distance.

—Eminence; distinction; celebrity; renown.

"Their writings attract more readers by the author's *conspicuousness*."—*Boyle*.

Conspir'acy, *n.* [Fr. *conspiration*; Lat. *conspiratio*, *conspiro*, *conspiratus*. See CONSPIRE.] A plot; a cabal; a confederacy; a combination committed to an evil or nefarious purpose; as, "faction and conspiracy." *Dryden*.

—**concurrance**; a general tendency of two or more causes to an event; as, "morbific conspiracy." — *Harvey*. (*Law*.) In the strictest sense, an agreement of two or more persons falsely to indict one, or procure him to be indicted for felony; who, after his acquittal, may have a writ of conspiracy. In a more general sense, many species of combinations to injure another are termed *conspiracies*; as to procure one to be arrested, to defraud under certain circumstances, &c. C. is an indictable offence; and two at least of the persons indicted must be found guilty to produce conviction, as otherwise the offence is not proved against any one.

Conspiration, *n.* [Fr.] An agreement of two or more persons for one end or object: conspiracy. — *Harvey*. (R.)

Conspirator, *n.* [Fr. *conspirateur*.] One who conspires; one who engages in a plot or conspiracy.

Conspire, *v. i.* [Lat. *conspiro* — *con*, and *spiro*, to breathe, to blow; Fr. *conspirer*.] To agree together; to conspire; to plot; to confederate; to combine for some evil purpose; to hatch treason, sedition, or rebellion; as, to conspire against the state.

—**concur** or **tend** to one end; as, all things conspire to make you happy.

"The press, the pulpit, and the stage,
Conspire to censure and expose our age." — *Roscommon*.

—**to combine** to a certain end; to hatch a plot; to conspire in; as, to conspire one's death.

Conspirer, *n.* A conspirator; one who conspires; a traitor.

"Where conspirers are,
Macbeth shall never vanquished be." — *Shaks.*

Conspiringly, *adv.* By, or after the manner of a conspiracy.

Constable, *n.* [Fr. *connétable*; O. Fr. *conestable*; *comes stabuli*.] In the Middle Ages, an officer under a European crown, who had the command of the army, and the cognizance of military matters, and who was judge of the court of chivalry; as, the Constable of France, Lord High Constable of England, Constable of the Tower of London, &c.

(*Eng. Law*.) A police officer or person placed in charge of the public peace; more properly applied, at the present time, to a petty officer who keeps the peace in a particular rural district.

(*Am. Law*.) In the U. States, generally, a petty officer whose duties include a limited judicial power as a conservator of the peace, a ministerial power for the service of writs, &c., and some other duties not strictly applicable to either of these heads. They are authorized to arrest, without warrant, on a reasonable suspicion of felony, for offences against the peace committed in their presence, and in various other cases.

Constable, JOHN, a distinguished English landscape painter, b. in Suffolk, 1776. Among his best works are *Valley Farm*, in the Vernon Gallery, and the *Corn Field*, in the National Gallery, England. D. 1837.

Constable, in *New York*, a township of Franklin co.; alt. 1,546.

Constabulary, *n.* See CONSTABULARY.

Constableness, *n.* State or office of a constable.

Constableville, in *New York*, a post-village of Lewis co. alt. 138 m. N.W. of Albany.

Constabewick, *n.* Jurisdiction of a constable.

Constabulary, **Con'stabulary**, *n.* [Lat. *constabularius*.] The body of constables at large; as, the Irish constabulary.

—**certaining to**, or consisting of, constables.

Constant, (*Ger.* *Konstanz*, or *Konstanz*; anc. *Constantia*.) A city of the grand-duchy of Baden, the capital of the circle of the Lake, situated on the Lake of Constance, 35 miles from Zurich. It is the see of a bishop, contains an old episcopal castle, with a cathedral church, in which are several fine specimens of Gothic architecture. *Manuf.* Silk and cotton goods, and watches. The house where Huss was arrested, and where there is a bust of him, is still shown. The annexation of C. to the Austrian dominions took place in 1549, and to Prussia in 1805. *Pop.* 7,000.

Council of, (*Ecl. Hist.*) A celebrated council held at the above city, between 1414 and 1418. It was convened at the request of the emperor Sigismund to put an end to the great schism in the Church arising from the contest between John XXIII., Gregory XII., and Benedict XIII., for the papal chair; and also to pre-empt the spread of the doctrines of John Huss. There assembled, besides the emperor and Pope John XXIII., twenty-six princes, one hundred and forty cardinals, twenty cardinals, seven patriarchs, twenty archbishops, ninety-one bishops, six hundred prelates and monks, and about 4,000 priests. This council deposed three rival popes, and elected Martin V. as head of the Church, and tried and condemned to the stake both John Huss and Jerome of Prague.

C. lies between Suabia and Switzerland, and is crossed from E. to W. by the Rhine. *Ext.* 42 miles with an extreme breadth of 9. *Area*, 200 sq. m. *N.W.* it divides into two branches, each about 14 m. in length. It is subject to the phenomenon of only rising and falling, and only freezes when the winds are very severe. Its banks, which are very fertile, are also remarkable for the many picturesque views they present.

Constantine, in *Kentucky*, a post-office of Boone co.

Constantancy, *n.* [Lat. *constantia* — *con*, and *sto*, *stands*, to stand.] A standing or holding firmly, fixedly, or

steadily; immutability; unalterable continuance; a permanent state; stability; as, the *constantcy* of creation. — *Firmness*; *fixedness*; *steadiness*; *steadfastness*; *persevering resolution*; *enduring or lasting affection*; as, *constantcy* of purpose.

Constantius I., FLAVIUS JULIUS, one of the sons of Constantine the Great, and his successor in the sovereignty of Africa, Italy, and Western Illyricum, A. D. 337. His brother Constantine endeavored to dispossess him of it, but being defeated and slain in the attempt, C. became master of the whole empire. His conduct was, however, so offensive to the people, that the standard of revolt was hoisted, and Constantius was put to death, A. D. 350.

Constant, *a.* [Fr. from Lat. *constans*.] Firm; fixed; steadfast; steady; unvaried; unchanging; permanent; unalterable; immutable; unshaken.

"Both loving one fair maid, they yet remained constant friends." *Sidney*.

(*Math.*) Applied to a quantity which remains the same for all cases of the problem, in opposition to a variable. Thus, in questions about the fall of bodies in given times, the force of gravity is a C. quantity. In the integral calculus, the name of C. is given to those quantities which, after integration, are annexed to the integral. — *Math.* That which remains unchanged or invariable.

(*Math.*) A quantity which remains the same throughout a problem.

Constant, DE REBECQUE, BENJAMIN. There are few names in the political and literary history of France, since the first revolution, which present us with a more curious subject of speculation, than that of Benjamin Constant; but the leading facts of his career, and a very summary judgment upon them, is all that we can give here. He was the descendant of a French family, denaturalized by the Edict of Nantes, and was b. in Lausanne, 1767. He came to Paris in the heat of the revolutionary period, and his philosophical spirit led him into alliance with the most talented men of that period. In 1796 he brought himself into notice by a work entitled, *De la Force du Gouvernement Actuel de la France et de la Nécessité de s'y Rallier*, being an appeal in support of the Directory. The year following he claimed the rights of a French citizen, and procured a degree which restored the descendants of the religious exiles of France to their proper country; increasing his literary fame about the same period, by his treatises on political reaction, and on the effects of terror. Though an influential member of the political circle, C. was not called upon to exercise any public function until the ascendancy of Napoleon was established, when he became a member of the tribunate, and aspiring to lead the opposition, was ordered to quit France in 1802. Madame de Staël, with whom he was politically connected, being ordered into exile at the same time, they left the capital together, and travelled over many parts of Europe, at length fixing their abode in Germany, where they cultivated an acquaintance with its rising literature, and enjoyed the intimacy of Schlegel. It was here that C. wrote his famous work *On the Spirit of Conquest and Usurpation*, his tragedy of *Wallenstein*, &c.; and besides courting the Muses, contrived to form an alliance with the daughter of the Prussian minister, Prince Hardeburg. On the fall of Napoleon, in 1814, C. returned to Paris, and not only advocated the alliance of the Bourbons, as he hoped, with the institutions achieved by the people, but denounced in bitter language the conqueror, who was even then returning to reclaim his authority. By whatever arguments he was won over to the cause of Napoleon — and there is reason to believe they have no stain on his patriotism — this singular politician figured as a counsellor of state during the hundred days, and though he quitted France at the crisis of the second restoration, he appeared again as a deputy under Louis XVIII. B. Constant, Manuel, and Lafayette, in the chamber of representatives (1819), boded no good to the royalists, and the murder of the Duc de Berry, followed by the discussion of the electoral laws, was the signal for a new conflict, and for that brilliant opposition which ended in the revolution of 1830. During this interval, B. Constant, besides taking a leading part in the discussions of the chambers, contributed many political and other works to the literature of his country; and was also actively engaged as one of the editors of *The Minerva*. The presumed cause of his death, which happened within six months after the abdication of Charles X., was the fatigue and exposure which he underwent during the tumults of July; and it is singular to add, that he closed his career by accepting favors from Louis Philippe. The problem for the biographer is to reconcile his loyalty to constitutional principles, and his cosmopolitan views with his versatile conduct as a politician. We are inclined to believe that he was *trustful* beyond what would be esteemed political propriety, and *hoped*, it may be, too much. Hence he was disposed to accept the *fait accompli*, and make the best of it, and only when his too generous expectations were disappointed, commenced those chivalrous attacks which appear so extraordinary in contrast with his liaisons in the camp of the enemy. His philosophical refinement, his dramatic tastes, and his high sense of honor when placed on a side, in the scale of royalty, as it was natural they should be, weighed too much against his political sagacity, on the other. His romance of *Adolphe* exercised a great influence on the youth of his time.

Constantia, (*kon-stan'she-ä*.) *n.* A choice wine grown in S. Africa, Cape Colony. It much resembles sherry, and when obtained in a pure state, appears both as a white and a red wine, of an extremely smooth flavor and delicate bouquet. The vine whence it is derived originally came from Shiraz, in Persia. The quantity of this wine, when produced in the best years, does not exceed

22,000 imp. gallons; consequently, every season's growth is sold beforehand, and it is almost impossible otherwise to obtain it.

Constantia, in *New York*, a post-village and township of Oswego co., on Oneida Lake, alt. 115 m. W.N.W. of Albany.

Constantia, in *Ohio*, a post-office of Delaware co.

Constantia Centre, in *New York*, a post-office of Oswego co.

Constanti'na, a town of Spain, defended by a strong castle, 40 m. from Seville: *pop.* 7,532.

Constantine, an inland city of N. Africa, in Algeria, cap. of its E. prov., beyond the Lesser Atlas chain, on a peninsular height, surrounded on three sides by the Roumel, or Wad-el-Kebir (the ancient *Ampsegus*), which partly runs through a deep ravine, crossed by an ancient bridge, 114 yards above the water, and 113 in length; 190 m. E.S.E. of Algiers. Lat. 36° 24' N., Lon. 6° 8' E. C. is strongly fortified, as well by art as by nature, having walls on the landward side casemated, and 5 feet in thickness. It has 4 gates; and on the N., or more elevated side of the plateau, on which the city is built, is the *Kasba*, or citadel. C. contains many mosques, and

Fig. 66. — CONSTANTINE.

a fine palace; other than these, there are few buildings of any architectural beauty or importance. *Manuf.* Saddlery, boots, coarse blankets, &c. C. carries on an active trade with the S. In 1836, C. was attacked by the French, who then sustained a repulse; but in the following year took it by storm, after a vigorous resistance. It has since remained in French occupation. *Pop.* (1891) 46,581, of whom abt. one-third are Europeans and one-half natives.

Constantine, in *Michigan*, a post-village and township of St. Joseph co., on the St. Joseph River, alt. 89 m. S.W. of Lansing.

Constantine I., FLAVIUS VALERIUS, surnamed THE GREAT, a Roman emperor, son of Constantius Chlorus, by Helena, born A. D. 272. On the death of his father, 306, C. was proclaimed emperor, and married Fausta, the daughter of Maximian, but was soon involved in a war with his father-in-law, who assumed the title of emperor. The usurper's reign was brief, and on his being taken prisoner, C. caused him to be strangled. This involved him in a war with Maximian, son of Maximian, in which the latter was defeated and drowned in the Tiber. It is said that, as he was going to fight against Maximian, he saw a cross in the sky, with this inscription: *ΕΝ ΤΟΥΤΩ ΝΙΚΑ* — *In hoc signo vinces*, (by this sign thou shalt conquer). In the year 312, he became a convert to Christianity, and obtained an easy victory, ever after adopting a cross or *labarum* as his standard. Being then sole emperor, he began to reform the state. He prohibited nocturnal assemblies, and abolished many of the obscenities of paganism. In 321 he ordered the observance of the Sunday, and abstinence from work on that day; caused the Christian churches which war had destroyed to be rebuilt, and in 325 assembled the first universal council of Nicea: abolished the consulting of oracles, and the fights of gladiators; but in 326, upon a false accusation, caused his son Crispus to be beheaded for attempting to seduce Fausta, his own stepmother. She herself, however, was afterwards put to death. In 328 he founded the city where Byzantium formerly stood, and called it by his own name, Constantinopolis. Here he transported part of the Roman senate; and, by keeping his court in it, raised it to be the rival of Rome, in population and magnificence. From that time the two imperial capitals began to look upon each other with an eye of envy; and soon after the age of C., a separation was made of the two empires, and Rome was called the capital of the western, and Constantinopolis the capital of the eastern. D. at Nicomedia, 337, having been baptized only a few days before. — This emperor has been distinguished for personal courage, and praised for the protection he extended to the Christians; but the murder of his son Crispus has been deservedly censured. His remains were carried to Constantinopolis, where he was sumptuously interred. He was placed by the senate of Rome among the gods, and by the Christians of the East, among the saints. His festival is celebrated on the 21st of May by the Greek, Russian, and Coptic churches. He left three sons, Constantinus, Constans, and Constantius, among whom he divided his empire.

CONSTANTINE II., called the *Younger*, eldest son of the above, received, as his share of the empire, on the death of his father, Gaul, Spain, and Britain. Being desirous, however, of possessing himself of the territory of his

brother Constans, he was killed in Italy, 340.

CONSTANTINE III., (*Novus*), b. 612 A. D.; d. 641.

CONSTANTINE IV., emperor of the East, surnamed *Pogonatus*, or the Bearded, was son of Constans II., whom he succeeded in 668. His two brothers, Tiberius and Heraclius, shared the title of Augustus, but had little or no share in the government, and towards the close of his reign, *C.*, under the influence of suspicion, had them mutilated and put to death. Constantinople was unsuccessfully attacked by the Mussulmans in 672 and the six following years; and it was during these wars that the famous "Greek fire" was invented. *C.* convoked and took part in the sixth general council held at Constantinople, at which the doctrine of the Monothelites was condemned. D. 685.

CONSTANTINE V., emperor of the East, succeeded his father, Leo the Isaurian, in 743. He sided with the Iconoclasts, who hurled down the images of the saints, and persecuted the followers of the Roman Catholic Church. D. of the plague, in an expedition against the Bulgarians, 775.

CONSTANTINE VI., emperor of the East, was son of Leo IV., whom he succeeded in 780. Being only 10 years old when his father died, his mother Irene was his guardian and regent of the empire. On arriving at a mature age he wished to assume the government himself; but Irene, made cruel by ambition, had him imprisoned. He escaped in 790, exiled his mother, recalled her, and finally, ruined by his licentious living, and despised by his subjects, a conspiracy was formed against him, Irene taking the lead in it; and being imprisoned, his eyes were put out by her orders. The blind prince languished some time in obscurity, and d. in 797.

CONSTANTINE VII., was named emperor in 868, during the lifetime of his father, Basilus I., but d. before him, 878.

CONSTANTINE VIII., surnamed *Porphyrogenitus*, emperor of the East, succeeded Leo the Wise in 905. He was destitute of energy, and devoted himself chiefly to study. He admitted colleagues to the throne, so that at last five emperors were reigning together. *C.* left a treatise on state affairs, a geography of the empire, and the *Life of the Emperor Basilus, the Macedonian*. D. 959, poisoned, it is said, by his son Romanus.

CONSTANTINE IX., son of Romanus I., reigned with his father and his two brothers, from 919 to 945, during the time that Porphyrogenitus was deposed.

CONSTANTINE X., son of Romanus II., succeeded John Zimisces, and was proclaimed emperor of the East, with his brother, Basilus II., who held the principal authority till 1025, when he died. *C.* was, after that, sole emperor. D. 1028.

CONSTANTINE XI., surnamed the *Gladiator*, obtained the empire in 1042, having married the empress Zoe, widow of Romanus III. This prince is known alone for his debaucheries. He allowed the Turks to increase their territories at his expense, and to establish themselves in Persia.

CONSTANTINE XII., surnamed *Ducas*, succeeded, in 1059, Isaac Comnenus, who had adopted him. In his reign the Scythians ravaged the empire, and some cities were destroyed by earthquakes. D. 1067.

CONSTANTINE XIII., the last of the Greek emperors, succeeded to the throne in 1448. He was killed in bravely defending Constantinople against Mahomet II., who, in 1453, besieged the city with 300,000 men. The heroic valor displayed by *C.* in this unequal contest demands our admiration; but valor was of no avail, the city was taken by storm, and thus ended the Greek empire.

Constantine, FLAVIUS JULIUS, a private soldier, who was raised by the army in Britain to the imperial dignity in 409, on which he crossed over to Gaul, and conquered that country and Spain. He fixed his court at Arles, where he was besieged by Constantius, the general of the emperor Honorius, to whom he surrendered on the promise that his life should be spared; but it was basely violated, and both *C.* and his son were put to death, A. D. 411.

Constantine I., king of Scotland from 458 to 479. — *C.* II., king from 858 to 871. — *C.* III., king from 903 to 943. — *C.* IV., usurped the throne, and was killed by the brother of Kenneth, 1062.

Constantine, a pope who was elected in 708, and n. 714. — There was also an anti-pope of this name, who usurped the holy office in 707.

Constantine, PAULOVITCH, the second son of the emperor Paul of Russia, b. 1779. In the wars against France he distinguished himself by his personal bravery, though not by his capacity for command. He was the elder brother of the emperor Nicholas, to whom he ceded the crown on the death of the emperor Alexander I., their brother. *C.* was afterwards made viceroy of Poland, and ruled that unfortunate country with great severity. D. of cholera, 1831.

Constantine, NIKOLAEVITCH, the second son of the Emperor Nicholas of Russia, and brother of the Emperor Alexander II., grand-duke and great admiral of Russia, b. 1827. In the war of 1854-56, he had the defences of the Baltic intrusted to his care, in conjunction with Admiral Lütke; but the policy of the Emperor hardly allowed the prince any display of courage or ability. He was made Viceroy of Poland in 1862.

Constantinople, (so called from its restorer, Constantine the Great; Turk. STAMBOUL, or *Istamboul*, and the anc. *Byzantium*), a famous city of S.E. Europe, cap. of the Turkish empire, and the first city of the Mohammedan world,—a distinction which it has held since 1453, when it ceased to be the cap. of the Eastern empire. The situation of *C.*, whether considered in a commercial or political point of view, is the finest imaginable. It occupies a triangular promontory near the E. extremity of the prov. of Rommelia (anc. *Thrace*), at the junction of the Sea of Marmora with the *Thracian Bos-*

phorus, or channel of Constantinople, being separated by its suburbs of Galata, Pera, and Cassim-Pasha, by the noble harbor called the *Golden Horn*; Lat. 41° 0' 12" N., Lon. 28° 59' 2" E. *C.* standing, as it does, on the narrow straits uniting the Mediterranean and Euxine seas, at once commands, and is the entrepôt for, the commerce between them. The harbor is excellent, having sufficient depth of water to float the largest ships, and can accommodate more than 1,000 sail. The distance across from Seraglio Point (where there is a light-house), to the opposite suburb of Sentari, on the Asiatic coast, is rather more than an Eng. mile. Near the latter place

Fig. 669. — VIEW OF CONSTANTINOPLE AT THE END OF THE 17TH CENTURY.

there is also a well-situated light house. Foreigners reside in Galata, Pera, and the suburbs on the E. side of the harbor, and it is there, consequently, that the chief commerce of the place is carried on. The quays are good, and ships lie close alongside. The city of *C.* proper is shaped somewhat in the form of a harp, with a length E. to W. of abt. 3½ m., and a varying breadth of from 1 to 4 m. Its circuit is believed to be abt. 13 m. Like Rome, *C.* stands upon 7 hills, rising progressively from the water one above the other, and each crowned by some noble and conspicuous edifice. This amphitheatre of peopled hills, with its innumerable cupolas and minarets, interspersed with tall, dark cypresses, and its almost unrivalled port, presents a *coup-d'œil* of incomparable magnificence as seen from the exterior. The city once entered, however, the illusion vanishes. The streets are narrow, mean, and dirty, and only redeemed from absolute ugliness by the numerous palaces, mosques, bazaars, khans, fountains, &c., that constitute its sole internal attractions. *C.* contains, at present, 14 royal and 332 other mosques, 40 Moslem colleges, 183 hospitals, 36 Christian churches, several synagogues, 130 public baths, nearly 200 "khans" or inns, besides innumerable caravanseras, bazaars, coffee-houses, and public fountains. Besides these, *C.* is tolerably rich in fine Greek monumental remains, and other antiquities. *C.* was originally surrounded by walls flanked by towers, which now only partially exist in a perfect state; and possessed, besides, 43 gates, of which but 7 now remain. The houses for the most part are built of wood, and the streets being inconceivably narrow, disastrous fires have been, consequently, of frequent occurrence. The *Seraglio* (or chief residence of the Sultan) consists of a vast agglomeration of apartments, mosques, kiosks, gardens, groves, &c., walled in for a circuit of 3 m. The principal entrance to this imperial quarter is by the gate called *Bab-ah-homajân*, or "Sublime Porte," guarded by 50 men, and having a niche on either side in front, in which the heads of state offenders are publicly exposed. The *Seraglio* contains some very magnificent buildings, and is estimated to contain about 10,000 inmates. The mosques of *C.* are, generally speaking, very magnificent structures, more especially those of St. Sophia (see fig. 458), Solymán the Magnificent, and Sultan Achmet I. The suburb of Galata is, as it were, Christendom in Turkey; taverns are tolerated, and the Turks themselves resort thither to take a social glass. Topkanli contains an arsenal, artillery-barracks, magazines, and a cannon-foundry. Pera is beautifully situated, but irregularly built and ill paved. It is abt. 2 m. in length; its population is almost wholly Frank, and it contains the residences of most of the European ambassadors, that of the U. States minister, besides 1 Greek and 4 Catholic churches, a monastery of dervishes, and a Mohammedan college. In 1831 it suffered severely from a fire, which destroyed 10,000 houses, among which were the palaces of nearly all the ambassadors, and property estimated at \$8,000,000. The other adjoining suburb, Cassim-Pasha, contains the great naval arsenal, dock-yards, barracks, the palace of the Capdan-Pasha, &c. The manufactures of *C.* are few; the principal are those of silk and cotton fabrics, arms, morocco leather, saddlery, shoes, meerschaum pipes, &c. The foreign trade, however, is very considerable, more particularly in imports of corn, iron, timber, tallow, furs, textile fabrics, iron-ware and cutlery, furniture, drugs, &c., and coffee. The exports are less important, comprising, chiefly, silk, carpets, hides, wool, goats'-hair, potash, wax, galls, bullion, and diamonds. The trade is almost entirely in the hands of English, French, American, Armenian, Greek, and Jew merchants. *C.* is the residence of a Greek, an

Armenian, and a Catholic-Armenian patriarch. Elementary schools are common, and in every quarter there are Turkish free-schools for the poor, the cost of which is defrayed out of the revenue of the mosques. There are 16 public libraries, the greater number of which are attached to the royal mosques, and *C.* is distinguished from every other European capital by having no names to its streets, no lamps, and no post-office. — *C.* was originally founded by Byzas, 656 B. C., from whom it derived its olden name of *Byzantium*; and having been destroyed by Severus, was rebuilt, A. D. 328, by the emperor Constantine, who made it the cap. of the Roman empire. On the subjugation of the Eastern empire by the *Osmanlis*, or Turks, *C.* continued to be the cap. of the Eastern or Ottoman Empire. Its wealth and magnificence were celebrated during the Middle Ages. It has sustained numerous sieges, but has only been twice taken: first, in 1204, by the Crusaders, who retained possession till 1261; and, lastly, by the Turk under Mohammed II., in 1453, when the last remnant of the Roman empire was finally suppressed. *C.* including suburbs, nearly 900,000 in 1897.

Constantinus I., surnamed *Chlorus* (the "Pale"), Roman emperor, was the son of Eutropius and Claudine, niece of Claudius II. He distinguished himself as a soldier under the emperors Aurelian and Probus. In 292 he was made Cæsar and governor of the Gauls, Spain, and Britain. He reconquered Britain, long revolted under Caurantius and Allectus; won a great victory over the Alemanni in 300; became Augustus in 305, and died at York in the following year. By Helen, his first wife, *C.* was father of Constantine the Great. He ruled his provinces with great justice and prudence, and won the esteem of all classes of his subjects.

CONSTANTIUS, *Flavius Julius*, Roman emperor, son of Constantine the Great, was made Cæsar in 323, and elected emperor in 337. The soldiers, to secure the throne for the three sons of Constantine, massacred the uncles and cousins of those princes, with the exception of Julian, "the Apostate," and his brother Gallus. After this the sons of Constantine divided the empire, Constantine taking the east for his share. Magnentius, governor of Rhætia, murdered Constans, who had reigned only 13 years; on which Constantius marched against the murderer, whom he defeated, and his elder brother being also dead, he became sole emperor. He died in his march against Julian, who had assumed the purple.

Constantly, *adv.* In a constant manner; invariably without change.

Constat, *n.* [Lat., it appears.] (*Law.*) A certificate or officer that certain matters therein stated appear on record.

Constellate, *v. i.* To join in radiance; to shine in one general splendor. (*R.*)

—To unite in one general lustre or radiance. (*R.*)

—To adorn or gem with stars or constellations.

Constellation, *n.* [Fr., from Lat. *constellatio*—*and stello*, a star.] (*Astron.*) In order to describe the location of any heavenly body, astronomers at a very early date divided the heavens into sections of unequal extent, called constellations, containing groups of stars which by a stretch of fancy they adorned with fanciful outlines of animals and other objects that, with few exceptions, the stars do not at all represent. As a simple example, one of the northern constellations is portrayed on the majority of our celestial globes and star-atlases as a bear with a very long tail; and, as a bear has no tail at all, the ludicrousness of the picture is apparent. Modern map-makers have wisely omitted to disfigure them with the menagerie, and give the boundaries of the constellations by conspicuous lines. They are divided into three classes, northern, zodiacal, and southern. The zodiac is a belt 16° in width extending entirely around the sky, the sun's apparent path being in its center. The zodiacal constellations are twelve in number, but of unequal extent, and their boundaries generally extend to the north and south of its limits. The signs are also two

Fig. 670.—THE CONSTELLATION OF LEO.

in number; they are all of equal extent, being each, but they have no reference whatever to the stars. When the heavens were first divided into constellations, the boundaries are far from being the best that could be devised. Through caprice and personal pride on the part of astronomers, they have undergone many changes, which authentic history records. Ptolemy divided the heavens into 48 constellations—21 northern, 12 zodiacal, and 15 southern. At one time, owing to additions by different astronomers, they were increased to 110. The

ber now recognized is 86—29 northern, 12 zodiacal, and 45 southern.—The stars in each *C.* are classified according to their magnitudes but with no reference to the brightness of stars in other constellations. Thus, the brightest star in any of these divisions is named Alpha, the next brightest Beta, &c., after the 24 letters of the Greek alphabet. If the naked-eye stars outnumber the letters in the alphabet, Roman letters are used; and if they outnumber the letters in both alphabets, recourse is had to numerals 1, 2, 3, &c., in the order of right ascension. The following names were given by the ancients to the twelve signs of the zodiac in the order of right ascension west to east: Aries, Taurus, Gemini, Cancer, Leo, Virgo, Libra, Scorpius, Sagittarius, Capricornus, Aquarius and Pisces. Some twenty-two centuries ago the first *C.* (Aries) was superimposed on the first sign in the zodiac; but, owing to the precession of the equinoxes westward, Pisces now occupies the same place in the zodiac that Aries did then. In other words, Pisces now occupies the first sign, and Aries the second *C.* Some 24,000 years hence the signs and constellations will again agree. See PROCESSION.

—An assemblage of excellences or splendors; as, a *constellation* of female beauty.

Consternation, *n.* [Fr., from Lat. *consternatio*, from *consterno*, *consternatus*—*con*, *sterno*, to spread out, to extend, to throw down, from the root *ster*, whence Gr. *sternomyi*, to spread or stretch out; Sansk. *stri*.] A prostration of the mind; a state of terror that confounds the faculties, and incapacitates a person for consultation and execution; horror; amazement; astoundment; surprise; wonder; perturbation.

Constipate, *v. a.* [Lat. *constipo*, *constipatus*—*con*, and *stipo*, to compress; to thicken; to condense; to stop by filling a passage.

(Path.) To make or render costive.

Constipation, *n.* Act of constipating; a crowding or filling, usually in the pathological sense.

(Path.) *C.*, or costiveness, is a torpor or sluggishness of the bowels, occasioned by an excessive action of the absorbents of the bowels, or defective secretion of the juices of the intestines, by which the feces become hardened, or by an impaired peristaltic action of the intestines. (See DIGESTION.) It arises most frequently from a deficiency or vitiated secretion of the bile, which is the natural stimulus of the bowels. Sedentary habits predispose to *C.*, as does also the use of certain kinds of food. When severe and obstinate, it gives rise to inflammation of the bowels, and may soon prove fatal. The treatment consists in moving the bowels by means of purgatives, or injections of tepid water, then restoring the natural state of the system by means of active exercise in the open air, sea-bathing, and the use of food of laxative nature; as brown bread, green vegetables, &c.

Constitucion, *La*, a sea-port town of Chili, in the department of Maule, about 115 m. N.E. of Concepcion.

Constituency, *n.* The body of electoral constituents; as, a county constituency.

Constituent, *a.* [Lat. *constituens*, from *constituo*, to constitute.] Constituting; having the power of setting together firmly; necessary or essential; elemental; that which composes or forms, as an essential.

—Body, soul, and reason, are the three parts necessarily constituent of a man.—Dryden.

—Having the power of constituting, electing, or appointing; as, a constituent assembly.

—He or that which sets, fixes, forms, constitutes, or composes.—An essential or elementary part; that which is necessary to the formation or subsistence of a thing; as, food is a constituent of life.

—He who constitutes, appoints, or elects, as a delegate, agent, or representative; as, a senator addresses his constituents.

(Law.) He who gives authority to another to act for him.

Constituent Assembly. (French Hist.) See NATIONAL ASSEMBLY.

Constituição, (*Kon-ste-too-e-sa'õ*), in S. America, a town of Brazil, about 115 m. N.E. of San Paulo, on the Piratuba; pop. about 2,500.

Constitute, *v. a.* [Lat. *constituo*, *constitutus*—*con*, and *stato*, to set.] To cause to be; to set up; to fix, to erect, establish, or confirm.

—It will be necessary to consider how at first those several tribes were constituted.—Pearson.

—To ordain; to give formal existence to; to form or compose; as, to constitute a code of laws.

—To depute, appoint, or elect; to make and empower; as, to constitute a body of electors.

Constituter, *n.* He or that which constitutes or appoints.

Constitution, *n.* Act of constituting, enacting, forming, or establishing.—State or form of being; natural qualities; the particular frame or temperament of the human body; frame or temper of mind, affections, or passions.

—Beauty is nothing else but a just accord and harmony of the members, animated by a healthful constitution.—Dryden.

—An established form of government in a state, kingdom, or country; a system of fundamental laws, rules, principles, and ordinances for the government of a state, nation, community, or society; as, the Constitution of the U. States.

—A particular law, ordinance, or regulation, made by authority of a superior, either civil or ecclesiastical. The decrees and decisions of the Roman emperors were called *Constitutions*, and in the Roman Church this name was given to a decree of the pope in matters of doctrine.

—The *C.* of the U. States. The *C.* was framed by the convention of the representatives of the people, assembled in

Philadelphia, Sept. 17, 1787, and became the law of the country from the 4th of March, 1789, the day when it was ratified by Congress. It is divided into 7 articles, of which a succinct analysis follows. 1. The legislative power is vested in Congress.—Rules for the formation of the House of Representatives, and who shall be elected.—Organization of the Senate, with exclusive rights to it of trying impeachments.—Times and places of holding elections, and time of meeting of Congress.—Power of the respective houses.—Provision for a compensation to members of Congress, their safety from arrests, and their disqualification from holding certain offices.—Manner of passing bills.—Powers vested in Congress.—The migration or importation of a certain class of persons not to be prohibited prior to the year 1808.—The writ of *habeas corpus* not to be suspended, except in particular cases.—No bill of attainder or *ex post facto* law shall be passed.—Manner of laying taxes.—Manner of drawing money out of the treasury.—Titles of nobility forbidden.—No officer shall receive a present from a foreign government.—Enumeration of powers forbidden to the respective States.—2. Executive power vested in the President. Rule (as amended) for his nomination and that of the Vice-President.—Various powers conferred on the President.—Definition of his duties.—Rules for the impeachment of the President, Vice-President, and all civil officers of the U. States.—3. Judicial power vested in sundry courts.—Provisions for the tenure of offices by the judges, and for their compensation.—Extent of the judicial power.—Original jurisdiction in certain cases vested in the Supreme Court.—Manner of trying crimes.—Definition of treason, and power vested in Congress to declare its punishment.—4. Faith that State records, &c. shall have in other States. The rights of citizens in the several States are secured.—Rules for the admission of new States and the government of the Territories.—Guarantee of the republican form of government to every State in the Union, and protection from invasion and domestic violence.—5. Provision for amendments to the Constitution, which must be ratified by three-fourths of the several States.—6. The *C.* and treaties made under the confederation shall be the supreme law of the land.—Public officers shall be required by oath or affirmation to support the *C.* of the U. States.—No religious test shall be required as a qualification for office.—7. Directions on what shall be a sufficient ratification of this *C.* by the States.—In pursuance of article 5, 15 articles, in addition to, or amendment of the *C.*, have been successively proposed by Congress, and ratified by the several States. They relate to: 1. Religious freedom; liberty of the press; right of the people to assemble and to petition for redress of grievances.—2. Right by the people to bear arms.—3. Quartering of soldiers.—4. Regulation of the right of search, and of the manner of arrest on criminal charges.—5. Manner of being held to answer for crimes, and provision for the security of the life, liberty, and property of the citizens.—6. Right by the accused to a fair trial by jury.—7. Trial by jury in civil cases.—8. Excessive bail not to be required; nor excessive fines imposed; nor cruel and unusual punishments inflicted.—9. Rights retained by the people are secured to them.—10. Reservation to the States respectively, or to the people, of the powers not delegated to the U. States by the *C.*, nor prohibited by it to the States.—11. Limitation of the powers of the courts as to suits against one of the States.—12. Regulation in the manner of electing the President and Vice-President.—13. Prohibition of slavery in the U. States.—14. All persons born or naturalized in the U. States are citizens. Disqualification of certain persons from holding offices.—15. Absolute equality of rights to every class of citizens.

(*Med.*) The state of all the organs of the human body considered in regard to their special and relative arrangement, order, and activity. Any want of equilibrium in their development and energy forms a difference in the *C.* A man is said to be of a good or robust, a delicate or weak *C.*, when he is commonly healthy, or commonly laboring or unusually susceptible of disease.

Constitution, in Ohio, a post-village of Washington co., on the Ohio River, abt. 6 m. S.W. of Marietta.

Constitution, in Pennsylvania, a P. O. of York co.

Constitutional, *a.* [Fr. *constitutionnel*.] Bred or inherent in the constitution, or in the natural frame of body or mind; as, a constitutional malady.

—Consistent with, or authorized by the civil or political constitution; legal; as, constitutional means.

—Attaching to, or regulated by, a constitution; as, constitutional government.—Relating to a constitution or recognized form of government; as, constitutional traditions.

—Taken to invigorate and benefit the constitution; as, a constitutional walk. (Used by English university men.)

—*n.* A walk, or other active bodily exercise, taken to promote health and digestion. (A term in general use in England, and also here.)

Constitutionalism, *n.* The science or authority of a constitution.

Constitutionalist, *n.* One who adheres to the constitution of a country;—opposed to *revolutionist*.

—One who suggests or carries out innovations or reforms in a constitution.

Constitutionality, *n.* That state which belongs to, or is inherent in, the human frame or natural constitution.

—State or condition of being in accordance with, or bound by, a constitutional form of government.

Constitutionalize, *v. n.* To take an active walk for the benefit of one's bodily health; to undergo any physical exercise tending to brace the system or otherwise benefit the health.

Constitutionally, *adv.* Naturally; according to the physical constitution.—In consistency with the constitution or established frame of government.

Constitutionary, *a.* Same as CONSTITUTIONAL, *q. v.*

Constitutionist, *n.* One who adheres to the established system of government peculiar to his country.

Constitutive, *a.* That which constitutes; elemental; essential.

—The elements and constitutive parts of a schismatic.—Decay of Piety.

—Instituting; having the power or faculty to enact, establish, or create; as, constitutive authority.

Constitutively, *adv.* In a constitutive manner.

Constrain, *v. a.* [Fr. *contraindre*; Lat. *constringo*—*com*, and *stringo*, to bind, akin to Gr. *strang-gō*; Ger. *strängen*, to draw, bind, or tie tight.] To hinder by force; to restrain; to repress.

—To compel; to urge forward; to impel; to forcibly oblige; to necessitate.

—The rest besieged, but we constrain'd the town.—Dryden.

—To draw, press, or bind close together; to compress.

—How the straight stays the slender waist constrain!—Gay.

—To fasten by bonds; to confine; to imprison.

—Constrain'd him in a bird, and made him fly With parti-colored plumes, a chattering pye.—Dryden.

Constrainable, *a.* That may be constrained; susceptible of restraint.

Constrainedly, *adv.* By constraint, compression, or compulsion.

Constrainer, *n.* He who, or that which, constrains.

Constraining, *n.* [Fr. *contrainte*, from *contraindre*.] A constraining; state of being constrained; confinement; restraint.

—His limbs were waxen weak and raw, Thro' long imprisonment, and hard constraint.—Spenser.

—Irresistible force or its effect; compulsion; violence; force.

—I did suppose it should be on constraint; But, Heav'n be thank'd, it is but voluntary.—Shaks.

Constrainingly, *a.* Impelling; having power to constrain.

Constrict, *v. a.* [Lat. *constringo*, *constrictus*. See CONSTRAIN.] To draw or bind close together; to bind; to cramp; to contract or cause to shrink.

—Such things as constrict the fibres, and strengthen the solid parts.—Arbuthnot.

Constricted, *p. a.* Drawn together; bound; contracted.

(Bot.) Contracted or tightened so as to be smaller in some parts than in others.

Constriction, *n.* Act of constricting; a drawing together or contraction; compression; as, constriction of the air.

Constrictive, *a.* Tending to contract or compress.

Constrictor, *n.* That which constricts, draws together, or contracts.

(Anat.) A muscle that closes an orifice; as, the constrictors of the eyelids.

(Zool.) A name applied to the larger serpents, which overcome and destroy a struggling prey by throwing themselves round it in overlapping folds, and crushing it by their muscular force, as generally the species of the family Boidæ, *q. v.*

Constringe, *v. a.* To force to contract; to compress; to bind.

Constrigent, *a.* Having the quality of binding or compressing.

Construct, *v. a.* [Lat. *construo*, *constructum*—*con*, and *struo*, to pile up, to build.] To form or frame with contrivance; to put together the parts of a thing in their proper place or order; to build; to erect; to rear; as, to construct a dwelling-house.—To devise and compose; to compile; as, to construct a system.

To construct an equation. (Math.) To form a geometrical figure to correspond with the equation.

—*n.* Relating, or pertaining, to construction.

Constructor, *n.* One who constructs or frames anything.

Construction, *n.* [Lat. *constructio*.] Act of constructing, or of building, devising, or forming; as, the construction of a ship.

(Arch.) That branch of the science which relates to the practical execution of the works required to carry out the artist's designs. It is immediately connected with the distribution of the different forces, and the strains of the parts and materials of a building, the properties and qualities of the various materials used, and the effects which they are likely to produce in their several places.

(Gram.) Proper arrangement and connection of words in a sentence, according to the rules of syntax.

—Sense: meaning; interpretation; explanation; as, to place a true construction upon another's words.

Construction of an equation. (Math.) The interpretation of algebraic equations by geometric forms.

Constructive, *a.* Pertaining to, or deduced from, construction, or the materials, &c., that enter into the construction of a building, &c.]

Constructivist, *n.* The person who construes or interprets the sense of a public document or legal instrument.

Constructive, *a.* Relating to, or formed by, construction; as, a constructive genius.

—Created or deduced by construction; not directly expressed but inferred; as, constructive evidence.

Constructively, *adv.* In a constructive manner; by way of inference, or interpretation.

Constructiveness, *n.* Tendency to formation or construction.

(Phren.) The inventive or constructive faculty possessed by mankind.

Construct'ure, n. Any pile, edifice, or structure that is formed or reared; as, the "earth's *constructure*." — *Blackmore*.

Construe', v. a. [Lat. *construo*; see CONSTRUCT; Fr. *construire*.] To place or arrange words in their natural order, so as to discover the sense of a sentence; to interpret; to translate.

—To render in a comprehensive manner; to explain the sense of; to render the meaning of.

"Virgil is so very figurative, that he requires . . . a grammar apart to construe him." — *Dryden*.

Con'stuprate, v. a. [Lat. *constupro, constupratus* — *con*, and *stupro*, to ravish.] To ravish, violate, debauch, or defile.

Constupration, n. Act of violation or defilement.

Consubstist', v. n. [Lat. *con*, and *subsisto*. See SUBSIST.] To subsist together.

Consubstantial, (kon-sub-stan'shi-al), a. [Lat. *consubstantialis* — *con*, and *substantia*, substance, *q. v.*; Fr. *consubstantiel*.] Having the same substance or essence; co-essential; of the same kind or nature.

"In their conceits the human nature of Christ was not *consubstantial* to ours, but of another kind." — *Brerewood*.

Consubstantialism, n. The doctrine of consubstantiation.

Consubstantialist, n. A believer in consubstantiation.

Consubstantial'ity, n. Quality of being consubstantial; participation of the same nature.

Consubstantial'ly, adv. In a consubstantial or co-existent manner.

Consubstantial'iate, v. a. [Lat. *con*, and *substantia*.] To unite in one common substance or nature.

Consubstantial'iate, a. Existing in the same substance.

Consubstantial'ion, n. A union or co-existence in the same substance.

(*Theol.*) The term by which Luther expressed the opinion which he held upon the nature of the elements in the Eucharist, as distinguished from *Transubstantiation*, the doctrine of the Roman Church. The latter asserts, as the word they use implies, that the bread and wine are changed into the body and blood, and lose their former substance, although they retain its appearance miraculously to the senses. The Lutherans deny this change; but affirm that, while the bread and wine do still remain in their natural substance, the body and blood are at the same time transferred into them, and thus that both are actually partaken of together.

Consue'gra, a town of Spain, prov. Toledo, on the Amarguillo, 38 m. S.E. of Toledo. Manuf. Coarse stuffs, batize, and serge. Grain, wine, oil, barilla, soda, and extensive quantities of marble and jasper are produced in the neighborhood. Pop. 6,000.

Con'suetude, n. [Lat. *consuetudo*, from *consuesco*, *consuevit* — *con*, and *sueo*, to be accustomed.] A being accustomed; custom; usage; habitude.

Consuetu'dinal, Consuetu'dinary, a. According to custom or usage; common; habitual.

Consuetu'dinary, n. A manual of customary devotional observances.

Consul, n. [Lat., from *consulo*, to consult — *con*, and *salio*, to leap, to jump. Literally, one who acts in concert with another, or who consults another.] An official commissioned by a sovereign or state to reside in a foreign land, and protect and forward the commercial interests of his own country. Such officers appear to have been first employed by the Italian republics to protect their merchants engaged in trade in the cities of the Levant. In general, a *C.* is not regarded as a minister or diplomatic functionary, and is subject to the civil authorities of the place where he resides. — *American C.* are nominated by the President to the Senate, and by the Senate confirmed or rejected. Each *C.* or vice-*C.* must give bond, in a sum not less than \$2,000, nor more than \$10,000, conditioned, for the faithful discharge of the duties of his office. Among their powers and duties are those of receiving protests or declarations which captains, masters, crews, passengers, merchants, and others make relating to American commerce; they are required to administer on the estate of American citizens dying within their consulate, and leaving no legal representatives; to take charge of and secure the effects of American vessels in the absence of the master, owner, or consignee; to settle disputes between masters of vessels and the mariners; to provide for destitute seamen, within their consulate, and send them to the U. States at the public expense; to make certificates on certain facts in certain cases, which receive faith and credit in the courts of the U. States, when given in the performance of a consular function. They are entitled to receive certain fees, and, besides, receive a salary in certain places, such as Paris, London, and the Barbary States. — Before a *foreign C.* can perform any duties in the United States, he must be recognized by the President of the United States, and have received his *ezequatur*.

(*Rom. Antiq.*) One of the two chief magistrates of the ancient Roman republic. On the expulsion of the kings, B. C. 509, two chief magistrates of the republic were appointed. Their tenure of office was for one year only. Decemvirs were appointed in 451, three military tribunes in 444, a dictator obtained the chief authority in 391, and a prætor was appointed in 366. Although the direction of affairs was occasionally vested either in decemvirs, military tribunes, or a dictator, the consulship was the office generally adopted. A plebeian was elected one of the *C.* in 366, and the office was often held by one of that class, until B. C. 172, when both *C.* were plebeians. After the appointment of an emperor in 31, it became a nominal dignity, and continued as

such, with certain interruptions. Decimus Theodorus Paulinus, in A. D. 536, was the last consul at Rome, and Flavius Basilus Junius in 541, the last at Constantinople.

(*French Hist.*) See CONSULATE.

Consulage, n. (Com.) A duty by merchants at a foreign port for consular protection of their interests. (Sometimes called *consular dues*.)

Consular, Consulatory, a. Belonging or relating to a consul; as, *consular fees*.

Consular, n. (Roman Hist.) The title given to a Roman citizen who had been dignified with the office of consul.

Consulate, n. [Fr. *consulat*; Lat. *consulatus*.] The office or place where business is transacted by a consul. — Official position or jurisdiction of a consul.

(*French Hist.*) The govt. established in France by Napoleon Bonaparte, after the extinction of the Directory, Nov. 10, 1799. The new constitution was proclaimed Dec. 24, when three consuls were appointed, the chief authority being vested in one of them called *First Consul*. Napoleon, Cambacères, and Lebrun, were the consuls named, and, Aug. 4, 1802, the former was made first consul for life. The government was so gradually assimilated to a monarchy, and after the lapse of four years and a half an easy transition was made from the consular to the imperial form; the title of emperor was substituted for that of consul; and the exercise of the sovereign authority, which indeed had been only nominally shared with his colleagues, was delegated exclusively to Napoleon Bonaparte, May 18, 1804.

Consul-geu'eral, n. A chief consul, or commercial representative of a nation, in a foreign country, having jurisdiction over other consuls in the same country.

Consulship, n. The office or status of a consul.

"The patricians should do very ill, To let the *consulship* to be so defiled." — *Ben Jonson*.

—Jurisdiction or residence to which a consul is appointed.

Consult', v. n. [Lat. *consulto*, frequentative from *consulo*. See CONSUL.] To take counsel together; to advise; to seek the opinion or advice of another; to deliberate in common; to confer; to consider with deliberation; — often followed by *with*; as, to *consult with* one's lawyer.

"Let us *consult* upon to-morrow's business." — *Shaks.*

—*v. a.* To ask advice or counsel of; as, to *consult* a friend.

—To refer to for information; to regard, or have regard to.

"We are, in the first place, to *consult* the necessities of life rather than matters of ornament and delight." — *L. Estrange*.

—To deliberate upon; to weigh over; to take advice for; as, to *consult* upon future steps.

—To plan or contrive.

"Thou hast *consulted* shame to thy house, by cutting off many people." — *Habak. ii. 10*.

Consultary, a. Formed by, or springing from consultation; as, a *consultary* response.

Consultation, n. Act of consulting, or of mutual deliberation.

"The chief priests held a *consultation* with the elders and scribes." — *Mark xx. 1*.

—A meeting or council of persons called together for deliberation on a certain matter; as, a *consultation* of physicians.

Consultative, a. Pertaining to, or susceptible of, consultation.

Consult'er, n. One who consults, or seeks counsel from another.

Consult'ing, p. a. Asking advice; seeking counsel or information; giving or receiving advice; as, a *consulting* physician.

Consult'ive, a. Consultative; determined by deliberation or due consideration.

Consum'able, a. That may be consumed; as, *consumable* goods.

Consume', v. a. [Lat. *consumo* — *con*, and *sumo*, to take.] To reduce to nothing; to destroy; to waste; to burn up; to spend; to swallow up; to squander; to exhaust; to dissipate.

"Thus in soft anguish she *consumes* the day." — *Thomson*.

—*v. n.* To waste away slowly; to be exhausted.

"These violent delights have violent ends, . . . Like fire and powder, which, as they meet, *consume*." — *Shaks.*

Consumer, n. One, or that which, consumes, wastes, spends, or destroys.

Consum'ingly, adv. In a consuming or wasteful manner.

Consum'mate, v. a. [Lat. *consummo, consummatus* — *con*, and *summa, sum.*] To wind up; to end; to finish; to make complete; to perfect; to bring or carry to the utmost point or degree; as, to *consummate* a marriage.

Consum'mate, a. Complete; perfect; carried to the utmost extent or degree; as, *consummate* wickedness.

"A man of perfect and *consummate* virtue." — *Addison*.

Consum'mately, adv. Completely; perfectly; entirely.

Consumma'tion, n. [Lat. *consummatio*.] Act of consummating; completion; end; fruition; perfection.

"Tis a *consummation* Devoutly to be wish'd." — *Shaks.*

Consum'mative, a. Completing; tending to consummate.

Consumption, n. [Lat. *consumptio*, from *consumo, consumptus*. See CONSUME.] Act of consuming; destruction; dissipation; decline; as, the *consumption* of food.

—State of being consumed; waste; decay; loss.

"The mountains . . . have not suffered any considerable diminution or *consumption*." — *Woodward*.

(*Med.*) See PHTHISIS.

Consumptional, a. Same as CONSUMPTIVE, *q. v.*

Consumptionary, a. Pertaining to, or having the nature of, consumption.

Consumptive, (kon-sum'tiv), a. Pertaining to consumption; destructive; wasteful; exhausting; as, a "*consumptive* war." — *Addison*.

(*Med.*) Affected with, or inclined to, phthisis, or pulmonary consumption; as, a *consumptive* cough.

"By an exact regimen, a *consumptive* person may hold out for years." —

Consumptively, adv. In a manner predisposed to consumption.

Consumptiveness, n. State of being consumptive, or a tendency thereto.

Consus. (Myth.) A deity worshipped at Rome, who presided over consuls. Romulus instituted festivals in his honor, called *Consualis*, during the celebration of which the Romans carried away the Sabine women.

Contact, n. [Fr., from Lat. *contactus*, from *contingo* — *con*, and *tango, tactus*, to touch.] A touching together; touch; close union or juncture of bodies.

(*Geom.*) When applied to 2 curves, the term *C.* implies that the latter do not simply intersect, but have two or more consecutive points in common. The number of such consecutive common points determines the order of the *C.* Thus, two curves which have two consecutive points in common are said to have a *two-pointic C.*, or one of the *first* order; if they have three consecutive common points, the *C.* is *three-pointic*, or of the *second* order; if four, *four-pointic*, or of the *third* order; and so on. In short, the number of consecutive common elements is equal to the order of the *C.* Thus two curves which simply touch each other, or have a common tangent, have a *C.* of the first order, both with each other and with that tangent. If they have the same curvature, they have *C.* of the second order with each other and with the common circle of curvature. When the number of common points is sufficient to determine one of the curves completely, the order of *C.* is maximum and the latter *C.* is said to *osculate* the former. Thus a circle is determined by three points, so that we can only demand from it a *C.* of the second order, with any given curve. It is then called the *osculating circle*, or *circle of curvature*. A conic being determined by five points, may have *C.* of the 4th order with any curve of higher order than itself. An angle of *C.* is the angle made by a curve line with its tangent; it is also called *angle of contingence*, and is equal to the *angle of curvature*.

Contagion, (kon-ta'jün), n. [Fr., from Lat. *contagium* — *con*, and *tango* — *tango*, to touch.] Poisonous emanation or exhalation; infection; pestilence; as, the *contagion* of a malarious atmosphere.

"Will he steal out of his wholesome bed, To dare the vile *contagion* of the night?" — *Shaks.*

—That which communicates or propagates mischief or evil.

"Nor will the goodness of intention excuse the scandal and *contagion* of example." — *King Charles I.*

(*Med.*) This term ought, properly speaking, to be confined to the communication of disease to a healthy body by actual contact with the sick, or with the palpable matter from their bodies, and infection to be applied where disease is communicated through the medium of the atmosphere, or by means of other intermediate substances, called *fomites*. This distinction, however, frequently lost sight of, and the term *C.* applied to a cases in which the disease is conveyed to the person of the recipient by particles of matter proceeding from the person of the sick, whether these particles are in a solid or a gaseous form, whether they are imparted by direct contact of the two bodies, or by being wafted through the air, or carried upon articles of clothing. There are two kinds of contagious diseases: 1, those that can only be communicated by direct contact, as itch, syphilis; and 2, those which are capable of being produced either by direct contact or without it, as small-pox, typhus fever &c. Some contagious diseases seem to effect some radical change upon the system, so that it is not again liable to attack from the same disease, as small-pox; as some diseases, that do not generally manifest any contagious disposition, do, occasionally, under unfavorable circumstances, assume a malignant and contagious form. The term *C.* is also applied to the poisonous matter of means of which the disease is communicated. In the latter sense, it is a morbid matter, *sui generis*, which, entering the blood, produces a definite train of morbid phenomena, and communicates to the blood the power of generating a similar poison, capable of producing precisely the same disease.

Contagioned, a. Affected by contagion.

Contagionist, n. A believer in the contagious nature of certain diseases.

Contagious, (kon-ta'jūs), a. Containing or generating contagion; poisonous; pestilential; as, *contagious* miasma.

"Breathe foul, *contagious* darkness in the air." — *Shaks.*

—Spreading from one to another, like contagion.

"The spirit of imitation is *contagious*." — *Ames*.

(*Med.*) Caught or communicated by approach or contact; as, a *contagious* malady.

Contagiously, adv. By contagion; after the manner of contagion; as, rumor spreads *contagiously*.

Contagiousness, n. Quality of being contagious.

Contain', v. a. [Lat. *contineo* — *con*, and *teneo*, to hold. Fr. *contenir*; It. *contenere*.] To include within certain limits; to comprehend; to comprise; to embrace.

"The earth . . . may of solid good *contain* More plenty than the sun." — *Milton*.

—To hold; to be able to hold; to inclose; to have capacity, or room for; as, a barrel of ale *contains* 36 gallons.

"And have my fill Of knowledge what this vessel can *contain*." — *Milton*.

—*v. i.* To live in continence or chastity; to hold unruly desires in check.

"I felt the ardour of my passion increase, till I could no longer contain." — *Arbutnot.*

Containable, *a.* That may be contained or comprised.

Contain'er, **Contain'mt**, *n.* One who, or anything which, contains.

Contain'ment, *n.* The extent of anything which is comprised or contained.

Contam'inable, *a.* Susceptible of contamination; liable to be contaminated.

Contam'inate, *v. a.* [Lat. *contamino*, *contaminatus* — *con*, and ancient *tamino*, from *tango*, *tugo*, to touch.] To spoil, corrupt, pollute, or stain, by mixing or touching; to corrupt the purity or excellence of; to defile; to pollute; to sully; to taint; to infect; to violate.

"Shall we now Contaminate our fingers with base bribes?" — *Shaks.*

—*a.* Polluted; sullied; corrupt; defiled.

Contamina'tion, *n.* Act of contaminating or polluting; pollution; defilement; taint.

Contam'inative, *a.* Tending to contaminate.

Contam'kerons, *a.* Same as *CANTANKEROUS*, *q. v.*

Contarini, (*kôn-ta-rē-ne*) an illustrious family of Venice, which gave 7 doges to that republic, from 1043 to 1676, and also boasts of many ambassadors, cardinals, and men of letters. The most celebrated is *Gaspardo C.*, papal legate to the Diet of Ratisbon, and a philosophical writer, B. 1483, D. 1542.

Cont'as, in Brazil. See *RIO-DE-CONTAS*.

Contemni, (*kôn-tem'*) *v. a.* [Lat. *contemno* — *con*, and *temno*, to slight, to scorn, to despise; probably allied to *temero*, to treat rashly, from *temere*, rashly; It. *contemnare*.] To consider and treat as mean and despicable; to reject with disdain; to despise; to scorn; to disdain; to spurn; to neglect; to underrate; to overlook.

"Yet better thus, and known to be contemned, Than still contemned and flattered." — *Shaks.*

Contem'ner, *n.* One who contemns; a despiser; a scorner.

Contem'ningly, *adv.* Slightly; scornfully; contemptuously.

Contem'per, *v. a.* [Lat. *contemperare*.] To reduce to a lower degree by an admixture with opposite qualities; to temper.

"The leaves qualify and temper the heat, and hinder the evaporation of moisture." — *Ray.*

Contem'perament, *n.* State or condition of being tempered.

Contem'perate, *v. a.* To diminish any quality by the addition of something of a contrary nature; to temper; to moderate; as, to "contemperate the air."

Contempera'tion, *n.* The act of diminishing any quality by admixture with a contrary one; act of moderating or tempering.

—Proportionate mixture; proportion.

"The contemperations of natural humours." — *Hale.*

Contem'perature, *n.* State or condition of being proportionally mixed.

Con'template, *v. a.* [Fr. *contempler*; Lat. *contemplor*, *contemplatus* — *con*, and *templum*, an open place for observation, cut off by the altar with his staff; dim. of *templum*, a section, division. See *TEMPLE*.] To view carefully on all sides, and with reference to an object; to look at; to gaze upon; to survey; to behold; to view or consider with continued attention; to study; to ponder; to muse on; to meditate on.

—To look forward to; to have in view as likely to occur; to presuppose; as, to *contemplate* being married.

—*v. n.* To look around carefully; to think studiously; to study; to muse; to meditate.

"So many hours must I take my rest, So many hours must I contemplate." — *Shaks.*

Contempla'tion, *n.* [Fr., from Lat. *contemplatio*.] Act of contemplating; study; meditation; continued attention of the mind to a particular subject.

"For contemplation he and valour formed." — *Milton.*

To have in contemplation. To intend to do something; to have under consideration.

Contem'platist, *n.* One who contemplates.

Contem'plative, *a.* Given to contemplation; studious; thoughtful; meditative; employed in study.

"Fixt and contemplative their looks, Still turning over nature's books." — *Denham.*

—Having the power of thought or meditation.

"The contemplative faculty of man." — *Ray.*

Contem'plative, *n.* (*Eccl.*) A friar of the Mary Magdalen order.

Contem'platively, *adv.* With contemplation.

Contem'plativeness, *n.* Thoughtfulness; meditateness; state of being contemplative.

Contem'plator, *n.* One who contemplates; as, the "Platonic contemplators."

Contemporane'ity, *n.* State or condition of being contemporaneous.

Contemporane'ous, *a.* [See *CONTEMPORARY*.] Living or being at the same time; contemporary; as, a *contemporaneous* writer.

Contemporane'ously, *adv.* At the same time with some other event.

Contemporane'ousness, *n.* The state of being contemporary, or of the same time.

Contem'porariness, *n.* Existence at the same time with another or others.

Contem'porary, *a.* [Fr. *contemporain*, from Lat. *con*, and *temporarius*.] Living at the same time; co-existent; contemporaneous; as, a *contemporary* writer.

"A grove born with himself he sees, And loves his old contemporary trees." — *Cowley.*

—*n.* One who lives at the same time with another; as, a *contemporary* of General Washington.

Contempt, (*kôn-tem't*) *n.* [Lat. *contemptus*, from *contemno*. See *CONTEMNO*.] Act of contemning or despising; scorn; disdain; contumely; as, to have a *contempt* of meanness.

"Nothing, says Longinus, can be great, the contempt of which is great." — *Adison.*

—State of being despised; neglect; shame; disgrace; as, to fall into *contempt*.

"The place was like to come into contempt." — *Matt.*

(*Law.*) Insubordination to the rules, orders, or process of a court of competent authority. *C.* in court is punishable by fine or imprisonment; for *C.* out of court an attachment may be granted in some of the States, but in others, as in Pennsylvania, no one is guilty of a *C.* for any publication made or act done out of court, which is not in violation of the mandates, orders, or rules of the court. — A breach of privilege of either of the Houses of Congress, or State Legislatures, is punishable by that House, by censure or commitment, in the same manner as courts of justice punish for *C.*

Contemptibility, *n.* Worthy of being viewed with contempt; state of being held in contempt.

Contemptible, *a.* [L. Lat. *contemptibilis*.] Worthy of contempt; despicable; vile; mean; base; worthless; pitiful; as, a *contemptible* fellow.

"From no one vice exempt, And most contemptible to shun contempt." — *Pope.*

Contemptibleness, *n.* State or quality of being contemptible; baseness; meanness; vileness.

Contemptibly, *adv.* In a contemptible manner.

Contemptuous, (*kôn-tem'ū-us*) *a.* Manifesting or expressing contempt or disdain; scornful; apt to despise; insolent; haughty; disdainful; supercilious; contumelious; as, a *contemptuous* look.

"Contemptuous, proud, set on revenge and spite." — *Milton.*

Contemptuously, *adv.* In a contemptuous manner; with scorn or disdain; as, to be treated *contemptuously*.

Contemptuousness, *n.* Quality of being contemptuous; disposition to contempt; act of contempt; insolence; scornfulness; haughtiness.

Contend', *v. n.* [Lat. *contendo* — *con*, and *tendo*, to stretch, to strive.] To strive or to strive against; to struggle or strive in opposition; to vie; to oppose; to contest; — often followed by *with*, or *for*; as, to *contend* for a prize, to *contend* with an adversary.

"Death and nature do contend about them." — *Shaks.*

—To dispute; to debate; to wrangle; to argue; to vie in controversy; as, he *contends* he is right.

"He will find that many things he fiercely contended about were trivial." — *Decay of Piety.*

—*v. a.* To dispute or contest anything.

"A time of war at length will come, When Carthage shall contend the world with Rome." — *Dryden.*

Contend'er, *n.* One who contends; a combatant; a disputant.

"The contenders for it look upon it as undeniable." — *Locke.*

Contend'ress, *n.* A female disputant, combatant, or contestant.

Content', in Texas, a post-office of Runnels co.

Content', *a.* [Fr., from Lat. *contentus* — *con*, and *finco*, to hold.] Containing or holding what satisfies the mind; easy; having a mind at peace; satisfied; having enough; pleased, satisfied, or gratified with what one has; as, to be *content* with a competency.

"Who is content, is happy." — *Locke.*

(*Eng. Pol.*) A term used in the English House of Lords to denote the acquiescence of a member when voting in favor of a motion before the house; it is synonymous with the "Aye" of the House of Commons. (The negative is called *Non-content*.)

—*v. a.* To satisfy the mind; to appease; to make quiet; to make easy in any situation; — with the reciprocal pronoun.

"Content thyself with this much . . . that I love thee." — *Sidney.*

—To please; to gratify; to propitiate; as, to *content* the eye.

—*n.* That which is contained. — Power of containing; capacity. See *CONTENTS*.

—Rest or quietness of the mind in the present condition; moderate happiness; modest satisfaction.

"Farewell the tranquil mind! farewell content." — *Shaks.*

—Acquiescence; satisfaction without examination.

"The sense they humbly take upon content." — *Pope.*

Content'ed, *a.* Satisfied; quiet; easy and tranquil in mind.

"Barbarossa . . . seemed contented with the answer." — *Knolles.*

Content'edly, *adv.* In a contented manner.

Content'edness, *n.* State of being contented; state of resting in mind; quiet; satisfaction of mind with any condition or event.

"Angling was . . . a procurer of contentedness." — *Walton.*

Contention, (*kôn-ten'shun*) *n.* [Lat. *contentio*. See *CONTEMNO*.] Act of contending; strife; a violent effort to obtain something, or to resist a person, claim, or injury; contest; quarrel; conflict.

—Controversy; debate; strife at law.

"Litigious terms, fat contentions, and flowing fees." — *Milton.*

—Competition; emulation; vehemence of endeavor to excel; zeal in friendly debate or discussion.

"No quarrel, but a sweet contention." — *Shaks.*

Contentions, (*kôn-tên'shus*) *a.* [Fr. *contentieux*, from Lat. *contentiosus*.] Apt or disposed to contend; quarrelsome; litigious; wrangling; provoking strife or contention; as, a *contentious* temper.

"A continual dropping in a very rainy day and a contentious woman are alike." — *Prov. xxvii. 15.*

—Relating to contention or dispute; involving debate.

"Rest made them idle, idleness made them curious, and curiosity contentious." — *Decay of Piety.*

Contentious jurisdiction, (*Eccl. Law.*) See *JURISDICTION*.

Contentiously, *adv.* In a contentious or quarrelsome manner.

Contentiousness, *n.* Quality or state of being contentious; a disposition to contend; proneness to contest; perverseness; quarrelsomeness.

Content'less, *a.* Discontented; dissatisfied; wanting content.

Content'ment, *n.* [Fr. *contentment*.] State of being contented; a resting or satisfaction of mind without disquiet; acquiescence in one's present condition; contentedness.

"The noblest mind the best contentment has." — *Spenser.*

—Gratification; that which affords a pleasurable feeling to the mind.

Content'ny, or *CONTENTED CREEK*, in N. Carolina, rises in Wake co., flows S.E., and joins the Neuse River about 10 m. N.E. of Kingston.

Contents, *n. pl.* [See *CONTENT*.] The thing or things held, included, or comprehended within a limit; area or solidity; capacity; volume; extent within limits; that which is contained in a book, writing, vessel, &c.; index; as, the entire *contents* of a cask or package, the *contents* of a book, a table of *contents*, &c.

"I shall prove these writings . . . authentic, and the contents true." — *Greiv.*

Counter'minable, *a.* Susceptible of being considered as possessing the same bounds or limits.

"Love and life are not counterminable." — *Wotton.*

Counter'minal, **Counter'minate**, **Counter'minous**, *a.* [Lat. *conterminus* — *con*, and *terminus*, a boundary.] Having the same bounds or limits; bordering upon; touching at the boundary; contiguous.

Contest', *v. a.* [Fr. *contester*; Lat. *contestor* — *con*, and *testor*, from *testis*, a witness.] To call together to witness; to introduce an action by calling witnesses; to call in question; to oppose; to controvert; to debate; as, to *contest* a law-suit.

—To endeavor earnestly to defend, hold, or maintain; as, a well-*contested* battle.

(*Law.*) To defend a suit; to dispute, oppose, or resist a claim. — *Burrell.*

—*v. n.* To strive; to contend; to vie; to emulate; — generally with *with*.

"Mau . . . dares in pomp with Jove contest." — *Pope.*

Con'test, *n.* Struggle for victory, superiority, or in defence; combat; conflict; battle; encounter; shock; as, a *contest* for supremacy.

"What mighty contests rise from trivial things!" — *Pope.*

—Dispute; debate; controversy; competition.

"Leave all noisy contests . . . and brawling language." — *Watts.*

Contest'able, *a.* [Fr.] That may be disputed or debated; disputable; controvertible; as, a *contestable* base of argument.

Contest'ant, *n.* [Fr.] One who contests, debates, or litigates.

Contesta'tion, *n.* [Fr., from Lat. *contestatio*.] Act of contesting; debate; strife.

"Domestic, unsociable contestations." — *Clarendon.*

Contest'ingly, *adv.* In a contesting or contending manner.

Contestless, *a.* That which may not be questioned.

Con'text, *n.* [Lat. *contextus*, from *contexto* — *con*, and *texo*, to weave.] Connection; coherence; the general series or composition of a discourse; the parts of a discourse which precede or follow the sentence quoted; the passages of Scripture which are near the text, either before it or after it.

Context'ural, *a.* Pertaining to contexture.

Context'ure, *n.* [Fr., from Lat. *con*, and *textura*, from *texo*, *textus*, to weave.] The interweaving several parts into one body; the disposition and union of the constituent parts of a thing with respect to each other; system; texture.

"He was not of any delicate contexture; his limbs rather sturdy than dainty." — *Wotton.*

Context'ured, *a.* Woven together into one texture.

Conti, (*House of*) This younger branch of the princely French house of Condé, *q. v.*, took its name from the small town of Conti, near Amiens, and sprang from Armand de Bourbon, brother of the "Great Condé," B. 1629, D. 1666. The most remarkable member of the family was François Lotis, Prince de la Roche-sur-Yon, and Conti, B. 1664. He took a brilliant part in the victories of Steinkirk and Neerwinden, and Massillon pronounced his funeral oration. Saint-Simon, in his celebrated *Mémoires*, thus speaks of him: "He was the delight of armies, the divinity of the people, the hero of officers, the darling of parliament, and the admiration of the most learned savans." D. 1709. — The last of the House of C. was Louis François Joseph, B. 1734, D. in Spain, 1814.

Conti, (*Louise Marguerite de Lorraine, Princesse de*) celebrated for her beauty and brilliant talents, daughter of Henri, Duc de Guise, was loved by Henri IV., who proposed to marry her; she, however, married, in 1605, François de Bourbon, Prince de Conti, son of Louis de Bourbon, first Prince de Condé, who D. 1614, without issue, and cannot therefore be accounted as the founder of the above house. After his death, the Princesse de Conti privately married the famous Marshal de Bassompierre (*q. v.*), shared in his disgrace, and D. in exile, 1631.

Contignat'ion, *n.* [Lat. *contignatio*.] Act of framing together, as beams. — A frame of beams joined together; a fabric.

"Several stories or contignations." — *Wotton.*

Contigu'ity, *n.* State of being contiguous; actual contact of bodies; a touching; nearness of situation or place.

"Some boundless contiguity of shade."—Cowper.

Contig'uons, *a.* [Lat. *contiguus*—*con*, and *tango*, *tango*, to touch.] Touching one another; meeting or joining at the surface or border; adjoining; adjacent; near.

"Happiness and misery,
And all extremes, are still contiguous."—Denham.

Contig'uously, *adv.* In a manner to touch; without intervening space.

Contig'uoness, *n.* State of being contiguous; closeness of contact; contiguity.

Con'tinence, **Con'tineuey**, *n.* [Lat. *continentia*, from *continere*, *continens*—*con*, and *teneo*, to hold.] A keeping within due bounds; self-command; restraint of the desires and passions, especially of the passion for sexual enjoyment; chastity.

"Chastity is either abstinence or continence; abstinence is that of virgins or widows; continence, of married persons."—Taylor.

Con'tineut, *a.* [Lat. *continens*.] Holding or keeping within due bounds, as the passions; refraining from unlawful sexual commerce, or moderate in the indulgence of sexual pleasure; chaste; as, as *continent* as Joseph.

n. (Geog.) The large unbroken tracts of land on the earth, whether altogether or entirely disconnected, are included under this name. Thus Europe and Asia together, Africa, N. America, S. America, and Australia, may all be thus regarded. There is absolutely no natural separation between Europe and Asia; and thus, although in descriptive and political geography they are distinct, in physical geography they are one.

—The mainland of Europe, as distinguished from the British Islands.

Continental, *a.* Pertaining or relating to a continent; as, a *continental* system.—Belonging or relating to the main-land of Europe, in contradistinction to the islands belonging thereto, more especially Great Britain; as, a *continental* tour.—(Amer. Hist.) Relating, or pertaining to, the American colonies confederated during the Revolutionary War; as, the *Continental* Congress.

Continental system. (Hist.) A name given to the plan adopted by Napoleon I. for cutting off England from connection with the continent of Europe, and thus destroying her maritime supremacy. It was prominently put forward by the publication of the Berlin Decree, in 1806, which declared the British Islands in a state of blockade, and prohibited all trade in English goods. The British govt., in retaliation, issued in 1807 the famous *Orders in Council*. On the breaking up of Napoleon's power, the *C. S.* fell to the ground.

n. (Amer. Hist.) A term applied to a soldier in the Continental army during the War of Independence.

Con'tinently, *adv.* In a continent or chaste manner; moderately; temperately.

Contin'gence, **Contin'gency**, *n.* [Fr. *contingence*. See CONTINGENT.] Quality of being contingent or casual.

"Aristotle says we are not to build certain rules upon the contingency of human actions."—South.

—A fortuitous event; casualty; chance; accident; as, the *contingency* of succeeding to a fortune at a person's death.

Contin'gent, *a.* [Lat. *contingens*, from *contingo*—*con*, and *tango*, to touch.] Happening in connection with; falling or coming by chance; not definite or fixed; uncertain; as, a *contingent* event.

—Depending upon an uncertainty; fortuitous; as, *contingent* prospects.

(Law.) Dependent upon chance, with a possibility of occurrence; as, a *contingent* sum of money.

n. A fortuitous event; that which may happen; a casualty.

"By contingents we are to understand those things which come to pass without any human forecast."—Grew.

—That which falls to the lot or share of; a quota; a suitable share; just or due proportion.

(Pol.) The quota of troops to be furnished by each member of a number of states composing a confederation, as in Germany; or by each subdivision of territory to the annual recruiting of the army, as in France.

Contin'gently, *adv.* Accidentally; without design or foresight; dependently.

Contin'gentness, *n.* State of being contingent.

Contin'nable, *a.* That may be continued.

Contin'ual, *a.* [Fr. *continuel*; Lat. *continuus*. See CONTINUE.] Proceeding without interruption or cessation; not interrupting; constant; perpetual; incessant; continuous.

"'Tis all blank sadness, or continual tears."—Pope.

—Often repeated; frequently recurring; as, a *continual* nuisance.

Continual'ity, *n.* State of being continual, or of frequent recurrence.

Contin'ually, *adv.* Without pause or cessation; unceasingly; constantly; perpetually; always; as, human nature is *continually* wanting something.

—Very often; in repeated succession; as, to be *continually* falling in love.

Contin'ualness, *n.* State of being continual or permanent.

Contin'uaunce, *n.* State or time of continuing; permanence in one state; duration; perseverance; constancy; abode; definite stay.

"Continuance of evil doth in itself increase evil."—Sidney.

—Continuation; uninterrupted succession; protraction; as, the *continuance* of species.

(Law.) The adjournment of a cause from one day to another of the same, or subsequent, term. The postponement of the trial of a cause.

Contin'uate, *v. a.* [Lat. *continuate*.] To join in close contact. (R.)

Contin'uate, *a.* Immediately or intimately connected.—Uninterrupted; unbroken.

Contin'uateness, *n.* State or quality of being continuous.

Continua'tion, *n.* [Fr., from Lat. *continuatio*, from *continuo*, *continuatus*. See CONTINUE.] Act of continuing; uninterrupted succession in space or in time; extension; prolongation; propagation; as, the *continuation* of a family line.—Continuance; protraction; supplement; as, the *continuation* of a history.

Contin'uitive, *n.* (Logic.) An expression noting permanence or duration.

"To these may be added *continuatives*; as Rome remains to this day; which includes, at least, two propositions, viz.: Rome was, and Rome is."—Watts.

(Gram.) A word that serves to conjoin or connect the form of a sentence.

—*a.* That continues; as, a *continuitive* subject.

Contin'uator, *n.* One who continues or keeps up a series or succession.

Contin'ue, *v. n.* [Fr. *continuer*; Lat. *continuo*, from *continuo*, from *continere*—*con*, and *teneo*, to hold.] To hold or keep together without intermission; to remain in a state or place; to abide for any time indefinitely; to stay.

"The popular vote
Inclines me here to continue."—Milton.

—To last; to be durable; to endure; to be permanent.

"For here have we no continuing city, but we seek one to come."—Heb. xiii. 14.

—To persevere; to be steadfast or constant.

"The rain . . . continued till the earth
No more was seen."—Milton.

v. a. To add to the dimensions of; to draw out; to protract; to prolong; to extend in space or duration; to produce; to persevere or persist in; as, to *continue* to lead a moral life.

Contin'ued, *p. a.* Extended in time without intermission; uninterrupted; unceasing.

"There the series of a constant continued succession is lost."—Locke.

C. Bass. (Mus.) See THOROUGH-BASS.

C. Fever. (Med.) A fever which presents no interruption in its course.

C. Fraction. (Math.) A fraction, the numerator of which is 1, and the denominator a whole number plus a fraction whose numerator is 1, and whose denominator is a whole number plus a fraction, and so on.

Contin'uer, *n.* One who continues; a continuator.

"I would my horse had the speed of your tongue,
And so good a continuer."—Shaks.

Continuity, *n.* [Lat. *continuitas*.] State of being continuous; uninterrupted connection; cohesion; close union of parts; unbroken texture.

"It wraps itself about the flame, and by its continuity hinders any air or nitre from coming."—Addison.

Law of C. (Phys.) A principle of considerable use in investigating the laws of motion, and of change in general, and which may be thus enunciated: *Nothing passes from one state to another without passing through all the intermediate states.* The argument on which Leibnitz attempted to establish it a priori, is, that if any change were to happen without the intervention of time, the thing changed must be in two different conditions at one and the same instant, which is obviously impossible.

Principle of C. (Geom.) A kind of postulate of great utility as a mode of discovery. According to it, any property of a geometrical figure which has been once established will still hold, (though it may possibly have to be differently enunciated and demonstrated,) through all the successive states through which the figure may be conceived to pass. Thus, since two conics which do not intersect in more than two real points may always be projected into two circles, it is obvious that all descriptive properties of two circles, *e. g.*, those concerning their centres of similitude, &c., remain true for the projected conics. The property of intersecting, however, being merely *contingent*, or dependent upon position solely, the principle of continuity teaches that two conics which intersect, even in four real points, and which, consequently, cannot be projected into two circles, also possess the descriptive properties in question.

Contin'uous, *a.* [Lat. *continuus*.] Joined together closely or without intervening space or interruption; conjoined; connected; continued; as, a *continuous* system of telegraphs.

(Bot.) Not interrupted; not deviating from uniformity.

Contin'uously, *adv.* In continuation; without interruption.

Contoocook River, in New Hampshire, rises in Cheshire co., traverses Hillsborough and Merrimac cos., and enters the Merrimac River abt. 8 m. N. of Concord.

Contoocook Village, in New Hampshire, a post-village of Merrimac co., about 10 m. W. of Concord.

Contor'sion, *n.* Same as CONTORTION, *q. v.*

Contort', *v. a.* [Lat. *contorqueo*, *contortus*—*con*, and *torqueo*, to twist.] To twist together; to cause to writhe; to wring; to pull awry.

"Air seems to consist of spires contorted into small spheres."—Cheyne.

Contort'ed, *p. a.* Twisted over each other in oblique directions; as, a *contorted* limb.

(Bot.) Applied to a part of a plant folded or twisted back upon itself, as the root of *Polygonum distorta*.—Also, in aestivation, to the subordinate parts of the corolla when they are set obliquely, and overlap each other in succession.

Contor'tion, *n.* [Fr. *contorsion*, from Lat. *contortio*. See CONTORT.] A twisting together; a writhing; a wrestling; a twist; wry motion; distortion.

"It has all the contortions of the sibyl, without the inspiration."—Burke.

(Med.) Violent movement of a part, accompanied with a kind of torsion, twist, or cast; as, *contortion* of the face.

Contort'ive, *a.* Displaying contortion.

Contortu'plicate, *a.* [From Lat. *contortus*, and *plicare*, to fold.] (Bot.) Twisted and folded.

Contour, (*kon-toor'*) *n.* [Fr. *contour*—*con*, and *tour*; It. *torno*, a turn, from Lat. *turnus*, a turner's wheel; Gr. *tornos*, a carpenter's tool for drawing a circle.] The line that bounds a rounded body; the outline.

(Fine Arts.) The external lines which bound and terminate a figure. The beauty of *C.* consists in those lines being flowing, lightly drawn, and sinuous. They must be carefully and scientifically drawn; and this cannot be done without a thorough knowledge of anatomy.

(Mil.) The outline of a horizontal section of fortified works.

Contour of ground. (Trigon.) A horizontal section of ground, so called in surveying. These sections are taken at some fixed vertical interval from each other, suited to the scale of the drawing, or to the subject in hand; and the distance of each, above or below some assumed plane of comparison, is given in figures at the most convenient places on the plan. When the scale of the drawing is about 100 feet to an inch, 2 or 3 feet will be found a convenient vertical interval between the *C.*; and, however large the scale of the plan, it will scarcely be found necessary to obtain *C.* with a less vertical interval than 2 feet.

Contour'niated, *a.* Having furrowed edges.

Contoy', or LOG'GERHEAD, in the Caribbean Sea, an island off the coast of Yucatan, 16 m. W. by N. of Cape Catoche. Lat. 21° 32' N., Lon. 86° 49' W.

Con'tra, a Latin preposition signifying *against*, *over*, *opposite*, *in opposition*, &c., and entering into the composition of many English words.

(Bookkeeping.) The term usually placed at the head of the *Cr.* or *creditor* page in a cash-book; as *conter* to, or *against* the entries on the opposite or *debtor* (*Dr.*) page.

Con'traband, *a.* Contrary to law; prohibited; forbidden; as, *contraband* goods.

n. [It. *contrabbando*, goods prohibited by law; Lat. *contra*, against, and L. Lat. *banum*, a public edict. See BAN.] Illegal traffic; prohibition of trading in goods contrary to the laws of a state, or of nations.

—In the United States, a term applied to a negro slave. This word was first applied by Gen. B. F. Butler, during the late civil war, to all captured negroes, on the ground, that, being of use to their masters in furthering military operations, they were hence *contraband* of war. It is no longer in use.—*Contraband of war.* (Law.) Such articles as a belligerent has, by the law of nations, the right of preventing a neutral from furnishing to his enemy. Articles *C.* of war are, in general, arms and munitions of war, and those out of which munitions of war are made. All these are liable to be seized; but very arbitrary interpretations have been affixed to the term by powerful states, when able to enforce them by arms.

Con'trabandist, *n.* [Sp. *contrabandista*.] A smuggler; one who engages in an illegal traffic.

Con'tra-bas'so, CONTRA-BASS, DOUBLE-BASS, *n.* [It. *contra-basso*.] (Mus.) The largest of the violin species of string and bowed instruments, of which it forms the lowest bass.

Con'tra Cos'ta, in California, a N.W. central co.; area, about 800 sq. m. The Bay of San Francisco bounds it on the W., as does the San Joaquin on the E., and San Pablo and Suisun bays on the N. It is drained by San Ramon, Nueces, Jugerto, Hambro, and San Pablo creeks and other smaller streams. Soil, generally fertile. Cap. Martinez. Pop. (1890) 13,515.

Contract', *v. a.* [Lat. *contraho*, *contractus*—*con*, and *traho*, to draw.] To draw together or nearer; to draw into a less compass; to cause to shrink; to wrinkle; to shorten; to narrow; to abridge; to lessen; to confine; as, to *contract* the forehead.

"Why love among the virtues is not known,
It is that love contracts them all in one."—Donne.

—To bargain for; to covenant; to stipulate by mutual obligations; as, to *contract* an alliance offensive and defensive.

"But first contracted, that if ever found,
His head should pay the forfeit."—Dryden.

—To betroth; to affiancé; as, to *contract* a marriage.

"She was . . . contracted to a man of merit and quality."—Tatler.

—To draw to; to bring on; to get; to obtain; to incur; as, to *contract* a debt.

"And each from each contract new strength and light."—Pope.

(Gram.) To reduce two vowels into a diphthong; thus, *oe*, *æ*.

v. n. To shrink up; to become less in bulk; to become shorter or narrower; as, *contracted* fibres.

—To bargain; to stipulate; to make a mutual agreement; as, to *contract* to build a ship.

Con'tract, *n.* A coming together, to make an agreement; an agreement or covenant; a bargain; a compact; also, the deed of writing recording the same; as, a post-office contract.

—An act of betrothment or affiancé; as, a marriage contract.

(Gram.) A word wherein concurrent vowels are contracted.

(Law.) The term usually applied to such agreements (whether express or implied,) as create, or are intended to create, a legal right, and corresponding liability; such

ght not attaching to the possession of the subject-matter of the contract, except in equity, and that indirectly, not subsisting both in equity and law against the contracting party. The conditions essential to the legal validity of a contract relate either to the competency of the parties, the sufficiency of the consideration or incentive, the nature of the thing contracted for, the fitness of the transaction, or, lastly, to the form of the agreement. And, first, as to the competency of the parties. The party to be sued must have been at the time of the contract of sound mind, and, unless it was for the supply of necessities, of full age; and if a woman, she must have been unmarried, subject as to the latter condition to some exceptions established either by local custom or by the doctrines of equity. 2d. As to the sufficiency of the consideration on the part of the person suing. It must have been either future marriage since reformed, or money, or something capable of being estimated in money; or some act, whether of performance or abstinence, whereby some undoubted advantage, though not capable of being exactly valued, accrues to the party sued. 3d. The act contracted for must be either contrary to written law, nor to public policy; and it must be beneficial to the party seeking either performance or compensation, or to some one on whose behalf he gave the consideration. 4th. There must have been neither fraud (either by concealment or misstatement) nor compulsion on the part of the plaintiff in obtaining the agreement; and fraudulent acts subsequent to the agreement having reference to it are also sufficient to deprive the guilty party of all right under it. Some circumstances are in equity considered either as conclusive evidence of fraud, or as substantive acts of coercion, which are not strictly of such a nature, and are not so deemed at law. Lastly, as to the form of the agreement. Where it relates to an interest in land of three years' duration or more, or to goods of the value \$50 or upwards, unless there be earnest or delivery, where it is an agreement as surety, or where it is on marriage as a consideration, it must, by American law, be in writing; though the want of a written instrument may be supplied in equity by partial performance, that is, by acts evidently done in pursuance of the alleged contract.

Contracted, *p. a.* Drawn together; narrow; mean; fish; betrothed; as, a *contracted* fibre, a *contracted* nail, a *contracted* couple, &c.

Contractedly, *adv.* In a contracted manner.

Contractedness, *n.* State of being contracted; narrowness; meanness.

Contractibility, *n.* Capability of being contracted; quality of permitting contraction; as, the *contractibility* of heat.

Contractible, *a.* Capable of contraction.

Contractibleness, *n.* Quality of suffering contraction.

Contractile, *a.* [Fr.] Tending to contract; having the power of contracting, as living fibres.

The arteries are elastic tubes, endued with a *contractile* force." *Arbuthnot.*

Contractility, *n.* Quality of being contractile; inherent property by which bodies contract or shrink.

(*Physiol.*) The power which certain tissues have, during life, of shortening themselves in a peculiar manner; is usually observed in muscular and some kinds of cellular tissue; but is also exercised by a series of cells, as in the *Hydra* polype.

Contraction, *n.* [Fr.; from Lat. *contractio*.] Act of contracting or drawing together; act of shortening; narrowing in quantity or extent; abbreviation; curtailment.

The main parts of the poem . . . no translator can prejudice, by omissions or contractions." — *Pope.*

—te of being contracted; narrowed, lessened, or shrivelled; as, *contraction* of the stomach. (Opposed to *dilatation*.)

Gram. The shortening of a word by the omission of a letter or syllable. The Greek language abounds in contractions, which have been adopted chiefly to avoid a harshness in the pronunciation arising from the concurrence of two vowels in two successive syllables of words. Hence two or more simple vowels coming together are usually contracted into a diphthong. This is called to be *proper* when they are contracted without change into a diphthong; *improper*, when, in the contraction a vowel or diphthong of a different sound is substituted. *Elision* takes place when two vowels at the end of one and at the beginning of another word come together, and the final vowel of the first word is rejected, place being marked by an apostrophe placed over the sonant which is left. This takes place chiefly with poets. *Crisis* is that kind of contraction in which two words coalesce into one, and are accented as one, without any elision. In *synthesis* two vowels are contracted into one sound—not in writing, but in pronunciation. In the Middle Ages, before the introduction of printing, numerous contractions were resorted to for the purpose of abbreviating the labor of transcription.

Math. The process of abridging any problem.

Med. *Contractura*, a state of permanent rigidity and excessive atrophy of the flexor muscles, which prevents the motions of extension beyond a certain limit. The affected muscles form hard cords beneath the skin. On dissection, they are found to be converted into tendinous fibres, the fleshy fibres having almost disappeared. When the disease has been of any duration. It frequently succeeds other diseases, particularly rheumatism, neuralgia, convulsions, syphilis, colica picrotonum. The warm bath, vapor bath, or thermal waters, &c., are the chief means of treatment. — *Danlison.*

Contractive, *a.* Tending to, or permitting, contraction.

Contractor, *n.* One who contracts; one of the parties to a covenant or bargain; as, a government *contractor*.

"All matches, friendships, and societies, are dangerous and inconvenient, where the *contractors* are not equals." *L'Estrange.*

Contra-dance, *n.* See COUNTRY-DANCE.

Contradict, *v. a.* [Lat. *contradico*, *contradictus* — *contra*, and *dico*, to speak.] To speak against or in opposition to; to oppose by words; to assert the contrary to what has been previously asserted; to deny; to gainsay; as, to *contradict* a false report.

—To oppose by being contrary to; to impugn; to resist; to correct; as, to *contradict* the expectations of one's friends.

"No truth can *contradict* another truth." — *Hooker.*

Contradictable, *a.* That may be contradicted or denied.

Contradictor, *n.* One who contradicts or opposes.

"If a gentleman is a little sincere in his representations, he is sure to have a dozen *contradictors*." — *Swift.*

Contradiction, *n.* [Lat. *contradictio*.] Act of contradicting; a gainsaying; opposition by words; denial; a contrary assertion; as, a flat *contradiction*.

"That tongue, inspired with *contradiction*, durst oppose . . . the gods." — *Milton.*

—Inconsistency with itself; incongruity, or contrariety; repugnancy; as, his life is a *contradiction*.

"Woman's at best a *contradiction* still." — *Pope.*

Contradictional, *a.* Inconsistent; incongruous.

Contradictions, (*kôn-tră-dik'shns*), *a.* Filled with contradictory qualities; inconsistent. — Inclined to contradict, question, or cavil. (R.)

Contradictiousness, *n.* Inconsistency; self-contrariety.

"This opinion was, for its absurdity and *contradictiousness*, unworthy of the refined spirit of Plato." — *Norris.*

Contradictive, *a.* Containing contradiction; opposite; adverse; as, a *contradictive* assumption.

Contradictively, *adv.* By contradiction.

Contradictor, *n.* A contradicter; one who contradicts.

Contradictorily, *adv.* In a contradictory manner.

Contradictoriness, *n.* Opposition in the highest degree.

Contradictory, *a.* Implying contradiction; affirming the contrary; implying a denial of what has been asserted; as, *contradictory* accounts. — Inconsistent; opposite; contrary; as, a *contradictory* meaning.

(*Logic*) *Propositions* (*Logic*) are the opposites of each other: the one being a mere and naked denial of the other. To be truly contradictory, they must have the same terms, and differ both in quantity and quality. — the one *denying*, and the other *affirming*, the same thing of the same subject considered in the same circumstance.

—*n.* A proposition which denies or opposes another in all its terms; inconsistency; contrariety.

"It is common to princes to will *contradictories*." — *Bacon.*

Contradistinction, *n.* Distinction by opposite qualities.

Contradistinctive, *a.* Distinguishing by opposites.

Contradistinction, *v. a.* [Contra, and *distinguish*.] To distinguish, not merely by differential, but by opposite qualities; to show, or declare the opposite qualities of.

"Body as *contradistinguished* to spirit." — *Locke.*

Contradistincture, *n.* [From *contra*, and *findo*, to cleave; Fr. *contre-coup*.] (*Med.*) A fracture in a part opposite to that in which the blow is received; as when the frontal bone is broken by a fall on the occiput, the bone of which remains sound.

Contragredient, *a.* [Lat. *contra*, and *gradior*, I go.] (*Math.*) Two or more variables are said to be *contragredient* to as many others when, on replacing those of the first set by linear functions of themselves, those of the second set become replaced by linear functions of themselves respectively inverse (or reciprocal) to the former; in other words, when the new variables, of the one set, bear to the old the same relations that the old do to the new, of the other set.

Contra-indicant, *n.* [Lat. *contra*, and *indico*, *indicans*, to indicate.] (*Med.*) A symptom that forbids the usual treatment of a disorder.

Contra-indicate, *v. a.* (*Med.*) To indicate a treatment contrary to that used in the ordinary cause of a disorder.

Contra-indication, *n.* (*Med.*) A symptom attending a disease, which forbids the exhibition of a remedy which would otherwise be employed; for instance, lark and acids are usually given in putrid fevers; but if there be difficulty of breathing, or inflammation of any viscera, they are *contra-indications* to their use.

Contralto, *n.* [It.] (*Mus.*) The deepest kind of female voice, or that part in the score whose range of tones lies between that of the tenor, and that of the soprano or treble; also called the *alto*, or *counter-tenor*.

—*a.* Relating or belonging to the musical part immediately below the treble called contralto, or to a contralto; as, a *contralto* voice.

Contramure, *n.* [Fr. *contremur*, from *contre*, against, and *mur*, a wall.] (*Fortif.*) An outer wall built about a fortification.

Contra-natural, *a.* Opposite to nature. (R.)

Contra-position, *n.* [Contra and *position*.] A placing over against; opposite position.

Contrapuntal, *a.* [See COUNTERPOINT.] (*Mus.*) Pertaining to counterpoint. (R.)

Contrapuntist, *n.* [It. *contrappuntista*.] (*Mus.*) A professor of counterpoint; one skilled in counterpoint.

Contra-regularity, *n.* Contrariety to rule. (R.)

Contra-remonstrant, *n.* One who remonstrates in reply to a remonstrant.

Contraries, *n. pl.* [See CONTRARY.] (*Logic*.) Propositions which confute each other, but of which the falsity of the one does not establish the truth of the other.

"If two universals differ in quality, they are *contraries*; as, every vine is a tree; no vine is a tree. These can never be both true together, but they may be both false." — *Watts.*

Contrariety, *n.* [Lat. *contrarietas*. See CONTRARY.] State or quality of being contrary; opposition; disagreement; repugnance; as, *contrariety* of tempers.

"Their religion had more than negative *contrariety* to virtue." *Decay of Piety.*

—Inconsistency; some quality which is contrary to another.

"He will be here, and yet he is not here; How can these *contrarieties* agree?" — *Shaks.*

Contrarily, *adv.* In a contrary or opposite manner.

Contrariness, *n.* Contrariety; opposition; capriciousness; as, the *contrariness* of a spoiled child.

Contrarious, *a.* Opposite; manifesting contrariety.

"She flew *contrarious* in the face of God." — *E. B. Browning.*

Contrariouly, *adv.* Oppositely; contrarily.

"Many things, having full reference To one consent, may work *contrariouly*." — *Shaks.*

Contrariwise, *adv.* On the contrary; oppositely; on the other hand; as, things went *contrariwise* to my anticipations.

—Conversely; in a contrary sense or form.

"Everything that acts upon the fluids, must, at the same time, act upon the solids, and *contrariwise*." — *Arbuthnot.*

Contra-rotation, *n.* Opposite rotation.

Contrary, *a.* [Lat. *contrarius*, from *contra*, against; Fr. *contraire*.] Opposite; adverse; repugnant; hostile; discordant; contradictory; inconsistent; as, *contrary* dispositions.

"But what can be *contrary* to the mind, Which holds all contraries in concord still?" — *Davies.*

—Perverse; changeable; froward; capricious; as, *contrary* winds, a *contrary* choice.

—*n.* A thing that is contrary, or of opposite qualities.

—A proposition contrary to another, or a fact contrary to what is alleged.

"The instances brought by our author are but slender proofs of a right . . . and do rather shew the *contrary*." — *Locke.*

(*Logic*.) Opposed in quality. — See CONTRARIES.

On the *contrary*, in opposition; on the other side.

"He pleaded still not guilty; The King's attorney, on the *contrary*."

Urged on proofs . . . of various witnesses." — *Shaks.*

To the *contrary*, to a contrary purpose; to an opposite intent.

"They did it, not for want of instruction to the *contrary*." *Stillinger.*

Contrast, *v. a.* [Fr. *contraster*; Lat. *contra*, and *sto*, to stand.] To set or place in opposition, to show the difference or dissimilarity; to exhibit the difference; as, to *contrast* two faces.

(*Fine Arts*.) To place in opposition so as to set off or heighten the effect; as, to *contrast* colors.

—*v. i.* To stand in contrast or opposition to; as, *contrasted* tastes.

Contrast, *n.* Opposition and dissimilitude of things or qualities; exhibition of differences.

(*Fine Arts*.) An opposition of lines or colors to each other, so contrived that the one gives greater effect to the other. By means of contrast, energy and expression are given to a subject, even when employed on inanimate forms. All art is indeed a system of contrasts; lights should contrast with shadows, figures with figures, members with members, and groups with groups. It is this which gives life, soul, and motion to a composition. The very principle of harmony or symmetry, in ornamental art, is contrast; one half of a symmetrical figure being the exact opposite or contrast of the other. Any form or group of lines, without meaning in itself, may become when repeated in reverse, or contrasted with itself, a beautiful form, because it at once acquires the elements of symmetry.

Contra-tenor, *n.* [It. *contra-tenore*.] (*Mus.*) Counter-tenor, or that part of a male voice which is between the tenor and treble; contralto.

Contrate-wheel, *n.* (*Mach.*) See CROWN-WHEEL.

Contravallation, *n.* [Fr. *contravallation*; Lat. *contra*, and *vallo*, *vallatus*, to fortify.] (*Fortif.*) An entrenchment formed by the besiegers between their camp and the place besieged, to secure themselves and check the sallies of the garrison. The line of *contravallation* is thus, as the name implies, — a sort of counter-fortification.

Contravariant, *a.* (*Math.*) Applied to any quantity so derived from a given system of quantities as to be equal, in virtue of any unimodular and linear transformations of its variables, to the quantity derived in the same manner from the system to which the given one is transformed by linear substitutions reciprocal, or opposite, to the first.

Contravene, *v. a.* [Lat. *contravenio* — *contra*, and *venio*, to come.] To oppose; to obstruct; to hinder; to set aside; as, to *contravene* a proposition.

Contravener, *n.* One who contravenes or sets aside.

Contravention, *n.* [Fr.] Opposition; obstruction; a defeating of the operation or effect of anything.

Contraversion, *n.* An opposite version; an antistrophe.

Contrayer, *v. a.* [Sp.] (*Bot.*) See DISTENTIA.

Contreras, in *Ohio*, a post-office of Butler co.

Contre-ras Islands, in the N. Pacific Ocean, a group of small islands off the S.W. coast of Guatemala, province of Veragua; Lat. 5° 50' N., Lon. 82° W.

Contretemps, (*kôn-tră-tāng*), *n.* [Fr.] Any unexpected

event which occurs to confuse or obstruct the common course of things or affairs.

Contributable, *a.* That may be contributed.

Contributory, *a.* Contributing to the same end; paying tribute, or contributing aid to the same sovereign or state; as, *contributory* means.

Contribute, *v. a.* [Lat. *contribuo*, *contributus* — *con*, and *tribuo*, to give.] To give or grant in common with others; to give to a common stock, or for a common purpose; to pay a share; to impart a portion or share to a common purpose.

"England contributes much more than any other of the allies." — Addison.

—*v. i.* To give a part; to impart; to administer; to contribute; to promote; to forward; to participate in.

"We are engaged in war; the secretary of state calls upon the colonies to contribute." — Burke.

Contribution, *n.* [Fr.; Lat. *contributio*.] Act of contributing, or aiding in, the furtherance of an object.

—That which is contributed; a share; bestowal of aid to a common purpose; a charitable collection.

"Beggars are now maintained by voluntary contributions." — Graunt.

(Mil.) A levy; a tax; an imposition levied upon the people of an enemy's country; as, forced contributions.

(Law.) A payment made by each sharer in an accrued general loss, to make good the amount advanced by one of the number for the common benefit; as, a contribution to general average.

Contributious, *a.* Pertaining to a contribution; paying to a contribution.

Contributive, *a.* Tending to contribute; having the quality of contributing; lending aid to promote in concurrence with others.

Contributor, *n.* One who contributes; as, a contributor to the public charities, a contributor to a periodical, &c.

"A cheerful contributor to all public expenses." — Atterbury.

Contributory, *a.* Contributing to the same stock or purpose; promoting to the same end; bringing assistance to the same design; as, *contributory* values.

Contrite, *a.* [Lat. *contritus*, from *contero* — *con*, and *tero*, to bruise, rub, or wear.] Broken-hearted for sin committed; deeply affected with grief and sorrow for having offended God; penitent; repentant; as, a contrite heart.

"The contrite sinner is restored to pardon . . . through faith in Christ." — Rogers.

Contritely, *adv.* In a contrite manner; penitently.

Contriteness, *n.* Contrition; repentance.

Contrition (*kon-trish'un*), *n.* [Lat. *contritio*.] (Theol.) Deep sorrow for sin, arising from the thought of having offended an infinitely holy and benevolent God. It is usually understood to mean genuine repentance, and to be accompanied with a detestation of sin, and of one's self, on account of having committed it.

Contriturate, *v. a.* [*con*, and *trituro*, *q. v.*] To pulverize; to comminute; to reduce to small particles.

Contrivable, *a.* That may be contrived; capable of being planned, invented, or devised.

Contrivance, *n.* Act of contriving, devising, planning, forming, or inventing.

"Instructed, you'll explore,
Divine contrivance, and a God adore." — Blackmore.

—The thing contrived; device; plan; scheme; invention; design; machination; shift; an artifice; a skilful or ingenious performance.

"Government is a contrivance of human wisdom to provide for human wants." — Burke.

Contrive, *v. a.* [Fr. *controuer* — *con*, and *trouver*, to find; Ger. *treffen*, to hit, to reach; O. Ger. *treffen*, to hit, to strike.] To invent; to discover; to devise; to plan; to concert; to plot; to hatch.

"The chest contriv'd a double debt to pay,
A bed by night, a chest of drawers by day." — Goldsmith.

—*v. i.* To form or design; to plan; to scheme.

"Masking habits, and a borrowed name,
Contrive to hide my plenitude of shame." — Prior.

Contrive, *v. a.* [Lat. *contrivere*.] To wear out by use; to spend; to get rid of.

"Please ye, we may contrive this afternoon." — Shaks.

Contriver, *n.* An inventor or schemer; one who plans or devises.

Control, *n.* [Fr. *contrôle* — *contre*, and *rôle*, from Lat. *rotulus*, *rotula*, a little wheel; dim. of *rota*, a wheel; akin to Sansk. *ratha*, a chariot. In l. Lat. *rotulus* or *rotula* means a paper rolled into the form of a wheel, whence its name. Originally, a roll of papers or register.] Check; restraint.

"Speak . . . for common good, and speak without control." — Dryden.

—Power; authority; government; command; superintendence.

—*v. a.* [Fr. *contrôler*.] To overlook; to superintend; to restrain; to curb; to govern; to direct; to regulate; to overpower; to subject; as, to control the populace.

"Give me a staff of honour for my age;
But not a sceptre to control the world." — Shaks.

Controllable, *a.* That may be controlled; subject to command.

"Passion is the drunkenness of the mind . . . not controllable by reason." — South.

Controller, *n.* One who controls, governs, or restrains.

"The great controller of our fate." — Dryden.

See **COMPTROLLER**.

Controllership, *n.* The office of a controller.

(Sometimes written *comptrollership*.)

Controlment, *n.* Power or act of controlling; state of being controlled; control; restraint; opposition; resistance.

"Here we have war for war, and blood for blood,
Controlment for controlment." — Shaks.

Controversial, *a.* Relating to controversy or disputes; polemical disputations; as, "*Controversial* discourses."

Controversialist, *n.* A disputant; one who carries on a controversy.

Controversially, *adv.* In a controversial manner.

Controversor, *n.* One who engages in controversy.

Controversy, *n.* [Lat. *controverſia*. See **CONTOVERT**.] Opposition in debate or dispute; a disputation or discussion between parties, particularly in writing; a dispute; a contest; a debate; disputation; strife; litigation.

"The Lord hath a controversy with the nations." — Jer. xxv. 31.

Controvert, *v. a.* [Lat. *controversor*, to be at variance — *contra*, and *versor*, to turn one's self about in; frequentative of *verto*, *versus*, to turn, to turn around.] To dispute or oppose by reasoning; to contend against in words or writings; to deny, and attempt to disprove or confute; to agitate contrary opinions against.

"If any person shall think fit to controvert them, he may do it very safely for me." — Cheyne.

Controverter, *n.* A controversialist; a controversial writer.

Controvertible, *a.* That may be controverted; disputable.

"Matters dubious, and many controvertible truths." — Browne.

Controvertibly, *adv.* In a controvertible manner.

Controvertist, *n.* One who controverts; a controversialist.

"This prince of controvertists, this great lord and professor of first principles." — Tillotson.

Contrition, *n.* The act of squeezing or pressing together.

Contumacious, *a.* [Lat. *contumax*, *contumacis*; probably from *con*, and *tumeo*, to swell up.] Opposing rightful authority with pride and stubbornness; stubborn; obstinate; perverse; inflexible; headstrong; wilful; disobedient; as, a contumacious priest.

"There is a method for subduing . . . the most contumacious sinner." — Hammond.

Contumaciously, *adv.* Obstinate; stubbornly; perversely; in disobedience of orders.

Contumaciousness, *n.* Quality of being contumacious; obstinacy; stubbornness; contumacy.

"The difficulty and contumaciousness of cure." — Wiseman.

Contumacy, *n.* [Lat. *contumacia*, from *contumax*. See **CONTUMACIOUS**.] Unyielding resistance to rightful authority; obstinacy; stubbornness; perverseness.

"Such acts
Of contumacy will provoke the Highest." — Milton.

(Law.) The refusal or neglect of a party accused to appear or answer to a charge preferred against him in a court of justice.

Contumax, *n.* [Lat.] (Law.) One who, being accused of a crime, refuses to appear and answer to the charge.

Contumelious, *a.* [Lat. *contumeliosus*, from *contumelia*. See **CONTUMELIOUS**.] Contemptuous; insolent; rude and sarcastic; haughtily contemptuous; proudly rude; shameful; ignominious; as, a contumelious taunt.

"Contumelious, beastly, mad-brained war." — Shaks.

Contumeliously, *adv.* In a contumelious or insolent manner.

Contumeliousness, *n.* Rudeness; contemptuous behavior; state of being contumelious.

Contumely, *n.* [Lat. *contumelia* — *con*, and *tum*, root of *tumeo*, to swell.] Rudeness, or reproach compounded of haughtiness and contempt; contemptuousness; insolence; contemptuous language.

"Th' oppressor's wrong, the proud man's contumely." — Shaks.

Contuse, *v. a.* [Lat. *contusus*, from *contundo* — *con*, and *tundo*, to beat; Fr. *contusionner*.] To beat, bruise, crush, pound, or break to pieces; to bruise; to bray.

"Roots, herbs, and seeds contused together." — Bacon.

—To injure by a blow or pressure, without breaking the skin or substance; as, a contused brain.

Contusion, *n.* [Fr., from Lat. *contusio*.] Act of beating or bruising.

—State of being beaten or bruised.

(Surg.) An external injury so nearly resembling a bruise that the same description may generally answer for both. Each is an injury inflicted by a blunt instrument, and may be effected by blows, falls, or collisions, and is attended with discolorations and swelling. Contusions are generally more severe than bruises, and are divided into those called *simple* and *compound*. The simple *C.* differs little from a bruise, and presents a discolored and partly swollen surface, large or small according to the severity of the blow or fall. A black eye is as often a *C.* as a bruise. *C.* require, in most instances, the same treatment as the former, and should consist in applying a pledget of lint well soaked in extract of lead, which generally will be found sufficient, in one or two applications, to cure the accident. — A compound *C.* is a much more serious injury, for, in addition to the cutting or abrasion of the skin, the cellular tissue and muscles beneath are often so seriously disorganized as to be reduced to a state of pulp. Such accidents are always more serious over bones thinly covered with flesh, as then the parts injured are liable to mortify and slough. The treatment in such cases consists in first laying the torn or cut skin as smooth and natural as possible, removing any sand or stones, applying, as in the former case, a pledget wetted with the extract of lead, and laying a warm bran poultice over all.

Contwoy-To, or **RUM LAKE**, in British N. America, in the country of the Copper Indians, intersected by the parallel of 65° 31' N., and the meridian of 111° 50' W.

Conundrum, *n.*; *pl.* **CONUNDRUMS**. [Ety. uncertain.] A sort of riddle, in which some quaint or odd resem-

blance is proposed for discovery between things perfectly unlike; as, for instance: When is a plaut like a hog? — When it begins to root. — A quibble; a low jest.

Conus, *n.* [Lat., a cone.] (Bot.) Same as **CONE**, *q. v.* (Zool.) An extensive genus of univalve mollusca, or *Gasteropoda proper*, the shells of which are thick, a

Fig. 671. — CONUS MARMOREUS, (China.)

rolled up, as it were, in a conical form. They are found principally in the southern and tropical seas, and many of them are very beautiful, both in shape and color. The mollusc is much compressed and involved; the head very distinct, terminated by a trunk capable of great extension; two tentacula, with eyes near the summit, foot, oval and long.

Con'sance, *n.* See **COGNIZANCE**.

Con'sant, *a.* Same as **COGNIZANT**, *q. v.*

Con'sor, *n.* See **COGNIZOR**.

Convalesce, (*kon-va-lēs'*) *v. n.* [Lat. *convalesco* — *con*, and *valeo*, to be strong.] To recover health and strength after sickness.

Convalescence, **Convales'cence**, *n.* [Fr. *convalescence*; Lat. *convalescentia*.] Renewal of health the insensible recovery of health and strength after disease; state of a body renewing its vigor after sickness or weakness.

"She recovered her spirits to a reasonable convalescence." — Shaks.

Convales'cent, *a.* [Fr.] Recovering health and vigor after sickness or debility.

—*n.* One recovering or recovered from sickness.

Convales'cently, *adv.* With a renewal of health and strength.

Convallaria, *n.* [From Lat. *convallis*, a valley.] (*B.*) The Solomon's Seal, and Lily of the Valley, a genus of plants, ord. *Liliaceae*. They are plants with simple and alternate leaves; flowers in terminal racemes umbels, reddish or greenish-white. Among the species which inhabit the U. States is *C. bifolia*, the two-leaved Solomon's Seal, a small plant, frequent along the edge of woodlands from New England to Wisconsin; and *majalis*, the Lily of the Valley, an elegant, sweet-scented plant, native of woods at the South; leaves 2-3, ovate elliptical; scape 6 high, with white flowers depend from its upper half in a single rank. It is, or deserves to be, a frequent inhabitant of our gardens.

Convec'tion, *n.* [Lat. *convectio*, from *convecto*, *convectus* — *con*, and *veho*, to carry.] Act of conveying, bringing, or transmitting.

(Phys.) The *C. of heat* is the transmission of heat actual contact, in opposition to *radiation*.

Convective, *a.* Occasioned by convection.

Convectively, *adv.* In a convective manner.

Conven'able, *a.* That may be convened or assembled.

Convene, *v. n.* [Lat. *convenio* — *con*, and *venio*, to come.] To come together; to associate; to meet; to unite.

"The rays converge and convene in the eyes." — Newton.

—To assemble for any public purpose; as, to convene meeting of citizens.

"The parliament of Scotland now convened." — Baker.

—*v. a.* To cause to come together or assemble; to call together; to convoke.

"No man was better pleased with the convening of this parliament than myself." — King Charles I.

—To summon to meet and appear by judicial authority.

"By the papal canon law, clerks, in criminal and civil cases cannot be convened before any but an ecclesiastical judge." — Ayton.

—To be suitable to. (An Americanism.)

Conven'ce, *n.* One summoned to appear with others.

Conven'er, *n.* One who convenes or calls an assembly together. (Used in Scotland; as, a county-conven'er.)

Convenience, **Conven'ience**, *n.* [Lat. *convenientia*; Fr. *convenience*.] State of being convenient; fitness of time or place; suitableness; propriety; adapt-

ness.

"Convenience is, when a thing or action is so fitted to the circumstances, and the circumstances to it, that thereby it becomes a thing convenient." — Perkins.

—Commodiousness; ease; accommodation; freedom from discomfort or difficulty.

"The value is the same, and the convenience greater." — South.

—That which is convenient; cause of ease, comfort, or accommodation.

"A pocket-perspective, and other little conveniences." — South.

Convenience, in *Ohio*, a post-village of Fayette county, about 25 m. N.W. of Chillicothe.

Conven'ient, *a.* [Lat. *conveniens*, from *convenio*. See **CONVENE**.] Concurring; agreeing; according; fit; suitable; adapted; fitted; suited; proper; as, a convenient hour.

"The least and most trivial episodes . . . are either necessary or convenient." — Dryden.

—Commodious; tending to, or productive of, ease, comfort, or advantage.

"Feed me with food convenient for me." — Prov. xxx. 8.

Conveniently, *adv.* In a convenient manner; fit; suitably; commodiously.

"I this morning know
Where we shall find him most conveniently." — Shaks.

Con'vent, *n.* [O. Fr. *convent*; Fr. *convent*; Lat. *conventus*, from *convener*.] A community of persons devoted to religion; a body of monks or nuns; as, a convent of Ursulines.

"The reverend abbot,

With all his convent, honourably received him."—*Shaks.*

—An abbey; a monastery; a nunnery; a monastic house; as, the convent of Port-Royal.

Convent, in Louisiana, a post-office of St. James co.

Convent'ial, *a.* Pertaining, or relating, to a convent.

Convent'iale, *n.* [Lat. *conventiculum*, dim. of *conventus*.] A minor assembly or meeting.

(*Ecc. Hist.*) A cabal, or secret assembly, of a part of the monks of a convent to form a party in the election of an abbot. It is said by some to have been first applied in England to the schools of Wickliffe, and has since been used by way of reproach for those religious assemblies which dissent from the established church of England. In 1664, what is called the *C. Act* was passed, decreeing that if any person or persons above 16 years of age were present at any meeting for worship different from the Church of England, where there should be five persons more than the household, they should, for the first offence, suffer three months' imprisonment or pay £25; for the second the punishment was to be doubled; and for the third, they were to be banished to America, or pay £100 (\$500); and if they returned, to suffer death. It was not till 1812 that the *C. Act* was repealed by 52 Geo. III. c. 112.

A meeting of dissenters from the Established Church of England, for religious worship, or the place where they meet;—generally used in a contemptuous sense.

"Who far from steeples and their sacred sound,

In fields their sullen conventicles found."—*Dryden.*

A secret assembly; as, a conventicle of conspirators.

"Ay, all of you had laid your heads together,

(Myself had notice of your conventicles.)"—*Shaks.*

Convent'icler, *n.* One who belongs to a religious conventicle.

Convention, *n.* [Fr., from Lat. *conventio*, from *convener*.] Act of coming together; a meeting; union; coalition.

"The conventions . . . of particles of matter."—*Boyle.*

Agreement; arbitrary custom; conventionality; as, the conventions of society.

A temporary agreement or treaty. See *TREATY*.

An assembly met for the furtherance of some civil, political, or religious purpose.

(*Amer. Hist.*) At the commencement of the Revolution, the term was applied to those bodies which assumed the powers previously exercised by the colonial government, and especially to those by which the State and national constitutions were framed. Actually, the term is not only applied to delegated bodies, specially assembled by the authority of one or more State legislatures; but also to voluntary assemblies of delegates having some change of legislation or policy in view. It is also applied to delegated bodies assembled as the representatives of parties, especially for nomination to office.

(*Eng. Hist.*) A term applied to two extraordinary assemblies of the English parliament. The first was summoned in 1660, and having completed the work of the restoration, was dissolved by Charles II. during the same year. The second had for its object the debarring of James II. from the throne (1689), and the establishment thereon of William III. and Mary.

"To the Lords of Convention," 'twas Claverhouse spoke,

Ere the King's crown go down there are crowns to be broke."—*Scott.*

(*French Hist.*) The name of the political assembly which succeeded the *Legislative Assembly* (*Assemblée Nationale*), Sept. 21, 1792. The *C.* abolished royalty and proclaimed the republic, Sept. 22; condemned Louis XVI. to death, without appeal, by a majority of 11 out of 721 votes, Jan. 20, 1793; declared war with England, Holland, and Spain, Feb. 1; established the revolutionary tribunal, March 10; decreed the formation of the committee of public safety, April 6; allowed the arrest of the Girondins, June 2; completed the constitution, but suspended its activity, Aug. 10; decreed a universal levy for the national defence, Aug. 23; condemned Marie Antoinette, Oct. 16; appointed a committee, with Sieyès at its head, to frame a second constitution, April 19, 1794; received and adopted that constitution, June 23; ordered the arrest of Robespierre, July 27; suppressed the Jacobins, Oct. 12; was successfully defended by Bonaparte against the sections of Paris, Oct. 5, 1795; handed over the government to the Directory and the Council of 500, and finally adjourned, Oct. 28, after having been in session 3 years and 35 days, and passed 8,370 decrees. Many violent, criminal, even atrocious acts are charged to the *C.*; it is to be said also that in critical emergencies that it simply displayed an unequalled energy; that it maintained the unity of France, and saved the country when invaded by foreign armies. France is indebted to it for any of her best institutions, such as the *Grand-Lycée*, the National Debt; the Normal School; the Conservatory of Arts and Trades, &c.

Convent'ional, *a.* Relating to a convention; stipulated; formed by agreement; as, *conventional services*, arising out of custom or tacit agreement; subscribed to; usage; as, *conventional rules of society*, *conventional language*, &c.

Conventionalism, *n.* That which is received or established by popular usage, or tacit agreement; as, a plain phrase is a *conventionalism*.

Conventionalist, *n.* One who adheres to the rules or provisions of a convention.—One who is attached to conventionalism; a formal, punctilious person.

Conventionality, *n.* State of being conventional;

a conventional term, principle, or custom; adherence to formality and punctilio.

Conventionalize, *v. a.* To make conventional.

Conventionally, *adv.* In a set or conventional manner.

Conven'tionary, *a.* Acting upon contract; settled by stipulations; as, *conventional tenants*.

Convention'er, *n.* A member of a convention or public assembly.

Conven'tionist, *n.* One who enters into an agreement or contract.

Convent'ual, *a.* [Fr. *conventuel*.] Monastic; belonging to a convent; as, *conventual priors*.

—*n.* One who lives in a convent; a monk or nun.

"I have read a sermon of a convent'ual."—*Addison.*

Converge, *v. i.* [L. Lat. *convergo*—*con*, and *vergo*, to bend, turn, or incline.] To turn or bend together towards the same point; to tend to one and the same point, or object; to incline and approach nearer together.

"The lower skies, they all at once converge

High to the crown of heaven."—*Thomson.*

Conver'gence, **Conver'gency**, *n.* The quality of converging; tendency to one point or object.

Conver'gent, *a.* Tending to one point or object; approaching each other as they proceed; as, *convergent lines*.—*Converging*.

C. and divergent series. (*Math.*) An infinite series is said to be *C.* when, however many of its terms may be added together, the sum never exceeds, numerically, some finite quantity. On the other hand, it is said to be *divergent* when, adding sufficient number of terms, a sum can be obtained which numerically exceeds any given finite quantity, however great. A series is not necessarily *C.* when its terms continually decrease in magnitude; for instance, the series $1 + \frac{1}{2} + \frac{1}{3} + \frac{1}{4}$, &c., is divergent. If, however, besides decreasing numerically, the terms have alternate signs, the series will be *C.*; thus, $1 - \frac{1}{2} + \frac{1}{3} - \frac{1}{4}$, &c., is *C.*

Conver'gent-nerved, *a.* (*Bot.*) Applied in describing the venation of leaves, to cases where the ribs form a curve and meet at a point, as in *Plantago lanceolata*.

Conver'ging, *p. a.* Tending to one point, mark, or object; approaching each other, as lines extended; decreasing in magnitude; tending to a certain limit.

C. rays. (*Optics*.) Rays tending to a common focus.

C. series. (*Math.*) See *CONVERGENT SERIES*.

Convers'able, *a.* [See *CONVERSE*.] Disposed to converse; fluent in conversation; communicative; sociable; free in discourse.

Convers'ableness, *n.* Quality of being sociable and conversable; fluency of talk.

Convers'ably, *adv.* In a conversable manner.

Convers'ance, **Convers'ancy**, *n.* State of being familiar or conversant.

Convers'ano, a town of S. Italy, 20 m. from Bari; pop. 9,649.

Convers'ant, *a.* [It. *conversante*.] Well acquainted with; versed in; skilful; proficient;—generally followed by *with*.

"He uses the different dialects as one who had been conversant with them all."—*Pope.*

—Having much intercourse, converse, or familiarity with; well acquainted by frequent association.

"Nor conversant with ease and idleness."—*Shaks.*

—Relating to; concerning;—preceding about.

"Discretion considered . . . as conversant about worldly affairs."—*Addison.*

Convers'ant, *n.* One who converses. (*R.*)

Convers'antly, *adv.* In a conversant or intimate manner.

Convers'ation, *n.* [Fr.; Lat. *conversatio*, from *converson*. See *CONVERSE*.] Familiar intercourse with; intimate fellowship; commerce; easy intercourse.

"Freedom of habits, and conversation with the best company."—*Dryden.*

—Familiar discourse; interchange of ideas; colloquy; easy talk between two or more persons. The pleasure and advantages to be derived from *C.* are very manifest. There is much in it to lead the superficial observer to view it as a natural gift; and we find individuals, and even nations, that have peculiar talents for it; but still it is an art, and may be learned like every other art, and from its value and importance it is entitled to much more attention than is usually bestowed upon it. Let a man have read, thought, studied as much as he may, rarely will he reach his possible advantage as a *ready* man, unless he has exercised his powers much in *C.* The ancient philosophers were masters of the art of *C.* and adopted this mode of communicating instruction to their disciples. Rousseau justly remarks that the tone of good *C.* is neither dull nor frivolous. It is fluent and natural; sensible, without being pedantic; cheerful, without being boisterous; elegant, without being affected; polite without being insipid; and jocose, without being equivocal. It deals not in dissertations or epigrams; conforms to the demands of good taste, without being bound by rule; unites wit and reason, satire and compliment, without departing from the rules of a pure morality, and allows all to speak on subjects which they understand. Each expresses his opinion, and supports it in as few words as possible; and no one attacks that of another with warmth, or upholds his own with obstinacy. All impart information, and all are entertained. In this art, as in most others, it is more easy to indicate what things are to be avoided than to point out precisely what ought to be done. The object of *C.* is to afford entertainment or agreeable information; and one of its first rules is to allow everybody to contribute his share, while every one at the same time ought to exert himself for the gratification of the company. Egotism, or any display of self-conceit, is the

very bane of *C.*, and is carefully to be avoided, as is also tediousness in narration. Adapt yourself to your company, and your *C.* to your talents and information. Good sense and good feeling should guide in the selection of topics for *C.*, and prevent the introduction of subjects that may not be agreeable to the company. The great art of *C.* is to keep it constantly flowing, and to seize upon points which can turn it into new channels. It is much to be regretted that an art which occupies such an important place among the accomplishments of social life, is yet so much neglected as it is in many countries. It is one of the most important means that can be employed in the intellectual training of children, and yet it is entirely neglected in most schools.

Conversational, *a.* Pertaining to conversation; done in mutual discourse or talk; as, a *conversational* gift.

Conversationalist, *n.* One who converses; a converser; specifically, one who practises the art of conversation.

Convers'ationism, *n.* A word or expression used in conversation.

—The art of conversation.

Convers'ationist, *n.* An adept in conversation.

Convers'ative, *a.* Relating to social intercourse;—in contradistinction to *contemplative*.

"Finding him little studious and contemplative, she chose to endue him with conversative qualities of youth."—*Wotton.*

Conversazione, *kon-ri-r-sā-tsi-ō'nā*, *n.* [It.] A meeting assembled for conversation, generally on literary topics.

Converse, *v. i.* [Lat. *converson*—*con*, and *verso*, *reversus*, to move about in a place, to dwell, to remain in a place; frequentative from *verto*, to turn; Fr. *converser*.] To have intercourse; to keep company or be engaged; to be familiar; to hold intercourse and be intimately acquainted.

"Seek the distant hills,

And there converse with nature."—*Thomson.*

—To talk familiarly; to convey thoughts reciprocally; to discourse; to chat; to talk; to commune; with *with*.

"With thee conversing I forget all time."—*Milton.*

—*n.* Conversation; familiar discourse or talk; chat.

"Form'd by thy converse nappily to steer

From grave to gay, from lively to severe."—*Pope.*

—Acquaintance by frequent or customary intercourse; cohabitation; familiarity.

"A free converse with persons of different sects."—*Watts.*

(*Logic*.) A reciprocal or inverted proposition, in which the supposition and conclusion of a preceding proposition change places; a proposition formed from another by putting the predicate for the subject, and the subject for the predicate.

(*Math.*) In geometry, a proposition is said to be the *converse* of another, when, after drawing a conclusion from something first proposed, we proceed to suppose what had been before concluded, and to draw from it what had been supposed. Thus, if two sides of a triangle be equal, the angles opposite to those sides are also equal; the *converse* of the proposition is, that if 2 angles of a triangle be equal, the sides opposite to those angles are also equal.

—*a.* Turned round; opposite or reciprocal; as, a *converse* proposition.

Conversely, *adv.* With change of order; in a contrary order; reciprocally.

Convers'er, *n.* One who converses; a talker.

Convers'ible, *a.* Susceptible of being reversed, or assuming a *converse* relation.

Conversion, (*kon-ver'shun*), *n.* [Lat. *conversio*.] A turning or change from one state into another; transmutation; as, the *conversion* of metals.

—Change of opinions or conduct; a change of heart or dispositions, succeeded by a reformation of life; change from side or party to another, or from one religion to another; as, the *conversion* of St. Paul.

(*Logic*.) An interchange of terms in an argument; as, *No virtue is vice; no vice is virtue.*

(*Math.*) A reduction of the form of a proposition.

C. of equations. In algebra, the reducing of a fractional equation into an integral one.

(*Mil.*) A change of front.

(*Law*.) *C.* is where a man has found, or become possessed of another's goods, and refuses to deliver them on demand; in which case he is said to have converted them to his own use. And an action of *trover* will lie to recover the goods, or the value thereof.

Convers'ive, *a.* Susceptible of conversion or reformation.—*Conversible*; sociable.

Convert, *v. a.* [Lat. *conver'o*—*con*, and *verto*, to turn.] To change or turn into another substance or form; to change from one state to another; to transmute; as, to convert gold bullion into money.

"Lessens

The sorrow, and converts it high to joy."—*Milton.*

—To turn from a bad life to one that is good, religious, and holy; as, to convert a profligate.

"And sinners shall be converted unto thee."—*Psalms li. 13.*

—To change or turn from one religion, party, or sect, to another; to convert from a heathen state; as, to convert an infidel to the truth, to convert a political opponent.

"Augustine is converted by St. Ambrose's sermon."—*Hammond.*

—To turn from one use or destination to another; as, to convert forged bills into cash.

"He converted the prizes to his own use."—*Arbuthnot.*

—*v. i.* To turn about or be changed; to undergo a change; as, to be converted from a drunkard into a teetotaler.

"The love of wicked friends converts to fear."—*Shaks.*

Con'vert, *n.* A converted person; one who is turned from sin to holiness and morality; a person who re-

nounces one creed, religious system, or political party, and embraces another.

(Ecol.) The term *C.* is specially applied to such as abandon any other faith and adopt that of Christianity. It is opposed to *apostate*, applied to one who has forsaken the Christian religion for some other.

Convert'er, n. One who converts, or makes converts.

Convertibility, n. [Fr. *convertibilité*.] Capability of being converted or changed from one substance, form, or state to another; quality of being changeable from one letter to another; as, the *convertibility* of goods into money.

Convertible, a. [Fr.] That may be converted or changed; susceptible of change; transmutable; transformable; interchangeable.

"Minerals are not convertible into another species." — *Harvey*.

—That may be exchanged, or reciprocally used, the one for the other; as, *convertible* terms.

Convertibleness, n. State of being convertible.

Convertibly, a. Reciprocally; with interchange of terms.

Convex, a. [Lat. *convexus*, from *con* + *veh*, to carry, bear, or bring.] Vaulted; arched; rounded; rising or swelling on the exterior surface into a spherical form; protuberant outwards; gibbous; spherical; — opposed to *concave*, *q. v.*

—*n.* A convex body; a body swelling externally into a circular form.

"A comet . . . burns thro' th' ethereal frame,
And half heav'n's *convex* glitters with the flame." — *Tickell*.

Convexed, (convex), a. Made convex, or protuberant, in a spherical form; as, a *convexed* spine.

Convexedly, Convexly, adv. In a convex form; as, "*convexly* conical."

Convexedness, Convexity, n. [Fr. *convexité*; Lat. *convexitus*.] State of being convex; exterior surface of a convex body; a gibbous or globular form; roundness; as, the *convexity* of the earth.

Convexness, n. Convexity; spheroidal protuberance.

Convex-o-concave, a. Convex on one side, and concave on the other, as a lens.

Convex-o-convex, a. Convex on both sides.

Convex-o-plane, a. Convex and plane on opposite sides.

Convey, v. a. [Lat. *convello* — *con*, and *velo*, to carry, bear, or bring.] To carry, bear, remove, transmit, or transport by land or sea-communication; as, to *convey* passengers.

"I will convey them by sea, in floats." — *Neh. ii. 7.*

—To pass or cause to pass; to transfer, deliver, or make over to another; as, to *convey* property.

—To impart, introduce, or communicate; as, to *convey* news.

"Men fill one another's heads with noise and sounds, but convey not their own thoughts." — *Locke*.

—*v. i.* To steal; to remove surreptitiously; to manage privately; as, to *convey* booty.

"I will convey the business as I shall find means." — *Shaks.*

Conveyable, a. That may be conveyed or transferred.

Conveyance, n. Act of conveying or removing; the thing conveyed or removed; as, *conveyance* by railroad. — Means of carrying or transporting; transportation; transmission; removal; as, a vehicular *conveyance*, *conveyance* of dignities, &c.

"The conveyance down of Adam's monarchical power." — *Spenser*.

(Law.) A writing, sealed and delivered, whereby a property in lands and tenements is conveyed from one person to another. When the property in goods, or in a term of years, or other estate less than freehold, is passed by deed, the instrument of transfer is called an *assignment*. The forms of *C.* vary widely in the various States.

Conveyancer, n. (Law.) One who draws deeds or writings by which property is conveyed or transferred.

Conveyancing, n. (Law.) The act or practice of drawing deeds, leases, &c., for conveying or transferring the title to property.

Convey'er, n. He or that which conveys.

Conviviality, n. [Lat. *con*, and *vicinitas*, neighborhood.] Neighborhood; nearness. (*r.*)

Convict, v. a. [Lat. *convicto*, *convictus*, from *con*, and *vinc*, to vanquish, to conquer; Fr. *convaincre*; It. *convincere*.] To overpower by proving a charge against; to prove, find, determine, or decide to be guilty; to show by proof or evidence; to prove manifestly; as, to *convict* a prisoner.

Convict, n. A person proved or found guilty of a crime alleged against him; a malefactor; a culprit; a felon.

Convicted, p. a. Proved or determined to be guilty.

Convictible, a. That is capable of being convicted. (*r.*)

Conviction, n. [Fr.] Act of convicting; state of being convicted; detection of guilt; act of finding guilty; act of convicting; contumacious; strong belief on the ground of satisfactory evidence, without any implication of previous error; state of being sensible of guilt.

(Law.) The finding of one guilty of an offence by the verdict of a jury

Convictive, a. Having the power to convince or convict.

Convictively, adv. In a convincing manner.

Convictiveness, n. A tendency to convince or convict.

Convince, v. a. [Lat. *convinceo*, from *con*, and *vinc*, to conquer; It. *convincere*; Fr. *convaincre*.] To subdue the opposition of the mind to truth; to conquer or persuade by argument; to satisfy the mind by evidence or proof; to force to acknowledge or assent to.

Convincement, n. Conviction. (*r.*)

Convinc'er, n. He who, or that which, convinces.

Convincible, a. That may be convinced.

Convincing, p. a. Producing conviction; calculated to persuade; capable of subduing the opposition of the mind and compelling its assent; as, *convincing* testimony.

Convincingly, adv. In a convincing manner.

Convincingness, n. The power of convincing.

Conv'is, n. In *Michigan*, a post-village and township of Calhoun co.

Convive, n. [Fr.] A companion in conviviality or festivity; as, a brother *convive*.

Convivial, a. [Lat. *convivilis*, from *convivium*, n. living together, a meal in company — *con*, and *vivo*, to live.] Relating to a social entertainment or feast; festive; festal; jovial; social; as, a *convivial* spirit.

"Which feasts, *convivial* meetings we did name." — *Denham*.

Convivialist, n. One who is given to conviviality; a reveller.

Conviviality, n. Convivial disposition or practice; the good-humor or mirth indulged in at an entertainment.

Convivially, adv. In a festive or convivial manner.

Convocate, v. a. [Lat. *convoco*, *convocatus*. See *CONVOKE*.] To convoke; to call or summon to meet; to assemble by summons.

Convocation, n. [Fr., from Lat. *convocatio*.] Act of convoke or calling an assembly; as, "making a general *convocation*."

—An assembly; a diet; a synod; a congress; a council.

"On the eighth day shall be an holy *convocation* unto you." — *Lev. xxiii. 20.*

(Ecol.) In the Church of England, an assembly of the hierarchy and lower bodies of clergy, met to confer on matters touching ecclesiastical interests.

—In Oxford University, Eng., an assembly of college-dignitaries, fellows, &c., which has the control of all business pertaining to the university.

(Mining.) In Cornwall, Eng., a parliament of tin-masters. All *Stannary laws* are enacted by the several convocations, and carry with them all the force and law of acts of parliament.

Convocational, a. Relating, or pertaining, to a convocation.

Convocationist, n. An advocate of convocation.

Convocator, n. (Mining.) A member of a convocation of Cornish tin-masters.

Convoke, v. a. [Lat. *convoco* — *con*, and *voco*, to call.] To call together; to summon to meet; to assemble by summons; to convene.

"Convoke the peerage." — *Pope*.

Convolute, a. [Lat. *convolutus*, from *convolvere*. See *CONVOLVE*.] Rolled together, or on itself, or one part on another.

Convolted, a. Twisted or rolled together; as, *convolted* plates.

Convolution, n. [Lat. *convolutio*.] Act of rolling or winding together or on itself, or one thing on another. — State of being rolled, wound, or twisted together; a winding motion.

"The convolutions of a smooth-lipped shell." — *Wordsworth*.

(Anat.) The winding folds of the superficial layer of the brain; and also the coils and turns of the intestinal tube.

Convolve, v. a. [Lat. *convolvere* — *con*, and *volvo*, to roll.] To roll or wind together or on itself; to roll one part on another.

"He writh'd him to and fro *convolv'd*." — *Milton*.

Convolvaceæ, n. pl. [From Lat. *convolvere*, I roll or bind together.] (Bot.) The Convolvus or Bindweed family, an order of plants, alliance *Solanaceæ*. DIAG. 5 free stamens, basal placentæ, and leafy doubled-up cotyledons. — They are herbs or shrubs generally twining or trailing, and milky. The leaves are alternate and exstipulate. The calyx has 5 deep divisions; is much imbricated; persistent. The corolla is 5-partite or 5-plaited, regular, deciduous, and has no scales in its tube; aestivation plaited. The stamens alternate with the lobes of the corolla. The ovary is 2-, 3-, or 4-celled, or its carpels are more or less distinct. The fruit is capsular. In this order there are 47 known genera, with about 665 species, which are chiefly found in the plains and valleys of hot and tropical regions. A few flourish in temperate climates, but none in the coldest latitudes. They are remarkable for the presence of an acrid milky purgative juice in their roots. *Jalap* and *scammony* are products of this order.

Convolvulus, n. (Bot.) The Bindweed, a gen. of plants, the type of the order *Convolvulaceæ*. It is characterized by a bell-shaped corolla, with five prominent plaits and five shallow lobes. 8 or 10 species are found in this country, among which *C. arvensis*, the small Bindweed, a twining plant, growing in fields and pastures from Maine to the Carolinas; stem several feet long, climbing or prostrate, a little hairy; flowers small, white, often with a tinge of red; — and *C. purpureus*, the Morning-glory (fig. 672), found in fields in the Middle and Western States; stem climbing many feet; leaves roundish, heart-shaped; flowers large, beautiful, generally of a dark purple, sometimes blue, flesh-colored, striped, &c. It is a well-known and favorite climber and free flower, of the easiest culture.

Fig. 672.
THE MORNING-GLORY.
(*Convolvulus purpureus*.)

Convoy, v. a. [Fr. *convoyer* — *con*, and *voie*, Lat. *via*, way.] To attend or accompany on the way, for protection or defence, either by sea or land; to attend; to escort; to guard; as, to *convoy* a fleet of merchantmen.

—*n.* Act of convoying; escort or attendance for defence.

"Your *convoy* makes the dangerous way secure." — *Dryden*.

—A guard of troops to protect provisions, stores, &c., on their passage from one place to another; as, a baggage *convoy*. — A ship or ships of war, accompanying a fleet of merchantmen, &c., for protection against an enemy's vessels; as, to sail under *convoy*. — The fleet protected by naval *convoy*.

Convulse, v. a. [Lat. *convulsus*, from *convello* — *con*, nud *vello*, to pluck, to pull.] To shake, tear, or rend; to contract violently, as the muscles; to affect by irregular spasms; to shake; to agitate; to disturb; to put into commotion.

"The world is *convulsed* by the agonies of great nations." — *Macaulay*.

Convulsion, n. [Lat. *convulsio*.] Any violent or irregular motion; agitation; commotion; tumult; disturbance; as, *convulsions* of earthquake.

"All . . . fall under the same *convulsions* of state, by dissensions or invasions." — *Temple*.

(Med.) A writhing and agitation of the limbs, and involuntary action of the muscles in general. The fit varies much in extent and violence, sometimes attacking the whole body, and at others confined to particular parts; in the former case the mind is affected, but in the latter it often remains undisturbed; they also vary in duration, lasting from a few minutes to some hours. They are sometimes preceded by dizziness, double or disturbed vision, and coldness, and are followed by great languor; but at others they come and go without much disturbance. Teething, worms, and overloaded bowels are common causes of convulsive attacks in children, and these are relieved by freely and timely lancing the gums, and by the administration of proper purges.

Convulsional, a. Pertaining to convulsions; affected by convulsions.

Convulsionaries, n. pl. [Fr. *convulsionnaires*.] (Hist.) The name of a fanatical sect, which made its appearance in Paris, abt. 1730. They used to assemble at the grave of a celebrated Jansenist, named Pâris, the church-yard of St. Medardus. At this tomb a multitude of people poured forth fanatical prayers, sermons, and prophesies. Miracles are also alleged to have been performed, for proof of which we are referred to a work written by M. Montgeron, a French senator and entitled *La Verité des Miracles opérés par l'intercession de François de Pâris* (Paris, 1737). After 1737 the fanaticism of the *C.* increased to utter madness. "They threw themselves into the most violent contortions of body, rolled about on the ground, imitating birds, beasts, and fishes, and at last, when they had completely spent themselves, went off in a swoon." 1733, the king issued an order for the imprisonment of these fanatics, but it was found impossible to put a complete stop to the mischief. They took to predicting the downfall of the throne and the church, which prophesies the French Revolution appeared to fulfil. They were not much heard of in Paris after the middle of the 18th century, but have occurred in country-places at various times within the present century.

Convulsionary, a. Convulsive; convulsional.

Convulsive, a. Partaking of the nature of convulsion; tending to convulse; spasmodic; agitating; as, *convulsive* fit.

"The flying soul's *convulsive* strife." — *Dryden*.

Convulsively, adv. In a convulsive manner.

Con'way, a river of England, in Wales, which, after a course of 30 m., falls into Beaumaris Bay. It is noted for its fine scenery, and abundance of salmon.

Conway, or ABERCONWAY, n. walled sea-port town Caernarvonshire, N. Wales, on the estuary of the Conway River. There is here a magnificent Norman castle built by Edward I. It was an opulent town until great plague of 1607 almost depopulated it. Pop. 2,500.

Conway, n. in *Arkansas*, a central co.; area, abt. 1,100 sq. m. It is bounded on the S.W. by the Arkansas River and is traversed by Cadron and Cypress creeks. Capital, Springfield.

Conway, n. in *Maine*, a former P. O. of Aroostook co.

Conway, n. in *Massachusetts*, a post-village and town of Franklin co., on Deerfield River, 100 m. W. by of Boston.

Conway, n. in *Michigan*, a village and township of Livingston co., abt. 25 m. E. of Lansing.

Conway, n. in *Mississippi*, a post-office of Leake co.

Conway, n. in *New Hampshire*, a post-village and township of Carroll co., on the Saco River, abt. 75 m. N.W. of Concord.

Conway, THOMAS, an American revolutionary general. B. in Ireland. After acquiring a military reputation in France, he came to America in 1777, and received the Congress the appointment of brigadier-general, shortly afterwards that of inspector-general, with rank of major-general. He is principally noted for his secret conspiracy against Gen. Washington, in the view of supplanting him in the chief command. Gen. Gates. He did his utmost to poison the public mind against Washington by private caballing and published strictures, but becoming unpopular with the army and his character being revealed to Congress, he resigned his command, fought a duel with Gen. Cadwalader, and returned to France, where he was appointed governor of the French Indies. D. about 1800.

Conway, n. in *South Carolina*, a post-village and township of Horry county, on the Waccamaw River, 110 m. E. by S. of Columbia. Pop. abt. 700.

Cool'way (or **MIDDLE**) **River**, in *Virginia*, an affluent of the *Rapidan*, between *Greene* and *Madison* counties.
Coy, *n.* [*D. konijn*; *Fr. conil*; *Lat. cuniculus*, a *coy*; *Gr. kunikos*. Etymol. uncertain.] (*Script.*) An English name for the rabbit; used in the versions of the Bible to translate the Hebrew *Shaphan*, which does not, however, designate the rabbit, but the *Asukoko*, or *MAN*, *q. v.*

Fig. 673.—DAMAN.

Coyers, in *Georgia*, a post-village of *Newton* co., about 141 m. W. of *Augusta*.

Coyersville, in *Tennessee*, a township of *Henry* co., about 10 m. N. of *Paris*.

Cryngham, in *Pennsylvania*, a township of *Columbia* co.

Crynsburg, a post-village of *Luzerne* co., on *Nescopec* Creek, 90 m. N. of *Harrisburg*.

Cry, *n.* [From the sound.] To cry, or make a low sound, as of doves or pigeons.

The stock-dove only through the forest coos. — *Thomson*.

Cry's Bridge, in *Delaware*, a post-office of *New Castle* co.

Cry, *v. a.* [Etymol. unknown.] To make a peculiar sound of the voice, in imitation of a night-bird, familiar to Australia.)

Cry, *v. a.* [*A. S. cōc*, a cock; *Ger. kochen*, to cook; *Lat. and Goth. koka*; *Lat. coquo*.] To prepare, as victuals for the table, by fire and heat; to dress or prepare, and for eating; as, "too many cooks spoil the broth."

To prepare; to concoct; to vamp; as, to cook accounts.

On preceding up.)

Anging is the word, sir; if you be ready for that, you are well.

— *Shaks.*

To grow; to fling. (Used in some districts in England.)

To dress and prepare provisions for the table; as, to cook a decent dinner.

One who cooks; one whose vocation is to prepare victuals for the table; a person who dresses meat or vegetables for eating.

Cook, JAMES, F.R.S., a celebrated English navigator, b. in *Yorkshire*, 1728. His parents being poor, his early education included only reading, writing, and arithmetic. He commenced his naval career as a merchant service, then entered on board the *Eagle* in 1754, and after four years' meritorious service was made master of the *Mercury*. This vessel formed part of the squadron sent against *Quebec*; and *C.* performed the difficult task of taking soundings in the St. Lawrence, in the very face of the French encampment, and making a chart of the St. Lawrence below *Quebec*. After various and arduous services he was at length promoted to the rank of lieutenant; and then commenced

in England in June, 1771. His second voyage, in which he commanded the *Resolution*, and was accompanied by the *Adventure*, commenced in July, 1772. He visited *New Zealand*, passed *Cape Horn*, and returned home in July, 1775. He then set out on a third voyage, commander of the *Resolution* again, and accompanied by the *Discovery*, in July, 1778, discovered the *Sandwich Islands*, explored the western coast of *N. America*, and then made further discoveries in the Pacific. Unhappily, while touching at *Owhyhee*, or *Hawaii*, *C.* in spite of the utmost prudence and humanity, became involved in a dispute with the natives, and while endeavoring to reach his boat was savagely murdered, on St. Valentine's Day, 1779. Capt. *C.* was fitted for the post he filled by a rare combination of intellectual and moral qualities. Naturally quick-sighted, energetic, decided, yet kindly and considerate, he could rule men well and gain their confidence and love. He was also highly accomplished in the science of navigation; and to his persevering endeavors and watchful care it was due that the health of his crews was always so remarkably good. During the interval between his second and third voyages, *C.* was elected F.R.S. — His wife, *ELIZABETH COOK*, survived him 56 years! dying in 1835, aged 93. But she had to mourn the loss of her three sons (of whom two perished at sea), in a few years after the unhappy fate of her husband.

Cook, *ELIZA*, an English poetess, b. 1817. At an early age she contributed to various periodicals, and published, in 1840, a volume of poems, which at once attracted the attention of the public, and stamped her as a writer of great merit and originality. Her poems, reprinted in a collective form, have passed through numerous editions, and a beautifully illustrated Christmas volume was issued in 1860. She published another volume entitled *New Echoes and Other Poems; Jottings from my Journal; Lacerias*; &c., and in 1864 the government conferred on her a literary pension of £100 a year. Died in 1889.

Cook, in *Illinois*, a N.E. co., adjoining *Indiana*, and bordered by *Lake Michigan*; area, about 1,027 sq. m. It is drained by the *Des Plaines*, *Calumet*, and *Chicago* rivers. Surface, varied; soil, fertile. Cap. *Chicago*. Pop. (1890) 1,192,000.

Cook, in *Pennsylvania*, a township of *Westmoreland* county.

Cooke, *JOHN ESTEN*, an American novelist, born in *Va.*, 1830. Of his many popular works, we mention *Leather Stocking and Silk* (1854); *Old Times in Virginia* (1856); and *Life of Gen. Lee* (1871). Died Sept. 27, 1886.

Cooke, in *Texas*, a N. co. separated from the *Indian Territory* by *Red* river; area, about 950 sq. m. It is drained by *Clear* Creek. Cap. *Gainesville*. Pop. (1890) 24,696.

Cook'ery, *n.* The art or practice of dressing and preparing victuals for the table. See *GASTRONOMY*.

Cook'ey, **Cook'ie**, **Cook'y**, *n.* A sort of sweet cake.

Cook'ham, in *S. Carolina*, a village of *Fairfield* dist., about 18 m. N. of *Columbia*.

Cook Inlet, in *Alaska*, a large inlet, between *Lat. 58°* and *60° N.*, *Lon. 151°* and *154° W.* Length, from S. to N., 130 m.; breadth, 70 m.

Cook Islands, a group in the *Pacific Ocean*, S.W. of the *Society Islands*, between *Tahiti* on the E., and the archipelago of *Tonga* on the W.; pop. about 50,000.

Cook-maid, *n.* One who assists in cookery.

Cook-room, *n.* (*Naut.*) A room for cookery on board ship; the galley, or caboose.

Cooksburg, in *New York*, a post-village of *Albany* co., about 25 m. S.W. of *Albany*.

Cook's Corners, in *New York*, a P.O. of *Franklin* co.

Cook's Ford, in *Kansas*, a P.O. of *Jefferson* co.

Cook'shire, in *Lower Canada*, a village in the co. of *Sherbrooke*, about 13 m. N. of *Lenoxville*.

Cook's Mills, in *Canada*. See *CROWLANDSVILLE*.

Cook's Station, in *Michigan*, a P.O. of *Newaygo* co.

Cook Strait, separates the two principal islands of *New Zealand*, and was discovered by *Capt. Cook*, in 1770.

Cooks'town, a town of *Ireland*, co. *Tyrone*, on the *Ballinderry*, 5 m. from *Stewartstown*; pop. 3,257.

Cookstown, in *Upper Canada*, a village of *Simcoe* co., about 15 m. S. of *Barrie*.

Cookstown, in *New Jersey*, a post-village of *Burlington* co., about 18 m. E. by S. of *Burlington*.

Cookstown, in *Pennsylvania*, a post-village of *Fayette* co., on the *Monongahela* River, about 30 m. S.S.E. of *Pittsburg*.

Cook's Valley, in *Minnesota*, a post-office of *Wabasha* co.

Cooks'ville, in *Upper Canada*, a village of *York* co., 16 m. S.W. of *Toronto*.

Cooks'ville, in *Maryland*, a post-village of *Howard* co., about 22 m. W. of *Baltimore*.

Cooksville, in *Mississippi*, a village of *Noxubee* co., about 132 m. E.N.E. of *Jackson*.

Cooksville, in *Wisconsin*, a post-village of *Rock* co., about 18 m. S.E. of *Madison*.

Cookville, in *Tennessee*, a post-office of *Putnam* co.

Cool, *a.* [*A. S. cōl*; *Fr. D. cool*; *O. Ger. kuol*; *Ger. kühl*.] Moderately cold; of temperament between hot and cold; not ardent, warm, fond, or passionate; as, cool weather, a cool courtship.

"The cool sequester'd vale of life." — *Gray*.

—Calm; dispassionate; self-possessed; equable; frigid; indifferent; deliberate; as, a cool debater.

"But with the morning cool reflection came." — *Scott*.

—Exhibiting aversion, coldness, or hauteur; chilling; as, a cool reception. — Producing coolness; causing absence of enthusiasm or sympathy; as, a cool retreat. — Calmly impudent; quietly ignoring ceremony or propriety; as, cool effrontery.

—*n.* A moderate degree or state of cold; as, the cool of evening.

"Amid the cool of yon high marble arch." — *Addison*.

Cool, *v. a.* [*A. S. colian*, *acolian*, to become cold; *O. Ger. kuoljan*, to make cold; *Icel. kala*, to blow cold; *Swed. and Goth. kyla*, to make cold. See *COLD*.] To make cool or moderately cold; to allay the heat of; to reduce the temperature of; as, to cool fused metal.

"Snow . . . cools or congeals any liquor sooner (than ice)." — *Addison*.

—To moderate or allay, as excitement, passion, &c.; to calm or appease; to abate; to assuage; to damp; to render indifferent; as, his courage is cooled.

"Had they thought they had been fighting only other people's quarrels, perhaps it might have cooled their zeal." — *Swift*.

—*v. n.* To grow cool or cold; to become less hot; to lose heat or warmth; as, the days begin to be cooler.

—To lose ardor, zeal, enthusiasm, affection; to have less passion or inclination; as, marriage cools love.

"You never cool while you read Homer." — *Dryden*.

Cool Arbor, or **Cold Harbor**, in *Va.*, near *Chickahominy* river and *Tolopatomoy* Creek. Here, June 3, 1864, a most sanguinary battle was fought between the *National* forces, under *Gen. Grant* and *Meade*, and the *Confederate* troops, commanded by *Lee* and *Longstreet*; in which, after a desperate struggle of 20 minutes, the *Union* army was repulsed at every point with great slaughter; losing 3 brigadier-generals killed, and upwards of 13,000 killed, wounded, and prisoners. The *Confederate* loss was abt. 1,000, including *Gen. Doles*.

Coolbaugh, in *Pennsylvania*, a post-township of *Monroe* co., about 38 m. N.W. of *Easton*; pop. 1,028.

Cool blood, *n.* [*Fr. sang froid*.] Tranquillity or calmness.

(*Law*.) The condition of one who has the calm and undisturbed use of his reason. In cases of homicide, it frequently becomes necessary to ascertain whether the act of the person killing was done in cool blood or not, in order to ascertain the degree of his guilt. — *Bouvier*.

Cool-cup, *n.* A cooling drink; a beverage for hot weather, variously concocted, as champagne-cup, claret-cup, &c.

Cool'er, *n.* That which cools; anything which abates or allays heat or excitement.

"Acid things were used only as coolers." — *Arbuthnot*.

—A vessel or utensil used for cooling liquors. One of the best wine-coolers is the *Alcarraza*, a species of coarse pottery, manufactured in *Spain*. The cooling is effected by means of its extreme porosity, the wine passing through the pores, when a copious evaporation takes place from the small portion of water which penetrates to the outside. It is made of clay, consisting of 60 parts of calcareous earth, mixed with alumina, and a little peroxide of iron, and 35 of silicious earth, mixed with a little alumina; to which a quantity of salt is added in the mixing. The vessels are only half, or at least not wholly, baked. — The *C.* used by brewers and distillers generally consist of very shallow vessels, exposing great surface, and placed in the high and airy parts of the brewery; the cooling is sometimes assisted by fans, which agitate the air over their surfaces. Worts are also occasionally cooled by causing them to traverse metal pipes, which are surrounded by a counter-current of cold water.

Cool'eysville, in *Minnesota*, a post-office of *Steele* co.

Cool-headed, *a.* Having a temper not easily excited; free from passion; calm; equable.

Cool'ie, (sometimes wrongly written *COOLY* and *COULIE*.)

n. [*Hind. kûli*.] The name of an aboriginal Hindoo up-country tribe, applied by Europeans in *India* to porters or laborers, from the fact of many of that tribe having been employed at many of the seaports in that country, in the bearing of burdens, and loading, discharging, and manning of ships, &c. The term is now generally used to denote those people who are introduced into foreign countries from *India*, *China*, &c., for agricultural and other manual labor, more especially into the *Mauritius*, and into the *West Indies*, and other *British* colonies on the *American* continent. The cause that originated the demand for this class of laborers was negro emancipation. It has been found in all the above-named countries, that where uncultivated land could be had for squatting on, the negro could not be induced to work, even for fair wages. Hence the necessity which arose for supplying the labor-market with importations of foreign labor. The traffic in coolies was first publicly recognized in 1844, when the colony of *British Guiana* made provision for the encouragement of Chinese emigration. The *Peruvian* planters quickly followed, and *Cuba* shortly afterward engaged in the traffic, which was as yet confined to Chinese laborers. At a later date *Indian* coolies were brought to the *West Indies*, and large numbers of them were employed in the *Straits* settlements, *Mauritius* and elsewhere. In *Penang* there are said to be 25,000 *Indian* coolies out of a total population of 150,000. With reference to the treatment of the coolie in foreign colonies, it is difficult to obtain exact information. In the guano pits of the *Chincha Islands* they appear to have been treated with revolting cruelty by their *Peruvian* taskmasters, and elsewhere the coolie is the victim of abuses and oppression that are not easily remedied, though laws for their protection have been enacted.

Cool'ing, *p. a.* Tending to cool the system and allay bodily heat; as, a cooling drink.

Cool'ing-time, *n.* (*Crim. Law*.) Time for passion to subside, and reason to interpose. *C. T.* destroys the effect of provocation, leaving homicide-murder the same as if no provocation had been given.

Cool'ish, *a.* Somewhat cool; as, coolish weather.

Cool'ly, *adv.* In a cool or indifferent manner; without

Fig. 674.—CAPTAIN COOK.

(From the picture by *N. Dance*.)

the series of voyages round the world, the details of which form one of the most popular and delightful in our language. Captain *C.* embarked on his first voyage as commander of the *Endeavour*, in August, 1768, and *N. Holland* (*Australia*) in 1770, and arrived back

warmth or excitement of manner; dispassionately; calmly; as, to take things *coolly*.

—Without heat or undue cold; in a cool degree.

Coolness, *n.* State of being cool; moderate degree of cold.

"The sheep enjoy the coolness of the shade." — Dryden.

—Indifference; calmness; want of ardor, zeal, affection, &c.; as, the coolness of estranged friends.

Cool Spring, in Kentucky, a P. O. of Ohio co.

Cool Spring, in Indiana, a township of LaPorte co.; pop. 1,328.

Cool Spring, in Missouri, a village of La Fayette co.

Cool Spring, in N. Carolina, a P. O. of Iredell co.

Cool Spring, in Pennsylvania, a village and township of Mercer co.

Cool-tankard, *n.* An old English cooling beverage, usually made of wine and water, or of ale, with a small quantity of wine and lemon-juice, spices, &c.

Coolville, in Ohio, a post-village of Athens co., on the Hocking River, 90 m. S.E. of Columbus.

Cool Well, in Virginia, a post-office of Amherst co.

Coolwort, *n.* (*Bot.*) See TIARELLA.

Cooly, *n.* See COOLIE.

Coon, *n.* [*Ostro-Goth. kīm*, soot, lamp-black.] Soot that gathers over an oven's mouth; also, the matter that works out of the naves or boxes of carriage-wheels.

Coomasie, in W. Africa, a town, cap. of the kingdom of ASHANTEE, *q. v.*

Coombe, WILLIAM, an English humorist, b. at Bristol, 1741. His *Tour of Dr. Syntax in Search of the Picturesque*, illustrated by Rowlandson, is a work of great value and rarity.

Coon, in Wisconsin, a township of Vernon co.

Coon Creek, in Missouri, a village of Jasper co., about 170 m. S.W. of Jefferson City.

Coonewar, in Mississippi, a post-office of Lee county.

Coon Island, in Pennsylvania, a post-office in Washington county.

Coon Prairie, in Wisconsin, a village of Vernon co.

Coon Rapids, in Iowa, a post-office of Carroll co.

Coon Valley, in Wisconsin, a post-office of Vernon co.

Coonville, in Iowa, a village of Mills co.

Coop, *n.* [*Dn. kwiip*; *Lat. capa*, a tub, cask, &c.; *Gael. cubach*, bent, hollowed.] A box for confining poultry; a cage; a pen for small animals; as, a hen-coop.

—A barrel or cask.

—*v. a.* To put in a coop; to confine in a coop; to shut up or confine in a narrow compass; to cage; to imprison.

"What! coop whole armies in our walls again?" — Pope.

Coopce', *n.* See COUPEE.

Cooper, *n.* One who makes barrels, casks, and tubs of various kinds; as, a wine-cooper.

—*v. a.* To work upon, as a cooper; as, to cooper an old boat.

Cooper, ABRAHAM, R.A., an English historical painter, b. 1787. In early life he passed much of his time among horses, and to this circumstance must be ascribed the direction which his artistic talent has taken. His first exhibited picture, *Tam O'Shanter*, was sent to the British Institution in 1814. He is the chief "battle-painter" of the English school, and among his principal pictures may be mentioned, *Blücher at the Battle of Ligny*; *Cromwell at Marston Moor*; *Lord Arandel capturing a Turkish Standard*; *Lord Arthur Capel defending Colchester during the Civil War*; *The Battle of Shrewsbury*; *The Death of Harold*; *Richard I. and Saladin at Ascalon*; *The Battle of Assaye*; and *The Battle of Waterloo*. Several have been engraved. Died 1868.

Cooper, ANTHONY ASHLEY. See SHAFTESBURY, (EARL OF.)

Cooper, JAMES FENIMORE, a distinguished American novelist, b. at Burlington, N. J., Sept. 15, 1789. His father, Judge C., was a large land-holder in Otsego co., in that State, residing alternately at Burlington and Cooperstown, and giving his name to the latter township, which became afterwards his residence. C. received the rudiments of a classical education under a private instructor at Burlington, and entered Yale College in 1802. An innate passion for the sea, and an unconquerable love of adventure led him, among other causes, to enter the navy in 1806 as a midshipman. He remained in it for six years; and the influence of this period of his life is indelibly stamped upon his works. In 1811 C. resigned his post in the navy, and after a short residence at West Chester, in the vicinity of New York, he removed to Cooperstown and pursued in earnest his career as a writer of fiction. He had previously published his maiden novel, entitled *Precaution*, a work of little promise. Within 15 years, he successively produced *The Spy*, *The Pioneers*, *The Pilot*, *Lionel Lincoln*, and *The Last of the Mohicans*; triumphantly asserting his claim to the character of an original and powerful novelist. Soon after the appearance of *The Last of the Mohicans*, in 1826, C. sailed for Europe, where he remained for several years. During this time he wrote several of his most successful works, including *The Bravo*, *The Red Rover*, and *The Prairie*, and soon established a reputation which, with the robust qualities of his personal character, and the dignified frankness of his manner, made him a welcome visitant in the most distinguished European circles. His most valuable productions after his return to his country are, *The Pathfinder*, *The Deerslayer*, *The Two Admirals*, and *Wing and Wing*; all of which display his admirable power of invention, his bold conceptions of character, and his rare mastery of graphic and impressive portraiture. His subsequent performances, in which he endeavors to use the novel as a vehicle for political declamation, are unworthy of his fame. This great novelist d. 1851. His works have been translated into all European, and, it is said, into some of the Oriental languages. They

were enthusiastically received in England, Germany, and France, where, from their first appearance till the present day, they have gone through successive editions.

Fig. 675.—HOUSE OF COOPER AT COOPERSTOWN.

His daughter, SUSAN, B. in 1815, has published many popular works, chief of which are: *Rural Hours*; *Rhyme and Reason of Country Life*; and *Country Rambles*.

Cooper, SIR ASTLEY, F.R.S., a celebrated English surgeon and anatomist, b. at Brooke, in Norfolk, 1768. In 1792, he was appointed Professor of Anatomy at Surgeon's Hall, surgeon to Guy's Hospital in 1800, and Professor of Comparative Anatomy in the College of Surgeons in 1813. He was then at the summit of his profession, and his annual income, which, in the fifth year of his practice, only amounted to \$500, had risen to the large sum of \$105,000! In 1830, he was made vice-president of the Royal Society. He was also a member of the French Institute, corresponding member of the Academy of Sciences of Paris, &c. His principal works are his treatise on *Hernia*, 1804-1807, and *Anatomy and Diseases of the Breast*, 1829-1840. d. 1841. A statue by Baily has been erected to his memory in St. Paul's Cathedral, London.

Cooper, THOMAS, an English poet, b. 1805, was a shoemaker in his youth, and having instructed himself in the Latin, Greek, Hebrew, and French languages while at his stall, became a schoolmaster at 23; he led the Leicester Chartists in 1841, lectured in the Potteries during the "Riots," in Aug., 1842, was sent to Stafford jail on a charge of conspiracy and sedition, found guilty, and sentenced to two years' imprisonment. During that period he wrote his first and best epic poem, *The Purgatory of Suicides*. Died in July, 1892.

Cooper, in Maine, a post-village and township of Washington co., abt. 20 m. N. of Machias.

Cooper, in Michigan, a post-township of Kalamazoo co.

Cooper, in Missouri, a central co.; area, abt. 558 sq. m. The Missouri River bounds it on the N., and it is intersected by the Lamine River, as well as by Little Sahne and Moniteau creeks. Surface, hilly; soil, fertile. Cannel and bituminous coal abound. Rich mines of iron and lead are also found. Cap. Booneville.

Cooper, in Pennsylvania, a township of Montour co.; pop. 414.

Cooperage, *n.* Workshop of a cooper.—Vocation or trade of a cooper.—Price paid for cooper's work.

(*Arts and Trades*.) C. is the mechanical art by which casks, tubs, barrels, and all kinds of wooden vessels bound together with hoops, are made. It is a very ancient art, and its invention is ascribed by Pliny to the people who lived at the foot of the Alps. On account of the abundance of wood, the fabrication of casks was early introduced into France, and from that country it was imported into Britain. The occupation of the modern cooper is divided into several distinct branches. The *dry* cooper makes casks for containing all kinds of goods not in a liquid state; such as sugar, flour, &c. The *wet* or *tight* cooper makes vessels for holding liquids; and this branch is subdivided into *large* and *small* work, which are kept quite distinct. There are, also, *white* coopers, or those who make tubs, pails, churns, &c.; and there are coopers in general, who undertake every variety of work. The upright pieces which form the sides of a barrel or cask are called *staves*, and the shaping and planing of these is the most difficult and the most important part of a cooper's work. Each stave must form part of a double conchoid; it must be broader in the middle, and gradually become narrower, but not in straight lines, towards the two extremities. The outside of the staves, across the wood, is wrought into segments of a circle, and is made thickest in the middle, growing gradually thinner toward the ends. When the staves are dressed and arranged in a circular form, the cooper can make their edges coincide perfectly together. In the shape of the staves, and in giving the proper curve, consists the principal part of the cooper's art. The best work is made of Virginia oak. All wood employed ought to be thoroughly dried before being put together.

Co-operant, *a.* Working together; laboring to the same end.

Co-operate, *v. a.* [*Fr. coopérer*; *Lat. con*, and *operor*, *operatus*, to work, to operate, from *opus*, work. See OPERATE.] To act or operate jointly with another or others to the same end; to use mutual efforts to promote the same object; to concur in producing the same effect.

Co-operation, *n.* [*Fr.*] Act of co-operating; joint operation; concurrent effort or labor.

Co-operative, *a.* Operating jointly to the same end.

Co-operative Society, *n.* (*Pol. Econ.*) The name

applied to a society formed among the industrial class for some commercial purpose. The prevailing opinion that the laborer does not work for himself, but for the capitalist,—that the latter obtains all the profit of labor,—has led to the natural conclusion, that the laborer could work for himself, if he could supply capital well as labor, then the whole of the profit would be his own. This has led, chiefly in France and England, to the formation of societies among the working-classes, where, by each contributing a small sum to a general fund, they have obtained capital for the purpose of embarking in some commercial undertaking, the profits of which being afterwards divided among themselves, or going to increase their capital and enlarge the scope of their operations. Thus, instead of putting their savings into a bank, or investing them in other securities which yield only a small interest,—as the capital is employed by others, who must have their profit out of the money they employ it for themselves, and thus obtain the whole of the profits. Co-operation differs from communism, socialism, or any other fanciful scheme of society. It is simply a joint-stock company, carried on some commercial enterprise. "The form of association," says J. S. Mill, "which, if mankind continue to improve, must be expected in the end to predominate, not that which can exist between a capitalist and work-people without a voice in the management, but the association of the laborers themselves on a basis of equality, collectively owning the capital with which they carry on their operations, and working under managers elected and removable by themselves. The capacity of exertion and self-denial in the masses of the kind which is never known but on the rare occasions which it is appealed to in the name of some great and elevated sentiment." The system of co-operation is of great benefit to the working-classes, if properly carried out. It fosters provident habits, and encourages industry. Each individual is as much as ever dependent upon his own exertions, which are also more suitably rewarded. It leads, also, to strict inquiry into the character of such as are desirous of admission into the society. C. S. are frequently formed in Europe, and in this country, for supplying its members with articles of daily consumption. The goods are purchased with the money of the society, and sold at an ordinary market-rate, the profit being periodically divided among the members, or going to increase the capital. Such societies are very useful in obviating the evils of adulterating commodities, which we are told prevail to so serious an extent among many shopkeepers, especially those whose business lies chiefly with the poor people. As the dealers are also the buyers, the influence of honesty is thus on the side of the shop, and the motives of adulteration are eliminated. No man will willingly sell himself inferior, disguised, or unwholesome commodities. Down to this day (1897) the co-operative system has not been received with much favor in the U. States. Many co-operative stores have been established in almost all parts of the country, but, excepting Massachusetts, where their management seems to be better understood, relatively few of them have met with decided and durable success.

Co-operator, *n.* One who co-operates.

Cooper Island, in the British W. Indies, 51 m. E. of Tortola.

Cooper River, in S. Carolina, rises in Charleston dist., flows S.E. to the Ashley River, below Charleston.

Cooper's Creek, in New Jersey, traverses Camden co., and enters the Delaware River near Camden.

Cooper's Mills, in Maine, a P. O. of Lincoln co.

Cooper's Plains, in New York, a P. O. of Steuben co.

Cooperstown, in Illinois, a post-township of Clark co., on the Illinois River, about 22 m. W.N.W. of Rockville.

Cooperstown, in N. J., a v. of Camden co., 6 m. E. of Camden.—A village of Burlington co., 3 m. S. of Burlington.

Cooperstown, in New York, a town of Otsego co., and the cap. of Otsego co., on the Otsego lake, 10 m. S.W. of Albany. It takes its name from Judge William Cooper, father of James Fenimore Cooper, the novelist.

A radius of 40 miles in and around C. produces more than half the hops raised in the U. S. Pop. about 6,000.

Cooperstown, in Pennsylvania, a p. v. of Venango co., on Sugar Creek, 75 m. N. of Pittsburgh.

Cooperstown, in Tennessee, a vill. of Robertson co.

Cooperstown, in Wis., a p. v. and twp. of Milwaukee co. on Benton Creek, about 65 m. S. of Milwaukee.

Coopersville, in Iowa, a village of Wapello co.

Coopersville, in Michigan, a post-village of Ionia co., about 15 m. W.N.W. of Grand Rapids.

Coopersville, in New York, a P. O. of Clinton co.

Coopersville, in Pennsylvania, a village of Lancaster co., 55 m. S.E. of Harrisburg.

Cooper's Wells, in Mississippi, a favorite watering-place in Hinds co.

Coopery, *a.* Pertaining to a cooper.

Co-optation, *n.* [*Lat. cooptatio*.] Adoption; co-optation.

Co-ordination, *n.* Joint ordination.

Co-ordinate, *a.* [*Lat. con*, and *ordino*, *ordinatus*, to set in order, to arrange, to regulate, from *ordo*, order, *q. v.*] Holding the same order, rank or degree; not subordinate; as, co-ordinate powers.

—*v. a.* To make co-ordinate or equal.

—*n.* One of two or more persons or things, holding the same rank, condition, or authority.

—*n. pl.* (*Math.*) In Geometry, lines, angles, &c., considered in order; a system of lines to which points under consideration are referred, and by means of which their position is determined. In the Theory of Curves

James Fenimore Cooper

1789-1851

sciss and its corresponding ordinate. — The system or method of co-ordinates is an invention of Descartes. It is commonly treated under the heads, *Geometry of two dimensions*, and *Geometry of three dimensions*, according as it is applied to investigate the properties of figures in one plane, or of curved surfaces.

Co-ordinate, *adv.* In the same order or rank; in equal degree; without subordination.

Co-ordinateness, *n.* State of being co-ordinate.

Co-ordination, *n.* The state of holding the same rank or position; co-ordinateness.

"In this . . . parliament there is a rare co-ordination of power, a wholesome mixture betwixt monarchy, optimacy, and democracy." — *Howell*.

act of uniting different parts in sympathetic harmony.

Co-ordinative, *a.* (*Gram.*) Having the power of co-ordination.

Corg, an ancient rajahship of Hindoostan, prov. Mysore, formerly independent, but now part of the pres. of Madras. It lies, for the most part, between Lat. 12° and 13° N., and is intersected by the 76th parallel of E. long.; having N and E. the Mysore territory, and on all other sides those of the Madras presidency. Area, 2,340 sq. mi. The whole country is covered with forests, but is overladen with jungles, excepting in the vicinity of the Mysore dominion. The climate is generally healthy. The Coorgs are a Nair tribe of martial habits; they have few villages, preferring to live in wilds. Among them exists a community of wives among brothers. The country was annexed to the British possessions in 1832.

Coos, in Oregon, a W.S.W. co., bordering on the Pacific Ocean; area, about 1,600 sq. m. It is intersected by the Coos and Coos rivers. The surface is mountainous, and covered with forests. Gold and stone coal are found. Cap. Empire City.

Coos, in New Hampshire, a N. co.; area, about 1,950 sq. mi. The Connecticut River bounds it on the W., and it is also drained by the Androscoggin, Saco, Upper Androscoggin, and other streams. The surface is mostly open; soil, moderately fertile. Cap. Lancaster. Pop. (1890) 23,220.

post-office of Coos co.

Coos (or Coose) River, in Oregon, a small stream of Coos co., flowing W. into a bay of the same name.

Cosa, in Alabama, an E. central co.; area, about 860 sq. m. It is bounded on the S.W. by Coosa River. The Chapattay and other smaller creeks traverse it. The surface is elevated and broken; soil fertile. Cap. Rockdale. In its N. part is an immense quarry of beautiful marble, said to be superior to any other in the U. States, and equal to the finest specimens of Italian marble. Pop. (1890) 16,006.

Cosa, in Georgia, a post-office of Floyd co.

Cosa River, formed by the confluence of the Etowah and Oostanula rivers, which unite at Rome, in Georgia. The course is S.W., and then nearly S., until it joins the Apalachicola to form the Alabama River, about 10 m. N. of Montgomery. It is about 350 miles long.

Cosau da, in Alabama, a village of Autauga co., on the Alabama River, abt. 8 m. N. by W. of Montgomery.

Cosawattee, in Georgia, a small river rising in the Ridge, in Gilmer co., and joining the Conasauga in Murray co., to form the Oostanula.

Cosawat'chie, in S. Carolina, a township, cap. of Laurens dist., abt. 100 m. S. of Columbia.

Cosaw River, in S. Carolina. See ASHAPPOO.

Cot, *n.* [W. *cwt*, a short tail; *cwtias*, a water-hen.] See FULICA.

colloquialism for a thick-headed fellow; a dolt.

Cotehill, a town of Ireland, co. Cavan, on the Cootehill River, 28 m. from Dundalk; pop. 3,290.

Cote's Store, in Virginia, a P. O. of Rockingham co.

Cop, *n.* [A.S. *copp*.] The cone of thread or yarn formed by the spindle of a spinning-wheel.

conical pile of hay. See COCK.

summit of a hill; as, Mow-cop.

police-officer. (Vulgar.)

Copaiba, *Copaiva*, *Capivai*, *n.* [Braz. *cupaiba*.] (1.) A balsam obtained by making incisions on the bark of *Copaifera multityga*, and other species. It acts on the body as a diuretic, expectorant, and in large doses as a purgative; and exercises a direct and special influence on the mucous membrane of the body.

Copifera, *n.* [From *copaiba*, and Lat. *fero*, I bear.] (2.) A genus of plants, sub-order *Cæsalpinieæ*. The

species are natives of tropical America, and several yield the valuable oleo-resin which is used in medicine under the name of *balsam of copaiba*. Most of the copaiba of commerce is brought from Brazil, a very little being imported from Guiana and the West-Indian islands. The timber known as the purple-heart, or purple-wood of Guiana, is the produce of *C. pubiflora*, and probably of *C. bracteata* also. It is largely employed for ornamental purposes.

Copa'is, in Greece. See TOPOLIAS.

Copake, in New York, a post-village and township of Columbia co., about 50 m. S. of Albany.

Copake Iron Works, in New York, a post-office of Columbia co.

Copal, *n.* (*Chem.*) A peculiar substance, often improperly called *gum copal*. It is very difficultly soluble in alcohol; hard, brittle, and inodorous; its specific gravity varies from 1.04 to 1.13. It is the product of the *Rhus copallina*. Brazilian *C.* is the product of several species of *Hymenæa*, and of *Trachylobium mortianum*. Indian copal is produced by *Valeria indica*. It is used in varnishes.

Copalche-bark, *n.* See CROTON.

Copan, in Central America, a ruined city of Guatemala, abt. 30 m. E. of Chiquimula. For more than 2 m. its ruins extend along the Copan River (a tributary of the Motagua), among which are the remains of a supposed temple nearly 650 ft. in length, and monolithic statues elaborately carved.

Copa'no, in Texas, a post-village of Refugio co., on Aransas Bay.

Copar'eenary, *n.* (*Law.*) Joint heirship, or succession to an estate.

Copar'eenier, *n.* [*Com*, and *parcener*, a partaker, from Lat. *perio*, a part.] (*Law.*) One to whom an estate descends by inheritance; or jointly with others, when such estate is held in common by the heirs as an entire estate.

Copar'eeny, *n.* (*Law.*) An equal share of a copar'eenary.

Copart'ment, *n.* See COMPARTMENT.

Copart'ner, *n.* [*Com* and *partner*.] A joint partner; an associate; a sharer.

Copart'nership, *Copart'nership*, *n.* Joint partnership, or concern in business; the persons who carry on a joint concern. See PARTNERSHIP.

Copat'riot, *n.* Same as COMPATRIOT, *q. v.*

Cope, *n.* [W. *cob*, a cloak or mantle, from *cop*, *coppa*, the top of anything, the crown of the head; A. S. *cæppe*, a cap; Ger. *kopf*, the head; allied to Lat. *caput*; Fr. *chape*.] A cover for the head.

(*Ecol.*) An ecclesiastical vestment worn during the celebration of mass, and at processions, vespers, and other solemnities. The *C.* was originally a cloak worn for ordinary purposes. In form it is a semicircle, without sleeves, and with a hood. It is fastened across the breast with a clasp or morse. *C.* soon began to be ornamented with embroidery, and even with jewels; and so early as the 13th cent. they became the most magnificent and costly of all the vestments of the priesthood.

—Anything extended over the head, as the roof or covering of a house; the arch over a door; the arch or canopy of the sky, &c.

"The starry cope of heaven." — *Milton*.

—*v. a.* To cover, as with a cope; to cover over an arch.

"A very large bridge . . . made of wood, and copped overhead." — *Addison*.

—*v. i.* To jut out, as a wall.

Cope, *v. n.* [Icel. *kapp*, fervor of spirit, contention; Lapp. *kappai*, with contention; Swed. and Goth. *kapp*, contest. Junius thinks that the word is from the A. S. *cæpian*. L. Ger. *koopen*, to bargain, chaffer, from the emulation between buyer and seller.] To strive or contend on equal terms, or with equal strength; to match; to oppose with success; to contend; to strive or struggle; to compete; followed by *with*; as, to cope with a ruffian.

"Host cop'd with host, dire was the din of war." — *Philips*.

—To encounter; to interchange kindness or sentiment. — *Johnson*.

"Horatio, thou'rt e'en as just a man As e'er my conversation cop'd withal." — *Shaks*.

—*v. a.* To pit one's self against; to accost.

"I love to cope him in these sullen fits." — *Shaks*.

—To reward; to give in return for.

"We freely cope your courteous pains withal." — *Shaks*.

Copeck, *Kopeck*, *n.* A Russian copper coin, 100 of which form a silver rouble, *q. v.*

Cope'land, in Georgia, a post-village of Telfair co., 75 m. S. of Milledgeville.

Cope'land Islands, a small group on the N.E. coast of Ireland, nearly opposite Belfast Lough. There is a light-house here, 131 feet above the sea; Lat. 54° 4' 44" N.; Lon. 5° 32' W.

Copenhagen, [Danish *Kiøbenhavn*, "merchants' haven,"] a handsome, well-built, and fortified city and sea-port of N. Europe, cap. of the kingdom of Denmark; lying partly on the E. coast of the island of Zealand, in the Sound of the Baltic Sea, and partly on the small, contiguous island of Amak: the channel between them forming the port. The city is divided into the *Old Town*, the *New Town*, and *Christianshavn*. The first division is the most populous; the second, the handsomest quarter of the city. The section called Chris-

tianshavn (or "Christian's port," from its having been built by Christian IV.) stands on the island of Amak, and communicates by bridges with the other quarters. The entrance to the harbor is narrow, but the water is sufficiently deep to admit the largest men-of-war. There are dry docks, and every facility for the building and repairing of ships. *C.* is the station of the Danish navy, and is, generally, a fine and spacious city, has some superb buildings; as, the royal palaces of Rosenborg, Charlottenborg, Christiansborg (the latter, destroyed by fire in 1884, contained one of the finest libraries in Europe, including, besides MSS., above 450,000 vols.); the University, Exchange, Cathedral Church of Notre Dame, and those of the Trinity and Our Savior, are, also, magnificent edifices. Trinity Church contains the university library, and the great globe of Tycho Brahe (*q. v.*) the astronomer. The educational, literary, and scientific establishments of *C.* rank with the first of their class, and reflect infinite credit on the govt. and the people. Among them are the Polytechnic, Metropolitan, Royal, Mariæ, and Royal Military schools; the Royal, Scandinavian, and Antiquarian societies, and the Academy of Arts. The hospitals are numerous and well conducted; the most splendid being that of Fredrick V. They include a Foundling Hospital, and a Deaf and Dumb Institution open to all the kingdom.—*Manf.* Sugar, tobacco, soap, liquors, beer, cotton and woollen fabrics, linens, silks, gloves, and hats, &c. The trade of *C.* is very considerable, importing, chiefly, anchors, pitch, and tar from Sweden and Norway; flax, hemp, sail-cloth, cordage, &c., from Russia; tobacco and rice from the U. States; wines and brandy from France; and coal, earthenware, textile goods, and colonial produce, as tea, sugar, &c., from Great Britain. *C.* is generally a healthy city, and under efficient police regulations; and the citizens are formed into a national guard, exclusive of the garrison. Its environs are celebrated for their romantic beauty. *C.* was founded in 1168, and has suffered at different periods from disastrous fires. It also sustained much damage from the English bombardment, 1807, and by an inundation in 1824. Pop. (1890) 375,719.

Copenha'gen, in Illinois, a former P. O. of DuPage co.

Copenhagen, in Louisiana, a post-office of Caldwell co.

Copenhagen, in N. Carolina, a village of Caldwell co., abt. 200 m. W. by N. of Raleigh.

Copenhagen, in New York, a post-vill. of Lewis co., on Deer River, 25 m. E. of Sackett's Harbor.

Copernican System, *n.* (*Astron.*) The system propounded by Copernicus. It affirms the sun to be at rest in the centre, while the planets revolve round it. See ASTRONOMY and PTOLEMAIC SYSTEM.

Coperni'cia, *n.* [Named after Copernicus.] (*Bot.*) A genus of plants, order *Palmaceæ*. They are American palms, with tall stems and fan-shaped leaves. *C. cerifera*, the Carnaiba wax-palm of Brazil, has a very hard trunk, forty feet high and six or eight inches thick, commonly employed for building-purposes. The young leaves are coated with wax, called *Carnaiba wax*, harder than bees-wax and of a lemon tint, which has been employed for candle-making.

Copernicus, NICHOLAS, a celebrated Prussian astronomer, and mathematician; founder of the modern system of astronomy, b. at Thorn, 1473. He was educated at Cracow, where he became a doctor in medicine. He then travelled into Italy, for the purpose of becoming acquainted with the great astronomer Regiomontanus, and became a professor of mathematics at Rome. On his return, after several years' absence, to his native country, his uncle, the bishop of Warmia, gave him a canonry; and being thus at ease as to fortune, he diligently labored to improve the science of astronomy. He studied the various systems of the ancient astronomers, and compared them with each other, when, astonished and dissatisfied with the complexity and improbability which he found in them, he applied himself to the construction of a system at once more simple and more symmetrical. The fruits of his researches appeared in his Latin treatise *On the Revolutions of the Celestial Orbs*, in which he represented the sun as occupying a centre round which the earth and the other planets revolve. This great work remained in MS. for 13 years after he had completed it, so diffident was he as to the reception it might meet with; and it was only a few hours before his death that a printed copy was presented to him, giving him assurance that his opinions would see the light, though he would be beyond the reach of possible censure and persecution. D. 1543.

Cope'stone, *n.* (*Arch.*) The head or top stone of a wall; a coping. (Sometimes called *coping-stone*.)

Copho'sis, *n.* [From Gr. *kophos*, deaf.] A difficulty of hearing. It is often symptomatic of some disease.

Copi, in Iowa, a village of Johnson co., 12 m. W.N.W. of Iowa city.

Copia, (*Myth.*) The goddess of plenty among the Romans, represented as bearing a horn filled with grapes, fruit, &c.

Copiah, in Mississippi, a S.W. co.; area, abt. 960 sq. m. The Pearl River bounds it on the E., and it is also drained by the head-waters of Bayou Pierre and Homochitto River. Cap. Hazlehurst. Pop. (1890) 30,233.

Copiah Creek, in Mississippi, a village of Copiah co.

Copiapo, (*kop-e-a-po*), the most N. town of the republic of Chili, in S. America, formerly cap. of prov. of Copiapo (now incorporated with that of Coquimbo), on a stream of the same name, 30 m. from the Pacific, where it has a port, and 178 N.E. of Coquimbo; Lat. 27° 10' S., Lon. 71° 5' 15' W. It has suffered severely from earthquakes at various times. The port of *C.* is good, and exports great quantities of copper ore. Pop. 13,331.

Fig. 676. — COPAIFERA MUTTINGA.

Cop'ier, Cop'yist, n. One who copies; a transcriber; as, a law-copyist.—An imitator; a plagiarist.

"Without invention a painter is but a copier, and a poet but a plagiarist of others."—Dryden.

Cop'ing, n. [D. *kop*, the head; Sax. *cappe*, a cap.] (*Masonry*.) The layer of stones or bricks that is placed on the top of a wall to form a finish to it, and to protect it from the weather. There are three kinds of *C.*: *flat* or *parallel C.*, which is generally placed on gable ends of houses and walls of all kinds; *feather C.*, the stones of which are thicker on one side than on the other; and *saddle-back C.*, which slopes from the center on either side. The *C.* should project beyond the surface of the wall over which it is placed, to prevent the rain from trickling down its sides.

Cop'ing-stone, n. (*Arch.*) See COPE-STONE.

Cop'ishay, Cop'ensay, n. one of the Orkney Islands, in Scotland, off the S. end of Mainland; Lat. 58° 55' N., Lon. 2° 26' W. It is about 1 m. long, and 1/2 m. broad.

Cop'ious, a. [Fr. *copieux*; Lat. *copiosus*, from *copia*, abundance, from *co-ops*—*con*, and *ops*, power, might, wealth.] In great quantities; furnishing full supplies; ample; plentiful; rich; exuberant; full; overflowing; diffuse; abounding in words or images; as, a *copious* fall of rain, a *copious* lexicon, &c.

Cop'iously, adv. Abundantly; in great quantities; in a copious manner.

Cop'iousness, n. State of being copious; abundance; plenteousness; as, *copiousness* of discharged matter.

—Diffusiveness of style:—opposed to *conciseness*; as, *copiousness* of language.

"The Roman orator endeavored to imitate the *copiousness* of Homer."—Dryden.

Cop'ley, JOHN SINGLETON, an eminent American painter, born at Boston, 1737. He visited Italy in 1774, and in 1776 went to England, where he established himself, and was chosen a member of the Royal Academy. As an artist he was self-educated, and had executed several works of merit before he left America; but his *Death of Lord Chatham*, now in the National Gallery, London, established his fame in England. Many other fine historical subjects were subsequently produced by him, among which were *The Siege of Gibraltar*; *Death of Major Pierson*; *Charles I.*, &c. *C.* was the father of Lord Lyndhurst, Lord Chancellor of England. D. 1815.

Cop'ley, n. in Illinois, a flourishing township of Knox county.

Cop'ley, n. in Ohio, a post-village and township of Summit co., abt. 124 m. N. E. of Columbus.

Copo'pa, n. in Ohio, a post-office of Lorain co.

Copos, n. [Gr. *kopos*, fatigued.] (*Med.*) A morbid lassitude.

Copped (kopt), a. Rising to a top or head; as "copped like a sugar-loaf."—Wiseman.

Coppe-house, n. An ancient term for a tool-house.

Coppe'i, n. in Washington, a village of Walla Walla co.

Cop'pel, n. See CUPEL.

Cop'per, n. [Gr. *kupfer*; Lat. *cuprum*, from *Cyprus*, which abounded in copper-mines.] (*Min.*) An important metallic element called *Venus* by the alchemists, who gave to it the symbol of that planet, ♀. *C.* is a hard, sonorous, ductile and malleable metal, of a characteristic reddish-brown color. Very thin films have been obtained, which were of a beautiful green color by transmitted light, although of the natural color by reflected light. It is one of the best conductors of heat and electricity, and expands one part in 582 between the freezing and boiling points of water. By slow voltaic reduction, it may be obtained in cubes and octahedral forms, which are also taken by several deposits of native *C.* The melting-point of *C.* is 1996° Fahr.; and by exposing it to a very intense heat, it boils and volatilizes, burning with a brilliant green flame. Heated to redness in the open air, *C.* combines rapidly with oxygen; but even moist air, at ordinary temperatures, has but little effect on it. In sea-water it becomes gradually corroded by the formation of an oxychloride of copper. Nitric acid oxidizes and dissolves it with great rapidity; sulphuric acid does not act on it at ordinary temperatures, but dissolves it rapidly if heated; sulphurous acid being evolved and oxide of copper formed, which unites with the excess of acid to form the sulphate. Hydrochloric acid dissolves it with access of air; if the air is excluded, no action takes place. It is but little affected by the fixed alkalis; but with access of air, ammonia slowly oxidizes it. The uses of *C.* are very important, large quantities being used for sheathing ships, and in the manufacture of boilers and utensils for domestic purposes. With zinc it forms brass, and with different proportions of tin it forms bronze, bell-metal, gun-metal and speculum-metal. Its oxides and salts are largely used as pigments and in pharmaceutical preparations. *C.* unites with oxygen in four proportions:—1. The sub-oxide or dinoxide, Cu_2O ; 2. The protoxide or black oxide, CuO ; 3. The binoxide, CuO_2 ; and 4, *cupric acid*, the composition of which is not known. Sub-oxide of *C.* may be obtained in several ways:—1. By calcining the sub-chloride with carbonate of soda and washing the residue; 2. By heating four parts of copper filings and five parts of protoxide of copper in a close crucible; 3. By boiling a solution of sulphate of copper with grape-vinegar, and adding potassa. By the first and third processes, the sub-oxide is obtained in a crystalline state. Sub-oxide of copper is a feeble base, and its salts are important. Its principal use is in the manufacture of stained glass, to which it imparts a ruby color of great beauty. Protoxide of copper, CuO , is prepared by heating copper plates and turnings in a current of air, or by calcining nitrate of copper in an earthen crucible. It is a black powder,

possessed of strong hygroscopic qualities. When strongly heated, it fuses and parts with a portion of its oxygen, a compound of sub-oxide and protoxide being formed. Oxide of copper is easily reduced at a moderately high temperature by carbon, hydrogen, or organic matter,—a property which renders it peculiarly valuable in the ultimate analysis of organic bodies. It is also used to give a green color to glass. It is quite insoluble in water, but dissolves freely in acids, yielding very important salts. The *hydrated oxide*, $\text{CuO}_2\cdot\text{H}_2\text{O}$, is obtained by decomposing a solution of a copper salt with an excess of potassa. The pigment known as *blue verditer* consists of a hydrated oxide of copper. Boiled with water, it becomes black and anhydrous. It is soluble in ammonia, forming a deep blue solution. *Bin oxide of copper*, CuO_2 , has been obtained by the action of bin oxide of hydrogen, or hydrated oxide of copper. It is a yellowish-brown powder, easily decomposed into oxygen and oxide of copper by heat or acids. *Cupric acid*, the formula for which has not been determined, is known only in combination with potassa, and is formed when finely-divided copper is heated to redness with caustic potash and nitrate of potash. Digested in water, the mass yields a blue solution, supposed to consist of *cuprate of potash*. The salts of *C.* are characterized by their green or blue color. They are nearly all soluble, and have a strong, disagreeable, metallic taste, acting as poisons on the human system. The symptoms of poisoning by copper are, violent and irrepressible purgings and vomitings, followed by exhaustion and death. The best antidote is albumen, or white of egg, with which they form an insoluble and almost inert compound. In medicine, sulphate of *C.* is used as a tonic, and is antispasmodic in cases of dyspepsia and Asiatic cholera. It is also used as an outward application to wounds which present the granulated appearance known as *proud flesh*. In five-grain doses sulphate of *C.* acts as a powerful emetic. The other salts of *C.* are seldom used. The most characteristic reactions of *C.* salts are as follows: *Ammonia* in excess gives a dark-blue solution; *yellow prussiate of potash* gives a red-brown precipitate. A strip of bright *metallic iron* precipitates copper from acid solutions in a metallic form. Of late years, *C.* has been used somewhat extensively to give a bright green color to pickles and preserves. Its presence may be readily detected by incinerating the suspected article, washing the ashes in water, and filtering. If on the addition of liquid ammonia, the solution strikes a deep blue color, copper is present. Oxide of *C.* forms four compounds with acetic acid: *neutral acetate* (known in commerce under the name of *VERDITER, q. v.*); *subsesquiacetate*, *diacetate* (or *VERDIGRIS, q. v.*), and the *triacetate*, which is the most stable of the acetates of *C.* *C.* forms two chlorides, two simple compounds with cyanogen; Wurtz obtained a compound *hydride of copper*; and there is another important salt termed *nitrate of copper*. The *C.* of commerce is very nearly pure, containing only traces of arsenic, iron, lead, tin, and silica. *C.*-plates are used in engraving, the impression being very sharp and delicate. The most important alloys of *C.* are: *C.* and zinc (see BRASS), and *C.* and tin (see BRONZE). Equivalent, 63; sp. gr., 8.921 to 8.952; symbol, *Cu* (from *cuprum*).

Copper Ores.—The ores of *C.* are somewhat numerous, and widely spread over the earth's surface. Native *C.* is occasionally found crystallized in cubes, octahedra, or dendritic crystals, or in amorphous masses, in Siberia, and in many parts of the U. S., which country has now become the greatest producer of *C.* in the world. The three principal *C.* producing sections of this country are the Lake Superior region, Butte, in Montana, and Arizona. It is obtained in smaller quantities in New Mexico, Colorado, Vermont and some other States. The rich mines of Lake Superior contain native *C.*, of which formerly large masses were obtained. It is now generally found in nodules or sheets distributed through the beds. The *C.* veins of Montana occur in granite, usually in connection with silver. The Arizona ores are oxides and carbonates. The product in the census year was: Montana, 98,222,444 lbs.; Michigan, 87,455,672 lbs.; Arizona, 31,580,185 lbs.; total, U. S., 226,055,962 lbs.

Sulphate of C. known as *blue-vitriol*, *blue-stone*, and *blue-copperas*, occurs in beautiful prismatic crystals. It is formed in the preparation of sulphurous acid, and is also manufactured by roasting copper pyrites with free access of air. As found in commerce, the crystals are usually opaque, but if they are dissolved in hot water and allowed to crystallize slowly, they become perfectly transparent. The *S. of C.* is largely employed by the dyer and calico-printer, and in the manufacture of pigments. It is also occasionally used in medicine, in the electrotype process, and in galvanic batteries. *Form.* $\text{CuO}\cdot\text{SO}_3$.

Cop'per, n. A vessel made of copper, particularly a large boiler used in kitchens.

"They boiled it in a copper to the half."—Bacon.

Hot coppers. A cant term, used in England to denote the dry, parched condition of the mouth, with feverishness of the general system, after a drinking-bout.

—*a.* Consisting of copper; pertaining to copper; resembling copper; as, "a copper sky."—Coleridge.

—*v. a.* To cover or sheathe with sheets of copper; as, to *copper* a ship's bottom.

Cop'peras, n. [From Ger. *kupfer-wasser*; Fr. *couperose*; It. *copparosa*.] A term applied, with the prefixes *blue* and *green*, to the sulphates of copper and iron respectively.

Cop'peras Creek, n. in Illinois, a post-village of Fulton co., about 50 m. N. by W. of Springfield.

Cop'peras Hill, n. in Vermont, a P. O. of Orange co.

Cop'per-bottomed, a. (*Naut.*) Said of a ship when her bottom is sheathed with copper.

Cop'per Creek, n. in Illinois, a former post-office of Rock Island co.

Copper Creek, n. in Iowa, a village of Jackson co., abt. 76 m. E. N. E. of Iowa City.

Cop'per-faced, a. Faced with copper; as, a *copper-faced* die.

Cop'per-fastened, a. (*Naut.*) Fastened with copper bolts, as the planks and ribs of a ship.

Cop'per Falls Mine, n. in Michigan, a post-office of Keweenaw co.

Cop'per-green, n. (*Painting*.) The appellation of a class rather than of an individual pigment, under which are comprehended verdigris, verditer, malachite, mineral green, green bice, Scheele's green, Schweinfurt or Vienna green, Hungary green, emerald green, true Brunswick green, lake green, mountain green, African green, French green, Saxon green, Persiau green, patent green, marine green, Olympian green, &c. The general characteristic of these greens is brightness of color, well suited to the purposes of house-painting, but not adapted to the modesty of nature in fine art.

Copper Harbor, n. in Michigan, a thriving post-village and township of Keweenaw county, on Lake Superior.

Cop'per-head, n. (*Zoöl.*) *Ancestron contortrix*, a dangerous serpent of the Rattlesnake family. It is abt. 2 feet long, and its color is light chestnut, with darker transverse bars. It inhabits the Southern States, and lives in dark, shady places, or in meadows of high grass.

—A cant term which originated in the U. States during the civil war; intended to denote one who, while belonging to, or resident in, the N. States of the Union, was yet an open sympathizer with the Southern cause.

Cop'per Hill, n. in New Jersey, a post-village of Hunterdon co., about 3 m. S. of Flemington.

Cop'per Hill, n. in Virginia, a P. O. of Floyd co.

Cop'pering, n. Act of covering or sheathing with copper; as, the ship underwent fresh *cop'pering*.

—An entire snit or covering of copper; as, the *cop'pering* of a ship's bottom.

Copperish, a. Containing copper; like copper, or partaking of its qualities; as, a *copperish* taste of the palate.

Cop'permine Mountains, n. in British America, a low range running parallel to the Rocky Mountains from Lat. 63° N. to the Arctic Ocean.

Cop'permine River, n. in British America, traverses the North-western Territory, and falls into an inlet of the Arctic Ocean, N. E. of the Great Bear Lake. Length abt. 250 miles.

Cop'per-nickel, n. (*Min.*) Native bi-arsenide of nickel, composed of about 60 per cent. of arsenic and 40 nickel, with small quantities of antimony, cobalt, lead, iron, and sulphur. It occurs crystallized and massive. The color is copper-red. It emits an arsenical odor when struck with steel; and breaks with a conchoidal fracture.

Cop'per-nose, n. A red nose.

"I had as lief Helen's golden tongue had commended Troilus for a copper-nose."—Shaks.

Copperopolis, n. in California, a post-village of Calaveras county, about 38 miles E. by N. of the city of Stockton.

Cop'per-plate, n. A plate of polished copper, of which designs are engraved.—A print or impression on paper, &c., taken from an engraved copper-plate.

Copper-plate printing, is performed on what is called *rolling press*. In the process of printing, the plate of copper or steel from which the impression has to be taken, is raised to the temperature of about 180°, by placing it in an iron box in which steam circulates. Copper-plates were formerly heated by placing them over burning charcoal; thus causing the trade to be very injurious to the health of the workmen. After the plate is heated sufficiently, the printer rolls a small quantity of ink on the face of it with a roller made of woollen. He then removes the plate from the source of heat, takes off some of the superfluous ink with a piece of canvas, and he carefully wipes the face of the plate with both hands in succession. To accelerate the wiping, he dips his hand from time to time in whitening. The chief art of the printer is to remove every particle of the ink from the plate surface, and yet not disturb the ink in the engraved parts. When properly finished, the plate is laid on a plank of the press, and the damped paper which is to receive the impression is laid over it, with two or three folds of flannel or blanket above. The plate is then pulled through the rollers of the press, and the required impression obtained.

Cop'per Pyrites, (YELLOW COPPER-ORE), n. (*Min.*) Double sulphide of copper and iron, composed of abt. 35 per cent. of sulphur, 35 of copper, and 35 iron. It occurs crystallized in tetrahedrons, and stalactitic, unmillated, and amorphous. When pure, the color is newly fractured surface is bright brass-yellow with metallic lustre. Frequently the surface displays variegated tarnish; it is then called *Peacock-ore*. *C. P.* occurs in lodes or beds, with other ores of copper, lead, and iron, in rocks of various geological ages, but generally in primary and metamorphic rocks.

Cop'per-smelting, n. See SMELTING.

Coppersmith, n. A worker in copper; one who fabricates copper utensils, &c.

Copper Vale, n. in California, a post-office of Imperial co.

Copper Valley, n. in Virginia, a post-office of Floyd co.

Copper-works, n. pl. A place where copper is smelted and worked.

Cop'per-worm, n. (*Zoöl.*) See TEREDO.

Cop'pery, a. Mixed with copper; made of copper; like copper in taste or smell.

Copet. (*kop-pä'*) a village of Switzerland, canton of Vaud, district of Nyon, on the lake, and about 9 m. from the city of Geneva. It is celebrated on account of an *âteau*, which, after having been inhabited by the philosopher Bayle in the 17th century, became, at a later period, the property of Necker, and was for several years the place of residence of his daughter, the celebrated Madame de Staël.

Copice, Copse. (*kop'pis, kops,*) *n.* [O. Fr. *coupeiz*, *cop* newly cut, from Fr. *couper*, Ger. *koppen*, to cut; *kopādes*, trees cut down, from *koptō*, to cut.] A wood consisting of underwood, shrubs, or brushwood; underwood cut down at certain times for fuel; as, *coppice* lands.

Copiu. *n.* The conical ball of thread or yarn on the middle of a spinning-wheel; a *cop*.

Copie-crown. *n.* The feathery tuft on a fowl's head.

Copied. *a.* Rising in a conical form, or to a point.

Copie-dust. *n.* Powder used in purifying metals; steel-dust.

"Incorporating powder of steel, or *copie-dust*." — Bacon.

Copie-stone. *n.* See COBBLE.

Coppy-woods. *n. pl.* See COPPICE.

Copris. *n.* [Gr. *kopros*, dung.] (*Zoöl.*) The Dung-les, a genus of the *Lucanilla* family, including beetles that enclose their eggs in pellets of manure, which they roll along with their hind feet, and at length bury them.

Coprolite. *n.* [Gr. *kopros*, dung, and *lithos*, a stone.]

1.) Petrified fecal matter, found in the secondary and tertiary states. It consists chiefly of the voidings of saurians and saurid fishes. The true nature of *C.* was first discovered by their occurrence near the region of the intestinal tube in the bodies of several fossil ichthyosaurs. Scales, bones, teeth, and other parts of unidentifiable food, are often found in them, and occasionally are found exhibiting the spiral twisting noticeable in the excrement of some living fishes. *C.* contain a considerable proportion of phosphate of lime, for which reason they are largely employed in the manufacture of artificial manures.

2.) Pertaining to, or resembling, coprolites.

Coprophagous. *a.* (*Zoöl.*) Feeding upon dung or excrement, as the beetles of the genus *Copris*.

Cop. *n.* The connecting crook of a harrow. Local Eng.

1.) Aught iron on the end of the tongue of a cart; a *U. S.*

2.) See COPPICE.

Cop. (*kops,*) *n.* See COPPICE.

[See COPPICE.] To preserve, or to plant, underwood.

"The neglect of *copping* wood cut down, hath been of very serious consequence." — Swift.

Cop. *a.* Having copses.

Cop. *n.* [Having from the city of *Coptos*, in Upper Egypt, to which, during the persecution that took place in the Roman empire, many of the Christians had fled for refuge.] (*Hist.*) The name given to the Christians, descendants of the ancient Egyptians. In Egypt they are called *Kibt*, which some are inclined to believe to be the root of the name Egypt. The number of *C.* in Egypt at present is not more than 150,000, and about 10,000 of them live in Cairo. They are not of tall stature, have black eyes, rather curly hair, and in other respects resemble the ancient Egyptians, to whom they have inherited also the custom of circumcision. Their dress very much resembles that of the Jews; but they are usually distinguished by a turban. In character they are generally gloomy, selfish, and avaricious. They have always been distinguished for their expertness in figures, in consequence of which many of them fill important posts throughout the country, and have acquired great influence. In religion they are generally monophysites of the Jacobite sect, only a small portion of them being united either to the Greek or Roman church. They ascribe their origin from heathenism to St. Mark, whom they regard as the first patriarch of Alexandria. Their patriarch is still said to be "of Alexandria," though he resides at Cairo. Besides him, they have a metropolitan of the Abyssinians, bishops, arch-priests, priests, monks, and nuns. The patriarch is always chosen from the monks of the convent of St. Anthony, either by predecessor or by lot, and is not permitted to marry. He nominates the metropolitan of Abyssinia, and resides in that country. There are twelve bishops, who are very strict in their religious observances, and their Christian sects more than they do the Moslems. They practise baptism by immersion, unction, orcaism; have auricular confession, and celebrate the Lord's Supper with leavened bread which has been soaked in wine. They fast regularly on Friday, and observe with great strictness. Their monks and nuns live a very strict life. The *C.* have many schools, but the boys, who there learn the psalms, gospels, and apostolic epistles in Arabic, and then the gospels, psalms also, in Coptic. The Coptic, however, is not strictly grammatically, nor is it any longer a spoken

language, but is only used in religious services.

Cop. (*kop'tik,*) *a.* Pertaining to the descendants of the Egyptians, called *Copts* or *Ophtis*.

1.) The language of the Copts, or that which was in use in Egypt after the introduction of Christianity. The relationship it bore to the more ancient language of the country it is impossible to determine. The character is Greek, with an addition of eight other words to express sounds peculiar to the *C.*, and many words have been introduced with Christianity. There are two principal dialects of the *C.* — the *Sahidic*, or Egyptian, and the *Memphitic*, or Lower Egyptian. The former contains a greater number of Greek words, but the latter appears to be the more ancient. There is a third dialect — the *Bashmuric*,

which was spoken in the Delta, but of which only a few fragments now exist. It is interesting from its supposed resemblance in some points to the language of the hieroglyphics. The *C.* literature is by no means rich or valuable; consisting for the most part of translations of the sacred scriptures, lives of saints, homilies, and some Gnostic works. The translations of the Bible were probably made about the end of the 3d or beginning of the 4th century, and follow, as far as the Old Testament is concerned, the Septuagint version. The *C.* language has not been spoken in Lower Egypt since the 10th century, but it lingered for some centuries later in some parts of Upper Egypt. It is still, however, employed by the Copts in their religious worship; but the lessons, after being read in *C.*, are explained in Arabic.

Coptis. *n.* [From Gr. *kopto*, to cut, from the numerous divisions of the leaves.] (*Bot.*) A genus of plants, order *Ranunculaceæ*. They are low herbs, with radical leaves, and a long, slender, perennial, creeping rhizoma. The species *C. trifoliata*, the Gold-thread, is a native of N. America, from Pennsylvania to the Arctic circle. It is much prized for its root, which is a pure and powerful bitter, and forms an excellent stomachic and tonic. The root of *C. teeta* is found in the bazaars of India, under the names of *mishmee bitter* and *mahmira*. It is intensely bitter, and is a very valuable tonic.

Copula. *n.* [Lat. *con*, and root *ap*; Sansk. *āp*, to arrive at.] (*Logic.*) That part of the preposition which affirms or denies the predicate of the subject. The only true logical copula is the present tense of the verb *to be*, with or without the negative sign "is" or "is not."

(*Mus.*) See COUPLER.

(*Anat.*) A band or ligament.

Copulate. *v. i.* [Lat. *copulo*, *copulatus*.] To come together in sexual intercourse.

Copulation. *n.* [Lat. *copulation*.] Act of copulating; coition. — Any conjunction; as, "a *copulation* of ideas."

Copulative. *a.* That which unites or couples.

(*Gram.*) Noting a conjunction that connects two or more subjects or predicates.

—*n.* (*Gram.*) A copulative conjunction.

Copulatively. *adv.* In a copulative manner.

Copulatory. *a.* Relating to copulation; uniting.

Copy. *n.* [Fr. *copie*; It. *copiā*; Arm. *kopi*; W. *copi*, a transcript; Ar. *kufi*, like, resembling.] An imitation, resemblance, or likeness of any kind; — opposed to *original*.

—A transcript of an original writing; a book printed according to the original; a single book or set of books; as, a *copy* of Shakspeare.

"If virtue's self were lost, we might
From your fair mind new *copies* write." — Waller.

(*Fine Arts.*) A transcript from an original work of art. When an artist copies his own work, it is called a *duplicate*, or *replica*.

(*Printing.*) The subject-matter to be printed, whether it be an original work in manuscript, or a reprint: in the first case it is termed *manuscript copy*, or *written copy*; in the second, *printed copy*.

—*v. a.* To write, print, or engrave, according to an original: to form a like work or composition; to transcribe; to paint or draw according to an original; to follow or imitate an original or pattern in manners or life. (Sometimes preceding *out* and *off*.)

"Who writes a libel, or who *copies out*." — Pope.

"To *copy* her few nymphs aspired." — Swift.

—*v. n.* To do anything in imitation of something else; — sometimes with *from* and *after*.

"When a painter *copies from* the life, he has no privilege to alter features or lineaments." — Dryden.

Copy-book. *n.* A book in which copies are written or printed for learners to imitate.

Copy-er. *n.* A copyist: one who copies or transcribes.

Copy-hold. *n.* (*Eng. Law.*) A holding, or a tenure of estate by copy of court-roll; a tenure for which the tenant has nothing to show except the rolls made by the stewards of the lord of the manor's court.

—Land held by such tenure.

Copy-holder. *n.* One who is possessed of land in copy-hold.

Copying-press. *n.* A machine by which duplicates of letters and manuscripts may be produced without having recourse to transcription. A copying-machine generally consists of a flat bed, upon which rests the letter to be copied, and the paper for the duplicate. Above these is a flat plate, called a *platen*, which, by means of a screw or lever, is made to produce the necessary pressure. The ink with which the letter is written contains a certain amount of sugar or treacle, which is transferred to the paper laid upon it by the pressure exerted. The copy made is, of course, reversed, but the paper is purposely made thin, in order that the writing may be read through it. Various contrivances have been invented for procuring the necessary amount of pressure, but the simple screw and lever appears to be the best of them all. The *manifold-writer* may be described under this head. It simply consists of a number of sheets of paper blackened with some composition that will come off when pressed hard, but will not move at a slight degree of pressure or friction. Blank sheets of paper are inserted between these, and the writing is performed with a hard stylus made of steel or agate; the whole being placed on a smooth copper or pewter plate.

Copyist. *n.* A copyer; an imitator; a transcriber; as, a *copyist* of music, a *copyist* of the Old Masters.

Copyright. *n.* The exclusive right of an author, or his representatives, to print, publish, and vend a literary work. This right extends also to lectures, musical com-

positions and performances, engravings and prints, sculptures, models, &c., and designs for useful and ornamental articles. According to the practice of American legislation, the term *copyright* is confined to the exclusive right secured to the author or proprietor of a writing or drawing, which may be multiplied by the arts of printing in any of its branches. Plays may also be copyrighted, and the author of a book may reserve to himself the right of translation or dramatization. The word book may be applied to a single sheet, and a title may be copyrighted in advance of the preparation of the book to which it is intended to apply. In cases of compilation, the law does not permit the copying of an author's words to such an extent as to do him substantial injury, though compilation is to some extent permitted in dictionaries, cyclopedias, guide-books, &c., where the design and character of the work are novel. Severe penalties and forfeitures are imposed by statute law upon persons who knowingly violate any of the provisions of the copyright law. Remedy for the violation of the rights of an author may be sought in either the State or the U. S. courts.—*International copyright.* For a century after the establishment of the U. S. government, no foreigner was entitled to copyright in this country, and foreign books could be republished at will without compensation to the authors. In 1891 this policy was abandoned, and an act passed permitting to foreigners the privilege of American copyright, when citizens of a foreign nation whose copyright laws extend similar privileges to citizens of the U. S., or when such foreign nation is a party to an international agreement providing for reciprocity in copyright privileges, in case the U. S. becomes a party to such agreement. It is required, however, that such copyrighted works shall be manufactured in the United States. An amendment to the copyright act, which became operative on March 3, 1897, prohibits the importation of any books, pictures, &c., marked "copyright," but not actually copyrighted in this country. Another amendment, passed Jan. 6, 1897, prohibits the unauthorized public performing of any copyrighted musical or dramatic composition. This offense is made punishable by a fine of \$100 for the first offense and \$500 thereafter, or may be treated as a misdemeanor; and an injunction granted by any U. S. Circuit Court is operative throughout the U. S.—In England, the duration of all *C.*, whether the author be dead or alive, is extended to *forty-two* years; and it is further provided, that if the author be alive at the expiration of this period of forty-two years from the publication of the works, he shall enjoy the *C.* till his death, and that his heirs or assignees shall enjoy it for seven years after that event. In France, *C.* continue for twenty years after the death of the author. In most of the German States they are perpetual; and a *C.* secured in one State is good in all. In Germany and Austria, *C.* is given for thirty years after author's death. In Holland, Belgium, Denmark, and Sweden, *C.* is now limited to the life of the author and twenty years thereafter. In Spain, the author's life and fifty years thereafter. In Greece, *C.* is for fifteen years from publication. In Russia, *C.* holds good during the author's life and for twenty-five years thereafter.

Coquelicot. (*kōk'le-kō,*) *n.* [Fr.] (*Bot.*) The red *Corn*-rose or wild poppy.

—Poppy-color, a kind of bright-red.

Coquet. (*ko-ket'*) *v. n.* [Fr. *coquet*, to strut it as a cock among hens, from *coq*, a cock.] To lay one's self out for admiration; to trifle or practise deceit in love; to endeavor to attract notice and admiration, from motives of vanity.

—To make a show of love towards, from vanity; to deceive in love; to jilt.

"Phillis . . . *coquetting* t'other night,
In public, with that odious fright." — Swift.

Coquetry. (*ko-ket'-re,*) *n.* [Fr. *coquetterie*.] An attempt to attract admiration, notice, or love, from motives of vanity; affectation of amorous advances; trifling in love.

"A couple of charming women, without a dash of *coquetry*, that gave me a great many agreeable torments." — Spectator.

Coquette. (*ko-ket'*) *n.* [Fr.] A vain, airy, trifling girl or woman, who endeavors to attract admiration and advances in love, from a desire to gratify her own vanity, and then rejects the object of her assumed regards; a jilt; a flirt.

"A *coquette* and a tinder-box are sparkled." — Arbuthnot.

Coquettish. (*ko-ket'tish,*) *a.* Practising coquetry; as, a *coquettish* bar-maid.

Coquettishly. *adv.* In a coquettish manner.

Coquilla-nut. (*ko-keel'ya,*) *n.* [Sp. *coquillo*.] (*Bot.*) See ATTALEA.

Coquille River. (*ko-kēl'*) in Oregon, a small stream in Coos co., flowing W. into the Pacific Ocean.

Coquin bite. *n.* (*Min.*) A white species of copperas of sulphate of iron, found at Coquimbo, Chili.

Coquimbo. (*ko-keem'bo,*) or LA SERENA, a sea-port town of Chili, in the N. part of the republic, cap. of prov. of same name, on the Chuapa, near its mouth, 270 miles N.N.W. of Santiago; Lat. 29° 53' 43" S., Lon. 71° 15' 40" W. It is a well-built place of one-story houses. *C.* is, to a great extent, the cap. of N. Chili, and its principal sea-port; its exports (chiefly copper) amounting, in 1864, to 678,041 Spanish dollars. The harbor is large and well sheltered, and secure at all seasons. Pop. 7,138.

Co'ra, or CORA, in Iowa, a village of Fremont co.

Co'ra, in Iowa, a village of Henry co., 25 m. W.N.W. of Burlington.

Co'ra, in Ohio, a post-office of Gallia co.

Co'ra, in Texas, a post-village of Comanche co.

Cora'cias. *n.* (*Zoöl.*) The Rollers, a genus of birds of the order *Insectivores*, allied to the crows and jays, from which they are distinguished by peculiar elegance and

splendor of colors. The species are natives of Europe and the E. Indies.

Coracite, *n.* (*Min.*) An amorphous variety of Pitchblende, found in the sienite of the N. coast of Lake Superior.

Coracle, *n.* [*W. corwyl.*] A boat used in Wales, by fishermen; made by covering a wicker-frame with leather or oil-cloth. This kind of water-conveyance was used by the ancient Britons, and also by the Egyptians.

Coraco-brachial, *n.* [From Eng. *coracoid*, and Lat. *brachium*, the arm.] (*Anat.*) A muscle which arises from the coracoid process of the scapula, and is inserted at the middle part of the inner side of the humerus. It carries the arm forwards and inwards.

Coracoid, *n.* [From Gr. *korax*, a crow, and *eidos*, form.] (*Anat.*) A name first applied to a small process of the blade-bone of apes and man, on account of its resemblance to the beak of a crow; and now extended to a large flattened bone passing from the shoulder-joint to the sternum in birds, reptiles, and monotremes, and of which the process above mentioned is the rudimental representative.

—*a.* Of the form of a crow's beak.

Coral, *n.* [Gr. *korallion* — *korē*, a daughter, and *halo*, halos, the sea. Literally, the daughter of the sea; Lat. *corallum*; Fr. *corail*; Ger. *koralle*.] (*Zool.*) The name given to the stony frame secreted by many species of animals of the class *Polypi*, q. v. "The too common notion that coral is built by an insect, or that the coral animals build coral at will, as the bee builds comb, or as workmen masonry, is wholly erroneous. *C.* is simply the frame-work or skeleton, or aggregate skeletons, of polyps — or, in some cases, of aculephs — and is a necessary result of their existence, and is entirely independent of the volition of the animals themselves. In fact, polyps form *C.* in a manner not different in kind from that in which the higher animals form bones; and the *C.* is wholly inside the polyps, and is in no sense a house, as is too commonly supposed, in which the latter live; and it is only when the polyps die, wither, and disappear, that we see the solid *C.* itself. From their resemblance to plants, the animals of this class were regarded by the early naturalists as vegetable forms; and later they have been regarded as partaking of the nature of both plants and animals; but now their strictly animal character is established beyond any question. Still, they are often called *Zoophytes*, as well as polyps. The forms and hues exhibited by them are almost endless. Some parts of the tropical seas, where polyps especially flourish, rival in graceful and varied forms, and in beauty and splendor of colors, the most beautiful flower-gardens of the land. There is scarcely a form of vegetation, either trunk or branch, leaf or flower, fern, moss, lichen, or fungus, that is not imitated with striking exactness by these wonderful animals of the sea." (*Sanborn Tenney*). — As an ornament, black *C.* is much esteemed; but the red and the pink are also highly prized. *C.* is found in very great abundance in the Red Sea, the Persian Gulf, and in the Mediterranean, on the coast of Sumatra, &c. It grows on rocks, and on any solid submarine body, and it is necessary to its production that it should remain fixed to its place. *C.* is an important branch of industry and commerce in Italy. Genoa, Leghorn, and Naples have been, from old times, the three great entrepôts to which the raw material has been carried, and where skilful artificers have established themselves in order to work at its transformation. Coral is obtained in large quantities in the Mediterranean, and at considerable depths, of from 200 to 600 ft. Four varieties are distinguished: 1st, red, which is subdivided into deep crimson red, paler red, and vermillion, which is very rare; 2d, black; 3d, clear white; 4th, veiled white, which is the most common. See CORAL ISLAND.

Fig. 678. — ORGAN-PIPE CORAL.
(*Tubipora syringa*. — Dana.)
(See also Fig. 85.)

Cor'al, in *Illinois*, a post-village and township of McHenry co., about 60 m. N.W. of Chicago; pop. 1,345.

Cor'al, a small rocky island off the S. E. coast of Brazil. Lat. 25° 45' S.; Lon. 48° 35' W.

Cor'al Hill, in *Kentucky*, a post-office of Barren co.

Cor'al Island, *n.* (*Geol.*) An island made up of the skeletons of coral polyps. Coral islands are found in various parts of the ocean, but chiefly within the tropics. The scores of islands which skirt the coast of Florida—the Keys—are a coral reef which has reached and risen above the surface here and there. According to Agassiz, a large part of Florida itself is composed of old coral reefs. Usually, *C. I.* are of a form approaching to the circular, and the water is shallow in the centre, but surrounded by a very deep, and, even, unfathomable sea. When the reef is so high as to remain nearly dry at low water, the animals leave off building; and then the rim or edge of the great basin becomes covered by calcareous sand, which offers a foundation for the growth of marine vegetables, and afterwards a resting-place for the seeds of trees and plants cast upon it by the waves. Trunks of trees also, carried by rivers from continents and islands, after their long wanderings, are often tossed ashore; and sometimes carry with them small animals, such as lizards and insects, which become

the first inhabitants of the new island. The Pacific Ocean, throughout a space comprehended between the thirteenth parallel of latitude on each side of the equator, is a great nursery of coral islands; as are also the Arabian and Persian gulfs. Between the coast of Malabar and that of Madagascar there is a great sea of coral. Flinders describes an unbroken reef 350 miles long upon the coast of New Holland; and between that country and New Guinea coral formations extend throughout a distance of 700 miles, interrupted by no intervals exceeding 30 miles in length. The growth of coral seems, when compared with human epochs, extremely slow; but the facts just cited show that they have produced results of no mean importance, as influencing the general aspect of the earth's crust. Their circular form, the

Fig. 679. — WHIT-SUNDAY ISLAND.
In the Pacific, with its enclosed lagoon.

steep angle at which they plunge into the sea, and the countries in which they occur, render it probable that they are the crests, as it were, of submarine craters; and occasionally lava and volcanic rocks have been found in their central lagoons, which have generally a deep narrow passage, kept open by the efflux of the ocean at low tides. — Coral formations are among the oldest and the newest rocks that come under the notice of the geologist. The ancient limestones of the Silurian and Devonian periods, the vast masses of carboniferous limestone underlying the coal-measures, the limestones of the coral rag, and among others of the secondary age, with those at present in course of formation in many parts of the world, are all essentially the same.

Coralla'ceous, *a.* Like coral; having the nature of coral.

Coralled, (*kor'ald*.) *a.* Furnished with coral.

Coralliferous, *a.* [Lat. *corallum*, coral, and *fero*, to bear or produce.] Producing or containing coral.

Coralliform, *a.* Having the form of coral.

Corallig'enous, *a.* [Lat. *corallum*, and *genere*, to generate.] Producing or yielding coral.

Corallig'erous, *a.* Coralliferous.

Corallina, *n.* (*Bot.*) The Coralline, a genus of marine plants, order *Ceramiales*, remarkable for their rigidity, which is mostly owing to a calcareous incrustation. Some of them expand into leafy lobes, usually fan-shaped. They are mostly abundant in tropical seas.

Cor'alline, *a.* Consisting of coral; like coral; containing coral; as, a *cor'alline* bed.

Cor'allinite, *n.* (*Pul.*) A fossil plant of the genus *Corallina*.

Cor'allite, *n.* [From *coral*, and Gr. *lithos*, a stone.] (*Min.*) A mineral substance or petrification in the form of coral.

Cor'alloid, **Coralloid'al**, *a.* [Gr. *korallion*, coral, and *eidos*, form.] Having the form of, or branching like, coral; as, *coralloidal* concretions.

Cor'alium, *n.* (*Zool.*) The frame-work or coral of a polyp.

Cor'allorhi'za, *n.* [Gr. *korallion*, coral, *rizā*, root.] (*Bot.*) A genus of plants, order *Orchidaceae*. The Coral-root or Dragon's-claw, *C. odontorhiza*, inhabiting old woods from Canada to Carolina and Kentucky, is a plant without leaves or green herbage. The root is a collection of small, fleshy tubers, articulated and branched much like coral. Scape 9-14' high, rather fleshy, striate, smooth, invested with a few long, purplish-brown sheaths. Flowers 10-20, in a long spike, of a brownish green. Lip white, generally with purple spots. Capsules large, reflexed, strongly ribbed.

Cor'al-rag, *n.* (*Geol.*) A group of the Oxford or Middle Oolite, consisting of continuous beds of petrified corals, attaining to a maximum thickness of 170 feet, and interstratified with beds of oolitic limestone. These strata occur in the N. districts of Berkshire and Wilts, and in Yorkshire, England.

Cor'al-root, *n.* (*Bot.*) See CORALLORHIZA.

Cor'al Sea, so called from the coral reefs it contains, is that portion of the Pacific Ocean which has Australia on its W., and the New Hebrides on its E. side.

Cor'al-tree, *n.* (*Bot.*) See ERYTHRINA.

Cor'al-wort, *n.* (*Bot.*) Same as coral-root. See CORALLORHIZA.

Cor'al non ju'dice. [Lat., before one who is not judge.] (*Law.*) Applied to acts done by a court which has no jurisdiction in the case. Such acts have no validity.

Cor'am, in *New York*, a post-village of Suffolk co., abt. 60 m. E. of New York city.

Cor'anach, **Cor'onach**, *n.* [Gael.] A wailing cry for the dead; a loud lamentation over a corpse. (Called in Ireland a *keen*.)

Corant, **Cor'an'to**, *n.* [Fr. *courante*.] A stately, sprightly dance, long gone out of fashion.

Cor'a'to, a town of S. Italy, in Terra di Bari, 14 m. S.E. of Barletta; pop. 24,576.

Cor'b, *n.* [Lat. *corbis*, a basket.] A collier's basket. (*Arch.*) A corbel.

—An alms-basket. See CORBAN.

Cor'bach, **KOR'BACH**, a small town of Germany, cap. of the principality of Waldeck, on the Itter, 28 m. S.W. of Cassel; pop. 2,500. Near it, July 10, 1760, the allied English and Germans were defeated by the French.

Cor'ban, *n.* [Heb. *Korban*, a sacrifice.] An alms-basket; a receptacle of charity; a gift; a church alms-house.

"They think to satisfy all obligations to duty by their corb of religion." — *King Charles I.*

(*Script.*) A sacred gift, a present devoted to God, or his temple. (*Matt.* xxiii. 18.) The Pharisees, and the Talmudists their successors, permitted even debtors to defraud their creditors by consecrating their debt to God; as if the property were their own, and not rather the right of their creditor.

—A religious ceremony among the Moslems, performed at the foot of Mount Ararat, by the slaughter of a certain number of sheep, and distributing them as alms to the poor.

Cor'bandale, in *Tennessee*, a post-office of Montgomery co.

Corbean, (*kor-bo'*), in *New York*, a village of Clinton co.

Cor'beil, *n.* [Fr. *corbeille*, a basket, from *corbicula*, a little basket, dim. of *corbis*, a wicker-basket.] (*Arch.*) A projecting bracket often sculptured like a modillion, sometimes in the form of a basket.

(*Arch.*) A sculptured basket; a corbel.

Corbeil, (*kor'bai*), a town of France, dep. Seine-et-Oise at the junction of the Essonne with the Seine, 18 from Paris; important for its mills and trade in flour.

Cor'bel, **Cor'bil**, *n.* [Fr. *corbeille*, a basket, from *corbicula*, a little basket, dim. of *corbis*, a wicker-basket.] (*Arch.*) A projecting bracket often sculptured like a modillion, sometimes in the form of a basket.

Fig. 680. — CORBEL-TABLE.

the purpose of supporting a superincumbent object for receiving the springing of an arch. A *corbel-table* (fig. 680) is a projecting battlement, parapet, or cornice resting upon a series of corbels.

—*v. a.* To furnish or fit with corbels.

Cor'bettville, in *New York*, a P. O. of Broome co.

Cor'bie-steps, *n. pl.* (*Arch.*) Steps up the sides of a gable, found in old houses in Belgium, Holland, many, &c.

Cor'bie, **Cor'by**, *n.* [Fr. *corbeau*, from Lat. *corvus*, a crow.] In Scotland, a raven or crow.

Cor'chorus, *n.* [From Gr. *koros*, I purge, in allusion to the laxative properties of *C. olitorius*.] (*Bot.*) A genus of plants, order *Tiliaceae*. The most important species is *C. capsularis*, the Jute-plant, a native of India. The fibre called *Jute*, or *Jute-hemp*, is obtained from bark. It is largely imported into Europe, where it is employed for making coarse bags, and as a foundation for inferior carpets. It is also frequently mixed with the manufacture of cheap satin fabrics. It does not appear well adapted for cordage, because it will not expose to wet. The species *C. olitorius*, commonly called Jew's mallow, is sometimes used as a pot-herb. In Panama, the leaves of *C. manpoensis* are employed as a substitute for Chinese tea. See also *JUTE*.

Cor'cle, **Cor'cule**, *n.* [Lat. *corculum*, dim. of *cor*, heart.] (*Bot.*) The embryo of a plant. See EMBRYO.

Corcoba'do, or **Corcovado**, in S. America, a volcanic mountain of the Andes, in Patagonia, near the E. coast, Lat. 43° 10' S. Lon. 73° W. Height, 7,510 ft.

Cor'coran, in *Minnesota*, a post-township of Hennepin co., abt. 16 m. N.W. of Minneapolis; pop. 914.

Corcova'do, a mountain of Brazil, 2 m. from Rio Janeiro; height, 2,000 feet.

Corcyra, or **PHÆCIA**, (*kor-si'ra*.) (*Anc. Geog.*) An island in the Ionian Sea, on the coast of Epirus, famous for the shipwreck of Ulysses, and for the garden of Alcides. It is the modern CORFU, q. v.

Cord, *n.* [Fr. *corde*; Lat. *chorda*; Gr. *chor-dē*.] A small thin rope, composed of several strands of twisted together; a rope; a band; as, whip-cord, cord.

—A thick, ribbed, cotton-stuff, used in England for men's pantaloons and gaiters. See CORDUROY.

—A quantity of wood cut for fuel, so called because measured by a cord; it is, generally, a pile long, 4 feet high, and 4 broad.

—A bond; a tie; that which allures and binds; a metaphorical sense; as, the *cords* of the wicked.

—*v. a.* To bind with a cord or rope; to fasten with as, to *cord* a package or parcel.

—To pile up in a certain quantity for measurement to cord wood. See also *MUSCLE*.

Cord'age, *n.* [Ger. *tauwerk*; D. *touwwerk*; Fr. *corde*, *cordage*; It. *caolame*; Sp. *jarcia*, *cordaje*.] Used to denote all manner of cords or ropes, how many ever they may differ in size; but more especially used in the rigging of ships. The term *cord* is usually employed to distinguish *C.* of small size, that is, of small circumference; *rope*, to distinguish the larger description of *C.*; and *cable*, to distinguish the largest of all, used in the anchoring of ships. *C.* may be made of a finite variety of material — of everything, in fact, that is slender, flexible, and moderately tenacious, such as fibres of various descriptions of vegetables; hair; too silk, leathern thongs, wire, &c. It must neither be much nor too little twisted. Ropes consist of a few yarns, according to their thickness. At a certain age, the fibres of hemp used in making ropes lose 1/4 of their length by twisting, but in the case of the loss is greater. Ropes are sometimes made of wire; and when properly manufactured, they have

found to answer much better than might have been anticipated. Chains are now also substituted frequently for various descriptions of ropes, and hempen cables have been generally superseded by iron chains.

Cor'date, Cor'dated, a. (*Bot.*) Heart-shaped, as the leaf of *Alnus cordifolia*.

Cor'dately, adv. Formed after the shape of a heart.

Cor'daville, in Massachusetts, a P. O. of Worcester co.

Cor'day d'Armaus, MARIE ANNE CHARLOTTE, (kor-dai'), a young Frenchwoman of great beauty and courage, who became the murderess of the revolutionist Marat. She was born at St. Saturnin, near Sees, in Normandy, 1768, was the grand-daughter of the poet Corneille, and was gifted with superior understanding and a warm heart, glowing with the passion for liberty. The books she read, and the conversation of the persecuted and exiled leaders of the Girondists, roused in her the irresistible desire to save, if possible, her country, at whatever cost to herself. Marat appeared to her the master-spirit of the atrocities perpetrated or threatened, and she determined to rid the country of him. That she was actuated by a sense of duty, and felt that she was about to perform an act of patriotic heroism, there is not the slightest doubt; and as the circumstances attending it possess more than ordinary interest, we give the following detailed account. C. left her home, and on arriving at Paris (July 12, 1793), she went to Marat's house, but was not admitted. On Saturday, the 13th, she purchased a large knife, and at seven o'clock in the

been built by the Cordelier monks. Danton was the first president, and among the more celebrated members were Marat, Camille Desmoulins, Fabre d'Eglantine, Robert, and Hébert. The C. demanded the abolition of royalty in 1791. They also clamored for the death of Louis XVI., in 1793; and, in conjunction with the Jacobins, conspired for the overthrow of the Girondists. It was dissolved in 1794.

Cor'deling, a. Twisting; twining.

Cor'delle, n. [*Fr.*, from *corde*, a cord.] A tassel, or twisted mass of cords or yarns. — A hawser or tow-line.

Cordia'ceæ, n. pl. [Named after *Cordus*, a German botanist.] (*Bot.*) The Sebastens family, an order of plants, alliance *Solanales*. *DIAG.* 5 free stamens, axile placentæ, and leafy cotyledons, folded longitudinally. The order consists of 11 genera, including 180 known species, for the most part natives of the tropics. The fruits of many species are edible; as those of *Cordia myra* and *latifolia*, known in India as Sebastens, or Sebasten plums; those of *C. abyssinica*, commonly called the Wanzy, a native of Abyssinia; and those of *Varonia rotundifolia*, which are used to fatten cattle and poultry.

Cor'dial, a. [*Fr.*, from *Lat. cor*, the heart.] Reviving; invigorating; restorative; balmy; as, *cordial waters*.

"Behold this cordial julep here." — *Milton*.

— Sincere; hearty; without reserve; warm; open; dictated by the heart; as, a *cordial greeting*.

"With looks of cordial love." — *Milton*.

— *n.* Anything that cheers, comforts, gladdens, revives, or exhilarates.

"Some cordials seek for to appease

The inward languor of my wounded heart." — *Spenser*.

(*Med.*) Any warm, stimulating, and grateful liquid, acting as a stomachic and restorative. Cordials are generally made with essential oils dissolved in alcohol, and combined with spices and sugar; as noyau, cloves, peppermint, shrub, lovage, curaçoa, ratafia, maraschino, etc.

Cordiality, n. [*Fr. cordialité*, from *L. Lat. cordialitas*.] Sincerity; warmth of kindness or regard; heartiness of liking or affection; as, to receive one with *cordiality*.

Cor'dialize, v. a. To make or render cordial; as, to *cordialize* gin.

Cor'dially, adv. Heartily; sincerely; with real, not assumed, affection.

Cor'dialness, n. Cordiality; heartiness of liking or good-will.

Cor'diform, a. [*Fr. cordiforme*.] Cordate; shaped like the human heart.

Cordillera, (kor-d'ly-ya'ra), n. [*Sp.*] (*Geog.*) The Spanish name for a chain of mountains; as, the *Cordilleras* of the Andes.

Cor'don, n. [*Fr.*; *Sp. cordón*, from the root of *cord*.] A band or ribbon worn round the neck as the badge of a knightly order; as, the *cordón* of the Holy Ghost.

(*Arch.*) The edge of stone on the outside of a building.

(*Mil.*) A line or series of military posts; as, a *cordón* of forts.

(*Fortif.*) The coping of the *escarp* or inner wall of the ditch. It is usually rounded in front, and projects one foot over the masonry. — *Cordon sanitaire*, a series of military posts stationed to cut off communication with a district or country where epidemic disease is raging.

Cor'dova, [Sp. Cordoba.] (Anc. Corduba, and Colonia patricia.) A celebrated city of Spain, cap. of a prov. of same name, in Andalusia, on the Guadalquivir, 73 miles N.E. of Seville, and 185 m. S.W. of Madrid. The city occupies a large oblong space of sloping ground, enclosed by walls flanked with towers originally erected by the Romans, and afterwards repaired, strengthened, and extended by the Moors. But a great part of this space is now covered with gardens and ruined buildings, and but little remains of its ancient grandeur. Streets narrow, crooked, and dirty; and a few only, either of the public or private buildings, are conspicuous for their architecture. There is a cathedral, which was anciently a mosque, built by the Moors at the end of the 8th century, upon the ruins of a Gothic church, which is itself believed to have replaced a Roman temple; it is still one of the most remarkable edifices in Spain. Several other churches are worthy of notice, either for their architecture or their paintings. There is a bridge across the Guadalquivir, which was built by the Moors. It consists of 16 arches, and is commanded by a Saracenic castle. *Manuf.* Paper, hats, barrels, silken fabrics, and a kind of leather, called, from this town, *Cordovan*, or *Cordwain*. The manner of preparing it was here invented by the Moors. Its sale has now, however, dwindled into insignificance. *Pop.* 49,755. C was, in 711, taken by the Moors, and for several centuries remained in their possession. In 1236 it was captured by Ferdinand III., and was constituted capital of one of the four old provinces of Andalusia, with the title of *kingdom*. In 1808 it was occupied and pillaged by the French. It is the birthplace of the two Senecas, and of Lucan the poet. — The prov. is enclosed by Baidjos and Ciudad Real on the N.; by Jaen on the E.; on the S. by Granada, and on the W. by Seville. *Area*, 6,177 sq. m. This prov. is mountainous in the N., and in the S. comparatively level, with great fertility in the plains and valleys, and is rich in minerals in the highlands. *Pop.* estimated at 425,000. *Lat.* between 37° 12' and 33° 44' N., *Lon.* between 3° 56' and 5° 32' W.

Cor'dova, a city of the Argentine Republic, capital of a province of same name, on the River Primero, 387 m. from Buenos Ayres, *Lat.* 31° 35' S., *Lon.* 63° 50' W. The city is well built, and contains a fine cathedral. *Pop.* in 1897, 70,000. — The province (the 2d State in impor-

tance of the Argentine Republic) is inclosed by Santiago, La Rioja, San Luis, and Santa Fé. Mountains and moderately fertile in the N. and W., it is nearly desolate in the S. and E. Maize and fruits are the chief produce, and large numbers of cattle and goats are reared. *Pop.* (1897) abt. 400,000. Also spelled *CORDOEA*.

Cordova, an inland town of Mexico, State of Vera Cruz, at the E. foot of the volcano of Orizaba, 50 m. S.W. of Vera Cruz, and 72 m. E.S.E. of Puebla. Cotton and woollen fabrics are made here; but the principal employment of the inhabitants is the culture of tobacco and coffee. The vicinity is extremely fertile.

Cordova, in Illinois, a township of Rock Island co., on the Mississippi River.

Cordova, in Kentucky, a post-office of Grant co.

Cordova, in Minnesota, a township of Le Sueur county.

Cor'dovan, n. A kind of Spanish leather, originally brought from Cordova, (Spain.) *q. v.*

Corduoy, n. [*Fr. corde-du-roi*, the king's cord.] A thick, ribbed cotton stuff, used for men's apparel, more particularly for sportsmen's pantaloons and gaiters. (Often called, for the sake of brevity, *cord*.)

Corduoy-road, n. In the U. States and Canada, a roadway formed by logs laid side by side across it; — so called from its rough and ribbed surface resembling *corduoy*.

Cor'dwain, n. See *CORDOVAN*.

Cordwainer, (kord'wain-er), n. [*Fr. corduaner*.] Originally, a worker in Cordovan, or Cordwain, a kind of Spanish leather. — A shoemaker; a worker in leather; as, the Company of *Cordwainers*, (London.)

Cord'-wood, n. Wood cut for fuel in certain lengths, and measured by the cord. (*q. v.*)

Core, n. [*Fr. cœur*; *Lat. cor*, the heart.] The heart or inner part of a thing; particularly, the central part of fruit containing the kernels or seeds; as, the *core* of a subject, the *core* of an apple, &c.

"They wasteful eat

Through huds and bark, into the blackened core." — *Thomson*.

(*Metall.*) The internal mould, which forms a hollow in the casting of metals.

(*Mining.*) In Cornwall, Eng., a division of tin-miners' time and labor.

(*Ferriery.*) A malady among sheep, resembling the rot. (Used in some parts of England.)

— *v. a.* To take out the core of; as, to *core* a fruit.

Core'a, or Kore'a (called by the natives *Chao-see*, by the Chinese *Keou-le*, and by the Mantchoo-Tartars, *Solho*), a country of N.E. Asia, long tributary to China, consisting of an oblong-shaped peninsula with an adjoining portion of the continent, and a large number of islands. The whole of the territory lies between *Lat.* 35° and 43° N., and *Lon.* 123° 50' and 129° 30' E., having E. the Sea of Japan; S. the Strait of Corea; W. the Yellow Sea, and Gulf of Leao-tong; N.W. the prov. Leao-tong; and N. Mantchoo-Tartary, (from which it is separated by a mountain-chain), and the Thu-men-kiang river. Length, N.W. to S.E., 350 m.; average breadth of the peninsula, abt. 150 m. C. is generally mountainous. All the principal rivers run W., and discharge themselves into the Yellow Sea; the chief is the Ya-lu-kiang in the N.W., which is navigable for large ships to about 22 m., and for small vessels for about 120 m., above its mouth. The climate in the N. is very rigorous; but in the S. cotton, rice, and hemp are produced. Agriculture may be better farther inland, but on the coast it is much neglected. The mountainous parts of the N. are covered with forests; pines are very common on the coasts. Oxen, hogs, and other common domestic animals are reared. Panthers, bears, wild boars, cats, dogs, sables, and deers are found; also caymans of many feet in length are said to be met with in the rivers, and venomous serpents are not rare. The Coreans are superior in strength and stature to the Chinese and Japanese, but they are inferior to either in mental energy and capacity. They are gross in their habits, eat voraciously, and drink to excess. Their dress is very similar to that of the Chinese, but they wear their hair differently. Their language is peculiar; differing from those of their immediate neighbors. In writing they use alphabetical characters, though the symbolic characters of the Chinese are also understood, and sometimes resorted to. They have a copious literature, and are fond of reading, as well as of music, dancing, and festivities. Polygamy is not permitted, but concubinage is recognized. The religion of the upper order is that of Confucius, while the mass are attached to Buddhism; but neither appears to have much influence. Christianity has been introduced, but is not prospering. Their trade is chiefly with Japan, their best known export being a very fine and transparent fabric woven with the filaments of the *Urtica japonica*. The government is an hereditary and absolute monarchy, and is carried on through three ministers, besides whom there are six departmental ministers. Seoul, the capital, has a population of 192,940. Phyöng-yang, 36 miles from the sea, has over 20,000 population, and is the center of a silk industry, while at Keum-san, 20 miles distant, gold-washings exist. Kai-söng gains its importance from its having been the capital of the old dynasty and its cultivation of ginseng. The population in 1890 was 6,510,955, mainly Mongolian in type. C. occupies about the same latitude as Italy, and is, like it, hemmed in at the north by an alpine chain and traversed from north to south by a branch chain. Among its highest summits is Hien-fung, 8,114 feet above sea level. Various kinds of timber trees abound, except in the west, where wood is scarce. In other parts many hillsides have been denuded of timber on account of the lack of coal. The government was long very jealous of intercourse with for-

Fig. 681. — CHARLOTTE CORDAY.

evening procured admittance to Marat, with this weapon concealed under her garments. She had obtained this interview by writing to him that she was from the heat of rebellion, and would "put it in his power to do France a great service." Marat was in his bath, with a tool by his side to write upon, and entering into conversation with C., he penned with ferocious joy the fresh list of victims with which she pretended to supply him. At the instant when he turned aside, muttering of the hastisement they should receive, C., with desperate determination, plunged her knife into his bosom, and he instantly expired, uttering the words, "To me, my friend?" Meanwhile the maid remained calm and tranquil as a priestess before the altar, in the midst of the tumult and confusion. She was afterwards conducted as a prisoner to the Abbaye. A young man, who begged to die in her place, was also condemned to death. Her first care was to implore the forgiveness of her father, or disposing of her life without his knowledge. She then wrote to Barbaroux as follows: "To-morrow, at seven o'clock, my trial begins; and on the same day I hope to meet with Brutus and the other patriots in elyrium." She appeared before the revolutionary tribunal with a dignified air, and her replies were firm and noble. She spoke of her deed as a duty which she owed her country. "To stop the anarchy of France," she said she did it. "I have slain one man to save a hundred thousand — a wretch to preserve the innocent. I was a republican before the revolution, and I have never failed in energy." She was condemned, and led to the scaffold, retaining her calmness and presence of mind to the last, though pursued by the crowd with yells and shouts of execration. She suffered by the guillotine, July 17, 1793.

Cor'ded, p. a. Made of ropes or cords; supplied with cords.

"With a corded ladder,

To climb celestial Sylvia's chamber-window." — *Shaks.*

— Bound, tied, or fastened with cords; as, a *corded bundle*.

— Riped or ribbed, as by cords; as, *corded trousers*.

— Laid up for measurement by the cord, as wood.

(*Her.*) Bound about with cords.

Cordeliers, (kör-de-leer'), n. [*Fr.*] (*Ecl. Hist.*) The *ord*, or *Cord-wearers*, so called from their girdle of knotted cord, is a minor order of Franciscans, or Gray Friars, founded by St. Francis d'Assisi in 1223, and sanctioned by Pope Honorius III. in a bull published in 1223.

Cordelier's Club, n. (*French Hist.*) A republican society formed at Paris in 1790, that received its name from their meetings being held in a chapel which had

eigners, not permitting Chinese to settle in the country nor any Korean to leave it. Foreigners were not suffered to land or make any stay on the coast, and the N. frontier was abandoned for many miles to avoid communication with the Manchou-Tartars. This seclusion has been given up of recent years.—Continued in SECTION 11.

Co-re-gent, *n.* A joint regent or ruler.

Core'ida, *n. pl.* (Zool.) The Squash-bug, a family of *Hemiptera*, comprising bugs which have the body oblong-oval. They are chiefly abundant in tropical countries. The *Diater bilineatus* (Fig. 682), a native of Brazil, has very singular leaf-like appendages to the tibial joints of its hind legs. This, however, is common to many other species. The smell of these insects is most peculiar, being very far from agreeable, and having associations connected with it by no means pleasing. To the genus *coreus* belongs the common squash-bug, *C. tristis*, of this country. It is about half an inch long, rusty black above, dingy ochre-yellow beneath, and passes the winter in a torpid state; and when the vines of the squash put forth a few rough leaves, it collects beneath them, and soon begins to lay eggs, which it fastens in clusters to the under side.

Fig. 682.

LEAF-LEDGED COREUS.

(*Diater bilineatus*.)

Co-relation, *n.* Joint or corresponding relation.

Co-relative, *a.* See CORRELATIVE.

Core'ila, a town of Spain, prov. Navarre, on the Alama, 13 m. W. of Tudela; pop. 5,552.

Corelli, ARCADELO, an Italian musical composer, b. 1653. He was very celebrated for his skill as a violinist, and when he visited Germany, in 1680, was received with the greatest honors, both from sovereigns and people. He had in his later years the patronage of Cardinal Ottoboni. His works, especially the *Twelve Concertos*, are very highly esteemed for the highest quality of musical composition. D. at Rome, 1713.

Corentyn (or CORANTYN) **River**, in S. America, rising in Mount Acarai, flows from N., and separating British and Dutch Guiana, enters the Atlantic by an estuary abt. 25 m. across at its mouth, in Lat. 6° N., Lon. 57° W.

Coreop'sis, *n.* [Gr. *koris*, a bug, *ephis*, appearance.] (*Bot.*) A genus of plants, order *Asteraceae*. The general characters of the genus are as follows: Involucre double, each 6-10-leaved; receptacle chaffy; achenia compressed, emarginate, each commonly with a 2-toothed pappus; leaves mostly opposite; rays rarely wanting. Among the species belonging to this country is the Tick-seed sunflower, *C. trichosperma*. It is a smooth, branching plant, 1-2 feet high, with a panicle of large, showy, yellow heads; achenia crowned with stout, hispid awns. It is found in wet grounds from Massachusetts to the Carolinas, and blossoms in August.

Cor'er, *n.* He who, or that which, cores.

Core Sound, in N. Carolina, an inlet of the Atlantic Ocean. It joins Pamlico Sound.

Core'sus, (*Myth.*) A priest of Bacchus at Calydon, in Boeotia, deeply enamored of the nymph Callirhoe, who treated him with disdain. He complained to Bacchus, who visited the country with a pestilence. The Calydonians were directed by the oracle to appease the god by sacrificing Callirhoe on his altar. Accordingly, the nymph was led to the altar, when C., who was to sacrifice her, forgot his resentment, and stabbed himself. Callirhoe, conscious of her ingratitude to the love of C., killed herself on the brink of a fountain, which afterwards bore her name.

Coretom'ia, *n.* [Gr. *korē*, the pupil, and *temnein*, to cut.] (*Surg.*) A name applied to various operations for the formation of artificial pupils.

Corf, *n.* [Dan.] A basket used in coal-mines.—A basket employed in fishing.—A shed, hut, or make-shift building.

Corfe' Castle, a town and parish of England, in Dorsetshire, situate in the peninsula or island of Purbeck, 5 m. from Wareham. Pop. 2,000. It is chiefly noted for its castle, at the gates of which King Edward the Martyr was assassinated, March 18, 979, at the instigation of his stepmother, Elfrida. Subsequently King John, in his wars with the barons, deposited his regalia in it, for security. In the civil war it was defended for King Charles I. by Lady Bankes, wife of the Lord Chief Justice, Sir John Bankes; but, in 1645-6, it fell into the hands of the Parliamentarians, who dismantled it.

Corfu, (*kor-fool'*) (anc. *Corcyra*), an island in the Mediterranean, forming part of the kingdom of Greece, and the most important, though not the largest, of the Ionian islands. It lies between Lat. 39° 20' and 39° 50' N., and Lon 19° 35' and 20° 6' E.; off the S. part of the coast of Albania, from which it is separated by the *Channel of Corfu*, only 3-5ths of a mile wide at its N. extremity, 6 m. at its S. extremity, and 15 m. in the centre. C. is 41 m. in length from N.W. to S.E.; its greatest breadth is in the N., 20 m. Area, 227 sq. m. The surface is hilly; the peak of St. Salvador in the N.W. rises 2,979 feet above the sea. The streams are small, and mostly dried up in summer; climate mild. The most elevated lands are rugged and barren, but the plains and valleys are fertile. Oil is the great staple of this isle, which has, in fact, the appearance of a continuous olive wood. C., the cap., is the only town worthy of notice. This island is believed to be the country of *Phæacia* or *Scheria* mentioned by Homer, on which Ulysses was wrecked and afterwards hospitably enter-

tained by king Alcinoüs. It became afterwards a celebrated colony and naval station of the Corinthians, and a quarrel between it and the mother country led to the Peloponnesian war. It belonged successively to the

Fig. 683.—CORFU.

Eastern empire, the Normans, and the Venetians. It was placed under the protectorate of Great Britain by the Congress of Vienna, and ceded by that power to Greece in 1864. Pop. 74,138.

CORFU, a city and port on the E. side of the above island, of which it is the capital. It is in Lat. 39° 37' 39" N., Lon. 19° 56' 34" E., in the channel of Corfu, here about 5 m. wide. It consists of a town and citadel, both fortified; and has several suburbs, one of which is supposed to occupy the site of the ancient city of *Corcyra*. The harbor between the island of Vido and the city, where vessels anchor in from 12 to 17 fathoms water, is safe and commodious. The city is the seat of a Greek archbishop. Pop. 25,000.

Corfu, in New York, a post-village of Genesee co.

Corfute, *n.* (*Geog.*) A native of Corfu, one of the Ionian islands.

Coriaceous, (*kō-re-ā'shus*), *a.* [L. Lat. *coriaceus*, from *corium*, Gr. *cherion*, any skin, leather.] Consisting of, or resembling, leather; tough; as, *coriaceous* concretions.

(*Bot.*) Leathery, thick, and tough.

Coriander, *n.* (*Bot.*) The English name of the genus *CORIANDRUM*, *q. v.*

Coriander, *n.* [Lat.; Gr. *korannon*—probably from *korē*, the pupil of the eye, and *andros*, gen. of *anēr*, a man, because of the resemblance of the seed to the pupil of the eye; Fr. *coriandre*.] (*Bot.*) The Coriander, a gen. of plants, order *Apiaceae*. The species *C. sativum*, a native of Europe, is cultivated for its seeds, which are used in the E. for flavoring dishes and curry-powder, and in this country for the purposes of the distiller, confectioner, and pharmacist. They have a peculiar odor and warm aromatic taste, due to the presence of a yellowish-colored volatile oil. They are carminative, but are chiefly used in medicine to cover the taste of other drugs.

Coriaria, *n. pl.* [Lat. *corium*, a hide.] (*Bot.*) A natural order of shrubby Exogens, inhabiting Chili, Peru, the south of Europe, and a few other places. It is placed by De Candolle directly after *Ochnaceae*, a member of the Rutal alliance, with which it agrees in some respects, but from which it differs essentially in being apocarpous. The question of their affinity is still unsettled. Their sensible properties are of a poisonous nature.

Corigliano, (*ko-reel-ya'no*), a town of S. Italy, 6 m. from Rossano. Manf. Woollens and cloth.

Coringa, a sea-port town of Hindostan, prov. N. Circars, dist. Rajahmundry, and 33 m. S. E. of that town; Lat. 16° 40' N., Lon. 82° 44' E. Excepting Blackwood's Harbor, Coringa Bay contains the only smooth water to be found on the W. side of the Bay of Bengal, during the S.W. monsoon.

Corinna, a celebrated poetess, to whom the Greeks gave the appellation of the *Lyric Muse*. She composed a great number of poems, of which only a few fragments have come down to us; and five times obtained the poetic wreath from her great competitor, Pindar. She flourished in the 5th cent. B. C., and a tomb was erected to her memory in her native city, Tanagra, in Boeotia.—C. is also the name of a celebrated novel by Madame de Staël.

Corinna, in Maine, a post-township of Penobscot county.

Corinna Centre, in Maine, a post-village of the above township, about 60 m. E. of Augusta.

Corinth, [Gr. *Korinthes*.] A famous city of Greece within the Morea (anc. *Peloponnesus*), near the isthmus of the same name, between the gulfs of Lepanto (*Corinthiacus Sinus*) on the W., and of Ægina (*Saronicus Sinus*) on the E., 48 m. W. of Athens; Lat. 37° 53' 37" N., Lon. 22° 52' 5" E. C. was destroyed by an earthquake in 1588, and has now but few remains of its ancient splendor. The traces of the ancient walls are still discernible, but the principal and only interesting monument of antiquity is the citadel or *ACROCORINTHUS*, *q. v.*—C. was first founded by Sisyphus, son of Æolus, A. M. 2616, and received its name from Corinthus, the son of Pelops. It was totally destroyed by L. Mummius, the Roman consul, and burnt to the ground, 146 B. C. The gov't. of C. was monarchical till 779 B. C., when officers, called *Prytanes*, were instituted. Its inhabitants formed numerous colonies, and Paul preached the gospel in it for upwards of a year. After the taking of Constantinople, it fell into the hands of the Turks, from whom it was retaken in 1687, by its former possessors, the Venetians. In 1715 it was again possessed by the Turks, who held it till 1823. As it

now stands, the town is still of considerable extent, but the houses are placed wide apart, much space being occupied by gardens, and the population is not above 2,500. The sight of its fallen greatness inspired Byron's grand apostrophe:

Where is thy grandeur, Corinth? Shrank from sight,
Thy ancient treasures, and thy ramparts' height;
Thy god-like fanes and palaces! Oh, where
Thy mighty myriads and majestic fair?
Relentless war has pour'd around thy wall,
And hardly spared the traces of thy fall!

Fig. 684.—CORINTH.

Corinth, (ISTHMUS OF,) a narrow neck of sterile land, separating the Gulf of Lepanto from that of Ægina, and connecting the peninsula of the Morea with the rest of Greece. It is 20 m. long, with a varying breadth of from 4 to 8 m. A ship canal across the isthmus of C. was opened in 1893. See CANAL.

Corinth, in Georgia, a township of Heard co.

—A village of Sumter co., abt. 100 m. S.W. of Milledgeville.

Corinth, in Illinois, a post-office of Williamson co.

Corinth, in Mississippi, a city, the capital of Alcorn co. The Confederates were compelled to evacuate this town, May 30, 1862. On Oct. 3d of the same year, Gen. Van Dorn, with about 30,000 men under his command, attempted to recapture C., then occupied by Gen. Wm. S. Rosecrans with a force of 20,000 men. The battle, interrupted by the night, was renewed before dawn next morning. A party of Confederates succeeded in penetrating the town, and captured the headquarters of Gen. Rosecrans; but after a very severe struggle, that at one moment turned to a hand-to-hand fight, the assailants were compelled to retire, and the whole Confederate force retreated southward. Gen. Rosecrans reported his loss at 2,359, of whom 315 were killed, among whom was Gen. Hackelman; he estimated that of the Confederates at 9,363, of whom 1,423 were killed, 5,692 wounded, and 2,248 prisoners. The trophies of the victory were 14 flags, 2 guns, and 2,300 small arms. Pop. (1897) abt. 2,500.

Corinth, in Maine, a town of Penobscot co., 20 m. N. W. of Bangor. Pop. (1897) abt. 1,300.

Corinth, in New York, a post-township of Saratoga county, about 52 miles N. of Albany, on the Hudson River.

Corinth, in Vermont, a post-township of Orange county.

Corinthiac, *a.* [From CORINTH.] Pertaining to Corinth, a Greek city.

Corinthian Order, *n.* (*Arch.*) One of the five order of architecture, similar to the Ionic in many respects the same form of base being used, and a similar entablature. The great point of difference is the capital which is richly ornamented with the leaves of the olive or acanthus, although the acanthus is said to belong rather to the Composite order. The proportions between the column and entablature is the same, the entablature being $\frac{1}{4}$ the height of the column; but the column itself is more slender and graceful than those belonging to the other orders. The base is half a diameter, and the capital rather more than a diameter, or about 70 minutes. It is said that the Corinthian capital was originated by Callisachus, a sculptor of Corinth, who flourished abt. 540 B. C., and that it was suggested to him by the beautiful appearance of the leaves of a root of the acanthus growing round the sides of a basket which had been placed upon it. The basket had been covered with a tile, and, when the leaves reached it, they had curled over in an outward direction, forming a kind of volute. The extent of enrichment of the column depends on the degree of adornment given to the entablature.

Fig. 685.

CORINTHIAN ORDER.

ture. In interior decorations the fluting of this column is sometimes filled up to about $\frac{1}{3}$ of the entire height with what is termed *cablings*, which may be carved in various forms. From the delicacy of its proportions and the richness of its decorations, it has been called the *Virginal* order by Scamozzi. Among the principal remaining examples of the order at Rome are the temple of Mars Ultor, the temple of Jupiter Stator, the portico of Severus, and the Pantheon. The Tower of the Winds, and the Choragic monument of Lysicrates at Athens (see fig. 594), are the only specimens of the *C.* order, not being Roman work, to be found in Greece.

Corinthian, *a.* Relating, or belonging, to Corinth. Impure; sensual; luxurious; resembling the old Corinthian character; as, the "*Corinthian* lady."—Milton. *n.* (*Geog.*) A native or inhabitant of Corinth. A debauchee; a gay spark; a rake. (sometimes applied to a courtesan.)

Corinthians, (*EPISTLES TO THE*) (*Ecd. Hist.*) Two epistles of the apostle Paul addressed to the Church of Corinth, and forming part of the canonical writings of the New Testament. In order clearly to comprehend the scope of these epistles, it is necessary to glance at the circumstances of the people to whom they were addressed. Christianity was first planted at Corinth by the apostle Paul himself during a residence there of about 18 months, between A.D. 51 and 53. After Paul's departure from Corinth, Apollos, an eloquent man and mighty in the Scriptures, came and preached the gospel here with great success, — watering what the apostle had planted. Other teachers of Christianity also came among them, and the Church came to be divided into different sects, — some declaring for Paul, others for Apollos, some for Cephas, and some for Christ. The converts, too, were partly Jews and partly Gentiles; the former contending strenuously for the observance of Jewish ceremonies, the latter giving way to the idolatrous and lascivious practices of the heathens. When the apostle Paul received information of this state of matters, he wrote to them his First Epistle, the contents of which naturally divide themselves into two distinct parts — the one being intended to remedy the disorders and abuses that had crept into the Church, the other being in reply to certain questions which the Church had submitted to him for his decision; as, concerning matrimony, concerning the lawfulness of eating things sacrificed to idols, and touching the resurrection of the dead. This epistle produced very different effects in the church. Many were led to amend their conduct, and to greater vigilance and zeal against the errors into which they had fallen; while others were led to cast imputations upon the apostle, and to accuse him of levity, pride, arrogance, and of being personally contemptible. The great object of the Second Epistle was, therefore, to defend himself against these imputations. He enlarges on his spiritual office, enumerates his sufferings and labors, recounts his labors, and details his successes. The great oratorical power of this epistle has always been much admired. The former of these epistles is generally believed to have been written about A.D. 57, the latter about 58. The authenticity of either has scarcely ever been questioned; but much discussion has arisen as to whether the apostle had addressed to the church at Corinth an earlier epistle than either of these, referred to in 1 *Cor.* v. 9, in the words, "I have written you in an epistle." Those who are of opinion that there was no other epistle, maintain that the reference to the one he was then writing.

Coriolanus, CURIUS MARCUS, a celebrated legendary hero of Rome. The story respecting him is, that in a war with the Volscians, the Romans besieging Corioli, a capital of the Volscians, being driven back to their camp, Marcus rallied his countrymen, pursued the enemy, and possessed himself of Corioli; for which he was rewarded with a large share of the spoil, and with the surname of *Coriolanus*. Subsequently, in disputes which took place between the patricians and the plebeians, 491 B.C., *C.* made himself so obnoxious to the latter that he was banished. Stung by the ingratitude of his countrymen, he joined the Volscians, and jointly with Tullus Aufidius led a numerous army against Rome. He had encamped within 5 m. of the city, and ruin seemed inevitable, when, at the urgent entreaties of his mother, Volumnia, he withdrew his army. The traditions differ as to his end; according to some he was assassinated, according to others he went into exile and lived long among the Volscians.

Corium, *n.* [*Lat.*] (*Mil.*) A kind of body-armor, formed of leathern scales placed in tile-fashion one above the other; worn by Roman and Gothic soldiers, &c. (*Anat.*) The basis of the skin, or *true skin*, consisting of a vascular and fibro-cellular tissue, of interlaced, fine, but elastic filaments. It rests on the subcutaneous cellular tissue, and is covered by the cuticle or *epidermis*.

Corival, *n.* A competitor; a fellow-rival.

Corival, *v.* To rival another; to assume equality with.

Corivalry, *Co-ri-valship*, *n.* Fellow-rivalry.

Cork, *n.* [*Ger. kork*; *Dn. kurk*; *Lat. cortex*.] The thick, spongy bark of a species of oak (*Quercus suber*), abundant in the dry, mountainous districts in S. of France, and in Spain, Portugal, Italy, and Algeria. The tree grows to the height of 30 feet or more, has a striking resemblance to the *Quercus ilex*, or green oak, and attains a great age. After arriving at a certain state of maturity, it periodically sheds its bark; but this valuable product is found to be of a much better quality when it is artificially removed from the tree, which may be effected without any injury to the latter. After a tree has attained to the age of from 20 to 30 years, it may be barked; and the operation

may be subsequently repeated once every 8 or 10 years, the quality of the *C.* improving with the increasing age of the tree. The bark is taken off in July and August, and the trees that are regularly stripped are said to live for 150 years or more. *C.* is light, porous, readily compressible, and wonderfully elastic. It may be cut into any sort of figure, and notwithstanding its porosity, is nearly impervious to any common liquor. These

Fig. 686. — CORK-TREE, (*Quercus suber*.)

qualities make it superior to all other substances for stoppers for bottles, in the manufacture of which it is principally made use of. It is also employed as buoys to float nets, in the construction of life-boats, the making of water-proof shoes, and in various other ways. Before being manufactured into stoppers, the *C.* is charred on each side; this makes it contract, lessens its porosity, and consequently fits it the better for cutting off all communication between the external air and the liquid in the bottle. Spanish black is made of calcined *C.* The Greeks and Romans were both well acquainted with *C.* They seem also to have occasionally used it as stoppers for vessels, (*Plin. Hist. Nat.* xvi. 8.) but it was not extensively employed for this purpose till the 17th cent., when glass bottles, of which no mention is made before the 15th cent., began to be generally introduced. The manufacture of bottle-*C.* is a considerable source of wealth in the French dep. of Gironde, which produces annually abt. 125,000 quintals of *C.* To supply the demand of the manufacture, which annually consumes 155,000 quintals, 30,000 quintals of rough *C.* are imported from Catalonia. The annual production amounts to 1,253,000,000 bottle-*C.*, valued at about \$3,100,000. The value of the raw material is abt. \$600,000. In Spain, *C.* are made chiefly in San Felice, Palafurgell, Pelajos, and Junquera. The chief seats of the production of *C.* in Portugal are the provinces of Alemtejo and Algarve.

Cork, *v. a.* To stop bottles or casks with corks; to confine or make fast with a cork; as, to *cork* a bug-hole. — To furnish with corks.

Cork, the largest county of Ireland, in the province of Munster, and bounded N. and N.E. by Limerick and Tipperary, E. by Waterford, W. by Kerry, and on the S. by the Atlantic Ocean. Area, 2,885 sq. m. The surface is beautifully varied, and the soil fertile, producing principally crops of oats, wheat, and potatoes. The S. coast abounds with excellent harbors. The Lee, Bandon, Blackwater, Ilan, Funcheon, Bride, and Awbeg rivers intersect it. Its lakes are numerous. Pop. in 1881, 492,810; in 1891, 436,540. This county is supposed to have been originally peopled by Spaniards, and up to the end of the 12th century it formed a kingdom under the Macarthy's.

Cork, the cap. of the above co., is situated on the river Lee, over which are several handsome stone bridges, 138 m. S. S.W. of Dublin. The public buildings are generally of a plain exterior. *C.* possesses several scientific institutions. *Manf.* Sail-cloth, sheeting, paper, leather, glue, glass, iron, and gloves. The city exports large quantities of salt provisions, with hides, butter, flour, pork, and other Irish produce. *C.* stands abt. 15 m. from the sea, and its harbor, or the Cove of Cork (*q. v.*), 9 m. below the town, has long been celebrated for its safety and capaciousness. Pop. in 1881, 97,526; in 1891, 75,070.

Cork, in Georgia, a village of Butts co.

Corked (*korkt*), *a.* Possessing a corky taste.

"The major swore the wine was corked."—*Noctes Ambrosianæ*.

Cork'-fossil, *n.* (*Min.*) A variety of amiauthus, resembling cork.

Cork'-ing-Pin, *n.* A large sized pin, formerly used for fastening female head dress.

"When you put a clean pillow case on . . . be sure to fasten it with three corking-pins."—*Swift*.

Cork'-jacket, *n.* A jacket constructed of pieces of cork under a canvas covering, used by persons when learning to swim.

Cork'-screw, *n.* A screw to draw corks from bottles.

Cork'-tree, *n.* (*Bot.*) The *Quercus suber*. See *Cork*.

Cork'y, *a.* Consisting of cork; resembling cork.

"Bind fast his corky arms."—*Shaks.*

Corleone, (*kor'-lai-on-ai*), a town of Sicily, on a hill near the source of the Belici, 20 m. from Palermo.

Corm. Cornus, *n.* [*Gr. kormos*, a trunk or stem.] (*Bot.*) A solid, underground stem, which does not spread by sending out roots, but remains in a rounded form. It occurs in the tulip, crocus, and in many other monocotyledonous plants. It is distinguished from a root by producing annually small corms, or thickened branches. It differs from a bulb in being solid.

Cormenin', LOUIS MARIE DE LA HAYE, VICOMTE DE, a French political writer, b. in Paris, 1788, was at the age of 22 called to the Council of State. He was made a baron by Louis XVIII., a viscount by Charles X., and was a member of the Chamber from 1825 to 1846; distinguishing himself as much by the originality of his views as by the independence of his character. *C.*, who is by profession an advocate, has opposed every party in turn, and has proved himself the consistent friend of social and political progress. He has written the best treatise on administrative law published in France, and a number of political pamphlets, under the pseudonym of "Timon." His work *Etudes sur les Orateurs Parlementaires* has passed through above 20 editions. Member of the Council of State, from the rise of the 2d Empire, *C.* was made a member of the Institute in 1855. D. 1868.

Cormophytes, (*korm'-o-fites*), *n.* (*Bot.*) Plants having stems, as distinguished from *Thallophytes*, or those which simply form cellular expansions of various kinds, to which the term *thallus* is applied. Cormophytes are divided, according to the internal structure of their stems, into 3 great classes, called respectively Exogens, or Dicotyledons; Endogens, or Monocotyledons; and Acrogens, or Acotyledons.

Cormorant, *n.* [*Fr. cormoran*.] (*Zoöl.*) A family of birds, ord. *Natatores*, comprising swimming birds which have the tip of the bill much hooked, acute, and the nostrils not perceptible. They are many species, and they abound on the coasts of all countries. The common cormorant, *Graculus carbo* of Gray, (the sea-raven of the ancients,) is about the size of a goose, and something like it in shape, but with a compressed bill, and the middle toe notched like a saw. Its plumage is black, with greenish and purple reflection; it has a crest of long feathers on the head, and numerous slender white feathers on the head, neck, and thighs; the tail is black, and rounded. It is a bird of such insatiable appetite that its very name has become a synonym for voracity;

Fig. 687. — CORMORANT.

all sorts of fish, tenants of the lake or of the deep, are devoured with equal avidity, and it carries on its ravages by night as well as by day. It builds its nest on rocks on the shore, or even on trees near great lakes, and has three or four greenish-white eggs.

—A glutton; a voracious eater.

Corn, *n.* [*A.S. corn*; *Ger. korn*; *O. Ger. cherno, kerno*; *Swed. kärna*; *Dan. kjerne*; *Goth. laurn*, allied to *Lat. granum*, *Gr. karnon*, any kind of nut. Probable root Sansk. *kar*, a nut.] A collective term for all seeds used in making bread. The principal seeds of this kind in temperate climates are wheat, rye, oats, and barley; while those of warm climates are maize, rice, and millet. In this collective sense, the word *C.* is more commonly used in England than in the U. States. We have nevertheless adopted it in the present work, as being less general and more characteristic than the word *grain*. — It is so used generally in the Bible.

—In a more restricted sense, (which is the common one in this country,) it refers, in America, to maize (*Indian corn*); in Scotland, to oats; and in England, to wheat.

—A grain; a single seed of grasses used as food for man or animals; as, "A corn of wheat." (*John* xii. 25.) — In this sense it has a plural.

—Unreaped grain, standing in the field upon its stalks; grain in the ear, yet unthreshed.

"All the idle weeds that grow
In our sustaining corn."—*Shaks.*

—A grain, seed, or small particle; as, a *corn* of gunpowder. *Indian corn*. See *Maize*.

Corn, *n.* [*Lat. cornu*; *Ar. karn*; *Heb. keren*; *Gr. keras*; *Goth. haurn*; *Syriac, karnô*; *Sansk. çnga*, a horn.] (*Med.*) A certain small, hard, troublesome excrescence on the feet, arising from a thickening of the cuticle or epidermis, and owing, generally, to irritation, caused by excessive pressure or friction on the part. Corns are of two kinds—hard and soft, the latter being situated between the toes. Frequently a bursa, or bag, is formed beneath the corn, which is apt to inflame and cause great pain and irritation. In the treatment of corns, the great object is to remove all undue pressure or friction, and for this purpose the boots or shoes should be easy and pliant. This may be still further effected by

protecting the corn with a small piece of thick soft leather, spread with diachylon or other emollient plaster, and having a hole in the centre corresponding with the size of the corn. The feet should also be frequently bathed with warm water, and as much as possible of the corn carefully pared away, care being taken not to wound the most sensitive part. If the corn is very sensitive, it ought to be occasionally touched with lunar caustic; and if much inflamed, a warm bread poultice should be applied to it.

Corn, *v. a.* To sprinkle with salt in grains: to cure meat by salting; as, *corned* beef. — To granulate; to form into small grains; as, to *corn* gunpowder. — To feed a horse with corn.

— To intoxicate; as, *corned* with strong beer.

Corna'ceæ, *n. pl.* (*Bot.*) The Cornel or Dog-wood family, an order of plants, alliance *Umbellales*. — *DIAG.* Two- or more-celled fruit, without a double epigynous disc, tetramerous flowers, a valvate corolla, and opposite leaves without stipules. There are 9 genera and 40 species, trees, shrubs, or rarely, herbs, natives of the temperate parts of America, Asia, and Europe. They are chiefly remarkable for tonic, febrifugal, and astrigent properties. — See **CORNUS**.

Corna'ceous, *a.* (*Bot.*) Relating to plants of the order *Cornaceæ*.

Corna'ro, the name of a patrician family of Venice, of whom three were doges of the republic, the *first*, 1365–1368; the *second*, 1625–1629; the *third*, 1709–1722. — **CATERINA**, descended from the first, was queen of Cyprus, D. 1510. — **LUDOVICO**, another member of the family, is celebrated for his longevity, and works on regimens, 1463–1566; and **ELENA LUCREZIA**, as a poetess and learned writer, 1646–1684.

Corn'-badger, *n.* In some of the English counties, a cant term for a corn-dealer, or corn-chandler.

Corn'-beef. See **CORNEBEEF**.

Corn'-bind, *n.* (*Bot.*) See **POLYGONUM**.

Corn'-bread, *n.* In the U. States, a term to denote bread made exclusively from Indian corn, or maize.

Corn'-chandler, *n.* A vender of corn by retail.

Corn'-clad, *a.* That is covered with growing corn.

Corn'-cockle, *n.* (*Bot.*) *Agrostemma githago*, a well-known, handsome weed, of the genus *Agrostemma*, growing in fields, and of a pale-green color. Stem 2–3 feet high; flowers few, large, of a dull purple, on long, naked stalks. Seeds roundish, angular, purplish-black; blossoming in June.

Corn'-cracker, *n.* A cant term for a native of Kentucky. (U. S.)

Corn'-crake, *n.* (*Zoöl.*) See **CRAKE**.

Corn Creek, in *Alabama*, traverses Conecuh co., and flows into Conecuh River from the N.

Corn'-crowfoot, *n.* (*Bot.*) See **RANUNCULUS**.

Corn'-cutter, *n.* A chiropodist; one who extracts corns and bunions from the feet.

(*Agric.*) A machine for reaping corn; also, a machine for chopping fodder for horses, cattle, &c.

Corn'-dodger, *n.* In the U. States, a cake made of the meal of Indian corn, wrapped in a covering of husks or paper, and baked under the embers.

Corn'-drill, *n.* (*Agric.*) A machine for sowing corn.

Corn'nea, *n.* [From *Lat. cornea*, a horn.] (*Anat.*) The anterior, transparent, convex part of the globe of the eye, which, of a firm, tough, and horn-like texture, is sometimes called the *horn of the eye*. The *C.*, like the glass of a watch, is let into a rim in the white or sclerotic coat of the eye, and is composed of a number of concentric cellular lamellæ, or scales; it is covered anteriorly, or on its concave side, by a reflection of the covering of the aqueous humor; and, in its physiology, is of the serous order of membranes.

Corned'-beef, *n.* Beef prepared or preserved by being moderately salted, and kept in a close tub.

Corneille, **PIERRE**, (*kor-nay*), named *The Great* by his admiring contemporaries, was the first, in the order of time, among those brilliant writers who did honor to France during the reign of Louis XIV. He had not been preceded by any dramatic writer whose genius was powerful enough to preserve his name in general remembrance; and himself preceding Molière by a good many years, and Racine by a whole generation, he learned but in part, and obeyed with reluctance, those formal rules which French critics were beginning to teach, and to which the French drama was gradually submitting itself. B. at Rouen, 1606, C. was the son of a lawyer, and himself attempted the same profession. But as early as his 23d year he entered on an uninterrupted course of devotion to dramatic composition. His first attempts were six rhymed comedies, and the strong but declamatory tragedy of *Médée*. These pieces were received with applause in a time when there was nothing better; but are now admitted to have been so feeble as to give but poor presage of the strength which worked within him. He was saved from prosecuting this career by being imprudent enough to offend Cardinal Richelieu, who had chosen him as one of the men of genius who were to found his French Academy. Retiring to Rouen, he turned his thoughts to tragedy, and studied the Spanish language, to have at his command the dramatic stories which it already possessed. The fruits appeared in 1636, when he presented his romantic tragedy, *The Cid*. Its success was prodigious, and was at length allowed to be deserved, even by the academicians who wished to flatter the prejudices of Richelieu. It is the most famous, and perhaps the greatest, of all Corneille's works. It is alike admirable for its skill of construction, its chivalrous dignity of sentiment, and the dramatic power with which it depicts the conflict of opposing passions. The poet, however, was sneered at for having freely borrowed incidents and ideas from a Spanish play; and he threw

himself boldly on his own resources in his next two works, which stand, with the *Cid*, among his masterpieces. In *Horace* he dramatized with a defective plan—but with great force of passion, and several very striking bursts of sentiment—the Roman combat of the Horatii and Curatii; and on *Cinna*, celebrating Augustus and the Romans of his age, he bestowed an artful dexterity of management which has recommended it, in spite of its artificiality of feeling, to the especial favor of the French critics. These two fine works, appearing in 1639, were immediately followed by a worthy successor, the *Polyeucte*, a tragedy of Christian martyrdom.

Fig. 688. — CORNEILLE.

Soon afterwards appeared *La Mort de Pompée*, which is fine in some parts; and *Le Menteur*, the only one of its author's comedies that is held worthy of him, and pronounced to have been the earliest comedy of intrigue and character which did credit to French literature. It was imitated from the Spanish, and has itself been imitated in English by Steele, and translated by Foote. *Rodogune* was thought by the poet to be his best work; and its 5th act is declared by Voltaire to be the finest effort of the French drama. The works that he produced afterwards were unworthy of his name. In private life, C. was an unassuming and plain man, who was always most at his ease in the bosom of his own family. D. 1684. — His young brother THOMAS, though now forgotten, was in his day a very popular dramatist, and famous for his readiness of versification. The two brothers, whose wives were sisters, lived in the same house; and it is said that, when Pierre wanted a rhyme, he used to lift a trap-door, and call on Thomas for assistance.

Corn'el, *n.* [Fr. *cornouiller* (tree); *cornouille* (fruit); *It. corniolo*; *Lat. cornus*, from *cornu*, a horn.] (*Bot.*) See **CORNUS**.

Corn'el-berry, **Corn'el'-cherry**, *n.* (*Bot.*) The fruit of the cornel.

Corn'el -cherry, **Corn'el'-tree**, *n.* (*Bot.*) The cornel-tree. — See **CORNUS**.

Corne'lia, an illustrious Roman lady. She was a daughter of Scipio Africanus, wife of Tiberius Sempronius Gracchus, and mother of the two famous tribunes. She was of a grave and dignified deportment, and possessed so great a control over her feelings, that when a friend condoled with her on the death of her sons, she replied, "The woman who had the Gracchi for sons cannot be considered unfortunate." Her literary talents must have been considerable, as Cicero very highly commends some of her epistles. She lived in the second century B. C., and after her death the Romans erected a statue to her memory, bearing the inscription, "To Cornelia, the mother of the Gracchi."

Corne'lia, in *Missouri*, a post-village of Johnson co.

Corne'lian, *n.* (*Min.*) See **CARNELIAN**.

Corne'lius, **PETER VON**, (*kor-nai'le-oos*), a celebrated German artist, B. at Düsseldorf, 1787. When only 19 years old, he was engaged to paint, with figures in chiaroscuro, the cupola of the old church of Neuss, near Düsseldorf. After this, he proceeded to Frankfurt, where he executed a series of designs illustrative of the *Faust* of Goethe. His reputation was now fast rising, when he proceeded to Rome, where he united himself with several kindred spirits, and commenced studying with a view to found a new school of German art. To accomplish this, fresco was the style adopted, and C. was commissioned to paint the walls of Bartholdy, the Prussian consul-general. The subjects he chose were, "Joseph Recognizing his Brethren," and "Joseph Interpreting the Dream of Pharaoh's Chief Butler," which were a decided success, and excited general admiration. He now rose higher and higher in his profession, and left Rome, 1819. At Düsseldorf he remodelled the academy, and then had two spacious halls assigned him to paint, in the Glyptothek at Munich. In one of these, — the Hall of Heroes — he represented, in colossal proportions, the leading events of the "Iliad"; in the other — the Hall of the Gods — he symbolized the Grecian mythology. These works were not completed till 1830, and are conceived and executed with such a grandeur of effect as to command universal homage. He became director of the Munich Academy, which, under him, rose to be a great school of art. D. 1867.

Cornelius Ne'pos, a Latin historian, in the reign of Augustus, whose patronage he enjoyed. Of all his

works there remains only his *Lives of Illustrious Greek Generals*. He appears to have also written the lives of the Roman Generals; but the work has been lost.

Cornell', **EZRA**, B. in Westchester co., N. Y., 1807. In 1828, with such an education as our common schools then afforded, he commenced his business-career in the employment of Otis Eddy, a cotton manufacturer in Ithaca, N. Y., on the site of one of the magnificent university buildings which bears his name. Industry and talent soon promoted young C. to a more lucrative position. He was among the first to comprehend the value of the electric telegraph, and devoted many years to its introduction and development. He amassed a large fortune, and has distinguished himself by many munificent gifts, ranking him among the benefactors of the age. A few years since, he founded the Cornell Library, at Ithaca, erected the building under his own supervision, and endowed its future support at a cost of \$100,000, when he transferred it to a Board of Trustees, for the benefit of the town. Later he resolved to "found an institution where any person could find instruction in any study," and gave in one sum \$500,000 to establish the Cornell University at Ithaca, to which he has since added large sums in money for cabinets and museums, and land for farm and buildings, — besides devoting the remainder of his life to increase its funds, and perpetuate its existence. The Cornell University opened its first session in October, 1868, with 25 professors of the highest character and ability, and nearly 400 students. Here the student is provided with employment, if he desires to pay a portion of his expenses by his own labor. This is an American idea, and Mr. C. is entitled to the credit of its practical adoption. D. Dec. 9, 1874.

Corne'muse, *n.* [Fr.] A bagpipe; a kind of rustic hautboy. — Also written **CORNMOUSE**.

Cor'neo-calca'reous, *a.* On one side horny; on the other, calcareous.

(*Zoöl.*) A term in conchology, used to express the mixture of horny and calcareous matter which enters into the composition of some shells. It is also applied to those opercula which are horny on one side, and testaceous on the other.

Cor'neous, *a.* [Lat. *corneus*, from *cornu*, a horn.] Horny; consisting of a horny substance, or substance resembling horn; hard; as, shrubs of a *corneous* constitution.

Cor'ner, *n.* [O. Fr. *cornière*; Goth. *hauru*; *Lat. cornu*, a horn.] A projecting extremity; utmost limit; as, the *corner* of a wood.

"Come the three corners of the world in arms." — *Shaks.*

— The outer or inner angle of a building, &c.; inner angle of a room, &c. — A secret, remote, or retired place; a confined or narrow place; as, for a thing to be done in a *corner*.

"Those vices that lurk in the secret corners of the soul." — *Addison.*

— A cant word, used in gold or stock speculations, to designate a speculation by which, in certain circumstances one or more speculators command the market by their larger amount in hand. (U. S.)

— *v. a.* To drive into a corner. — To place in a position of hopeless embarrassment; as, to *corner* an adversary.

Cor'nered, *a.* Having corners; having three or more angles.

Cor'nersburg, in *Ohio*, a village of Mahoning co. **Cor'ner-stone**, *n.* (*Arch.*) The stone which lies at the corner of two walls, and unites them; the principal or foundation-stone; hence, that which is of the highest moment, and indispensable to success; as, frugality is the *corner-stone* of wealth.

"See you yond' coin o' th' capitol, yond' corner-stone?" — *Shaks.*

Cor'nersville, in *Illinois*, a village of Saline co.

Cor'nersville, in *Kentucky*, a village of Graves co.

Cor'nersville, in *Maryland*, a P. O. of Dorchester co.

Cor'nersville, in *Mississippi*, a post-village of Ma shall co.

Cor'nersville, in *Tenn.*, a twp. of Giles co.

Cor'ner-tooth, *n.* One of the fore teeth of a horn between the middle teeth and the tushes.

Cor'nerwise, *adv.* Diagonally; not parallel; with the corner in front.

Cor'net, *n.* [Fr., dim. of *cor*, a French horn, from *Lat. cornu*.] (*Mus.*) A sort of trumpet, shaped like a horn; a wind-instrument used in brass bands; an organ stop.

"Israel played before the Lord . . . on cornets." — 2 Sam. vi. 5.

(*Mil.*) Formerly a troop of horse, accompanied by a cornet-player, to act as trumpeter; the standard of a troop of horse.

— In England, the junior officer of a troop of cavalry, who bears the standard; as, a *cornet* of dragoons.

— A kind of conical head-dress formerly worn by women, and still to be seen among the female peasantry of Normandy and Bretagne, France.

— A small cone of folded paper used by grocers, &c.; as, a *cornet* of figs.

Cor'net of a horse. The lowest part of the pastern, that runs around the coffin, and is distinguished by the hair that joins and covers the upper part of the hoof.

Cor'net-a-pis'ton, *n.* [Fr.] (*Mus.*) A brass music wind-instrument of the French-horn species, but capal

Fig. 689.

WIFE OF A RICH FARMER. (Normandy, France)

Pierre Corneille

1606-1684

Charles Cornwallis

1738-1805

of much greater completeness of scale, and perfection of intonation, from the valves and stoppers (pistons) with which it is furnished; whence its name. The tribe of instruments to which this belongs has been much

Fig. 690. — CORNET-À-PISTON.

improved, principally by Messrs. Sax, of Paris. There are now four or five grades of instruments of this class, which take different parts respectively; forming, in the whole, a perfect band of themselves, and capable of playing almost any kind of music. The *C.* is the treble instrument, and there are others for the alto, tenor, baritone, and bass parts, gradually increasing in size, but all on the same general construction. They are much used for military bands, and for music played in the open air.

cornetcy, n. (Mil.) The commission or rank of a cornet; as, appointed to a *cornetcy* of lancers.

corneter, n. The person who blows a cornet.

corneto, (kor-nai'to), a maritime town of Central Italy, 12 m. N. of Civita Vecchia; pop. 4,316.

cornicle, n. [From Lat. cornicula.] One of the corners of a compound eye in the vertebrates.

corn-exchange, n. (Com.) A building devoted to the assembling of factors and dealers in corn; a mart where business in grain is carried on, and sales are effected by means of exposed samples.

corn-flag, n. (Bot.) See GLADIOLUS.

corn-floor, n. The floor where corn is stored.

corn-flower, n. A wild flower found amongst growing corn, as the wild poppy, &c.

corn Grove, in Alabama, a P. O. of Calhoun co.

corn Hill, in Texas, a post-office of Williamson co.

corn House, in Alabama, a P. O. of Randolph co.

cornice, (kor'nis), n. [It.; Fr. corniche, from Lat. corona, a crown, a bordering, a cornice; Gr. *kōronē*, anything hooked or curved, from *koraz*, a raven or crow, which as a curved

eak.] (*Arch.*) The upper part of the entablature which comes immediately above the frieze. It is divided into two principal parts, the upper of which projects considerably beyond the lower, being supported by modillions or mutules. The fillet, which composes the lower part,—with an echinus moulding and smaller fillet above it, from which the modillions project, and an ogee, or bed-mould below it, which separates it from the frieze,—is generally enriched with dentils, especially in the Corinthian and Composite orders. For the names of the different parts of a *C.*, see fig. 690.) The term *C.* is also generally used to signify any horizontal projection terminating a building, or the component parts of a building; as, the *C.* of a room, of a window, &c.

corniced, a. Possessing a cornice; as, a *corniced* room.

cornice-ring, n. (Gunnery.) That ring on a gun which lies behind the muzzle-ring.

cornicle, n. [Lat. corniculum.] A little horn.

corniculate, a. [Lat. corniculatus, from cornu.] Shaped like a horn; horned.

corniculate, a. [Lat. corniculatus, from cornu.] Having a process in the form of a small horn.

cornific, a. Productive of horns; forming horns.

corniform, a. Horn-shaped.

cornigerous, (kor-ni'jer-us), a. [Lat. corniger—cornu, and *gero*, to bear.] Bearing horns; horned; as, a *cornigerous* animal.

cornine, n. (Med.) See CORNUS.

corn'ing, in New York, a town and township of Steuben co., abt. 201 m. N. W. of New York city; pop. in 1890, 50; in 1897, abt. 10,000.

corn'ing-house, n. That part of a gunpowder manufactory where the powder is corned or granulated.

cornish, a. (Geog.) Relating or pertaining to Cornwall, England; as, *Cornish* mining.

cornish, n. The language of the ancient inhabitants of Cornwall.

cornish, in Maine, a post-township of York co.; pop. 90.

cornish, in New Hampshire, a post-township of Sullivan co., abt. 50 m. N.W. of Concord.

cornishman, n. A native of the county of Cornwall, England.

"By Tre, Pol., and Pen.
You may know Cornishmen." — Old Proverb.

cornish Village, in Maine, a former post-office of York co., on the Saco river.

cornishville, in Illinois, a village of McHenry co.

cornishville, in Ky., a post-v. of Mercer co.

corn'ist, n. A cornet-player; a performer on the cornet or horn.

Corn Laws, n. pl. (Eng. Pol.) The exportation of corn from England, except in certain cases, was prohibited by 34 Edw. III. c. 20. (1361.) The law was modified, and, in 1436, exportation was permitted by 15 Henry VI. c. 2, provided the home-price did not exceed 6s. 3d. per quarter. The importation of corn, unless the price of wheat exceeded 6s. 3d. per quarter, was prohibited by 3 Edward IV. c. 2, 1483. The importation of corn was heavily taxed by 22 Charles II. c. 8, 1670, and also by 1 Will. & Mary, c. 12, 1689. The rapid increase of population, however, led to successive alterations in the regulations respecting importation. Mr. Robinson's Act, 55 Geo. III. c. 26. (March 23, 1815.) removed all restrictions on foreign corn imported in order to be warehoused, and permitted its importation for home consumption when at 80s. per quarter. This bill was very unpopular, and occasioned serious riots in London and Westminster, March 6-9. By 3 Geo. IV. c. 60, 1822, the importation-price was reduced to 70s. per quarter. Mr. Canning's Corn-bill, proposed March 1, 1827, passed the House of Commons, but was rejected by the Lords. Several modifications were embodied by 9 Geo. IV. c. 60, 1828, which is known as the sliding-scale, because the duty varied, and by 5 Vict. c. 14, 1842. Sir Robert Peel's Corn Importation Bill, 9 & 10 Vict. c. 22, 1846, reduced the duty on all corn imported at from 53s. per quarter to 4s. until Feb. 1, 1849, when the duty was permanently reduced to 4s. per quarter on all grain imported.

Corn'less, a. Without corn; wanting corn.

Corn'lift, n. A mechanical apparatus for elevating corn to the upper floors of a corn-mill.

Corn'loft, n. A granary; a loft for the storage of corn.

Corn-marigold, n. (Bot.) See CORYMBIFERÆ.

Corn-merchant, n. A wholesale trader in grain or corn.

Corn'meter, n. One who measures corn or grain.

Corn'mill, n. A mill for grinding corn; a grist-mill.

Corn'muse, n. See CORNEMUSE.

Corn'o di Basset'to, Corn'o Ingle'se, n. [It.] (*Mus.*) The English horn, a reed-instrument, deeper in pitch than the oboe.

Corn'o Mon'te, or GRAN SASSO D'ITALIA, the culminating peak of the Apennines, 70 m. E.N.E. of Rome, Lat. 42° 27' N., Lon. 13° 35' E. Height, 9,591 feet above the sea.

Corn'o'pean, n. [From Lat. cornu.] (*Mus.*) A kind of horn; a wind-instrument with valves, of modern invention.

Corn'o'peanist, n. A performer on the cornopean.

Cornouailles, (kor'noo-ail), an old district of France, now divided into the dep. Finistère, Morbihan, and Côtes-du-Nord.—*C.* is also the name under which the English co. of Cornwall is known among the French.

Corn'parsley, n. (Bot.) See SISON.

Corn'pipe, n. A pipe made by slitting the joint of a green stalk of corn.

"Now the shrill corn-pipes, echoing loud to arms,
To rank and file reduce the straggling files." — Tickell.

Corn'planter, in Pennsylvania, a post-village of Warren co.

Corn'plaster, n. A plaster used as a remedy for corns.

Corn'poppy, n. (Bot.) See PAPAVER.

Corn'rent, n. Rent paid in corn in lieu of money.

Corn'rocket, n. (Bot.) A plant of the genus *bunias*.

Corn'rose, n. (Bot.) Same as corn-poppy.—See PAPAVER.

Corn'salad, n. (Bot.) See FEDIA.

Corn'stone, n. A provincial Anglicism for the red limestone.

Corn'ton, in Vermont, a post-office of Windham co.

Corn'm-ammo'nis, n. [Lat., "Ammou's horn."] (Pal.) An Ammonite, *q. v.*

Cornucopia, n.; pl. CORNUCOPIÆ. [Lat. cornu, and copia.] (*Fine Arts.*) An ornament representing a horn, from which issue flowers, fruits, leaves, and the like. The fable accounting for the origin of this emblem of Plenty, is, that Amalthæa, when one of her goats had broken off a horn against a tree, presented it to the infant Zeus (Jupiter) wreathed with flowers and filled with fruit. The cornucopia is found very frequently in the types of ancient coins.

Cornulari'ideæ, n. pl. (Zool.) A family of polyps, sub-order *Acyonariæ*.

Corn'us, n. [Lat. cornu, horn, the wood being held to be durable and hard as horn.] (*Bot.*) The typical genus of the order *Cornaceæ*. The species are mostly natives of N. America. One of the finest, the round-leaved Cornel or Dog-wood, *C. circinata*, is a large shrub, 5 to 10 ft. high, 3 to 10 ft. from Virginia to Canada; branches warted; leaves broadly oval, acuminate, clothed with hoary tomentum beneath; corymbs depressed, and spreading; branches slightly tinged with red; leaves broad, waved on their edges. Flowers white, as in most of the species; pomes globose, at first blue, but at length becoming white; flowers white

Fig. 692. ROUND-LEAVED CORNELL OR DOG-WOOD. (*C. circinata*.)

in June; fruit at first blue, and then turning white.—The bark of *C. florida*. The flowering Dog-wood, a tree 20-30 feet high, found chiefly in the Northern States, is called *Cornine*, and is a good substitute for Peruvian bark in the treatment of intermittent and remittent fevers.

Cor'nute, Cor'nuted, a. [Lat. cornutus.] Grafted with horns.

—Cuckolded; horned; as, a *cornuted* husband.

Cor'nute, n. [From Lat. cornutus.] A cuckold; a man who wears horns as the badge of his wife's infidelity.

"The peaking *cornute*, her husband, dwelling in a continual farum of jealousy." — Shaks.

Cornut'er, n. One who converts a husband into a cuckold.

Corn'ville, in Ills., a P. O. of La Salle co.

Corn'ville, in Maine, a p.-twp. of Somerset co.

Corn-violet, n. (Bot.) A species of Campanula; — *Campanula hybrida*.

Cornwall, BARRY. See PROCTER, BRYAN WALLER.

Corn'wall, the south-western peninsula of England, a maritime county, surrounded by the sea, except on the E. side, where it is separated from Devonshire by the Tamar, and by an artificial boundary of a few miles in length at its northern extremity. *Ext.* 78 miles long, with an average breadth of 43. *Area*, 1,330 sq. miles. *Desc.* A ridge of bleak and rugged hills extending from W. to E. through its whole length, renders its appearance dreary in the extreme. The eye is, however, occasionally relieved by valleys of great fertility and beauty, watered by numberless small streams, which are frequently interesting, from the romantic scenery with which they are associated. Along the coasts, too, the huge masses of granite, bidding defiance on one side to the violence of the waves, and forming, on the other, a stupendous rampart to the fertile plains beneath, exhibit a rare union of the sublime and beautiful. *Rivers.* The Tamar, Lynher, Fowey, Fal, Hal or Hayle, the Looe, and the Alan or Camel. *Climate.* Uncertain, and subject to heavy rains, but, on the whole, mild. *Prod.* Comparatively little attention was paid to agriculture till lately, when it began to be improved. The principal crops are corn and potatoes. *Minerals.* Silver, zinc, lead, copper, tin, antimony, manganese, cobalt, bismuth, and granite. The total amount of tin produced in Cornwall amounts to about 5,000 tons annually. Copper is mined to the extent of about 12,000 tons a year. The tin and copper mines employ about 60,000 persons. One of the most interesting of the Cornish minerals is the soap-rock, particularly used in the manufacture of porcelain. There is also the china-stone, which is raised in great quantities near St. Austell, and forms a principal ingredient in the manufactures of the Staffordshire potteries. A great variety of fish frequent the coasts of this county. Its pilchard and mackerel fisheries are especially valuable, and absorb a large amount of capital. *Manf.* Tinsmelting. *Cap.* Truro. This county was not subdued till the time of Athelstan, when the Saxons asserted their superiority over it. The Cornish, which is a dialect of the Celtic, has only become extinct within the present century. The Scilly Islands lie about 36 miles W. by S. of the Land's End, and are supposed to have been formerly connected with Cornwall. The intermediate and surrounding rocks are innumerable, and Druidical antiquities abound. *Pop.* in 1891, 322,571.

Corn'wall, in Connecticut, a town and township of Litchfield co. *Pop.* (1897) abt. 1,350.

Corn'wall, in Illinois, a township of Henry co.

Corn'wall, in New York, a post-village and township of Orange co., abt. 48 m. N. of New York city. It comprises much of the beautiful scenery of the Highlands. West Point Military Academy is in this township.

Corn'wall, in Vermont, a post-village and township of Addison co., 40 m. S.W. of Montpelier.

Corn'wall, in Pennsylvania, a post-township of Lebanon co.

Corn'wall, in Ontario, a county town of Stormont and Dundas cos., about 67 m. S.W. of Montreal.

Corn'wall, in Nova Scotia, a town of King's co., on an inlet of the Bay of Fundy, 50 m. N.W. of Halifax.

Cornwall Bridge, in Connecticut, a post-village of Cornwall township, Litchfield co.

Cornwall Hollow, in Connecticut, a post-office of Litchfield co.

Cornwal'lis, CHARLES, MARQUIS, B. in 1738. He acted a conspicuous part in the American war. After gaining the battles of Camden and Guilford, he determined to invade Virginia; but, being surrounded by the American and French forces, he and his army were made prisoners at Yorktown. In 1786 he was made governor-general of India. The government of Bengal found it necessary to uphold the rajah of Travancore against the sultan of Mysore, and the first campaign being unsuccessful, in 1791 *C.* invaded the Mysore, besieged Seringapatam, and compelled Tippoo Saib to submit upon humiliating terms. Having performed this important service, Lord Cornwallis returned to England, was raised to the rank of marquis, and made master-general of the Ordnance. In 1798 he was sent to Ireland as lord-lieutenant; and in the trying and terrible scenes of the rebellion so conducted himself as to gain the good opinion of the public, while vigorously upholding and vindicating the laws. In 1801 he was sent on a mission to France, where, in 1802, he signed the peace of Amiens. In 1804, he was a second time appointed governor-general of India; but soon after his arrival in India, he died at Calcutta, in 1805.

Cornwallis, in W. Virginia, a post-vill. of Ritchie co.

Cornwall Island, in British N. America, in the Arctic Ocean, E. of Bathurst Island; Lat. 65° N., Lon. 95° W.

Cornwall Landing, in N. York, a village of Orange co., on the Hudson, 8 m. below Newburgh.

Cornwall, (New), in N. America, a name given to that portion of the Pacific coast between New Norfolk and New Hanover, extending from Lat 54° to 57° N., and from about Lon. 130° to 136° W.

Cornwallville, in New York, a post-village of Greene co., about 38 m. S.S.W. of Albany.

Corn-weevil, *n.* (*Zoöl.*) See CALANDRA.

Corn'y, *a.* [From CORN.] Producing corn; containing corn.

"By their high crops and corny gizzards known."—Dryden.

—*a.* [From Lat. *cornu*, a horn.] Strong, stiff, or hard like horn; resembling horn.

Co'ro, in California, a village of Santa Barbara co.

Co'ro, in S. America, a maritime city of Venezuela; pop. 4,500.

Cor'ocore, *n.* A boat used in the Indian seas.

Cor'ol, *n.* A corolla.

Corolla, *n.* [Lat. *corolla*; dim. of *corona*, a crown; Fr. *corolle*.] (*Bot.*) The inner envelope of the flower, consisting of leafy organs called *petals*, and situated, in a complete flower, between the calyx and the stamens. It is generally the most conspicuous whorl of organs, being more or less colored. It is, in fact, that part of the plant which usually delights us most by its gay appearance and fragrance. Petals are rarely green, though occasionally this color is met with, as in some *Cobaea*, in *Hoya viridiflora*, *Gonolobus viridiflorus*, and *Pentstemon spiralis*. When there is but one whorl of enveloping organs in the flower, it is regarded as the calyx (which see), and the flower is said to be *apetaloid*. A petal is often narrowed below into a stalk-like portion analogous to the petiole of a leaf, as in the wall-flower; the narrowed portion is then termed the *unguis* or *claw*, and the expanded portion the *limb*. Such a petal is said to be *unguiculate* or *clawed*. The shapes of petals are indicated in botanical descriptions by terms easily understood; such as *oblong*, *lanceolate*, *elliptic*, *orbicular*, *ovate*, and *cordate*, applied to the outlines; and *concave*, *tubular*, and *boat-shaped*, applied to the forms of petals which are not flat. In describing their direction, the terms *erect*, *connivent*, *divergent*, and *reflexed*, are used in the same sense as when applied to the parts of the calyx. The petals, like the sepals, may be either distinct, or more or less united into one body. In the former case, the *C.* is said to be *polypetalous* or *dialypetalous*; in the latter, *monopetalous* or *gamopetalous*. The number of petals in a polypetalous *C.* is indicated by a prefix, as in the case of a polypetalous calyx; thus a *C.* of two petals is said to be *dipetalous*; of three, *tripetalous*; of four, *tetrapetalous*, and so on. When the petals are all of the same size and form, the *C.* is termed *regular*; when they vary in these particulars, it is said to be *irregular*. We give below the more important forms of the regular polypetalous *C.*:—*Cruciform*,—consisting of four petals, usually with claws, as in the wall-flower (fig. 693, in which two of the petals are turned back to show the claws); but sometimes without claws, as in the Celandine, and the whole arranged in the form of a cross, *Caryophyllaceous*,—consisting of five petals with long claws inclosed in the tube of the calyx, and with their limbs commonly placed at right angles to the claws, as in the Lychnis, Single pink, Carnation, and Catch-fly. *Rosaceous*,—composed of five petals, without, or with very short claws, and spreading in a regular manner, as in the Strawberry and Single rose. There are many anomalous forms of the irregular polypetalous *C.*, to which no particular names are applied. There is one form, however, of great importance, namely, the *Papilionaceous*. (Fig. 65.) This derives its name from the fancied resemblance which it bears to a butterfly (*papilio*). It is composed of five petals, one of which is superior and larger than the others, and is termed the *standard* or *velillum*; two are inferior, and usually more or less united, so as to form a somewhat boat-shaped cavity, called the *keel* or *carina*; and two are lateral, and termed the *wings* or *ale*. This curious form is common to the various species of the *Pea*, and a vast number of plants which form the sub-ord. *Papilionaceae* of the *Leguminosae*. When the petals unite, so as to form a monopetalous *C.*, various terms are used, as in the case of the monosepalous calyx, to indicate the degree of adhesion; such as *partite*, *cleft*, *toothed*, and *entire*. (See CALYX.) The part where the union has taken place is called the *tube*; the free portion, the *limb*; and the orifice of the tube, the *throat* or *fauces*. The monopetalous is *regular* when the parts are of the same size and form, and united so as to form a symmetrical body; it is *irregular* when these conditions are not complied with. The most noteworthy forms of the regular monopetalous *C.* are distinguished as follows:—*Tubular*,—nearly cylindrical throughout, as in the central florets of many composite plants, like the Ragwort, Chrysanthemum, and Milfoil. *Campanulate*, or *bell-shaped*,—rounded at the base, and gradually enlarging to the summit; as in the Harebell, (fig. 492.) *Infundibuliform*, or *funnel-shaped*; as in Convolvulus and Tobacco. *Hypocrateriform*, or *salver-shaped*,—the tube long and narrow, and the limb at right angles to it; as in Phlox, Auricula, and Primrose. *Rotate*, or *wheel-shaped*,—tube short, otherwise similar to the preceding form; as

Fig. 693. — CRUCIFORM COROLLA.

in Forget-me-not. *Urecolate*, or *pitcher-shaped*,—swollen in the middle, and contracted at both base and apex; as in the Purple heath. Of irregular monopetalous *C.*, the following are the most important:—*Labiata*, or *lipped*,—limb divided into two portions, one overhanging the other, the tube being left open, so that the whole resembles in a degree the lips and mouth of an animal; as in Rosemary. (Fig. 694.) This form is common to most of the plants included in the order *Lamiaceae*. *Personate*, or *masked*,—resembling the labiate in being divided into two lips; but distinguished by the lower lip being approximated to the upper, so as to close the orifice of the tube or throat. It is seen in the Snap-dragon and Toad-flax. The *Calceolate*, or *slipper-form*, which occurs in *Calceolaria*, is but a slight modification of this form. *Ligulate*, or *strap-shaped*,—a tubular *C.*, partly split open on one side; as in the whole of the florets of the Dandelion, and in the florets of the ray of the Chrysanthemum and Daisy. *Digitaliform*, or *glove-shaped*,—somewhat bell-shaped, but slightly irregular; as in the Fox-glove. The *C.*, whether polypetalous or monopetalous, is subject to various irregularities, arising from the expansion or growing outward of one or more of the petals into processes of different kinds. Thus, in the Snap-dragon and Valerian, the lower part of the tube becomes dilated on one side, so as to form a little bag, and the *C.* is then termed *saccate* or *gibbous*. Sometimes a petal, or tube of a monopetalous *C.*, becomes prolonged downwards, so as to form a spur. Examples of *spurred* or *calcarate* petals or *C.* may be seen in Heart's-ease, Columbine, Toad-flax, and Red Valerian. On the inner surface of the petals of many flowers there are curious appendages in the form of scales or hair-like processes. Sometimes these scales are more or less adherent, and form a cup-shaped process, as in *Narcissus*: to this the term *corona* is commonly applied, and the *C.* which exhibits it is said to be crowned. If the *C.* falls as the flower opens, as in the Grape-vine, it is *caducous*; if it falls off, as is generally the case, soon after the opening of the flower, it is *deciduous*. In rare instances it is *persistent*, and then it usually becomes dry and shrivelled, as in Heaths and Campanulas, and is said to be *marcescent*.

Corolla'ceous, *a.* [Fr. *corollacé*.] Pertaining to a corolla; inclosing and protecting like a wreath.

Corollary, *n.* [Lat. *corollarium*, from *corolla*.] Something added to a proposition demonstrated; an inference from a preceding proposition; a consequence or conclusion drawn from premises; a deduction from an expressed theory.

Corollate, Corollated, *a.* Possessing a corolla; resembling a corolla.

Corollet, Corollule, *n.* (*Bot.*) A floweret in an aggregate flower.

Corolline, *a.* (*Bot.*) Same as COROLLACEOUS.

Corolliflorae, *n. pl.* (*Bot.*) In the arrangement of De Candolle, a sub-class of *Dicotyledones*, comprising those plants which have flowers furnished with both calyx and corolla, the latter being composed of united petals; the stamens are inserted on the corolla or ovary, or free and rising from the thalamus. The *Corolliflorae* are subdivided into—*Epigynae*, in which the calyx is adherent, and the ovary consequently inferior; *Hypostamineae*, in which the stamens are inserted into the thalamus, and do not adhere to the corolla, while the ovary is superior; and *Eppetale* or *Epicorollae*, in which the corolla arises from the thalamus, and has the stamens attached to it, the ovary being superior.

Coromandel Coast, (*kor'o-mán'del*), a long line of Asiatic sea-coast, extending from Point Cashmere, in Lat. 10° 17' N., Lon. 79° 56' E., to Gondagam, in Lat. 15° 20' N., Lon. 80° 10' E. It is pretty nearly co-extensive with the districts of Tanjore, Arcot, Chingleput, and Nellore, comprising, along with Madras and Pondicherry, the grand battle-field of the last century between England and France in India. With various estuaries and inlets, it is yet commercially of very little value, not presenting a single safe place of refuge for large vessels. So shallow, moreover, is the water for a considerable distance from the land, that ships of any size are obliged to lie several miles off.

Coroman'del-wood, *n.* (*Bot.*) See DIOSPYROS.

Coro'na, *n.; pl.* CORONÆ. [Lat., a crown.] (*Arch.*) The large, square, and massy member of a cornice, more usually called the *drip* or *larmier*, whose situation is between the cymatium above and the bed-moulding below it; it is used for conveying the water drop by drop from the building.

(*Bot.*) *C.*, or CORONET, is a word applied to certain appendages of the corolla, which are arranged within it in a circle. In the *Narcissus* it is a cup; in *Symphytum* it consists of five glandular narrow processes; in *Asclepias* it is a thick fleshy ring extended into bended lobes. In all cases the coronet is a modification of sterile stamens.

(*Meteorol.*) When the sky is covered with light clouds, we often see a colored circle, in which red predominates, surrounding the moon or the sun. At other times several concentric rings are observed, separated by intervals in which green predominates; these are *crowns* or *coronae*. The corona is not complete unless there are several series of concentric circles.

(*Astron.*) A broad circle of light which surrounds the

Fig. 694. — LABIATE COROLLA.
a, calyx; b, corolla.

dark body of the moon during a total eclipse of the sun. It is believed to be due to a rare solar atmosphere, whose outer extremities are sometimes several millions of miles distant from the sun's surface. The spectroscopic indicates that it is composed of fine, dust-like particles and incandescent gases, yet its real nature and relations to the sun have not as yet been determined by scientists.

Coronach, (*kor'o-nak*), *n.* [Gael.] A dirge for the dead. See CORANACH.

Corona Den'tis, *n.* [Lat.] (*Zoöl.*) The exposed part of a tooth, which projects beyond the alveolus and gum.

Cor'onal, *a.* Belonging to the crown or cranium of the head.

—Relating, or pertaining, to a monarch's crown or coronation; as, "the coronal oath."—Milton.

C. suture. (*Anat.*) The crown seam, or serrated junction of the skull with the two parietal or side-bones of the vault.

—*n.* A crown; a garland; a wreath; as, a coronal of flowers.

"Crown ye god Bacchus with a coronal."—Spenser.

(*Anat.*) The frontal bone.

Corona'men, *n.* (*Zoöl.*) The superior margin of a hoof, called in veterinary surgery the *coronet*.

Cor'onary, *a.* [Lat. *coronarius*, from *corona*, a crown.] Relating to a crown, garland, or wreath.

"The coronary spots upon the crown."—Browne.

(*Anat.*) Resembling a crown or coronal;—applied to some blood-vessels of the heart having a fanciful resemblance to a crown, and called the *coronary arteries*.

—*n.* A small bone in a horse's foot.

Corona'ta, an island in the Adriatic, 20 m. from Zara. It is 15 m. long, and 1 broad, and belongs to Dalmatia.

Cor'onate, Cor'onated, *a.* Possessing a crown; wearing a crown or coronet.

(*Zoöl.*) Crowned towards the apex, as some shells are by a row of spines, tubercles, &c.

Coronation, *n.* [L. Lat. *coronatio*, from Lat. *corona*, a crown.] Act or solemnity of crowning a sovereign; the pomp or assembly attending the investiture of a monarch.

(*Hist.*) Justin II., who succeeded Justinian I. A.D. 565, was the first emperor crowned with ceremony by the Patriarch of Constantinople. Charlemagne adopted the custom, and was crowned by the Pope, at Rome, 800. Edward I. (the Elder), crowned in 902, is said to have been the first English monarch to adopt the ceremony. The custom for the queen to be crowned originated in England before the Conquest. The French queens were for a long time crowned at the abbey of St. Denis, near Paris. Edward the Confessor fixed the monastery founded by him at Westminster as the place for the coronation of the English monarchs.

C. stone. (*Eng. Hist.*) "The legends of the old historians," says Taylor (*Glory of Regality*, p. 53), "inform us that this is the very stone on which the patriarch Jacob laid his head in the plain of Luz; that it was brought from Egypt into Spain by Gathelus, the supposed founder of the Scottish nation; that it was thence transported into Ireland amongst other princely jewels and regall monuments, by Simon Brech, who was crowned upon it, about B.C. 700, and that it was thence carried to Scotland by King Fergus, B.C. 330." The real history is that it was transferred from Ireland to Scotland at an early period, and was placed in the abbey church of Seone in 850. The Scottish kings were crowned here until 1296, when Edward I. carried it to England. It was agreed by the treaty of Northampton, in 1328, that the stone should be returned to Scotland, but this was not done. It is called the "Stone of Destiny," and fixed under the seat of the coronation chair, which made of oak, and is now kept in the abbey of Westminster.

Coronation Gulf, in British N. America, an inlet the Arctic Ocean; Lat. 68° 30' N., Lon. 110° W.

Coronation Island, in Alaska, west of Prince Wales' Archipelago.

Coron'da, a town of the Argentine republic, prov. Santa Fé; pop. 2,500.

Coronel, *n.* See CRONEL.

Cor'oner, *n.* [L. Lat. *coronator*, from *corona*.] An officer whose chief duty is to hold and preside over a court inquiry, to ascertain the cause of sudden or violent death. This office was established in England before the Norman Conquest, of which the holder was, as name indicates, in a peculiar manner the officer of a crown; whose private rights of property, whether arising by escheat, wardship, or consisting in demesne, it was his business to maintain and superintend in the court for which he acted. The office, as now limited in England and in America, has lost much of the honor which

Fig. 695. — CORONATION-CHAIR OF THE KINGS OF ENGLAND.

(With the Stone of Destiny beneath the throne, Westminster Abbey.)

formerly appertained to it, but it is still of great consequence to society, both for bringing murderers to punishment, and for protecting innocent persons from accusation.

Coronet, n. [It. *coronetta*, dim. of Lat. *corona*, crown.] (*Her.*) An inferior crown worn by noblemen. That of the Prince of Wales (1) is composed of a circle or fillet of gold; four crosses pattées are placed round the edge between the same number of fleurs-de-lis. From the two centre crosses a bent arch extends, surmounted by a round and cross. The C. of a duke (2) is a circle of gold, richly chased, having on the edge eight strawberry-leaves; that of a marquis (3), a circle set round with 4

Fig. 696. — CORONETS.

strawberry-leaves, and as many pearls interposed on raminal points. In an earl's coronet (4) there are 8 pearls, set on pyramidal points, and 8 strawberry-leaves, which are lower than the pearls; that of a viscount (5) surrounded with pearls only, the number being unlimited; a baron's coronet (6) has only six pearls, all at equal distances. The C. of the kings-at-arms is a plain net of gold with 16 leaves, half of which alternately are higher than the others. *Miserere mei Deus* is the motto of the band. In England, C. are worn at the time of the coronation by peers and peeresses, and surround caps of crimson velvet, turned up with ermine, as in Fig. 696. France, and other states of Europe, C. are only used heraldic insignia.

Coronet, n. An ornamental head-dress.

"A coronet of gold, richly set with pearls." — Sidney.

Coronet, (q. v.)

Coronet, (q. v.) The second of the consolidated flanges of the horse's foot.

Coroneted, a. Wearing, or entitled to wear, a coronet; as, a coroneted noble.

Coroniform, a. [Lat. *corona*, and *forma*, form.] Possessing the form of a crown.

Coronilla, n. [Dim. of Lat. *corona*, a crown.] (*Bot.*) Gen. of plants, ord. *Fabaceæ*. They are mostly shrubs, natives of Europe. The *Scorpioides semina* is a beautiful flowering shrub found in France; stem, abt. 3 ft. high, square, with opposite branches; flowers, rose-colored, collected in little tufts on the ends of the subaxillary peduncles.

Coronoid Process, n. [Gr. *korone*, a crown, and *os*, form; Fr. *coronoide*.] (*Anat.*) A projection of the all bone of the arm (the ulna); so called from a supposed resemblance to the bill of a crow.

Coronule, n. The coronet or downy tuft of seeds.

Corot, (kō-rō') JEAN BAPTISTE CAMILLE, a French painter, at Paris, 1796. Among the most remarkable of his productions may be named, *A View in Italy*; *A Souvenir of the Environs of Florence*; *The Burning of Sodom*; *A View of Marcoussy*, (purchased by Napoleon III.); *André and Virgil*; and *Marcello*. D. 1875.

Corporal, n. [Fr. *caporal*; It. *caporale*; L. Lat. *capalis*, from Lat. *caput*, the head.] (*Mil.*) The lowest commissioned officer of a company, next below a sergeant.

Corporal, n. A naval warrant-officer under the master-at-arms; as, a ship's corporal.

Corporal, n. [Lat. *corporale*, from *corpus*, the body.] (*Ecd. Hist.*)

A C, or *corporale*, is the linen cloth which is spread over the consecrated bread (*corpus*, or body) after the communion. In the Roman and Greek churches it is an act of great reverence, and the folding and unfolding of it by the priest at the altar is accompanied with much ceremony. It is supposed to represent the wrapping of the body of our Lord in fine linen by Joseph of Arimathea. The C. *oath* is derived from the ancient usage of touching the C. to add solemnity to an oath.

Belonging or relating to the body; as, *corporal punishment*.

Beasts enjoy greater sensual pleasures, and feel fewer *corporal pains*. — Atterbury.

terial: corporeal; not spiritual.

"And what seem'd corporal
Melted, as breath, into the wind." — Shaks.

Corporale, n. (*Ecd.*) See CORPORAL.

Corporality, n. Quality of being embodied; in contradistinction to *spirituality*.

Corporally, adv. Bodily; in, or with, the body.

"The sun is corporally conjoined with basilisks." — Broune.

Corporalship, n. (*Mil.*) A corporal's office or command.

Corporate, a. [Lat. *corporatus*, from *corpus*.] United in a body or community; formed into a legal body, and empowered to act in legal processes as an individual; as, a *corporate borough*.

"The nobles of Athens being not at this time a corporate assembly." — Swift.

—Relating, or pertaining, to a corporation; as, *corporate rights*.

Corporately, adv. In a corporate capacity.

Corporateness, n. State or condition of a body corporate.

Corporation, n. [Fr.; Lat. *corporatio*, from *corpus*.]

A body politic or incorporate, so called as the persons are made into a body, and of capacity to take and grant, &c.; or it is an assembly and joining together of many into one fellowship and brotherhood, whereof one is head and chief, and the rest are the body, and this head and body knit together make the corporation; also, it is constituted of several members, like unto the natural body, and framed by fiction of law to endure in perpetual succession. The essential character of a C. is that it has a legal existence as a person, under the name given to it by legislative authority, either by express charter, or by prescription, which implies a charter. Of corporations, some are *sole*, some *aggregate*: *sole*, when in one single person, as a bishop, dean, parson, vicar, or the like; *aggregate*, which is most usual, consisting of many persons, as mayor and commonalty, dean and chapter, &c. Likewise, corporations are *spiritual* or *temporal*: *spiritual*, as bishops, deans, archdeacons, parsons, vicars, and other ecclesiastical persons; *temporal*, as mayors, aldermen, &c. of towns and boroughs. Lay corporations are of two sorts, — *civil* and *eleemosynary*. The *civil* are such as are erected for a variety of temporal purposes, as a mayor or commonalty, or the like, for the good government of a town; others, for the advancement and regulation of commerce, as banking, insurance, manufacturing, &c.; and others, for the better carrying on of divers special purposes, as colleges, academies, &c. *Eleemosynary* are such as are constituted for the perpetual distribution of the free alms or bounty of the founder to such persons as he has directed, or as the mode of government has been defined. Of this kind are all hospitals for the maintenance of the poor, sick, and impotent, and all colleges. Corporations, both *sole* and *aggregate*, may purchase, take, and hold land to them and their successors, as natural persons may hold them and their heirs. But *aggregate* corporations, when of the *eleemosynary*, or ecclesiastical, or municipal kind, and *corporations sole*, are in general restrained by statute from alienation of their lands, beyond the life of the person who constitutes the C. *sole*, or is the head of the C. *aggregate*. Power is nevertheless given to them, in some cases, to grant long building-leases. Corporations *aggregate* may sue and be sued, and do all other acts, by their corporate name. Their corporate property only, and not the members individually, is amenable to judgments given against them. Their acts are under their common seal. There is perhaps not one country in the world where corporations are so numerous and so diversified as they are in America. The most important of them will be found in this work under their proper names.

—A cant term for the human stomach and belly; as, that man carries a large *corporation*. (*Eng.*) — Vulgarly applied, also, to men who run as candidates for the office of alderman.

Corporator, n. A member of a corporation.

Corporeal, a. [Lat. *corporeus*, from *corpus*.] Having a body; consisting of a material body; material; — opposed to *spiritual*, or *immaterial*; as, a *corporeal substance*.

Corporealist, n. A materialist.

Corporeality, n. State of being corporeal.

Corporeally, adv. In body; in a bodily form or manner.

Corporeality, n. Corporeality.

Corporeity, n. Materiality; quality of being embodied; state of having a body.

"The one attributed corporeity to God, and the shape or figure." — Stillington.

Corposaut, n. (*Meteor.*) See CASTOR AND POLLUX.

Corps, (kōr; pl. kōr.) n. sing. and pl. [Fr., from Lat. *corpus*.] (*Mil.*) A body of troops; any division of an army; as, a rifle *corps*.

(*Arch.*) Any part that projects beyond a naked wall, serving as a ground for some decoration, or the like.

Corps d'Armée, (kōr dar-mā') n. [Fr., body of the army.] (*Mil.*) An army in the field is divided into *corps*, each consisting of two or more divisions, which are subdivided into brigades, and these again into battalions or regiments.

Corps de Garde, (kōr-de-gārd') n. [Fr.] (*Mil.*) A guard-room. — The men who watch in the guard-room.

Corps Diplomatique, (kōr dè-plom-at'èk.) n. [Fr.] (*Pol.*) The body of foreign diplomatic agents.

Corps Législatif, (kōr lè-jis-lā-tèv') n. [Fr.] The Lower House of the French legislature, under the imperial govt. of Napoleon III.; constituted by Senate-consulate of 1857. The deputies were elected by universal suffrage for 6 years, in the proportion of 1 to 35,000 electors. It discussed and voted on projects of law and taxation presented by govt. These projects were submitted to *commissions*, i.e. committees. But any amendment

which the commission might propose was referred to the CONSEIL D'ETAT (q. v.), and without its approval could not be submitted to the legislative body. A project finally adopted was next submitted to the SENATE (q. v.). The session of the legislative body lasted three months; its sittings were public; but the public might be excluded on the demand of five members. After the fall of the empire, (1870,) the C. L. ended its existence, and was succeeded by the *National Assembly* (q. v.).

Corpse, (kōrps.) n. [Lat. *corpus*.] The dead body of a human being; human remains.

Corpse-candle, n. A luminous phenomenon like the flame of a candle seen in church-yards.

Corpse-gate, n. See LITCH-GATE.

Corpulence, Corpulency, n. [Lat. *corpulentia*, from *corpus*.] Grossness or fleshiness of body; excessive fatness; a state of being loaded with flesh.

(*Physiol.*) It is impossible to define exactly the limit beyond which the body can be said to be corpulent, depending, as it does, very much upon the general habit and the state of health of the individual. It most commonly takes place after the age of forty, but is not confined to any particular period of life, being found also in childhood and youth. The causes of corpulence are both natural and acquired. There are some persons who have a natural tendency to corpulence; in others it may be induced by modes of life, indolent and sedentary habits, and the use of certain kinds of food. The undue accumulation of fat produces a variety of effects, interfering with the vital energies of the body, and incapacitating for exertion. The chances of life are not so great among persons of a corpulent habit as among those of a normal condition. All sudden or violent measures to get rid of corpulence are attended with harm; and not the least dangerous is the popular remedy of vinegar, which has the effect of destroying the digestive powers. Attention to diet, and the avoidance of such articles as tend to generate fat, together with active exercise, and the counteracting of indolent habits, are among the best means that can be employed. Dr. Chalmers, in his small treatise *On Corpulence*, gives a variety of cases in which *liquor potassa* was used with great effect; but this remedy should not be resorted to without the sanction of a medical adviser. There are numerous very remarkable cases of corpulence, but not one, we believe, may compete with that of a certain Daniel Lambert, who died in England, 1809, and who, a few days before his death, weighed 52 stone, 11 lbs., or 739 lbs.! It is curious to record that in Sparta, citizens who grew too fat were soundly whipped. Naucles, the son of Polytnus, was brought before the Ephori, and his excessive corpulence was exposed to the public. He was, moreover, threatened with perpetual banishment if he failed to reduce his body within reasonable dimensions.

Corpulent, a. Having a gross or corpulent body; very fat; large; bulky; stout; luscious; as, a *corpulent* old lady.

"A fleshy style . . . and circuit of words, when, with more than enough it grows fat and corpulent." — Ben Jonson.

Corpulently, adv. In a gross or corpulent manner.

Corpus, n. [Lat., a body.] (*Anat.*) A Latin word used very freely to express small elevations in the brain, and structures of a different character to the organ in which they are found, occurring in other parts, as the *C. callosum*, a name applied to the great commissure, or band of transverse fibres, connecting the hemispheres of the cerebrum.

(*Lat.*) Applied to the human body, to a corporation, or to a collection of laws or canons. — *C. comitatus*, the body of the county; the inhabitants or citizens of a whole county. — *C. delicti*. The body of the offence; the essence of the crime. It is a general rule not to convict unless the *C. delicti* can be established, i.e. until the fact that the crime has been actually perpetrated has been first proved. — *C. juris canonici*. A name applied to the collections of the decrees and canons of the Roman Catholic Church. — *C. juris civilis*. The body of the civil law comprising the INSTITUTES, the PANDECTS or DIGEST, the CODE and the NOVELS, q. v. — See also CIVIL LAW.

Corpus Christi, n. [Lat., body of Christ.] (*Ecd.*) The most splendid festival of the Roman Catholic Church, instituted by Pope Urban IV. in 1264, in honor of the consecrated host, and with a view to its adoration. It is observed on the Thursday of the week after Pentecost. It is called in France the *Fête Dieu*.

Corpus Christi, n. In Texas, a city, cap. of Nueces co., about 230 m. S.W. of Galveston. Pop. (1897) abt. 5,000.

Corpus Christi Bay, n. In Texas, an inlet of the Gulf of Mexico, in Refugio co., Lat. 27° 30' N., Lon. 98° W.

Corpusance, n. (*Meteorol.*) See CASTOR AND POLLUX.

Corpusele, Corpuseule, (kōr'pus-h.) n. [Lat. *corpuseculum*, dim. of *corpus*.] A minute particle or physical atom.

(*Anat.*) Applied to some minute, hard elevations on the valve of the aorta.

(*Physiol.*) A name of late generally applied to the globules of the blood. — See BLOOD.

Corpuscular, a. Pertaining to corpuscles or small particles, supposed to be the constituent materials of all large bodies.

Corpuscular philosophy. Same as ATOMIC PHILOSOPHY, q. v.

Corpuscularian, n. One who advocates or upholds corpuscular philosophy.

—*a.* Corpuscular; relating to, or comprising, bodies; as, *corpuscularian principles*.

Corpuscularity, n. State of being corpuscular.

Corradial, a. Radiating to, or from, a common point.

Corradiate, v. a. To concentrate to a given point, as rays of light.

Corradia'tion, *n.* [Lat. *con*, and *radius*, a ray.] A conjunction of rays in one point.

"A corradia'tion and conjunction of beams."—Bacon.

Cor'ral, *n.* [Sp., an enclosure; a yard.] A palisaded enclosure for horses or cattle.

—*v. a.* To secure in a corral, as cattle, &c.

Correct', *a.* [Lat. *correctus*, from *corrigo*—*con*, and *rego*, to direct, to keep straight or right.] Set right or made straight; conformable to a just standard; free from faults or error; right; precise; accurate; regular; punctual; as, *correct* diction, *correct* behavior.

—*v. a.* To make straight or right; to bring to the standard of truth, justice, or propriety; to remove or retrench faults or errors; to set right; to amend; to rectify; as, to *correct* a mistake.

—To reclaim; to reform; to improve; to chastise; to punish; to bring back to a proper state; to discipline; as, to *correct* a child.

—To obviate the qualities of one thing by another; to counteract;—said of anything wrong or hurtful; as, to *correct* acidity of the stomach.

"The only thing that can be done, is to *correct* your drink and diet."—Prior.

Correct'ible, *a.* Susceptible of correction.

Correc'tion, *n.* [Fr., from Lat. *correctio*, from *corrigo*.] Act of correcting; state of being corrected; retrenchment or emendation of faults or errors; amendment; as, *correction* of vice.

"If my writings live long enough to deserve *correction*."—Dryden.

—That which corrects; punishment; discipline; chastisement; animadversion; penalty; as, a house of *correction*.

"Take thy *correction* mildly, kiss the rod."—Shaks.

—That which is substituted in the place of anything wrong or faulty; as, a work full of *corrections*.

—Counteraction or abatement of what is inconvenient or hurtful, by the introduction of an opposite thing or quality; as, *correction* of the liver.

House of Correction. A bridewell; a prison where minor offenders are incarcerated. See PRISON.

C. of the Press. See PROOF-READING.

Correc'tional, *a.* [Fr. *correctionnel*.] Tending to, or intended for, correction.

Correc'tionville, in Iowa, a P. O. of Woodbury co.

Correct'ive, *a.* Having the power to correct; tending to rectify.

"Mulberries are pectoral, *corrective* of bilious alkali."—Arbuthnot.

—*n.* That which corrects, or has the power of correcting; restriction; as, a medicinal *corrective*.

Correct'ly, *adv.* In a correct manner; exactly; accurately.

"Correctly cold, and regularly low."—Pope.

Correct'ness, *n.* State of being correct; freedom from faults or errors; accuracy; exactness; justice; regularity; precision; as, *correctness* of judgment.

—Conformity to established custom, law, or usage; as, *correctness* in speaking.

—Agreement or congruity with an original or copy of anything; exactness; as, *correctness* of design.

"Those pieces have never before been printed . . . with any tolerable degree of *correctness*."—Swift.

Correct'or, *n.* He who, or that which, corrects; as, a *corrector* of the press, a *corrector* of acids, &c.

"He sets up to be an universal reformer, and *corrector* of abuses."—Swift.

Correct'ory, *a.* Containing or making correction.

Correct'ress, *n.* A female corrector.

Correggio, (*kor-redj'ee-oh*), a town of N. Italy, 10 m. from Modena; pop. 5,627. It is the birthplace of the painter Correggio.

Correggio, ANTONIO ALLEGRI, commonly called CORREGGIO from his birthplace, was born in 1494, and appears to have first studied painting under Tonino Bartolotto of Correggio; in 1519 he was established as a painter at Parma. The celebrated cupola at Parma was commenced in 1520, and in 1522 *C.* undertook the great works of the dome of the cathedral; in the former representing the ascension of Christ, and in the latter, the assumption of the Virgin, both of which series are now admirably engraved by the Cav. Toschi. The frescoes of the cathedral, left unfinished by *C.*, were completed by his pupil, Giorgio Gandini. *C.* died of a fever at his native place in 1534, in his 41st year.—*C.*'s great reputation rests chiefly upon the above-mentioned frescoes; but, he had executed many excellent oil pictures before he proceeded to Parma in 1519. All his pictures are conspicuous for a remarkable play of foreshortening, a powerful and delicate chiar-oscuro, or light and shade, and a graceful grouping of forms. The *Notte*, or Night, of *C.*, in the Gallery of Dresden, is a picture of the nativity of Christ, in which the light proceeds from the body of the infant Saviour.

Correg'idor, *n.* [Sp.] A police-magistrate in Spain, and in Spanish-speaking countries.

Cor'relate, *n.* A person or thing that stands in an opposite relation to another.

"The relation is at an end for want of a *correlate*."—South.

—*v. i.* To have a reciprocal relation, as father and son.

Correla'tion, *n.* [Fr. *corrélation*.] Mutual or reciprocal relation.—*C. of Forces*, see FORCE.

Correlative, *a.* [Lat. *con*, and *relativus*, from *refero*, *relatus*, to bear, carry, or bring back. See RELATE.] Having a mutual or reciprocal relation: thus *father* and *son*, *husband* and *wife*, are correlative terms; reciprocal.

"Giving is a relative action, and so requires a *correlative* to answer it."—South.

—*n.* He who, or that which, stands in mutual or reciprocal relation, as *father* and *son*, *darkness* and *light*.

(Gram.) The antecedent of a pronoun.

Correl'atively, *adv.* In a correlative relation.

Correl'ativeness, *n.* The state of being correlative.

Correspond', *v. a.* [Fr. *correspondre*; Lat. *con*, and *respondeo*, to answer. See RESPOND.] To be congruous; to be adapted or proportioned to; to suit; to agree; to fit; to answer; as, these things *correspond*.

—To communicate by letters; to hold intercourse with a person at a distance by sending and receiving letters; to carry on epistolary commerce;—preceding *with*; as, to *correspond with* a friend.

"Atterbury began to *correspond* directly with the Pretender."—Macaulay.

Correspond'ence, **Correspond'ency**, *n.* [Fr. *correspondance*.] Act of corresponding; relation; fitness; congruity; mutual adaptation of one thing to another.

"Their habitudes, *correspondencies*, and relations, keep the same to one another."—Locke.

—Intercourse by interchange of letters; friendly intercourse; reciprocal exchange of offices or civilities.

"Sure the villains hold a *correspondence*

With the enemy, and thus they would betray us."—Denham.

—Letters and epistolary communications interchanged; as, mercantile *correspondence*.

Correspond'ent, *a.* [Fr. *correspondant*.] Suitable; fit; congruous; agreeable; answerable; adapted.

"I will be *correspondent* to command, And do my spitting gently."—Shaks.

—*n.* One who corresponds with another; one with whom an intercourse is carried on by letters or messages; a business client; as, the foreign *correspondent* of a commercial firm; a newspaper *correspondent*.

"Letters from and to all his *correspondents* at home and abroad."—Denham.

Correspond'ently, *adv.* In a corresponding manner.

Correspond'ing, *p. a.* Carrying on epistolary intercourse; as, a *corresponding* member of a society.

—Answering; agreeing; suiting; as, *corresponding* numbers.

Correspond'ingly, *adv.* In a corresponding manner.

Correspond'sive, *a.* Answerable; suitable or adapted to anything.

"Six gates . . . with *corresponsive* and fulfilling bolts."—Shaks.

Correspon'sively, *adv.* In a responsive manner.

Corrèze, a dep. of France, formerly part of the Limousin, and taking its name from an affluent of the Vézère, —the Corrèze which traverses the dep. from N.E. to S.W. This dep. extends between Lat. 44° 55' and 45° 40' N., Lon. 1° 13' and 2° 22' E. Area, 2,300 sq. m. The surface is mountainous, and the soil generally far from productive, many of the inhabitants living on chestnut-flour. Coal, iron, lead, alabaster, and granite of various colors, are abundant. *Manuf.* Muskets at Tulle. *Chief Towns*. Tulle (the cap.), Brive, and Ussel.

Cor'rib, (*Lough*), a lake of Connaught, Ireland, 3 m. N. of Galway. It is 27 m. long, with a varying breadth of from 1 to 6 m.

Cor'ridor, *n.* [Fr.; Sp. *corredor*, from Lat. *curro*, to run.] (*Arch.*) A gallery or open passage running round a building, leading to several chambers at a distance from each other.

(*Portif.*) A covered way that runs round, or surrounds, a fortified work.

Cor'rie, *n.* [Etyim. uncertain.] In Scotland, a mountain-glen.

Corrientes, (*kor-re-ain'taiz*), a province of the Argentine republic, lying between Entre Rios on the S., and the republic of Paraguay on the N., having the Parana on the N. and W. Lat. 27°–30° S., and Lon. 57°–59° W. Area, about 54,000 sq. m. The N. is undulating and fertile; and the S., besides being generally swampy, is partly covered by Lake Ybara. The products are maize, cotton, sugar, indigo, tobacco, and a species of silk. Pop. 290,000.

CORRIENTES, the cap. of the above prov., stands in Lat. 27° 27' S. and Lon. 58° 46' W., near the confluence of the Parana and the Paraguay. It takes its name from the rapids, which are said to be as decidedly a turning-point in the climate of the country as they are in the navigation of the river. Pop. (1897) abt. 18,000.

Corrigendum, (*kor-ri-jen'dum*), *n.*; *pl.* CORRIGENDA. [Lat.] A word or thing to be avoided or corrected.

Cor'rigent, *n.* (*Med.*) A substance added to a medicine to nullify or modify its action.

Corrigibility, *n.* Corrigibleness; stato or condition of being amendable.

Corrigible, (*kor'ri-ji-bl*) *a.* [Fr., from Lat. *corrigo*. See CORRECT.] That may be corrected, set right, or amended; that may be reformed; as, a *corrigible* mistake.

—Punishable; worthy of punishment or correction.

"He was . . . adjudged *corrigible* for such presumptuous language."—Howell.

Corrigibleness, *n.* State or condition of being corrigible; corrigibility.

Corri'val, *n.* A fellow-rival; a competitor.

"Adversaries and *corrivals*, one against the other."—Spenser.

—*a.* Acting in competition or rivalry; emulous.

Corrival'ity, *n.* Corrivalry.

Corri'valry, **Corri'valship**, *n.* Competition; emulation; opposition.

Corrobor'ant, *a.* [Lat. *corroborans*.] Strengthening; having the power or faculty of giving strength; as, a *corroborant* medicine.

—*n.* (*Med.*) A medicine for strengthening the human body; in other words, tonics and stimulants, as bark, wine, beef, &c.

Corrobor'ate, *v. a.* [Fr. *corroborer*; Lat. *corroboro*, *corroboratus*—*con*, and *roboro*, from *robur*, strength. See ROBUST.] To confirm; to establish; to make more certain; as, to *corroborate* a statement.

Corrobor'a'tion, *n.* Act of strengthening or confirming; addition of strength, assurance, or security; confirmation; as, the *corroboration* of news.—The thing which corroborates.

Corrobor'ative, *a.* Having the power of giving additional strength; tending to confirm.

—*n.* A medicine that strengthens; a corroborant.

Corrobor'atory, *a.* Corroborative; strengthening; confirming; as, *corroboratory* evidence.

Corrode', *v. a.* [Lat. *corrodo*—*con*, and *rodo*, to gnaw. To eat into; to gnaw, eat, or wear away by degrees; as, a *corroding* juice.

"The blood turning acrimonious, *corrodes* the vessels."—Arbuthnot.

—To consume by slow degrees, as the mind; to prey upon; to waste away; as, *corroded* with cares.

"Jealousy . . . *corroding* every thought, and blasting all Love's paradise."—Thomson.

Corro'dent, *a.* Having the power of corroding or wasting away.

—*n.* Any thing or substance of corrosive quality.

Corro'dibility, *n.* Quality of being corrosible.

Corro'dible, **Corro'sible**, *a.* Susceptible of corrosion.

Corro'sibleness, *n.* Quality of being liable to corrode.

Corro'sion, *n.* [Fr., from Lat. *corrodo*, *corrosus*, to corrode.] The gradual eating or wearing away of an substance, such as metal under the action of acids, by means of which its nature is completely changed by slow degrees.

Corro'sive, *a.* Having the power of corroding, or of gradually eating, wearing, consuming, or impairing as, a *corrosive* liquid.

"Corrosive famine waits, and kills the year."—Thomson.

—Having the quality of fretting or vexing; consuming by perturbation of spirits; preying upon.

"Care is no cure, but rather *corrosive*, For things that are not to be remedied."—Shaks.

C. sublimate. (*Chem.*) Bichloride of mercury.—See MERCURY.

—*n.* That which has the quality of corroding, or of eating or wearing away by degrees.

—That which has the power of fretting or preying upon the mind.

"Such speeches are grievous *corrosives*."—Hooker.

Corro'sively, *adv.* In a corrosive or fretting manner with the power of corrosion.

Corro'siveness, *n.* Quality of corroding or eating away; acrimony; acerbity; vexation.

"Saltpetre betrays upon the tongue . . . no *corrosiveness* at all."—Boyle.

Corrosiv'ity, *n.* Corrosiveness.

Cor'rugant, *a.* [Lat. *corrugans*.] Having the power of contracting into wrinkles.

Cor'rugate, *v. a.* [Lat. *corrugo*, *corrugatus*—*con*, and *rugo*, from *ruga*, a wrinkle.] To wrinkle; to draw contract into folds or furrows; as, *corrugated* iron, *corrugated* brow.

—*a.* Wrinkled; furrowed.

Corrugated Iron, *n.* (*Metall.*) Sheet-iron which has been rolled into a series of waves is known under this name; and in this form it is frequently used for temporary roofing, or for covering spaces in a definite manner.

Corru'ga'tion, *n.* A wrinkling; contraction in wrinkles; as, the *corrugation* of fibres.

Cor'rugator Supercil'ii, *n. pl.* [Lat.] (*Anat.*) The name of a pair of thin superficial muscles, situated low the skin of the forehead, the action of which is corrugate or wrinkle the forehead; the principal muscles used in frowning.

Cor'rugent, *a.* (*Anat.*) Contracting or drawing together, as the muscle of the eye.

Corrupt', *v. a.* [Lat. *corrumpo*, *corruptus*—*con*, and *rumpo*, to break.] To change from a sound and wholesome to a putrid or putrescent state; to vitiate or deprave; to defile or pollute; to taint; to contaminate; To pervert; to bribe; to delude; to falsify; to adulterate; to infect with errors; as, to *corrupt* innocence.

"Corrupted freemen are the worst of slaves."—Garrick.

—*v. i.* To rot; to putrefy; as, *corrupted* flesh.—To lose purity or integrity; to become vitiated; as, a *corrupt* voter.

—*a.* [Lat. *corruptus*.] Changed from a sound to a put state; putrefied; spoiled; tainted; unsound in quality; spoiled; as, *corrupt* flesh.

—Tainted with vice or wickedness; depraved; debased; morally vitiated; changed to a perverted state; as, *corrupt* government official, *corrupt* language.

"Corrupt, corrupt, and tainted in desire."—Shaks.

Corrupt'er, *n.* One who corrupts, vitiates, or taints as, a *corrupter* of youth.

"Away, *corrupters* of my faith!"—Shaks.

Corruptibility, *n.* Possibility of being corrupted. **Corrupt'ible**, *a.* [Fr.; Lat. *corruptibilis*.] That may be corrupted, bribed, or morally vitiated; as, a *corruptible* judge.

—Susceptible of becoming putrid or tainted; subject to decay and destruction; as, man's *corruptible* body.

—*n.* That which may decay and perish, as the human body.

Corrupt'ibleness, *n.* Corruptibility; susceptibility of corruption.

Corrupt'ibly, *adv.* In such a manner as to be corrupted or vitiated.

"It is too late; the life of all his blood

Is touch'd *corruptibly*."—Shaks.

Corrup'tion, *n.* [Lat. *corruptio*.] Act or process of corrupting, or state of being corrupt or putrid; the destruction of the natural form of existence of bodies putrefaction; putrescence; as, the *corruption* of me

trid matter: pus.
 -pravation: perversion or deterioration of moral principles: loss of purity or integrity; debasement; pollution; defilement; contamination; taint of blood; bribery; adulteration.

"Amidst corruption, luxury, and rage." — Pope.

Corruption of Blood. (*Law.*) The incapacity to inherit, or pass an inheritance, in consequence of an attainer to which the party has been subject. In the U. States, *C. of blood* was abolished by the Constitution, t. 3, s. 3, n. 2.

Corruptionist, n. One who defends or upholds political corruption.

Corruptive, a. Having the quality of corrupting, tainting, or vitiating; as, a *corruptive* ingredient.

Corruptless, a. Proof against corruption; incorruptible.

The borders with *corruptless* myrrh are crown'd." — Dryden.

Corruptly, adv. In a corrupt manner; with corruption; viciously.

Corruptness, n. State of being bodily corrupt; pnd state, or putrescence. — State of moral impurity; a vicious condition; debasement; degradation; as, the *corruptness* of politicians.

Corruptress, n. A female who employs the arts of corruption.

Cory, in *Pennsylvania*, a city of Erie co., 27 m. S.E. Erie. It has numerous manufacturing establishments, producing boring machinery, oil-well supplies, &c. *Pop.* (1897) abt. 5,600.

Corsage, n. The bodice of a woman's dress; as, a low *corsage*.

Corsair, (kor'sär), n. [Fr. *corsaire*; It. *corsare*, *corsaro*, from Lat. *cursor*, from *curro*, to run.] A rover; a pirate; a buccaneer.

"He left a *corsair's* name to other times,

Linked with one virtue, and a thousand crimes." — Byron.

piratical vessel; as, a Greek *corsair*.

Corse, n. [Fr. *corps*; Lat. *corpus*, a body.] A corpse; a dead body of a human being. (Used chiefly in poetry.)

"He called them . . . unmanfully,

To bring a slovenly unhandsome corse

Between the wind and his nobility." — Shaks.

Corse, JOHN M., an American general who distinguished himself by his defence of ALLATOONA.

Corselet, Cors'let, n. [Fr. *corselet*. See CUIRASS.] A small cuirass, or piece of armor to cover the body for protection; worn formerly by pikemen. It was made chiefly of leather, and was pistol-proof.

"Their hearts . . . in battle's heat,

Against their very *corselets* beat." — Prior.

Cort, That part of winged insects which answers the breast or thorax of other animals.

To encircle with a corselet.

Corset, n. [Fr.; from L. Lat. *corsetus*, the chest, a. Etymol. uncertain.] An article of dress laced closely round the body; a bodice; stays.

Hygienic. The *C.* is one of the most useful and necessary articles of female dress, and though many of the diseases of the chest have been developed and are frequently greatly exaggerated by tight lacing, the indiscriminate warfare carried on by medical men and public writers against the use in any form of a garb that confines the motions of the thorax is marked by as much ignorance.

No medical man whose experience is mainly largely among women, and who has studied the requirements of the female system at different periods of life, would risk to condemn the use of *C.* That stays as necessary to a woman, after a certain stage of life, as bandage is for a sprain, no man who is qualified to speak on the subject will deny. Stays, or rather corsets, however, are quite uncalled for with growing girls, unless, indeed, there should be some natural deformity or weakness to correct. The idea that such a rigid encasement is requisite to give contour to the bust, and impart a useful carriage to the figure, is equally erroneous. Up to 17 or 18, or perhaps till her marriage, no young female, if she takes due care of her person, and does not acquire bad habits, has any occasion to wear a *C.* In the mere sake of support and strength. Whatever is worn up to that time around the chest requires neither elastic nor steel, nor any tension more rigid than is afforded by strings or straps. But to the mother who has domestic duties to perform, and children to rear and suckle, the *C.* becomes an *absolute necessity*; that it may effectually serve the purpose for which it is demanded—support and comfort—it *must* be laced with sufficient tightness to insure those objects. That lacing is injurious, especially with young girls, is more particularly with those of naturally narrow chests, and in whose families there are seeds of consumption, no one will deny; but the tight lacing which married women employ is never of a nature likely to develop or aggravate pulmonary disease. It is not the universal employment of steel-ribbed stays or tightly-drawn corsets in young women under 20 years of age, that both authority and reason should be directed to the discontinuance of a system decidedly hurtful.

Corset, v. a. To enclose in a corset.

Corsica, a French island in the Mediterranean, off the coast of Genoa, and lying to the N. of Sardinia, forming that island, the Straits of Bonifacio. Lat. between 41° and 43° 1' N., and Lon. 8° 37' and 9° 30' E. *C.* is remarkably hilly, rising to an elevation of 9,000 feet at the Mt. Rotondo. The island is 120 m. long from N. to S., and 45 broad from E. to W. The W. shores of *C.* are generally low and sandy; the E. shores are more lofty, and fringed with several extensive harbors or bays, the principal of which are those of Valinco, Ajaccio, Sagone, Calvi, St. Florent, and Corte. In the plains and valleys the soil is abundantly fertile, and yields the products natural to the land in great abundance, such as corn, oil, oranges, lemons, figs, and several other fruits. The natives are also extensive breeders of cattle, great numbers of which are annually exported. The mountains yield several minerals, but the mines have hardly been productive enough to pay for their working. The mulberry is also much cultivated, and considerable quantities of silk are obtained, and sold at both the Lyons and

Genoese markets. Every dominant power in Europe, from the time of the Carthaginians, has, in turn, held the sovereignty of the island, till, at last, the Genoese ceded it to France, in 1768. *C.* forms a French dep.; cap. Ajaccio, the birth-place of Napoleon I. Its other principal towns are Bastia, Ile Rousse, and Calvi. *Pop.* (1895) 288,500.

Fig. 697. — AJACCIO.

Cor'sica, in Ohio, a post-office of Morrow co.

Cor'sica, in Pennsylvania, a post-village of Jefferson co.

Cor'sican, a. Of or pertaining to Corsica.

— *n.* An inhabitant of Corsica.

Corsica'na, in Texas, a city, cap. of Navarro co., about 180 m. N.N.E. of Austin. *Pop.* (1897) about 9,000.

Corsican Moss, n. See GRACILARIA.

Cors'ned, or Morsel of Execration, n. [A. S. *corsnæd*, a compound of *cors*, curse, and *snæd*, a piece or mouthful.] (*Feudal Law.*) Was a form of trial or purgation made use of annually in England. A morsel of bread, or cheese, was consecrated by exorcism, and was administered to a suspected person as a test of his innocence. If the person was guilty, it was held that the morsel would remain in the stomach, and produce pallor and convulsions; if the person was innocent, the morsel would act as a wholesome and nutritious food.

Cor'so, in S. America, an island on the W. coast of Patagonia, Lat. 49° 48' S., Lon. 75° 34' W.

Cort, HENRY, an English inventor, b. at Lancaster, 1749, invented the process by which pig-iron is converted into malleable iron by the flame of pit-coal in the puddling furnace. Before his time, English iron-masters were compelled to employ charcoal for fuel. Having got pig-iron into a malleable condition, he further invented a process for drawing it into bars by means of grooved rollers. In other words, he reduced the labor and cost of producing iron to one-twentieth of what they were before his day, and the iron was of a better quality. In perfecting these inventions, *C.* expended a fortune of upwards of \$100,000, yet was robbed of the fruits of his discoveries by the villainy of an official in a high department of government; when, both cheated and persecuted, he was ultimately allowed to starve, by the apathy and selfishness of an ungrateful country. D. 1800. After his death, the attention of the government was called to the necessities of his family, who were granted a pension from the State.

Cort's Madeira, in California, a town of Marion co.

Cortège, (kor'tazh), n. [Fr. *cortège*; It. *corteggio*, from *corte*, a court. See COURT.] A court retinue; a train of attendants.

Cort'es, n. pl. [Sp.] The legislative assemblies of the kingdoms of Spain and Portugal; — synonymous with the American Congress, English Parliament, French Corps Legislatif, German Reichsrath, and Danish Rigsdag. See PORTUGAL and SPAIN.

Cortes de la Frontera, in Cuba, a bay on the S.W. coast.

Cort'ez, n.; pl. CORTICES. [Lat.] The bark or rind; the outer covering, as of a tree.

(*Med.*) The bark or rind of any tree or fruit, as the *Cortex quercus* (bark of the oak), *Cortex aurantia* (rind of the orange). It was formerly almost exclusively, but improperly, applied to Peruvian bark.

(*Anal.*) A general name for any membrane enveloping an organ.

Cort'ez, or Cort'es, HERNANDO, the conqueror of Mexico, b. in Estremadura, Spain, 1485. At the age of 19 he left Spain, to seek fame and fortune in the new world. He distinguished himself under Velasquez, in the conquest of Cuba; and after passing several years in that island, he obtained leave from Velasquez to conduct a small expedition to the newly-discovered coast of Yucatan, and Mexico. With less than 600 soldiers, and 16 horses, 10 cannons, and four falconets, *C.* sailed, in 1519, to conquer the most powerful empire in America. *C.* landed on the Mexican coast on Good Friday, April 21st, in that year, on the spot where the city of Vera Cruz now stands. He persuaded his followers to destroy their ships, and to march inland, with no prospect but to succeed or perish. The Indian republic of Tlascala lay between him and the Mexican capital. *C.* defeated

the Tlascalans when they attacked him, and then succeeded in winning their friendship. They acted thenceforth as his zealous and faithful allies. Alarmed by the reports of the prowess of the Spaniards, and of the superhuman terrors of the arms which they wielded, Montezuma, the Mexican emperor, sought to conciliate the strangers, and received *C.* and his troops in the capital. Though they obtained lavish presents, and received courteous treatment, the treasures which they saw around them inflamed more and more the cupidity of the invaders. The sight of the idolatrous rites, and especially of the human sacrifices which the Mexicans practised, inflamed their religious bigotry; the ambition of *C.* thirsted after absolute conquest, and, by a bold stroke of treachery, he seized the person of the Mexican emperor. *C.*, soon after this, received a material increase of strength from a force which the viceroy of Cuba had sent to depose him and take him prisoner, but which he partly defeated, and partly persuaded to come over to him. But, he now found himself plunged into a most desperate war with the native Mexicans, who rose upon the Spaniards, and assaulted them in their fortified quarters in the capital. The Mexicans strove with equal courage, and infinitely preponderating numbers, against the superior weapons and discipline of the Europeans, who throughout the struggle were gallantly supported by their Tlascalan confederates. *C.* was now, at last, obliged to evacuate the city, July 1, 1520. Encouraged by this success, the Mexicans followed the Spaniards, and fought a pitched battle with them in the open field. In this action (the battle of Otumba), *C.* gained a complete victory, which was mainly due to his own prowess. After receiving some reinforcements, *C.* again advanced upon the Mexican capital. Guatemozin was now emperor of Mexico, and had learned the inability of his troops to face the Europeans in the open field. He remained within the city, which *C.* besieged. The geographical position of the city, and the great number of native allies who now served under him, enabled *C.* to establish a strict blockade. Many assaults were made, and met with various fortune. Fire and the sword swept away thousands of the Mexicans, but famine was their most fatal foe; and Mexico, on August 13, 1521, surrendered, and the whole of its vast empire became subject to the crown of Spain. *C.* disgraced his triumph by putting the brave Guatemozin to a cruel death, an act of which he is said to have afterwards deeply repented. The domestic enemies of the conqueror of Mexico had, meanwhile, been busy in their intrigues against him at the Spanish court, and in 1528 *C.* returned to Spain to face his accusers. He was coldly received, though with apparent honor; and he could not prevail on Charles V. to continue him in the governorship of Mexico. He returned to America in 1530, a powerful and wealthy noble, but without public authority. He now signalized himself in the arts of peace, in the skilful culture of his ample estate, in the introduction of the sugar-cane, and the importation of merino sheep into the province. He made also several brilliant and important voyages of discovery along the Californian and other coasts of the Pacific. In 1540 he finally returned to Spain, where he was treated by his sovereign with ungracious neglect. *C.* d. near Seville, 1547. — W. H. Prescott, the American historian, has written a full and interesting account of the *Conquest of Mexico*, in which the deeds of *C.* in that country are admirably narrated.

Cort'ez, in Nevada, a village of Lander co.

Cortical, a. Belonging to bark; consisting of, or resembling, bark or rind; belonging to the external covering; as, the *cortical* part of the brain.

Corticate, Corticated, a. [Lat. *corticatus*.] Having, or resembling the bark or rind of a tree, as a lizard.

Corticiferous, a. Producing bark, or something resembling it.

Cortic'ifers, Corticiferi, n. pl. [Lat. *cortex*, bark, and *fero*, to carry.] (*Zool.*) A family of Polyps, whose uniting fleshy substance is spread, like the bark of a tree, over a central calcareous, or corneous, axis.

Cortic'iform, a. Resembling, or pertaining to, bark.

Corticose, Corticous, a. [Fr. *cortiqueux*.] Full of bark; resembling bark.

Cort'ile, n. [L. Lat.] The open court-yard of a dwelling-house.

Cort'is, n. [Lat.] (*Arch.*) In the Middle Ages, an open court surrounded by buildings. — A grange; a farm-residence.

Cort'land, or COURTLAND, in Indiana, a post-village of Jackson co.

Cort'land, or COURTLAND, in Michigan, a post-township of Kent co., 170 m. W. by N. of Detroit.

Cortland, in Minnesota, a twp. of Nicollet co.

Cortland, in New York, a central co.; *area*, about 480 sq. m. It is intersected by the Tioughnioga and Otsego rivers, and other smaller streams. Surface, moderately even; soil, fertile. Iron ore, salt springs, and sulphur springs are found. *Cap.* Cortland. *Pop.* (1890) 28,657.

— A thriving manuf. town, cap. of above co., 36 m. S. of Syracuse. Has machine shops, foundries, nail works, and some 15 carriage and wagon factories. Seat of State Normal and Training School. *Pop.* (1897) abt. 10,000.

— A township of Westchester county.

Cortland, or COURTLAND STATION, in Illinois, a township of De Kalb co., 55 m. W. of Chicago.

Cort'landville, in New York, a township of Cortland co., 33 m. S. of Syracuse.

Cort'na, a fortified town in Italy, in Tuscany, on a hill fronting the lake of Trasymene, 50 m. S.E. of Florence. It is a place of great antiquity, and is to a considerable extent, still encompassed by its walls, erected 3,500 years ago. It has a cathedral of the 10th cent., and a castle built by the Medici. *Pop.* 5,411.

Corts'ville, in *Ohio*, a village of Clarke co.

Cortusa, *n.* (*Bot.*) A genus of plants, order *Primulaceae*. The well-known Bear's-ear *Panicle*. *C. Mathioli* is one of the finest species.

Cornua, in *Indiana*, a post-village of DeKalb co.

Cornua, in *Michigan*, a city, cap. of Shiawassee co., 85 m. N.W. of Detroit. Pop. (1897) about 2,000.

Cornundum, *n.* [*Ind.*] (*Min.*) The *Adamantine spar*, a crystallized or massive mineral, composed of nearly pure anhydrous alumina. It is the hardest of all known substances, except the diamond, on which account it is much used for polishing steel and cutting gems. The term *C.*, or *Common C.*, is generally confined to the opaque rough crystals and cleavable masses, generally of dingy colors and often dark; while the term *Emer* embraces the more or less impure, massive, granular, and compact kinds, and *Precious Cornundum* the transparent, brightly tinted varieties which are used as gems; the blue variety under the name of *Sapphire*, the red of *Ruby*, the yellow of *Oriental Topaz*, and the violet of *Oriental Amethyst*. The crystals which show a bright opalescent six-sided star in the direction of the vertical axis, are called *Asteria* or *Star-stones*.

Cornua, a sea-port of Spain, cap. of a prov. of the same name, in Galicia, on a peninsula at the entrance of the Bay of Betanzos, 30 m. E. of Lagos; Lat. 43° 22' N., Lon. 8° 22' W. The harbor is spacious and secure. *Manuf.* Cordage, linen goods, &c. It was twice taken by the French, in 1809 and 1823. Pop. 31,216.

Cornuscate, *v. n.* [*Lat. cornus, cornuscatus*, to butt with the head, from *cornu*, a horn; allied to *Gr. korys*, to furnish with a helmet, from *korus*, a helmet.] To throw off flashes of light, as a bright helmet; to tremble; to vibrate; to flash; to glitter; to gleam; to sparkle.

Cornuscation, *n.* [*Lat. cornuscatio*.] A glittering or flashing; a quick vibration of light; a flash; a sudden burst of light.

"Nimble cornuscations strike the eye."—Garth.

—Intellectual brilliancy; as, the *cornuscations* of genius.

Corvallis, in *Oregon*, a city, cap. of Benton co. Here is the State Agricultural College. Wheat is the principal export. Pop. (1897) about 2,000.

Corvée, *n.* [*Fr.*] (*Feudal Law*) The obligation of the inhabitants of a district to do certain services, as the repair of roads, &c., for the sovereign, or the feudal lord. This system of forced labor was abolished in France in 1789, and in Prussia in 1807.

Corvette, *n.* [*Fr. corvette*; *Sp. corveta*, a leap, a curvet, a boat, from *Lat. curvus*, bent, crooked.] (*Naut.*) One of the smaller vessels of war. It has flush decks, three masts, and one tier of guns—on the upper deck. The masts are square-rigged. A *C.* rarely carries more than 26 guns.

Corvetto, *n.* (*Mauege*). See *CURVET*.

Corvidæ, *n. pl.* [*Lat. from corvus*, a crow.] (*Zool.*) The crow family. See *Crow*.

Corvine, *a.* [*From Lat. corvus*.] Pertaining to the crow.

Corvisart, JEAN NICOLAS, BARON, a French physician, b. 1755. He was chief physician to Napoleon, who made him a baron. Nor was his great merit overlooked by the Bourbons, the place of honorary member of the Academy of Medicine being conferred on him a short time previous to his death, which happened in 1821. He was the author of some valuable medical books, and translated others.

Corvo, the most N.W. and one of the smallest of the Azores Islands; Lat. 39° 43' 30" N., Lon. 31° 7' 15" W. The coasts are rocky, but the interior is fertile and the climate delightful.

Corvorant, *n.* See *CORMORANT*.

Corvus, *n.* (*Zool.*) See *CORVIDÆ*.

Corwin, THOMAS, an American advocate, orator, and statesman, b. in Bourbon co., Ky., in 1794. In 1815, he entered upon the study of the law, and, in 1818, was admitted to the bar of Ohio, where he speedily distinguished himself by his eloquence and forensic powers. In 1822, *C.* became a member of the Ohio House of Representatives, where he energetically and successfully opposed the restoration of an old and repealed law authorizing public whipping for minor offences. In 1830, he was elected to Congress, where he espoused the Whig side. In 1840, *C.* supported Gen. Harrison for the presidency, and stumped the State of Ohio in his behalf, delivering some brilliant addresses. In 1845, he was elected to the U. S. Senate, where he delivered an able speech in the following year against the Mexican war. In July, 1850, on the accession of Mr. Fillmore to the chief magistracy, *C.* was appointed secretary of the treasury, an office he resigned in 1853. In 1858, he was again sent from Ohio to the House of Representatives in Congress. D. 1865.

Corwin, in *Iowa*, a township of Ida co.

Corwin, in *Ohio*, a village of Warren co., 67 m. S.W. of Columbus.

Corwinville, in *Ohio*, a village of Lorain co.

Corybant, *n.; pl. CORYBANTS*; *Lat. pl. CORYBANTES*. (*Myth.*) Certain fabulous beings, said by some to be the children of Apollo and Rhytia. They may be compared with the Curetes, Cabiri, and Idaean dactyls. The name (of which the origin is doubtful) was applied to the frantic priests of Rhea or Cybele; whose extravagances were taken as types of madness or frenzy in general.

Corybantie, *a.* [*Lat. corybanti*; *Gr. koribantikos*.] After the manner of the Corybantes; deliriously excited; as, a *Corybantie* dance.

Coryceum, *n.* (*Arch.*) A room similar to a tennis-court.

Corydalis, *n.* [*Gr. fumitory*.] (*Bot.*) A genus of plants, order *FUMARIACEÆ*, *q. v.*

(*Zool.*) See *STALIDE*.

Corydon, in *Ind.*, a post-v., cap. of Harrison co.

Cor'ydon, in *Iowa*, a twp. and vill., cap. of Wayne co., about 65 m. S. by E. of Des Moines.

Corydon, in *Kentucky*, a vill. of Henderson co.

Corydon, in *Pennsylvania*, a township of McKean county.

Corydon, in *Pennsylvania*, a post-village and township of Warren co.

Coryell, in *Texas*, a central co.; area, about 950 sq. m. It is traversed by the Leon River and Cowhouse and Coryell creeks. Cap. Gatesville.

Corylaeæ, or *CUPULIFERÆ*, *n.* [*Gr. korus*, a helmet, the calyx enveloping the fruit.] (*Bot.*) The Oak family, an ord. of plants, alliance *Quernales*. *DIAG.* 2 or more cells in the ovary, and pendulous or peltate ovules. They are trees or shrubs, with alternate leaves, usually feather-veined and simple, with deciduous stipules. The flowers are monœcious, the male being clustered or in aments, with from five to twenty stamens into the base

Fig. 698. — HIMALAYAN OAK.
(*Quercus semicarpifolia*.)

of a membranous valvate calyx, or of scales; the female solitary or clustered, surrounded by an involucre of bracts, which ultimately form a cupule around the ovary. The fruit is a glans or nut. The plants of this order abound in the forests of temperate regions, and a few occur in the highlands of tropical climates. They are of great importance as timber-trees; many yield edible seeds, and some have astringent barks and cupules. There are 265 known species, which have been arranged into 8 genera, the most noteworthy being *Quercus* (the Oak), *Corylus* (the Hazel), *Tagus* (the Beech), *Castanea* (the Chestnut), and *Carpinus* (the Hornbeam).

Corylus, *n.* [*Gr. korus*, a helmet.] (*Bot.*) A genus of plants, order *Corylaeæ*; the HAZEL, *q. v.*

Corymb, *n.* [*Lat. corymbus*; *Gr. korymbos*, from *korys*, a helmet, the head.]

(*Bot.*) The name given to a particular form of inflorescence. It is a kind of *raceme*, in which the peduncles (flower-stalks) become gradually shorter as they approach the top, so that all the flowers are about on a level. It occurs in some species of *Cerasus*, in the hawthorn, and many familiar plants. When the stalks or secondary axes of a *C.*, instead of bearing flowers immediately, divide and form tertiary axes, a compound *C.* is produced, as in some species of *Pyrus*.

Corymbiate, **Corymbiated**, *a.* Garnished with clusters of berries, or blossoms in the form of corymbs.

Corymbiferae, *n. pl.* [*Lat. corymbus*, and *fero*, I bear.] (*Bot.*) A sub-order of plants, order *Asteraceæ*, consisting of plants having florets all tubular and perfect, or having tubular and perfect florets in the disc, and tubular and pistilliferous, or ligulate, florets in the ray. The genus *Chrysanthemum* may be taken as an example. In our gardens a number of beautiful varieties of the species *C. indicum*, *Sinense*, and others, are cultivated. They are hardy plants, and are remarkable for the number and the varied colors of their flowers, which appear late in autumn.

Corymbiferous, *a.* Bearing fruits or berries in bunches; as, a *corymbiferous* plant.

Corymbose, **Corymbous**, *a.* Relating to, or like a corymb.

Corymbosely, *a.* In corymbs.

Corymbulons, *a.* (*Bot.*) Having little corymbs.

Corypha, (*ko-rí-fa*), *n.* [*Gr. koryphe*, summit.] (*Bot.*) A genus of plants, order *Palmaceæ*. They are tropical Fan-leaved Palms, one of which, the Talipot palm, *C. umbraculifera*, found in Ceylon and Malabar, grows to

Fig. 699. — CORYMB.

the height of sixty or seventy feet. Fans made of the leaves are carried before people of rank by the Cingales. The leaves are also used as umbrellas, and for tents; and by the natives as a substitute for paper.

Coryphaena, *n.* [*Gr. korus*, a helmet, and *phaino*, show.] (*Zool.*) A genus of spiny-finned fishes, so called from the head being crested like a helmet. It belongs to the Mackerel family (*Scombridae*); and includes the Dolphin, or changeable coryphene (*C. hippurus*).

Coryphæe, (*kor-i-fa*), *n.* (*Dram.*) A dancer.

Corypheus, (*kor-i-fé-us*), *n.* [*Lat.*, from *Gr. koryphaos*, standing at the head, from *koryphe*, the top, the head.] (*Gr. Antiq.*) The leader of the chorus in ancient dramas; by whom the dialogue between the chorus and the other actors of the drama was carried on, a who led in the choric song.—Hence, the chief or leader of any company.

Co'ryville, in *Wisconsin*, a township of Keweenaw co. on Lake Michigan;—now merged in Keweenaw twp.

Coryza, *n.* [*Lat.*, from *Gr. korus* or *kara*, the head, a zeo, to boil.] (*Med.*) Inflammation attended with increased discharge of the membrane lining the nose, the sinuses communicating with it. The affection generally subsides without any medical treatment.

Cos, an island of Asiatic Turkey. See *STANCHIO*.

Cosala, a town of Mexico, State of Sonora, in a mountainous district, 200 m. S.E. of El Fuerte, and 60 m. E. the Pacific Ocean; pop. about 7,000.

Cosein'omancy, *n.* [*Gr. kosinomanteia*, from *kinon*, a sieve, and *manteia*, divination.] Art of divination by means of a sieve.

Co-secant, *n.* [*Lat. cou*, and *seco*, secans, to cut. See *SECANT*.] (*Geom.*) The secant of the complement of an arc or angle.

Cos'enage, *u.* Same as *COZENAGE*, *q. v.*

Cos'ening, *n.* (*Feudal Law*) An offence, where a thing is done deceitfully, which cannot be properly termed by any special name.

Cosen'za, a city of S. Italy, cap. of prov. of same name, situate at the foot of the Apennines, 30 m. S.W. of Fano, at the confluence of the rivers Busento and G.

Cos'ey, *a.* See *COSY*.

Cosh'er, *v. a.* (*Feudal Law*) To exact tribute from.

Cosh'erer, *n.* One who practises coshering.

Cosh'ering, *n.* (*Feudal Law*) A visitation made by the lord of a manor and his suite of servants among tenants, lodging and feasting at their houses free of pense.

Coshoc'tou, in *Ohio*, a N.E. central county; area, 1,510 sq. m. It is traversed by the Tuscarawas and Vermilion rivers, which unite to form the Muskingum. The Vernon River, and Wills and Killbuck creeks, drain it. *Surface*, generally hilly; *soil*, good. (*Coshoc'tou*. Pop. in 1890, 26,703.

—A manuf. town, cap. of Coshoc'tou co., on the Muskingum river, 75 m. N.E. of Columbus. The trading center of rich agricultural district. Pop. (1897) about 4,750.

Cosignina, in Central America, a volcanic mountain in Nicaragua, abt. 80 m. S.E. of Guatemala; Lat. 13° Lon. 87° 30' W. The last great eruption was in 1831.

Cosihuiriachi, a town of Mexico, prov. Chihuahua; pop. 3,500.

Cosily, *adv.* See *COZILY*.

Cosinage, (*hüz-in-é*), *n.* [*O. Fr.*] (*Law*) Consanguinity; kindred or relationship by blood; consanguinity.

Cos'ine, *n.* [*Lat. con*, and *sinus*. See *SINE*.] (*Geom.*) The sine of the complement of an arc or angle.

Cos'tin, or *KOSLIN*, a Prussian town, prov. Pomerania, on the Niesenbecke, about 4 m. from where it falls into the lagoon Jamund, which communicates with the Baltic; pop. 13,575.

Cosman'thus, *n.* [*Gr. kosmos*, elegance, and *anthos*, flower.] (*Bot.*) A gen. of plants, ord. *Hydrophyllaceæ*. They are American herbs, with alternate leaves; stems long, bractless; flowers small, white or pale. The Miami-Mist, *C. purshii*, found in fields and river bottoms, is a plant 8 to 12 inches high, slender, and slender branches; flowers light blue, in May.

Cosmetic, (*kos-met'ik*), *n.* [*Fr. cosmétique*; *Gr. kosmeo*, I adorn.] (*Hygiene*) A preparation applied externally for the purpose of preserving the bloom and beauty of youth; or for restoring those attractions when lost, in the process of decay. From the time of Medea, when she restored the bent and wrinkled form of Jason's father to the lithe figure and lustrous beauty of his early youth, all nations have more or less dabbled in the art of revivifying age and retaining the freshness of youth; but that they have never succeeded is proved by the success that still marks the practice; for, as the articles used for the purpose are derived from the mineral kingdom, the baneful consequences that follow their use become a punishment to the ignorant vanity of those who adopt them. Among the most used are lead, mercury, bismuth, antimony, arsenic. *Pearl powder*, that compound which acts on the complexion to give a beautiful white, and ladies of fashion use so extensively to give a beautiful complexion to the neck and face, is prepared with bismuth powder, or white oxide, and French chalk, a small amount of carmine to counteract its whiteness; it is usually put on as a liquid composition the lady has to sit for some time before her complexion is dry enough to permit the after-touches of rouge and other pigments, to intensify the eyelashes and lips. From the absorbing and exhaling properties of the skin, the extreme danger of thus blocking up the pores, the most sensitive part of the body's surface will be evident to all. For not only is all *sensible* and *insensible* perspiration prevented, but when the body becomes overheated, the absorbents take up the mineral from the cuticle, carry it to the system, where it is certain, sooner or later, to show its influence on the nervous organs.

by a partial paralysis of the eyelids, or the corner of the mouth. Nor is this the only danger. The skin is made coarse and wrinkled by fine lines, soon loses all its natural smoothness, and the lady is at length compelled to paint by day as well as by night, to enable her to meet the public gaze. A little of this injurious effect may be prevented by first covering the face and breast with lard or cold cream, when, after having filled up all the pores by this means, and wiped the skin, the wash of pearl powder may be painted in. There are certain strong odors and gases which the painted lady must carefully avoid coming in contact with, or she may discover her pearly bloom in a few seconds converted into a leaden mask or a negro's darkness. Sulphuretted hydrogen, or sulphur in any form, or the eating or the smell of onions, are two of the causes which produce this effect. Nearly all the washes used so frequently, under the names of *Kalydor*, *Circassian Cream*, *Milk of Roses*, &c., and which are, though injurious, the least hurtful of cosmetics, are generally prepared by beating down bitter almonds with rose- or elder-flower water, and adding from 1 to 2 grains of corrosive sublimate to each ounce of liquid, — sweet almonds, Castile soap, and spermaceti being mere *addenda*; — almond oil, caustic potash, essential oil of almonds as a perfume, and water, being by some used to make a cosmetic cream. Elder-flower water is among the most serviceable of all the washes for the face, and when used to remove freckles, with 1 grain of corrosive sublimate added to each four ounces, a lotion of considerable utility is produced, which may be employed 2 or 3 times a day with good results. Those ladies, however, who wish to preserve their good looks the longest, will trust rather to a happy, cheerful mind, a little constitutional aperient, the use of the bath, and simple elder-flower water as a lotion for the face, than resort to the deadly properties of such mineral cosmetics, as those already enumerated.

a. Adorning or beautifying; improving beauty, particularly the beauty of the skin: as, "*Cosmetic powders*."

cosmetology, *n.* [Gr. *kosmeo*, to adorn, and *logos*, a discourse.] A treatise on the dress, and cleanliness of the body.

cosmic, **Cos'mical**, *a.* [Gr. *kosmikos*, from *kosmos*, the world, the universe.] Relating to the world, or to the whole frame of the universe.

(*Astron.*) A word used in ancient astronomy to denote a particular position of a planet or star, at its rising or setting, in respect to the sun. A star is said to rise *cosmically*, when it rises at the same instant that the sun rises; and to set *cosmically*, when it sets with the sun. *Cosmical* is opposed to *acronycal*, which signifies that a star rises at the instant the sun sets, and vice versa. The cosmical and acronycal risings of a star are invisible to the naked eye, because the light of the sun in the horizon effaces that of the star.

cosmically, *adv.* With the sun at rising and setting.

cosmo I. II. III., *Dukes of Florence.* See **MEDICI**.

cosmogonal, **Cosmogon'ic**, **Cosmogon'i-cal**, *a.* Relating to cosmogony.

cosmogonist, *n.* One versed in cosmogony.

cosmogony, *n.* [Gr. *kosmogonia* — *kosmos*, and *go-nē*, generation.] The generation, origin, or creation of the world or universe.

(*Philos.*) If we accept the *C.* of the Hindoos, the earliest extant is that of Hesiod, which is delivered in hexameter verse. The first prose cosmogonies were those of the early Ionic philosophers, of whom Thales, Anaximenes, Anaximander, and Anaxagoras are the most celebrated. We do not include in this list the researches of modern geologists, or the systems to which they have led. They may be said to hold the same place in relation to the old cosmogonists, which the astronomer or the chemist occupies in reference to the astrologers and alchemists of ancient times. The different theories which have been formed to account for the origin of the world may be comprehended under 3 classes: 1st. Those which suppose the world to have existed from eternity under its actual form. Aristotle embraced this doctrine, and conceiving the existing universe to be the eternal effect of an eternal cause, maintained that not only the heavens and the earth, but all animate and inanimate beings are without beginning. 2d. Those which consider the matter of the universe eternal, but not its form. This was the philosophical system of Leucippus, Democritus, Epicurus, and indeed most of the ancient philosophers and poets, who imagined the world either to be produced by the fortuitous concourse of atoms existing from all eternity, or to have sprung out of the chaotic form which preceded its present state. 3d. Those which ascribe both matter and its form to the direct agency of a spiritual cause.

cosmographer, *n.* One who is versed in cosmography; a cosmogonist.

cosmograph'ic, **Cosmograph'ical**, *a.* Pertaining to cosmography.

cosmograph'ically, *adv.* In a cosmographic manner.

cosmography, *n.* [Gr. *kosmographia* — *kosmos*, and *grapō*, to describe.] A description of the system of the material world or universe in general; therefore comprehending astronomy, geography, and geology. — *C.* has been embodied as a science by Baron Humboldt in his celebrated work entitled *Cosmos*.

cosmolatry, *n.* [Gr. *kosmos*, the universe, and *latreia*, to worship.] World-worship practised by the ancients.

cosmological, (*koz-mo-loj'e-kl*), *a.* Pertaining to cosmology.

cosmologist, *n.* One versed in cosmology.

cosmology, *n.* [Gr. *kosmologia* — *kosmos*, and *logos*, doctrine.] The doctrine of the world or universe, or a

treatise on its structure, motions, and constituent parts; — distinguished from *cosmogony*, which relates to the formation of the universe; and from *cosmology*, which treats of the actual and permanent state of the earth as it is.

Cosmom'etry, *n.* [Gr. *kosmos*, and *metron*, measure.]

Art of measuring the sphere of the universe by degrees.

Cosmoplas'tic, *a.* [Gr. *kosmos*, and *plastikos*, from *plasso*, to mould or form.] World-forming; pertaining to the formation of the world.

Cosmop'olis, in *Washington*, a post-village of Chehalis co., about 10 m. W. of Montesano.

Cosmopol'itan, **Cosmop'olite**, *n.* [Fr. *cosmopolitain*; Gr. *kosmos*, and *polites*, a citizen, from *polis*, a city.] A citizen of the world; one who is at home in every place; a person without a fixed residence.

Cosmopol'itarianism, *n.* [Fr. *cosmopolitisme*.] Citizenship of the world; cosmopolitanism.

Cosmopolit'ical, *a.* Possessing the character of a cosmopolite.

Cosmopolitism, *n.* Character or quality of being cosmopolitan; without regard to fixed ideas or local prejudices.

Cosmora'ma, *n.* [Gr. *kosmos*, and *horama*, a view, from *horaō*, to see.] A picturesque exhibition, consisting of a number of drawings, generally about eight or ten, which are laid horizontally around a semi-circular table, and reflected by mirrors placed opposite to them diagonally. The spectator views them through a convex lens placed immediately in front of each mirror. The pictures are illuminated by lamp-light; but the lamps are so placed that they cannot be reflected by the mirrors, and are therefore invisible to the spectator.

Cosmoram'ie, *a.* Relating, or pertaining, to a cosmorama.

Cos'mos, *n.* [Gr. *kosmos*, order.] The universe: — so called from its perfect order and arrangement. — The doctrine of the universe; COSMOGRAPHY, *q. v.*

Cos'mosphere, *n.* [Gr. *kosmos*, and *sphaira*, sphere.] A contrivance for defining the earth's position in relation to the fixed stars.

Cosmothet'ic, *a.* [Gr. *kosmos*, and *tithenai*, to place in order.] (*Metaphys.*) Assuming the actual reality of the physical world; as, a *cosmothetic* idealist.

Cosne, (*kōn*), a town of France, dep. Nièvre, on the Loire, 27 m. N. N. W. of Nevers; *pop.* 6,575.

Co'so, in *California*, a mining-district of Tulare co.

Coss, *n.* In Hindostan, a land-measure approximating to 1¼ Eng. miles.

Cossacks, (*kos'saks*), *n. pl.* [Russ. *Kosak*.] A people inhabiting those parts of the Russian empire which border on the N. dominions of Turkey, Poland, and the S. confines of Siberia. Both the name and origin of this people are involved in great uncertainty. They seem to have nothing Russian in their origin and character, and are probably a mixed Caucasian and Tartar race. They form a sort of independent republic, paying no taxes to Russia, but cheerfully contributing their numerous and valuable contingent of troops; and are well known as the most harassing light-horse that ever exercised a predatory warfare in the train of any army. It is estimated they can supply Russia, in time of war, with a force of about 100,000 men. Their dress is a short vest in the Polish style, large trousers of a deep blue color, and a black sheepskin cap. Their arms consist of a sabre, long spear, musket, a pair of pistols, and a long whip, which they apply to their enemy as well as to their charger's back.

Fig. 700. — COSSACK OF THE DON.

They are mostly members of the Russian Greek Church, and are described as a hospitable, generous, and disinterested people. Their settlements in European Russia are calculated to occupy an area of 100,000 sq. m. Their numbers have not been estimated for nearly a century, when they amounted to 955,228 males. This is exclusive of the Ukraine Cossacks, who are mostly settled. The others comprised in this estimate are the Don Cos-

sacks, the Black Sea Cossacks, the Asovien and the Ural Cossacks. They form a military cordon of the empire of the Czar, extending from the Black Sea nearly to the Sea of Okhotsk.

Cos'sart, *n.* See **COSSET**.

Cos'sas, *n. pl.* (*Com.*) Plain India muslins.

Cos'satot, or **COSSETOSE CREEK**, in *Arkansas*, rises in Polk co., and joins Little River in Sevier co.

Cos'sé-Brissac', CHARLES DE, (*kos-sai' bree's'sak*), a celebrated marshal of France, b. 1505. He successively commanded the French army in Flanders and Piedmont, under Francis I., Henri II., and Charles IX.; and acquired so high a reputation that nobles and princes came to him to learn the art of war. D. 1564.

Cosseir, **KOSSAIR**, or **KOSIR**, (*kos-sair'*), a sea-port town of Upper Egypt, on the W. shore of the Red Sea, 93 m. E. by S. of Ghennéh, or Kenné, and 102 m. E. N. E. of Thebes; Lat. 26° 6' 59" N., Lon. 34° 23' E. A caravan road leads from Ghennéh to Cosseir, which is the centre for all the traffic between the upper valley of the Nile and the Arabian ports. *Pop.* Estimated at from 15,000 to 20,000.

Cossen'za. See **COSENZA**.

Cos'set, **Cos'sart**, *n.* A lamb brought up without the dam.

—A pet; a lambkin. (*Colloquial.*)

—*r. a.* To pet; to fondle; to make much of.

Cossimbazar, (*kos'sim-ba-zar*), a town of Hindostan, prov. Bengal, dist. Moorsshedabad, and abt. 1 m. S. of that city, of which it is the port, on the Bhajirathi, or Hooghly River; Lat. 24° 10' N., Lon. 88° 15' E. This town is noted for its cotton stockings, which are wire-knitted, and esteemed the best in Bengal. *Pop.* 4,000.

Cos'sus, *n.* (*Zoöl.*) A genus of nocturnal lepidoptera, family *Bombycidae*, the larvae of which feed on wood. They have the wings long, thickly veined, and the antennae with a double row of short teeth along the under side. The locust-tree Carpenter-moth, *C. robinia*, an American species, expands abt. 3 inches, the color gray, the fore-wings thickly covered with dusky, netted lines and irregular spots. The caterpillar bores the locust-tree and the red-oak. The Goat-moth, *C. ligniperda*, one of the largest European species, resembles the above species. It chiefly feeds upon willows and poplars.

Cost, *v. a.* (*pret.* and *imp. cost*.) [Ger. and Du. *kosten*; Lat. *consto*; It. *costare*; O. Fr. *couster*.] To be bought for; to be had at the price of; to be required to be laid out, given, bestowed, or employed; as, good living *costs* money.

"My lord, I am for you, though it cost me ten nights' watching." *Shaks.*

—To require to be borne or suffered; as, it *costs* one many a pang.

"Perhaps, 'twill cost a sigh, a tear." — *Barbauld.*

To *cost* one dear. To involve a heavy outlay of time or trouble.

—*n.* [Ger. *kosten*; Dan. and Swed. *kost*; O. Fr. *coust*. See the verb.] That which a thing stands one in; that which is paid or charged for anything; the price, value, or equivalent of a thing purchased; charge; expense; expenditure; as, the *cost* of a journey.

"And wilt thou . . . put poor nature to such cost?" — *Crashaw.*

—Luxury; sumptuousness; extravagance; as, a thing of *cost*.

"The city woman bears

The cost of princes on unworthy shoulders." — *Shaks.*

—Loss; pain; suffering; detriment; as, to know trouble to one's *cost*.

—*pl.* (*Law.*) The expenses to which parties are put in the prosecution and defending of actions. Costs are to be considered either as between attorney and client, *i. e.*, the expenses and fees which the attorney is entitled to recover from his client; or as between party and party, *i. e.*, that portion of the expenses to which a successful party has been put in his suit, which he is entitled, in certain cases, to recover from the unsuccessful one.

Cost'a, *n.*; *pl.* **COSTÆ**. [Lat., a rib.] (*Anat.*) A RIB, *q. v.*

(*Bot.*) The term was formerly confined to that bundle of vessels which passes directly from the base to the apex of a leaf; but which is better extended to all the main veins which proceed directly from the base to the apex, or to the points of the lobes.

(*Zoöl.*) *C.*, or **COSTALIS**. The cell or nervure nearest the upper margin of each wing in insects.

Cost'a, SIR MICHAEL, a musical composer, b. in Naples, 1810. After having produced his opera of *Mulrina* in the San Carlos theatre, he went to England, and has since lived in London, where he has been successively conductor of Her Majesty's Theatre, and of the Royal Italian Opera. His principal works are, besides the above, the operas of *Malek Adel* and *Don Carlos*; and the oratorios *Eli* and *Naaman*. *C.* was knighted by Queen Victoria in 1868. D. 1884.

Cost'al, *a.* [Fr., from Lat. *costa*, a rib.] Pertaining to the side of the body, or the ribs; or to the costa in the wings of insects.

Cost'amboul, or **COSTAMANI**, a town of Asiatic Turkey, cap. of a pashalic in Natolia, 235 m. E. of Constantinople. Its trade is inconsiderable.

Cost'ard, *n.* [A corruption of **CUSTARD**, *q. v.*] The head; — used in a contemptuous sense.

"Take him over the *costard* with the belt of thy sword." — *Shaks.*

—A large, round apple.

Cost'ard-monger, **Costermonger**, (*kos'tr-mung'r*), *n.* A seller of apples; — applied generally to itinerant venders of fruits, vegetables, &c.; as, to bawl like a *costermonger*.

Costa Rica, (*kos'ta re'ka*), the most southern State of Central America, bounded on the N.E. by the Gulf of Mexico, S.W. by the Pacific Ocean, N.W. by Nicaragua,

and S.W. by the Repub. of Colombia; area, 21,495 sq. m. Lat. between 8° and 10° 40' N., Lon. between 83° and 85° W. The surface is mountainous and volcanic, with extensive forests, although many parts present large barren tracts. The principal products are coffee, tobacco, cocoa, sarsaparilla, wild indigo, and dye-woods. C. R. forms an independent republic, with a President and single legislative chamber. San José, the capital, is situated among the mountains, midway between the Pacific Ocean and Caribbean Sea. Exports chiefly coffee. Pop. (1897) about 292,700.

Cos'tate, Cos'tated, a. [Lat. *costa*.] Having ribs, or the appearance of ribs.

(Bot.) A term applied, either to indicate the presence of but one rib, as in most leaves; or in speaking of cases where three or more ribs proceed from the base to the apex of a leaf, and are connected by cross veins. The latter are frequently called nerves, or nervures. If a leaf has its ribs all distinct from the very base, it is called *tricostate*, *quincostate*, and so on; but if the ribs are united at the base in a distinct manner, the term becomes *triplicostate*, *quintuplicostate*, &c.

Cos'tean, n. i. (Cornish.) To seek for a lode of tin.

Cos'tean Pits, n. pl. (Mining.) In Cornwall, Eng., shallow pits sunk to trace or find tin.

Cos'teaning, n. (Mining.) The process of discovering lodes of tin by sinking shafts in their vicinity, and drawing transversely to their supposed direction.

Costel'late, a. Costated.

Cos'ter, n. An abbreviated form of *COSTER-MONGER, q. v.*

Cos'ter, LAURENS JANSZON, B. at Haarlem, abt. 1370, and said, by the Dutch, to have invented the art of printing previous to Gutenberg. His countrymen make of this question of priority one of national importance, and besides previous solemnities in honor of C., his bronze statue by Royer, was erected in Haarlem, in 1866.

Cost-free, adv. or a. Free of cost or charge; as, to live cost-free.

Cost'rigon, in Kentucky, a former post-office of Bath co.

Costil'la, in Colorado, a S. co.; area, abt. 4,800 sq. m. The main chain of the Rocky Mountains bounds it on the E., as partly does the Rio Grande del Norte on the W. The Rio Costilla intersects it; cap. San Luis; pop. in 1890, 3,500.

Costil'la, in Colorado, a post-office of Costilla co.

Cos'tive, a. [From It. *costipato*, *costipare*; Lat. *constipō*, *constipatus* — *con* and *stipo*, to cram or stuff.] Bound in the body or bowels; constipated; as, a *costive* habit of body.

—Close; reserved; impermeable.

"Faster than his *costive* brain indites,
Philo's quick hand in flowing letters writes." — *Prior*.

Cos'tively, adv. With costiveness.

Cos'tiveness, n. State of being costive; obstruction of the bowels; constipation.

Cost'less, a. Without cost; costing nothing.

Cost'liness, n. State of being costly or expensive; expensiveness; great cost or expense; sumptuousness; extravagance; as, *costliness* of apparel.

Cost'ly, a. Of a high price; expensive; valuable; precious; dear; sumptuous.

"Costly thy habit as thy purse can buy." — *Shaks.*

Cost'mary, n. [Gr. *kostos*; Lat. *costum*, an aromatic plant, and *Maria*, i. e. the Virgin Mary.] (Bot.) A species of tansy dedicated to the Virgin; ale-cost.

Costume, (kos'tüm, n.) [O. Fr. *costume*, from L. Lat. *constum*, same signification as L. Lat. *consuetudo*.] An established mode of dress, particularly that which is appropriate to a given age, place, person, &c.; as, a fancy *costume*. See *DRESS*.

—The term applied to the accessory belongings of a play, poem, picture, &c., in harmony with time, place, and circumstance; as, *stage-costume*.

Costum'er, Costum'ier, n. [Fr. *costumier*; this rendering of the word is now very generally adopted.] One who deals in and provides costumes, &c., for a theatre, private theatricals, fancy balls, &c.

Co-sufferer, n. A fellow-sufferer; one who suffers in conjunction with another.

Cosum'ne, or COSUMNES, in California, a township of El Dorado co.

—A flourishing post-village and township of Sacramento county.

Co-supreme, n. A sharer of supremacy with another.

Co-sure'ty, n. A joint surety; one who is surety with another.

Co'sy, a. See *Cozy*.

Cot, Cote, n. [A. S. *cota*, *cyta*; Du. *kot*, a cottage; Icel. *kot*. Probably the common origin is the Ger. *kutten*, to dig, to excavate; W. *cwt*. In old times, among northern European nations, dwellings were excavated underground.] A small house; a cottage; a hut; a hovel; a shed or inclosure for horses and cattle; as, a *dove-cote*.

"Mine be a *cot* beside the hill." — *Rogers*

—A small rude kind of boat, resembling a *dug-out*

—A cosset; a lambkin. (Used in some parts of England.)

—A sheath or cover for a burnt or lacerated finger.

—An abbreviated form of *cot-queen*, (*q. v.*)

Cot, Cott, n. [O. Fr. *coele*, *coite*; probably allied to Gr. *koi-tē*, a couch or bed.] A small bed, a bed for infants or young children; as, a baby's *cot*

(Naut.) A kind of suspended hammock, serving as a bed, on board ships.

"Chips, the carpenter's mate, lay drunk in his *cot*." — *Marryatt*.

Cotabam'bas, in Peru, a province of the department of Cuzco, lying between the Apurimac and Pachachaca, and traversed by the Oropesa. It is 75 m. in length, by about 50 in breadth. Surface mountainous. Pop. 25,000.

Cotabulate, v. a. See *COTABULATE*.

Cotagay'ta, (Santia'go de,) a town of Bolivia,

dep. of Potosi, on the river Cotagayta, 15 m. S.S.E. of Potosi city.

Co-tan'gent, n. (Geom.) The tangent of any complementary arch, or what the arch wants of a quadrant, or 90 degrees.

Cote, n. See *Cot*.

Coteau des Prairies, an elevated region separating the basin of the Mississippi from that of the Missouri. Commencing about Lat. 46° N., it extends S.S.E. 200 m. between Lon. 98° and 99° W.

Coteau du Lac, in Lower Canada, a village of Vaudreuil co., on the St. Lawrence River; pop. about 400.

Coteau St. Augustin, and Coteau St. Pierre, in Canada.

Cote Blanche Bay, in Louisiana, in the S.W. border of St. Mary's parish.

Cote des Neiges, in Lower Canada, a vill. of Hochelaga co., 2½ m. W. of Montreal.

Cote Gelée, in Louisiana, a post-office of Lafayette co.

Cotempor'neous, a. [Lat. *contemporaneus* — *con*, and *tempus*, *temporis*, time.] Living or being at the same time with another or others; contemporaneous.

Cotempor'neously, adv. At the same time with some other event, contemporaneously.

Cotemporary, n. [Fr. *contemporain* — *con*, and *temporaire*; Lat. *temporarius*, from *tempus*, *temporis*, time.] Living or being at the same time with another; contemporary.

—*n.* One who lives at the same time with another; a contemporary.

Cot-en'ant, n. A joint tenant; a tenant in common.

Côte d'Or, (kō'te-dor,) an E. dep. of France, formed of part of the old province of Burgundy, in Lat. 46° 55'—48° 10' N., Lon. 4° 2'—5° 30' E. — Area, 3,350 sq. m. The surface is in general rather elevated, and is traversed by a chain of hills forming the connecting-link between the Cevennes and the Vosges. A portion of that range, called the *Côte d'Or* (golden slope), receives its name on account of the excellence of the wines produced on its declivities. A great part of the dep. is covered with forests. The valleys and plains are fertile, and there is good pasture-land; but the vine culture is by far the most important branch of industry. To this dep. belong the first class wines of *Clos Vougeot*, *Romanée*, *Chambertin*, *Corton*, *Richebourg*, *Voulay*, *Pomard*, *Beaune*, *Montrachet*, and *Meursault*. C. is watered by the Seine, which rises in the N.W., and by several of its affluents; by the Saone, and by Arroux, a tributary of the Loire. The climate is temperate; iron, coal, marble, gypsum, and lithographic stones are found, the first in large quantities. C. is divided into 4 arrondissements, viz., Beaune, Châtillon-sur-Seine, Dijon, and Semur, with Dijon for its capital. Pop. 382,762.

Cotentin, (ko'ten'tā,) a district of France, in the old prov. of Normandy. It forms a peninsula, stretching into the English Channel, in the dep. of Manche, and having, at its extremity, Cape La Hague.

Coterie, (ko'te-rē, n.) [Fr., a company of villagers holding a fief under one lord, from Lat. *cotarius*, from *cota*, a cottage.] A circle of familiar friends; a meeting for social or literary intercourse; an exclusive society; a clique; a political party; as, a *coterie* of strong-minded women.

Coter'minons, a. Conterminous; approximating to; adjacent; — preceding *with*; as, one county is *coterminous* with another.

Côtes du Nord, (kō'te-doo-nor,) a maritime dep. of France, forming part of the prov. of Bretagne, and bounded N. by the English Channel, in which are several small islands belonging to C.; Lat. 48° 3'—48° 57' N., Lon. 1° 53'—3° 35' W. Area, 2,840 sq. m. The Armorik Hills, called also the Montagnes Noires, and the Menez Mountains, cross the dep. from E. to W. They have a breadth of about sixteen miles, and consist chiefly of granite and clay slate. These formations give a rude and broken aspect to the coasts. The chief rivers, which are short but navigable, are the Rance, Gouet, Trioux, Guer, and Arguenon. The cultivation of flax and hemp, with pasturage and iron-mining, supply employment in the mountainous districts; while in the sheltered valleys and on the coast-levels all European kinds of grain, with pears and apples and other fruits, are produced; and maize is cultivated, but does not always ripen. The coasts are well supplied with various kinds of fish. The dep. is divided into the 5 arrond. of St. Briec, Dinan, Loudéac, Lannion, and Guingamp. The chief town is St. Briec. Pop. 641,210.

Côte sans Dessein, in Missouri, a village of Calaway co., on the Missouri river, about 12 m. E. N. E. of Jefferson City.

Côte St. André, (an-drai,) a town of France, dep. Isère, 20 m. from Vienne. In its neighborhood is produced the celebrated liquor called *Eaux de la côte*. Pop. 4,847.

Cot'gare, n. Refuse wool, hemp, or flax.

Cot'hurn, n. [Lat. *cothurnus*.] (Antiq.) The high buskin worn by tragic actors to increase their apparent height; thence used, metaphorically, by ancient writers to signify the tragic art.

Cot'hurn'ate, Cot'hurn'ated, a. Donning a cothurn; hence, having relation to tragedy.

Cotie'nlar, a. [Lat. *coticula*, from *cos*, *cotis*, a whetstone.] Pertaining to whetstones; like, or suitable for, whetstones.

Co-tid'al, a. [Con, and *tidal*, from *tide*.] Marking places where the tide, or high water, takes place at the same time; as, *co-tidal* lines.

Cotill', in Louisiana, a post-office of Rapides co.

Cotillon, (sometimes wrongly written COTILLION,) (*ko-tel'yun, n.* [Fr., from *cotte*, a petticoat.] (*Dancing*.) A brisk French dance performed by 8 persons together; the predecessor of the modern quadrille.

"My lady went through the *cotillon* with true grace, and the air noble." — *Sir C. Hanbury Williams*.

—The music for the above dance.

Cotindi'ba, or COTINGUIBA, a river in Brazil. It rises in the N. side of Mount Itabaiana, flows E. and enters the Atlantic Ocean 18 m. N.N.E. of Sergipe del Rey.

Cotise', n. [Fr. *coté*, side.] (*Her.*) A diminutive of the *bend*, being one-half the width of the bendlet; generally borne in couples, with a bend or charges between them.

A bend, fess, &c., between two cotises, is termed *cotised*.

Cot'land, n. (Law.) Land appendant to a cottage.

Cot'octon Furnace, in Maryland, a post-office of Frederick co.

Cotopaxi, (ko'to-paks'e,) in Ecuador, a volcano, in the E. Cordillera of the Andes, 34 m. S.S.E. of Quito; Lat. 0° 41' S., Lon. 78° 42' W. It is conical in shape and rises to a height of 18,875 ft. above the level of the sea, or 9,800 ft. above the table-land of Quito. The upper part, a perfect cone of 4,400 feet in height, is entirely covered with snow, excepting that the immediate verge of the crater looks more like a bare parapet of rock. Humboldt, who attempted to ascend the mountain in 1802, found great difficulty in reaching even the snowy zone, and pronounced the top itself to be absolutely inaccessible. In 1738, the flames were known to rise 3,000 feet. On June 26, 1877, an eruption took place, causing great loss of life and property, the latter, for miles beyond the base of this volcano. It was ascended by Whymper in 1880, who gives its elevation as 19,600 ft.

Cot'quean, n. [Probably from Fr. *coquin*.] A man who busies himself in women's affairs; a meddler.

Cotrone, (anc. Crotona,) a seaport town of S. Italy, 6 m. N. of Cape Nau; Lat. 39° 7' N., Lon. 17° 10' E. Its inhabitants were celebrated for athletic exercises, and Milo was its most renowned athlete. C. is strongly fortified. Pop. 5,000.

Co-trustee, n. A joint trustee.

Cots'wold, n. A sheep-cote in a champaign country.

Cots'wold Hills, a tract of about 200,000 acres of hilly country in England, dividing the basins of the Thames and Severn. This is good grazing land, and gave its name to the celebrated breed of sheep known as the *Cotswold*.

Cot'ta, n. (Cm.) In India, a cowrie measure, embracing 12,000 cowries.

Cotta, the name of an old German publishing-house established at Tübingen in 1649, and still one of the most flourishing in Germany. The most prominent member was *Joh. Friedr. Freiherr von C.*, b. 1764. In 1798, he established the *Allgemeine Zeitung*, a periodical still published at Augsburg, and from that time published the works of the most illustrious modern authors of Germany. D. 1832.—G. A. COTTA D. at Stuttgart, 1876.

Cottage, (kot'taj, n.) [O. Fr. *cotage*; L. Lat. *cotagium*, rural tenement; A. S. *cota*, a cote.] A cot; a hut; small habitation for the poorer classes of persons.

—A small, but neat and tasteful, house, detached from other buildings. In this modern sense, the term is loosely applied to a great variety of buildings, from the ornamental C. of the English to the Swiss chalet; as, *cottage ornée*.

Cottage, in Iowa, a post-office of Hardin co.

Cottage, in New York, a post-office of Cattaraugus co.

Cottage, in Pennsylvania, a P. O. of Huntingdon co.

Cot'taged, a. Covered with cottages; as, a *cottage hamlet*.

Cottage Grove, in California, a post-office of Siskiyou co.

Cottage Grove, in Illinois, a P. O. of Douglas co.

Cottage Grove, in Indiana, a P. O. of Union co.

Cottage Grove, in Minnesota, a township of Washtington co.

Cottage Grove, in Minnesota, a post-village of Washtington co., in Cottage Grove township.

Cottage Grove, in Oregon, a post-office of Lane co.

Cottage Grove, in Wisconsin, a post-village and township of Dane co.

Cottage Hill, in Illinois, a post-village of Putnam co.

Cottage Hill, in Iowa, a post-office of Dubuque co.

Cottage Hill, in Ohio, a post-office of Muskingum co.

Cottage Home, in N. C., a former P. O. of Lincoln co.

Cottage Inn, in Wis., a former P. O. of Lafayette co.

Cottage Mill, in Georgia, a P. O. of Chattahoochee co.

Cot'tager, n. One who lives in a hut or cottage.

"Let us from our country farms
Call forth our cottagers to arms." — *Swift*.

Cot'tageville, in W. Virginia, a P. O. of Jackson co.

Cott'bus, [Ger. Kottbus.] A town of Prussia, prov. Brandenburg, on the Spree, 42 m. S. by W. of Frankfurt-

Fig. 701

A BRETON FARMER. (France.)

he-Oder. *Manf.* Woolen and linen stuffs, and stockings. Pop. (1897) 36,750.

Cotter, Cottier, Cottier', n. A cottager; one who inhabits a hut, cabin, or cottage; as, an Irish *cotter*.

Cotter, n. A piece of wood or iron used as a wedge or chocking or fastening the parts of a piece of mechanism; as, the *cotter* of a window-pin.

Cotise, n. [From Lat. *costa*.] (Her.) See *COTISE*.

Cottleville, n. In Missouri, a post-office of St. Charles co.

Cotton, (kŏ'tŏn, n. [Fr. *coton*; It. *cotone*; Ar. *kŏtn*, *kŏm*; Hind. *gŏŏn*, *ruhi*; Ger. *baumwolle*; Du. *katoen*, *comwol*; Sp. *algodon*; Por. *algodas*; Swed. *bomull*; Russ. *chlobschataja bumaja*; Pol. *bawełna*; Sansk. *kapa*; Malay. *kapas*; Lat. *gossypium*.] (Bot.) The hair-bearing seeds in all the species of the genus *Gossypium*, or cotton-plant, order *Malvaceæ*. These hairs upon the seeds, and the occurrence of three leafy bracts, united at their base outside the flower, constitute the distinctive characters of the genus. From the importance of *C.* as a raw material, the genus *Gossypium* must be regarded as one of the most valuable to man in the whole vegetable kingdom. There appear to be four distinct species. Many other so-called species have been described, but they are probably mere varieties. The first *C.* fabrics were manufactured from the hairs of the species *G. herbaceum* (see fig. 188), the common cotton-plant of India. The stems are less woody than in other species; hence its specific name, which signifies herbaceous. It is a pretty plant, and rises from 18 inches to 2 feet in height during the first year of growth. It is usually cut down annually; but if allowed to grow, it will attain a height of 5 or 6 feet, and its branches will come rather woody. All the younger parts of the stem are covered with short hairs, and marked with black spots. The flowers are bright yellow, each petal marked with a purple spot near the base. The flower is succeeded by a fruit, which gradually becomes green, and then bursts into 3 or 4 valves, when the cotton-wool is seen issuing from it in all directions. This is the *Surat C.* of commerce. The *C.* is generally white; but much of that produced in China is of the yellow or gray color, peculiar to the fabric called "Nankeen."

C. arboreum, the tree-cotton, is another Indian species. It, unlike the last, it assumes the aspect and dimensions of a small tree, from 15 to 20 feet in height. The leaves are of a bright-red color. The *C.* hairs are remarkably soft and silky, and are woven by the natives into a very fine muslin, used for turbans by the privileged religious classes only. *G. barbadense* is the species which yields all our best *C.* It is called the *Bar-*

baobes, or *Bour-*

C., but does not appear to have been originally a native of the New World. It is a perennial plant, and has a shrubby stem, from 15 to 20 feet in height. The leaves are yellow, like those of *G. herbaceum*, and have a dark spot at the base of each petal. The fruit is capsular, and opens in its interior from 8 to 12 black seeds, which, on being freed from the cotton-wool, are found to be destitute of down, unlike those of the preceding species, which are covered with firmly adhering short hairs. The plant was introduced into Georgia from the Bahama Islands, where it had been grown from seed landed in the West Indies. In the small American islands which fringe the coast of Georgia, this plant has replaced the celebrated *Sea-Island C.*, which is unrivaled for the length of its staple, its strength, and its fineness. This variety is restricted to the islands and narrow belt of mainland on the immediate coast of the Atlantic, extending from the Great Pedee River, in Virginia, to Cape Canaveral, in Florida. The same plant, when cultivated in the cooler and drier climates of the hill-country of Georgia, is inferior in quality, and shorter in staple. This fact shows how great is the influence of external circumstances on the growth of the cotton-plant. The species *G. peruvianum*, or *acuminatum*, is supposed to be indigenous to America. Like the *Bourbaobes C.*, it has black seeds and yellow flowers. The seeds adhere together, however, in a peculiar way, forming a kidney-shaped mass. This plant furnishes the American varieties of *C.*, as *Peruvianum*, *Peru-*

Maranham, and *Brazilian*. After the *Sea-Island* cotton, these *S. American C.* obtain the highest price in the market. *C.* is now extensively cultivated in Egypt, in S. Africa, in India, and in Australia; but it is long before the supplies from these parts can compete with those from the U. States. If examined under the microscope, the *C.*-hair will be found to consist of two delicate transparent tubes, the twisted round the other. If, however, the hair is examined in its young state, it will be found to be an unrolled cylindrical tube. Its changed appearance when it reaches its maturity can be accounted for by

the circumstances under which it is developed. As the seeds and hairs grow, the capsules do not appear to expand with equal rapidity; and, consequently, the hair is exposed to pressure on all sides. The result of this is, that the hair collapses in the middle, leaving a hair-formed tube on each side. These uncollapsed portions of the hair give it the appearance of a flat ribbon, with a hem or border at each edge. The hair does not, however, grow out straight, but, coming in contact with other hairs and the sides of the capsular fruit, it becomes twisted. This twisting is undoubtedly the great fact that makes the *C.*-hair of value to man. There are many hairs, such as those of the *cotton-grass* and the *Bombax*, which are as long and apparently as strong as those of the *C.*, but which, falling in this irregularity of surface, are utterly incapable of being twisted into a thread or yarn. The twisting gives the *C.*-hair the power of uniting with its fellows, and forming with them a cord strong enough to be woven.

Production. Columbus found the cotton-plant growing wild in Hispaniola, and later explorers recognized it as far N. as the country bordering the *Mischicchebe*, or Mississippi. In the U. States, cotton-seeds were first planted, as an experiment in 1621, (*Purchas's Pilgrims*), and in a paper of the date of 1666, preserved in Carroll's *Historical Collections of S. Carolina*, the growth of the cotton-plant is noticed in the province of Carolina. It was, however, little known except as a garden-plant, until after the Revolutionary war. The first successful crop in S. Carolina was that of W. Elliott, in 1790. His success caused many to engage in the cultivation of *C.*, and some of the largest fortunes in S. Carolina were thus accumulated. But the region adapted to the production of the sea-island *C.* was limited, and the amount of 8,000,000 lbs. raised in 1805 was not exceeded by the subsequent crops. The culture of the other varieties, distinguished by the green instead of the black seed of the sea-island, was rapidly extended from the last years of the 18th century throughout the Southern States.

Production of Cotton in the U. S. for 1895:

The *C.* crop of the U. S. has risen from 1,038,848 bales in 1830, to 9,476,435 in 1895, the largest annual crop yet produced in this country. The *C.* crop of 1896 was 8,250,710 bales. During the Civil War the manufacturing countries of Europe suffered severely, as is well known, from the almost absolute stoppage of their usual *C.* supplies from the U. S.; and, in this emergency, turned their attention towards encouraging the growth of the staple in other countries, as Brazil, Venezuela, Egypt, India, &c. This experiment was attended with successful results, in so far as concerned the obtaining of a sufficient quantity of the article to keep the spinners going; but it was also found that the *C.* of the countries named, being of short staple, and of inferior quality, generally, to the American, could not compete with the long-stapled varieties grown in this country—more especially the "sea-islands," which always carry the top prices in foreign markets. The qualities from the above-mentioned countries were found to run pretty much as follows:—Egyptian, *good, fair to middling*; Brazilian, *good; middling—fair to middling*; Venezuelan, *middling; middling fair to poor*; East India (*Surat*), *barely middling; poor, often dirty*. It was at one time anticipated that negro emancipation in the Southern States would seriously, if not disastrously, check the future growth of the staple in that section. This, however, did not prove to be the case. The industrial system of the South had been thoroughly disorganized by the war, but it soon began to recover, the cultivation of *C.* was actively resumed, and as early as 1869 the crop approximated the heavy yields of the years immediately preceding the war, while the fibre was of excellent quality. As a result, American cotton recovered its former status in European markets, while the price steadily declined, reaching the average price of 1860 (12½ cents) in 1870, in which year the crop of 1860 (4,824,000 bales) was almost reached. It was first exceeded in 1879 (5,073,000 bales). In subsequent years the price continued to decline, this being due largely to reduced cost of production, lower land and ocean freights, and the doing away with unnecessary middling. In 1883 the crop reached nearly 7,000,000 bales; in 1888, it slightly exceeded 7,000,000 bales; in 1892 it reached 9,038,707 bales, and in 1895 the maximum, as given in the above table.

(Cultivation.) The upland varieties have been cultivated nearly as far N. as Lat. 49°, but only under favorable circumstances. Cotton-patches are to be seen in S. Illinois and S. Missouri, where the plant is grown for domestic use; and in many families the hand-loom is

yet in vogue. "As a great commercial staple, however, its culture embraces a belt of country 100 m. or more in width—underlaid by the Cretaceous formation—which starts near the N. line of the State of Mississippi, and, sweeping round the base of the Alleghenies through Alabama, Georgia, S. Carolina, and N. Carolina, extends as far N. as Raleigh, and even Richmond, Va. The S. limit of this belt is where it comes in contact with the region of 'Pine-Barrens,' whose soil consists of Pliocene-Tertiary sands. Its culture extends up the Mississippi Valley to Memphis, and up the lower valleys of the White, Arkansas, and Red rivers. The cotton soils are of moderate fertility, and when stripped of timber, are exceedingly liable to wash into gullies and ravines. After a few croppings, they are very difficult to renovate, since they do not admit of a rotation of crops. The climate is unfit for the growth of the nutritious grasses, and hence, where the ground lies fallow for a few years to recover its productive powers, it ceases to be profitable. The grasses which spring up are coarse, and afford little nutriment to cattle. The forage of the planter is derived from corn-stalks, cut before maturity; and hence, throughout the region, we find no herds of cattle or swine; nor can any course of industry render stock-raising profitable." (Mr. Foster's *Mississippi Valley*.) Cotton, when raised within the frost-line, must always be planted, if possible, after the last frost in spring, as it is more easily killed by cold than any other plant; and when once bitten by frost it cannot recover, like corn, but must be re-planted. Before planting, the ground must be broken deeply and thoroughly. This should be done in February or March, for plantations in the Carolinas, Georgia, Alabama, Tennessee, or Arkansas; in January, for plantations in Florida, Mississippi, Louisiana, or Texas. We can, of course, only generalize in an article so brief as this must be; but it will be readily seen, by any one possessed of only a little knowledge of geography, that S. Georgia and S. Alabama have seasons like those of S. Mississippi, Louisiana, Texas, &c. The next step in the process, after having broken the ground well, and permitted it to lie thus for a few weeks, is to "bed up" the ground, as the planters phrase it, for putting in the seed. The rows are laid off from 3 to 4 feet apart in the thinner lands, from three to seven feet in the rich lands of Louisiana and Texas—with a narrow-bladed plough—generally with a scooter. The fertilizer is now dropped in this furrow, and a ridge, or bed, made upon it with a turning-plough. One furrow on each side of the fertilized ridge is sufficient. Now the preparation for planting has been handsomely made; the next, and last step in the process is to open the ridge with a scooter, drop in the seeds, and cover them. The covering is rapidly and well effected by a board screwed to the helve of a scooter. The board should be long enough to extend across the cotton-row, and have a scoop, or groove, cut in the centre of it, corresponding to the width of the furrow in which the seeds have been dropped. The seeds should be rubbed or rolled in wet ashes just previous to planting, to destroy the adhesion of the cotton fibres that will remain with the seeds of upland *C.* after the very best ginning now known to planters. The *Sea-Island C.*, or, as it is often called, "black-seed," and "long-staple," may be dropped without this rolling in ashes; as, when it is ginned, or picked from the seeds by hand, very little lint is left on the seeds. After it shall have sprung from the ground to the height of at least two inches, it is "chopped out" with a hoe. Two or three stalks are all that should be left in one spot to grow; and these spots, or hills, should be 8 to 15 inches apart, according to the strength of the soil. Of course the grass, the great enemy of all plants, and specially of *C.*, must be cut out when this chopping is performed. In 8 to 10 days after the chopping the plant must be hoed, or have dirt thrown gently around the tender stalk, with a small plough. In two weeks more the *C.* should be again ploughed, and carefully cleaned of all grass by a hoe-hand. In 2 to 3 weeks more another ploughing must be given, and you have little else to do with it save to keep the grass out, specially now from the middles; for if weeds and grass grow there, they will give to the pickers a very troublesome crop of seeds and dry leaves in the fall and winter. *C.* must not be ploughed when the ground is very wet.—The *picking* is generally done by hand, and should be commenced in July or August, as soon as the matured *C.* is well open. One hand can pick from 100 to 200, and even 300 lbs. per day, under very favorable circumstances. Cotton-picking machines have been devised for expediting this important branch of *C.* culture, but as yet the hand is the only cotton-picker that gives satisfactory results. The *C.* first picked, before the autumnal rains have dirtied it, or the October frosts turned it yellow, is the best; and must be ginned and packed by itself, to command the best price in market. If the "storm cotton" or the frosted cotton be mixed with it, the price of the whole lot will be depreciated in consequence.—After having been picked *C.* is spread out and dried, and then separated from the seeds. The latter process was formerly performed by hand—a tedious operation, by which one hand could clean only a pound or so a day;—but since the invention of the saw-gin by Eli Whitney, in 1793, the process of cleaning has been both rapid and effectual. This machine is composed of a hopper, having one side formed of strong parallel wires, placed so close together as to exclude the passage of the seeds from within. The wool is dragged through the apertures by means of circular saws attached to a large roller and made to revolve between the wires, the seeds sinking to the bottom of the hopper. This process is adopted only in cleaning the short-sta-

Fig. 702. — BARBADOES COTTON.

(*Gossypium barbadense*.)

(See also fig. 188.)

the plant was introduced into Georgia from the Bahama Islands, where it had been grown from seed landed in the West Indies. In the small American islands which fringe the coast of Georgia, this plant has replaced the celebrated *Sea-Island C.*, which is unrivaled for the length of its staple, its strength, and its fineness. This variety is restricted to the islands and narrow belt of mainland on the immediate coast of the Atlantic, extending from the Great Pedee River, in Virginia, to Cape Canaveral, in Florida. The same plant, when cultivated in the cooler and drier climates of the hill-country of Georgia, is inferior in quality, and shorter in staple. This fact shows how great is the influence of external circumstances on the growth of the cotton-plant. The species *G. peruvianum*, or *acuminatum*, is supposed to be indigenous to America. Like the *Bourbaobes C.*, it has black seeds and yellow flowers. The seeds adhere together, however, in a peculiar way, forming a kidney-shaped mass. This plant furnishes the American varieties of *C.*, as *Peruvianum*, *Peru-*

pled varieties of American *C.*, the seeds of which adhere so firmly to the wool as to require a considerable amount of force to separate them. The Sea-Island variety is cleaned by being passed through two small rollers, which revolve in opposite directions, and easily throw off the hard, smooth seeds. In India, though the saw-gin has been introduced in some districts, the wool is mostly cleaned by means of the primitive roller. Both descriptions of gins are used in Egypt and the Brazils. The *C.* cleaned by the roller-gin, being uninjured thereby in staple, realizes the better price; but the deterioration caused by the saw-gin is compensated for by the greatly increased quantity cleaned; the latter turning out four or five times as much work as the former, in an equal space of time, and thereby considerably reducing the expense of cleaning. — After the worms (see *Noctuidæ*), which destroy the pod, or the cotton-plant itself, and against which we have, as yet, no means of defence, the chief enemy of *C.* is *rust*. Against this something can be done. "The cause of rust," says Mr. D. Dickson, of Hancock county, Georgia, in a valuable article published in the *Southern Cultivator*, "is plainly marked, and the indications readily understood. There is a weed, (I call it *rust-weed*), that marks all land that will rust *C.* This weed is now green, (Feb. 8th,) but in a few weeks it will be very rusty. Lands that will certainly rust *C.* are such as are not properly drained; low, sandy lands; land under bluffs, that is sandy, and inclined to be springy; poor land that is sandy and porous, having the clay a good way below the surface, and also resting on pipe-clay; and sandy land that gets grassy in July to September. Rust is caused also by very heavy rains; by guano alone, which causes a very heavy crop of bolls; and, lastly, by poverty and bad work. The remedy is: To drain the land well; rest it, to accumulate humus; haul red-clay on the sandy land; plough deep, and subsoil before planting. The land should be well mixed throughout with clay and vegetable mould, at least 9 inches deep. The best manure to prevent rust, is 200 lbs. of dissolved bones, 100 lbs. Peruvian guano, 200 to 300 lbs. of salt, and 100 lbs. of land-plaster (plaster of Paris), per acre. The above remedies will return one hundred per cent. interest to the owner. All lands may be made good cotton-lands by the use of the spade, clay-humus (or vegetable matter), and the above manures. Lands that will produce 100 lbs. of lint *C.* without manure, if level, are worth \$10 per acre; and level land that will produce 400 lbs. of lint *C.* per acre, with manure, is worth \$100 per acre. Here is a margin of \$90 to pay for improving an acre of land. It can be done, and 50 per cent. made on the manures purchased every year; always returning the cotton-seed back to the land, when in *C.*, or its share of stable-manure, when in corn."

Cotton Manufacture. This important branch of textile fabrics has its origin in India and China, in which countries it was known and operated in many centuries before being understood by the moderns. Among ancient writers Herodotus is the first who mentions this staple; called by him *tree-wool*. Both the Greeks and Romans imported their raw material from India. About the 10th century, this manufacture was introduced by the Moors into Spain, where its products flourished principally in the form of coarse cloths, canvas, &c. In Italy, cotton fabrics began to be manipulated at about much the same period. The Netherlands was the next country to adopt the art, which from thence was transplanted into England by the Protestant refugees from Flanders, after the capture of Antwerp by the Duke of Parma in 1585. In 1641, Manchester is recorded as receiving cotton-wool from Smyrna and Cyprus, and manufacturing it into various stuffs. In 1670 all colonial cotton was ordered to be sent to England for manufacture, and in 1760 the annual value of the trade was estimated at only \$1,000,000. From the first introduction of the *C. M.* into Great Britain down to 1773, the *weft* or transverse threads of the web only, were of cotton; the *warp*, or longitudinal threads, consisting wholly of linen yarn. In the first stage of the manufacture the weavers, dispersed in cottages throughout the country, furnished themselves as well as they could with the warp and weft for their webs, and carried them to market when they were finished; but the impossibility of making any considerable division among the different branches of a manufacture so conducted, or of prosecuting them on a large scale, added to the interruption given to the proper business of the weavers by the necessity of attending to the cultivation of the patches of ground which they generally occupied, opposed great obstacles to its progress. In 1767, however, James Hargreaves (*q. v.*) invented the *spinning-jenny*. At first this admirable machine enabled 16 to 30 threads to be spun with the same facility as 1; and it was subsequently brought to such perfection, that a little girl was enabled to work no fewer than from 80 to 120 spindles. The jenny was applicable only to the spinning of cotton for weft, being unable to give to the yarn that degree of firmness and hardness which is required for the longitudinal threads or warp; but this deficiency was soon after supplied by the introduction of the *spinning-frame* (1769-1775)—that wonderful piece of machinery which spins a vast number of threads of any degree of fineness and hardness, leaving to man merely to feed the machine with cotton, and to join the threads when they happen to break. It is not difficult to understand the principle on which this machine is constructed, and the mode of its operation. It consists of two pairs of rollers, turned by means of machinery. The lower roller of each pair is furrowed or fluted longitudinally, and the upper one is covered with leather, to make them take a hold of the cotton. If there were only one pair of rollers, it is clear that a card-

ing of cotton passed between would be drawn forward by the revolution of the rollers, but it would merely undergo a certain degree of compression from their action. No sooner, however, has the carding, or *roving* as it is technically termed, begun to pass through the first pair of rollers, than it is received by the second pair, which are made to revolve with (as the case may be) 3, 4, or 5 times the velocity of the first pair. By this admirable contrivance the roving is drawn out into a thread of the desired degree of tenuity; a twist being given to it by the adaptation of the spindle and fly of the common flax-wheel to the machinery. Sir Richard Arkwright (*q. v.*) gave his machine the name of the *water-frame*; but it has since become better known as the *spinning-frame*. Nearly at the same time that the spinning department was thus wonderfully improved, Dr. Cartwright, a clergyman of Kent, invented the *power-loom* (in 1787), a machine which has already gone far to supersede weaving by the hand. While these extraordinary inventions were being made, Watt was perfecting the steam-engine, and was thus not only supplying the manufacturers with a new power applicable to every purpose, and easy of control, but with one that might be placed in the most convenient situations, and in the midst of a population trained to industrious habits. Still something remained to complete this astonishing career of discovery. Without a vastly increased supply of the raw material at a lower price than it had previously brought, the inventions of Hargreaves, Arkwright, and Watt would have been of comparatively little value. Luckily, what they did for the manufacturers, Mr. Eli Whitney, originally of Massachusetts, and afterwards a citizen of New Haven, Connecticut, did for the American cotton-growers. He invented a machine by which cotton-wool is separated from the seed with the utmost facility and expedition. Previously to 1790 the U. States did not export a single pound-weight of raw cotton. In 1792 they exported the trifling quantity of 138,328 lbs. Whitney's invention came into operation in 1793; and in 1794, 1,601,760 lbs., and in 1795, 5,276,306 lbs. were exported. And so astonishing has been the growth of cotton in the interval, that in 1895 the exports from the United States alone amounted to the prodigious quantity of 2,983,622,000 lbs. The first machines set up in the U. States were at East Bridgewater, Mass., in 1786, by two Scotchmen, employed by Mr. Orr of that place. The manufacture, however, languished for want of competent machinery until 1790, when a person named Slater, who had been employed in the English cotton-mills in Derbyshire, and had there acquired a knowledge of the Arkwright processes, established himself, in conjunction with partners, at Providence, R. I. In 1806, Slater's brother came over from England, and joined him; when they at once started business at the village of Slater'sville in the same State, and gave an extraordinary impetus to the manufacture, which, by 1816, had increased to the consumption of about 100,000 bales of the raw article, turning out 81,000,000 yards of cloth, employing 100,000 operatives, and engaging a working capital of \$40,000,000. The invention of the power-loom, in England, still, however, checked the progress of the American manufacture, by enabling the former country to import into the U. States vast importations of the fabricated article at a far lower rate of productive cost than could be attained to by American spinners. The first cotton-mill on the power-loom principle was established at Lowell, Mass., in 1822; the nucleus of a system of manufacturing operations, which, even in 1852, had accumulated to 51 mills, giving employment to 12,633 hands. The manufacture of cotton goods is no longer confined to the New England and Middle States; for in the Southern States the manuf. as well as the growth of *C.* has become an industry of vast importance, and is fast assuming still greater proportions. In Georgia, especially, rapid progress has been made in *C.* manufacture. In 1860 there were in the U. S. 126,313 looms and 5,235,727 spindles, employing 122,028; and in 1880, 230,223 looms and 10,921,147 spindles, employing 181,628 hands. According to the Census of 1890, we had 324,866 looms and 14,188,903 spindles, employing 221,585 hands. Our exports of manufactured *C.* for the year 1896 were valued at \$16,837,396, while those of manufactured *C.* amounted to \$190,056,460. The ordinary process of cotton manufacture is as follows:—The raw material, when it arrives at the cotton-mill, is first taken to the mixing-room. The contents of each bag are spread out in a horizontal layer of uniform thickness, the contents of the several bags forming separate layers. The heap is then trampled or pressed together. The cotton of which this *bing*, as it is called, is composed is then torn down by a rake from top to bottom, and a portion of each layer is thus obtained. If the layers consist of different qualities of cotton, a uniform mixture is thus obtained. The quantity raked down is then conveyed to the *scutching* or *willowing machine*, where it is dragged through two rollers, transferred to two beaters, which thresh out all sand, seeds, and other impurities; after which it is passed through two more rollers and a second set of beaters. The cleansed cotton is then passed through the *spreading-machine*, and afterwards wound in a fleecy state upon a large wooden roller. In this state it is conveyed to the *carding-machine* (*q. v.*), where it is drawn out into parallel layers. Each of these layers is made to undergo compression in its way to a roller, from which it is given off in the form of a thick, soft thread, into a tin can. This thread is called a *sliver*. The next stage is termed *drawing*, and the machine employed is called a *drawing-frame*. The sliver is passed through the drawing-frame, which completes the process begun by the carding-machine, the fibres of the cotton being arranged longitudinally in a uniform and parallel direction. This drawing operation is repeated several

times, in order to correct all inequalities. The next process is *roving*,—a continuation of the drawing. cord, which is now called a *rove*, being much thinner has a slight twist given to it by passing through a which is made to revolve with great velocity while ceiving it. It is then wound upon bobbins, and is re for the spinning-frame. As the spinning and weav of cotton differ very slightly from that of silk, li woollen, &c., they will be found described under the cles SPINNING and WEAVING.

Cot'ton, v. i. To show a nap like cloth.

—A cant colloquialism in the sense to adhere; to ass late; to attach; preceding to or with; as, to cotton a rich maiden aunt.

Cot'tonade, n. (*Manuf.*) A fabric made of cotton and used as cloth for men's dress; as, trousers of *cottonade*.

Cot'ton-broker, n. (*Com.*) One who sells cotton on commission; a factor engaged in the cotton-trade. (*land.*)

Cot'ton-gin, n. An apparatus for cleansing plant cotton.

Cotton Gin, in Texas, a P. O. of Freestone co.

Cotton Gin Port, in Mississippi, a former post-office of Monroe co.

Cot'ton-grass, n. (*Bot.*) See ERIOPHORUM.

Cotton Grove, in Iowa, a former P. O. of Henry co.

Cotton Grove, in Tenn., a former P. O. of Madison co.

Cotton-gum, n. See PYROXYLINE.

Cotton Hill, in Illinois, a township of Sangamon co.

Cotton Hill, in Georgia, a township and village of Clay co.

Cotton Hill, in Georgia, a former P. O. of Randolph co.

Cotton Hill, in W. Virginia, a P. O. of Fayette co.

Cotton-manufacture. See COTTON.

Cottonoe'raey, n. [*Cotton*, and Gr. *kratein*, to land, an appellation bestowed on cotton-spinners generic class of society.

Cot'tonous, a. Like cotton; partaking of the nature of cotton.

Cotton-pick'ings, n. pl. (*Com.*) Loose cotton picked from broken bales.

Cot'ton-plant, n. (*Bot.*) See COTTON.

Cotton Plant, in Arkansas, a post-township of Crawford co.

Cotton Plant, in Florida, a P. O. of Marion co.

Cotton Plant, in Mississippi, a P. O. of Tippah co.

Cotton-press, n. A machine employed in the compression of cotton into bales.

Cotton-rose, n. (*Bot.*) See FILAGO.

Cotton Ridge, in Miss., a former P. O. of Itawamba co.

Cotton Seed Oil. See COTTON SEED.

Cot'ton-shrub, n. Same as cotton-plant. See COTTON-PLANT.

Cot'ton-spinner, n. One engaged in the spinning of cotton by machinery, into textile fabrics.

Cotton-spinning, n. (*Manuf.*) Art of spinning cotton by machinery. See COTTON-MANUFACTURE and SPINNING.

Cot'ton-thistle, n. (*Bot.*) See ONOPORDUM.

Cotton-velvet, n. Velvet manufactured of silk and cotton mixed, or entirely of cotton.

Cottonville, in Alabama, a post-village of Marshall co.

Cottonville, in Iowa, a post-village of Jackson co.

Cotton-waste, n. (*Com.*) Refuse cotton-wool.

Cot'ton-weed, n. (*Bot.*) See GUAPHALUM.

Cot'ton-wood, n. (*Bot.*) See POPULUS.

Cottonwood, in California, a post-village of Shasta co.

—A post-village and township of Tehama co.

—A township of Yolo co.

—A township of Siskiyou co.

Cottonwood, in Illinois, a township of Cumberland co.

—A post-office of Gallatin co.

Cottonwood, in Kansas, a township and p. v. of Anderson co. Magnesian limestone quarries exist here.

Cottonwood, in Minnesota, a S. W. co.; area, 720 sq. m. It is intersected by the Little Cottonwood and Watonwan rivers, and by the W. Fork of the Des Moines. Surface, undulating; soil, fertile (1890) 7,353.

—A township of Brown co.

Cottonwood Creek, in California, traverses Shasta co., and enters the Sacramento river about 20 m. from Shasta city.

Cottonwood Falls, in Kansas, a post-village of Chase co., 22 m. W. of Emporia.

Cottonwood Grove, in Ill., a former p. o. of Boone co.

Cottonwood Point, in Missouri, a post-office of Pemiscot co.

Cottonwood River, in Kansas, rises in Marietta co., traverses Chase co., and joins the Neosho river in Johnson co. Length about 100 m.

Cottonwood, or Big Cottonwood River, in Minnesota, rises in the S. W. part, flows E., and empties into the Minnesota river in Browne co.

Cottonwood Springs, in Nebraska, a former post-office of Lincoln co.

Cot'ton-wool, n. Raw cotton.

Cotton-worm, n. (*Zoöl.*) See NOCTUIDÆ.

Cot'tony, a. Soft like cotton.—Downy; covered with hairs or pubescence, like cotton.

Cot'trel, n. A contrivance to hang a pot over a fire.

Cottrelville, in Michigan, a township and village of St. Clair co.

Cot'nit, in Massachusetts, a post-village of Barnstable co., 68 m. S. E. of Boston.

Cotnit Port, in Massachusetts, a post-village and port of Barnstable township, Barnstable co., 70 m. S. E. of Boston.

otus, *n.* [Gr. *kotta*, a head.] (Zool.) A genus of acanthopterygious fishes, family *Triglidae*, including marine species, having spines upon each of the opercular bones, and the head armed with bones. The father-lasher, *C. bubalis*, found on the coasts of Greenland, is about 1 foot long, and immediately recognized by its large and formidable head, armed with long spines, by means of which it immediately combats every enemy that attacks it, inflating its cheeks and gill-covers to a prodigious size.

Fig. 703. — FATHER-LASHER.
(*Cottus bubalis*.)

turnix, *n.* [Lat., a quail.] (Zool.) A genus of birds of the Grouse family.

tuy, or **Cotul**, a town in the island of Hayti; pop. 600.

Ct'yla, **Cot'yle**, *n.* [Gr. *kotula*.] (Anat.) The vitæ of a bone, receiving the head of another, as the socket of the hip-bone.

Cotyledon, (*ko-tel'dun*), *n.* [Gr. *kotylêdon*, from *koty-*, a cup or hollow vessel.] (Bot.) The seminal leaf of a plant. This organ forms a part of the embryo, and nourishes the plumule and radicle at their first period of development, before they are able to subsist upon the ganizable matter absorbed by the latter from the earth. Exogenous plants have generally two cotyledons. Endogenous plants generally one only; but there are exceptions in both cases. The latter class of plants seldom elevate their cotyledon above ground, and never invert it into a green leaf-like body, but usually leave behind them within the integuments of the seed; the former frequently raise their cotyledons above the soil, the form of small green leaves, as in the garden radish; but there are very numerous exceptions to this, as the pea, the oak, the chestnut, &c.

(Anat.) The lobes which, by their union, form the venta. — The term is also applied, in comparative anatomy, to the tube-shaped vascular productions of the orion, in Ruminants, serving the office of the placenta.

Cotyledon, *n.* (Bot.) The *Navelwort*, a gen. of plants, *Crassulaceæ*. The European species, *C. umbilicus*, of late years been frequently employed as a remedy in epilepsy.

Cotyledonal, *a.* Formed like a cotyledon.

Cotyledonous, *a.* Pertaining to cotyledons; having seed-lobe.

Cotyledones, (*ko-tel'e-dones*), *n. pl.* (Bot.) A name sometimes applied to the sub-kingdom *Phanerogamia*, flowering plants. See ACOTYLEDONES, and BOTANY.

Cyliform, [Gr. *kotylê*, a cup, and Lat. *forma*, form.] (Physiol.) A term used in describing the general form of organs to denote a rotate figure with erect limbs.

Cyligerosus, *a.* Possessing cotyles.

Cyloid, *a.* [Gr. *kotylê*, and *eidô*, form.] Cup-shaped. (Anat.) Applied to the hemispherical cavity, situate at the os innominatum, which receives the head of the femoris.

Cyto, **COTYS**, (*ko-tit'to*). (Myth.) The goddess of all chancery, whose festivals were celebrated by the ancients during the night.

Cag'ga, *n.* [Fr.] (Zool.) See QUAGGA.

Couch, *v. a.* [Fr. *coucher*; It. *colcare*, from Lat. *collocare* — *com*, and *loco*, to lay.] To bed; to place upon a bed, or as upon a bed.

Where unbraid'd youth, with unstuff'd brain,
Doth couch his limbs, there golden sleep doth reign." — *Shaks.*

— hide or lay close; to conceal; to express obscurity in; receding under.

"Naturally couch'd under this allegory." — *L'Estrange*.

— compose to rest; — preceding the reflexive pronoun.

— express or comprehend; to phrase; as, a letter couch'd in fitting terms.

"Couch'd in the dead letters of their name." — *Dryden*.

(Surg.) To depress a cataract, or that condensed crystalline film which overspreads the pupil of the eye.

"Couches the cataracts, and clears his sight." — *Dennis*.

— fix a lance or spear in the rest, in an attitude of attack.

"The knight 'gan fairly couch his steady spear." — *Spenser*.

— To lie down, as on a bed or place of repose.

"When love's fair goddess,
Couch'd with her husband in his golden bed." — *Dryden*.

— recline on the knees, in an attitude of rest.

"Fierce tigers couch'd around." — *Dryden*.

— lie close or concealed; to lie in ambush.

The Earl of Angus couch'd in a furrow, and was passed over
his head." — *Hayward*.

— to stoop; to bend down; to make a reverential obeisance.

"These couchings, and these lowly courtesies." — *Shaks.*

— lie in a bed, or stratum.

"And for the deep that coucheth beneath." — *Deut. xxxiii.*

— Fr. *couche*.] A bed; a place for rest or sleep; a seat of repose for rest and ease; an ottoman; a divan.

"Couch around his couch, and soften his repose." — *Addison*.

(Brewing.) A layer or stratum of barley for malting.

— the floor of a malting-house.

(Painting, &c.) A coating of size or some adhesive substance on wood, plaster, canvas, &c.

Couchancy, *n.* State of reclining or lying down for repose.

Couchant, *a.* [Fr.] Lying down; squatting.

"Changes oft his couchant watch." — *Milton*.

(Her.) Applied to a beast lying down, with his head up; as, a "lion couchant." (Fig. 704.) — If the head is down, he is *dormant*.

Couchee, (*koo'shê*), *n.* Bed-time; — hence a reception held in bed; — opposed to *levee*.

"Levees and couchees pass'd without resort." — *Dryden*.

Couch'er, *n.* [Fr. *coucheur*.] (Surg.) One who couches for cataract in the eye.

Couch-fellow, *n.* A bed-fellow; a room-companion.

Fig. 704.
LION COUCHANT.
(Heraldry.)

Couch's Gap, in Tennessee, a village of Greene co.

Couch-grass, *n.* (Bot.) See TRITICUM.

Couch'ing, *n.* (Agric.) The clearing of land from Couch grass, which is effected by first pulverizing it; and then, in very dry weather, collecting the couch by harrows, or by a horse-rake, such as that used for collecting stubble, and which so applied is called a *couch-rake*.

(Surg.) One of the operations to restore vision in cases of cataract. It consists in depressing the opaque lens, so as to remove it out of the axis of vision; — called also DEPRESSION.

Couch'less, *a.* Without a couch or bed.

Couch'ville, in Tennessee, a P. O. of Davidson co.

Coucy, **Couci**, (*koo'sê*), the name of a French family, who were very powerful in the N. of France, chiefly from the 12th till the end of the 14th centuries.

Cou'cy, **RENAUD DE**, a French minstrel of the 13th, or end of the 12th century. The best edition of the *Chansons du Châtelain de C.* was edited by F. Michel, Paris, 1830.

Coude'ac, or **PETICODIAC**, a river of New Brunswick, flowing into Shepody Bay; length, about 60 m.

Cou'dee, *n.* [Fr.] An old measure of length; a cubit.

Coudersport, or **COWDERSPORT**, in Pennsylvania, a borough, cap. of Potter co., on the Alleghany River, 174 m. N.N.W. of Harrisburg.

Cou'dres, in Lower Canada, an island in the River St. Lawrence, 55 m. N.E. of Quebec; pop. about 400.

Cou'gar, *n.* (Zool.) See PANTHER.

Cough, (*kof*), *n.* [Du. *kuch*, named from the sound.]

(Med.) A spasmodic effort of nature, by a convulsive action of the lungs, to relieve that organ of some load or oppression hurtful to the due performance of its function, whether from the exudation of some tenacious mucus or phlegm, or from blood or pus effused on its surface or into its cells. *C.* most frequently occurs as a symptom of some disease or affection: as, influenza; catarrh, or cold; bronchitis, acute and chronic; whooping-*C.*; phthisis. With elderly persons *C.* sometimes becomes permanent throughout the winter months of every year. In general, *C.* must be treated according to the nature of the disease that has called it forth, and also according to the character of the expectoration.

— *v. t.* [Ger. *keuchen*.] To make a violent pectoral effort with noise; to expel the air from the lungs, and throw off any vitiating or offensive matter.

"I cough like Horace, and tho' lean, am short." — *Pope*.

— *v. a.* To expel from the lungs by a violent effort with noise; to expectorate; — generally preceding up.

"Matter . . . cough'd up, and spit out by the mouth." — *Wise-man*.

Cough'er, (*kof'r*), *n.* One who coughs.

Cou'rage, *n.* (Bot.) See COWHAGE.

Could, (*kud*), *imp. of can*. [A. S. *cuthe*, was able, pret. of *cunnan*, to be able.] Had sufficient physical or moral power or capacity.

"What if he did not all the ill he could?" — *Dryden*.

Couleur de rose, (*kool'or-da-rôs*). [Fr., rose-color.] An attractive light or aspect; fair appearance; — used adverbially; as, "to see things couleur de rose."

Coulisse, (*kool'is*), *n.* [Fr.] A piece of timber having grooves in it; also, a piece of wood to hold the flood-gate in a sluice.

— The space between the side-scenes of the stage in a theatre; as, the *coulisses* of the opera.

Coulomb, **CHARLES AUGUSTIN DE**, a French mathematician, b. at Angoulême, 1736. He is regarded as the founder of experimental physics in France, and is the inventor of the torsion balance. There are few to whom the theory of electricity is so much indebted as to this philosopher. D. 1806.

Coul'ter, *n.* Same as COLTER. (*q. v.*)

Coul'ter-ueh, *n.* (Zool.) A name given to the puffin, from the shape of its beak.

Coulter's Cross Roads, in Pennsylvania, a village of Lancaster co.

Coul'tersville, in Illinois, a post-office of Randolph co.

Coul'tersville, in Pennsylvania, a post-village of Allegheny county.

Coul'tersville, in California, a village of Mariposa co., about 21 m. N.W. of Mariposa. The name of the post-office is Maxwell's Creek. Pop., including Chinese, about 500.

Commari'ic Acid, *n.* (Chem.) See COUMARINE.

Commariue, (*ko'mâ-rin*), *n.* (Chem.) An odoriferous crystalline principle, found largely in the Tonka or Tonquin bean (see DIPTERYX), the common melilot, and in the sweet-scented vernal grass. It is to this odoriferous principle that the pleasant scent of new-mown hay is due; and by combining the essential oil of Tonka-beans with other scents, perfumers are accustomed to imitate with great accuracy the odor of a field of new-mown hay. It is easily extracted from the Tonka-bean by digesting the powdered seeds in alcohol. On evaporating the alcoholic solution, crystals of *C.* are obtained, which may be decolorized by digestion with animal charcoal

and subsequent recrystallization. It melts at 122°, boils at 518°, at which temperature it may be distilled unaltered. Its vapor has an agreeable aromatic odor. It has a burning taste, and is but slightly soluble in cold water; warm water dissolves it readily, depositing it in silky crystals as the solution cools. It forms several substitution compounds with chlorine, iodine, bromine, and nitrous acid. A most irregular and somewhat anomalous compound is formed by its union with teroxide of antimony. On treating it with perchloride of antimony dissolved in hydrochloric acid, a compound is formed having a composition indicating the union of an atom of *C.* with an atom of teroxide of antimony. Boiled with a solution of potash, *C.* assimilates the elements of water, and becomes transformed into *coumaric acid*, which unites with the potash. Coumaric acid is obtained in brilliant transparent plates by decomposing a solution of coumarate of potash with hydrochloric acid.

Coun'cil, *n.* [Fr. *conseil*; Lat. *consilium*, from *con-*, to bring or assemble together — *con*, and *seil*, to move, to put in motion.] An assembly of men met for consultation, deliberation, and advice; a body of men specially designated to advise a sovereign or chief magistrate in the administration of the government; as, COUNCIL OF STATE, *q. v.*

Ecol. An assembly of prelates and other spiritual persons for the regulation of ecclesiastical matters. Such councils are either national or oecumenical; the latter being those in which the whole body of the clergy throughout the world is represented, and are convened for the settling of points of universal interest. The Roman Catholics hold that the decisions of oecumenic or general councils are infallible, and for the most part allow their superiority to the popes themselves. See OECUMENICAL COUNCIL.

(Mil.) A *C. of war* is an assembly of military officers convened to discuss matters pertaining to the conduct of military operations.

Coun'cil Bluffs, in Iowa, a city, the cap. of Pottawattomie co., on the Missouri river, opposite Omaha, about 500 m. N.W. from St. Louis. It received its name from a council held there with the Indians by Lewis and Clark in 1804. It is an important manufacturing centre, a principal distributing point for farming implements, trades largely in horses, and is surrounded by an extensive fruit and gardening district. Pop. (1890) 21,475; (1897) about 26,000.

Coun'cil-board, *n.* A council-table; the table round which a council holds consultation. — The council itself.

"A shame to one so much to dote."

For wisdom at Jove's council-board. — *Swift*.

Coun'cil-chamber, *n.* The apartment in which a council meets for business.

Council Grove, in Kansas, a city, cap. of Morris co., about 55 m. S.W. of Topeka. It is one of the oldest towns in the State. So named by Kit Carson, from the grove in which were held councils respecting Indian raids. Pop. (1897) about 2,500.

Coun'cilist, *n.* A person who belongs to a council; a councillor.

Coun'cillor, *n.* The member of a council; as, a privy-counsellor.

Coun'cilman, *n.* A councillor; a member of a municipal council; as, a common-councilman.

Coun'cil-table, *n.* A council-board.

Coun'cil of State, *n.* (French Hist.) A political and judicial body of very indefinite powers in the French monarchy, both before and since the Revolution. As reorganized by Napoleon I., it became the most important body in the state. It now, under the second empire, consists of members of the imperial family, nominated by the crown; a president, vice-president; presidents of sections (which are 6: justice, contentious, home affairs, public works, war, finance); 40 to 50 ordinary, and nearly 40 extraordinary councillors. Its principal duty is to prepare laws, which are afterwards submitted to the chamber of deputies.

Coun'over, in Iowa, a post-office of Winneshiek co.

Coun'sel, *n.* [Fr. *conseil*; Lat. *consilium*, from *consulo*, to consult. See CONSUL.] A considering together; deliberation; advice; consultation; interchange of opinions.

"The best counsel he could give him was, to go to his parliament." — *Lord Clarendon*.

— deliberation; consideration; examination of consequences.

"Counsel is used, reason followed, and a way observed." — *Hooker*.

— Design; plan; purpose; intent; as, moderate counsels.

"The counsel of the Lord standeth for ever." — *Psa. xxxiii. 11*.

— Opinion; advice; instruction.

"There is no wisdom, nor understanding, nor counsel, against the Lord." — *Prov. xxi. 30*.

(Law.) The counsellors who are associated in the management of a particular cause, or who act as legal advisers in reference to any matter requiring legal knowledge and judgment. The term is also used as a singular noun, to designate a counsellor; but, when speaking of one of several counsellors concerned in the management of a cause in court, it is more common to say that he is "of counsel." — *Bourvier*.

To keep one's own counsel. To hold opinions or ideas in a self-reserved state; not to disclose one's thoughts.

— *v. a.* To give counsel or advice, or deliberate opinion to; to exhort, warn, admonish, or instruct.

"Wouldst thou then counsel me to fall in love?" — *Shaks.*

— To advise, urge, or recommend; as, to counsel war.

"His counsel'd crime which brands the Grecian name." — *Dryden*.

Coun'sel-keeper, *n.* One who is able to keep a secret.

Coun'sel-keeping, *a.* Keeping secret within the mind.

Coun'sellor, *n.* [Fr. *conseiller*; Lat. *conciliarius*.] Any person who gives counsel or advice; one authorized to give counsel or advice.

"In multitude of counsellors there is safety."—Prov. xxiv. 6.

—A member of a council; a councillor of state.

(*Law*.) A person retained by a client to plead his cause in a court of judicature; an advocate; a barrister.

"Good counsellors lack no clients."—Shaks.

Coun'sellorship, *n.* The office of a counsellor.

Count, *v. a.* [Fr. *compter*; Sp. and Port. *contar*; It. *contare*, from Lat. *computo*. See COMPUTE.] To compute; to number; to reckon; to calculate; to tell; to rate; to enumerate.

—To place to an account; to esteem; to account; to judge; to consider; to impute.

"You would not wish to count this man a foe."—Philips.

—*v. a.* To found an account or reckoning; to depend; to rely;—with *on* or *upon*; as, to count upon a friend for aid.

"I think it a great error to count upon the genius of a nation, as a standing argument in all ages."—Swift.

—To swell the number; to add to the number.

"And count their chickens ere they're hatched."—Butler.

—*n.* [Fr. *compte*; It. *conto*.] Reckoning; the art of numbering; number.

"By my count,
I was your mother much upon these years."—Shaks.

—Value; esteem; as, a thing of no count.

(*Law*.) The declarations of the complainant in a real action. As *declaration* is applied to personal, so *count* is applied to real causes; and *count* and *declaration* are oftentimes confounded, and made to signify the same thing; so the divisions of, or separate statements or allegations in, a declaration, indictment, or criminal information, are called *counts*.

Count, *n.* [Fr. *comte*, from Lat. *comes*, a companion.] A title of nobility in most of the continental states of Europe, equivalent in rank to the British *earl* and the German *graf*. Under the first two races of the Frank kings, the title of *C.* was given to officers of various degrees, and was at first attached to the office, and not the person; but in the progress of time, when feudalism had introduced inheritance instead of election as a fixed rule in succession, it became subject to the same law as the higher titles of kings and dukes, and conferred hereditary privileges on its possessor. The term *C.* has in most of the states where it is in use degenerated into a mere title, to which no political importance is attached. Though the title of *C.* has never been introduced into England, the wives of earls have from the earliest period of its history been designated as *countesses*.

Countable, *a.* That may be numbered.

Countenance, *n.* [Fr. *countenance*, from *contenir*; Lat. *continentia*, from *contineo*—*con*, and *teneo*, to hold.] The human face; the whole form of the face, or system of features; visage.

"In countenance somewhat doth resemble you."—Shaks.

—Air; look; aspect; appearance of the face.

"An unforgiving eye, and a disinheriting countenance."—Sheridan.

—Favor; good-will; kindness; support; aid; encouragement.

"The magistrates' peculiar province (is) to give countenance to piety and virtue."—Atterbury.

In countenance, with an aspect of assurance.

"It puts the learned in countenance."—Addison.

Out of countenance, not bold or assured; abashed; as, to stare a lady out of countenance.

To keep one's countenance, to preserve an appearance of unruffled composure.

—*v. a.* To favor; to sanction; to aid; to support; to abet; to encourage; to vindicate by any means.

"This national fault of being so very talkative, looks natural... in one that has gray hairs to countenance it."—Addison.

Countenanceer, *n.* One who countenances or supports.

Counter, *n.* [From *count*; Fr. *compter*.] He who, or that which, counts; as, a counter of money.—That which is used as a means of reckoning or counting; anything used to keep an account of reckoning, as in games; an imitation of a piece of money used in games; as, ivory counters.

"These half-pence... are no better than counters."—Swift.

—Money;—used in a contemptuous sense.

"When Marcus Brutus grows so covetous,
To lock such rascal counters from his friends."—Shaks.

—A table or board on which money is counted, or on which goods are laid out for inspection; as, a bank-counter.

—A prison. (A term applied to some prisons in London.) (*Naut.*) That part of a ship between the taffrail and the wing-transom and buttock.

(*Mus.*) See COUNTER-TENOR, CONTRALTO, &c.

(*Furriery*.) That part of the fore-hand of a horse that lies between the shoulders, and under the neck.

—The hind-leather of a boot.

—*a.* [Fr. *contre*; Lat. *contra*.] Contrary; in opposition; contrariwise; as, a counter principle.

—*adv.* Contrary; in opposition; in an opposite direction; contrariwise;—used, commonly, in conjunction with the verbs to run and to go.

"Running counter to all the rules of virtue."—Locke.

—In the wrong way; in a contrary direction to the right course.

"Oh, this is counter, you false Danish dog."—Shaks.

—At, or against, the face; in contradistinction to behind the back; as, a counter throw in wrestling.

"They never throw counter, but at the back of the flyer."—Sandys.

—*v. a.* [See ENCOUNTER.] (*Sports*.) In boxing, to parry or repel a blow.

"Plants a straight-out blow like Mace,
And counters like Tom Sayers."—Boziana.

Counteract, *v. a.* [Counter, and act; Lat. *contra*, and *ago*, *actus*, to act.] To act in opposition to; to encounter with contrary agency; to hinder; to oppose; to withstand; to defeat; to frustrate; to prevent; as, to counteract the effects of drink.

Counteraction, *n.* Action in opposition; hinderance; as, "the counteraction of an animal nature."—Sir W. Hamilton.

Counteractive, *n.* That which tends to counteract.

—*a.* Tending to counteract.

Counteractively, *adv.* In a counteractive manner; by counteraction.

Counter-approach, *n.* (*Fortif.*) A field-work thrown up to impede the enemy's advance.

Counter-attraction, *n.* Opposite attraction; as, avarice is the counter-attraction of wealth.

Counter-attractive, *a.* Attracting in an opposite direction.

Counterbalance, *v. a.* [Fr. *contrebalancer*.] To balance, or weigh against; to weigh against with an equal weight; to act against with equal power and effect; as, to counterbalance an obligation.

"The remaining air was not able to counterbalance the mercurial cylinder."—Boyle.

—*n.* Equal weight, power, and agency; acting in opposition to anything; equivalent counterpoise.

"Money is the counterbalance to all other things purchasable by it."—Locke.

Counterbalanced, *p. a.* Opposed by equal weight, power, or effect.

Counter-battery, *n.* (*Mil.*) A battery placed in such a position as to counteract the fire of an opposing battery.

Counter-bond, *n.* A bond given as a counter-security.

Counterbrace, *v. a.* (*Naut.*) To brace contrariwise; as, to counterbrace the yards.

Counterbuff, *v. a.* To impel in an opposite direction; to cause to drive back.

"The ship... then shoots amain."

Till counterbuff'd she stops, and sleeps again."—Dryden.

—*n.* A blow coming from a contrary direction; a stroke which produces a recoil.

"He, at the second (hour) gave him... a counterbuff."—Sidney.

Counter-caster, *n.* One who exchanges money over a counter; a book-keeper;—used in a contemptuous sense.

"I... must be let and calm'd... by this counter-caster."—Shaks.

Counter-change, *v. a.* To give and receive; to exchange.

Counter-change, *n.* Exchange; reciprocation.

Counter-charge, *n.* [Counter;—Lat. *contra*, and *charge*.] An opposite charge; as, his charge was met by a counter-charge.

Counter-charm, *v. a.* [Lat. *contra*, and Eng. *charm*.] To dissolve the spell of enchantment; to destroy the power of incantation; as, to "counter-charm all our crimes."—Decay of Piety.

—*n.* An opposing charm; that which has the power of dissolving, or opposing the effect of, a charm.

Counter-check, *v. a.* To check in opposition; to oppose or stop by some obstacle; to check.

—*n.* A check, stop, or rebuff.

"If I said his beard was not well cut, he would say I lie; this is called the counter-check quarrelsome."—Shaks.

Counter-chevron, *n.* (*Her.*) A division of the field chevron-wise.

Counter-compony, *n.* (*Her.*) A border compounded of two rows of checkers of different colors.

Counter-courant, *n.* (*Her.*) Two animals running in reversed directions to each other, as borne in some coats-of-arms.

Counter-current, *n.* [Lat. *contra*, and *current*.] A current in an opposite direction.

—*a.* Running in an opposite direction.

Counter-deed, *n.* (*Law*.) A secret writing, either before a notary or under a private seal, which destroys, invalidates, or alters a public one.

Counter-drain, *n.* (*Agric.*) A drain placed on a parallel with a water-course.

Counter-draw, *v. a.* (*imp.* COUNTERDREW; *pp.* COUNTERDRAWN.) To copy, trace, or design by means of oiled paper, or other transparent surface.

Counter-evidence, *n.* [Lat. *contra*, and *evidence*.] Opposite evidence; evidence or testimony which opposes other evidence.

Counterfeisance, *n.* The act of forgery. (*o.*) See COUNTERFEASANCE.

Counterfeit, (*counterfeit*) *v. a.* [Fr. *contrefaire*, *pp.* of *contrefaire*; Lat. *contra*, and *facio*, to make.] To make or force in opposition to the reality, or to that which is original or genuine; as, to counterfeit a show of morality.

"What art thou,

That counterfeits the person of a king."—Shaks.

—To copy; to feign; to imitate; to copy or imitate without authority, and with a view to defraud; as, to counterfeit a signature.

—*a.* Imitated; copied; having a resemblance to.

"To counterfeit, is to put on the likeness and appearance of some excellency."—Tillotson.

—Fabricated without right; made in imitation of something else, with a view to defraud; forged; fictitious;

false; spurious; as, counterfeit coin.—Deceitful; hypocritical; spurious.

—*n.* An impostor; a cheat; a deceitful person; a disssembler; one who pretends to be what he is not.—A copy or imitation intended to be passed off as an original; forgery.

"There would be no counterfeits but for the sake of something real."—Tillotson.

—A likeness; a counterpart; a thing strongly resembling another.

"Shake off this downy sleep, death's counterfeit."—Shaks.

Counterfeiter, *n.* One who counterfeits; a forger; a pretender; a falsifier; one who assumes a position is not entitled to.

Counterfeitly, *adv.* Falsely; fictitiously; by aid of forgery.

Counter-ferment, *n.* Ferment opposed to ferment.

Counter-flory, *n.* (*Her.*) Applied to flowers adorning an ordinary, when standing opposite to each other.

Counter-foil, *n.* The half-part of an exchequer tally.—That part of a banker's check which remains in the check-book as a memorandum of particulars, after the check has been drawn.

Counter-force, *n.* An antagonistic force.

Counter-fort, *n.* (*Fortif.*) A pier, buttress, or lique wall, built up against another wall, to strengthen and support it.

Counter-gage, **Counter-gange**, *n.* (*Carp.*) method of measuring joints by transferring the breadth of a mortise to the place on another timber where the tenon is to be made.

Counter-guard, *n.* (*Fortif.*) A small rampart out-work, with parapet and ditch, erected to protect a bastion.

Counter-influence, *v. a.* To oppose or prevent a contrary influence.

Counter-irritant, *n.* [Lat. *contra*, and *irrita* (*Med.*) A substance applied to the skin in order to produce irritation at some distance from a diseased part with a view to withdraw the inflammation or unnatural action from it. The slightest class of *C.* are *rubefacients* or such as merely redden the skin; *vesicants*, or such produce vesicles or blisters, are a more powerful class and not only cause *C.*, but prove evacuant; *pyogenic counter-irritants*, or *suppurants*, are still more evanescent. Setons, issues, and the actual cautery, also belong to the class of *C.* There is no more valuable remedy than counter-irritation, and none more frequently employed with the best results; but it must be rightly timed and placed, not too soon, nor yet too near the seat of the disease. It should not be had recourse to until all acute action has fully subsided; otherwise it may only fail in affording relief, but may aggravate the local and general disease. It should also be applied at a distance from the site of the original disorder, and not too far removed from it.

Counter-irritate, *v. a.* (*Med.*) To produce a counter-irritant effect in bodily disease.

Counter-irritation, *n.* (*Med.*) The principle of antagonism; the production of an artificial or secondary disease, to relieve another or primary one. See COUNTER-IRRITANT.

Counter-jumper, *n.* A contemptuous term applied to a salesman, clerk, or assistant in a shop or store.

Counter-lath, *n.* (*Tiling*.) A lath placed by the

Counter-libration, *n.* (*Astron.*) Libration in a contrary direction.

Counter-light, *n.* A light placed opposite to something, which makes it to appear to a disadvantage.

Countermand, *v. a.* [Fr. *contremander*; Lat. *contra*, and *mando*, to command.] To give a command or order contrary to a former one; to revoke or annul a former command; to oppose or repeal the orders of another; as, to countermand an order for goods.

"For us to alter anything, is to lift ourselves against God himself, as it were, to countermand him."—Hooker.

—*n.* A contrary order; revocation of a former order or command.

Countermandable, *a.* Susceptible of being countermanded; revocable.

Counter-march, *v. n.* (*Mil.*) To march backwards, or in reversed order.

—*n.* Retrocession; a march backwards, or in reversed order.

"The tumults, marches, or counter marches of the animals."—Collier.

—Change of measures; alteration of conduct.

Counter-mark, *n.* (*Com.*) A second or third mark put on a bale of goods belonging to several merchants, as a security against its being opened, unless in the presence of all the co-owners.

(*Eng.*) A mark placed upon gold or silver medals by the Goldsmith's Company of London, as a voucher for standard or quality; used in addition to the artist's mark.—A mark added to a medal a long time after being struck, to denote the change in value it has undergone.

(*Furriery*.) An artificial cavity made in the teeth of horses that have outgrown their natural marks, to disguise their age.

—*v. a.* (*Far.*) To make a false mark in a horse's teeth in order to disguise his real age.

Counter-mine, *n.* (*Mil.*) A mine sunk into the ground, from which a gallery or branch-mine diverges to counteract the effects of a mine made by an enemy.

—Means of opposition or counteraction; a strategic counterplot.

—*v. a.* (*Mil.*) To defeat or frustrate by a counter-mine; as, to countermine an enemy's camp.

To frustrate by secret and opposite measures; to counter-work.

n. i. To spring a counter-mine; to plot secretly against.

Counter-motion, *n.* An opposite motion; a motion counteracting another.

Counter-motive, *n.* An antagonistic or contrary motive.

Countermove, *v. a.* To move in opposition against.

Counter-move'ment, *n.* A movement in antagonism to another.

Counter-mur, *n.* [Fr. *contremur*.] (*Fortif.*) A wall built up behind another that is shattered or destroyed.

Counter-natural, *a.* Contrary to nature.

"A consumption is a counter-natural hectic attenuation of the body."—*Harvey*.

Counter-negotiation, *n.* A negotiation in opposition to another.

Counter-noise, *n.* A sound by which another noise is overpowered; as, a "counternoise of revellings."

Counter-opening, *n.* An aperture or vent in the contrary side to another.

Counter-pace, *n.* A contrary measure or attempt.

"When the lost counter-paces are made to these resolutions, it will be then time enough for our malcontents."—*Swift*.

Counter-paled, *a.* (*Her.*) Noting an escutcheon divided into 12 pales parted per fesse, the two coloring counter-changed, so that the upper are of one color, and the lower of another.

Counterpane, *n.* [Lat. *culeita puncta*, a bed stitched, adapted into Fr. *court-pointe*, O. Fr. *contre-point*, counterpoint, and from this to *counterpane*.] A coverlet; a bed-quilt stitched so that the stitches form square patterns; referring allegorically to counterpoint in music; as, "arras counterpanes."—*Shaks.*

Counter-parole, *n.* (*Mil.*) A word given as a signal alarm.

Counterpart, *n.* The correspondent part; the part that answers to another; a copy; a duplicate.

(*Law.*) When the parts of an indenture are interchangeably executed by the several parties, that part which is executed by the grantor is termed the *original*, and the rest are *counterparts*. If each part is signed by several parties, they are *duplicate originals*.—One of two correspondent parts of a legal instrument or writing; a duplicate.

(*Mus.*) That part of a musical score which is arranged to be performed in conjunction; as, the soprano part of the counterpart to the contralto.

Counter-pas'sant, *a.* (*Her.*) Applied to two lions, which, in a coat-of-arms, are represented as going contrary ways.

Counter-petition, *n.* A petition drawn up in opposition to another.

Counter-plea, *n.* (*Law.*) A replication to a plea.

Counterplead, *v. a.* To plead against; to plead in opposition to.

Counterplot, *v. i.* To oppose one plot to another; attempt to frustrate stratagem by stratagem.

To plot against, in order to defeat another plot; to baffle or defeat by an opposite plot.

A plot or artifice opposed to another.

The wolf... was confounded by a counterplot of the kids to the wolf; and such a counterplot as the wolf... was not able to smell out."—*L'Estrange*.

Counterpoint, *n.* [Fr. *contrepoint*; It. *contrapunto*. See COUNTERPANE.] (*Mus.*) Literally, point first point; so called from the points formerly employed in music instead of notes,—an important branch of musical science, which consists in the art of composing music in several parts, either for a variety of voices or instruments; now synonymous with harmony, and nearly so with composition; the only difference being, that composition implies more of invention and imagination than C. The invention of the latter is involved in great obscurity; by some it is attributed to Guido, who lived in the 10th century; but, although he was the first to write on this subject, which had made little progress before his time, it is obvious that it was known to several of the earlier composers. Primitive C. is called *plain* or *simple C.* to distinguish it from the *florid* or *florid C.* in which the melody is beautified, and the general effect enriched by the frequent introduction of many successive notes in one part, and a single note in another. When the laws of C. are to be understood, vocal music came to be divided into four parts, the lowest of which was denominated *bas*, the next *counter-tenor*, the third *metatus*, and the highest *triplum* and *treble*. About the middle of the 15th century these parts were increased to six, and were called *bass*, *baritone*, *tenor*, *contralto*, *mezzo-soprano*, and *soprano*.

A coverlet for a bed;—originally so written. See COUNTERPANE.

Counterpoise, *v. a.* [Fr. *contrepeser*; Lat. *contra*, against, and *pesare*, to weigh. See POSE.] To poise or weigh against another weight; to counterbalance.

"Our spoils... Do more than counterpoise a full third part The charges of the action."—*Shaks.*

To balance; to act against with equal power or effect.

No many freeholders... will be able to beard and counterpoise the rest."—*Spenser*.

n. [Fr. *contrepois*.] Equipollence; equivalence of power or force.

Their generals were... a sort of counterpoise to the power of the people."—*Swift*.

So of being an equal weight, or of being placed in the opposite scale of the balance.—A weight which produces equilibrium.

(*Arch.*) A mass of metal connected with an instru-

ment or machine, either for the purpose of giving steadiness, or diminishing the pressure on some particular point; as, for example, the pressure of the pivots of a transit-instrument on its supports.

Counter-poison, *n.* (*Med.*) A poison that counteracts the effects of another; an antidote. See POISON.

Counterponderate, *v. a.* To counterpoise; to equal in weight.

Counter-practice, *n.* One practice placed in antagonism to another.

Counter-pressure, *n.* Opposing pressure; a force or pressure that acts in a contrary direction.

Counter-project, *n.* That part of a scheme, or project, which acts in opposition to another.

Counter-proof, *n.* (*Fine Arts.*) In engraving, an impression obtained from another impression, while it is still wet from the copper-plate, in which the design is in the same direction as in the plate itself. It is made chiefly for the sake of investigating the state of the plate; and in some prints the C. are more valuable than the prints themselves, where the drawing from the picture has not been reversed on the copper; these, however, are among the curiosities of the trade of print-sellers.

Counter-prove, *v. a.* To take a counter-proof of a print, by passing it through the press upon the face of the original.

Counter-revolution, *n.* A revolution reacting upon a former revolution, and bringing back a quondam state of affairs.

Counter-revolutionary, *a.* Relating, or pertaining to, a counter-revolution.

Counter-revolutionist, *n.* One who assists in a counter-revolution.

Counter-roll, *v. a.* See CONTROL.

Counter-round, *n.* (*Mil.*) A detachment of officers told off to go the rounds in visiting patrols and sentinels on duty.

Counter-salient, *a.* (*Her.*) Leaping from each other, or contrariwise.

Counter-scarp, *n.* [Fr. *contrescarpe*—*contr.*, against, and *escarp*, scarp.] (*Fortif.*) The exterior slope of the ditch of a fortified place facing the scarp; a covered way. To form the outline of the C. of the main ditch of a fortress opposite any of its sides, formed by two semi-bastions and the curtain between them, arcs of circles should be described in front of the salient angles of the bastions from the angles themselves as centres, and a tangent drawn to the arc in front of each bastion from the shoulder of the other. These lines meet in a point in front of the curtain, which is called the *angle of the C.* The ditch is thus contrived that it may be swept by cross-fires from the flanks. The C. of a ditch round an outwork is parallel to the rampart. Sometimes it is riveted with masonry, and very steep; but if it be constructed to admit of a hasty sortie being made on the enemy by the garrison, it should slope in a gentle incline from the bottom of the ditch.

Counter-scuttle, *n.* A scuttle by opposition.

Counterseal, *v. a.* [Lat. *contra*, and *seal*.] To affix a seal over, against, or beside another seal.

Counter-secure, *v. a.* To give extra security to or for.

Counter-security, *n.* Security given for a security.

Counter-sense, *n.* Opposite or contrary meaning.

Counter-shaft, *n.* (*Arch.*) See PULLEY.

Countersign, *v. a.* [Lat. *contra*, and Eng. *sign*.] To sign on the opposite side of a deed, instrument, or writing; to sign what has already been signed by another; to authenticate by an additional signature.

n. The signature of a secretary, minister, or other subordinate, to any writing signed by the principal or superior, as a guarantee for its authenticity.

(*Mil.*) A watch-word given daily by the commander of an army, in order that friends may be distinguished from enemies by their knowledge of it. Before an enemy's entries require the countersign from every one who approaches their post.

Counter-signal, *n.* A signal given in response to another.

Counter-signature, *n.* [Lat. *contra*, and Eng. *signature*.] The name of a secretary, or other subordinate officer, countersigned to a writing.

Countersink, *v. a.* [Lat. *contra*, and Eng. *sink*.] To widen the upper part of a hole in wood, metal, &c., for the reception of something, as the head of a screw or bolt.

n. The widened part of an orifice made for the insertion of a screw, bolt, &c.

(*Joinery*.) A bit or drill, for widening the upper part of a hole in wood or metal, for the head of a screw or pin, and having a conical head. Those for wood have one cutter in the conic surface, and have the cutting edge more remote from the axis of the cone than any other part of the surface. C. for brass have 11 or 12 cutters round the conic surface, so that the horizontal section represents a circular saw. These are called *rose*. The conic angle at the vertex is about 90 degrees. C. for iron have two cutting edges, forming an obtuse angle.

Counter-slope, *n.* An overhanging slope.

Counter-statement, *n.* A statement of an opposite character to one previously made.

Counter-statute, *n.* A statute of a contrary character to another.

Counter-step, *n.* An opposite or contrary step, or mode of action.

Counter-stroke, *n.* A contrary stroke; a stroke returned.

Counter-surety, *n.* Same as COUNTER SECURITY, *q. v.*

Counter-swallowtail, *n.* (*Fortif.*) An out-work in the form of a single tenaille, wider at the gorge than at the head.

Counter-sway, *n.* Contrary sway; opposite influence.

Counter-tally, *n.* A tally correspondent with another.

Counter-taste, *n.* An opposite or contrary taste.

Counter-tenor, *n.* (*Mus.*) C. T. *cleft* is the name given to the C cleft when placed on the third line, in order to accommodate the C. T. voice.—C. T. voice is the highest natural male voice. It extends from E or F above G gamut to B, or C above the treble clef note. See CONTRALTO.

Counter-tide, *n.* A contrary tide.

Counter-timber, *n.* (*Naut.*) A short timber for supporting the counter, placed in a ship's stern.

Counter-time, *n.* (*Manege*.) The resistance of a horse, intercepting his cadence, and the measure of his manege.

—Opposition; resistance; defence.

Counter-trench, *n.* (*Fortif.*) A trench placed so as to counteract that made by a besieging force.

Counter-turn, *n.* (*Lit.*) The height or acmé of a play;—called by the Romans *status*.

Countervail, *v. i.* [Lat. *contra*, and *valeo*, to be worth.] To be of avail, or to have force against; to act against with equal force or power; to equal; to act with equivalent effect against anything.

"And him with equal valour countervailed."—*Faerie Queene*.

n. Equal strength, weight, or value; power or value sufficient to obviate any effect; compensation.

Countervallation, *n.* (*Mil.*) A chain of posts constructed by the besiegers of a fortified place, and bearing a certain relation to *circumvallation*, *q. v.* It completely surrounds the place at a certain distance, and is intended to prevent sorties of the besieged. It is only during very protracted sieges that C. are constructed.

Counterview, *n.* Opposition; posture in which two persons front each other.

"Within the cases of hell sit sin and death, In counterview."—*Mil.*

(*Painting*.) A contrast or situation in which two things illustrate or set off each other.

Countervote, *v. a.* To vote in opposition; to outvote.

Counterweigh, *v. a.* [Lat. *contra*, and *weigh*.] To weigh against; to counterbalance.

Counterweight, *n.* A weight in the opposite scale.

Counterwheel, *v. a.* (*Mil.*) To wheel troops round in an opposite direction.

Counter-wind, *n.* An opposite or contrary wind.

Counterwork, *v. a.* [Lat. *contra*, and *work*.] To work in opposition to; to counteract.

"Counterworks each folly and caprice."—*Pope*.

Countess, *n.* [Fr. *comtesse*; O. Fr. *comptesse*.] The wife, or consort, of an earl or count.

Counting-house, *n.* (*Com.*) A merchant's office, or place where commercial business is transacted.

Counting-room, *n.* (*Com.*) A room in a merchant's place of business; an office.

Countless, *a.* That cannot be counted; not having the number ascertained nor ascertainable; innumerable.

"By one countless form of woes oppress."—*Prior*.

Countrified, *kan'tre-fid*, *a.* Partaking of a country air or manner; rural; rustic; rude; bucolic; pastoral; as, a *countrified* lass.

Countrify, *v. a.* [Eng. *country*, and Lat. *facere*, to make.] To make or assume a rustic air or manner; to give a rural appearance to; as, to *countrify* a dwelling-house.

Country, (*kan'tre*) *n.* [Fr. *contrée*; It. *contrada*; L. *Lat. contratus*, from *con*, and *terra*, the earth, land.] The lands that lie together, or are adjacent; a large tract of land; a region; a territory; the land of one's birth; one's native land; region in which one resides; place of residence.

"And thou shalt find where'er thy footsteps roam,— That spot thy country, and that land thy home."—*Scott*.

—Rural parts of territory;—as opposed to *town*.

"God made the country, and man made the town."—*Cowper*.

—The inhabitants of any land, region, or territory; as, to appeal to the *country*.

"All the country, in a general voice, Cried hate upon him."—*Shaks.*

(*Law.*) A jury summoned, or to be summoned, from any district.

To throw or put one's self upon the country, to solicit the suffrages of one's constituents; to refer to the decision of a jury.

a. Relating or belonging to the country; rural; rustic; bucolic; pastoral;—opposed to *city*; as, a *country* life, a *country* house.

"A country gentleman learning Latin in the university."—*Locke*.

—Rude; ignorant; without becoming or refined manners; as, a *country* accent, a *country* style.

—Pertaining or peculiar to one's country.

"She... spake in her country language."—*2 Macc. vii. 27*.

Country-dance, *n.* [Fr. *contre-danse*.] (*Dancing*.) A contra-dance; a dance in which the partners are arranged opposite to each other in lines. It is of French origin, and was at one time so popular as to be transplanted into almost every country in Europe and America. There are no established rules for the composition of airs to this dance, neither is it confined to any particular measure, so that any common lively song-tune may be adapted to it.

Country-house, *n.* See COUNTRY-SEAT.

Countryman, *n.* One born in the same country with another; a compatriot; a co-resident;—with the possessive pronoun.

"And bold as were his countrymen in fight."—*Prior*.

—A native or inhabitant of a territory or region; as, a

North-countryman. — A rustic; one who dwells in the country; — opposed to *citizen*.

"All countrymen coming up to the city, leave their wives in the country." — *Grant*.

— A farmer; a husbandman; an agriculturist.

"A countryman took a hoar in his corn." — *L'Estrange*.

Country-seat, Country-house, n. A dwelling or place of residence in the country; opposed to *town-house*.

Country-woman, n. A female who lives in the country; a woman born in one's own country.

Count-wheel, n. (Horol.) That wheel in a clock which moves the correct striking of the hours.

County, n. [Fr. *comté*; Lat. *comitatus*, from *comes*, a companion, *con*, and *eo*, to go. Originally, the district or territory of a count or earl.] A circuit or particular portion of a kingdom, state, or territory in which courts of law are held. In the English law, this word signifies the same as *shire, q. v.*, — *county* being derived from the French, and *shire* from the Saxon. The territory of the U. States is generally divided into counties, which, in most of the States, are divided into townships or towns. The *parish*, in Louisiana, and the *district* in S. Carolina, correspond to the *C.* in other States.

— An earldom. — A count; an earl; a nobleman. (o.)

"The gallant, young, and noble gentleman,
The County Paris," — *Shaks.*

County-corporate, n. In England, certain cities and boroughs possessing peculiar liberties, as London, York, Chester, Canterbury, &c.

County Court, n. (Law.) In England, a court of law established for the recovery of small debts. — In America there are *C. C.* in many of the States, but their powers vary widely.

County Line, in Alabama, a post-office of Clay co. — A village of Tallapoosa co.

County Line, in Georgia, a post-village of Campbell co.

County Line, in Mississippi, a village of Newton co., about 60 m. E. by N. of Jackson.

County Line, in N. Carolina, a P. O. of Davie co.

County Line, in New York, a P. O. of Niagara co.

County Line Creek, in N. Carolina, traverses Caswell co., and flows into Dan River at Miltou.

County Line Cross Roads, in Virginia, a post-office of Charlotte co.

County-palatine, n. In England, a county possessing peculiar privileges; in feudal times approaching to the exercise of sovereign power; — such counties are those of Lancaster, Chester, and Durham.

County-seat, County-town, n. The chief town of a county; the seat of justice.

Coup, (koo,) [Fr., a blow.] A French term used in various ways to convey the idea of promptness and force, as: *COUP DE GRACE, (koo-da-gräs')*, a master-stroke; the last, or finishing stroke. — *COUP DE MAIN, (koo-da-mang')* (Mil.) An attack, onslaught, or enterprise performed by sudden and vigorous action. — *COUP D'ÉTAT, (koo-da-täh')* A sudden stroke of state-craft or policy; a violent and arbitrary political measure. — *COUP D'ŒIL, (koo-dül')* A rapid glance of the eye taking in all at one view. — (Mil.) A rapid conception of the weakness and advantages of certain positions or arrangements of troops. — *COUP DE SOLEIL, (koo-da-so-läl')* (Med.) A stroke of the sun; a sunstroke. — *COUP DE THÉÂTRE, a sudden and striking change in the action of the scene.*

Coupe, (koo-pä,) n. [Fr.] The front compartment of a diligence or French stage-coach. — In England, a railroad-car set apart for a private party. — A kind of close four-wheeled carriage, resembling a *brougham, (q. v.)*

Couped, (koupt,) a. [Fr. coupé, cut.] (Her.) Applied to the head, or any limb of an animal cut off from the trunk, smoothly. It is distinguished from *erased, i. e.* forcibly torn off, and therefore ragged and uneven. A distinction is also made between *couped* and *couped close*, the latter signifying that the head or limb is cut off close, leaving no part of the neck or trunk attached to it. When crosses, bars, bends, and the like, are cut so as not to touch the sides of the escutcheon, they are also said to be *couped*.

Coupee (koo-pé'), n. (Dancing.) A motion in dancing, when one leg is a little bent and suspended above the ground, and with the other a forward motion is made.

Coupeville, or Coup'erville, in Washington, a post-village, capital of Island county, 112 miles N. of Olympia.

Couple, (kup'l,) n. [Fr.; Lat. copula, from co-apio — con, and apo, apio; Gr. haptō, to fasten, join, bind, or tie. See COPULA.] That which joins, connects, or binds together; a band, a chain, &c.; two of the same species in kind, and near in place, or considered together.

"It is in some sort with friends as it is with dogs in couples; they should be of the same size and humour." — *L'Estrange*.

— A pair; a brace; two things of any kind linked or connected together; as, a *couple* of pointers, a *couple* of dollars. — A man and his wife; a male and a female betrothed or united in affection; as, a constant *couple*.

(Galvanism.) One of the two plates of different metals, constituting a battery; — as, a voltaic *couple*.

— pl. (Arch.) Rafters framed together in pairs, with a tie above their feet.

(Statics.) A *C. of pressures* or *forces* denotes two equal pressures having precisely opposite directions, but applied at different points of a body. Their tendency is to produce rotation about an axis perpendicular to their plane.

— v. a. [Fr. *coupler*; Lat. *copula*. See the noun.] To join, unite, or combine two things together; to join; to unite; to connect; to conjoin; to chain, fasten, or tie together; as, to *couple* a pair of horses.

"And wheresoe'er we went, like Juno's swans,
Still we went coupled and inseparable." — *Shaks.*

— To join in wedlock; to wed; to marry; as, to *couple* a pair of lovers.

"A parson who couples all our heggars." — *Swift*.

— v. i. To join in sexual embrace; to unite in copulation.

"And coupled with them and hegot a race." — *Milton*.

Couple-close, n. (Her.) An ordinary, bearing the fourth of a chevron in pairs, one on each side of an eutire chevron.

(Arch.) A pair of spars of a roof.

Coupler, (kup'lur,) n. He or that which couples; as, the coupler of an organ.

Couplet, (kup'let,) n. [Fr.] A pair of rhymes; two verses: a division of a hymn or ode, in which an equal number, or equal measure of verses is found in each part, called a *strophe*.

"An only couplet fraught
With some unmeaning thing they call a thought." — *Pope*.

— A pair of doves.

"As patient as the female dove,
Ere that her golden couplets are disclos'd." — *Shaks.*

Coupling, n. Act of joining or connecting together; sexual connection.

(Mech.) The name given to various arrangements by which the parts of a machine may be connected or disconnected at pleasure, or by which a machine may be disengaged from, or re-engaged with, a revolving wheel or shaft, through which it receives motion from a steam-engine, water-wheel, or other prime mover.

Coupling-box, n. (Mech.) A strong iron cylinder, by which the shafts of machinery are connected, so that they may revolve together.

Coupling-pin, n. (Mech.) The pin used in coupling railroad-cars, &c., together.

Coupon, (koo'pon,) n. [Fr.] (Com.) A voucher, or certificate of interest on a bond payable by instalments, affixed in a series at the foot of the bond, and cut off for presentation when the instalments shall respectively become due; as, the *coupon* of a railroad debenture.

Coupure, n. [Fr.] (Mil.) An intrenchment; a ditch.

Courage, (kui'ej,) n. [Fr. courage; Sp. coraje; It. coraggio; from L. Lat. coragium — cor, the heart, and ago, to move, to put in motion.] The action, fortitude, or spirit of the heart; that quality of mind which enables men dauntlessly to meet dangers and endure privations, and also to endeavor to repel or counteract them; bravery; intrepidity; boldness; valor; dauntlessness; active fortitude; daring; hardihood.

"But screw your courage to the sticking-place,
And we'll not fail." — *Shaks.*

Courageous, (kum-aj-e-us,) a. Having courage; bold to encounter difficulties and dangers; brave; daring; heroic; intrepid; bold; valiant; fearless; adventurous; as, a *courageous* explorer.

Courageously, adv. With courage; bravely; boldly; stoutly; valiantly.

"The earl courageously came down, and joined battle with him." — *Bacon*.

Courageousness, n. Quality of being courageous; courage; valor; intrepidity; boldness; bravery.

Courant, (koo-rant,) a. [Fr., running, from Lat. currere, to run.] (Her.) Applied to any animal, such as a deer or a dog, when shown running at full speed.

Courant, Courant, n. [Fr. courante.] A lively dance; a coranto.

"Why, he is able to lead her a couranto." — *Shaks.*

(Mus.) A musical piece played in triple time.

— A circulator of news; a newspaper.

Courap, n. (Med.) A distemper, very common in India, in which there is a perpetual itching of the surface, and eruption.

Courbaril, (koo'bar-il,) n. [Fr.] (Bot.) See HYME-NEA.

Courbevoie, (koo'rb-ewaw') a town of France, dep. Seine, 6 m. N.W. of Paris; pop. 9,562.

Courche, (kurch,) n. A kerchief. (Used in Scotland.)

Courier, (kô'rê-ér,) n. [Fr. courrier, from Lat. curro, to run.] A messenger dispatched in haste; an express; a runner, sent with letters or dispatches, usually on public business; as, a special *courier*.

"I met a courier, once mine ancient friend." — *Shaks.*

— A term used in Europe to denote an attendant upon travellers over that continent, who prescribes routes, engages accommodations, settles bills, &c.

"My lady, with her travelling britzka and courier." — *A. Smith*.

— That which conveys news or intelligence; — hence, a name frequently given to newspapers; as, the *Louisville Courier*.

Courier, PAUL LOUIS, (koo-re-a') an able French writer, b. 1772. His name became notorious under the Restoration as the author of several admirable political pamphlets, but his career was cut short by assassination in 1825.

Courlan, n. (Zool.) A family of birds, order *Grallatores*, distinguished by having the head feathered to the bill, toes cleft to the base, and the hind-toe long. The genus *Aramus* is represented in America by the Courlan, or Crying-bird, *C. giganteus* of Florida and the W. Indies, which is about 27 inches long.

Courland, KURLAND, (koo'land,) one of the Baltic provinces of the Russian empire, in Lat. 56°-58° N., Lon. 21°-27° E.; area, about 10,500 sq. m. It is generally a level country, with ranges of low hills, and contains many lakes, bogs, forests, and downs; yet, some parts have a very fertile soil. The proprietors of land are mostly German; the peasantry, of Lettish or Esthonian extraction, are chiefly engaged in husbandry; there is little manufacturing industry or commerce. The capital is Mittau; but the most flourishing town is Libau.

C. belonged formerly to the Teutonic knights. It was the scene of many Russian intrigues during the 18th century, and was finally united to Russia, 1795. *Pop.* 573,855, mostly Protestants.

Course, (kôrs,) n. [F.; Lat. cursus, from curro, to run.] A passing or passage; progress forward within prescribed or uniform limits; journey; voyage; career; route.

"In the course of one revolving moon." — *Dryden*.

— Way, track, path, or line of motion; as, a *race-course*.

— A moving or motion forward; direction in which motion is made; continuous or gradual advance; line of progress.

"Westward the course of empire takes its way." — *Bishop Berkeley*.

— Progress in order of succession; order of advance; train; series; as, a *course* in tilting, a *course* in running greyhounds, a *course* of medicine, &c.

"The course of true love never did run smooth." — *Shaks.*

— Stated and orderly method; methodical series; established sequence; as, a *course* of lectures; the *course* events, &c.

"The duke cannot deny the course of law." — *Shaks.*

— Methodical procedure through any science, art, branch of learning; whole range of subjects taught at a university, college, &c.; as, a *course* of study.

— Manner, way, or method of life; line of conduct; manner of proceeding in behavior, &c.

"Tis time we should decree
What course to take." — *Addison*.

— Series of actions; succession of practices in uniform connection; as, a *course* of evil.

"His addiction was to courses vain." — *Shaks.*

— Natural bent of will; proclivity; propensity; as, goes his own *course*.

"It is best to leave nature to her course." — *Temple*.

— A set of dishes placed on the table at one time; as, first *course*.

"Then with a second course the tables load." — *Dryden*.

— Orderly system or structure; as, the *course* of water.

— Empty form or ceremony.

"Their vows and promises are no more than words of course." — *L'Estrange*.

(Building.) In masonry, a continuous layer or row of stones or bricks, placed even throughout the front of a building, horizontally.

(Naut.) The angle which the ship's track makes with all the meridians between the place left and the place arrived at.

— (pl.) The chief sails belonging to a ship; as, the main *course*, fore-*course*, &c.; to *brail up the courses*.

— (pl.) (Physiol.) Catamenia; the menstrual discharge, the stoppage of women's *courses*.

Of *course*, by consequence; in the common manner proceeding; in natural order; tautamount to; by tied rule.

"Whose reasonings will of course all chime that way." — *Locke*.

In *course*, in regular order or succession. — In the *course* of, at some time during; as, in the *course* of events.

— v. a. To run after; to hunt; to pursue; to chase; as, *course*d hare.

"The big round tears
Course'd one another down his innocent nose." — *Shaks.*

— To cause to run; to force to move with speed and legerity; as, to *course* dogs.

"And course them oft, and tire them in the heat." — *May*.

— To run through or over.

— v. i. To run; to move with speed; to run or n about; as, the blood *courses* through the veins.

"All ether coursing in a maze of light." — *Thomson*.

Cours'enville, in New Jersey, a village of Sussex about 9 m. N.N.E. of Newton.

Cours'er, n. A hunter; one who courses with dog.

"A leash is a leathern string, by which a . . . courser lead greyhound." — *Sir T. Hamner*.

— A swift horse; a race-horse; a war-horse. (Used chiefly in poetry.)

"Th' impatient courser pants in every vein." — *Pope*.

(Zool.) A bird of the order *CURSORES, q. v.*

Cours'ey, n. (Naut.) A part of a ship's hatches.

Cours'ing, n. [Lat. curro, I run.] (Sports.) The hunting hares with greyhounds, which follow the gam sight, and not by scent. *C.* meetings are held in parts of the country where hares are abundant, and owners of greyhounds enter their respective dogs various stakes. A judge is appointed, whose duty is to decide with respect to the merits of the dogs engaged. The sport then begins by two dogs being selected for the *course*. They are restrained by the *slipper*, a man holds them by a long strong cord, with a spring attached to their collars. The field is then beaten for a hare. When it is found, it is allowed 80 to 100 yards start, as it is called; the judge then gives the word, and the slipper frees the dogs by means of the spring. The judge follows the greyhounds throughout the *course*, and awards the victory to the dog which shows the finest qualities of speed, endurance, and sagacity, and not necessarily to the dog which kills the hare.

is of great antiquity, and is treated of by Arrian, flourished A.D. 150. It was first practised by the Greeks, and was a popular sport with the ancient Greeks.

now a very popular sport in many parts of Europe.

Court, n. [O. Fr. court; Fr. cour; L. Lat. cortis; cohors or cors, akin to Gr. chartos, an inclosed space.] An area or space inclosed before or behind a house, or a space shut in by the wings or parts of a building, or by different houses; a place forming a recess from a public street; as, a *court* of small apartments, a *court-yard*.

palace; the place of residence of a king or sovereign-judge.

"A supplicant to your royal court I come." — Pope.

the family, retinue, and guests of a monarch; as, the court of Vienna, an attendant at court.

levee; a drawing-room, or specified assembling of courts; as, to hold a court at St. James' Palace.

to judge or judges assembled for hearing and deciding cases; as, the Court of Chancery.

judgment-seat; the hall, chamber, or place where judges assemble; as, a court of justice.

jurisdiction, civil, military, or ecclesiastical; as, a court of inquiry.

"Most heartily do I beseech the court
To give the judgment." — Shaks.

England, the parliament consisting of the sovereign, lords, and commons, being the supreme court of the kingdom.

the art of pleasing, or of insinuation; address to gain favor; civility; flattery; as, to pay court to a lady.

Some sort of people . . . are always forward in making their court to my young master." — Locke.

Law.) A place wherein justice is judicially administered. The courts of the U. S. consist of the following: the Senate as a court of impeachment; 2, the supreme court; 3, the circuit courts; 4, the district courts; 5, the court of claims (q. v.); 6, the supreme court of the District of Columbia; 7, the Territorial courts.

To pay court to; to endeavor to please by civilities; address; to propitiate; to ingratiate one's self with; to court popular favor.

To woo; to solicit for marriage; to endeavor to gain the favor and affection of; as, to court a woman.

"Ev'n now when silent scorn is all they gain,

A thousand court you, though they court in vain." — Pope.

solicit; to seek; to attempt to gain by application; address; as, to court the Muses.

"Teach children to court commendation." — Locke.

To play the courtier; to act after the manner or fashion of the court.

Tableau Bayou, (*kōr'ta-blō*), in Louisiana, is named by the Boeuf and Crocodile bayoux, which unite 8 m. N. N. E. of Opelousas, and flowing S. E. joins the Atchafalaya, on the border of St. Landry parish.

Tails Creek, in Missouri, traverses Crawford co., and the Osage Fork of Maramec River.

Taud, (*kōr-to'*), n. A horse with a docked tail.

Taut, n. A short swivel-gun, formerly used on board ships.

Tout Bar'ou, n. (*Eng. Law.*) A court incident to a manor, to be holden (yet in our time!) by the lord within the manor. This court-baron is of two kinds: the one a *customary court*, appertaining entirely to copyholders, in which their estates are transferred by surrender and admittance, and other matters relative to their tenure only; the other is a *court of record*, but not one of record, and is held before the lord or his steward who owe suit and service to the manor, the lord being rather the registrar than the judge. It holds pleas of any personal actions, of debt, trespass, and the like, where the debt or damages do not amount to forty shillings.

Tout-bred, a. Polished; courtly; bred at court.

Tout-breed'ing, n. Education at court; acquisition of court-manner, etiquette, and deportment.

Tout-bubble, n. A bagatelle; a worthless article.

Tout-card, n. See COAT-CARD.

Tout-chaplain, n. One who performs the offices of religion at court.

The maids of honour have been fully convinced by a famous tout-chaplain." — Swift.

Tout-craft, n. State-craft; political finesse; artifice.

Tout-cup-board, n. A movable buffet for the display of plate and other valuables.

Tout-day, n. The day on which justice is publicly administered in courts of law.

The judge took time to deliberate, and the next court-day he spoke." — Arbuthnot.

Tout-dress, n. Costume or mode of dress prescribed by the etiquette of a royal court, to be worn at levees, receptions, balls, &c.

Tout-dresser, n. A flatterer; one who appraises and attends court.

Tout-elément, n. The party attaching themselves to a court.

Tout-eous, (*kōrt'ē-us*), a. [*Fr. courtois*.] Exhibiting the polished manners of a court; polite; well-bred; civil; obliging.—Complacent; affable; conciliating; respectful; courteous, though coy, and gentle though retired." — Crabbe.

Tout-eously, adv. In a courteous and obliging manner.

Tout-eousness, n. Quality of being courteous; civility of manners; obliging condescension; complaisance.

Tout-er, n. One who courts another; one who seeks a marriage.

Tout-tesau, **Cour'tezau**, n. [*Fr. courtisane*; L. *Meretrices*, such as frequent *cortez*, courts, by-streets.] A prostitute; a woman who prostitutes herself for hire, especially to men of rank; a harlot; a strumpet.

Tout-tesanship, **Cour'tezanship**, n. State or quality of a courtesan; prostitution; harlotry.

Tout-tesy, (*kurt'ē-sē*), n. [*Fr. courtoisie*; It. *cortesia*.] A courteous act of demeanor; politeness or elegance of manners; urbanity; civility; complaisance; condescending affability; or polite kindness; courteousness; good breeding.—Act of civility, respect, or kindness.

"For these courtesies
I'll lend you thus much money." — Shaks.

—In England, a favor graciously conferred; as, to hold a tenure upon *courtesy*, a peer by *courtesy*, &c.

(*Etymol.*) It was at the courts of princes and great feudatories that the minstrels and troubadours of the middle ages especially delighted to exercise their art; and it was there, also, that the peculiarities of chivalrous life and manners were chiefly exhibited. Hence, *C.* was a general term, expressive of all the elegance and refinement which the society of those times had attained; in fact, it was synonymous with all the gentler parts of chivalry itself; and in this sense it is used both by the early trouvères and romancers, and also by poets of a later age, when affecting the use of chivalrous language, as in the first lines of the great poem of Ariosto:

Le donne, i cavalier, l'arme, gli amori,
Le cortesie, l'audaci imprese io canto.

The transition from this wider meaning to that in which it is now employed is obvious enough.

Courtesy, (*kurt'sē*), n. The act of civility, respect, or reverence performed by a woman, as by gently bending the knee.

"Some country girl, scarce to a court'sy bred." — Dryden.

Courtesy, in Georgia, a village of Floyd co., about 60 m. N. W. of Atlanta.

Court-fashion, n. The fashion ruling at court.

Court-favor, **Court-favour**, n. A favor or benefit enjoyed by a person at court.

"We part with the blessings of both worlds for pleasures, court-favors, and commissions." — L'Estrange.

Court-fool, n. A jester formerly attached to a court or royal household; a privileged buffoon. — During the Middle Ages, the court-fool became an indispensable officer. He usually had his head shaved, and wore a fool's cap of gay colors, with ass's ears and a cock's comb. He often had bells attached to his cap, and carried a sceptre variously formed. The dress, however, generally depended on the caprice of his master. Triboulet, the court-fool to Francis I., king of France, obtained an historical reputation, as did also his successor Brusquet. English court jesters disappeared with the Stuart dynasty; one of the last examples being Armstrong, who died in 1646. Afterwards half-witted persons were employed as court-fools by noblemen; but toward the end of the 17th and the beginning of the 18th century the custom was entirely abolished.

Court-guide, n. A book of reference; a directory to the addresses and official appointments of the nobility, and upper classes of society.

Court-hand, n. The style of handwriting used in records and judicial proceedings.

"He can make obligations, and write court-hand." — Shaks.

Court Hill, in Alabama, a post-office of Clay co.

Court-house, n. A house appropriated to courts of law and public meetings.

Courtier, (*kōrt'yur*), n. A person who attends and frequents courts; one engaged in the service of royalty.

"You know I am no courtier, nor versed in state-affairs." — Bacon.

—One who courts or solicits favors; a person of courtly manners; a refined flatterer.

"Courtiers of beauteous freedom." — Shaks.

Court-lady, n. A lady who attends, or is employed at, court.

Courtland, in Alabama, a township of Lawrence co., about 20 m. E. of Tusculum.

Courtland, in Indiana, a village of Jackson co.

Courtland, in Michigan. See CORTLAND.

Courtland, in Wisconsin a township of Columbia county.

Court-lands, n. pl. (*Eng. Law.*) Lands kept in the lord's own hands to serve his family; domains.

Courtland Station, in Illinois, a post-office of De Kalb co.

Court-leet, n. (*Eng. Law.*) See LEET.

Court-lieness, n. Quality of being courtly; elegance of manners; grace of mien; civility; dignified complaisance.

"The slightest part that you excel in, is courtlieness." Lord Digby.

Court-ling, n. A hanger-on at court; an aspirant for court-favor; a courtier.

Courtly, a. Relating to a court; high-bred; elegant; dignified; as, a courtly air.

—Fawning; sycophantic; flattering; obsequious.

—adv. After the manner of a court; elegantly; with high breeding and dignity.

Court-martial, n.; pl. COURTS-MARTIAL. (*Mil.*) A court consisting of naval or military officers for the trial of offences committed against the laws and regulations of the services they respectively belong to.

Court'ney, in Texas, a post-office of Grimes co.

Court of Claims, n. (*Amer. Law.*) A court created by statute of Feb. 24, 1855, amended by Act of March 3, 1863. It consists of 5 judges, appointed by the President with the consent of the Senate, to hold their offices during good behavior. They have jurisdiction to hear and determine all claims founded upon any law of Congress, or regulation of an executive department, or upon any contract, express or implied, with the govt. of the U. States, and of all claims which might be referred to it by either house of Congress. Proceedings in this court originate by petition filed; and testimony used in the hearing and determination of claims is taken by commissioners who are appointed by the court for the purpose.

Court of Chancery, n. (*Amer. Law.*) A court of general equity jurisdiction. Separate courts of *C.* or equity exist in a few of the States; in others, the courts of law sit also as courts of equity; in others, equitable relief is administered under the forms of the common law; and in others, the distinction between law and

equity has been formally abolished, or never existed. — *Bourcier*. — *C. OF CHANCERY*, in England. See CHANCERY.

Court of Love. See LOVE COURT OF.

Court-party, n. That political party which is attached to the court.

Court-plaster, n. Sticking-plaster made of silk, with some adhesive substance on one side.

Courtrai, (*kōrt'rai*), a fortified town of Belgium, on the Lys, 26 m. N. W. of Ghent. *Manuf.* Linen, woollen, cottons, and lace. Here, in 1302, was fought the battle of the Spurs, in which the French were defeated by the Flemings. Here also, in 1793, the English were defeated by the French, who took possession of the town. *Pop.* (1895) 30,927.

Court-right's Mills, in Illinois, a former post-office of Iroquois co.

Court-ship, n. Act of courting or soliciting favor.

"He paid his courtship with the crowd." — Swift.

—Act of wooing in love; solicitation of a woman to marriage.

"In tedious courtship we declare our pain,

And ere we kindness find, first meet disdain." — Dryden.

—Elegance of manners; courtliness; civility.

"(I give) my courtship to an university." — Donne.

Court-yard, n. A court or inclosure round a house.

Cous-cons, (*kōs-kōs*), n. A kind of nourishing food, used in Eastern countries for fattening women, to give them that degree of *embonpoint* which is admired by Oriental taste.

Cousin, (*kū'n*), n. [*Fr. cousin*; Lat. *consanguineus* — *con*, and *sanguis*, blood.] The son or daughter of an uncle or aunt; a kinsman or blood-relation. (In the plural, the children of brothers and sisters.)

"O radiant cousin!" — Shaks.

—A title of courtesy given by a king to a nobleman, particularly to those of the privy-council.

"My noble lords and cousins, all, good morrow." — Shaks.

Cousin, VICTOR, (*kōs'vīk*), a French philosopher, and the founder of systematic eclecticism in modern philosophy, b. at Paris, 1792. In 1813, he became assistant professor to Royer-Collard, at the Sorbonne. In 1820, in consequence of the royalist reaction in the state, his views of free agency were thought to have a political intent, and his course was indefinitely suspended. From 1825 to 1840, appeared his celebrated translations of Plato, in 13 vols. In 1827 he was reinstated in his chair, and the year 1828 witnessed the most splendid triumph in the career of *C.* as a philosophic teacher. It is said that to find an audience as numerous, and as passionately interested in the topics discussed, as gathered round *C.*, it would be necessary to go back to the days of Abelard, and other medieval teachers of philosophy. *C.* was still young, simple, and pure in his habits; his doctrines were for the most part new to his hearers, bold, and in harmony with the spirit of the time. The finest qualities of the rational genius appeared in his lectures, a wonderful lucidity of exposition, an exquisite beauty of style such as no modern or ancient philosopher, excepting Plato, has equalled; a brilliancy of generalization and criticism that enchanted every one; and a power of co-ordinating the facts of history and philosophy in such a manner as to make each illustrate the other, and reveal their most intricate relations. At this period, *C.* was one of the most influential leaders of opinion among the educated classes in Paris; and consequently, after the revolution of 1830, when his friend Guizot became prime-minister, *C.* was made a peer of France, and later, Director of the *École Normale*. In 1840, he was elected a member of the *Académie des Sciences Morales et Politiques*, and in the same year became Minister of Public Instruction. After the revolution of 1848 he disappeared from public life. His principal works are, *Cours d'Histoire de la Philosophie*; *Cours d'Histoire de la Philosophie Moderne*; *Cours d'Histoire de la Philosophie Morale au XVIII^e Siècle*; *Du Vrai, du Beau, et du Bien*; *Etudes sur les Femmes et la Société du XVIII^e Siècle*; *Ouvrages inédits d'Abelard*, &c. D. 1867.

Cousin, JEAN, a celebrated French painter, sculptor, and engraver, b. abt. 1501; d. 1590.

Cousin-german, n.; pl. COUSINS-GERMAN. A first cousin.

"Thou art, great lord, my father's sister's son,
And cousin-german to great Prism's seed." — Shaks.

Cous'inhood, **Cous'inship**, n. State or condition of a cousin.

Cous'inly, adv. Like a cousin; befitting a cousin.

Cous'inet, n. [*Fr.*] (*Arch.*) The crowning stone of a pier from which the arch springs, or that which lies between the capital of the impost and under the sweep of the arch; its bed is level below and inclined above, receiving the first rise or the spring of the arch. This word is also used for the ornament in the Ionic capital between the abacus and the echinus, which serves to form the volute.

Couston, GUILLAUME, a French sculptor, b. at Lyons, 1678; he executed various decorative works for the gardens of Versailles and Marly. D. 1746. — NICHOLAS, elder brother of the above, b. 1638, was noted as a sculptor. His principal works are, *Le Vœu de Louis XIII.*, in the cathedral of Notre Dame; the group of *The Seine and the Marne*; and a group of *Tritons*, at Versailles. D. 1733.

Coutances, (*kōs-tance*), a town of France, dep. Manche, 40 m. S. of Cherbourg. *Manuf.* Linens, woollens, lace, &c. *Pop.* 8,159.

Couteau, (*kō-tō*), n. [*Fr.*] A cutlass; a hanger; a hunting-knife (*Fr. couteau-de-chasse*).

Couthon, GEORGES, a French lawyer, president of the court of justice at Clermont, b. 1756. Becoming a member of the Legislative Assembly, and of the National Convention, he voted for the death of Louis XVI.

Sharing afterwards the power, and participating in the atrocities of Robespierre, he was also involved in his ruin. Guillotined, 1794.

Coutts, ANGELA GEORGIANA BURDETT, (*koots*), an English philanthropist. B. 1814, daughter of Sir Francis Burdett, (*q. v.*) Her grandfather, Mr. Coutts, the London banker, having, at a late period of his life, married Miss Mellon, an actress, bequeathed to the latter his very large fortune, which acted as a temptation to the Duke of St. Alban's to marry her. The duchess dying in 1831, without issue, left to Miss Burdett her immense wealth, estimated at \$12,500,000, on the condition that she would assume the name and arms of the Coutts family. This she accordingly did, and devoted her life to charitable purposes generally.—Her great wealth attracted many admirers, among whom have been named the Duke of Norfolk's eldest son, Prince Louis Bonaparte, afterwards Napoleon III., and the Duke of Wellington. She was created a baroness in 1871, and married William L. A. Bartlett, of New Brunswick, N. J., in 1881.

Couves, in Brazil, two small islands off the coast of the prov. of São Paulo. Lat. 23° 25' S., Lon. 44° 55' W.

Cove, *n.* [A.S. *caf*, *cove*; Swed. and Goth. *kofwa*; L. Lat. *cava*; probably allied to Lat. *cava*, a hollow; W. *cwb*, a concavity; Heb. *kāfuf*, to bend, to curve, to bow; Ar. *kanba*, to hollow.] A small inlet, creek, or bay; a sheltered recess in the sea-shore; as, the *Cove* of Cork, (fig. 705).

—In the U. States, a strip of prairie extending into woodland; also, a recess in the side of a mountain.

—A slang term for a boy or man; as, he is a queer *cove*. (Sometimes written *covey*.)

(Arch.) A concave moulding; the concavity of an arch.

—*v. a.* To arch over; to form, as an alcove.

Cove, in Alabama, a village of Shelby co., abt. 70 m. N. by W. of Montgomery.

Cove of Cork, or **Queens'town**, a town of Ireland, in the co. Cork, and 10 m. S. of the city of that name. It is a handsome town, built in the form of ter-

Fig. 705. — COVE OF CORK, IRELAND.

aces, with magnificent quays, and all conveniences for ships. Pop. 13,107. — COVE ISLAND is in Cork Harbor, and is well fortified and protected by batteries. It has an area of 13,000 acres, and is connected by bridges with the mainland.

Cove Creek, in Alabama, a former P. O. of Calhoun co. **Cove Creek**, in Utah, a village of Millard co., about 35 m. S. by W. of Fillmore City.

Cove'dale, in Ohio, a former P. O. of Hamilton co. **Cove'land**, in Washington, a village of Island co., abt. 110 m. N. of Olympia.

Cove'll, in Illinois, a post-office of McLean co. **Covenant**, (*kuv'e-nant*), *n.* [Fr. *covenant*, from Lat. *convenio*—*con*, and *venio*, to come.] A mutual consent or agreement of two or more parties to do or not to do some act or thing; a contract; a stipulation.—A compact; a bargain; a special agreement; a bond of union.

(Law.) An agreement, convention, or promise of two or more parties by deed in writing, signed, sealed, and delivered, by which either of the parties pledges himself to the other, that something is either done or shall be done, or stipulates for the truth of certain facts. He who thus promises is called the *covenantor*; and he to whom it is made the *covantee*. A *C.* being part of a deed, is subject to the general rules for the exposition of such instruments.

(Theol.) The word *C.* is used in a double signification, one of which is commonly called the *scriptural*, the other the *systematic*, or popular use of the term. In the former sense, we find the word repeatedly used in Scripture to denote an arrangement, disposition, or institution, according to which the divine favor is dispensed to those with whom it is made. It is not properly a contract or bargain, which requires that contracting parties be on an equal footing, and that each has the power of accepting or rejecting the proposals of the other; but it is an appointment or institution by a party infinitely exalted above the other, promising to confer or grant certain blessings in a particular way. God's *C.* with man signifies his solemn promise or engagement to do, or not to do, a certain thing. Thus, in his *C.* with Noah, he engaged that the waters of the deluge should not again cover the earth. The two great *C.* mentioned in Scripture are what are called the *Old* and *New*, or the first and the second; the former of which was that made by God with the children of Israel, when he took them to be a peculiar people unto

himself, and is also called the *Mosaic* or *Sinai C.*, because it was given to Moses on Mount Sinai. The second, or *New C.*, is that which was instituted by Jesus Christ, and ratified by the shedding of his blood, being the gracious charter or instrument by which God has revealed it to be his pleasure to dispense the sovereign blessings of his mercy to all who will accept of them. As used in a systematic sense, divines speak of two covenants,—that of *works*, and that of *grace*. The former is that which was made with Adam on his creation, in virtue of which he was constituted the federal head of the human race, and his acts became binding on his posterity. The *C.* of grace is a compact or agreement between God and believers, in which God promises to give them all the blessings of salvation, through and for the sake of Jesus Christ; and they, on their part, voluntarily engage to give themselves to God with a sincere faith. Some divines speak of a third *C.*, which they call the *C.* of *redemption*, or the engagement entered into between the Father and the Son, by which the Father constituted the Son the representative and redeemer of the human race, and the Son undertook their redemption.

(Hist.) The name applied to certain contracts or conventions entered into by the leading Protestants of Scotland, binding themselves to maintain their religious principles against innovation and opposition. The National *C.*, professing to be based upon a document which James VI. of Scotland had signed in 1580, was drawn up and published by the Four Tables in Edinburgh, March 1, 1638. The *Four Tables*, as they were called, consisted of: 1, Nobility; 2, Gentry; 3, Ministers; and 4, Burghesses; and in their hands the whole authority of the kingdom was vested. They elected a general assembly, which met at Glasgow, Nov. 21, 1638, and abolished episcopacy; ordering that every person should sign the *C.* on pain of excommunication. The Covenanters prepared for war, and though a treaty of peace was concluded, June 18, 1639, they entered England, August 20, 1640. An agreement was signed at Ripon, Oct. 26, 1640, by which commissioners were to be appointed, to whom the settlement of the points in dispute was referred. This covenant, under the name of the *Solemn League and Covenant*, was received by the parliament of the Assembly of Divines, Sept. 25, 1643. This document was signed by members of both houses, and by civil and military officers. A large number of the benefited clergy, who refused to subscribe, were ejected. Charles II. signed it very reluctantly at Spey, June 23, 1650. A majority in the House of Commons ordered it to be burned by the common hangman, May 17, 1661. In the same year the Scottish Parliament renounced the *C.*, and declared the king supreme. Those who refused to abjure the *C.* were regarded as rebels, and were obliged to betake themselves to the desert moors and mountains of their native country, where they were hunted like wild beasts till the establishment of freedom of conscience by the revolution of 1688. The sufferings, the courage, and the piety of the Covenanters have to this time endeared them to the Scottish mind. Long after the return of more peaceful times, their memory was cherished by the religious with the deepest reverence. The sect of the Cameronians still regard themselves as representatives of the old Covenanters. See CAMERONIANS.

Covenant, *v. n.* To enter into a covenant or formal agreement; to bind one's self by contract; to agree, contract, bargain, stipulate.

“By words men . . . covenant and confederate.”—South.

—*v. a.* To grant or yield by covenant.

Covantee, *n.* (Law.) A party in whose favor a covenant is made.

Covenantor, *n.* One who enters into, or makes a covenant in favor of another. See COVENANT, § Hist.

Covenanter, *n.* (Law.) The person who makes a covenant.

Covenous, *a.* (Law.) See COVINOUS.

Cov'ent, *n.* [O. Fr.] The old spelling of *convent*; as, *Cov'ent-garden*; *i. e.*, the Convent-garden.

Cov'ent-Garden. [Convent, old spelling of Convent.] A square in London, celebrated for its great market of fruit, vegetables, and flowers. It was originally the garden of Westminster Abbey. Near it is Covent-Garden Theatre, celebrated in the history of the stage.

Cov'entry, a city of England, in Warwickshire, 18 m. S.E. of Birmingham. Its most remarkable public building is St. Michael's Cathedral, a beautiful specimen of the pointed style of architecture. *Manuf.* Watches, ribbons, and silken fabrics. *C.* was formerly celebrated for its blue thread, used for embroidering on white linen, and known as *C. blue*. Pop. 54,153. The legend of Lady Godiva and Peeping Tom, which has long given a fame to the town, is narrated as follows:—Leofric, earl of Mercia, and lord of this place, had laid heavy taxes on the citizens, and would not remit them, even at the entreaty of his wife, the Lady Godiva,—who was as beautiful as she was modest,—except on condition of her riding naked through the city, which he thought she would never submit to. She, however, determined to do so; and, on the occasion, all the doors and windows were shut, and, Camden says, that nobody looked after her. The tradition, however, is, that a tailor would needs be peeping, and that he was thereupon struck blind. He is commemorated in an effigy protruding from a window in the High Street, and called “Peeping Tom of Coventry.” Till very lately this legend was annually illustrated by a pageant and procession.

To send to Coventry, *i. e.*, to ostracize a person from good society,—is an English saying which probably originated in the fact that at one time the citizens of *C.* had such a dislike to soldiers that a woman seen talking to a red-coat became at once the object of public scandal; hence,

in the mess-room, the term “to send a man to *C.*” was simply synonymous with debarring him from society.

Cov'entry, in Connecticut, a post-town and township of Tolland co.

Coventry, in New Hampshire, a township of Grafton co., about 70 m. N.W. of Concord.

Coventry, in New York, a post-village and township of Chenango co.

Coventry, in Ohio, a flourishing township of Summit county.

Coventry, in Pennsylvania, a village of Chester co., on French creek, abt. 67 m. E. S. E. of Harrisburg.

Coventry, in Rhode Island, an important town of Kent co., on a branch of the Pawtuxent river, 10 m. S.W. of Providence. Pop. (1890) 1,875.

Coventry, in Vermont, a post-village and township of Orleans co., 50 m. N. by E. of Montpelier.

Coventry Depot, in Connecticut, a post-office of Tolland co.

Coventryville, in New York, a post-village of Chenango co., 114 m. W.S.W. of Albany.

Cove Point, in Maryland, on Chesapeake Bay, N. of the mouth of Patuxent River. It has a fixed light 6 feet high.

Cover, (*kuv'er*), *v. a.* [Fr. *couvrir*, from Lat. *coopertre*, *con*, and *operio*, to cover.] To lay or place over, or over lay completely; to overspread; to clothe; to wrap up; to envelop; to infold, as, a hat *covers* the head.—To screen to conceal; to disguise; to cloak; to secrete; to hide from sight; as, to *cover* one's shame.

“Charity shall cover the multitude of sins.”—1 Peter iv. 8.

—To brood, hatch, or sit on; to incubate.

“Whilst the hen is covering her eggs, the male . . . diverts himself with his songs.”—Addison.

—To shelter; to protect; to defend; to shield.

“His calm and blameless life . . . And the soft wings of peace (doth) cover him round.”—Cowley.

—To be sufficient for; to include or comprehend; as, the business does not *cover* expenses.

—To wear a hat or head-dress, as a mark of dignity.

“The king had conferred the honour of grandee upon him, who was . . . to be covered in the presence of that king.”—Dryden.

—To copulate with; as, a horse *covers* a brood-mare.

—*n.* Anything which is laid, set, or spread over another thing; an envelope; as, the *cover* of a letter.

—Anything which veils or conceals; a screen; disguises; shelter; defence; protection; as, to be smug under *cover*.

“Under the cover of a supposed fact.”—L'Estrange.

—Retreat or place of habitation of wild animals or game, as, a *cover* for foxes, to beat a *cover* for partridges. See COVERT.

—A table-cloth; a plate set on a dinner-table; as, *cover* were laid for twelve persons.

Cover'cle, *n.* A lid; a small cover.

Covered, (*kuv'erd*), *a.* Devised and adapted for shelter and protection; as, a *covered* way.

Covered-way, *n.* (*Portif.*) A space left between the glacis and the edge of the ditch, all round the work. The glacis forms its parapet; it is provided with a banquette for musketry defence, and is often palisaded to prevent an enemy taking it by a sudden rush. Here the garrison assemble before making sorties. It is generally about 11 yards broad.

Cover'er, *n.* He or that which covers.

Cover'ing, *n.* That which covers; anything spread laid over another, whether for security, protection, concealment; envelope; wrapper; integument; calid; cover; clothing; dress; bed-clothes.

“With *cover'ings* of Sidonian purple spread.”—Dryden.

Cover'let, *n.* [*Cover*, and Fr. *lit*, Lat. *lectus*, a bed couch.] A bed-cover; a piece of furniture designed to spread over all the other covering of a bed.

Cover'ley, (SIR ROGER DE,) the name given to a famous old English country dance, which in England almost invariably forms the last dance at public balls.

Coversed sine of an angle. (*Geom.*) The versine of the complementary angle.

Cov'er-shame, *n.* Something which is used to conceal infamy.

“Does he put on holy garments for a *cover-shame* of lewdness?”—Dryden.

Cov'er-slut, *n.* Something used to conceal slut habits.

Cov'ert, *a.* [Fr. *couvert*.] Concealed; private; hid; cret; disguised; insidious; as, a *cov'ert* design.

“And let us presently go slt in council How *cov'ert* matters may be best disclosed.”—Shaks.

—Sheltered; well protected; not open nor exposed; a *cov'ert* alley.

—*n.* A place which covers or shelters; a thicket; a bra; a shady place, or a hiding-place.

“The deer is lodg'd; I've track'd her to her *cov'ert*.”—Addison.

—Base-feathers on the quills of a bird's wings.

—*pl.* (*Zoöl.*) The *lesser cov'erts* (*testrices primæ*) are sn feathers which lie in several rows on the bones of wings of birds. The *greater cov'erts* (*testrices secundæ*) are the feathers that lie immediately over the qu feathers and the secondaries. The *under cov'erts* are feathers that line the inside of the wings.

Cov'ert, in Michigan, a post-office of Van Buren co.

Cov'ert, in New York, a post-village and township of Seneca co., on Cayuga Lake, 25 miles S. by E. of Waterloo.

Cov'ert-Baron, *n.* [O. Fr. See BARON.] (*Law*) A wife who is under the protection of her husband.

Cov'ertly, *adv.* In private; secret; closely; insidiously.

Cov'ertness, *n.* Secrecy; privacy; insidiousness.

Cov'erture, *n.* [Fr. *couverture*.] Covering, defence, shelter.

“Their shame that sought vain *cov'ertures*.”—Milton.

William Cowper

1731-1800

(Law.) The condition of a woman during marriage, because she is then under the cover, influence, and protection of her husband.

Over-way, n. (Portif.) See COVERED-WAY.

Over Station, n. In Pennsylvania, a post-office of Huntingdon co.

Oves'ville, n. In Virginia, a post-village of Albemarle co., abt. 103 m. W.N.W. of Richmond.

Ovet, (kuv'et.) v. a. [Fr. *concoiler*, from Lat. *con*, and *rotum*, from *rovo*, to vow, to wish for.] To wish for, or seek after with the whole desire of the heart; to desire earnestly to obtain; to long for; — in a good sense.

"But covet earnestly the best gifts." — 1 Cor. xii. 31.

To desire inordinately, unreasonably, or unlawfully; to thirst, lust, or hanker after; to desire eagerly to obtain that which it is unlawful to obtain or possess; to desire to obtain by unlawful means; as, to covet another man's wife.

"If it be a sin to covet honour,
I am the most offending man alive." — *Shaks.*

v. i. To have an earnest desire; — generally preceding after; as, he coveted after money.

Ov'etale, a. That may be coveted or eagerly desired.

Ov'eter, n. One who covets.

Ov'etingly, adv. Betokening an eagerness to unlawfully obtain.

Ov'etiveness, n. (Phren.) Acquisitiveness.

Ov'etion, n. In Virginia, a post-office of Barbour co.

Ov'etous, a. [Fr. *convoiteux*.] Very desirous; eager to obtain. — Excessively eager to obtain and possess; avaricious; eager for gain.

"The cruel nation covetous of prey." — *Dryden.*

Ov'etously, adv. With a strong or inordinate desire to obtain and possess; eagerly; avariciously.

Ov'etousness, n. Quality of being covetous; a strong or inordinate desire of obtaining or possessing; avarice or cupidity; eagerness for gain.

"Excess of wealth is cause of covetousness." — *Marlowe.*

Ove'ville, n. In New York, a post-office of Saratoga co.

Ove, (kuv'e.) n. [Fr. *couver*, from *couver*, to hatch, from Lat. *cubare*, to lie down.] An old bird with her young ones; but generally used to designate a number of partridges or other game. It also, in some countries, signifies a cover for game.

Ovin, n. (Law.) A compact between two or more persons to deceive or prejudice others.

Oving, n. [See COVE.] (Arch.) The exterior projection of the upper part of a building beyond the limits of the ground-plan. — *C. of a fire-place*, the vertical sides, inclining backwards and inwards, for the purpose of reflecting the heat.

Ovington, n. In Alabama, a southern co., bordering on Florida; area, 1,240 sq. m. It is intersected by the Conch and Yellow-water rivers. Surface, broken; soil, sandy. Cap. Andalusia.

Ovington, n. In Georgia, a town, cap. of Newton co., abt. 20 m. W. of Augusta. Pop. (1897) abt. 2,000.

Ovington, n. In Illinois, a village of Washington co., abt. 100 m. S. of Springfield.

Ovington, n. In Indiana, a city, cap. of Fountain co., 73 n. W.N.W. of Indianapolis. Pop. (1897) abt. 2,100.

Ovington, n. In Kentucky, a city, cap. of Kenton co., on the Ohio River, opposite Cincinnati, and at the mouth of Pickens River, which separates it from the town of Newport. It is well built, has many factories and may be deemed a suburb of Cincinnati. Pop. (1897) abt. 40,000.

Ovington, n. In Louisiana, a post-village, cap. of St. Tammany parish, 45 m. N. of New Orleans.

Ovington, n. In Mississippi, a S. co.; area, about 680 sq. m. It is intersected by Bouie River and Sun Creek, affluents of Leaf River. Soil, sandy. Cap. Williamsburg. Pop. (1890) 5,993.

Ovington, n. In Missouri, a village of Warren co.

Ovington, n. In Nebraska, a post-village and township of Dakota co.

Ovington, n. In North Carolina, a post-village of Richmond co., 80 m. S.W. of Raleigh.

Ovington, n. In New York, a post-village and township of Wyoming co., 33 m. S.W. of Rochester.

Ovington, n. In Ohio, a post-village of Miami co., on Tillwater Creek, 6 m. W. of Piqua.

Ovington, n. In Pennsylvania, a township of Clearfield county.

Ovington, n. In Pennsylvania, a township of Luzerne co.

Ovington, n. In Tennessee, a town, cap. of Tipton co., 9 m. W. by S. of Nashville. Pop. (1897) abt. 1,200.

Ovington, n. In Texas, a post-village of Hill co., about 13 N.N.W. of Hillsborough.

Ovington, n. In Virginia, a township, cap. of Alleghany co., on Jackson's River, 196 m. W. by N. of Richmond.

Ovinous, Cov'enus, a. (Law.) Collusive; fraudulent; dishonest.

Ovide, n. In Pennsylvania, a post-office of Indiana co.

Ov, n.; pl. Cows; old pl. KINE. [A. S. *ca*; Fris. *ku*; i. *koe*; Ger. *kue*; O Ger. *kü. kua*; Sansk. *gū*. The root occurs in the Heb. *gagha*, to low.] (Zool.) The female of the bull, or of the bovine genus of animals. See OX and DAIRY.

Ov, n. chimney covering. See COWL.

Ov, v. a. [Swed. *kufra*; Icel. *kuga*, to force; Dan. *kue*, probably allied to Swed.-Goth. *quafra*, to choke, damp, to suffocate. See CHOKER.] To depress with fear; to sink the spirits or courage of; to oppress with habitual timidity; to discourage; to dishearten.

"For when men by their wives are cow'd,
Their horns of course are understood." — *Hudibras.*

Ov'an, n. In Pennsylvania, a post-office of Union co.

Cow'an, n. In Tennessee, a township of Franklin co., abt. 87 m. S.S.E. of Nashville.

Cowanesque' Creek, n. In Pennsylvania, rises in Potter co., traverses Tioga co., and enters the Tioga River in Steuben co., New York.

Cowanesque, n. In Pennsylvania, a post-office of Tioga county.

Cow'anshan'noek, n. In Pennsylvania, a township of Armstrong co.

Cow'anshan'noek Creek, n. In Pennsylvania, traverses Armstrong co., and enters the Alleghany River.

Cow'anville, n. In Lower Canada, a village of Missisquoi co., about 35 m. S.E. of St. John's.

Cowansville, n. In N. Carolina, a village of Rowan co., about 100 m. W. by S. of Raleigh.

Cowansville, n. In Pennsylvania, a P.O. of Armstrong co.

Coward, n. [O. Fr. *coward*; It. *codardo*, from *coda*, Lat. *cauda*, the tail: — probably in allusion to the fact that animals, when frightened, put the tail between the legs.] A person who lacks courage to meet danger or difficulty; a timid or pusillanimous man; a poltroon; a craven; a dastard.

"Where's the coward that would not dare
To fight for such a land?" — *Scott.*

(Her.) A lion borne on a shield with his tail depressed between his hind legs.

a. Destitute of courage; dastardly; timid; base.

"O coward conscience, how thou dost afflict me." — *Shaks.*

—Belonging to, or characterizing, a coward.

"I raised the house with loud and coward cries." — *Shaks.*

v. a. To frighten; to make to appear cowardly or timorous.

Cowardice, (kouv'ard-is.) n. [O. Fr. *cowardise*.] Want of courage to face danger or difficulty; timidity; pusillanimity.

Cowardliness, n. Quality of being cowardly; want of courage; timorousness; cowardice; timidity.

Cowardly, a. Wanting courage to face danger; pusillanimous; dastardly; timid; faint-hearted.

"His genius was poor and cowardly." — *Bacon.*

—Befitting a coward; proceeding from fear; mean; base.

"I do find it cowardly and vile." — *Shaks.*

—adv. In the manner of a coward; meanly; basely.

Cowbane, n. (Bot.) See ARCHEMORA and CICTA.

Cowberry, n. (Bot.) See VACCINIUM.

Cow-bird, n. (Zool.) *Melothrus pecoris*, a N. American bird of the Icteridae or Blackbird family. The most remarkable trait in its character is the unaccountable practice it has of dropping its eggs into the nests of other birds, instead of building and hatching for itself; and thus abandoning its progeny to the care and mercy of strangers.

Its length is 7 inches; breadth, 11 inches; the head and neck is of a very deep silky drab; the upper part of the breast a dark changeable violet; the rest of the bird is black, with a considerable gloss of green when exposed to a good light; the tail is slightly forked; legs and claws, glossy black, strong, and muscular; iris of the eye, dark hazel. It inhabits the Southern States, but visits the N. in the summer.

Cow-brawl, n. (Mus.) An old and very celebrated Swiss melody or tune. Rossini has introduced this air with remarkable effect in the overture of *William Tell*.

Cow-eatcher, n. An iron apparatus, or frame-work, placed in front of a locomotive-engine, for throwing obstructions off a railroad-track, as cattle, &c.

Cow Creek, n. In California, traverses Shasta co., and enters the Sacramento River about 10 m. below Shasta City.

Cow Creek, n. In Illinois, a township of Gallatin co.; pop. abt. 1,200.

Cow'die, n. (Bot.) See DAMARA.

Cow'elitsk (or Cow'elitz) Indians, n. a tribe inhabiting Washington, N. of the Columbia river.

Cow'er, v. i. [Ger. *kauern*, to cower; Swed. and Goth. *kura*, to recline and rest after the manner of birds; Icel. *kura*, rest; akin to W. *cuerian*, to squat, to cower.] To crouch; to squat; to sink by bending the knees; to shrink through fear.

"Our dame sits cow'ring o'er a kitchen-fire." — *Dryden.*

Cowes, (kouv'ez.) n. a British sea-port, on the N. coast of the Isle of Wight, Lat. 50° 45' N., Lon. 1° 17' 45' W. It is built on both sides of the river Medina, dividing it into two towns, East and West Cowes. The town has an excellent harbor, is much frequented for watering ships, and is the head-quarters of the Royal Yacht Club, and, moreover, a place of very fashionable resort, not only in the season, but for the greater part of the year. Pop. 7,071.

Cow'eta, n. In Georgia, a W.N.W. co.; area, abt. 375 sq. m. It is bounded on the N.W. by the Chattahoochee River, and on the E. by Line Creek. It is traversed by the Cedar, Wahoo, and sandy creeks. Surface, broken; soil, generally fertile. Cap. Newnan. Population, (1890) 22,400.

Cow'hage, n. (Bot.) See DOLICHOS.

Cow'heel, n. (Cookery.) A cow's-foot boiled, and served with milk and onions.

Cow'herd, n. A tender of cows.

Cowhide, n. The hide of a cow undressed. — Leather made of the hide of a cow. — A whip made of a thick thong of cowhide.

—v. a. To administer a flogging with a cowhide.

Cow-house, n. A place for housing cows; a byre. See SHEDDING.

Cow'ikee, n. In Alabama, a post-office of Barbour co.

Cowikee Creek, n. In Alabama, traversing Barbour co., flows into the Chattahoochee, abt. 10 m. above Eufaula.

Cow'ish, a. Timorous; pusillanimous; cowardly.

"It is the cow'ish terror of his spirit." — *Shaks.*

—n. (Bot.) Same as COWHAGE. See DOLICHOS.

Cow'iteh, n. (Bot.) See DOLICHOS.

Cow'-keeper, n. A dairyman; one whose vocation is to keep cows for retailing milk to the public.

Cowl, n. [A. S. *cugle*, *cugle*, *cuhle*; Lat. *cucullus*; Armor. *kougoul*; W. *cucull*, a cowl, from *cugn*, a knot, the primitive cowl being a piece of cloth tied round the head by a knot.] A sort of hood worn by the Bernardines and Benedictines. They are of two kinds, — the one white and very large, worn on ceremonial occasions and when assisting at the office; the other black, and worn on ordinary occasions, in the streets, &c.

—A cap or cover for a chimney which turns with the wind, used to facilitate the escape of smoke. (Sometimes written *cowl*.) — A wire cap covering the smoke-stack of a locomotive engine. — A vessel carried on a pole by two persons for the transport of water.

Cowled, (kouv'led.) a. Wearing a cowl; hooded; cowl-shaped; as, a cowled friar.

Cow'-leech, n. One who professes to cure the diseases of cattle.

Cow'-leeching, n. Art or practice of curing distempers in cows.

Cow'ley, n. In Kansas, a S. E. co., bordering on the Indian Ter.; area, 894 sq. m. Cap. Winfield.

Cow'ley, ABRAHAM, n. an English poet, b. in London, 1618. He is now almost forgotten, but was highly esteemed by Milton and Dr. Johnson. D. 1687.

Cowley, HENRY WELLESLEY, LORD, (brother to the Duke of Wellington, b. 1773; and his son HENRY RICHARD, EARL COWLEY, were successively for many years British ambassadors to the courts of Vienna, Paris, &c. The former d. 1847.

Cow'liek, n. A wisp or tuft of hair turned up the temples, as if linked by a cowl.

Cow'litz, or Cowlitz, n. In Washington, a N.W. co., bounded on the S. by the Columbia River. Traversed by the Cowlitz River. Area, abt. 420 sq. m. Cap. Kalama. — The Cowlitz, Cow'luk, or Cow'elitsk river joins the Columbia river about 60 m. from its mouth. Pop. in 1897, abt. 6,000.

—A post-village of Lewis co., on the Cowlitz River, 45 m. S. of Olympia.

Cow'l-staff, n. The staff or pole on which a cowl is supported between two men.

Cow'ner, n. (Naut.) An arched part of a ship's stern.

Cow'-worker, n. A co-operator; one who works jointly with another.

Cow'-parsnip, n. (Bot.) See HERACLEUM.

Cowpasture River, n. In Virginia, joins Jackson's River to form James River.

Cow'-pea, n. A variety of pea, cultivated instead of clover, in some parts of the U. States.

Cow'pens, n. In Georgia, a village of Walton co.

Cowpens, n. In S. Carolina, a vill. of Spartanburg district; near it, on Jan. 17, 1781, a signal victory was gained by the American forces under Gen. Morgan, over the English under Col. Tarleton.

Cow'per, WILLIAM, n. an English poet, b. at Berkhamstead, 1761, was the great-nephew of the lord-chancellor Cowper. After completing his education, his family procured him the place of clerk to the House of Lords, but his nervousness and constitutional timidity were such, that he was obliged to resign it. He now fell into so terrible a state of nervous debility, that he was for some time placed in the lunatic asylum of Dr. Cotton. The skill and humanity of that gentleman restored him, and he retired to Huntingdon. Here he became acquainted with the family of the Unwins; and after Mr. Unwin's death he removed with Mrs. Unwin to Olney, Bucks. His natural melancholy colored his religious views and feelings, and he fell often into the most painful despondency. But although his mind was so frequently bent down by dejection, he was a very voluminous writer. In addition to translating Homer, which he did with more accuracy than Pope, if with less polish, he wrote *The Task*, — the best of all his poems. — *Tirocinium*, and a host of smaller works; translated some of Madame Guyon's spiritual songs; and his correspondence, which exhibits him as one of the most elegant of English letter-writers, was extremely voluminous. Towards the close of his life his gloom deepened into absolute despair, from which he never wholly emerged, and he d. in Norfolk, 1800, four years after his benevolent friend, Mary Unwin.

Cow'-pox, n. (Med.) The vaccinia disease. The slight febrile symptoms that attend this artificial disease are hardly of sufficient importance to merit a notice here. See VACCINATION.

Cow'-quake, n. (Bot.) The quaking-grass. See BAIZA.

Cow'rie, Cow'ry, n. [Hind. *kauri*.] A small shell used in the East Indies, as an equivalent for money, and of fluctuating value. See CYPRIDE.

Cow'-skin, n. In Mississippi, a P. O. of Douglas co.

Cow'slip, n. [A. S. *cuslippa* — *cu*, a cow, and *lippa*, a lip.] (Bot.) See PRIMULA.

Cow's-lungwort, n. (Bot.) A species of mullein. — *Johnson.*

Cow'-tree, n. (Bot.) See BRASSICA.

Cow'-wheat, n. (Bot.) See MELAMPYRUM.

Cox, n. A diminutive form of COXCOMB. B.

Cox, DAVID, R.A., n. a distinguished English painter of landscape in water-colors, b. at Birmingham, 1793. His pictures of Oriental scenery are very fine. D. 1859.

Fig. 706. — COW-BIRD.
(*Melothrus pecoris*.)

Cox'cie, MICHAEL, a celebrated Flemish painter, b. at Mechlin, 1497; d. 1592. His pictures are now rare and valuable.

Coxcomb, (*koks'kôm*), *n.* [*Cock's comb*.] The comb resembling that of a cock, which licensed fools wore formerly in their caps; also the cap itself.

"If thou wilt follow him, thou must needs wear my coxcomb." *Shaks.*

—The top of the head.

"She rapt them o' th' coxcombs with a stick." — *Shaks.*

—A fop; a dandy; a vain, showy fellow; a superficial pretender to knowledge or accomplishments.

"And some made coxcombs, nature meant but fools." — *Pope.*

(*Bot.*) See CELOSTIA.

Coxcombal, **Coxcomical**, (*koks-kom'ical*), *a.* Foppish; conceited; pretentious; after the manner of a coxcomb; as, a coxcombal fashion.

Coxcombry, *n.* The manners or dress of a coxcomb; foppishness; dandyism.

Coxe, ARTHUR CLEVELAND, an American prelate, poet and ecclesiastical writer of great fame, was born in 1818; studied theology and became deacon in the P. E. Church in 1841, priest in 1842. Was rector of St. John's, Hartford, Conn., 1843-54; afterward of Grace Church, Baltimore, and in (1863) of Calvary Church, New York. In 1864 became assistant bishop of Western New York, succeeding Bishop DeLancey upon the latter's death in 1865. Bishop C. was a man of exceeding piety and sweetness of character, evidences of which are easily perceptible in his poems and other writings. Died at Clifton Springs, N. Y., July 20, 1896.

Coxe, TENCH, an American writer on political economy, b. 1756. Among his chief works are, *Memoir on the Cultivation, Trade, and Manufacture of Cotton* (1809), and *On the Arts and Manufactures of the United States* (1814). D. at Philadelphia, 1824.

Coxe, WILLIAM, an English divine and historian, b. in London, 1747. Among his many works, those which have maintained a standard reputation are the *History of the House of Austria, History of the Kings of France of the House of Bourbon*, and the *Memoirs of the Duke of Marlborough*. D. 1828.

Coxendix, *n.* [*Lat.*] (*Anat.*) The haunch.

Coxim River, in Brazil, rises in the prov. of Matto-Grasso, and joins the Taquari in Lat. 18° 24' S.

Coxsackie, in New York, a post-village and township of Greene co., about 22 m. S. of Albany.

Cox's Mills, in West Virginia, a P. O. of Gilmer co.

Coxswain, (*koks'n*), *n.* (*Naut.*) See COCKSWAIN.

Coxtown, in Pennsylvania, a P. O. of Berks co.

Coxville, in N. Carolina, a post-office of Pitt co.

Coy, *a.* [*O. Fr. quoy*; *Fr. coi*; *Sp. quído*, from *Lat. quietus*.] Gentle; reserved; shy; shrinking from approach or familiarity; distant; backward; modest; bashful; as, a coy demeanor.

"O woman! in our hours of ease,
Uncertain, coy, and hard to please." — *Scott.*

—*v. a.* To bestow a caress by the hand.

"While I thy amiable cheeks do coy." — *Shaks.*

—*v. n.* To behave with reserve; to reject or shrink from contact or familiarity.

"What, coying it again!" — *Dryden.*

—To be backward and unwilling; to make difficulty.

"To hear Corninus speak, I'll keep at home." — *Shaks.*

Coyacan, a town of Mexico, on a small stream flowing into Laguna de Ochochmilco, about 10 m. S. of the city of Mexico.

Coyish, *a.* In a coy manner; somewhat coy or diffident.

Coyleville, in Pennsylvania, a P. O. of Butler co.

Coyly, *adv.* With reserve; with disinclination to familiarity.

Coyne, JOSEPH STIRLING, a popular English dramatist, b. 1805. He was early intended for the legal profession, which, however, he soon abandoned for the literature of the stage. In 1835 he made his *début* as a playwright, and from that time forward poured forth an almost innumerable succession of dramas and farces. Among the more noticeable of these are, *Presented at Court*, *Pets of the Parterre*, *Did you ever send your Wife to Cambridge*, *The Tipperary Legacy*, *Pas de Fascination*, &c. His popular farce, *How to Settle Accounts with your Landlady*, was brought out upon both the French and the German stage. C. was also a writer of fiction, and author of *The Scenery and Antiquities of Ireland*. D. 1868.

Coyness, *n.* Quality of being coy; reserve; shyness; backwardness; modesty; bashfulness.

"When the kind nymph would coyne feign,
And hides but to be found again." — *Dryden.*

Coyote, *n.* (*Zoöl.*) The Prairie-wolf. See WOLF.

Coyote, in Kansas, a post-office of Ellis co.

Coypu, COYU, *n.* (*Zoöl.*) The *Myopotamus coipus* of Cuvier, a S. American rodent animal, family *Sciuridae*. It resembles the beaver in many respects, though of smaller size. Its head is large and depressed; ears small and rounded; muzzle pointed, with long stiff whiskers. Its hind feet are webbed, and its habits are aquatic; it swims with great ease, lives in the vicinity of water, and burrows in the ground. Its tail is round, instead of being flattened like that of the beaver, and its scaly covering is partly concealed by scattered hairs. It is easily domesticated, and its manners in captivity are very mild. The C. has two kinds of fur: long ruddy hair, which gives the tone of color; and a brownish ash-colored fur at its base, which, like that of the beaver, is used largely in the manufacture of hats. The fur is known in commerce under the names of *Racoonda* and *Nutria*.

Coyse'vox, ANTOINE, an eminent French sculptor, b. at Lyons, 1640, d. 1720.

Coystrel, *n.* Same as COISTREL, *q. v.*

Coy'ville, in Kansas, a post-village cap. of Wilson co.

Coy'za, *n.* (*Med.*) A cold in the head, with a running from the eyes and nose. See CATARRH.

Coz, *n.* A familiar contraction of *cousin*.

"Be merry, coz." — *Shaks.*

Coz'bi, a Midianite princess, daughter of Zur, and seducer of the Israelites, through the wicked counsels of Balaam.

Cozen, (*küz'n*), *v. a.* [*Ger. kosen*, to talk, caress; *O. Ger. kôsôn*, to talk, dispute; *Mid. Ger. kosen*, to flatter.] To cheat, defraud, befoo, deceive, or beguile, as by artifice or chicanery.

"Goring loved no man so well but that he would cozen him, and expose him to public mirth for having been cozened." — *Clarendon.*

Cozenage, (*küz'a-aj*), *n.* Cheat; trick; fraud; deceit; artifice; chicanery; practice of cheating.

"They say this town is full of cozenage." — *Shaks.*

Coz'ener, *n.* One who cheats, cozens, or defrauds.

Cozily, **Co'sily**, *a.* Comfortably; snugly; as, cozily asleep.

Cozumel Island, off the coast of Yucatan, Lat. 20° 35' N., Lon. 86° 41' W. It is about 24 m. in length from N. to S., and 7 in width.

Cozy, **Co'sy**, **Co'sey**, *a.* [*Fr. causer*, to chat.] Snug; comfortable; easy; contented; as, a cozy little wife.

—In England, sociable; homely; domestic; familiar; as, a cozy chat.

Cr, An abbreviation of the word CREDITOR. (Opposed to *Dr.* for debtor.)

Crab, *n.* [*A. S. crabba*; allied to *grab* and *gripe*.] (*Zoöl.*) See CANCEER.

(*Bot.*) The wild apple, sometimes so called from its harsh taste.

(*Mech.*) A wooden apparatus, somewhat like a capstan, but not furnished with a drum-head; it is used for similar purposes, and furnished with holes made to insert the bars. — A machine with three claws, used to launch ships, to heave them into dock, off the quay.

(*Astron.*) A sign of the zodiac. See CANCEER.

—A sour, peevish, cross-grained, morose person.

To catch a crab. (*Sport.*) To make a bad stroke in rowing by allowing the oar to miss its dip in the water, and in so doing jerking the rower backwards.

—*v. a.* To enbitter; to annoy; to cause to be provoking to; as, adversity crabs some natures. — To cudgel or beat with a crab-stick or sapling.

—*a.* Rough; sour; austere; harsh; as, a crab vintage.

Crabbe, GEORGE, (*kráb*), an English poet, whose truth to nature and strength of homely pathos atone for deficiency in ideal elevation, was b. in 1754, at Aldborough, in Suffolk, where his father was collector of salt duties. He went through an apprenticeship with a surgeon, and for a short while attempted practice; but, always attached to letters rather than business, he had little success, and came to London in 1780 to seek his fortune. When the failure of his first poem, *The Candidate*, had reduced him to great distress, he boldly laid his case before Edmund Burke. That great man read his manuscripts, received him into his house at Beaconsfield, and introduced him to his friends; and the

Fig. 707. — CRABBE'S BIRTHPLACE.

poem of *The Library*, published on his recommendation, was received with great applause. His reputation was increased by *The Village*, which appeared in 1783; and the publication of *The Newspaper*, in 1785, closed the first series of his works. In the meantime, orders having been obtained for him, he became chaplain to the Duke of Rutland, married happily, and received in succession several moderate preferments. In 1807 he published *The Parish Register*, to which were added *Sir Eustace Grey*, and other small poems; and *The Borough*, the most various and energetic of his works, made its appearance in 1810. In 1813, soon after the death of his wife, he was presented to the living of Trowbridge, in Wiltshire, where he spent the remainder of his quiet and honorable life. His *Tales of the Hall* were published in 1819. D. 1832.

Crabbed, *a.* Rough; peevish; austere; cynical;—applied in a mental, moral, or spiritual sense; as, a crabbed old maid.

—Harsh; rough; sour; unpleasing;—in relation to material things.

"A man . . . of swarth complexion, and of crabbed hue." — *Spenser.*

—Difficult; perplexing; not easy to comprehend.

"Lucretius hath chosen a subject naturally crabbed." — *Dryden.*

Crabbedly, *adv.* Peevishly; roughly; morosely; with perplexity.

Crabbedness, *n.* Quality of being crabbed; roughness; harshness; sourness; peevishness; asperity; difficulty; perplexity; as, crabbedness of disposition.

Crab'by, *a.* Sour; difficult; unapproachable.

Crab'-eater, *n.* (*Zoöl.*) See AGOUARA.

Crab'er, *n.* The water-rat.

"The cormorant, and the crab'er, which some call the water-rat." *Walter.*

Crab'-faced, *a.* Having a sour visage or perplexed countenance.

Crab'-grass, *n.* (*Bot.*) See ELEUSINE.

Crab'ite, *n.* (*Pal.*) A name sometimes applied to fossil crustaceans of the crab kind.

Crab Or'chard, in Illinois, a P. O. of Williamson co.

Crab Or'chard, in Kentucky, a post-vill. and twp. of Lincoln co., abt. 60 m. S. by E. of Frankfort.

Crab Orchard, in Missouri, a P. O. of Ray co.

Crab Orchard, in Nebraska, a P. O. of Johnson co.

Crab Orchard, in Tennessee, a post-office of Cumberland county.

Crab Orchard, in Virginia, a P. O. of Lee co.

Crab'ro, *n.*, **Crabron'idæ**, *n. pl.* (*Zoöl.*) A genus and family of Hymenopterous insects, popularly known as Wood-wasps. Most of the larger species are marked with yellow rings; the smaller are generally wholly black. They are extremely active in their movement and may be seen lively employed, in the hottest sunshine, extracting nectar from the flowers, or running about in search of other insects, on which they prey.

Crab's-claws, **Crab's-eyes**, *n. pl.* (*Med.*) Different names for the common prepared chalk. See LIME.

Crab'-tree, *n.* The tree that bears crab-apples, or wild apples, as the *Malus bacchata*, &c.

Crab Tree, in Pennsylvania, a post-office of Westmoreland co.

Crab Tree, in N. Carolina, a P. O. of Haywood co.

Crab'-yaws, *n.* (*Med.*) The name in the W. Indi for a kind of ulcer on the soles of the feet, with edges so hard, that they are difficult to cut.

Crac'idæ, *n. pl.* (*Zoöl.*) A family of birds, corresponding to the family PENELOPIDÆ, *q. v.*

Crack, *v. a.* [*Du. krak*; *Fr. crac*; formed from the sound.] To break, rend, or burst into chinks; to break partially, so as to cause a fissure; to split; as, to crack a porcelain vase.

"Look to your pipes . . . lest the frost crack them." — *Mortimer.*

—To produce a sharp, abrupt sound; to snap; as, to crack a whip.

"To crack the voice of melody." — *O. W. Holmes.*

—To make crazy or deranged; to weaken the intellect.

"He thought none poets till their brains were cracked." — *Roscomm.*

—To thrust out; to utter smartly or pungently.

"He takes his chirping point, he cracks his jokes." — *Pope.*

—To puff; to praise with exaggeration;—preceding *u* as, to crack up the merits of an article. (*Colloq.*)

—To break into for a burglarious purpose; as, to crack a house. (*Slang.*)

—*v. i.* To burst partially; to split; to open in chinks; to crack one's skull.

"By misfortune it cracked in the cooling." — *Boyle.*

—To utter a loud or sudden sharp sound.

"As loud

As thunder, when the clouds in autumn crack." — *Shaks.*

—To break into pieces; to become worthless or ruined, as, his credit is cracked.

—To boast; to swagger; to talk big or pompously with *qf.* (*Colloq.*)

"And Ethiops of their sweet complexion crack." — *Shaks.*

—*n.* The sharp, abrupt sound which is made when a brittle substance partially bursts, rends, or breaks, when hard bodies come into collision, &c.; a sharp loud sound uttered suddenly or with vehemence; a loud report; as, the crack of ice.

"What, will the line stretch out to th' crack of doom?" — *Shaks.*

—A disruption; a chink or fissure; a narrow breach or crevice; a partial separation of the parts of a substance, as, a crack in the ground.

"Contusions, when great, do usually produce a fissure or crack of the skull." — *Wiseman.*

—Craziness of intellect; partial derangement of the mental faculties; lunacy; as, a crack in the brain.

—A crazed person; one who is insane.

"Parliament . . . looks upon me as a crack and a projector." *Addison.*

—That change of the voice which occurs at puberty.

"Now our voices

Have got the mannish crack." — *Shaks.*

—Breach of chastity; as, she has a crack in her reputation.

"I cannot believe this crack to be in my dread mistress." — *Shaks.*

—A common harlot; a prostitute; as, a crack on the to.

—A boast; a bounce; a piece of brag.

"Leasings, backbitings, and vain-glorious cracks." — *Spenser.*

—A forward lad; one with pertness and assumption of language. — A moment; an immediate space of time, as, I'll be there in a crack. (*Vulgar.*)

—A horse famous for its speed; as, a racing crack.

—*a.* Something above the common in point of excellence, as, a crack orator, a crack horse, a crack ship.

Crack'-brained, *a.* Having the intellect impaired or crazy.

"The ill-grounded sophisms of those crack-brained fellows." — *Johnson.*

Crack'er, *n.* He who, or that which, cracks.

(*Pyrotech.*) A kind of firework, containing a quantity of gunpowder tightly confined in thick rolls of paper and exploding with a loud, sharp noise.

"With squibs and crackers arm'd to throw

Among the trembling crowd below." — *Swift.*

—An idle boaster; a loud, swaggering fellow.

"What cracker is this same, that deafens our ears

With this abundance of superfluous breath?" — *Shaks.*

A hard, thin biscuit: as, a *cracker* with cheese.
A mean white person. (A cant term used sometimes in the Southern States.)

Cracker's Neck, in Georgia, a village of Greene co., about 30 m. N. of Milledgeville.

Crack-hemp, **Crack-rope**, *n.* A gallows-bird; a man deserving the gallows; a person destined to be hanged.

"Come hither, crack-hemp. — Come hither, you rogue." — *Shaks.*

Crackle, (*krak'l*), *v. i.* [Dim. of *crack*, *q. v.*] To make slight cracks; to make small abrupt noises, rapidly or frequently repeated; as, to *crackle* paper.

"The unknown ice
That crackles underneath them." — *Dryden.*

Crack-ling, *n.* The making of small, abrupt cracks or reports, frequently repeated; as, the *crackling* of twigs. The rind of roasted pork.

pl. A kind of oil-cake, used as food for dogs.

Crack-nel, *n.* [*Fr. craquelin*.] A hard, brittle cake or biscuit.

"His kids, his cracknels, and his early fruit." — *Spenser.*

Crack-rope, *n.* Same as CRACK-HEMP, *q. v.*

Crack-skull, *n.* A crazy or heedless fellow.

Crack-smann, *n.* A burglar. (*Eng. slang.*)

Crack-vian, *n.* (*Geog.*) A native or inhabitant of Cracow.

v. Relating, or pertaining, to Cracow.

Cracovienne, (*krá-kóv-yan*), *n.* (*Dancing.*) The national dance of the Polish peasantry around Cracow. It has rather a melancholy than lively melody, in $\frac{2}{4}$ time, and is accompanied by singing.

Cracow, (*krá'ko*), a city of Central Europe, previously to the 17th century the metropolis of the kingdom of Poland; now comprised in the Austrian empire. It is

curious to contrast the magnificently artistic cradles exhibited in any modern furniture-store, with the cradle of a prince in the 14th century, represented in *Fig. 709*. It was made for the use of Henry Prince of Wales, afterwards king Henry V.

"To rock the cradle of reposing age." — *Pope.*

—State of infancy, or the earliest period of life; as, Greece was the *cradle* of the arts.

"Trained even from their *cradles* in arms and military exercises." — *Spenser.*

(*Ship-building.*) A frame placed under the bottom of a ship, in order to conduct her steadily into the water when she is to be launched, at which time it supports her weight while she slides down the descent or sloping passage called the *ways*, which are for this purpose daubed with soap or tallow.

(*Agric.*) A scythe with a frame to receive the grain when it is mowed.

(*Surg.*) A semicircle of thin wood, used for preventing the contact of the bed-clothes in wounds, fractures, &c.

(*Engraving.*) An apparatus employed in preparing the plates for mezzo-tinto engravings.

(*Mining.*) A wooden machine, resembling a child's cradle, used by gold-miners for washing away the detritus of gold from ores or sand.

—*v. a.* To lay in a cradle; to rock in a cradle.

"Conveyed to earth, and cradled in a tomb." — *Dryden.*

—To foster; to nurse in infancy; to nurture.

"Most wretched men
Are cradled into poetry by wrong;
They learn in suffering what they teach in song." — *Shelley.*

—To apply a cradle to; as, to *cradle* a ship.

—To cut and lay with a cradle, as standing grain.

—*v. n.* To lie or lodge in a cradle.

Cradle-clothes, *n. pl.* Coverings belonging to a cradle.

Cradle-hole, *n.* A gully produced across a sleigh-track by frequent travel.

Cradle-scythe, *n.* (*Agric.*) A scythe with a frame so formed as to cut grain and lay it in a row.

Crad-ling, *n.* The act of applying a cradle to.

(*Arch.*) The timber ribs in arched ceilings or covers to which the laths are nailed for the purpose of receiving the plastering. The name is also generally applied to any wood or iron substructure intended to receive an external coating.

(*Cooperage.*) The cutting of a cask in halves lengthwise, in order to make it pass a narrow passage, the parts being afterwards united.

Craft, *n.* [*A. S. craft*; *Ger. kraft*; *O. Ger. kraft*; *Icel. kraptr*, power, strength; *krapta*, to be able; *Sansk. krip*, to be capable, to accomplish.] Ability; art; dexterity; skill in manual occupation; a trade; a handicraft; as, a brother of the literary *craft*.

—Fraud; cunning; duplicity; artifice; guile; misapplied skill or dexterity; as, done by nefarious *craft*.

"And this deceit loses the name of *craft*." — *Shaks.*

(*Naut.*) A generic name for a ship or ships.

"Once more on the deck I stand, of my own swift-sailing *craft*." — *Mackay.*

Small craft. (*Naut.*) The smaller class of vessels, as sloops, schooners, luggers, yachts, &c.

Craftily, *adv.* In a crafty manner; artfully; cunningly.

Craftiness, *n.* Quality of being crafty; artfulness; dexterity; cunning; artifice; stratagem.

Crafts-burg, in Vermont, a post-village and township of Orleans county, thirty miles North by East of Hartford.

Crafts-man, *n. ; pl. CRAFTSMEN.* An artificer; a mechanic; one skilled in a manual occupation or trade.

"The cunning *craftsman's* hand." — *Shaks.*

Crafts-master, *n.* A person who is skilled in his craft or occupation.

"He is not his *crafts-master*, he doth not do it right." — *Shaks.*

Crafty, *a.* Having craft; skillful in devising and pursuing a scheme or undertaking; as, a *crafty* piece of work.

—Cunning; artful; wily; sly; deceitful; subtle; able in deceiving and misleading others; as, a *crafty* adviser.

"Everybody is shy and distrustful of *crafty* men." — *Locke.*

Crag, *n.* [*Gael. creag*; *W. carreg*, *craig*, a rock; *Ir. creagh*; probably from the root of *Gr. rhegno*, to break.] A steep, rugged rock; a rough broken rock, or point of rock.

"Cliffs of burning *crags*, and fire and smoke." — *Fairfax.*

(*Geol.*) Gravel or sand mixed with shells.

—*n.* [*Ger. krugen*, the neck.] The neck of the human body.

—The thinner end of a neck of mutton. (Sometimes written *scrag*.)

Cragged, *a.* Full of crags or broken rocks; rough; rugged; as, a *cragged* hill.

Craggedness, *n.* State of abounding with crags or jutting pointed rocks.

Cragginess, *n.* State or condition of being craggy.

Craggy, *a.* Full of crags; abounding with projecting points of rocks; as, a *craggy* cliff.

Craig, in Indiana, a post-village and township of Switzerland co.

Craig, in Virginia, a S.W. central co. It is intersected by the sources of Craig's Creek, from which it takes its name. The surface is mountainous; but the soil in the valleys is generally fertile. *Cap.* New Castle. *Pop.* (1890) 3,794.

Craig-head, in Arkansas, a N. E. co.; area, about 950 sq. m. It is intersected by St. Francis, Anguille, and Cache rivers, the former of which here expands into a

lake. Surface level, and the soil generally fertile. *Cap.* Jonesborough.

Craig's Creek, in Virginia, rises in Giles and Montgomery cos., and enters the James River in Botetourt co.

Craig's Mills, in Virginia, a P. O. of Washington co.

Craigsville, in N. Carolina, a village of Gaston co.

Craigville, in New York, a post-office of Orange co.

Craigville, in Pennsylvania, a village of Westmoreland co., about 50 m. E. of Pittsburgh.

Craigsville, in S. Carolina, a P. O. of Lancaster dist.

Craigville, in Virginia, a post-village of Augusta co., about 23 m. W.S.W. of Staunton.

Craik, an ancient royal burgh, and sea-port of Scotland, in Fifeshire, on the North Sea, 9 m. S.E. of St. Andrew's. It was formerly a place of importance, but is now much decayed. A considerable fishing-trade is still carried on. *Pop.* 2,127.

Craik, *n.* See CREEL.

Craik's Creek, in N. Carolina, a P. O. of Moore co.

Crake, *n.* (*Zool.*) The Coru-crake, or Land-rail (*Crex pratensis*), family *Rallidae*, is very similar to the Water-rail, is found of woody places, and high herbage or corn-fields in the vicinity of water, or marshy places, where it breeds; making its nest of a few dry plants, put carelessly together, and laying ten or twelve eggs of a dull white, marked with rust-color spots. Its note (crek-crek-crek), rapidly repeated, has been compared to the noise made by drawing a finger along the teeth of a comb. It is a bird of Europe, accidental in the U. S.

Crake-berry, *n.* (*Bot.*) See EMPETRUM.

Cram, *n.* A cant term used at the English universities to denote all desultory knowledge pertaining to classical matters other than that acquired by composition and translation.

(*Manf.*) In weaving, a warp of more than two threads. —*v. a.* [*A. S. crammian*; *Du. krammen*, to cram; *Icel. kram*, to beat small; *Swed. and Goth. krama*, to press together; probably of the same origin as *ram*.] To thrust in by force; to press or drive, particularly in filling or thrusting one thing into another; to crowd; to stuff; to fill to superfluity; as, to *cram* a theatre with people. (Often preceding *up*.)

"As much love in rhyme,
As would be *cramm'd* up in a sheet of paper." — *Shaks.*

—To fill with food to satiety; to stuff to repletion.

"Swinish gluttony . . . *crams*, and blasphemes his feeder." — *Milton.*

—To qualify for examination by a special course of study. (Used at the English universities.)

—*v. i.* To gorge; to stuff; to eat greedily, or to repletion.

"The godly dame, who fleshly failings damns,
Scolds with her maid, or with her chaplain *crams*." — *Pope.*

—To prepare for public examination by an undigested and hasty curriculum of study. (*Eng. Univ.*)

Crambe, *n.* [*Gr. and Lat. cabbage*.] (*Bot. and Hort.*) A genus of plants, order *Brassicaceae*, allied to the genus *Brassica* or Cabbage tribe.

The species *C. maritima*, or Sea-kale, which grows wild on the sandy sea-shores of N. Europe, is cultivated

in gardens like asparagus, under a

covering which shields it from the

action of light. In the wild state

the plant is very acrid; but when

blanched by the art of the gardener,

the stem and leaf-stalks form a deli-

cious vegetable, which is preferred

by many to asparagus.

Crambo, *n.* [Probably from *cram*.]

A cramming or crowding of rhymes

together.

"His smiles in order set,
And every *crambo* he could get." — *Swift.*

(*Games.*) A play in which one person gives a word,

and the parties contend who can find most rhymes to it.

Cramoisie, **Cramoisie**, *n.* [*Fr.*] Crimson; as, a

cramoisie doublet.

Crampe, *n.* [*A. S. kramma*; *D. krampe*; *Dan. krampe*;

Swed. and Goth. krampe; *Fr. crampon*; *Ger. krampf*,

allied to *grimm*, to gripe, and *kripen*, to cramp; *It.*

graufo, a contracting or drawing together; *Sansk. root*

grah, to seize.] Restriction; restraint; limit; obstruction.

"A narrow fortune is a *cramp* to a great mind." — *L'Estrange.*

(*Building.*) A piece of iron bent at the ends, serving

to hold together pieces of timber, stones, &c.

(*Mech.*) A short bar of iron, with its ends bent so as

to form three sides of a parallelogram: at one end a set

screw is inserted, so that two pieces of metal, being

placed between, can be held firmly together by the screw.

(*Med.*) An irregular spasmodic contraction of the

muscles of the whole or different parts of the body, caus-

ing most severe pain by the knotty and hardened state

into which their fibres are contracted. Though *C.* may

involve the greater number of the muscles at once, the

parts most generally affected are those of the feet, legs,

thighs, abdomen, and arms. The cause sometimes pro-

ceeds from the sudden application of cold to the heated

body, damp sheets, wet feet, or wet clothes; the irrita-

tion produced on the nervous system by the absorption

of lead, arsenic, or other mineral poisons, and the ex-

haustion on long-continued evacuations, as in cholera;

from the specific action of some animal virus, as in the

bite of venomous reptiles, and in bathing, from coming

in contact with cold springs, and a too lengthened stay

in the water. In general, *C.* is readily removed by a

forcible exertion of the antagonist muscles, so as to

overcome the spasmodic contraction, or by friction and

warmth. *C.* of the stomach is to be combated by the

Fig. 708. — ANCIENT CATHEDRAL OF CRACOW.

situate on the N. bank of the Vistula, where it is joined by the Rulawa, 160 m. S.S.W. of Warsaw, and 200 m. E. of Vienna. It has every appearance of falling rapidly to decay. The streets are crooked, the pavements wretched, and the houses, though massive and spacious, are old, and, in many cases, in a state of dilapidation. In its cathedral are the tombs of the most distinguished Polish kings, and the crown jewels were formerly deposited in it. Besides the cathedral, there is a castle, a university, a botanical garden, an observatory, and a library. It is connected by railway with Vienna, Berlin and Warsaw. *P.* (1891) 76,026. — A tumulus to the memory of Kosciuszko, with a height of 120 feet, stands about 2 miles from the city. — The republic of Cracow, of which the above city was the capital, embraced an area of 450 sq. m., with a population of abt. 142,000. After an insurrection, in 1846, it was incorporated with Austria.

Cracowes, *n. pl.* A kind of boots with long toes, formerly worn in N. Europe, and first made at Cracow; — hence the name.

Cradle, (*krá'dl*), *n.* [*A. S. cradel*, dim. of *cræt*, a cart, chariot; *Gael. creathall*; allied to *Lat. craticula*, dim. of *crates*, wicker or hurdle work.] A movable bed in which infants are rocked. — It is perhaps not a little

Fig. 709. — CRADLE OF HENRY V.
(Tower of London.)

external and internal use of stimulants, and by opium, ether, and other antispasmodics. — See SPASMS.

—*v. a.* To contract; to draw, bind, fasten, or hold together; to constrain; to confine within limits; to restrain; to hinder from action or expansion.

"Th' expansive atmosphere is *cramp'd* with cold." — Thomson.

—To hold or fasten with a cramp-iron.

—To fix by a cramp; as, to *cramp* the leg of a boot.

—To pain or affect with spasms or cramp.

"The contracted limbs were *cramp'd*." — Dryden.

—*a.* Difficult; knotty; as, a *cramp* syllogism.

Cramp'-fish, *n.* (*Zoöl.*) See TORPEDO.

Cramp'-iron, *n.* (*Mech.*) See CRAMP.

Cramp'pit, *n.* The chape or piece of metal at the bottom of a sword; a chape.

Crampouee, *n.* [*Fr.*] (*Her.*) A cross with a cramp at each end.

Crampoons, *n. pl.* [*Fr. crampou.*] Sharp-pointed, iron fastenings fixed to the shoes of soldiers, to enable them to keep a foothold when engaged in climbing a glacis preparatory to carrying a fort by assault.

—Large iron hooks resembling double-calipers, used for raising heavy weights, as blocks of stone, &c.

Cramp'-ring, *n.* A ring popularly supposed in olden times to possess the virtue of curing cramp, by reason of its undergoing consecration on Good Friday.

Cramp's Corner, in *New Hampshire*, a former post-office of Carroll co.

Cramp'ton's Pass, in *Maryland*, a locality near Burkittsville. A smart skirmish took place here, Sept. 14, 1862, between a detachment of Union troops under Gen. Franklin, and a Confederate force under Gen. Cobb, in which, after an action of several hours' duration, the latter retreated with a loss of about 600 men. The national loss in killed and wounded was 533 men.

Cramp'y, *a.* Troubled with cramp or spasms.

—Presenting an appearance of cramps; as, a *crampy* surface of country.

Cran, *n.* (*Scot.*) A measure of fish; as, a *cran* of herrings. (Peculiar to Scotland.)

Cranach, LUCAS, (*kran'ak*.) a German painter, b. at Cranach, near Bamberg, 1472, and called after the place of his birth, but whose family name was Sunder. He excelled in portraits and altar-pieces, the principal of these last being the *Crucifixion*, in the church of Weimar. He was court-painter to three electors of Saxony, Frederick the Wise, John the Constant, and John Frederick the Magnanimous. He was also the friend of Luther, and is said to have been the means of bringing about the marriage of the great reformer with Catharine Bora. D. at Weimar, 1533.

Cranage, *n.* [*L. Lat. cranagium.*] Dues paid for the use of a crane at the loading and discharging of ships.

—Liberty to use a crane for the above-named purposes.

Cranberry, *n.* [*Ger. kranbeere.*] (*Bot.*) See OXYCOCCUS.

Cranberry, in *New Jersey*, a post-village of Middlesex co., abt. 40 m. N.E. of Camden.

Cranberry, in *Ohio*, a post-office of Allen co.

Cranberry, in *Pennsylvania*, a township of Butler county.

—A post-village and township of Veuango county.

Cranberry Brook, in *New Jersey*, enters the Millstone abt. 3 m. S.E. of Princeton.

Cranberry Creek, in *New York*, a post-office of Fulton co.

Cranberry Isles, in *Maine*, a P. O. of Hancock co.

Cranberry Lake, in *New York*, in the S. part of St. Lawrence co. It is the source of Oswegatchie River. Length abt. 7 m.

Cranberry Plains, in *Virginia*, a former post-office of Carroll co.

Cranberry Prairie, in *Ohio*, a P. O. of Mercer co.

Cranberry Summit, in *W. Virginia*, a village of Preston co., 243 m. W. of Baltimore.

Cranbrook, a town of England, co. Kent, 13 m. S. of Maidstone; pop. 4,500.

Cranch, *v. a.* See CRAUNCH.

Cran'dall, in *Ohio*, a post-office of Lorain co.

Cran'dell Corners, in *New York*, a post-office of Washington co.

Crane, *n.* [*A. S. cornoch, cran*; *Ger. kranich*; *O. Ger. kranich*; *Gr. geranos*; *Lat. grus, gruvis*; *W. garan*, a shank, a crane, from *gar*, a leg.] (*Mech.*) The name of machines used for raising heavy bodies in a perpendicular direction. They are of various forms, suitable for almost any purpose, and to most of them are adapted two or more wheels with teeth, for the purpose of obtaining power at the expense of time. The small wheel is turned by a windlass, and turns the larger one very slowly, but with great power. The common warehouse or cellar *C.* is generally an iron frame with two pulleys, which are usually inside the warehouse, while the *C.* is outside to raise goods from carts, &c., into the floors above. *C.* at the sides of canals or rivers, for landing goods, are sometimes made with a heavy stone placed to balance the weight at the end of the *C.* What is called the *jib C.* is often "rigged" up on shipboard, for shipping and unshipping goods. *C.* for very heavy purposes have been made upon the tubular principle, and consist of iron plates riveted together so as to form a hollow-curved *C.* similar to the hollow girders used in bridges. Where goods have to be brought from one particular spot to another, the swing *C.* is used. Among *C.* may be named the hydraulic-lift; this is exactly similar to the hydraulic press, only applied in a different manner, and is used to lift very heavy weights but short distances, as for raising heavy goods on to railway trucks, &c.

—A curved pipe for drawing liquors out of a cask; a siphon.

(*Zoöl.*) See GRUIDÆ.

—*pl.* (*Naut.*) Pieces of iron or timber on the sides of a ship, used to stow boats or spars upon.

—*v. a.* To bridle; to raise one's head loftily; — preceding up; as, the lady *craned* up her neck with disdain.

Crane, in *Ohio*, a township of Defiance co.

—A township of Paulding co.

—A township of Wyandot co.

Crane Creek, in *Iowa*, a village of Howard co.

Crane Creek, in *Missouri*, a village of Barry co., abt. 150 m. S. S. W. of Jefferson City.

Crane Creek, in *S. Carolina*, traverses Richland co., and enters Broad river a few miles above Columbia.

Crane-fly, *n.* (*Zoöl.*) See TIPULA.

Crane River, in *Arkansas*, traverses Arkansas co., and enters White river.

Crane's-Bill, *n.* (*Bot.*) See GERANIUM.

(*Surg.*) A pair of pincers terminating in a point, used by surgeons.

Crane's Forge, in *La.*, a former P. O. of Assumption par.

Crane's Run, in *Pennsylvania*, a village of Greene co.

Crane's Town, in *Ohio*, a village of Wyandot co., 70 m. N. N. W. of Columbus.

Crane's Village, or CRANESVILLE, in *New York*, a post-village of Montgomery co., 13 m. from Schenectady.

Crane'sville, in *N. J.*, a former P. O. of Union co.

Crane'sville, in *Pennsylvania*, a village of Erie co., about 25 m. S. W. of Erie.

Crane'sville, in *Tennessee*, See CRAINSVILLE.

Crane'sville, in *W. Virginia*, a post-village of Preston co., about 250 m. N. W. of Richmond, Va.

Crane'sville, in *Wisconsin*, a village of Marquette co.

Crane'sville, in *W. Va.*, a former P. O. of Wyoming co.

Craniol, *a.* Belonging to, or like, a cranium, or skull.

Craniology, *n.* [*Gr. kranion*, and *guomai*, to know.] Craniology.

Craniological, *a.* Relating, or pertaining, to craniology.

Craniologist, *n.* One versed in craniology; a phrenologist.

Craniology, *n.* [*Gr. kranion*, and *logos*.] A discourse or treatise on the cranium or skull; PHRENOLOGY, *q. v.*

Craniometer, *n.* [*Gr. kranion*, and *metron*.] An instrument used for measuring the skulls of animals.

Craniometrical, *a.* Belonging to craniometry.

Craniometry, *n.* Art or practice of measuring the skulls of animals.

Craniocopy, *n.* One who is versed in craniology.

Craniocopy, *n.* [*Gr. kranion*, and *skopein*, to view.] Examination of the cranium; the science which relates to the inspection of skulls.

Cranium, *n.* [*Gr. kranion*, allied to *kara*, *karënon*, the head; Sansk. *kya*, the skull; *Fr. crâne*.] (*Anat.*) The skull of an animal; the agglomeration of bones which enclose the brain.—See SKULL.

Crank, *n.* [*D. krinkel*, a curve, from *krinkelen*, to bend, to crook.] A winding or twisting; anything bent or turned; hence, colloquially, one mentally twisted.

"I send it through the rivers of your blood.
And through the cranks and offices of man." — Shaks.

—A sort of fanciful pun or conceit.

"Quips, and cranks, and wanton wiles." — Milton.

Crank, *n.* A rigid arm fixed at one extremity on a shaft perpendicular to its own axis, and receiving at the other an alternative impulse which causes it to revolve in a circle. It is the most usual mode of converting alternative, circular, or rectilinear motions into continuous circular motion, or vice versa; and for this purpose the crank requires to be connected with the prime mover by a chord or a rigid rod. In building operations, it is used to change the direction of the motion of bell-wires, or other similar works.

—An iron brace, used for various purposes.

—*a.* [*O. Ger. and D. krank*, weak; allied to *A. S. crang*, dead, and *crangan*, to submit, to die.] Healthy; sprightly; lively; brisk. — (*Naut.*) A ship is said to be *crank*, when, by the form of the construction, or by want of a sufficient quantity of ballast or cargo, or by being loaded too much above, it is incapable of carrying sail without being exposed to the danger of oversetting.

Crank'-axle, *n.* (*Mech.*) The driving axle connected to the piston-rods of a locomotive-engine.

Crank'-bird, *n.* (*Zoöl.*) A small species of woodpecker.

Cranked, (*krankt*.) *a.* Having a crank.

Crankle, *v. i.* To run in and out, or in flexures and windings.

—*v. a.* To crank into unequal surfaces; to crinkle; to break into angles.

—*n.* A crinkle; an inequality; an angular prominence.

Crank'ness, *n.* Health; vigor; sprightliness.

(*Naut.*) Liability to careen over, as a ship.

Crank'-pin, *n.* (*Mech.*) The cylindrical piece joining the ends of the crank arms, and attached to the connecting rod, or, in vibrating engines, to the piston-rod; if the crank has only one arm, the pin projects from the end of it.

Fig. 711.

1, single crank; 2, double crank; 3, bell crank.

Crank'y *a.* Weak in intellect; as, a *cranky* person. (*Colloq.*)

Cranmer, THOMAS, Archbishop of Canterbury, b. at Aslacton, Nottinghamshire, 1489. The opinion which he gave on the question of Henry VIII.'s divorce from his first wife, Catharine of Arragon, recommended him to that monarch, who employed him to vindicate the measure, and sent him, in 1530, with other envoys, to maintain his view before the pope. He took with him the opinions which had been obtained from the foreign universities in favor of the same view. His mission was fruitless. On his way home, *C.* visited Germany, and at Nürnberg married a niece of Osiander. After his return he was raised by papal bull to the archbishopric of Canterbury, in which office he zealously promoted the cause of the Reformation. Through his means the Bible was translated and read in churches; and he greatly aided in suppressing the monastic institutions. A few weeks after his appointment he pronounced, in a Court held at Dunstable, the sentence of divorce of Catharine, and confirmed the king's marriage with Anne Boleyn. In 1536, when Anne Boleyn was destined to lose her reputation and her life, *C.* meekly stooped to promote the sentence of divorce. This and other compliances with the monarch's will insured him the gratitude of Henry, who upheld him in all his contests with Bishop Gardiner and others who accused him of heresy and faction. By Henry's will he was appointed one of the council of regency to Edward VI.; and as the young king was brought up chiefly under the archbishop's care, it enabled him to further the objects of the Reformation in regular and consistent manner, by framing the liturgy, the homilies, articles of religion, &c. On the accession of Mary, he was committed to the Tower, along with Latimer and Ridley. In March, 1554, they were removed to Oxford, and confined there in the common prison, called the *Bo-cardo*. Latimer and Ridley bore their cruel fate with magnanimous courage; but the spirit and principles of *C.* temporarily gave way under the severity of his sufferings. He was induced, in the hope of saving his life, to sign no fewer than six recantations; but his enemies were determined to be satisfied by nothing short of his death. On the 21st March, 1556, he suffered martyrdom, as his fellow-reformers had done, opposite Balliol College. His courage returned at the end, and he died protesting his repentance for his unworthy weakness in changing his faith, and showing an unexpected fortitude in the midst of the flames. "*C.* was at once," says Macaulay, "a d vine and a courtier," and the attempted combination of the two characters created those inconsistencies which shaded the purity of his life.

Fig. 712. — CRANMER.

Crannied, (*kran'nid*.) *a.* Having crannies, rent chinks, or fissures.

"A wall . . . that had in it a *crannied* hole or chink." — Shaks.

Crannoges, (*krän-noags*.) a term applied to the lak dwellings and fortified islands of the ancient Celt. Although dwellings of this kind, on Lake Prasna in Macedonia, were described by Herodotus, (Book V chap. 16,) the subject did not attract much attention until vestiges of similar erections, much resembling the water-dwellings of the natives of Borneo, were discovered in 1839, in the county of Meath, Ireland, by Mr. W. Wilde. From that time, *C.* have been found in most towns of Ireland and Scotland, in Switzerland, Savoy, Upper Italy, Prussia, Denmark, &c. For some time it was mania, succeeding to the mania of the *Roman camps*, as we believe that at the present time it would be difficult to find an European antiquary not being the discoverer of at least one *C.*

Cran'ny, *n.* [*Fr. cran*; *Lat. crena*; *Arm. kran*, an incision, a notch; *Heb. kur*, to dig, to pierce; *Sansk. kha*, to dig, to split.] A cleft; a rent; any small, narrow opening, fissure, crevice, or chink, as in a wall or other substance.

"And therefore beat and laid about,
To find a *cranny* to come out." — Hudibras.

—A hole; a corner; a secret, retired place.

"We seek it, ere it come to light,
In every *cranny* but the right." — Couper.

(*Manuf.*) In glass-making, an apparatus for fashioning and fixing the necks of glasses.

—*a.* Same as CRANK, *q. v.*

—*v. n.* To form crannies, or crevices. — To frequent crannies; as, "The *cranny*ing wind." — Byron.

Cranston, in *Rhode Island*, a township of Providence co., containing manufactories of cotton goods, printing machinery, &c.

Crauta'ra, *n.* [*Gael.*] See FIERY CROSS.

Craonne, a town of France, in the dep. of Aisne, 12 S.E. of Laon; pop. 1,000. — Here, in 1814, Napoleon routed the Prussians.

Crapaudine, *a.* (*Arch.*) Applied to a door turning on pivots.

—(*Farriery*.) An ulcer on a horse's coronet.

Crape, *n.* [*Fr. crêpe*, for *crespe*; *Lat. crispus*, crisped.] A thin stuff, loosely woven, of which the dress of the clergy is sometimes made; it is also used

for mourning purposes. *C.* is made of raw silk, gummed and twisted on the mill, and woven without crossing. Crapes are either *craped*, that is, crisped, or *smooth*; they are all dyed raw.

r. a. To curl; to form into ringlets or tresses; as, to *crap* the hair.

rape'-fish, *n.* Codfish salted and smoke-dried.

rap'-nel, *n.* See GRAPNEL.

rap'ulent, **Crap'ulous**, *a.* Overpowered by liquor; sick from intemperance.

rap'y, *a.* Of the nature of, or resembling, crape.

ra'y's Mills, in New York, a post-office of St. Lawrence co.

rash, *v. n.* [Formed from the sound.] To make the sound caused by the act of crashing; to make the loud, clattering, and multifarious sound of many things falling and breaking at once.

"There shall be a great *crashing* from the hills."—Zeph. i. 10.

r. a. To crush; to break; to dash to pieces; to bruise; to crack. (*o.*)

"I pray you, come and *crash* a cup of wine."

Shaks.

n. The sound produced by the act of crushing; the loud mingled sound of many things falling and breaking at once; as, a *crash* of crockery.

[*Lat. crassus.*] A kind of coarse linen cloth.

ra'sis, *n.* [Gr. *krasis*, from *keras*, *kerannūmi*, to mix, to temper.] (*Med.*) A due mixture of the constituents of a fluid; as, the *crasis* of the blood, humors, &c.—Also sometimes used as synonymous with constitution, temperament, &c.

[*Gram.*] A contraction of two syllables into one, as *nil* for *nihil*.

ra'ss, *a.* [*Lat. crassus.*] Gross; crude; not subtilized or refined; as, "*crass* ignorance."—Cudworth.

ra'ssament, **Cra'ssiment**, *n.* [*Lat. crassamentum*, the sediment of a liquid, from *crassus*, thick, gross.] The thick, red part of the blood, as distinct from the *erum* or aqueous part; the clot.

ra'ssini'dæ, *n. pl.* [*Zool. and Geol.*] A family of mollusca, order *Lamellibranchiata*, called also *Astartidæ* and *Cycladidæ*. They are closely allied to the *Veneridæ*, and are interesting chiefly with reference to geology. The fossil species are very numerous, commencing with the *lias* period, and are distributed over the whole world. They may be regarded as having given place to the *Veneridæ*, which commenced with the *oolitic* period, and are among the most abundant bivalve mollusca of the present time.

ra'ssitude, *n.* [*Lat. crassitudo*, from *crassus*.] Grossness; thickness; coarseness; crudeness.

"The greater *crassitude* and gravity of the sea-water."

Woodward.

ra'ssula'cææ, *n. pl.* [*Lat. crassus*, thick, from the thickness of its leaves.] (*Bot.*) The Houseleek or Stonecrop family, an order of plants, alliance *Violales*. *Diag.* Polypetalous or monopetalous flowers, a many-leaved axly, hypogynous petals, and follicular apocarpous fruit. They are succulent herbs or shrubs with exstipulate leaves. The flowers are perfectly symmetrical, the sepals, petals, and carpels being equal in number from 3 to 20, and the stamens being also equal to them, twice as many. The seeds are small; the embryo is on the axis of fleshy albumen. The *C.* are found in very dry situations in all parts of the world; a large number occur at the Cape of Good Hope. Astringent, refrigerant, and acrid properties characterize them, and have given a few some importance as medicinal plants. The genus *Sedum* is the most largely represented in North America.

ra'ssus, **LUCIUS LICINIUS**, a celebrated Roman orator, b. c. 140, who is introduced by Cicero, in his treatise *De oratore*, as the representative of that writer's own opinions on the subject of oratory. He was unfortunate as a legislator, inasmuch as the law proposed by him, to compel all who were not citizens to depart from Rome, as a main cause of the Social War. He was distinguished for his love of the arts; and his mansion upon the Palatium is cited, both for its architecture and for the statuary and paintings with which it was adorned, having been one of the most noteworthy in ancient Rome. He died b. c. 91.

ra'ssus, **MARCUS LICINIUS**, a celebrated Roman consul and triumvir, immensely rich and passionately fond of money, took part with Sulla in the civil war. As prætor, in b. c. 74, he was sent against the insurgent gladiators under Spartacus, and totally defeated them near hegium. The next year he was consul with Pompey, and made an extraordinary display of his wealth and hospitality. Pompey and *C.* were, however, personal enemies, and it needed the powerful influence of Cæsar to effect a formal reconciliation between them, which took place in b. c. 60, the first triumvirate being then formed. Consul again five years later, *C.* had Syria for his province, and made war on the Parthians. He was defeated by them with immense slaughter, and was put to death, b. c. 53. It is said that Orodes, king of Parthia, melted gold poured into the dead mouth, with the intent "Sate thyself now with that metal, of which in life thou wert so greedy."

ra'tegus, (*krat'-gus*), *n.* (*Bot.*) A genus of plants, order *Rosacææ*. They are trees or shrubs, small, deciduous, sometimes evergreen; mostly natives of Europe and N. America, and some of them of Asia and the N. Africa. The species all flower and fruit freely; and the wood of all of them is hard and durable, and the fruits are of considerable longevity. Almost all the flowers are white, and the fruit is generally red; though some sorts it is yellow, purple, black, or green. The species *C. coccinea*, or White Thorn, is a thorny shrub or small tree, 10-20 feet high, found in thickets through-

out the U. States.—*C. crus-galli*, the Cock-spur Thorn, the flowers of which are fragrant, is rare in this country. *C. azarolus* is a deciduous shrub, 15 feet high, native of Italy, and very ornamental. *C. oxyacantha* is the hawthorn, whitethorn, or May, so well known for the beauty

Fig. 713.—THE WHITE THORN.

(*Crataegus coccinea*.)

and fragrance of its flowers, and for being the best hedge-plant in Europe. Some varieties of this species are highly ornamental, producing double pink or scarlet blossoms. To this genus belongs also *C. terminalis*, the Chess-apple or Wild Service, chiefly found in the United States. Its fruit, pleasant to the taste, ripens in June.

Cratch, *n.* [*Fr. crèche*; *Lat. crates*.] A crib or palisaded frame for containing hay in a horse's manger.

"In simple *cratch*, wrapt in a wad of hay."—Spenser.

Cratch'-cradle, *n.* Same as CAT'S-CRADLE, *q. v.*

Crate, *n.* [*Lat. crates*. See CRADLE.] A kind of large square hamper or basket of wicker-work, &c., used for the transportation of earthenware, &c.

Crater, *n.* [*Lat.*; *Gr. kratēr*, from *kerannūmi*, to mix.] A cup-shaped cavity; specifically, the circular cavity or mouth of a volcano, through which the lava, stones, scoria, &c. are for the most part ejected. See VOLCANO.

(*Astronom.*) A constellation allied to HYDRA, *q. v.*

Crateriform, *a.*

Having the form of a crater.

Craterous, *a.* Resembling a crater.

Craterus, one of Alexander the Great's generals, conspicuous for his literary abilities as well as for his valor. He received as his share of Alexander's kingdom, Greece and Epirus, and wrote the history of his great commander. Killed in a battle against Eumenes, 321 b. c.

Crates, (*krat'-tes*), a philosopher of Bœotia, celebrated for his eccentricities. In the summer he would clothe himself as warm as possible, but in the winter his garments were uncommonly thin. Lived in the 4th cent. b. c.

Crathis, (*krat'-this*), (*Myt.*) A river in Magna Græcia, distinguished for giving a yellow color to the hair and beard of those who drank its waters.

Cratinus, an Athenian poet, to whom the invention of satirical comedy is attributed. His powers of sarcasm are said to have been unrivalled. Although a very intemperate man, he attained the age of 96. Died b. c. 422.

Cratippus, a celebrated Peripatetic philosopher, b. at Mytilene, and a contemporary of Cicero. He appears to have been held in the highest estimation by the great men of his age. Cicero calls him the prince of all the philosophers whom he had known. Pompey visited him after his defeat at Pharsalia, and received at his hands the consolations of philosophy; and Brutus went to Athens, to which city *C.* had latterly betaken himself, to listen to his prelections, even while making preparations to meet Octavius and Antony. Nothing that *C.* wrote has survived.

Crato, a town of Brazil, prov. Ceara, 180 m. S. of Fortaleza.

Craunch, **Craunch**, (*kranch*), *v. a.* [*D. schransen*, to eat greedily. See CRUNCH.] To crush or bruise with the teeth; to crunch; to masticate with violence or noise.

Cravat, *n.* [*Fr. cravate*.] A kind of neckcloth, said

to have been first introduced into France by the *Cravates* or Croatians.

"Hemp . . . others for *cravats* have worn."—Hudibras.

Cravat'ted, *a.* Having a cravat round the neck.

Crave, *v. a.* [*A. S. crafian*; *Icel. kref*; *Dau. krave*, to require, demand; *Swed. and Goth. kra, fera*; *Goth. krapjan*, to cry out; *Sansk. hrapi*, to speak; *W. crefn*, to cry, to crave, from *cref*, a cry, a scream.] To speak to as a suppliant; to ask earnestly and importunately; to ask submissively; to beseech; to entreat; to solicit; as, to *crave* a boon.

"As for my noble friends, I *crave* their pardons."—Shaks.

—To long for; to desire strongly; to call for or demand, as a gratification or need; as, a *craving* stomach.

Craven, *n.* [*O. Fr. cravanter*, to foil, to overthrow. Anciently, a term of disgrace when one that was overcome in a single combat yielded, and cried *cravante*, thus begging his life by admitting that he was overcome. A recreant; a coward; a weak-hearted, spiritless fellow.

"He is a *craven* and a villain."—Shaks.

(*Sports.*) In cock-fighting, a beaten and dispirited cock.

"No cock of mine; you crow too like a *craven*."—Shaks.

—*a.* Cowardly; base; mean; contemptible.

Craven, in N. Carolina, an E. S. E. co., bordering on Pamlico Sound, at the mouth of the Neuse River, by which it is intersected; *area*, about 1,000 sq. ur. Surface, level. *Cap.* Newbern. *Pop.* (1890) 20,600.

Craven Mills, in Tennessee, a village of Wayne co.

Craven's Landing, in Tennessee, a former post-office of Hardin county.

Cravensville, in Missouri, a village of Daviess co., about 140 m. N. W. of Jefferson City.

Craver, *n.* One who craves, begs, or supplicates.

Craving, *n.* A vehement or urgent desire or calling for; a longing for; as, the *cravings* of hunger.

Crav'ingly, *adv.* In a craving manner.

Crav'ingness, *n.* State or condition of craving.

Craw, *n.* [*Dan. croe*; *Ger. kragen*, the neck, the throat. See CROP.] The crop, gorge, or first stomach of a fowl.

Craw'-fish, **Cray'-fish**, *n.* [*Fr. écrevisse*, from *Gr. karabos*. See CRAB.] (*Zool.*) The *Astacus fluvialis* is a crustaceous animal of the genus *Astacus*, differing in general appearance but little from the Lobster. They are found in almost every river, and even brook, in England; and their flesh is reckoned cooling and nutritious. Species of this genus are found in all parts of the world. In the mammoth caves of Kentucky, a species has been discovered; it is the *Astacus pellucidus* of Tullkamp.

Fig. 715.—CRAW-FISH.
(*Astacus fluvialis*.)

Crawfish River, in Wisconsin, rises in Columbia co., and flows nearly S. into Rock River at Jefferson.

Crawford, THOMAS, an eminent American sculptor, b. in New York, 1814. He studied art at Rome, and his most remarkable productions are the marble statue of *Orpheus*, now in the Boston Athenæum, the bronze figures of *Washington* (at Richmond), and *America* (for the dome of the Capitol at Washington). D. in London, 1857.

Crawford, WILLIAM HENRY, an American statesman, and noted duellist, born in Elbert co., Georgia, 1772. Admitted to the bar in 1798, he was elected U. States Senator in 1807, and was Secretary of the Treasury from 1816 to 1825. D. 1834.

Crawford, in Alabama, a post-village, cap. of Russell co., 72 m. E. of Montgomery.

Crawford, in Arkansas, a W. co., bordering on the country of the Cherokee Nation. *Area*, 585 sq. m. It is traversed by the Arkansas River, Frog Bayou, and Lee's Creek. The surface is mountainous. Coal and other minerals are found. *Cap.* Van Buren. *Pop.* (1890) 21,800.

Crawford, in Georgia, a W. central co.; *area*, abt. 289 sq. m. The Flint river bounds it on the S. W., as does the Echaonuee creek on the N. E.; it is also drained by Spring and Walnut creeks. The surface is generally broken, and the soil moderately fertile. *Cap.* Knoxville. *Pop.* (1890) 9,400.

—A district of Harris co.

—A post-office of Oglethorpe co.

Crawford, in Illinois, an E. S. E. co., bordering on Indiana. *Area*, about 420 sq. m. It is bounded on the E. by the Wabash, and it is drained by the Embarras river and other smaller streams. The surface is generally prairie land, and the soil good. *Cap.* Robiusou. *Pop.* (1890) 17,192.

—A post-office of Gallatin county.

Crawford, in Iowa, a W. co.; *area*, 600 sq. m. The Boyer and Soldier rivers, affluents of the Missouri, traverse it. *Cap.* Denison. *Pop.* (1890) 18,900.

—A township of Madison county.

—A township of Pottawatomie county.

—A township of Washington county.

Crawford, in Michigan, a N. co. of the southern peninsula; *area*, 620 sq. m. It is bounded on the N. by Otsego co., S. by Roscommon co., E. by Oscoda co., W. by Kalamazoo co., and drained by the head-waters of the Au Sable river. *Pop.* (1894) 2,710.

—A post-office of Isabella county.

Crawford, in Indiana, a S. co., bordering on Kentucky. *Area*, about 280 sq. m. The Ohio river drains its S. border, and it is traversed by the Blue river. The surface is broken, and the soil rather poor. Coal and iron are the most valuable minerals. *Cap.* Leavenworth. *Pop.* (1890) 13,935.

Crawford, in *Maine*, a post-township of Washington co., about 120 m. N. E. by E. of Augusta.

Crawford, in *Missouri*, a S. E. central county; *area*, about 600 sq. m. It is intersected by the Maramee river and by the Ilwiza, Dry and Crooked creeks. The surface is broken; soil, in some parts, good. Iron, copper and stone coal abound. *Cap.* Steelville. *Pop.* (1890) 11,828.

Crawford, in *N. Carolina*, the former capital of Stokes co., about 110 m. N. W. of Raleigh.

Crawford, in *New York*, a village and township of Orange co., 20 m. W. of Newburg.

Crawford, in *Ohio*, a N. central county; *area*, about 412 sq. m. The head-waters of the Sandusky and Olen-tangy rivers intersect it. *Surface*, level and elevated; *soil*, productive. *Cap.* Bucyrus. *Pop.* (1890) 32,000.

—A township of Coshocton co.

—A village of Crawford co., abt. 70 m. N. of Columbus.

—A post-village and township of Wyandot co., 10 m. N. N. E. of Upper Sandusky.

Crawford, in *Pennsylvania*, a N. W. county, bordering on Ohio; *area*, 975 sq. m. The surface is undulating and the soil better adapted to grazing than to tillage. *Rivers*, Unimportant, but numerous creeks. *Min.* Iron ore and lime marl very abundant. *Prod.* Petroleum, lumber, butter, Indian corn, potatoes, &c. *Cap.* Mead-ville. *Pop.* (1890) 65,400.

Crawford, in *Wisconsin*, a S. W. county, bordering on the Mississippi river, which separates it from Iowa. *Area*, 612 sq. m. The Wisconsin bounds it on the S. E. It is also drained by the Kickapoo river. *Surface*, hilly. *Cap.* Prairie-du-Chien. *Pop.* (1890) 16,000.

Crawford House, in *New Hampshire*, a post-office of Coos co.

Crawford's Fork, in *Mo.*, a former P. O. of Cass co.

Crawford's Mill, in *Iowa*, a village of Henry co., on the Skunk river, about 37 m. W. N. W. of Burlington.

Crawfordsville, in *Indiana*, a city, the capital of Montgomery co. It is finely situated on the banks of Sugar creek, and is the seat of Wabash College. It has numerous manufacturing industries, and is a fine trading center. *Pop.* (1897) about 9,000.

Crawfordsville, in *Iowa*, a post-village of Wash-ington co., about 35 m. S. of Iowa City.

Crawfordsville, in *Kansas*, formerly the capital of Crawford co.

Crawfordsville, in *S. Carolina*, a former post-office of Spartanburg co.

Crawfordsville, in *Mississippi*, a vil. of Lowndes co.

Crawl, *v. n.* [*D. krielen*; *Swed. and Goth. kraella*, fre-quentative of *kraeka*, to crawl; *Scot. crawl*. See *CREEP*.] To creep; to move slowly by thrusting or drawing the body along the ground, as a snake; to move slowly on the hands and knees; to move without rising from the ground.

"That crawling insect, who from mud began." — *Dryden*.

—To move or walk weakly, slowly, or timorously; to move with hesitation.

"He was hardly able to crawl about the room." — *Arbuthnot*.

—To advance slowly, slyly, or insidiously; to move about stealthily and clandestinely; as, to crawl into a person's good graces.

"Cranmer hath crawled into the favour of the king." — *Shaks.*

—To move about hated or despised; as, a crawling sinner.

—To experience a sensation as of insects or vermin creep-ing over one; as, crawling flesh.

—*n.* Act or movement of crawling; as, the crawl of an alligator.

Crawl, *n.* A spawning enclosure for fish.

Crawler, *n.* He who, or that which, crawls; a creeper; a reptile; a louse.

Crawlingly, *adv.* In a crawling manner.

Crax, *n.* (*Zoöl.*) See *PENLOPIDÆ*.

Cray, **Cray'er**, *n.* (*Naut.*) A vessel employed in fishing.

Cray'-fish, *n.* (*Zoöl.*) See *CRAW-FISH*.

Crayneville, in *Ky.*, a post-office of Crittenden co.

Cray'on, in *Ohio*, a post-office of Champaign co.

Crayon, (*kra'un*), *n.* [*Fr.* from *crata*, chalk.] The name of a pencil of any kind in France, but applied more par-ticularly in this country, as in England, to pieces of char-coal, and black, white, and red chalk, of a convenient size and shape, which are used for drawing on various kinds of tinted paper, and for sketching cartoons, or the outlines of paintings of considerable size on canvas. *C.* of various colors and tints are also made by mixing vegetable and mineral coloring-matter with pipe-clay or chalk, and giving consistency and adhesiveness to the mass by the addition of a little milk, gum-water, wax, soap, or some similar substance. Drawings in *C.* look soft and rich in coloring, but the outline is gener-ally hazy and ill-defined. A metal tube, slit at both ends, which can become pressed at pleasure by a sliding-ring, and is called a *porte crayon*, is used to hold the chalk; but sometimes the material is enclosed in a cas-ing of wood, and resembles a lead-pencil. Softness in shading is produced by rubbing the chalk-marks gently with a piece of leather or paper, which is rolled tightly together and cut to a blunt point at each end.

—A drawing made with crayons.

—*v. a.* To sketch with a crayon; to design; to plan.

Cray'on-drawing, **Cray'on-painting**, *n.* (*Fine Arts*.) The art or practice of drawing with cray-ions.

Cray'tonville, in *S. Carolina*, a village of Anderson district.

Craze, *v. a.* [*Fr. craser*; *Swed. kras*, to break or dash in pieces; *Swed. and Goth. krossu*, to rub together, to bruise; *O. Ger. krazjan*, to tear, to cut asunder. See *CRUSH*.] To crush; to break; to comminute.

"The tin ore passeth to the crazing-mill." — *Curew.*

—To crack; to weaken; to impair the natural force or energy of; to put in disorder.

"Till . . . sedentary numbness craze my limbs." — *Milton*.

—To crack the brain, or shatter the faculties of; to impair the intellect of.

"That grief hath crazed my wits." — *Shaks.*

—*v. n.* To be in a crazed state; to act as a deranged person.

—*n.* State of craziness; mental derangement.

—A ruling propensity or passion; as, bibliomania is his craze.

Crazedness, *n.* A broken state; decrepitude; an im-paired condition of the intellect.

Craze'-mill, **Crazing-mill**, *n.* (*Mining*.) In Cornwall, Eng., a mill for crushing tin-ores.

Cra'zily, *adv.* In a broken, confused, or crazy manner.

Craziness, *n.* State of being broken, impaired, or weakened; as, the craziness of an old ship.

—State of being broken in mind; imbecility, or weakness of intellect; derangement.

Cra'zy, *a.* [*Fr. écrasé*.] Broken; decrepit; weak; fee-ble; impaired in body.

"Physic can but mend our crazy state." — *Dryden*.

—Imbecile, or disordered in intellect; deranged.

Craegerstown, in *Maryland*, a post-village of Fred-erick co., about 12 m. N. by E. of Frederick.

Creak, *v. n.* [*Fr. craquer*; *W. crec*, a sharp noise; formed from the sound.] To make a sharp, harsh, grating sound, of some continuance, as by the friction of hard sub-stances; as, a creaking door, creaking boots, &c.

"The creaking locusts with my voice conspire." — *Dryden*.

—*v. a.* To make a creaking noise with.

—*n.* A harsh, grating sound, produced by creaking.

Cream, *n.* [*Fr. crème*; *It. crema*; *Lat. cremor*; *A.S. ream*; *Ger. rahm*; *Du. room*; *Icel. ríomi*, perhaps allied to *Gr. rhómē*, strength, and *Heb. rum*, to lift up one's self, to arise.] The oily part of milk. A semi-fluid, yellowish sub-stance, which collects on the surface of milk, and which is made into butter by the process of churning. When the milk of any animal is allowed to stand for some time, it spontaneously undergoes certain changes, the cream rises to the surface, and forms a thin stratum, which consists chiefly of oily globules; while the milk below, which of course is thinner than it was before the *C.* was separated from it, is of a pale bluish color, and consists of a solution of the curd, or caseum, in the whey. When *C.* is kept for some days, it gradually becomes thicker and partially coagulated; and if put into a linen bag and suspend-ed in a cool room, it will acquire the consistency of soft cheese; and this is one among other modes of making cream-cheese. When *C.* is churned, it is resolved into butter and buttermilk. In order to make butter, it is not always necessary that the *C.* should be separated from the milk; but whether separated or not, the pro-cess is facilitated by allowing the liquid to stand for some time, during which a part of the sugar contained in the serum, or whey, is changed into an acid, which shortens the process of churning by facilitating the separa-tion of the butter from the milk. When either cream or milk is churned without having previously become slightly sour, the process is more tedious; and some-times, from causes not easily accounted for by the dairy-maid, it is unsuccessful, and the milk is said to be *br-witched*. The true cause, however, is the want of acid-ity; because it has been found that the addition of a very small portion of vinegar will dissolve the charm, and cause the almost immediate appearance of butter. *C.*, when separated from milk, and kept until it has be-come acid, is frequently eaten with sugar, and is one of the most delicious preparations of the dairy. Common *clotted C.* is simply milk and cream in a coagulated state, and sour. When the clotted *C.* is broken and stirred, and the whey drawn off, the mass may be turned into cheese by artificial pressure, or by suspending it in a porous bag, in a cool, airy situation. See *BUTTER*, *CHEESE*, *DAIRY*.

—That part of a liquor which separates from the rest, re-siles, and collects on the surface; as, cream of lime.

—The quintessence or best part of a thing; as, the cream of a joke, the cream of a scandal.

Cream of lime. See *LIME*.

Cream of tartar. See *POTASH* (*BITARTRATE OF*).

—*v. a.* To skim; to take off cream by skimming.

—To take the quintessence or choicest part of a thing.

—*v. n.* To gather cream; to flower or mantle; to become thick, like cream.

"There are a sort of acn, whose visages
Do cream and mantle like a standing pond." — *Shaks.*

Cream'-cake, *n.* (*Confectionary*.) A kind of custard-cake.

Cream-cheese, *n.* Cheese made with clotted cream. See *CREAM*.

Cream'-colored, *a.* Of the color of cream; pale yellow; as, a cream-colored horse.

Cream'-faced, *a.* White; pale; having a coward look. *Shaks.*

Cream Ridge, in *Missouri*, a former post-office of Liv-ington co.

Cream'-slice, *n.* A description of thin wooden knife, used in dairies.

Cream'y, *a.* Full of cream; as, a creamy cheese.

—Resembling cream; rich; fatty;unctuous; as, a creamy skin.

Cre'ance, *n.* [*Fr.*] (*Sport*) In falconry, a fine small line made fast to a hawk's leash when she is first lured.

Crease, (*krēs*), *n.* [*Icel. kreisti*, to press; *Arm. kriz*, a wrinkle; *Ger. kräusen*, to curl, to plait; *L. Sax. krösen*, to crisp, to curl, to lay in folds, to plait.] A line or mark made by folding or doubling anything; a hollow streak like a groove; as, a crease in cloth.

—*v. a.* To make a crease or mark in a thing by compress-ing, folding, or doubling; as, to crease paper.

Creasote, *n.* See *CREOSOTE*.

Cre'at, *n.* [*Fr.*] (*Manege*.) A riding-master's assistant.

Cre'atable, *a.* That may be created.

Create, *v. a.* [*Lat. creo, creatus*; *W. creu*, to form, to make; *It. caraim*, to perform; *Gr. krainō*, to accomplish, Sausk. *kri*, to create.] To bring into being from nothing; to cause to be or to exist; to originate; to shape and organize.

"In the beginning God created the heaven and the earth." *Gen. i. 1*

—To cause; to be the occasion of; to beget; to generate, to bring forth; as, to create offspring, to create an idea.

"Must I new bars to my own joys create?" — *Dryden*.

—To make or produce by new combinations; to form anew; to change the state or character of; to renew; to invest with a new character; as, to create a peer.

"All men were created equal." — *Jefferson*.

Cre'atine, or **KREATINE**, *n.* [*From Gr. kreas, flesh. (Chem.)*] A substance having basic properties found in flesh and wine. Flesh contains but a very small portion of this body. It is prepared by chopping up raw cod mixing it with an equal weight of water, and express-ing the liquid. The liquid is then heated, to coagulate the albumen and baryta; water is added as long as it occasions a precipitate. The filtered liquid is evaporated to a very small bulk, and yields crystals of nearly pure *C.* It crystallizes in colorless oblique prisms. It is sparingly soluble in cold water and alcohol, and insoluble in ether. Although neutral to test-papers, it forms definite compounds with some of the acids. By boiling *C.* with hydrochloric acid, a new base — *creatinine* — is formed.

Creatinine, or **KREATINE**, *n.* (*Chem.*) Is formed spontaneously in putrid wine, or by acting on creatin with hydrochloric acid, when hydrochlorate of *C.* is formed, from which the acid may be separated by boil-ing it with hydrated oxide of lead. It requires twelve parts of cold water for solution, but dissolves mor-e readily in hot water and alcohol. Its solution restores the color of reddened litmus, and it appears to be some-what strong in its basic properties, forming crystallin sulphates, hydrochlorates, and numerous double salts.

Cre'ation, *n.* [*Fr. création*, from *Lat. creatio* — *creo*.] Act of creating, especially the act of bringing this world into existence. — Act of making by new combinations; ac-t of investing with a new character; act of producing; as the creation of a peerage. — Anything produced or cause to exist; the aggregate of created things; any part of the things created; creatures; the world; the univers.

"Egeria, sweet creation of some heart." — *Byron*.

(*Theol.*) There is but one underived and reflecting cause by whose power and agency all things were a first created. *C.*, in its strict and primary sense, signifi-es the bringing into being of something which did not before exist. It is therefore generally applied to the general production of the materials out of which the visible world was composed. In a secondary or subor-dinate sense, it is used to denote those subsequent op-erations of the Deity upon matter by which the whole system of nature and all the primitive order of things received their forms, qualities, and laws. In this se-condary sense, God is said to have created man out of the dust of the earth. The researches of modern sci-ence have raised many questions as to the accuracy of the account given by Moses, in the beginning of *Genes* of the *C.* of the world, or, at least, of the commonly re-ceived interpretation of it. To enter upon the sever-est points of controversy, and to give the various solu-tions of them, would be to write a book; and this is the le-cessary as, to our mind, no satisfactory solution of the difficulties has yet been arrived at. There is indubita-ble evidence that the world existed many ages, and unde-went various changes, before it received its prese-ent races of inhabitants, others, of other forms and oth-er properties, having lived their ages and become extinc-t. The difficulty is to reconcile these facts with what is find recorded in the book of *Genesis*. The most pro-able solution, and even that is not without its diffi-culties, is, that in *Genesis* we have an account of ty distinct *C.* separated from each other by a very lon-g and undetermined period, the first being in the *begi-nning*, when God created the heavens and the earth; the other, when the work of the days was carried on, the days being understood to mean long periods of time. It is to be borne in mind that the great truth which Mos intended to convey to the children of Israel was, th- God was the creator of all things; and that it was necessary for him to do this so as to be understood by them, and to conform his instructions to their prece-ceived or pre-received opinions. Scripture was intend-ed to teach theology, not science — to reveal what can never have been found out by reason, and to leave reason its own particular province. If, therefore, by the powers of reason man has come to see greater beaut-ies and a sublimer depth in the works of God than have been revealed in his divine word, it seems very unreason-able to make use of this as an argument against the truth of revelation. To expect from the Bible a scientific accou-nt of the works of *C.* seems as unreasonable as if we were to expect an accurate knowledge of the anatomy of the human body from a child before he attempted to wa-ge God has given man instincts before reason; and thou- reason may teach us that instincts sometimes err, the errors cannot be advanced as an argument against the existence of the instincts, but are to be attributed to the imperfections of our nature. God is the author of nature, as well as of the Bible, and, instead of attempt-ing to set up the one in opposition to the other, we ought

to wait with patience till some satisfactory solution of the difficulty may be arrived at. It was an excellent advice of an eminent divine, to learn to "trust God where we cannot trace Him." It is to be regretted that Christians have frequently been led into the error of attempting to establish the truth of Christianity upon a solution of such difficulties as those that occur in the Mosaic account of the *C.* If in the prophetic writings englobed periods of time are expressed by the term *days*, the like interpretation may, without any stretch of the imagination, be given to the *days* of creation, the works of which, though long after the fact, were as much subject of revelation as the other. Science has already furnished us with several very remarkable proofs of the truthfulness of the Mosaic account. The order of *C.*, as given by Moses, is exactly that which science tells us had been followed. We are told also, that on the first day God said, "Let there be light, and there was light;" and afterwards we find that the sun and moon were not created or made to shine till the fourth day. This apparently manifest contradiction has been reconciled by modern science, which proves that light exists independently of the sun, and must itself have been an original and independent *C.*

Creational, a. Relating, or pertaining, to creation.
Creative, a. Having the power to create, or exerting the act of creation.

"Of all his works, creative beauty burns
With warmest beam." — Thomson.

Creativeness, n. State of being created.
Creator, n. [Lat.] A maker; a producer; distinctly, the Supreme Being, who called all things into existence out of nothing; that which creates, produces, causes.

"Commit yourself into the hands of your faithful Creator."
Jeremy Taylor.

Creatorship, n. State or condition of a creator.
Creatress, n. A female who creates.
Creatural, a. Having the qualities of a creature.
Creature, n. [Fr. *créature*, from Lat. *creatura*, from *eo*, to create.] That which is created; a created being; everything besides the Creator, or everything not self-existent; an animal of any kind; a living being; a man; beast.

"God's first creature was light." — Bacon.

human being, in contempt, tenderness, or pity; as, a *creature*, a poor *creature*, a common *creature*.

"The creature's at his dirty work again." — Pope.

"Cry, oh sweet creature, and then kiss me hard." — Shaks.

person who owes his rise and fortune to another; a pendant; a tool; a servile retainer.

The duke's *creature* he desired to be esteemed." — Clarendon.

Naturally, a. Having the qualities of a creature.
Relatives, or creaturely infinities, may have finite proportions each other." — Cheyne.

Naturalness, n. State or condition of a creature. (R.)
Crease, n. (Mining.) The work or tin in the middle of the budle or dressing.

Crillon, Prosper Jolyot de, a French dramatic poet, born at Dijon, in 1574. He was intended for the law profession, but devoted himself to the tragic muse, and produced *Idomeneus*, which met with success. This was followed by *Atræus*, *Electra*, and *Rhadamistus*, which were still more successful. He then led a sedentary life for many years, but again resumed his dramatic labors, and produced the tragedies of *Calpurnia* and *The Triumvirate*. Died 1762. — His son, CLAUDE CRILLON, B. 1707, was, for a time, in high repute for his wit and gaiety, and for his clever but licentious novels, which are best forgotten. D. 1777.

Crin-cos-tate, a. [Lat. *creber*, close, and *costa*, a rib.] (Zool.) Close-ribbed, as certain shells.

Crin-sul-cate, a. [Lat. *creber*, and *sulcus*, a furrow.] (Zool.) Applied to shells marked with transverse furrows closely set.

Crèsy, (kres'se), an inconsiderable village of France, Somme, 11 m. N. of Albeville, famous in history for the victory obtained over the French, under Philip of Flanders, by Edward III. of England, August 26, 1346. This battle fell the king of Bohemia, the count of Flanders, 8 other sovereign princes, 80 bannerets, 1,200 knights, 1,500 gentlemen, 4,000 men-at-arms, with the duke of Alençon, and the flower of the French nobility. It has been said that cannon were first employed by the English in this battle, and that they contributed not a little to their success.

Credence, n. [L. Lat. *credentia*; It. *credenza*, from *credere*, *credens*, to credit, to believe.] Reliance of the mind on evidence of facts derived from other sources than personal knowledge, or from the testimony of others; belief; credit; trust; confidence.

Love and wisdom, may plead for ample credence." — Shaks.

Credence, n. That which gives a claim to credit, belief, or confidence. After they had delivered to the king their letters of credence, they were led to a chamber richly furnished." — Hayward.

Credence, n. A small table near the altar, or communion-table, on which the bread and wine to be used in the celebration of the Lord's Supper are placed, previous to consecration. They were common in the early churches. The name is said to be derived from the practice in ancient courts of having a sideboard or credence-table, at which the cup-bearers and carvers (*credentarii*) were required to taste the wines and meats before being presented to the monarch, in case of poison.

Credendum, n.; pl. CREDENDA. [Lat.] A thing au-
thorizing belief; an article of faith.

These were the great articles and credenda of Christianity." South.

Credent, a. Believing; easy of belief. (R.)

"If with too credent ear you list his songs." — Shaks.

—Having credit; reliable; not to be questioned.

"My authority bears a credent bulk." — Shaks.

Credentia, a. Entitling to credit; as, a *credentia* letter.

Credit, n. That which gives a title to credit: the warrant upon which belief or authority is claimed.

"Reason our best credentia doth appear." — Buckingham.

Credit, n. Writings, testimonials, or letters, showing that one is entitled to credit, or is invested with authority; — usually applied to the instruments or letters which an ambassador or other diplomatic minister receives from his own government, to present to that to which he is sent, and which define his powers and show to what rank of minister he is intended to belong. Hence, the minister or ambassador must communicate their contents before being admitted to his first audience.

Credibility, n. [Fr. *crédibilité*.] Credibleness; state or quality of being credible.

Credible, a. [Fr.; Lat. *credibilis*, from *credo*.] That may be believed; worthy of credit or of belief; having a claim to credit; as, a *credible* witness.

"Upon the testimony of credible persons, I am free from doubt." Tillotson.

Credibleness, n. State or quality of being credible; worthiness of belief; just claim to credit or belief.

Credibly, adv. In a credible or authoritative manner.

Credit, n. [Fr. *crédit*, from Lat. *credo*, *creditus*.] Faith or trust reposed; reliance on testimony; belief; faith; trust; confidence.

"I may give credit to reports." — Spectator.

Reputation; good opinion; name; character; esteem; honor derived from the confidence of others; as, public *credit*.

"No rich or noble knave
Shall walk the world in credit to his grave." — Pope.

(Com.) Reputation for pecuniary worth, which entitles a man to be trusted; as, my *credit* is good.

(Book-keeping.) The side of an account or cash-book, in which a credit is entered; also money or convertible securities possessed or due; as, a payment placed to one's *credit*.

Influence derived from popular esteem.

"The credit of divine testimony." — Hooker.

(Polit. Econ.) The lending of wealth, or of the means of acquiring wealth, by one individual or set of individuals to another. The party who lends is said to give *C.*, and the party who borrows, to obtain *C.* Hence, *C.* may be defined to be the acquisition by one party of the wealth of another in loan, according to conditions voluntarily agreed on between them. Very exaggerated notions are commonly entertained of the influence of *C.*; but, in fact, all operations in which *C.* is given or acquired, resolve themselves into a new distribution of wealth already in existence. The magical effect that is every now and then ascribed to *C.*, is due to the fact that by the confidence implied in the giving *C.*, capital heretofore dormant or imperfectly productive becomes active or productive. A party who purchases goods payable at some future date, obviously acquires the command of so much of the capital of the seller of the goods as their value amounts to, in the same way that a party who has a bill discounted acquires the command of a corresponding portion of the capital of the discounteer. Wealth is not created by the issue of bills; and all that their negotiation does, is to transfer already existing property from one individual or party to another; or, to exhibit the fact in a still more simple form, the *C.* given by A to B is an asset of A and a liability of B. To confound *C.* with wealth, is to confound the economical organization of society with society itself.

Public *C.* is the phrase used to express the trust or confidence placed in the State, by those who lend money to governments.

Credit, v. a. To believe: to confide in the truth of; as, to *credit* the belief of one's senses.

"Now I change my mind,

And partly credit things that do presage." — Shaks.

(Com.) To enter upon the credit side of an account; as *crediting* cash received. — To set to the credit of; as, to *credit* a person with goods bought from him.

Creditable, a. Reputable; that may be enjoyed or exercised with reputation or esteem; estimable; as, a *creditable* way of living.

Creditableness, n. Quality of being creditable; reputation; estimation.

Creditably, adv. Reputably; with credit; without failure or disgrace.

Credit Foncier, (krai'de fon(g'y'se-a), n. [Fr., credit on lands.] A system of borrowing money on the security of landed property, repayment to be made by instalments, so as to extinguish the debt within a certain period, was first established in France in 1852. The *C. F.* is, on the general hypothesis of prudence in advances, of great public benefit. It is susceptible of many modifications, and has already found very useful applications in this country.

Credit Mobilier, n. [Fr.] The name given to a gigantic scheme promulgated in France in 1852, and sanctioned by the existing government, the objects of which are: 1. To take in hand and originate trading enterprises of all kinds, on the principle of limited liability. 2. To supersede or buy up trading companies; and to substitute script and shares of its own, for the shares and bonds of the company. — Under the title of THE CREDIT MOBILIER OF AMERICA, a corporation chartered in Pa. in 1859, for the carrying on of a general loan and contract business, was reorganized in 1864 for the purpose — as it eventually turned out to be — of enabling the promoters of the Union Pacific R.R. to construct their line without incurring pecuniary loss in the event of the

enterprise proving a failure. The integrity of its management becoming impeached, a Congressional investigation was ordered in 1872-3, and it resulted in proving that the affairs of the company had been conducted on an illegal and corrupt basis.

Creditor, n. [Lat.] One who credits, or gives credit in business transactions; one to whom a sum of money or other thing is due; one who has a just claim for money or other obligation; — correlative to *debtor*.

"Creditors have better memories than debtors." — Franklin.

Creditress, Creditrix, n. [Lat.] A female creditor.

Credit River, in Minnesota, a township of Scott co.

Credo, [Lat., I believe.] (Eccl.) A part of the service of the mass, beginning with the words, *Credo in unum Deum*. It is the confession of Faith of the Roman Catholic Church. See ATHANASIAN CREED.

Credulity, n. [Fr. *crédulité*; Lat. *credulitas*, from *credulus* — *credo*.] Quality of being credulous; easiness of belief; a disposition to believe on slight evidence, or no evidence at all.

Credulous, a. Apt to believe without sufficient evidence; easily deceived; unsuspecting; as, a *credulous* woman.

—Credible: easy of belief.

Credulously, adv. With credulity.

Credulousness, n. Quality of being credulous; credulity; easiness of belief; aptness to believe without sufficient evidence.

Creed, n. [Lat. *credo*, I believe; placed at the beginning of the Latin version of the Apostles Creed.] Any brief summary of Christian belief; but more especially either of the three confessions commonly called the Apostles, Nicene, and Athanasian. The term is derived from the Latin *credo*, q. v., in like manner as Pater-noster, Ave-maria, &c., are prayers named from the first words of these formulas in the Latin tongue.

Creek, n. [A. S. *crecca*; Fr. *crique*.] A shore or bank on which the water beats, running in a small channel from any part of the sea. It is also applied to any part of a large river, which is resorted to as a harbor or landing-place by small craft. In the United States, the term *creek* is used as synonymous with the English words *brook* and *rivulet*.

—A turn, winding, or alley; as, "Alleys, creeks, and narrow lanes." — Shaks.

Creedmoor, a locality in Long Island, N. Y., Queen's co., 11 m. E. of New York city. Here the largest and most complete rifle range in the U. States was established in 1871, by the American Rifle Association.

Creeks, a tribe of N. American Indians. See MUSKOGEEES.

Creeksville, in New York, a village of Otsego co., about 90 m. W. S. W. of Albany.

Creek'y, a. Containing creeks; full of creeks; winding.

"Run bathing all the creek'y shore a-flot." — Spenser.

Creel, Crail, n. An osier basket for carrying fish, used by anglers, &c. (Peculiar to Scotland.)

Creelsburg, in Kentucky, a township of Russell co., on the Cumberland River, abt. 5 miles below James-town.

Creep, v. n. (Pret. and imp. CREEP.) [A. S. *creopan*; L. Ger. *kruipen*; D. *kruipen*; O. Ger. *krifan*; Gael. *crubain*; W. *crepian*; Lat. *repo*; Gr. *herpō*; Sansk. *srip*.] To move with a slow and low pace; to move as a worm, insect, or reptile; to crawl.

"And every creeping thing that creeps the ground." — Milton.

—To move along the ground, or on the surface of any other body, in growth, as a vine.

"Creeping where no life is seen,

A rare old plant is the Ivy green." — Dickens.

—To move slowly, feebly, or timorously, as an aged person.

"And ten low words oft creep in one dull line." — Pope.

—To move slowly and insensibly; to move secretly; to steal in; to move forward unheard and unseen; as, time *creeps* on.

"To-morrow, and to-morrow, and to-morrow,

Creeps in this petty pace from day to day." — Shaks.

—To be servile; to fawn; to insinuate into; as, to *creep* into the good graces of another.

"Humbly as they used to creep to holy altars." — Shaks.

—To experience a crawling sensation, as of anything noxious creeping over the body; as, the sight is enough to make one's flesh *creep*.

(Mining.) The depression which takes place on the

surface, from the removal of beds of coal beneath. Masses of coal-seam, like huge pillars, are left by the miners for the support of the superincumbent strata; the pressure, however, of these beds is so great that, in course of time, the ceiling gradually sinks. A consequent depression takes place in the beds above, as also an alteration of the surface-level. But this, being so gradual, is seldom noticed, except when it is made evident from the accumulation of surface-water.

Creep'er, n. He or that which creeps; an insect; a reptile.

—Any parasite plant that creeps along the ground, or clings to other support.

"Winders and creepers, as Ivy, hony, and woodbine." — Bacon.

(Zool.) See CERTHIADÆ.

Creeping, n. A plant growing on a snout or a creeping along the ground.

—A kind of grapnel used for dragging the bottom of a river, harbor, &c., to recover things lost.

—A kind of patten or clog worn by women. — A contrivance fixed to a boot or shoe, to prevent the feet from slipping.

—pl. (Arch.) Same as CROCKETS, q. v.

Creep'-hole, *n.* A hole into which a person or animal may enter, to escape danger. — A subterfuge; an excuse; an evasion; as, a *creep-hole* out of a controversy.
Creeping-crow-foot, *n.* (*Bot.*) See *RANUNCULUS*.
Creepingly, *adv.* By creeping; slowly; insidiously.
Creese, (sometimes written *KREESE*, *KRIS*, and *CREASE*), *n.* [*Malay, kris.*] A dagger, knife, or yataghan, used by the Malays.

"The cursed Malayan crease." — Tennyson.

Cre'feld, a thriving town of Rhenish Prussia, 6 m. W. from the Rhine, and 13 m. N.W. of Düsseldorf. It is the principal place in Prussia for the manufacture of silks, velvets and silk-thread. It has also fabrics of woollen, cotton, laco, &c. *Pop.* 55,218.

Creigh'ton, in Ohio, a post-office of Guernsey co.

Cre'ma, a town of N. Italy, in Lombardy, on the Serio, 20 m. N.W. of Cremona. It has a splendid cathedral. *Pop.* 9,412.

Cremaillere, (*krä-mäl-yär'*), *n.* [*Fr.*] (*Fortif.*) A horizontal outline which is indented or zigzagged.
Cre'master, *n.* [*Gr. kremao*, I suspend.] (*Anat.*) A muscle that draws up and corrugates the skin of the scrotum.

Cre'mation, *n.* [*Lat. crematio*, from *cremo*, to burn.] A burning; particularly applied to the ancient custom of burning dead bodies.

Cre'mieux, ISAAC ADOLPHE, a French lawyer and republican, b. at Nîmes, of Jewish parents, 1796; was a member of the Chambre des Députés during the reign of Louis Philippe, and was made Minister of Justice after the revolution of 1848. After the *coup d'état*, he retired from political life, and devoted himself to his profession at the French bar. In Nov., 1867, he was elected deputy to the Corps Législatif; and, on the fall of the empire, 1870, accepted to be a member of the Government of the National Defence. Made a Senator in 1876, and d. 1880.

Cre'moearp, *n.* [*Gr. kremao*, I suspend, *karpes*, fruit.] (*Bot.*) A 2- to 5-celled, inferior fruit, the cells of which are 1-seeded, induricant, dry, perfectly close at all times, and, when ripe, hanging separate from a common axis, as in umbelliferous plants.

Cremona, (*krai-mo'na*), a fortified city of N. Italy, in Lombardy, the cap. of a prov. of the same name, 48 m. S.E. of Milan. It has a vast number of churches, chapels, convents, and an inferior university. The cathedral is a massive structure, and the tower of Cremona is very curious, consisting of two octagonal obelisks, surmounted by a cross, and 372 feet in height. The Corso is very fine, and much resorted to. *Manuf.* Silk, porcelain, and chemicals. It has, besides, been long noted for its superior violins. *Pop.* 31,101. This city is of great antiquity, having been created a Roman colony in 291 B. C.

Cremona, *n.* (*Mus.*) A general designation of the violins made at Cremona, during the 17th and 18th centuries, chiefly by the family Amati. *C.* is also a name erroneously given to a stop in the organ; being nothing more than a corruption of *krumhorn*, an ancient wind-instrument, which it was originally designed to imitate.

Cremonese, *a.* (*Geog.*) Pertaining to, or relating to, Cremona, Italy.

Cre'mor, *n.* [*Lat.*] A milky substance; an oily liquor resembling cream.

"The food is reduced into a chyle or *cremor*." — Ray.

Cre'rate, **Cre'rated**, *a.* [*Lat. crenatus*, from *crena*, a notch.] Notched; indented; scalloped; as, a *crenated* cell.

Cre'nature, *n.* (*Bot.*) The state of being notched; a notching.

Cre'nellate, *v. a.* [*Fr. créneler*, to notch, to indent, from *Lat. crena*, a notch.] (*Fortif.*) To make openings or embrasures in an embattled parapet, for the garrison to fire through.

Cre'nellated, *p. a.* Embattled; indented; furnished with crenelles; as, a *crenellated* wall.
Crenellated moulding. (*Arch.*) An indented moulding, used in Norman architecture.

Crenelle, (*kre-nel'*), *n.* [*Fr. créneau*; from *L. Lat. crenellus*, a feather, a wing, a battlement.] (*Fortif.*) An opening in an embattled parapet; a loop-hole or embrasure through which to shoot.

Cre'nie Acid, *n.* (*Chem.*) One of the constituents of vegetable mould, produced wherever leaves and other plants are decaying.

Cre'nulate, **Cre'nulated**, *a.* (*Bot.*) Notched with small rounded or convex teeth.

Cre'ole, *n.* [*Fr.*; from *Sp. criollo*.] A person, in either America or the West India Islands, of European progenitors; as, a Spanish *creole*. It is sometimes, also, applied, but wrongly, to any person born within tropical latitudes, of whatsoever color; as, a *creole* negro.

Creole'au, *a.* Resembling or pertaining to the Creoles.
Cre'on, (*Myth.*) King of Corinth, promised his daughter Glauce to Jason, who thereupon repudiated Medea. Medea, in revenge, presented Glauce with a gown covered with poison. Upon wearing it, she expired in the greatest agonies. Creon and his family shared the fate of Glauce, whose sufferings will be found vividly depicted in the "Medea" of Euripides.

Cre'osote, *n.* [*Gr. kreas*, flesh, and *sozo*, I preserve.] (*Chem.*) A fluid containing oxygen, hydrogen, and carbon, first found by Reichenbach, in the heavy oil obtained by the distillation of wood-tar. Its preparation is too tedious and troublesome to describe here. When pure, it is a colorless oily liquid of high refractive power, boiling at 398°. It is not easily kindled, but, when burnt, it gives forth a sooty, smoky flame. It has a burning taste, and its odor is peculiar. It is sparingly soluble in water, to which it gives its odor and taste. It is freely soluble in acetic acid, alcohol, ether, benzol,

and tersulphide of carbon. It coagulates albumen immediately, and is the most powerful antiseptic known. Meat that has been plunged into a solution containing only one per cent. of this substance becomes dry and hard on exposure to the air, and does not become putrid. It is thought by many, from its composition and properties, to be a homologue of phenic acid.

(*Med.*) As a stimulant to ill-conditioned ulcers, and in certain eruptive diseases of the skin, *C.*, made into an ointment, is almost always attended with satisfactory results; while as an application to toothache, a few drops dissolved in alcohol, and applied on cotton to the tooth, will most frequently afford direct relief; the obnoxious taste, however, is often regarded as bad as the disease. *C.* acts as an antiseptic to decayed teeth. A few drops of it smeared on a paper placed in a safe, drive away all insects, and keep the meat fresh for several days longer than it could be otherwise preserved.

Cre'pance, **Cre'pance**, *n.* [*From Lat. crepare*, to crack.] (*Furriery.*) An ulcer seated in the middle of the fore-part of a horse's foot.

Cre'pitas, *n.* [*From Lat. crepare*, to crack.] (*Med.*) The crackling noise which is produced upon pressing cellular membrane when it contains air. — Also the noise produced by a discharge of wind from the bowels.

Cre'pitate, *v. n.* [*Lat. crepito*, *crepitatus*, frequentative of *crepo*, to rattle, to crack.] To crackle; to snap; to burst with a small, sharp, abrupt sound, rapidly repeated, as salt in fire.

Cre'pitation, *n.* Act of bursting into a frequent repetition of small, sharp sounds; a small crackling noise.

(*Surg.*) A grating noise made by the two edges of fractured bones when they rub together. It is one of the indications of a fracture which the surgeon listens to hear, when forming an opinion as to the nature of the injury.

Cre'pon, *n.* [*Fr.*] A kind of woollen, silk, or mixed fabric resembling crepe.

Crept, *imp.* of *CREEP*. *q. v.*

Crepus'cular, **Crepus'culous**, *a.* [*Lat. crepusculum*, dim. from *creper*, dusky, dark—a Sabine word; Sansk. *kshapā*, night.] Pertaining to twilight.

"The beginnings of philosophy were in a crepuscular obscurity." — Glanville.

Crescendo, (*kre-shen'dō*), *n.* [*It.*; from *Lat. cresco*, *crescens*, to grow, to increase.] (*Mus.*) A term represented by the sign \lessgtr , which is placed over a passage to direct the notes to be increased from soft to loud.

—*a.* With progressively increasing volume of voice or strength of tone; as, a *crescendo* movement.

Crescens, an assistant of St. Paul, said to have been one of the 70 disciples.

Crescent, (*kres'ent*), *a.* [*From Lat. cresco*, *crescens*, to grow, to increase.] Increasing; growing; in an expanding state.

"Asturto, queen of heaven, with *crescent* horns." — Milton.

—*n.* [*Fr. croissant*.] The moon in her state of increase, until one-half of her face is enlightened; anything resembling the figure or shape of the new moon.

"Two fair *crescents* of translucent horn." — Pope.

—A figure or representation of the new moon, as borne in the Turkish flag or national standard; the standard itself, and, figuratively, the Turkish power.

"Before the cross has waned the *crescent's* ray." — Scott.

(*Hist.*) The name of 3 orders of knighthood, viz.: 1. Instituted by Charles I., king of Naples and Sicily, in 1268; 2. That established in 1448 by René Duc d'Anjou; and 3. The Turkish order of the *C.*, instituted by the Sultan, Selim III., in 1801, which did not survive its founder.

(*Her.*) A device in the form of a new moon, borne on an escutcheon. When the horns are turned towards the chief or upper part of the shield, it is called *crescent*, in contradistinction to the terms *increscent* and *decrecent*; in the former of which the horns are turned to the right, and in the latter, to the left side of the shield. The *C.* is frequently used to distinguish the coat-armor of a second brother or junior family from that of the principal branch. As is well known, the *C.*, or, as it is usually designated, the *C. montant*, has become the symbol of the Turkish Empire, which has thence been frequently styled the Empire of the *C.* This symbol, however, did not originate with the Turks.

Long before their conquest of Constantinople, the *C.* had been used as emblematic of sovereignty, as may be seen from the still existing medals struck in honor of Augustus, Trajan, and others, and it had always been the symbol of Byzantium. On the overthrow of this empire by Mohammed II., the Turks, regarding the *C.*, which everywhere met their eye, as a good omen, adopted it as their chief bearing; and it has continued ever since to decorate their minarets, their insignia, their dress, and in short anything appertaining to their empire. — At the present day, it is frequently to be seen on churches in Russia, generally surmounted with the cross, marking unquestionably the Byzantine origin of the Russian Church.

Crescent, in Iowa, a township of Pottawattomie county.

Crescent, in New York, a post-office of Saratoga co.

Crescent City, in California! a post-town, cap. of Del Norte co.; Lat. 40° 48' N., Lon. 124° 5' W.

—A town of Tuolumne co., on the Tuolumne River, about 20 m. above its junction with the San Joaquin.

Crescent City, in Illinois, a post-office of Iroquois co.

Crescent City, in Iowa, a post-village of Pottawattomie co., on the Missouri River, about 7 miles above Council Bluffs.

Crescent Hill, in Missouri, a post-office of Bates co.

Crescentia, *n.* (*Bot.*) The typical genus of the order CRESCENTACEÆ, *q. v.*

Crescentia/ceæ, *n.* (*Bot.*) The *Crescentia* or Calabash-tree family, an order of plants, alliance *Bignoniales*. *DIAG.* Parietal placentæ, succulent hard-shelled fruit, and an amygdaloid embryo with a short radicle. They consist of small trees, with leaves simple, alternate, or clustered, without stipules; flowers irregular, growing out of old branches or stems; calyx free, entire at first afterwards splitting irregularly; corolla somewhat bilabiate; stamens didynamous (2 long and 2 short), with a fifth of rudimentary character; ovary one-celled, and surrounded by an annular disc; fruit indehiscent, woody; seeds large and numerous, without albumen, enveloped in a pulp. The order includes about 34 species, which have been arranged in 11 genera. They are natives exclusively of tropical regions. The sub-acid pulp of the fruit of *Crescentia cujete*, the Calabash-tree (fig. 717), is eaten by the negroes of Jamaica, and the hard shell is used for holding liquor or snuff, and for many other purposes. (See *CALABASH*). — The fruit of *Parm. tiara edulis*, another plant of this order, is eaten by the Mexicans; and that of *P. cerifera* is greedily devoured by cattle in Panama. The latter fruit resembles a caleb in shape, and the plant is commonly called the caleb-tree.

Crescent'ic, *a.* Formed like a crescent. (*n.*)
Crescenti'no, a town of N. Italy, in Piedmont, on Pô, 20 m. from Turin. *Manuf.* Silks, and woollens. *P.* 6,374.
Crescentville, in Pennsylvania, a village within chartered limits of Philadelphia, on Tacony Creek.
Crescive, *a.* [*From Lat. cresco*.] Increasing; growing.
Cresco, in Iowa, a thriving town, the cap. of Iowa co., on the Chicago, Milwaukee and St. Paul railroad, 150 m. S.E. of St. Paul. The trade center of a rich live-stock raising country where the breeding and rearing of fine cattle and sheep are extensively carried on. *Pop.* in 1897 estimated at 3,000.
Cresco, in Kansas, a post-village of Anderson co., abt. 52 m. S. by W. of Lawrence.
Cresco, or **CERESCO**, in Minnesota, a township of Earth co.

Cresco, in New York, a post-office of King's co.

Cress, *n.* [*A. S. cresse*; *D. kers*; *Ger. kresse*; *Fr. cress* *It. crescione*; *L. Lat. cresso*; probably allied to *Lat. cre* to grow, to increase.] (*Bot.*) A name given to many plants, of which the foliage has a pungent, mustard-taste, and is used as salad. It is usually more strictly confined to the genus *LEPIDIUM*, *q. v.* See also *BARBARI CARDAMINE*, *NASTURTIUM*, and *TROPEOLUM*.

Cresselle, *n.* (*Eccl.*) An instrument of wood, which during passion-week, is used instead of bells in Catholic churches.

Cres'set, *n.* [*O. Fr. croisset*, from *L. Lat. crucibulum*, from *Lat. crux*, a cross; *Icel. krus*.] A pitcher or lantern fixed on the top of a pole, to contain a torch; a great light set on a beacon, light-house, or watch-tower.

Cressets were originally surmounted by a small cross, from which custom they derive their name; and it was by carrying about a fiery cross that armies were raised in Scotland during the olden time. Shakespeare makes use of the word in Henry IV.:

"At my nativity
The front of heaven was full of fiery sparks,
Of burning cressets."

—In England, a kind of crane for sustaining a pot over the fire; as, a kitchen-cresset.

Cress'kill, in New Jersey, a post-office of Bergen co.

Cresson, in Pennsylvania, a summer resort of Cam co., 258 m. W. by N. of Philadelphia, on the crest of Allegheny mountains.

Cresso'na, in Pennsylvania, a post-township of Schuylkill co.

Cress-rocket, *n.* (*Bot.*) See *VELLA*.

Crest, *n.* [*Fr. crête*; *Lat. crista*; probably allied to *cresco*, to grow, to rise.] The comb of a cock; a tuft or plume on the head of certain birds; any tuft or ornament growing on the head; as, a serpent's *crest*.

Fig. 717. — CALABASH-TREE.
(*Crescentia cujete*.)

Fig. 716.
ARMS OF TURKEY.
(Golden crescent on sinople.)

Fig. 718.
CRESETT

-Lofty mien; pride; spirit; fire; courage.

"The crag is won, no more is seen
His Christian crest, and haughty mien."—Byron.

-The top; the summit; as, the crest of a mountain, the crest of a wave.

-The arching of the neck of a horse.

(*Fortif.*) The summit-line of a slope or glacis.

(*Arch.*) A running ornament in a horizontal direction above the line of the cornice, as on the ridge of a roof, a canopy, or any similar works.

(*Her.*) A portion of the armorial bearings of a nobleman or gentleman entitled to bear coat-armour that is commonly used without the shield, being painted on the doors of carriages, and engraved on plate and signet-

Fig. 719. — ARMORIAL INSIGNIA OF THE POPE.

ings. In the days of chivalry, the crest or cognizance of the wearer was borne on the helmet. (See Fig. 591.) It was made of leather or light wood, gilded and painted, and a wreath of twisted silk was fastened round the lower part, where it was attached to the helmet. In modern times the crest is always drawn on a wreath composed of the principal metal and color occurring in the bearer's coat-of-arms, the coils being of metal and color alternately. Sometimes the C. rests on a cap of maintenance. We give, as an illustration, the armorial insignia of the Pope, in which the crest consists of the keys and the keys of St. Peter.

a. To furnish with a crest; to serve as a crest for.—*Bot.* Same as CRISTATE, q. v.

crest'd, p. a. Wearing a crest; adorned with a crest plume; having a tuft on the head, like a crest; as, a crested cock, a crested button.

"He lac'd his crested helm, and strode away."—Dryden.

(*Bot.*) Same as CRISTATE, q. v.

crest'd-diver, n. (*Zool.*) The *Prodiopsis cristatus*, a COLEMBIDÆ.

crestfallen, (*krest'fauln*), a. Dejected; sunk; bowed; spiritless; heartless; spiritless; abject.

"They prolate their words . . . as if they were complaining and crestfallen."—Howell.

(*Manege*.) Having the head drooping aside, as a horse. st'less, a. Without a crest; not of good family; mean descent.

crest'line, in Ohio, a city and R.R. center of Crawford Co., 60 m. N. by E. of Columbus. Here are large shops of the Peuna R.R. Co. Pop. (1897) abt. 3,500.

crest-marine, n. (*Bot.*) The Rock-samphire, *Crithmum maritimum*.

crest-tile, n. (*Arch.*) A kind of tile used to cover the ridge of a roof, upon which they fit on the principle of a saddle.

crest'well, n. The broad margin of a shoe-sole.

cretic Acid, n. (*Chem.*) A colorless liquid, possessing very highly refractive powers, very sparingly soluble in water, either hot or cold, but easily soluble in alcohol, and in ether. It occurs as one of the products in the preparation of carbolic acid, and may be obtained by subjecting that portion of the coal-tar cresote which boils at the temperature between 392° and 428° to fractional distillation. Form. C₁₄H₁₀O₂. Cresylic acid corresponds to Carbolic acid, but is regarded as containing a hypothetical radical *cresyle* (C₁₄H₇) in place of phenyl. The analogy in composition is attended with a resemblance in properties, for cresylic acid has the same septic property as carbolic acid, and is applicable to the same purposes. When acted on by nitric acid, it yields nitrocresylic acid (HO.C₁₄H₁₁(NO₂)₃O), just as carbolic acid gives trinitrophenic acid (HO.C₆H₂(NO₂)₃O).

cre'aceous, a. [*Lat.*, from *creta*, Cretan earth, chalk.] Chalky; having the qualities of chalk; abounding with chalk; as, cretaceous salt.

cretaceous Period, n. [*From Lat. creta*, chalk.] (G. L.) "The name given to the closing area of the Cretaceous Age. It is remarkable for the number of genera of mollusks and reptiles which end with it, and for the appearance, during its progress, of the modern types of plants and fishes."—Dana. The chalk of Europe is one of the rocks of the period, so abundant that it has given its name to the formation. The chalk covers a large extent of surface in Europe and the east of Asia. The typical strata occur in the south-east

of England, and are connected with similar beds in the north of France and Germany, and in Denmark. As developed in the S. of England, the cretaceous system is composed of calcareous, argillaceous, and arenaceous rocks, the former predominating in the upper, and the two latter in the lower portion of the system. The strata occurring in England have been arranged in the following groups:—*Upper chalk*. Generally soft white chalk, containing nodules of flint and chert, in more or less regular layers. — *Lower chalk*. Harder and less white than the upper, and generally with fewer flints. — *Chalk marl*. A grayish earthy or yellowish marly chalk, sometimes indurated. — *Upper greensand*. Beds of silicious sand, occasionally indurated to chalky or cherty sandstone, of a green or grayish white, with nodules of chert. — *Gault*. A bluish tenaceous clay, sometimes marly, with indurated argillaceous concretions and layers of greensand. — *Lower greensand*. Beds of green or ferruginous sands, with layers of chert and indurated sandstones, local beds of gault, rocks of cherty or chalky limestone (Kentish rag), and fuller's earth. A more comprehensive classification, derived from the study of Continental as well as English strata, is given below, with the estimated thickness of each subdivision:

Upper Cretaceous Series.

Maestricht and Faxe.	100 feet
White chalk with flints.	500
White chalk without flints.	600
Chalk marl.	100
Upper greensand.	100
Gault.	150

Lower Cretaceous or Neocomian Series.

Lower greensand.	850 feet
Specton clay.	60
Wealden beds.	1,300

There is no place where all the above strata are present at once, and some are very local and inconstant. — In N. America the C. beds occur at intervals along the Atlantic border S. of New York, from New Jersey to S. Carolina, extensively over the States along the Gulf border, and through a large portion of the Western interior region, over the slopes of the Rocky Mountains, from Texas northward, to the head-waters of the Missouri, and further N.W. in British America. The rocks comprise beds of sand, marl, clay, loosely aggregated shell limestone, and compact limestone; they include in N. America no chalk. The C. formation has a thickness in New Jersey of 400 feet; in Alabama, of 2,000 feet; in Texas, 800; and in the region of the Upper Missouri, of 2,000 to 2,500 feet. The life of the whole C. period was abundant. In its beds are found species of every class of animals having hard parts capable of preservation, except mammals; and even as regards these, most geologists believe their absence to be accidental, as they existed during the preceding period, though their fossil remains are rare. Birds having teeth are found. The more important useful products of this system are chalk, flint, fuller's earth, phosphatic nodules, and the so-called "firestone rock." The two latter are extensively employed as manures.

creta'ceously, adv. After the manner of chalk.

Cre'tan, a. (*Geog.*) Relating or pertaining to Crete, or Candia.

Cre'tan, Crete, Cre'tian, n. (*Geog.*) A native of the island of Crete or Candia.

Crete, (*Vulg. CANDIA*) A large and celebrated island of the Mediterranean, belonging to the Grecian archipelago, of which it forms the S. boundary. It lies between 34° 50' and 35° 55' N. Lat., and 23° 40' and 26° 40' E. Lon., its N.W. extremity being 80 m. S.E. of Cape Matapan, in Greece, and its N.E. termination 110 m. S.W. the nearest point of Asia Minor. It is long and narrow, its length from E. to W. being about 160 m., with a breadth varying from 6 to nearly 35 m.; area, 3,200 sq. m. C. is almost covered with mountains; the loftiest of which, as well as the most famous, is Mount Ida (now Psiloriti), 7,674 feet high. The climate is very healthy, and its luxuriant vegetation presents a wide and favorable contrast with some of the arid regions of continental Greece, but agriculture is in a deplorable state. Crete is highly interesting from its classical associations. It was the birthplace of Jupiter, "king of gods and men." Adventurers from Phœnicia and Egypt introduced arts and sciences into Crete, while Greece and the rest of Europe were involved in the darkest barbarism. The laws of Minos served as a model to Lycurgus; so that Crete became, as it were, a channel by which the civilization of the East was transferred to Europe. It was conquered by the Romans, after an obstinate resistance, anno 67 B. C. The Genoese and the Marquis of Montserrat successively possessed it. The Venetians bought it from the latter in 1204; and in 1669, after a 24 years' war, it was conquered by the Turks. The revolution in Greece was followed by one in Crete, and from 1821 to 1830 the island suffered the worst evils of a sanguinary and devastating war, without conquering its independence. Ever impatient of the Turkish yoke, the Cretans again broke out in open revolt in 1867, and for more than a year resisted courageously the forces of the Turkish empire, asking for union with Greece or independence. But the European powers prevented Grecian intervention, and in 1869 C. was obliged to submit to Turkey. Another revolt broke out in 1897, in which Greece sent an army to C. in defiance of the powers of Europe and despite the fact that their fleets gathered round the island and threatened Greece with blockade. For the details of this insurrectionary movement, see GREECE. The island is divided into the provinces of Candia, Retimo, and Canea, so named from their capital cities. The population, which was over 1,000,000 in ancient times,

has been gradually reduced by various causes until it is now about 300,000.

Crete, in Illinois, a post-township of Will co.

Crete, in Pennsylvania, a post-office of Indiana co.

Cre'tic, n. (*Anc. Pros.*) In Greek and Latin poetry, a foot consisting of two long syllables separated by a short one.

Cre'ticism, n. A cretism.

Cre'tin, n. [*Fr. cre'tin*.] One affected with cretinism.

Cre'tinism, n. [*Fr. cre'tinisme*, perhaps from *chretien*, a Christian, because Cretins were regarded as beings incapable of sinning, and thus were regarded with some kind of respect. — According to others, from the Romance or Grison *cretina*, a corruption of *Lat. creatura*, a creature.] A species of insanity approaching to idiocy, depending on an imperfectly developed brain, and a scrofulous condition of the blood. This low mental standard is generally found to exist in those who have the natural malformation of a *goitre*. The inhabitants of whole valleys in some of the Swiss cantons are found afflicted with this double misfortune of goitre or bronchocoele, and idiocy or cretinism. — See GOITRE.

Cre'tism, Cre'ticism, n. Lying; falsehood; — derived from the ancient Cretans, who were incorrigible liars. (*Titus* i. 12.)

Creuse, a central dept. of France, comprising portions of the old provs. of the Limousin, Auvergne, and Berry. Area, 2,244 sq. m. It is mountainous, and in many parts barren, the rearing of live-stock being the chief branch of rural industry. Min. Coal and salt. Cap. Guéret. Pop. 274,057.

— A river of France, which gives its name to the above dept. After a course of 150 m., it falls into the Vienne, 12 m. N. of Châtellerault.

Creux, (*krō*), n. [*Fr.*, a cavity] (*Sculp.*) A kind of sculpture, when the lines and figures are cut and formed within the face of the plate.

Creuzer, GEORG FRIEDRICH, a German philologist, b. at Marburg, 1771; was professor of Philology and Ancient History at Heidelberg from 1804 to 1848. His literary fame rests chiefly on his *Symbolics and Mythology of the Ancient Nations*, and particularly of the Greeks. D. 1858.

Crevasse', n. [*Fr.*, a crevice.] A deep crevice or cleft in the surface of a glacier. — In the U. States, an opening made in the levee of a river.

Creve'œur, [*Fr.*, heart-breaker.] A Dutch port in the prov. of N. Brabant, on the Meuse, 4 m. N.N.W. of Bois-le-Duc. It figured somewhat prominently in the wars of the Dutch and Spaniards.

Creve Cœur, in Missouri, a P. O. of St. Louis co.

Cre'vet, n. A goldsmith's crucible.

Crevice, (*krē'is*), n. [*Fr. crevasse*, from *crever*; *Lat. crepo*, to crack, to chink, to break.] A cleft; a fissure; a chink; a cranny.

"I pried me through the crevice of a wall."—Shaks.

—v. a. To crack; to flaw; as, to crevice a wall.

Crevillén'te, a town of Spain, prov. Alicante, 20 miles W.S.W. of Alicante city; pop. 7,825.

Crisp, n. A cray-fish. Used locally in England.

Crew, n. [*A S. crewd*, or *cruth*. See CROWD.] A crowd; a collected mixed assembly.

"A noble crew of lords and ladies."—Spenser.

— A company; a band; a gang; — used in a depreciatory sense.

"The Titan race, a rebel crew."—Addison.

(*Naut.*) The company of seamen or sailors belonging to a vessel of whatsoever description; as, to ship a crew.

"The anchors dropped, his crew the vessels moor."—Dryden.

Crew, *imp.* of CROW, q. v.

Crew'el, n. Yarn twisted, and wound on a knot or ball.

"Silk or crewel, gold or silver thread."—Walton.

Crew'et, n. Same as CREET, q. v.

Crib, n. [*A. S. cryb*; Du. *krib*; Ger. *krippe*, dim. of *krippchen*, akin to Gr. *krabbatos*, a couch.] A small bed or couch; as, a child's crib. — A manger; a rack; as, a crib for hay.

"The steer and lion at one crib shall meet."—Pope.

— A small habitation; a cottage; a cabin.

"Liest thou in smoky cribs?"—Shaks.

— A corn-bin. — A stall for cattle. — A prison; a house of detention; a lock-up. (*Cont.*)

— Anything copied literally from an author's work; — used colloquially.

—v. a. To shut up or confine in any narrow abode; to cage; to confine.

"Now I am cabin'd, cribb'd, confined."—Shaks.

— To pirate or pilfer, as from a literary work. (*Cont.*)

—v. n. To crowd or huddle together.

Cribbage, (*krib'aj*), n. [*Etimol.* uncertain. Perhaps from the low word *crib*, to take, steal, or purloin.] (*Games*.) A game played by two persons with a complete pack of 52 playing-cards. It is divided into two classes, the 5-card and 6-card games. The 5-card is the original game, and affords the greatest scope for the exercise of skill. The points are scored upon a board, and 61 points constitute the game. All the kings, queens, knaves, and tens count as 10 each, and the rest of the cards according to their ordinary value; that is, 6 for six, 5 for five, and so on. The points which reckon for the game are fifteens, sequences, flushes, pairs, &c. After dealing, the players gather up their cards, and having taken out two each, place them, with their faces down, on the table. These four cards form the *crib*, which becomes the property of the dealer, under certain conditions. Points are scored in two different ways in cribbage, — first in play, and second in reckoning up the cards held. After the crib is put out, the pack is cut by the non-dealer, and a card turned up by the dealer. When this card is

a knave, it is called 2 for his heels, and counts 2 to the dealer; and a knave held in hand, of the same kind as the turn-up card, entitles the player to score 1; it is called 1 for his knob. A 6-card C. is played in a very similar manner, but is inferior in science to 5-card C. When three parties play at the game, each plays on his own account; and when four play, sides are generally chosen.

Cribbage-board, *n.* An oblong piece of wood or ivory containing holes, on which cribbage-players score their game by the insertion of pegs.

Cribbing, Crib-biting, *n.* (*Farriery*.) A bad habit met with especially in horses which spend a considerable amount of leisure in the stable. The act consists in the animal seizing with his teeth the manger, rack, or any other such object, and taking in at the same time a deep inspiration, technically called *wind-sucking*. C. springs often from idle play, may be first indulged in during grooming, especially if the operation is conducted in the stall, and the animal be needlessly teased or tickled; is occasionally learned, apparently, by imitation from a neighbor; and in the first instance is frequently a symptom of some form of indigestion. It usually leads to attacks of indigestion. It can be prevented only by the use of a bar-muzzle, as shown in *Fig. 720*; but in those newly acquired cases resulting from gastric derangement, means must further be taken to remove the acidity or other such disorder.

Fig. 720.

BAR-MUZZLE FOR CRIBBERS.

Crib-biter, *n.* A horse addicted to biting its crib or manger.

—One who is dissatisfied with his board and lodging; a grumbler.

Cribble, *n.* [Lat. *cribellum*, dim. of *cribrum*, a sieve; akin to *cerno*, *crevi*, to sift, to winnow; Sansk. *kri*, to separate.] A coarse sieve or screen for sifting sand, gravel, or corn.

—*v. a.* To sift; to cause to pass through a sieve, as meal.

Crib-rate, Crib-rose, *a.* [From Lat. *cribrum*, a sieve.] Perforated with holes like a sieve.

Crib-riform, *a.* [From Lat. *cribrum*, and *forma*, form.] Having the form and characteristics of a sieve.

(*Anat.*) A process in one of the bones of the skull, so called from being perforated with holes for the passage of nervous filaments.

Cricetus, *n.* (*Zoöl.*) The HAMSTER, *q. v.*

Cri'cha, *n.* in Brazil. See *CRICA*.

Crichton, JAMES, (*kri'ton*), surnamed THE ADMIRABLE, B. in Scotland, 1560. His father was a lord of session, and through his mother he was of royal descent. He was educated at the university of St. Andrew's, and graduated M. A. in 1575. He was one of the young men selected to be fellow-students of the young king, James VI., under the direction of George Buchanan. He then went to France, where he continued his studies, and also, as he adhered to the Roman Church, took part in the war carried on by Henry III. against the Huguenots. The beauty of his person, the strength and agility he displayed, joined to his multifarious accomplishments and surprising capacity of eloquent talk, made him the admiration of all. About 1580 he went to Italy, visiting probably Genoa and Rome, and then Venice, where he was warmly received by the great printer Aldus. He was introduced to the Doge and Senate, created astonishment at Venice and Padua, by his brilliant off-hand discourses on philosophy, theology, and other high themes, and his challenge to disputation in any of several languages, and on either side of any controversy. He next went to Mantua, and was appointed tutor to the son of the duke. Attacked in the streets one night by a party of men armed and masked, he overcame them by his superior skill, and recognized his pupil, to whom he at once presented his sword. The young prince immediately ran him through with it, 3d July, 1582. He has left no literary remains of importance.

Crichtonite, (*kri'ton-it*), *n.* (*Min.*) A variety of Menaccanite.

Crick, (*krik*), *n.* [From *creak*; It. *cricche*, a creak.] A local spasm or cramp; a stiffness of certain muscles; as, a *crick* in the neck.

Crick'et, *n.* [Dn. *krekkel*; Ger. *grille*; W. *criciad*, *cri-cell*, cricket, and *ericellu*, to chirp, to chatter; Lat. *gryllus*; Fr. *grillon*.] (*Zoöl.*) The *Gryllides*, a family of insects, sub-order *Orthoptera*, which comprises "the crickets of the hearth," the mole-cricket, and the grasshoppers. The crickets are distinguished from the other members of this family by their long antennae, and by the comparative smallness of their thighs. Their bodies are short, thick-set, and soft, with the head, corselet, and abdomen of equal length and breadth; the elytra, which do not completely cover the belly, are curved squarely, and are not roof-shaped, as in the locust and grasshopper. In the winged species the wings exceed

the elytra, and project even beyond the abdomen, in the form of a sort of bifid tail. The cricket's chirping noise, as it is called, is produced by the friction of the bases of their elytra, or wing-cases, against each other, these parts being curiously adapted to produce this sound. There are many people to whom the chirp of the DOMESTIC CRICKET is not merely an agreeable sound, but who regard the presence of these active insects as a good omen, when heard from the fireside, on a cold winter evening. In the winter months, the C. takes up its abode with man, usually selecting rooms on the lower floor, and greatly affecting the kitchen, where there is generally no lack of food lying about. Sometimes it selects cracks and crevices in which to hide, and often burrows in the mortar, where, through the long evenings, it chirps continuously. Its monotonous chant is considered very amusing by some; by others, whose temperaments are of a nervous nature, it is thought to be disagreeable and irritating. In the summer, the C. takes its departure, and finds an abode in the crevices of garden-walls, and similar places. At this season it does not forget its melody; but, on the contrary, it is said to chirp more pertinaciously on fine nights. Shakspeare, Milton, Cowper, and many other poets have noticed the chirp of *The Cricket on the Hearth*. On it Dickens has written some humorous pages, which, perhaps, will survive many of his larger productions.—The *Field-cricket* is much larger, and also rarer, than the preceding; it is also more noisy. It is of a blackish color, with a large head in proportion to the body, and full, prominent eyes. It frequents hot sandy districts, in which it forms its burrow at the side of foot-paths, &c., in situations exposed to the sun, to the depth of from 6 to 12 inches; and sits at the mouth of it, watching for its prey, which consists of other insects.—See MOLE-CRICKET.

Fig. 721.—HOUSE-CRICKET, (*Gryllus domesticus*.)

Crick'et, *n.* [A. S. *cryce*, a stick.] (*Games*.) A well-known athletic game, much played in England and America. It is played upon a level piece of turf, generally of about one or two acres in extent. In a full game of C., there are 11 players on each side; and 2 bats, a ball, and 2 sets of wickets, with bails, are required. There must also be 2 umpires and 2 scorers. Although an ordinary game is usually played with 11 on each side, there is no restriction as to numbers; the parties may stipulate for 11 against 22, 12 against 20, &c. When a game is about to be played, the wickets, or stumps, are placed opposite each other, 3 on either side, at a distance of 22 yards. Each wicket is 27 inches in height from the ground, and the 3 are connected at the top by 2 loose bails, 4 inches long each. Two lines are then drawn upon the grass at either end. The first is in a line with the stumps, and is called the *bowling-crease*; the other is parallel, 4 feet in front of the wicket, and is called the *popping-crease*. Having chosen sides and tossed for innings, the players on the side which is out take their places. The bowler places himself behind the wicket from which he intends to bowl, and the wicket-keeper directly behind the wicket opposite to him.

Fig. 722.—PLAN OF CRICKET-FIELD, SHOWING POSITIONS OF PARTIES ENGAGED AT DOUBLE WICKET.

Names of parties indicated by the figures: 1, Bowler; 2, Wicket-keeper; 3, Long-stop; 4, Short-slip; 5, Long-slip; 6, Point; 7, Cover-point; 8, Mid-wicket; 9, Long-field off; 10, Long-field on; 11, Leg; OO, Umpires; IT, Scorers. This is the usual placing of the field-men, but bowlers make such alterations as they deem best to oppose the batters.

The rest of the men on the outside are called fielders, and consist of the long-stop, point, cover-point, short-slip, long-slip, middle-wicket, long-field off, long-field on, and leg. All being arranged in their places, the players on the inside send out two batsmen, who take up their posts before each wicket respectively. One of the umpires then calls *play!* and the bowler delivers the ball towards the opposite batsman, his object being either to hit the wickets, or to bowl it in such a way that the batsman may play a catch. In either of these cases the striker is out. But if the batsman can hit away the ball to such a distance that he is able to exchange places

with the opposite batsman, he scores one run to his side. Every time an exchange of places safely occurs, a run is scored to the side who has the innings. The delivery of every four balls constitutes an "over," when the bowling is transferred to the opposite wicket, and all the fielders change their positions accordingly. When a batsman is put out, another of the players on his side takes his place, and so on, till all the players but one are put out, when those who have had their innings field out, and those who have been fielding out take their innings. Each side has two innings, and the party that makes the largest score wins the game. There are several stringent laws with regard to the bowling. If the bowler sends a ball on the outside of the *popping-crease* at the opposite wicket, it is called a *wide-ball*, and scores one to the inside. The bowler must also deliver the ball with one foot behind the *bowling-crease*; the ball must be bowled, and not thrown or jerked, and the bowler must not raise his hand or arm above his shoulder in delivering the ball. An infraction of these rules constitutes a *no-ball*, which scores one to the inside. There are many other laws of C. They are essentially the same in America as those in England, and the code revised by the Marylebone Club is held as the highest authority.

—*v. i.* To play at cricket.

Crick'et-ball, *n.* A hard ball used in the game of cricket.

Crick'et-bat, *n.* A bat made of ash or lignum vitæ used by cricketers to strike the ball.

Crick'eter, *n.* A cricket-player; one skilled in the game of cricket.

Crick'et-ground, *n.* The field or ground set apart for cricket.

Crick'et-match, *n.* A contest or match at cricket between two sets of players.

Cri'cold, *a.* [Gr. *krikos*, a ring, and *eidos*, form.] (*Anat.*) Having the appearance or form of a ring.

Cried, *imp.* of *CRY*, *q. v.*

Crier, *n.* One who cries; one who makes public proclamation; an usher in a court of justice, &c.; as, a town crier.

"He openeth his mouth like a crier."—*Ecc.* xx. 15.

Crillon, LOUIS DES BALBES DE BERTON DE, (*kri'yon*), French general, B. in Provence, 1541. He distinguished himself during five reigns, Henry II., Francis II., Charles IX., Henry III., and Henry IV., and received from Henry IV. the title of "Le Brave des Braves." D. 1615.

Crillon-Mahon, LOUIS DE BERTON DES BALBES QUIERS, Duc DE, a French general, B. 1718. He served in the Italian campaign of 1733, in the German campaign of 1742, in which he was taken prisoner, and at the battle of Fontenoy. He was at the taking of Narbonne after which he entered the service of Spain. In 1763 he took Minorca, and received the title of Duke of Malaga. D. at Madrid, 1796.

Crim. con., *n.* (*Law*.) See CRIMINAL.

Crime, *n.* [Lat. *crimen*; Gr. *krima*, from *kri'nō*, to rate, to judge, to decide, to condemn; Sansk. *kri*, to rate.] An act which violates a law or rule, divine or man, and subjects to judgment and condemnation breach of the laws of right, prescribed by God or man. (*Law*.) The violation of a right when considered reference to the evil tendency of such violation regards the community at large; although it may be an injury, if considered in relation to the damage which party who is made the subject of it individually sustains. The distinction of public wrongs from private—of crimes from civil injuries, seems, upon examination, to consist in this—that private wrongs, or civil injuries, are infringement or privation of the civil rights which long to individuals, considered merely as individuals. Public wrongs, or crimes and misdemeanors, are a violation of the same rights, considered in reference to effect on the community in its aggregate capacity; thus understood, they are classed either as *felonies* or *misdemeanors*.

Capital crime. Any crime which incurs the penalty of death.

Crimea, (*The*), a peninsula of European Russia, the S. of the government of Taurida, formed by the Black Sea on the W. and S., the straits of Caffa on the Sea of Azov on the E., and on the N. connected with Russia by the isthmus of Perekop. Ext. 190 m. with a breadth of about 110. Area, 8,600 sq. m. centre and W. portion consists of a vast steppe, mostly with swamps and salt marshes, barren and extreme, but, upon the plains, affording pasture for large flocks of broad-tailed sheep. In the S. the numerous valleys of great fertility, exhibiting a constant succession of beautiful fields, forests, and meadows. Here the mountains slope towards the steppes on their highest point is Tchatir-dagh, which is 5,000 ft. above the level of the sea. *Rivers*. The Alma, S. and Tchernaya. *Climate*. Unequal and variable; times severe in the winter, and at others not so. Temperature of summer is occasionally as high as 80° Fahrenheit in the shade. The spring is the most healthy season, and the autumn the most unhealthy. The forests are considerable, and furnish pine, oak, elm, and poplar. The wild animals are the wolf, fallow-deer, roebuck, and hare. Among birds noticed the Alpine vulture; and numerous kinds of hawks are trained to falconry by the Tartars. Domestic animals are the camel, dromedary, horse, and sheep. The principal towns are Simferopol (the capital), Baktshi-serai, Sebastopol, Kaffa, Kertch, and Perekop. Pop. 200,000, more than two-thirds of whom are Tartars, and the remainder Russians, Germans, and Poles. Lat. between 42° 20' and 46° 10' N.; Lon. between 40° and 36° 30' E. This country was, at one time

considered the granary of Greece, especially of Athens; and Demosthenes speaks of it in his oration against Leptines. Towards the end of the 11th cent., the Genoese settled in it, but were expelled by the Tartars in 1474. In 1783 the Russians took possession of the country, and the following year it was ceded to them by the Turks; but its peaceable possession was not secured to them till 1791. The C. now forms the greater part of the Russian government Tanrida, and was, in 1854, invaded by the French, British, Italian, and Turkish armies. This was followed by the battle of the Alma, and the siege of SEBASTOPOL, under which name the causes and consequences of the quadruple alliance against Russia are briefly related.

Crinea, in *Michigan*, a village of Muskegon co.

Criminal, *a.* Guilty of a crime; guilty; wicked; atrocious; iniquitous; abandoned.

"Neglect of any of the relative duties renders us criminal in the sight of God." — *Bogers*.

Partaking of a crime; involving a crime.

"What we approve in our friend, we can hardly be induced to think criminal in ourselves." — *Bogers*.

Criminal Conversation, (*Law*.) Adultery; — often used in the abbreviated form of *crim. con.*

Criminal Law. See *LAW*, (CRIMINAL.)

A person who has committed a crime; a malefactor; culprit; a transgressor; a convict; a felon.

Criminalist, *n.* One practised in the criminal law.

Criminality, *n.* [Lat. *criminalitas*.] Quality of being criminal, or a violation of law; guiltiness; quality of being guilty of a crime.

Criminally, *a.* In a criminal manner; wickedly; in wrong or iniquitous manner; not innocently.

Criminalness, *n.* Guiltiness; criminality.

Criminate, *v. a.* [Lat. *criminator*, *criminatus*, from *crimen*.] To accuse; to charge with a crime; to allege to be guilty of a criminal act, offence, or wrong.

Crimination, *n.* [Lat. *crimination*.] Act of criminating; accusation; charge of having been guilty of a criminal act, offence, or wrong.

Criminative, *a.* Charging with crime; criminatory.

Criminatory, *a.* Relating to accusation; accusing.

Crimp, *v. a.* [A.S. *gecrimpt*, crimped; Ger. *krimpen*, to wrinkle.] To pinch up in ridges; to plait; to curl or crisp the hair; to crimp; as, to *crimp* the edging of a cap. To seize. — To decoy or impress into the army; to allure into the hands of a press-gang; as, to *crimp* a seaman.

(*Cookery*.) To make crisp by gashing, as cod-fish.

[A.S. *acrymman*, to crumble; D. *kruimelen*, to crumble; Ger. *krümeln*; L. Sax. *krumean*.] Easily crumbled; friable; brittle.

"The fowler . . .
Treads the *crimp* earth, ranging through fields and glades." — *Philips*.

Inconsistent; not forcible; paradoxical. (R.)

"The evidence is *crimp*; the witnesses swear backwards and forwards." — *Arbutnot*.

A person employed to entrap seamen into the power of a press-gang; one who provides a ship with hands by inveigling them on board by means of artifice.

"Jack had a run for it from the *crimps*." — *Marryat*.

In England, a kind of factor who supplies shipping with sails, and various other necessities.

Crimpage, *n.* Act or practice of crimping.

Crimping-iron, *n.* An instrument for crimping and curling the hair; a curling-tongs.

Crimping-machine, *n.* An apparatus for crimping the ruffles of a shirt, women's cap-borders, &c.

Crimple, *v. a.* [Dim. of *crimp*.] To shrink; to cause shrink; to crimp; to curl; to contract or draw together.

Crimson, (*krim'zn*.) *n.* [Fr. *cramoisi*; It. *cremisi*, from *r. kirmizi*, the name of the insect which produces the dye.] A deep red color; a red tinged with blue; also, a red color in general.

"Beauty's ensign yet
Is *crimson* in thy lips, and in thy cheeks." — *Shaks*.

Of a beautiful deep red; as, a *crimson* tint.

a. To dye with crimson.

n. To become of a bluish-red in color; to crimson.

"Young love, that *crimsons* Beauty's cheek." — *Davies*.

Crimson-warm, *a.* Heated to a crimson color or heated.

Crimed, *a.* [From Lat. *crinis*, the hair.] Hairy.

Crimatory, *a.* Belonging, or relating, to the hair.

Crimmy, *n.* A cant term for a cramp, crick, or himsey.

"For jealousy is but a kind
Of clap and crinum of the mind." — *Hudibras*.

Crimet, *n.* A feather of exceeding tenuity.

Cringe, (*krinj*.) *v. a.* [A.S. *crangan*, to subvert, to die, to perish.] To draw together; to contract.

"You see him *cringe* his face,
And whine aloud for mercy." — *Shaks*.

n. To bend or bow submissively, or with servility; to wince; to make court by mean compliances.

"The *cringing* knave who seeks a place." — *Swift*.

An obsequious bow; servile civility or complaisance.

"Far from me
The fawning *cringe*, and also false dissembling looks." — *Philips*.

Cringeling, *n.* One who cringes meanly and contemptibly.

Cringer, (*krinj'r*.) *n.* One who fawns, cringes, or courts himself with servile obsequiousness.

Cringingly, *adv.* In an obsequious or cringing manner.

Crinkle, (*kring'gl*.) *n.* [Dan. *kringle*.] (Naut.) A short piece of rope with each end spliced into the bolt-rope, a sail, confining an iron ring or thimble.

A thick twig used for closing a gate.

Criniculous, *a.* Pertaining, or having reference, to the growth of hair.

Crinigerous, *a.* [From Lat. *criniger*.] Hairy; overgrown with hair.

Crinite, *a.* [Lat. *crinitus*, from *crinis*, from *crinis*.] Having the appearance of hair; like a tuft of hair.

(Bot.) Bearded with long hairs.

Crinkle, (*kring'kl*.) *v. n.* [D. *krinkelen*; allied to *crankle* and *crank*, *q. v.*] To run in and out with short turns, flexures, or bends; to bend; to wrinkle; to deflect.

"Unless some sweetness at the bottom lie,
Who cares for all the *crinkling* of the pie?" — *King*.

v. a. To form with short turns or wrinkles; to mould into sinuosities, or unequal surfaces.

"Like red-hot devils *crinkled* into snakes." — *E. B. Browning*.

n. A winding, turn, or bend; a wrinkle; a sinuosity.

Crino, *n.*; *pl.* CRINOES. [Lat. *crinis*; It. *crine*, *crino*, hair.] (Med.) A cuticular disease, supposed to arise from the insinuation of a hair-worm under the skin of infants.

Crinoid, *Crinoid'ean*, *n.* (Zool.) One of the genus *Crinoidea*, *q. v.*

Crinoid'al, *a.* Possessing, or consisting of, Crinoids.

Crinoid'ea, or **Crinoideæ**, *n. pl.* [Fr. *crinoide*.]

(Pal.) The name given by Miller to an extensive order of fossil animals, belonging to the class *Echinodermata*, and so named from their lily-like appearance. The principal families are described under the head of ENCRINITE.

Crinoid'ean, *n.* One of the Crinoidea.

Crinoline, (*krin'o-lin*.) *n.* [Fr. from *crin*, horse-hair; Lat. *crinis*, hair, and *lin*, flax; Lat. *crinum*. (Manuf.) A texture, of which the warp is of flax, and the woof

Fig. 723. — COSTUME OF THE TIME OF ELIZABETH, (1573.)

of horse-hair; hence, a lady's stiff petticoat, made originally of hair-cloth, and used in order to distend female apparel. The term originated among the Parisian milliners, and at first was applied only to this particular kind of hair-cloth; but it is now extended to every kind of hoop by which women's dresses are expanded. The hoop, or crinoline, as now generally worn, is made of various materials, such as cane, whalebone, steel wire, &c. Some are made of very extensive size, reaching a circumference of even five yards. The hoop came into fashion about 1836, and it remained in vogue some years. The habit of wearing hoops is not new, as they formed an article of attire in the reign of Elizabeth: they were then called *fardingales* (fig. 723). They went out of fashion in James I.'s reign, but came in again in 1711, and remained in fashion till the reign of George IV.

Crinose, *a.* [From Lat. *crinis*.] Hairy.

Crinos'ity, *n.* State of hairiness.

Crinum, *n.* (Bot.) A genus of plants, order *Amaryllidaceæ*. It contains a considerable number of species, natives of different tropical and sub-tropical countries, generally with umbels of large and beautiful flowers, some of them among the most admired ornaments of our hot-houses. *C. amabile*, an Indian species, is much esteemed for its fragrance as well as its beauty, and flowers about four times a year. All the species require a rich, open soil, plenty of room for their roots, and the frequent removal of suckers. — The bulbs of *C. asiaticum* are powerfully emetic, and are used in some parts of the East in cases of poisoning.

Crinze, *n.* A beaker; an old-fashioned drinking-cup.

Crinoc'ris, *n.* (Zool.) See *EUPADA*.

Crip, *n.* [A. S. *creppere*, lame; O. Ger. *crupel*; Ger. *krüppel*; Swed. *krympling*. See *CRUEP*.] One who creeps, halts, or limps; a lame person; one who has lost, or never enjoyed, the use of his limbs.

a. Lame; halting in gait. (R.)

v. a. To lame; to deprive of the use of the limbs, particularly of the legs and feet.

"Chalk is in his *crippled* fingers found." — *Dryden*.

To disable; to deprive of the power of action or exertion; to incapacitate for utility; as, to *cripple* one's energies.

Crippling, *n.* A balk or timber set up to prop the wall of a building.

Cris'field, in *Maryland*, a town of Somerset co.

Cris'is, *n.*; *pl.* CRISES. [Gr. *krises*, from *krinō*, to separate, to decide, to judge; Sansk. *kri*, to separate.] A

critical period of time; time when anything is at its height, or maximum effect; acme; juncture; conjuncture; decisive moment; turning-point of anything.

"In the very *crisis* of the late rebellion." — *Addison*.

(Med.) A name applied to the decisive period or event of a disease — a sudden and considerable change of any kind, occurring in the course of its progress, and producing an influence upon its character. Among ancient physicians, it was applied to that tendency which fevers were supposed to possess, of undergoing a sudden change at particular periods of their progress. Hence, there were what were called *critical* days — certain days in the progress of an acute disease on which a sudden change, either favorable or unfavorable, would take place. The seventh, fourteenth, and twentieth or twenty-first days, were regarded as eminently critical. Little importance is now attached by medical men to critical days.

Crisp, *a.* [O. Ger. *crisp*; Lat. *crispus*; O. Fr. *crêpe*; It. *crêpa*; W. *crisbin*.] Formed into curls or ringlets.

"The Ethiopian black, flat-nosed, and *crisp*-haired." — *Hale*.

— Brittle; friable; easily broken or crumbled; as, a *crisp* pie-crust. — Indented; sinuous; winding; as, a "*crisp* channel." — *Shaks*.

— Having a certain quality of spirit and vigor; as, the *crisp* tone of a violin. — Effervescent; full of spirit and liveliness; — used in relation to liquors.

v. a. [Lat. *crispo*, from *crispus*; A. S. *crispian*.] To contract or form into ringlets or curls, as the hair.

"A man with *crisped* hair." — *Ben Jonson*.

— To make undulating or wavy; to give a twisted appearance to; as, "*crisped* brooks." — *Milton*.

v. n. To construct curly sinuosities on the border of anything; as, a "*crisping* ripple." — *Tennyson*.

Crispate, **Crispated**, *a.* [Lat. *crispatus*.] Presenting a crisped aspect.

Crispature, *n.* State of being curled.

Crisper, *n.* He or that which crimps or curls.

Crispin, a saint and martyr, was descended from a noble Roman family. About the middle of the 3d cent., under the reign of Diocletian, he, along with his brother Crispianus, fled from Rome into Gaul, where he worked as a shoemaker in the town which is now called *Saisons*, and distinguished himself by his exertions for the spread of Christianity, as well as by his works of charity. According to the legend, his benevolence was so great that he even stole leather to make shoes for the poor! From this, charities done at the expense of others have been called *Crispinads*. In the year 287, he and his brother suffered a cruel martyrdom. Both brothers are commemorated on the 25th October.

Crisping-iron, **Crisping-pin**, *n.* A curling-iron; an instrument for *crisping* cloth, &c.

"The mantles, and the wimples, and the *crisping*-pins." — *Isaiah* lii. 22.

Crisp'ite, *n.* (Min.) The same as *RTILE*, *q. v.*

Crisp'ly, *adv.* In a crisp manner; with crispness.

Crisp'ness, *n.* State of being crisped or curled; brittleness.

Crisp's Cross Roads, in *Indiana*, a post-office of Harrison co.

Crisp'y, *a.* Curled; formed into ringlets or undulations.

"Those *crispy* snaky locks." — *Shaks*.

— Brittle; friable; dried so as to break short.

Cris's-cross, *n.* A mark, thus, X, used by persons who are unable to write their own signature.

— A child's game.

adv. Oppositely; in a contrary manner.

— Contrarily; antagonistically; disagreeably; as, things are getting altogether *criss-cross*.

Criss-cross-row, *n.* See *CHRIST-CROSS-ROW*.

Cris'tate, **Cris'tated**, *a.* (Bot.) That has an elevated appendage resembling a crest.

Criterion, *n.*; *pl.* CRITERIA; sometimes wrongly written CRITERIONS. [Gr. *kritērion*, from *krinō*, to judge.]

A rule, mark, or standard by which a correct judgment or estimate can be formed; a measure; a test.

"We have here a sure infallible *criterion*." — *South*.

Crite'rial, *a.* Serving as a criterion; relating to a criterion.

Crith'mum, *n.* (Bot.) A genus of plants, order *Ajaceæ*. The species *C. maritimum* is the samphire, which is commonly used as an ingredient in mixed pickles. It is found growing on the sea-shore, and occasionally on old walls.

Crith'omancy, *n.* [Fr. *crithomancie*, from Gr. *krithi*, barley, and *manteia*, prophecy.] Divination by cakes, practised by the ancients.

Critias, one of the "Thirty Tyrants" of Athens. He was a pupil of Socrates, but his political conduct was such as to render him by no means a credit to his great master. He is said to have distinguished himself even among the Thirty for cruelty and avarice. When Thrasylus and his patriotic friends took up arms against the Thirty, Critias was slain in an attack made on the Piræus, in the year 404 B.C.

Critic, (*krit'ik*.) *n.* [Gr. *kritikos*, from *krinō*, to discern, to judge.] One skilled in judging of the merits of literary works; a judge of merit or excellence in the fine arts generally; a connoisseur; a judge; a careful observer; as, a competent *critic*.

"Believe a woman, or an epitaph,
Or any other thing that's false, before
You trust in *critics*." — *Byron*.

— A severe examiner or judge; a censorious reviewer; a carper; a caviller.

"And stand a *critic*, hated yet: caressed." — *Byron*.

— A critique; a criticism. See *CRITIQUE*.

Critic', **Critical**, *a.* [Lat. *criticus*; Gr. *kritikos*. See *CRITIC*.] Relating to, or containing, criticism; capable of

judging; able to discern, distinguish, and decide; as, a *critical* mind.

—Nicely exact; judiciously appreciative; discriminating.

"Virgil was *critical* in the rites of religion."—*Stillingfleet*.

—Inclined to find fault; captious; censorious; cavilling; fastidious.

"For I am nothing, if not *critical*."—*Shaks.*

—Relating or pertaining to criticism; partaking of the spirit of critical inquiry and observation; as, a *critical* notice of a work.

—Relating to a crisis; decisive; momentous; fraught with weighty consequences; as, a *critical* moment, *critical* circumstances, *critical* point of any business or sickness.

—Possessing just and true principles of criticism; as, a *critical* analysis.

Critical Philosophy. The metaphysical system of Kant is sometimes so termed, from his famous work, the *Kritik der Reinen Vernunft* (Critic of Pure Reason).

Crit'ically, *adv.* In a critical manner; exactly; accurately.

"Critically to discern good writers from bad."—*Dryden*.

—At a crisis; at the momentous point of time.

Crit'icalness, *n.* State or quality of being critical; exactness; nicety.

—Incidence to a particular period of time.

Crit'icisable, *a.* Susceptible of criticism.

Crit'icise, **Crit'icize**, *v. a.* To examine carefully with reference to beauties, and blemishes or faults in; to make remarks on the merits of a performance; to pass judgment on with respect to merit or blame.

"Nor shall I look upon it as any breach of charity, to *criticise* the author, so long as I keep clear of the person."—*Addison*.

—*v. n.* To judge with attention to beauties and faults; to make observations on the merits and demerits of a literary or dramatic performance, or a work of science or art; to play the critic; to animadvert; to utter censure.

"But, spite of all the *criticising* elves,
Those who would make us feel—must feel themselves."—*Churchill*.

Crit'iciser, **Crit'icizer**, *n.* A critic; one who criticises.

Crit'icism, *n.* The art of judging with propriety any object or combination of objects. In a less extended sense, the application of the principles of taste to matters connected with literature and the fine arts. The object which it proposes is, to distinguish what is beautiful and what is faulty in every performance, from particular instances to ascend to general principles, and so to form rules or conclusions concerning the several kinds of beauty in works of genius. It lays down those forms or ideas which answer to our conception of the beautiful, and points out, by reference to these, the excellencies or defects of individual works. The rules of *C.* are not formed by any induction *a priori*,—that is, they are not formed by a train of abstract reasoning independent of facts and observations. *C.* is an art founded wholly on experience, founded on the observation of such beauties as have been found to please mankind most generally. Such observations, taking their rise at first from feeling and experience, were found upon examination to be so consonant to reason and the principles of human nature, as to pass into established rules, and to be applied for judging of the excellence of any performance. In a still more limited sense, *C.* is applied to a particular branch of literature, being then synonymous with *CRITIQUE*, *q. v.*

Crit'ique, (*krit-èk'*), *n.* [Fr.] A critical review or essay; an analytical examination of the merits or demerits of a published work of literature, science, or art; a remark or animadversion passed upon beauties and faults; a criticism.

Crit'tenden, JOHN JORDON, an American statesman, born in Woodford co., Ky., in 1786. He commenced life as a lawyer at Hopkinsville, became U. S. Senator in 1817, and attorney-general under Pres. W. H. Harrison. He tendered his resignation to President Tyler; and, in 1848, he received the Whig nomination for governor of Kentucky, to which office he was elected by a large majority. He was attorney-general in President Fillmore's cabinet, from July, 1850, till the accession of President Pierce, and was after re-elected to the U. S. Senate. D. 1863.

Crit'tenden, in Arkansas, an E. co., bordering on the Mississippi river, which separates it from Tennessee. Area, about 994 sq. m. It is bounded on the W. by the St. Francis river. The surface is a low alluvial plain, often inundated by the Mississippi, and the soil very fertile. Cap. Marion. Pop. (1890) 13,940.

Crittenden, in Illinois, a post-office of Franklin co.

Crittenden, in Indiana, a post-office of Cass co.

—A village of Hendricks co., about 26 m. S. of Indianapolis.

Crittenden, in Kentucky, a W. co., bordering on the Ohio river, which separates it from Illinois. Area, abt. 420 sq. m.—*Rivers.* Cumberland river and Tradewater creek. —*Min.* Coal, lead, and iron. Cap. Marion. Pop. (1890) 13,119.

—A township and village of Grant co., about 27 m. S. of Covington.

Crittenden, in Missouri, a village of Daviess co., about 60 m. E.N.E. of St. Joseph.

Crittenden, in New York, a post-office of Erie co.

Crittenden Springs, in Kentucky, a former post-office of Crittenden co.

Crix'a, or CRICHA, in Brazil, a city of the province of Goyaz. Pop. about 5,000.

Crix'a, or CRICHA RIVER, in Brazil, rises in the mountains N. of the town of Goyaz, and flowing N.W., enters the Araguay. Length, 200 m.

Criz'zel, **Criz'zeling**, **Criz'zle**, *n.* [Probably from *grizzle*, *q. v.*] A semi-transparent coating sometimes found on the surface of glass.

Cro'a, the name of 5 small islands in the mouth of the Amazon River.

Croak, (*krök*), *v. n.* [O. Fr. *croûquer*, to croak as a raven; Ger. *krüchen*; Lat. *crocio*; Gr. *krōzō*, formed from the sound.] To make a low hoarse noise in the throat; to caw.

—To forebode evil without adequate cause; to grumble; to murmur; as, a *croaking* parson.

—*v. a.* To speak or utter in a low, hollow, hoarse tone of voice; as, a *croaking* bull-frog.

—*n.* The low, harsh, hollow sound of voice of a frog, or crow, or any like sound; a caw.

"The frogs renew the *croaks* of their loquacious race."—*Dryden*.

Croak'er, *n.* An habitual grumbler; one who is incessantly complaining, foreboding, or finding fault.

Croat, (*Geog.*) A native or inhabitant of Croatia.

Croatia, (*krō'she-ah*), a prov. of the Austro-Hungarian empire, forming with Slavonia a crown-land of the Hungarian kingdom, bounded N.W. by Carniola and Styria, N. by Hungary, S. by Servia, Bosnia, and Dalmatia, and W. by Dalmatia and the Adriatic. Total area 16,773 sq. m.; total pop. (1890) 2,200,977. Croatia, which is the western part of the crown-land, is intersected by the Julian Alps, and is barren in the S., but in the N. three

Fig. 724. — CROAT.

are tracts of the greatest fertility. Cattle-raising is the principal occupation of the inhabitants, which are of a Slavonian stock. *Rivers.* The Save and the Drave. *Principal cities.* Agram, the cap. both of the crown-land and of the prov., Karlstadt, and Old Szigsek. The town of Fiume, formerly belonging to Croatia, is now an integral part of the Empire of Austria-Hungary. See also SLAVONIA.

Croceons, (*krō'shus*), *a.* [Lat.] Resembling, or containing, saffron.

Cro'ches, *n. pl.* [From Gael. *croic*, a stag's horn.] Small knobby protuberances on the horns of deer.

Crochet, (*krō-shā'*), *n.* [Fr., dim. of *croc*, a hook; Ital. *croch*, a hook; Dan. *krog*; Armor. *krök* or *krog*. Literally, a small hook.] A species of knitting, performed by means of a small hook, called a *crochet-needle*; the materials operated upon being fancy worsted, Berlin-wool, cotton, or silk.

—*v. a.* To practise *crochet-work*; as, to *crochet* a baby's hood.

Crocid'olite, *n.* [Gr. *crokis*, or *crokys*, a woof, and *lithos*, a stone.] (*Min.*) A hydrated silicate of protoxide of iron, soda, and magnesia.

Crock, *n.* [A. S. *crocca*; Fris. *crocha*; Ger. *krug*; Swed. *krog*; Swed. and Goth. *krök*; Dan. *kroc*; akin to Gr. *krōssos*, a water-pail, a pitcher.] A pitcher with a narrow neck; an earthenware vessel; as, a *crock* of butter.

—*v. a.* To pack or deposit in a *crock*; as, to *crock* butter.

Crock, *v. a.* To stain or besmear with soot.

—*v. i.* To throw off soot, or other scoriaceous remains.

Crock'ery, *n.* [From *crock*.] Earthenware; fine pottery; fictile vessels for domestic use, baked, glazed and figured.

Crock'ery Creek, in Michigan, a village and township of Ottawa co., on Grand River; pop. abt. 900.

Crock'et, *n.* [Fr. *crochet*.] (*Arch.*) Ornaments of foliage or animals running up the back of a pediment, arch-pinnacle, or spire, from the corbels below to the finial above, in which latter the *C.* on both sides appear to merge. — Projecting leaves, flowers, or bunches of foliage used in Gothic architecture to decorate the angles of spires, canopies, pinnacles, &c.

Crock'ett, in Texas, a post-village, cap. of Houston co., abt. 190 m. N.E. of Austin City.

Crock'etted, *a.* Ornamented with crockets; as, a *crocketted* church-spire.

Fig. 725.

CROCKET.

Crock'ett's Bluff, in Arkansas, a village of Arkansas co.

Crock'ettsville, in Alabama, a village of Russell co. abt. 65 m. E. by N. of Montgomery.

Crock'y, *a.* [See *CROCK*.] Sooty; smutty.

Croc'odile, *n.* [Gr. *crokodeilos*—*crokos*, saffron, an *deilos*, fearful.] (*Zoöl.*) An animal of the family *CROCODILIDÆ*, *q. v.*

Crocodil'ian, *a.* Relating or pertaining to a crocodile.

—*n.* (*Zoöl.*) A crocodile; one of the *crocodilo* family.

Crocodil'idæ, *n. pl.* (*Zoöl.*) The Crocodile family order *Sauria*, comprises the Crocodile of the Nile, the Gaviol of the Ganges, and the Alligators of America. The crocodile is the largest of the lizard tribe. The formidable animal usually measures from 18 to 30 feet the tail alone being from 5 to 7 feet in length; the body is rough and covered with thick scales, so hard as to be impenetrable to pistol or musket-shot; the head large, and the stretch or gap of jaw greater than that of any other animal, both jaws being furnished with row of sharp-pointed teeth. The crocodile has four feet, which are webbed, the anterior ones having 5 toes while the hind feet have only 3, the internal one alone on each foot being guarded with a nail. The crocodile is only vulnerable through his eyes, which are remarkably small, and his belly, which is undefended by scale. This reptile is gregarious, and on hot days great numbers bask together on the sandy banks of their native rivers. The female lays some hundreds of eggs, which she deposits loosely in the ground to be hatched by the heat of the sun; they are of the size and appearance of the eggs of a goose, and fortunately fall a prey to many birds and animals who hunt for them; the natives all indulging extensively in the luxury of crocodiles' eggs which they regard as a great delicacy. The Alligator (see fig. 87) has the muzzle broad, obtuse, and great resembling that of the pike. The teeth are unequal, the fourth lower ones largest, and entering into holes the upper jaw, and the toes semi-palmate. It is voracious, devouring all kinds of animal substance, and is particularly attracted by fish, dogs, ducks, other animals in motion. It is found from the Carolina to Paragany.

—*n.* (*Logic*.) A sophistical argument.

—*a.* Pertaining to, or like, a crocodile. — Consisting of crocodiles.

Crocodile tears. Tears of affected sorrow; hypocritical weeping;—derived from the ancient fable that crocodiles shed tears over their victims.

Crocodility, *n.* [Gr. *crokodeilos*, a fallacy of sophists.] A sophistical method of reasoning.

Cro'coite, **Cro'coisite**, *n.* (*Min.*) A chromate lead. Its lustre is vitreous; color, various shades of bright hyacinth-red; streak orange-yellow. *Comp.* Oxide lead 68.9, chromic acid 31.1 = 100. It was first observed in Siberia, in crystals in quartz veins.

Crocon'ic, *a.* [From Gr. *crokos*, saffron.] Of the color of saffron; yellowish.

Crocon'ic Acid, *n.* (*Chem.*) A yellow substance, resulting from the action of potassium on carbonic oxide. It is not easily soluble, and has a sour astringent taste.

Cro'cus, *n.* [Gr. *crokos*; Lat. *crocus*; Gael. *croch*; Il. *karkôm*; Chald. *karkem*, to be dyed a saffron color; Sansk. *kankom*; Armen. *khekhrym*.] (*Bot.*) A genus plants, order *Iridaceæ*, yielding some of our most beautiful spring-flowers. *C. sativa* (fig. 726) is the Saffron crocus, the *karkom* of the Bible. The dried stigmas of this plant, with the top of the style, constitute *the saffron*, or, when pressed together, *Cake-saffron*. The

Fig. 726. — CROCUS SATIVA.

latter is seldom met with in the shops, the product for it being simply the pressed flowers of the saffron (See *CARTHAMUS*). Saffron is much used as a flavoring agent, chiefly in the S. of Europe. In this country it is principally employed as a coloring agent in pharmacy, and medicinally in certain nervous affections.

(*Chem.*) A name sometimes applied to any minute powder of a deep yellow or a red color.

Cro'sus, the fifth and last king of Lydia. He succeeded his father Alyattes, 560 B. C. He was so successful in his enterprises that he soon became one of the rich monarchs of that time. The legend says, that, vain of his wealth, he asked the philosopher Solon what thought of his good fortune: "I pronounce no man fortunate until his death," was the sage's reply. Subsequently *C.* was made prisoner by Cyrus, king of Persia. When bound to the stake and about to be burnt,

Crooked Creek, in Iowa, a tributary of Skunk river, which it enters in Henry co.

Crooked Creek, in Minnesota, a township of Houston co.

Crooked Creek, in Missouri, traverses Monroe co., and flows into the N. Fork of Salt river.

Crooked Creek, in Missouri, a village of Shelby co.

Crooked Creek, in N. C., a former P. O. of Stokes co.

Crooked Creek, in Ohio, traverses Paulding co., and enters the Anglaise river.

Crooked Creek, in Pennsylvania, rises in the W. central part of the State, and joins the Alleghany river in Armstrong co.

Crooked Creek, in Pennsylvania, a post-village of Tioga co.

Crooked Creek, in N. Carolina, traverses Marlborough co., and empties into the great Pedee river.

Crook'ed Fork, in Tennessee, a P. O. of Morgan co.

Crook'ed Hill, in Pennsylvania, a former post-office of Montgomery co.

Crook'ed Islands, of the Bahamas, consisting of Crooked Island, Castle Island, Fortune Island, and Akliu's Island; Lat. 22° 30' W., Lon. 74° W.

Crook'ed Lake, in New York, within the limits of Steuben and Yates cos. It is about 18 m. in length by abt. 1½ in breadth. Its surface is stated to be abt. 487 ft. above Lake Ontario, or 718 ft. above sea-level.

Crook'edly, *adv.* In a crooked or perverted manner. "If we walk perversely with God, he will walk crookedly towards us." — *Jeremy Taylor*.

Crook'edness, *n.* State of being crooked; a winding, bending, or turning; curvity; inflection; as, the crook'edness of a pathway.

"The absence of straightness, in bodies capable thereof, is crook'edness." — *Hooker*.

—Perverseness; obliquity of conduct; depravity; as, crook'edness of temper.

—Bodily deformity or curvatur; as, the crook'edness of bowed legs.

Crook'ed River, in Maine, rises in Oxford co., and enters the Sebago Pond, in Cumberland co.

Crook'ed River, in Missouri, traverses Ray co., and joins the Missouri River, a few miles below Lexington.

Crook'ed Tree, in Ohio, a post-office of Noble co.

Crooks'ville, or BANCROFT'S MILLS, in Pennsylvania, a manufacturing village of Delaware co., on Ridley Creek.

Croom, a town and parish in Munster, co. of Limerick, Ireland, about 5 m. S.S.E. of Adare.

Croom, in Maryland, a post-office of Prince George co.

Croon, *v. a.* To sing in a murmuring tone, as if to one's self.

"Crooning o'er some auld Scots sonnet." — *Burns*.

—To hush to sleep by singing in a low tone of voice; as, crooning an infant to sleep.

—*v. i.* In Scotland, to moan, or utter low sounds, as of bodily pain. —To hum softly; to sing in a soft, murmuring manner.

—*n.* A low, suppressed, repeated moan.

—A simple song; a rustic air.

Crop, *n.* [A. S. *crof*, a bunch, berry, an ear of corn, the claw of a bird; O. Ger. *kroph*, a pigeon's neck; D. *krop*; Ger. *kropf*, the maw of a bird; W. *crof*, that which is shrunk into a round heap, a bunch; probably akin to Lat. *carpo*, *carpere*, to pluck, to gather.] A knob; a knot; a bunch; the top of anything; as, the crop of a hunting-whip, the crop of a bush.

—That which is cut off, plucked off, or gathered.

—A gathering into a heap; a cluster; as, a crop of difficulties.

—The claw of a bird, into which the food is collected.

"By their high crops and corny gizzards known." — *Dryden*.

—The corn or fruits of the earth while growing, or when collected; harvest; as, a fair crop, green crops, &c.

"Lab'ring the soil, and reaping plenteous crop." — *Milton*.

—Hair cut close or short; as, a prisoner's crop. (*Metat.*) Ore or tin of first quality, after it is dressed or cleaned for smelting.

(*Mining.*) *C.* or *OUT-CROP* is the edge of a stratum where it rises to the surface, or, as the miners say, comes out to the day. This line of out-crop of a bed along a level surface is called its *strike*; it is described by its relation to one or other of the points of the compass.

—*v. a.* To cut off the top or the ends of anything; to cut off; to pull off; to pluck; to mow; to reap; to cut off prematurely; to gather before it falls; as, to crop grass, as a horse, to crop the hair, to crop a thistle, to crop a dog's ear, &c.

"Death destroys

The parents' hopes, and crops the growing boys." — *Creche*.

—To cultivate and take crops from; as, to crop a harvest.

—To cultivate by a rotatory system of sowing; as, to crop a piece of land. —To crop out, to come to light, to appear to view; as, the mystery will crop out. —(*Geol.*) To rise above the surface of the ground, as a stratum of coal, or a series of strata.

Crop'ear, *n.* A person or animal having the ears cropped.

Crop'eared, *a.* Having the ears cropped or cut short; as, a crop'eared dog.

Crop'ful, *a.* Having a filled crop or stomach; filled to repletion; satiated; surfeited.

Crop'-lifting, *n.* Theft of a standing crop of grain, &c.

Crop'per, *n.* A kind of pigeon having a large crop.

"Of tame pigeons, there be croppers, carriers, runts." — *Walton*.

(*Law.*) One who, having no interest in the land, works it in consideration of receiving a portion of the crop for his labor.

Crop'per, in Kentucky, a post-office of Shelby co.; formerly called CROPPER'S DEPOT.

Crop'sey, JASPER FRANK, an American landscape-painter, b. at Westfield, Richmond co., N. Y., 1823. In 1847 his health compelled him to visit Europe. He came back in 1850; and in 1856 he embarked for England, where he has since resided. His principal works in America are: *Sibyl's Temple*, *American Harvesting*, *Peace*, *War*, and *Niagara Falls*.

Crop'seyville, in New York, a post-office of Rensselaer co.

Crop'-sick, *n.* Sick with excess in eating and drinking.

Crop'-sickness, *n.* Sickness arising from a surfeit of food or drink.

Crop'well, in Ala., a twp. of St. Clair co.

Croquant, (*kro'kánt*) *n.* [Fr., from *croquer*, to crackle between the teeth.] A kind of hard paste or cake.

Croquet, (*kro-ká*) *n.* (*Games.*) A game played with balls and mallets. Its object is to propel a ball through a number of hoops fastened to the ground, to a fixed goal, and thence back to the starting-point. The laws of the game have been explained in treatises by M. Jacques and Captain Mayne Reid.

Crone, *n.* [Hind.] In India, a sum of ten millions; as, a crone of rupees.

Cros'by, in Ohio, a thriving township of Hamilton co.

Cros'byville, in S. Carolina, a post-village of Fairfield co., about 50 m. N. of Columbia.

Crosette, *n.* (*Arch.*) A truss, or couple, in the flank of an architrave of a door, window, or other aperture in a wall.

Crosier, (sometimes written CROZIER.) (*kro'zhi-ér*) *n.* [L. Lat. *crocia*; Fr. *croise*; from *croix*, Lat. *crux*, a cross.] (*Ecl.*) A bishop's crook or pastoral staff, a symbol of pastoral authority and care, consisting of a gold and silver staff, crooked at the top, and which is either carried before the bishops and abbots, or is held in the hand when giving benediction. The use of *C.* is very ancient. The Byzantine *C.* had at the top either a cross or a knob, with curved serpents on both sides. Strictly speaking, the *C.* is a staff surmounted by a cross, although it is generally confounded with the pastoral staff, which is made in the form of a crook.

(*Astron.*) A small constellation in the S. hemisphere, composed of four stars in the form of a cross. It is situated near the Antarctic circle, and therefore never visible to our latitude.

Crosiered, (*kro'zhi-ér-d*) *a.* Bearing a crosier; as, a crosiered prelate.

Cros'let, *n.* Same as CROSBLET, *q. v.*

Cross, *n.* [It. *croce*; Fr. *croix*; Lat. *crux*. Etymol. unknown.] A gibbet, consisting of two pieces of timber placed across each other in a variety of forms, of which those shown in fig. 730 are the most usual examples. The cross was used

Fig. 729.

PASTORAL STAFF.

Fig. 730.

as a very general instrument of punishment from the earliest times. Among the Syrians, Jews, Egyptians, Persians, and especially the Carthaginians, it appears to have been the usual military punishment. (*Val. Max.* ii. 7; *Herod.* iii. 125-159.) But in no part of the ancient world was this punishment so generally resorted to as in the Roman empire, where it was regarded as the most infamous of deaths, and, except in cases of sedition, was inflicted only on slaves or the vilest malefactors. By the Roman law, the culprit was scourged previously to the crucifixion, either in the praetorium or on the way to the place of execution. On his arrival there he was stripped of his garments, and then either nailed by the hands and feet to the cross, or, as sometimes happened, only fastened to it by ropes. In order to hasten death, it was the practice to break the legs or to pierce the body of the sufferer with a spear or other sharp instrument; but this was not always done; and instances have occurred of persons who, after being suspended for some considerable time on the cross, were taken down and survived. By the Jewish law, it was ordained, that the body of the culprit should be removed from the cross on the day of his execution; but the Romans frequently allowed it to hang till it dropped piecemeal to the ground. In general, the cross was erected near some great road or highway, in order to indicate more distinctly the ignominy of the culprit and the severity of his death. — By the death of Christ, the cross, from being an object of horror, became the symbol of the Christian world, and, from respect for this symbol, Constantine abolished the punishment of crucifixion

throughout the Roman world. The cross is still regarded with the utmost veneration by the Roman Catholic Church, in which certain festivals are observed in memory of circumstances connected with the cross; as the *Invention* or *Discovery* and *The Exaltation of the Cross*: the former commemorating the so believed discovery of the true cross by the Empress Helena, and the latter its restoration to Calvary by Heraclius. — The cross on which our Lord suffered is commonly considered to have been the *crux capitata* or LATIN CROSS (fig. 731); but the cross with equal limbs (+) or GREEK CROSS has been the model followed in the architecture of Eastern churches. The large cross over the entrance to the chancel of a church was called the *Rood* or *Holy Rood*; it is often elaborately ornamented. Monumental crosses were and are still often raised in Catholic countries, to mark a boundary, the entrance of a sanctuary, or to record of some event. We give (fig. 731) a beautiful

Fig. 731. — CROSS OF THE 10TH CENTURY, AT MONASTEROBOICE, IRELAND.

specimen of stone cross, of the 10th century. It is smaller of two crosses at Monasterboice, near Drogheda 35 m. from Dublin. It is now almost as perfect as was when, ten centuries ago, the artist pronounced work finished.

—The doctrine of Christ's sufferings, and of the atonement, or of salvation by Christ; as, to preach the Cross; a line drawn through another.

—Anything that thwarts, obstructs, or perplexes; hindrance; vexation; misfortune; opposition; trial of patience; as, life is full of crosses.

"To fret thy soul with crosses and with cares." — *Spenser*.

—A mixing of breeds in the production of animals; as, cross between a bull-dog and a terrier.

—The mark of a cross used as a signature by those who are unable to write; as, John Smith + his mark.

—In Ireland, church lands; as, a sheriff of the cross.

"In each of these counties-palatine, there was one sheriff of liberty, and another of the cross." — *Davies*.

(*Her.*) An ordinary formed by lines drawn pale and fesswise, enclosing (if bounded by the escutcheon one-fifth of the shield, or one-third if charged. A gules is termed the *cross of St. George*. A plain *C.* is of which the extremities do not reach to the circumference of the escutcheon, but are *couped*, or cut off in a straight line. There are many other kinds of *C.*, reaching the circumference of the escutcheon, known as heraldry; the following are only a few, most commonly used in bearings: A *cross crosslet* is one crossed on each arm. Such a *C.* between four plain crosses is termed *Jerusalem cross*. A *cross flory* has three points at each end. A *Maltese cross* has arms increasing in breadth toward the end, with double points. The *Cross of Andrew* is as the middle one in fig. 730. A *cross fitchy* has the lower limb pointed, as if to fix in ground. A *patriarchal cross*, the insignia of patriarchs or archbishops, is plain, having two bars, the upper smaller than the lower. A *cross moline* terminates in representations of the ends of the *fer-de-moulin*, or mill-rind. It is the difference of the eighth son of a family.

(*Surveying.*) An instrument formerly used in surveying, for laying out perpendicular lines, but now seldom employed.

To take up one's cross. To submit with patience resignation to worldly afflictions.

Cross and pile. (*Games.*) A play with money, at which it is put to chance whether one side bearing a cross when tossed up, shall fall face upward, or the reverse side, called *pile*.

"Cross I win, and pile, you lose; or, what's yours is mine, what's mine is my own." — *Swift*.

—*a.* Transverse; oblique; passing from side to side; lying athwart.

"And cross their limits cut a sloping way." — *Dryden*.

—Adverse; opposite; obstructing; perverse; untractable.

crossing: vexatious; froward; contrary; contradictory; perplexing; as, a *cross* fate, a *cross* experience.
cross: peevish; fretful; ill-tempered; as, a *cross* child.
cross: mutually inverse; interchanged; in an opposite ratio; as, a *cross* question, a *cross* breed.
cross: *v. a.* To draw or run a line or lay a body across another; to place across, or athwart; as, to *cross* swords, to *cross* a bank-check.

"To *cross* the cudgels to the laws." — *Hudibras*.
 —To mark with a cross or crosses.
 —To erase; to cancel; to expunge; — preceding *out*, *off*, *over*; as, an item is *crossed out* of the schedule.
 —To make the sign of the cross; as, she *crossed* herself fervently.

"Friars . . . exorcise the beds, and *cross* the walls" — *Dryden*.
 —To pass from side to side; to pass or move over; as, to *cross* the street.

We sought the dark abodes, and *cross'd* the bitter lake." — *Dryden*.
 —To thwart; to obstruct; to impede; to retard; to perplex; to embarrass; to counteract.

"An oyster may be *crossed* in love." — *Sheridan*.
 —To clash or interfere with; to be inconsistent with; to stop; to hinder.

"Their wills clash with their understandings, and their appetites *cross* their duty." — *Locke*.
 —To infuse new or mixed blood; as, to *cross* the breed of horses or dogs.

—To debar; to preclude; to cut off.
 "From his loins no hopeful branch shall spring,
 To *cross* me from the golden time I look for." — *Shaks*.

v. n. To lie or be athwart of.
 —To move or pass from one side toward the other, or from place to place; — often followed by *over*; as, to *cross over* a gutter.

—To mix breeds or races; to intermix blood.
cross, in *Iowa*, a former post-office of Ringgold co.
cross, in *Wisconsin*, a flourishing township of Buffalo county.

cross-action, *n.* An action by a defendant in an action against the plaintiff in the same action, upon the same contract, or for the same tort.

cross anchor, in *S. Carolina*, a township of Spartanburg co.

cross anchor, in *Tennessee*, a post-office of Greene co.

cross-anville, in *Ohio*, a post-village of Perry co.

cross-armed, *a.* With arms across.

(*Bot.*) That has opposite branches nearly perpendicular to the stem.

cross-arrow, *n.* (*Mil.*) The arrow, or shaft, of a cross-bow.

cross-bar, *n.* A transverse bar.

(*Naut.*) Round bars of iron, bent at each end, used as levers to turn the shank of an anchor.

cross-barred, (*kros'bard*) *a.* Fastened by transverse bars.

cross-bar shot, *n.* (*Naut.*) A round shot with an iron bar passing through it, and pitting out on either side; employed for damaging the spars and rigging of an enemy's ship during a naval engagement.

cross Bayou, in *Louisiana*, traverses Catahoula Bayou, and connects with Saline Bayou.

cross-beam, *n.* (*Arch.*) A beam laid across another.

(*Naut.*) A great piece of timber so called, crossing to others, called bitts, and to which the cable is fastened when a ship rides at anchor.

cross-bearer, *n.* (*Eccl.*) In the Roman Catholic church, a chaplain or other ecclesiastical person, instructed with bearing the cross in solemn processions.

cross-bill, *n.* (*Zoöl.*) See CURVIBROSTRA.

cross-bill, *n.* (*Law.*) A bill brought by a defendant in a suit against a plaintiff in or against other defendants in the same suit, or against both, touching the matter in question in the original bill.

cross-birth, *n.* (*Midwifery.*) Labor impeded by the presentation of the fetus in an unnatural position.

cross-bite, *n.* A hoax; a deception; a cheat; a counter-trick.

"The fox . . . without dreaming of a *cross-bite* . . . fell himself to the pit that he had digged for another." — *L'Estrange*.

a. To contravene by deception; to counter-cheat.

"As nature slyly had thought fit,
 For some by-ends, to *cross-bite* wit." — *Prior*.

cross-bow, *n.* (*Mil.*) See ARBALEST.

cross-bow'er, **cross-bow'man**, *n.* One who uses a cross-bow for shooting.

"The French assisted . . . with the *cross-bow'ers* of Genoa, against the English." — *Raleigh*.

cross-breed, *n.* A breed produced from the male of one species and the female of another.

cross-bun, *n.* A bun marked with a cross; — usually ten on Good Friday in commemoration of the Crucifixion.

cross-chocks, *n. pl.* (*Naut.*) Pieces of timber fixed across the dead-wood amidships, to make good the deficiency of the heels of the lower futtocks.

cross Creek, in *Kansas*, a former P. O. of Jackson co.

cross Creek, in *Ohio*, enters the Ohio river about 3 miles below Stenbenville.

— post-township of Jefferson co.

cross Creek, in *Pennsylvania*, a post-township of Washington co.

cross Cut, in *Pennsylvania*, a former P. O. of Lawrence county.

cross-cut, *v. a.* To cut across; as, to *cross-cut* a scantling.

cross-cut, *n.* A short cut across. — A shorter path or stage than by the high road; as, a *cross-cut* over a ridge.

cross-cut-saw, *n.* (*Carp.*) A large saw, managed by two persons, for sawing crosswise large logs or timber.

Cross'-days, *n. pl.* (*Eccl.*) The three days preceding the Feast of Ascension.

Cross'-sen, a town of Prussia, 68 m. from Berlin. *Manf.*

Woollen cloths, hosiery, &c. *Pop.* 7,246.

Crossette, *n.* [*Fr.* from *croiz.*] (*Arch.*) A truss or console on the flank or return of an architrave of a door, window, &c.

Cross-examination, *n.* (*Law.*) The examination or interrogation of a witness called by one party, by the opposite party or his counsel.

Cross-examine, *v. a.* (*Law.*) To test evidence by examining a witness by the opposite party or his counsel.

Cross-eyed, *a.* Having eyes which cross or intersect each other's range of vision. — Oblique-eyed.

Cross-fire, *n.* (*Mil.*) A firing from two or more parts of a military work, so that the lines of fire cross each other.

Cross-flow, *v. i.* To flow across, or in an opposite direction.

Cross Fork, in *Pennsylvania*, a P. O. of Clinton co.

Cross-furrow, *n.* (*Agric.*) A furrow or open trench cut across other furrows to intercept the water which runs along them, in order to convey it to the margin of the field, where it may find its way to an open ditch or some other general drain.

Cross-gar'net, *n.* A kind of cross hinge.

Cross-grained, *a.* Having the fibres across, transverse, or irregular; as, *cross-grained* timber.

— Perverse; intractable; not condescending; as, a *cross-grained* old maid.

"The spirit of contradiction, in a *cross-grained* woman, is incurable." — *L'Estrange*.

Cross-head, *n.* (*Mech.*) In the steam-engine, a cross bar fixed centrally on the top of a piston-rod, and connected to the beam; its motion is confined to a direct line by guides at each end; or, in the side lever and beam engines, by an apparatus called a *parallel motion*.

— *Cross-Head Guides*. The parallel bars between which the cross-head moves in a right line with the cylinder and driving-wheel axle; they are also called *motion bars*.

— *Cross-Head Blocks*. The parts which slide between the parallel guides. The ends of the cross-head are fitted into these blocks. The cross-head, cross-head block, and cross-head guides constitute what is called the *motion of the engine*.

Cross Hill, in *Maine*, a P. O. of Kennebec co.

Cross Hill, in *S. Carolina*, a township of Laurens district.

Cross'ing, in *Indiana*, a former P. O. of La Porte co.

Cross'ingville, in *Pennsylvania*, a post-village of Crawford co., about 240 m. W. N. W. of Harrisburg.

Cross-jack (*kroj'ak*), *n.* (*Naut.*) The lower yard of a ship's mizzen-mast.

Cross Keys, in *Georgia*, a district of De Kalb co.

Cross Keys, in *New Jersey*, a post-village of Gloucester county.

Cross Keys, in *S. Carolina*, a P. O. of Union district.

Cross Keys, in *Virginia*, a post-office of Rockingham co., near Harrisonburg. Near here, on June 7, 1862, a smart encounter took place between a National force under the command of Gen. Fremont, and a body of 5,000 Confederate troops under Gen. Ewell, with no decisive advantage to either side. The Union loss was 664; that of the Confederates is unknown.

Cross Kill Mills, in *Pennsylvania*, a post-office of Berks co.

Cross (or LA CROSSE) Lake, in British N. America. It is about 20 m. long from N. to S. It receives the Beaver, and is the source of the Mississippi River.

Cross Lake, in *Louisiana*, in Caddo parish, W. of Shreveport. Length 15 m.; breadth about 2½ m.

Crossland, in *Kentucky*, a post-office of Callaway co.

Cross-legged, *a.* Having the legs across one another.

Cross'let, **Cros'let**, *n.* [*Dim.* of *Cross*, *q. v.*] (*Hor.*) A small cross.

Cross'ly, *adv.* Athwart, so as to intersect something else; adversely; in opposition; unfortunately; peevishly; fretfully.

Cross'ness, *n.* State or quality of being cross: intersection; peevishness; fretfulness; ill-humor; perverseness.

Cross'on's Store, in *Arkansas*, a P. O. of Randolph co.

Cross'-patch, *n.* A vulgarism for a cross, peevish, ill-tempered person.

Cross'-pawls, *n. pl.* (*Ship-building.*) Pieces of timber that keep a vessel together while in her frames.

Cross'-piece, *n.* (*Naut.*) A piece of timber connecting two bitts.

— A rail near the knightheads, to which the running rigging is belayed.

— A part of anything which is worked or fitted crosswise.

Cross Plains, in *Alabama*, a village of Calhoun co., abt. 13 m. N. of Jacksonville.

Cross Plains, in *Alabama*, a P. O. of Calhoun co.

Cross Plains, in *Georgia*. See DALTON.

Cross Plains, in *Indiana*, a post-village of Ripley co., abt. 80 m. S. E. of Indianapolis.

Cross Plains, in *Missouri*, a village of Callaway co., abt. 40 m. N. N. E. of Jefferson City.

Cross Plains, in *Tennessee*, a township of Robertson co., abt. 35 m. N. N. E. of Nashville.

Cross Plains, in *Wisconsin*, a post-township of Dane co., abt. 16 m. W. of Madison.

Cross'-purpose, *n.* A contrary purpose.

"That sport was probably the diversion of the age, and of the same stamp with our modern *cross-purposes*." — *Whalley*.

— (*Pl.*) A conversational game; an enigma; a riddle.

— To be at *cross-purposes*. To think or act in innocent contradiction to another.

Cross-quar'ters, *n. pl.* (*Arch.*) A cruciform foliated ornament.

Cross-ques'tion, *v. a.* To cross-examine; to put counter-questions to; as, to *cross-question* a talebearer.

Cross'-reading, *n.* A cross or contrary reading.

Cross River, in *New York*, a P. O. of Westchester co.

Cross-road, *n.* A road which crosses a country, or which cuts athwart other roads; a by-road.

Cross Roads, in *Maryland*, a post-office of Charles co.

Cross Roads, in *Missouri*, a village of Osage co., abt. 15 m. S. S. E. of Jefferson City.

Cross Roads, in *New Jersey*, a village of Burlington co., about 8 m. S. W. of Mount Holly.

Cross Roads, in *Ohio*, a former P. O. of Madison co.

Cross Roads, in *Pennsylvania*, a P. O. of York co.

Cross Rock, in *N. Carolina*, a P. O. of Madison co.

Cross-row, *n.* The alphabet; — so named from having formerly a cross placed at the beginning, to show that the end of learning is piety. See CHRIST-CROSS-ROW.

"And from the *cross-row* plucks the letter G." — *Shaks*.

— A row transversely crossing another.

Cross'-sea, *n.* (*Naut.*) A swelling sea, whose waves break and chop in contrary directions.

Cross'-sill, *n.* A sill which connects a cross-tie.

Cross'-somer, *n.* A beam of timber.

Cross Sound, in *Alaska*. It separates King George III. Archipelago from the mainland on the N. W. Cross Cape is at its N. W. entrance.

Cross'-spales, *n.* (*Naut.*) Pieces of timber placed across a vessel, and nailed to the frames, to keep the sides together until the knees are bolted.

Cross'-springer, *n.* (*Arch.*) In groined vaulting, the rib which extends diagonally from one pier to another.

Cross'-staff, *n.* A kind of quadrant formerly used at sea, for taking the altitude of celestial bodies.

Cross'-stone, *n.* (*Min.*) Same as ANDALUCITE, *q. v.*

Cross'-tie, *n.* A railway sleeper laid crosswise to connect the rails.

Cross Timbers, in *Missouri*, a post-village of Hickory co.

Cross'-tining, *n.* (*Agric.*) A mode of harrowing crosswise.

Cross'-trees, *n.* (*Naut.*) Pieces of oak supported by the cheeks and trestle-trees at the mast-heads, to sustain the tops on the lower mast, and to spread the top-gallant rigging at the top mast-head.

Cross-vault'ing, *n.* (*Arch.*) Is formed by the intersection of two or more simple vaults of arch-work.

Cross'ville, in *Tennessee*, the capital of Cumberland co., about 111 m. E. S. E. of Nashville.

Cross-way, *n.* A way or road that crosses another road, or the chief road; an obscure path intersecting the main road.

Cross-wicks, in *New Jersey*, a post-village of Chesterfield township, Burlington co., abt. 8 m. S. E. of Trenton.

Cross-wicks Creek, in *New Jersey*, separates Mercer and Burlington cos., and enters the Delaware River at Bordentown.

Cross'-wind, *n.* A side-wind; an unfavorable wind; an adverse wind.

Cross'-wise, *adv.* Across; in the form of a cross.

Cross'-wort, *n.* (*Bot.*) A name of GALLIUM CRUCIATUM.

Crotalaria, *n.* [*Gr.* *krotalar*, a rattle.] (*Bot.*) A very extensive genus of tropical herbs or shrubs of the order *Fabaceae*, the most important of which is the *C. juncea*, the *Sun*, *Sunn*, or *Shunum* Hemp of India, a plant extensively cultivated for its fibre, which is considered equal, if not superior, to Russian hemp. The genus is represented in this country by *C. sagittalis*, the Rattle-box, a plant about a foot high, with a hairy aspect, and inflated pods, in woods and sandy fields, N. H. to Ark.

Stem herbaceous, rigid. Leaves alternate, entire, nearly sessile, rounded at the base. The plant is best distinguished by its opposite, veined, decurrent stipules, so situated that each pair appears inversely sagittate. Sepals long, hairy. Corolla small, yellow. Seeds few, rattling in the turgid pod. It blossoms in June.

Crotal'idæ, *n. pl.* (*Zoöl.*) See RATTLESNAKE.

Crotalum, *n.* [*Gr.* *krotalar*.] (*Antiq.*) An ancient kind of castanet, used by the Corybantes, or priests of Cybele. This instrument must not be confounded with the modern *crotalo*, a musical instrument used chiefly by the Turks, and corresponding exactly with the ancient cymbalum.

Crotch, (*kroch*) *n.* [*Fr.* *croc*, *crochet*.] A fork or forking; the parting of two legs or branches.

"Save step for a stile of the crotch and the bough." — *Tusser*.

(*Naut.*) See CRANE.

Crotched, (*krocht*) *a.* Forked; having a crotch; as a *crotched* stick. — A term for peevish, testy, ill-humored; — used in some parts of England; as, a *crotched* old bachelor.

Crotcher's Ferry, in *Maryland*, a former post-office of Dorchester co.

Crotchet, (*krochet*) *n.* [*Fr.* *crochet*, *dim.* of *croc*, a hook.] A small crotch or hook, or forked piece of wood.

"The *crotchets* of their cot in columns rise." — *Dryden*.

— A peculiar turn of the mind; an eccentric tendency; a whim or fancy; a perverse conceit.

"Faith, thou hast some *crotchets* in thy head now." — *Shaks*.

(*Mus.*) A note in music, equal in duration to the half of a minim, or the fourth of a semibreve; written thus:

or

— *pl.* (*Printing.*) Hooks or brackets inclosing words, thus [Portif.]

(*Portif.*) A break in the glaciis belonging to a covered way.

(*Mil.*) Formation of troops in an order parallel to the line of battle.

(Surg.) An obstetrical instrument, whose name indicates its shape, and which is used in the extraction of the fetus, when it becomes necessary to destroy it to expedite its delivery.

(Naut.) Crooked pieces of iron, used on board sloops and long-boats.

Crotcheted, *a.* Marked with crotchets; possessing musical notation.

Crotchety, *a.* Having crotchets in the brain; whimsical; capricious; as, a *crotchety* genius.

Croth'ersville, in Indiana, a P. O. of Jackson co.

Croton, *n.* [Gr. *kroton*, the dog-tick, in reference to the resemblance of the seeds to that vermin.] (*Bot.*) A genus of plants, order *Euphorbiaceæ*. The seeds of the species *C. tiglium*, and probably also those of *C. pavana*, constitute the *croton* or *tiglium* seeds, of the Materia Medica. They yield, by expression, an oil called *croton oil*, which, in minute doses of a single drop, is a powerful drastic cathartic, and, when applied externally, acts as a rubefacient and counter-irritant. The seeds are used without preparation, in India, as purgative pills. *C. eleuteria* and *casc. trilla*, natives of the Bahama Islands and Jamaica, yield the aromatic tonic bark commonly known as *cascarilla* or *eleutheria* bark. *C. pseudo-China* yields the *quilled copalche* bark of Pereira, and *C. suberosum* the *corky copalche* bark of the same author. In their medicinal properties the copalche barks resemble *cascarilla*. The aromatic bark known as *Malambo* bark is the produce of *C. malambo*. It is used as a remedy in diarrhoea and as a vermifuge; also externally, in the form of an alcoholic tincture, in rheumatism.

Croton, in Iowa, a post-village of Lee co., abt. 25 m. N. W. of Keokuk.

Croton, in Michigan, a post-village and township of Newaygo co.

Croton, in New Jersey, a post-village of Hunterdon co.

Croton, in New York, a former P. O. of Delaware co.

Croton, or **Croton Landing**, in New York, a post-village of Westchester co., abt. 35 m. N. of New York city.

Croton, in Ohio, a post-office of Licking co.

Croton, in Pennsylvania, a village of Lawrence co.

Croton. (*Ant. Geog.*) See CROTONA.

Croton-bug, *n.* [From *Croton*, N. Y.] (*Zoöl.*) An insect of the family *Coreidae*.

Croton Corners, in New York, a village of Chemung co.

Croton Falls, in New York, a post-village of Westchester co., abt. 51 m. N.N.E. of New York city.

Croton'ie, *a.* Having the qualities of, or pertaining to, the croton-plant.

Croton'ic Acid, *n.* (*Chem.*) An acid obtained from croton-oil. *Form.* $C_3H_5O_4$.

Croton'oil, *n.* (*Med.*) See CROTON.

Croton River, in New York, a stream which rises in Dutchess co., and flows through Putnam co. into Westchester co., where it joins the Hudson River abt. 35 m. above New York city, which it supplies with water through the *Croton Aqueduct*.

Crotophag'inæ, *n. pl.* [Gr. *kroto*, a noise made by striking, and *phago*, to eat.] (*Zoöl.*) A sub-fam. of birds, of the fam. *Cuculidæ*. Its two chief American representatives are the ani or keel-bill, *Crotophaga ani* (fig. 130); and the Black Parrot, *Crotophaga rugirostris*, which is found from Florida to Brazil. See ANI.

Crotoy, (*Le.*) (*kro'toi*), a town of France, 10 m. from Abbeville, in the fortress of which Joan of Arc was confined by the English.

Crouch, *v. n.* [Ger. *kriechen*, to creep, to crouch. See CREEP and CRINGE.] To stoop low; to bend down in a squatting position; to lie close to the ground; as, a *crouching* tiger.—To bend servilely; to stoop meanly; to fawn.

"They crouch beneath their fatal foe."—Dryden.

Croud, *n.* Old spelling of CROWD, *q. v.*

Croup, (*kroöp*), *n.* [Fr.: Goth. *kropjan*, to cry out; Sansk. *hrap*, to speak.] (*Med.*) An acute inflammation of the mucous membrane of the larynx, but frequently extending also to the trachea and bronchial tubes. This disease is not mentioned by medical writers before the middle of last century, and it is the opinion of many that it did not exist prior to that time. Both from the importance of its situation, and the rapidity with which it runs its course, *C.* is one of the most dreaded and fatal affections in the range of juvenile diseases. The causes which lead to *C.*, or *cynanche trachealis*, though sometimes depending on a low damp situation, are far more frequently induced by constitutional than by local accidents, and are to be looked for rather in certain characters in the child, such as a leucophlegmatic, or white-skinned, puffy, indolent habit of body, than from external influences. Children of a dull and sluggish temperament are far more liable to *C.* than the thin, active, and sanguineous. The period at which the disease most generally occurs is between the ages of 3 and 10 years. *C.*, at certain wet seasons, is often epidemic, and by some has been considered contagious; but in this respect it is only like whooping-cough, sympathetically so, children taking it from imitation rather than from infection. The symptoms begin with restlessness, which in a few hours is followed by a wheezing in the throat and hoarseness, most heard during sleep, while a short dry cough soon after succeeds, attended with a tightness and constriction in the throat, indicated by the child frequently raising its hand to the part, as if to remove some obstruction. The difficulty of breathing becomes rapidly more distressing, and the face assumes an aspect of great anxiety; the veins in the neck become swollen and knotted, or varicose, and the voice, every time the child speaks or coughs, has a sharp metallic ring, which soon settles in a steady sound, like the crow or croupy noise made by fowls when caught and held in the hand

—that character, in fact, which has given to the disease the popular name which it bears. The cough, at first dry, is after a time attended by a thick, ropy expectoration, which, clinging like glue to the fauces, and extremely difficult to remove, causes the child great suffering to expel, the patient appearing half suffocated in its abortive attempts to void the adhering whitish phlegm. With these symptoms come on thirst, heat, and considerable fever; the pulse is quick and vibrating, while the efforts of the child to obtain air cause it to arch the neck back in a manner most distressing to witness; till, the anxiety of countenance and difficulty of inspiration increasing, the little patient expires about the third day, strangled from the interruption of air to the lungs. The paroxysms of this disease usually come on in the evening, and become intensified about midnight, the patient seeming freer and better during the day. A favorable termination may be expected when the expectoration is free from the first, the breathing little interfered with, and the febrile symptoms slight; but a fatal result may be anticipated when the anxiety and difficulty of breathing are great, the metallic sound more acute, and there is no appearance of expectoration. That parents may see the necessity of attending to this fatal disease immediately, and better understand the object for which the different remedies are given, we purpose explaining the peculiar morbid action which takes place in *C.*, and the reason why it is so rapid in its course, and often so fatal in its termination.—*C.* is an inflammation of that delicate membrane which, continued from the mouth, lines the whole inner surface of the larynx and windpipe, and finally of the bronchial tubes, or air-passages. Though the inflammation may extend from the larynx to the bronchi, the mischief is, in general, confined to that portion of the membrane lining the trachea, or windpipe. The consequence of this inflammation is to induce the vessels of the membrane to throw out a thick, tough secretion, to protect the structure from the action set up. This effusion, in character like a thin coat of gelatine, and called professionally the *adventitious* or *false membrane*, is spread out along the whole circumference of the tracheal tube. This sheath within a sheath, though rendering the breathing much more difficult and oppressive, would still not of itself prove fatal, to the function of breathing, but the adventitious membrane possesses this peculiar character, that as soon as the whole passage has been lined, the membrane closes either above or below, and, like the finger of a glove dropped down the tube, effectually cuts off all access of air to the lungs, thus accounting for those efforts of the child, by straightening the throat and arching the neck, to overcome an impediment, that, once completely formed, terminates its life. It is to induce the re-absorption of this false membrane, loosen it from its hold of the windpipe, and cause it to be expelled, that all the efforts of the physician are bent; hence the importance of using energy and dispatch in the treatment. In so rapid and fatal a disease, medical advice ought to be immediately obtained. Bleeding, except by leeches, is not now generally approved of by medical men; some recommend emetics and purgatives; others opium and calomel. Warm bathing, or sponging with warm water, should be had recourse to, as well as the inhalation of a watery vapor. The following extract from the *Medical Gazette of Paris* (1869) indicates a treatment remarkable for its simplicity. We give it publicly, as we believe, for the benefit of mothers, though without assuming any personal opinion of its merits:—"Langanterie, a French doctor, after observing the effect of sulphur on the oilium of grape-vines, was led to administer it in several cases of croup. He mixes a teaspoonful of sulphur in a glass of water, and gives a teaspoonful of the mixture every hour. Its effect is described as wonderful. The disease is cured in two days, the only symptoms remaining, being a cough arising from the presence of loose pieces of false membrane in the trachea. Langanterie says he has followed this plan in seven cases, all being severe, especially the last, in which the child was cyanotic, with protruded rolling eyes, and noisy respiration."

Croup, *n.* [Fr. *croupe*; L. Lat. *cruppa*; It. *groppe*. See CROP, and CRUPPER.] The rump of a fowl; the buttocks of a horse.

Croupade, *n.* [Fr., from *croupe*.] (*Manège*.) A higher leap than a curvet, or one that keeps a horse's fore and hind quarters at an equal height, to enable him to tuck his legs under his belly without jerking.

Croup'er, *n.* See CRUPPER.

Croupier, (*kroo'pe-ür*), *n.* [Fr.] A person who presides at a gaming-table, and collects the stakes.—A vice-chairman at a public dinner or banquet.

Croup'y, *a.* (*Med.*) Relating, or appertaining to, or resembling croup.

Cront's Store, in New York, a P. O. of Dutchess co.

Cron, *n.* (*Cookery*.) See SOUR-KROUT.

Crow, *n.* [A. S. *craw*; Ger. *krähe*, formed from the sound it makes; Ar. *kak*; Lat. *corvus*; Fr. *corbeau*.] (*Zoöl.*) The crow family (*Corvidæ*), ord. *Insectores*, comprises birds that have a strong bill, compressed towards the points, and covered at the base with stiff, bristly feathers, which advance so far as to conceal the nostrils. The plumage is dense, soft, and lustrous, generally dark, but sometimes of gay colors. They are very omniferous, and remarkable for their intelligence. The family, widely diffused over the world, includes the common crow, type of the *Corvidæ*, and the above, which will be described here; and the RAVEN, the FISH-CROW, the ROOK, the JAY, and the MAGPIE, *q. v.* The common crow of N. America, *Corvus Americanus*, (Audubon,) is about 20 inches long, and the wings about 13 inches. It is remarkable for its gregarious and predat-

tory habits. The bill is straight, convex, and compressed. The nostrils are placed at the base of the bill and are pantulous; the tongue short, and bifid at tip; the toes are separated almost to the base, and the middle one is the longest; the wings subelongated and acute, and the tail composed of 12 feathers. They pair and commence building operations in March—the male to repair their nests, the young to frame new ones; b

Fig. 732.—COMMON CROW, (*Corvus Americanus*.)

they are such thieves, that while the one is fetching materials, the other must keep watch to prevent rising fabric from being plundered by their neighbor. As soon as the nest is finished, and the eggs produced (five, bluish-green, with dark blotches,) the male takes upon himself the care of providing for his mate, while he continues during the whole period of incubation. They frequent the same rookeries for years, but allow no intruders into their community. They feed chiefly on worms, and the larvæ of insects; they also eat grain and seeds, whence they have sometimes been supposed injurious to the farmer; but they amply repay him what they take, by destroying the vermin in his field. **Crow**, *n.* A bar of iron; a crow-bar; any thick piece of iron used as a lever.—The sound uttered by a cock. Part of the entrails of an animal; as, bullock's liver *crow*.—A vaunt; a boast; a cause for triumph over another.

To pluck a crow. To be contentious about anything of little value.

"If you dispute, we must even pluck a crow about it."—L'Estrange.

Crow, *v. n.* (*imp.* CROW or CROWED; *pp.* CROWED.) [*crāvan*; Ger. *krähen*; formed from the cry of the bird.] To cry as a cock; to cry and make a noise as a cock does, in joy, gayety, or defiance.

"Within this homestead liv'd, without a peer,
For crowing loud, the noble chauticleer."—Dryden.

—To boast in triumph; to vaunt; to vapor; to swag.

"Selby is crowing, and, though always defeated by his still crowing on."—Richardson.

—To utter a shrill cry of pleasure or glee; as, a *crow* baby.

Crow'-bar, *n.* (*Carp.*) A bar of iron used as a lever in a crow.

Crow'-berry, *n.* (*Bot.*) See EMPETRUM.

Crow-black'bird, *n.* (*Zoöl.*) *Quiscalus versicolor*, a beautiful bird of N. America, east of the central plains. It belongs to the fam. *Icteridæ*, is 13 inches long, and neck steel-blue, and the rest of the body black, with varied metallic reflections. In autumn, they are met in large flocks upon the corn-fields, where they commit depredations.

Crowds, *n.* [A. S. *cruth*, *cread*; W. *crowd*, a round lump; Swed. and Goth. *kroeta*, a congeries, a crowd.] A collection; a collection of things collected, or closely pressed together; a medley of things; as, a "crowd of islands."—Pope.

A number of persons collected into a close body without order; a throng; a promiscuous medley of people of great multitude; a concourse; a swarm.

"Midst the crowd, the hum, the shock of men."—Byron.

—The populace; the common orders of people; the rabble; the rabble; the canaille; the vulgar.

—*v. a.* To thrust, urge, press, or drive together; as, to be crowded up.

"Ye unborn ages, crowd not on my soul!"—Gray.

—To fill by pressing numbers together without order, or fill to excess; to encumber by multitudes.

"One crowded hour of glorious life
Is worth an age without a name."—Scott.

—To urge by solicitation; to dun; to pester.

To crowd sail. (*Naut.*) To carry a heavy press of sail to run under additional canvas.

—*v. n.* To press forward in numbers; to swarm in multitudes; to be numerous; as, to crowd around any object in the street.

—To thrust, urge, or press forward; as, to crowd in a supper-room.

"A mighty man, had not some cunning sin
Amidst so many virtues crowded in."—Cowley.

Crowd, **Cron**, **Cronth**, *n.* [W. *crwth*.] (*Mus.*) A kind of ancient violon, or stringed instrument.

"The pipe, the tabor, and the trembling crowd."—Spenser.

Crow'er, *n.* A person who crowds another or others.

Crow'd'er's Creek, in N. and S. Carolina, enters the Yadkin in the latter State, York dist.

Crow'd'er's Mountain, in N. Carolina, a town of Gaston co.

Crow'dy, *n.* Water-porridge. (*Scot.*)

Crow'ell's Mills, in N. Carolina, a P. O. of Blad co.

Crow-fish, *n.* See NUX VOMICA.

Crow'-flower, *n.* (*Bot.*) A kind of campion.

Crow'-foot, *n.* (*Bot.*) See RANUNCULUS.

(*Naut.*) A number of small lines run through an euphroe to suspend an awning by.

row-keeper, *n.* A scare-crow; a figure set up in corn-fields to keep crows from the grain.

rowlandville, or **COOK'S MILLS**, in Upper Canada, a village of Welland co.; *pop.* about 200.

row meadow, in Illinois, a village of Marshall co., about 122 m. S.W. of Chicago.

rowl, *n.* [*Fr. couronne*; *Lat. corona*; *W. crown*, round, circular; *Ger. krone*.] The top or summit of anything; as, the *crown* of the head, the crown of a hill. — That which is placed upon or surrounds the head; a diadem or ornament worn on the head by kings and sovereign princes as a badge of regal authority and dignity; a wreath; a garland; as, a *crown* of laurel.

(*Hist.*) An ornament for the head, no less ancient than universal in its use, which had its origin probably in the fillets which served to prevent the hair from be-

Fig. 733. — ANTIQUE GARLANDS, DIADEMS, AND CROWNS.

ing dishevelled by the wind. As ornaments, crowns were originally simple garlands of leaves worn on joyous or festive occasions; but at a very early age they became marks of distinction or honor. Among the ancients, especially in the Roman republic, they were conferred upon citizens for deeds of valor or merit. There were crowns of various kinds, each appropriated to a particular purpose; some were simple garlands of bay-leaves, while others were made of gold or other metals. Among these various species of crowns we may mention:

1. The *Eastern C.*, which appears on coins of Greek oriental sovereigns; 2. The *Triumphal C.*, borne by Julius Cæsar, and subsequently adopted as the *Crown Imperial*;

3. The *Obsidional C.*, conferred upon commanders who distinguished themselves in the defence of fortified places; 4. The *Civic C.*, for saving the life of a citizen;

5. The *Mural C.*, for soldiers distinguished in besieging ramparts, etc. — From this ancient usage, the *C.* was early borrowed as an emblem of sovereignty in Europe, especially as an emblem of imperial or royal power, potentates and nobles of a lesser degree being decorated with the *Coronet*. The crowns of kings and emperors are usually made of gold and fashioned after the model of the ancient diadem. Among the crowns renowned in history deserves to be mentioned the famous *Iron Crown of Lombardy*, worn by Charlemagne, which for many centuries had been in possession of the Austrian emperor, but has, together with the kingdom of Lombardy, reverted to the united kingdom of Italy. Napoleon I. wore it when he was crowned king of Italy at Milan. —

DIADEM.

Regal power; sovereignty; royalty; as, a succession to the *crown*, in the name of the *crown*, &c.

Honorary distinction; honor; glory; reward; — anything sought for and obtained as a prize; as, a mural *crown*.

Let merit crowns, and justice laurels give. — *Dryden*.

A piece of money stamped with the figure of a crown. Satisfies his appetite, and owes no man a *crown*. — *Swifling*

In England, a silver coin of the value of five shillings sterling (\$1.25), equal to two half-crowns.

A ounce of silver, whether in peace, groats, or *crowns*. — *Locke*.

A part of a hat or cap which covers the head above the brim; also, the circular surface at the top of the hat. (*Bot.* and *Arch.*) See *CORONA*.

(*Naut.*) Part of an anchor. See *ANCHOR*. — The right turn of a cable or hawser.

Among lapidaries and jewellers, the higher cut surfaces a rose-diamond.

(*Ecol.*) The tonsure, or round shaved spot on the top of the cranium. See *TONSURE*.

(*Geom.*) A plane ring comprehended between two concentric perimeters.

Plans of the *crown*. (*Law*. See *PLEAS*.

(*Jewelry*) The upper-work of a rose-diamond, which stresses on a point at top.

To invest with a crown, or regal ensign or ornament; to invest with regal dignity, power, and authority; — To cover as with a crown; to bestow an honorary ward or distinction on, as a wreath, garland, &c.; as, *crown* a poet with the bays. — To reward; to recompense; as, success *crowns* labor.

"She'll crown a grateful and a constant flame." — *Roscommon*.

— To terminate or finish; to complete; to perfect.

"The crowning privilege of friendship is constancy." — *South*.

"Amidst the grove that crowns yon tufted hill." — *Byron*.

To crown a knot. (*Naut.*) To pass the strands of a knot over and under each other.

Crown-antler, *n.* The topmost antler of a stag's horn.

Crowned, *p. a.* Invested with a crown, or with regal power and dignity; as, a *crowned* head. — Full above the brim with liquor; as, a *crowned* goblet.

Crown'er, *n.* An old spelling of *CORONER*. *q. v.*

"The crowner hath set on her, and finds it Christian burial." — *Shaks.*

Crown'et, *n.* An old spelling of *CORONET*. *q. v.*

— The crowning point, or end of an enterprise. (*E.*)

Crown-net, *n.* A net for decoying wild-fowl.

Crown Glass, *n.* The glass usually employed for windows. It differs from *flint glass* in containing no oxide of lead, and is made of a mixture of 100 parts of sand, 35 of soda-ash or potash, and 35 of chalk. It is, therefore, essentially a silicate of soda, or potash and lime. See *GLASS*.

Crown-imperial, *n.* (*Bot.*) *FRUTILLARIA*.

Crown-jewels, *n. pl.* The regalia, or jewels, appertaining to the sovereigns of a country.

Crown-land, *n.* Land which is the property of the sovereign, as part of the dignity of the crown.

Crownless, *a.* Without a crown; dispossessed of a crown.

Crown'let, *n.* A small crown. (*E.*)

Crown'paper, *n.* A particular kind of writing-paper, bearing the water-mark of a crown.

Crown Point, in Indiana, a town, cap. of Lake co., abt. 130 m. N.W. of Indianapolis. *Pop.* (1897) abt. 2,300.

Crown Point, in New York, a post-village and township of Essex co. It was taken by Allen and Warner from the English in 1775. Has large beds of iron ore and deposits of phosphate of lime. *Pop.* (1897) about 3,500.

Crown'post, *n.* (*Arch.*) The middle post of a russed roof.

Crown-prince, *n.* In some European monarchies, the title borne by the heir-apparent to the crown.

Crown-saw, *n.* (*Mech.*) A species of circular saw formed by cutting the teeth round the edge of a hollow cylinder.

Crown'scab, *n.* (*Farriery*.) A cancerous scab or sore formed round the corners of a horse's hoof.

Crown'side, *n.* (*Eng. Law*. That part of a criminal prosecution which is conducted by counsel representing the crown; as in the United States it is the people who are represented in indictments.

Crown'sville, in Maryland, a post-office of Anne Arundel co.

Crown-this'tle, *n.* (*Bot.*) See *FRUTILLARIA*.

Crown-wheel, *n.* (*Mech.*) Circular motion is communicated at right angles by means of teeth, or cogs, situated parallel to the axis of the wheel. Wheels thus formed are denominated *crown*, or *contrate wheels*; they act either upon a common pinion, or upon a lantern.

(*Horol.*) The upper wheel of a watch next the balance, which is driven by it.

Crown-work, *n.* (*Fortif.*) An out-work running into the field, consisting of two demi-bastions, at the extremes, and an entire bastion in the middle, with curtains. It is designed to gain some hill or other advantageous post, and cover the other works.

Crow-quill, *n.* The quill, or large feather of the crow, used in fine writing.

Crow River, in Minnesota, is formed by the union of the N. and S. forks, and flowing N.E., enters the Mississippi about 6 m. above Anoka.

Crow's-bill, *n.* (*Surg.*) A kind of forceps for extracting bullets from wounds.

Crow's-feet, (*Med.*) Iron-pointed stars, or nails so radiating, that however thrown on the ground, they will always have a point uppermost. They are used as obstacles to the approach of an enemy, are especially useful against cavalry, and very similar to a *col-trop*. fig. 481.)

Crow's-feet, *n. pl.* The wrinkles appearing on the human face in the corners of the eyes, indicating the effects of age or dissipation.

Crow's-foot, *n.* (*Med.*) See *CALTROP*.

Crow's-nest, *n.* (*Naut.*) A look-out place in the form of a cask, set in the cross-trees of a ship.

Crow's Nest, in New York, a peak of the Highlands, on the W. side of the Hudson, in Orange co.

Crow's-stone, *n.* (*Arch.*) The top-stone of the gable end of a house.

Crowth, *n.* See *CROWD*.

Crow'toe, *n.* (*Bot.*) A plant of the hyacinth species.

"The tufted *crow'toe*, and pale *jessamine*" — *Milton*.

Crow'trodden, *a.* Showing crow's-feet in the corners of the eyes.

Crow'ville, in Indiana, a former P. O. of Warwick co.

Crow Wing, in Minnesota, a N. central co.; *area*, abt. 540 sq. m. The Mississippi River bounds it on the N. and W., as partly does Lake Mille Lacs on the E. The surface is diversified. *Cap.* Brainerd. *Pop.* 11,501.

— A village of Benton co., on the Mississippi River, at the mouth of Crow Wing River.

— A village of Crow Wing co., on the Mississippi River, abt. 100 m. N.W. of St. Anthony.

Crow-wing River, in Minnesota, rises in Becker co., and, flowing S.E., enters the Mississippi River, about 9 m. above Fort Ripley.

Crox'ton, in Ohio, a former post-office of Jefferson co.

Croy'don, a town of England, co. Surrey, 6 m. S. of London. It is a clean, handsome town, and possesses some fine old churches.

Croy'don, in New Hampshire, a post-township of Sullivan co., about 40 m. W.N.W. of Concord.

Croy'don, in Utah, a post-office of Morgan co.

Croydon Flat, in New Hampshire, a post-office of Sullivan co.

Croyle, in Pennsylvania, a township of Cambria co.; *pop.* 556.

Croyl'stone, *n.* (*Min.*) Crystallized cank.

Croze, *n.* A tool used by coopers.

Crozet Islands, a group in the S. Indian Ocean; *Lat.* 46° 27' S.; *Lon.* 52° 14' E.

Crozierville, in Pennsylvania, a manufacturing village of Delaware co.

Crozon, (*kro'zaung*), a sea-port town of France, dep. Finistère, 25 m. from Quimper; *pop.* 9,485.

Crozoph'ora, *n.* (*Bot.*) A genus of plants, order *Euphorbiaceæ*. The species *C. tinctoria*, a native of S. France, yields, by expression, a green juice, which is converted, by the combined action of ammonia and the air, into the purplish dye called *turnsole*.

Cruc'es, in the U. States of Colombia, a village on the Isthmus, and abt. 20 m. N.N.W. of the city of Panama.

Crucial, (*kroo'shal*), *a.* [*Fr.*: from *Lat. cruz*, *crucis*, a cross.] In the form of a cross; transverse; passing across.

— Severe; trying; searching, as if bringing to the cross; as, a *crucial* test.

Cruc'ian, *n.* (*Zool.*) The *Cyprinus gibelio*, a yellow fish of the family *Cyprinidae*.

Cruc'iate, *a.* (*Bot.*) Cross-shaped; cruciform.

Cruc'ible, *n.* [*L. Lat. crucibulum*; *It. crogiuolo*, and *crociulo*, an earthen vessel for melting metals; *Fr. creuset*. See *CROCK*.] (*Chem.*) A vessel made of some material capable of resisting a high temperature, used by chemists and metallurgists for fusing metals or chemical compounds. According to the material to be melted, and the heat required for fusion, they are made of platinum, iron, plumbago, porcelain, clay, or lime. These made of hard refractory clay, such as the Cornish or Hessian *C.*, are most usually employed. They will stand a very high heat without melting. Plumbago *C.* serve a double purpose, acting not only as vessels, but as reducing agents. Platinum *C.* are used in operations where a clay *C.* would be acted on by the fluxes employed. Where a very high temperature is required, as, for instance, in melting platinum, a lime *C.* is used.

(*Smelting*.) A repository at the vent of a furnace for the fused metal.

Cruc'ifer, *n.* (*Bot.*) A plant of the *Crucifera* or *BRASSICACEÆ*. *q. v.*

Crucif'eræ, *n. pl.* Same as *BRASSICACEÆ*. *q. v.*

Crucif'erous, *a.* [*Lat. crucifer*—*cruz*, *crucis*, a cross, and *fero*, to bear.] Bearing the cross.

(*Bot.*) Having four petals in the form of a cross, as certain flowers.

Cruc'ifier, *n.* A person who crucifies another; whence, one who subjects himself or others to any painful test or ordeal.

"Visible judgments were executed on Christ's crucifiers." — *Hammond*.

Cruc'ifix, *n.* [*Fr.*: *Lat. crucifixus*—*cruz*, and *figo*, to fix.] A cross on which the body of Christ is fastened in effigy; a representation, in painting or in statuary, of our Lord fastened to the cross.

Crucifixion, (*kroo'se-fik'shun*), *n.* The act of fastening to a cross, or of crucifying; the mode of putting to death by nailing or fastening to a cross. See *CROSS*. — Death upon a cross; death by being fastened to a cross. Agonizing mental suffering.

Cruc'iform, *a.* [*Lat. cruz*, and *forma*, form.] Having the shape or form of a cross; as, a *cruciform* style of architecture.

(*Bot.*) Consisting of four equal petals, disposed in the form of a cross.

Cruc'ify, *v. a.* [*Lat. crucifigo*—*cruz*, and *figo*, to fix.] To fix or nail to a cross; to put to death by nailing the hands and feet to a cross.

"They crucify to themselves the Son of God afresh." — *Heb.* vi. 6.

— To subdue; to mortify; to destroy the power of; as, *crucified* feelings.

Crucig'erous, *a.* [*From Lat. cruciger*.] Bearing the cross.

Cruc'ite, *n.* (*Min.*) Same as *ANDALUCITE*. *q. v.*

Crud, *n.* A crnd. (*Prov. Eng.*) See *CRUD*.

Crud'dle, *v. n.* To crowd; to huddle; to squeeze up in a body. — To bend, stoop, or squat. [Used in some parts of England.]

Crude, *a.* [*Lat. crudus*, from *cruo*; *W. crau*, blood.] Raw; in a primary state; not cooked or prepared by fire and heat; as, *crude* ore. — Unripe; immature; harsh; as, *crude* juices. — Rough; austere; unrefined; in a natural state; as, *crude* elements.

— Indigested, or not well digested; unconnected in the mind.

"Absurd expressions, *crude* abortive thoughts." — *Roscommon*.

— Unfinished; immature; not brought to perfection; as, a *crude* composition.

"Th' originals of nature, in their *crude* conception." — *Milton*.

— Undigested; not acted upon by the gastric powers of the stomach.

"A perpetual feast of nectar'd sweets, Where no *crude* surfeit reigns." — *Milton*.

— Possessing or exhibiting the fundamental germs of knowledge or ability; having a superficial groundwork of mental capacity; as, a *crude* philosopher.

(*Printing*.) Applied to a picture where the colors are rudely laid on, and do not blend or harmonize with one another.

Crudely, *adv.* Without due preparation; without form or arrangement; without maturity or digestion.

"The question *crudely* put, to shun delay." — *Dryden*.

Crude'ness, *n.* Crudity; rawness; state or quality of being crude; as, *crudeness* of judgment.

Crud'ity, *n.* [Lat. *cruditas*.] State of being crude; rawness; unripeness; something in a crude state; indigestion.

"A diet of viscid aliment creates flatulency and crudities in the stomach."—*Arbuthnot*.

—Anything undigested or immature; as, the *crudity* of a proposition.

Cru'el, *a.* [Fr.; Lat. *crudelis*, from *crudus*—*cruor*, blood.] Bloody-minded; unmerciful; unfeeling; hard-hearted; inhuman; void of pity or compassion; disposed to pain, afflict, torture, or oppress others; as, a *cruel* husband.

"I must be cruel, only to be kind."—*Shaks.*

—Barbarous; ferocious; brutal; fell; severe; destructive; savage; causing pain, suffering, or misery; as, a *cruel* tyrant.

"Cruel as death, and hungry as the grave."—*Thomson*.

Cru'elly, *adv.* In a cruel manner; with cruelty; as, to be treated *cruelly*.

Cru'elty, *n.* [Fr. *cruauté*; Lat. *crudelitas*.] Quality of being cruel; a savage or barbarous disposition or temper; inhumanity; savageness; barbarity; brutality; ferocity; infliction of unnecessary pain or distress.

"The cruelty and envy of the people."—*Shaks.*

—A cruel act; barbarous treatment.

"'Tis a cruelty to load a falling man."—*Shaks.*

(*Law*.) Cruelty to animals is an indictable offence, and punishable by common law.

Cru'et, Crew'et, *n.* [Fr. *cruchette*, dim. of *cruche*. See *CROCK*.] A vial or small glass bottle for holding condiments for the table, as pepper, vinegar, &c.; a castor.

Cru'et-stand, *n.* A table-appurtenance; a frame for holding cruets.

Cruikshank, (*krook'shank*.) GEORGE, A.R.A., an eminent English artist, b. in London, 1792. He is especially celebrated for the humorous and caricature engravings, that have left his studio to become examples of their kind of art. His *Comic Almanac*, and the illustrations of the earlier works of Charles Dickens, are familiarly known, and highly appreciated both in Europe and the U. States. Of late years, *C.* has principally devoted his genius to painting in oil; in this department his chief works are, *The Worship of Bicchus*, *Tam O'Shanter*, and *Disturbing the Congregation* (now the property of Queen Victoria). d. Feb. 1878.

Cruise, Cruise, *n.* A small bottle, cup, flagon, or cruet.

"A cruise of fragrance, formed of burnish'd gold."—*Pope*.

Cruise, (*krōz*.) *v. n.* [Ger. *kreuzen*; D. *kruissen*; from *kruis*, Fr. *croiser*, to cross.] To sail hither and thither, in directions which cross each other; to rove on the sea without any certain course, in search of an enemy's ship for capture, or for protecting commerce; to rove for plunder; as, to *cruise* off Jamaica, to *cruise* for slaves, &c.

—*n.* A voyage made in courses that cross each other; a sailing to and fro in search of an enemy's ships, or by a pirate in search of plunder; as, a *yachting cruise*.

Cruis'er, *n.* A person or a ship that cruises; specifically, an armored war vessel possessing high speed and some offensive power, designed chiefly to protect a nation's interests abroad. See *CRUISER*, in SECTION II.

Crum'ler, *n.* Same as *KRULLER*.

Crum'b, (*krum*.) *n.* [A. S. *cruma*; D. *kruon*; Low A. S. *krōne*; Ger. *krumm*, from low A. S. *cruman*, to rub to pieces; probably akin to II. b. *giram*, to cut off or away; Gael. *criomag*.] A small fragment, bit, pick, particle, or piece; usually a small piece of bread or other food, broken or cut off.

—The soft part of bread which is easily crumbled; opposed to *crust*.

To a *crumb*, entirely; completely. — To pick or gather up one's *crumbs*, to regain health and vigor; to be able to eat with heartiness and relish.

—*v. a.* To comminute, or break into small particles; as, to *crumb* a loaf of bread.

Crum'b-cloth, *n.* A covering placed over a carpet as a protection.

Crum'ble, *n.* A very minute particle; a small crumb.

—*v. a.* [D. *kruimelen*; Ger. *krümeln*; Gael. *criomagach*, from *criomag*, a bit, a fragment.] To break into small fragments or pieces; to divide into minute parts; to comminute.

"Flesh, also, shall be crumbled into dust."—*Herbert*.

—*v. n.* To fall, break, or part into small pieces or fragments; to fall to decay; to perish.

"What house, when its materials crumble,
Must not inevitably tumble?"—*Swift*.

Crum Creek, in New York, a P. O. of Fulton co.

Crum Creek, in Pennsylvania, traverses Delaware co., and enters the Delaware River.

Crum Elbow, in New York, a P. O. of Dutchess co.

Crum'mable, *a.* That may be broken into crumbs by the fingers.

Crum'my, *a.* Full of crumbs: as, a *crummy* loaf.

—Soft; not crusty.

Crum'p, *a.* [A. S. *crumb*, *crump*; Ger. *krumm*; W. *crom*; Arnor. *kromm*, crooked; allied to *rump*, *rumple*, *crimp*, *crimple*.] Crooked; bowed; bent.

"He was *crump*-shouldered, and the right side higher than the left."—*L'Estrange*.

—Crusty; hard; knobby; as, a *crump* loaf.

Crum'p'et, *n.* A kind of cake made of flour, milk, and butter, and baked on an iron girdle. (It is similar to a *muffin*.)

Crum'ple, *v. a.* [From *crump*. See *RUMPLE*.] To draw, contract, or press into wrinkles, creases, or folds; to rumple or crook; as, a *crumpled* dress.

"They *crumpled* Sir Roger's palm into all shapes."—*Addison*.

—*v. n.* To wrinkle; to pucker; to contract in an irregular manner.

Crum'pling, *n.* A small degenerate apple.

Crum'p'tou, in Maryland, a P. O. of Queen Anne co.

Crum'py, *a.* Crump; brittle; frangible.

Cru'or, *n.* [Lat.] Coagulated blood; gore.

Cru'orine, *n.* (Chem.) See *BLOOD*.

Crup, *n.* Brittle; frangible; crusty. — Harsh; surly; forbidding. (Local English.)

Crup'per, *n.* [Fr. *croupière*. See *GROUP*.] The buttocks of a horse; the croup.

—A strap of leather, which passes over the croup or rump of a horse, or a strap which is buckled to a saddle, and passing under a horse's tail, prevents the saddle from shifting forward.

—*v. a.* To place a crupper upon, as a horse.

Cru'ra, [Lat.] (Anat.) The bundles of nervous fibres which expand into the hemispheres of the cerebrum (*crura cerebri*), or of the cerebellum (*crura cerebelli*).

Cru'al, *a.* [Lat. *crualis*, from *crus*, *cruris*, a leg; akin to A. S. *kshura*, the hoof of an animal.] Belonging to the leg; as, the *crual* muscles.

—Shaped like a leg or root.

Crusade, *n.* [Fr. *croisade*, from Lat. *crux*, *crucis*, a cross; It. *crociata*; Sp. *crucida*.] (Hist.) A military expedition under the banner of the cross, as that against the infidels of the Holy Land.

—Any war or expedition undertaken on pretence of defending the cause of religion; a romantic or enthusiastic enterprise; as, a *crusade* against vice.

—A coin of Portugal. See *CRUSADO*.

(Hist.) In the European history of the Middle Ages, *crusades* were wars undertaken by confederacies of chiefs and soldiers, with a religious object. Those which were engaged in by a great part of the nations of Europe for the recovery of Palestine from the infidels, are now frequently denoted by this peculiar name. The term *crusade* is derived from the sacred symbol of the cross, which was borne by the warriors engaged in it over their arms; the color of the cross often served to designate the nation of the soldier; as the white cross on a red ground, France; the red cross on a white ground, England. The principal *C.* for the conquest of Palestine were: 1. The first, A. D. 1096, excited by the preaching of Peter the Hermit and the encouragement of Pope Urban II., in which Godfrey of Bouillon headed the Christians, who made themselves masters of Jerusalem and a great part of Palestine. 2. The second, A. D. 1142, in which Conrad III. of Germany and Louis VII. of France led armies to complete the conquest of Palestine, but without success. 3. The third, A. D. 1189, was occasioned by the capture of Jerusalem by Sultan Saladin; Frederick (Barbarossa) of Germany, Philip Augustus of France, and Richard Coeur de Lion of England, were the chief among the confederate monarchs: the capture of Acre was almost the only fruit of this great expedition. 4. The fourth *crusade* was conducted by the king of Hungary, Andrew II., in 1217. 5. The fifth (1228) was conducted by Frederick II. (grandson of Barbarossa), who recovered Jerusalem, but for a short time. 6. The sixth, A. D. 1248, by Saint Louis, king of France, against Egypt, but without success. Among other wars which have been at various times denoted by the name of *C.*, that against Raymond, count of Toulouse, and his heretical vassals, the Albigens, of which the first leader was the famous Simon de Montfort, is the most memorable. (See *ALBIGEN-ES*.) Whether the *C.* exercised a beneficial influence on the state and condition of society, is a question which has long engaged the attention of the learned. They were undoubtedly carried on at an enormous expense of human life, and, in the end, produced no material result, while during their continuance they necessarily retarded all progress in the peaceful pursuits of the arts or manufactures; but, on the other hand, we believe that they have exercised a most beneficial influence upon the civilization of Europe. The various nations of Europe were united together in one common cause, and taught to know and sympathize with each other; they were brought into contact with two new civilizations, — the Greek and the Saracenic, each more advanced and refined than their own: and commercial enterprise received from the *C.* its first and greatest stimulus.

Crusade, *v. n.* To engage in a crusade; to wage war against in a spirit of religious zeal or moral enthusiasm.

Crusad'er, *n.* A person engaged in a crusade.

Crusa'do, *n.* [Pg. *cruzado*.] A Portuguese coin bearing the stamp of a cross.

"Believe me, I had rather have lost my purse full of *crusadoes*." — *Shaks*.

Crusea, (*Accademia del'la*.) (*kroos'kă*.) [It., the academy of bran or chaff.] One of the earliest, and one of the most celebrated of the societies of modern Europe. It was founded at Florence in 1582, and has recently been incorporated with two other societies, under the name of the *Royal Florentine Academy*.

Cruse, *n.* Same as *CRUISE*, *q. v.*

Cru'set, *n.* [Fr. *cruset*.] A goldsmith's melting-pot.

Crush, *v. a.* [Swed. *krossa*, to bruise; Goth. *ga-kroten*.] To crush together; Fr. *écraser*; It. *crosciare*; probably allied to Heb. *garas*, to break in coarse pieces; Ar. *garash*.] To bruise; to press or squeeze into a mass, so as to destroy the previous continuity of the parts; to break or bruise; to pound; as, to *crush* a lump of sugar.

"Bacchus, that first from out the purple grape,
Crush'd the sweet poison of misused wine."—*Milton*.

—To overwhelm and beat down by power or pressure.

"Vain is the force of man, and heav'n's as vain,
To crush the pillars which the pile sustain."—*Dryden*.

—To subdue; to overpower; to prostrate; to oppress; to conquer past resistance; as, to *crush* an enemy.

"This act
Shall bruise the head of Satan, crush his strength."—*Milton*.

To *crush* a cup. To finish a glass of wine or grog. — To *crush* out. To stamp out by pressure; to obliterate as, to *crush* out grape-juice, to *crush* out a rebellion.

—*v. n.* To be pressed into a smaller compass by external weight or force.

—*n.* A violent collision or rushing, which breaks or bruises the bodies; or a fall that breaks or bruises into a confused mass.

"Wreck of matter, and the crush of worlds."—*Addison*.

—A close, forcible pressure of many persons together; as, to get out of the *crush*.

Crush'er, *n.* He who, or that which, crushes. — Anything that confounds or destroys; as, his argument is a *crusher*.

Crush'-room, *n.* An ante-chamber; as, the *crush-room* of an opera-house.

Cru'so, in New York, a post-office of Seneca co.

Crust, *n.* [Lat. *crusta*; It. *crosta*; Ger. *kruste*; Low A. korste; O. Ger. *krusta*; W. *crest*; allied to Gael. *rus*, rind, skin, bark.] Any shell or hard outer coat, covering, or case of anything; as, a *crust* of soot, the *crust* of society.

—A piece of hard bread; a piece of bread hardened by long keeping.

"Give me a *crust* of bread, and liberty."—*Pope*.

—The cover or case of a pie; as, short *crust*.

—An incrustation or collection of concreted matter found in bottles of wine; as, the *crust* of port-wine.

Crust of the Earth. See SECTION II.

—*v. a.* To cover with a crust or with a hard case or coat to spread over the surface a substance harder than the matter covered.

"Crusted with bark, and hard'ning into wood."—*Addison*.

—To cover with concretions.

—*v. n.* To gather or contract into a hard covering; incrust; to envelop; as, *crusted* with bark.

—To concrete or freeze, as superficial matter; as the pool *crusted* in a few hours.

Crus'ta, *n.* [Lat.] (*Fine Arts*.) An engraved gem; intaglio.

Crusta'cea, CRUSTACEANS, *n. pl.* (*Zoöl*.) A class of animals, branch *Articulata*, which are covered with a shell or crust. These consist of crabs, lobsters, and many others of a much less complicated structure. The solid envelope may be regarded as a kind of epic mis; for beneath it we find a membrane like the skin of higher animals; and at certain times it detaches itself and falls off, in the same manner as the epidermis of reptiles separates itself from their bodies. The *C.* breathe by means of *branchia*, usually attached to the feet or to their jaws; they have from five to seven pairs of feet; their head is frequently not distinct from the trunk, provided with from two to four jointed, setaceous antennae; and two compound movable eyes seated on peduncles, which are sometimes movable, and at other fixed: they have a distinct heart, and a regular circulating system; and their organs of reproduction are placed either in the feet or tail. The limbs vary from ten to fourteen, each having six articulations. The anterior limbs, and sometimes even three on each side, are provided with forceps: at other times they are terminated by simple hooks, and in many instances by pincers which fit them for swimming. The mouth is usually two mandibles, a *labium* or lip below, and from three to five pairs of jaws; these small leg-shaped appendages are not fitted for locomotion, but being placed near the mouth, assist in the operation of feeding. Animals of this class live in various situations, suited to their organization: some inhabit considerable depths of the ocean, others are found on rocky shores, or in rocky shallows; some, such as crawfish, inhabit rivers, under stones and banks; while the land-crab takes its abode in inland situations, making periodical journeys to the coast in vast numbers, for the purpose of depositing its eggs. Some of the *C.* have the power of emitting light in the dark. Others are endowed with the power of not only detaching one of their limbs, when seized upon by an enemy, but have also the faculty of reproducing the severed limb. *C.* may be divided, according to Dana, into the three orders DECAPODA, TETRADECAPODA, and EXTOMOSTRACA, *q. v.*

Crusta'cean, *a.* Crustaceous; relating or pertaining to the *Crustacea*.

—*n.* A member of the *Crustacea* class of animals.

Crustaceol'og'ical, *a.* Relating or pertaining to crustaceology.

Crustaceol'ogist, *n.* A person versed in crustaceology.

Crustaceol'ogy, *n.* [Lat. *crustacea*, and Gr. *logos*, treatise.] The science relating to animals of the *Crustacea* class.

Crustaceons, (*krus-ta'she-us*.) *a.* Pertaining to crust; like crust; of the nature of crust or shell. — Shelly; belonging to shell-fish.

Crusta'ceousness, *n.* The quality of having a jointed shell.

Crust'al, *a.* Crusty; made of crust.

Crustalog'ical, *a.* Pertaining to crustalogy.

Crustalogist, *n.* Same as CRUSTACEOLOGIST, *q. v.*

Crust'ated, *a.* [Lat. *custratus*.] Covered with a crust.

Crust'ation, *n.* Incrustation.

Crustific, *a.* [Lat. *crusta*, and *facere*, to make.] Making a crust.

Crust'ily, *adv.* In a crusty manner; peevishly; humbly; morosely; snappishly.

Crust'iness, *n.* Quality of being crusty; hardness; as, the *crustiness* of a loaf of bread.

—Hardness; snappishness; peevishness; moroseness or ill-nature; as, *crustiness* of manner.

rusty, *a.* Having a crust: like crust: of the nature of crust; pertaining to a hard covering. — Abrupt in speech or manner; snappish; short; surly; peevish; morose; as, a *rusty* old bachelor.

rut, *n.* The rough part of the bark of an oak, or other tree.

crutch, (*krüch*), *n.* [A. S. *crioc*, *cryc*; Ger. *krücke*; It. *croccia*, from Lat. *cruz*, a cross. See **CROSS**.] A staff, with a cross-piece at the head, to be placed under the arm or shoulder, to support the lame in walking. Something resembling a crutch: a support.

(*Naut.*) A knee, or piece of knee-timber, placed inside a vessel, to secure the heels of the cant-timbers abaft.

v. a. To support on crutches: to prop, or sustain, with miserable helps, that which is feeble.

"Two fools that *crutch* their feeble sense on verse." — *Shaks.*

crutched, (*krütcht*), *p. a.* Supported with crutches; as, a *crutched* veteran. — Marked with the sign of the cross; as, *crutched* friars.

cruth, *n.* (*Mus.*) See **CROWD**.

crux, *n.*; *pl.* **CRUCES**. A puzzle, enigma, or predicament: a crucial test.

crizado, *n.* See **CRUSADO**.

crúz, (*Santa*), (*krööz*), a town of the island of Tenerife, capital and chief commercial port of the many islands; Lat. 28° 25' 12" N., Lon. 16° 14' 18" W. The harbor is very secure, with a capacity for 10 or 12 vessels of war; it has a mole which juts out far into the sea. *Pop.* 8,070.

cry, *v. n.* (*imp.* and *pp.* **CRIED**.) [Fr. *crier*; It. *gridare*; Goth. *grētan*, *grētan*; A. S. *grætan*; W. *criaw*, from *are*, a cry, that which penetrates or pervades; O. Ger. *quar*, to groan; Ger. *kreischen*; Sansk. *gr*, to sound, to utter; *gir*, the voice.] To utter the shrill sounds of weeping, lamentation, sorrow, distress, surprise, fear, or terror, joy or gladness, prayer or entreaty, &c.; as, to *cry* in pain. — To speak, call, or exclaim with vehemence; to call importunately; to proclaim; to exclaim; to vociferate; to shriek; to scream; as, to *cry* for justice. To utter inarticulate sounds, as animals.

"The beasts of the field *cry* also unto thee." — *Joel* i. 20.

To *cry* out; to exclaim; to scream; to clamor; to vociferate.

To *cry* out against. To lament or inveigh loudly; to complain noisily. — To *cry* to. To implore; to beseech; as, to *cry* to Heaven. — To *cry* you mercy. To beg your pardon or excuse.

v. a. To utter loudly; to publish abroad.

"If the man who turnsips cries,

Cry not when his father dies." — *Dr. Johnson.*

To proclaim; to name loudly and publicly for giving notice; as, to *cry* a sale by auction.

"Love is lost, and thus she *cries* him." — *Crashaw.*

To *cry* up. To extol; to raise in value by public praise or proclamation.

"Those who are fond of continuing the war, *cry* up

our constant success at a most prodigious rate." — *Swift.*

To *cry* down. To depreciate; to diminish the value of by public dispraise.

"Men of dissolute lives *cry* down religion." — *Tillotson.*

cry, *n.*; *pl.* **CRIES**. A loud sound uttered by the mouth, whether of man, or of beast; the loud voice of man, or of beast, articulate or inarticulate; a loud or vehement sound, uttered in weeping or lamentation; a shriek or scream; as, the *cry* of an infant.

"And with no language but a *cry*." — *Tennyson.*

Clamor; outcry; loud exclamation; acclamation; as, an acclamation of *cry*. — Lamentation; jubilation; loud voice in distress, prayer, supplication, terror, alarm, joy, triumph, &c.; importunate call or utterance; as, a *cry* of anguish. — Proclamation, as by hawkers of their wares; public announcement by outcry; as, a street *cry*. — A pack of hounds or hunting-dogs. — A clique of persons; — used in a contemptuous sense.

"Yon common *cry* of curs whose breath I hate." — *Shaks.*

y'er, *n.* Old spelling of **CRIER**, *q. v.*

y'er, *n.* Same as **FALCON GENTLE**, *q. v.*

y'ing, *a.* Notorious; common; great; calling for vengeance and punishment; as, a *y'ing* evil.

y'ing-bird, *n.* (*Zool.*) See **COURLAN**.

crypt, *n.* [Gr. *kryptē*, from *krypto*, to hide; Fr. *crypte*.] (*Arch.*) A low chamber under a church, or cathedral,

with a vaulted roof, the groined arches of which spring

Fig. 734. — **CRYPT** OF YORK CATHEDRAL, (England.)

from short but massive columns. Sometimes the *C.* extends under the entire church; but they are generally of much smaller dimensions. Divine service was for-

merly performed in them, and they were also used as places of burial.

Cryolite, *n.* (*Min.*) An orthorhombic mineral, occurring in prisms often a little tapering, of a snow-white color. *Sp. gr.* 2.9 to 3.077. *Comp.* Aluminium, 13.0; sodium, 32.8; fluorine, 54.2 = 100. It is fusible in the flame of a candle. It occurs in West Greenland, where it constitutes a large bed in gneiss, and is shipped in large quantities to Pennsylvania, where it is used for making soda; and for the manufacture of a white glass, which is a good imitation of porcelain.

Crypta, *n.*; *pl.* **CRYPTÆ**. [Lat.] (*Bot.*) The name given to the small, round receptacles for secretion in the leaves of some plants, as the orange and the myrtle.

(*Anat.*) Little rounded excrescences, in which the minute ramifications of the arteries terminate in the cortical part of the kidneys.

Cryptic, **Cryptical**, *a.* Hidden; secret; occult; as, "*Cryptic* ways of working." — *Glanville.*

Cryptically, *adv.* Occultly; secretly.

Cryptobranchus, *n.* [Gr. *kryptos*, hidden, and *branchia*, gills.] (*Nat. Hist.*) A genus of Batrachia, in which the gill-aperture disappears early in life. Three species are known: the *Cryptobranchus* (menopoma) *Alleghaniensis*, found in many rivers of N. America; the *C. fuscus*, from South Carolina; and the *C. japonicus*, which is the largest of all known naked Amphibia, being three feet long. A fossil species is found in the tertiary strata at Eningen.

Cryptogamia, **CRYPTOGAMÆ**, *n. pl.* [Gr. *kryptos*, concealed, and *gamos*, marriage.] (*Bot.*) The groups of the flowerless plants. The great distinctive character of *C.* does not consist in the absence of decided male and female organs, nor in their minuteness, for in the greater part their presence has now been ascertained beyond all doubt. The main point is, that the reproductive organs are not true seeds containing an embryo, but mere cells consisting of one or two membranes enclosing a granular matter. These bodies, whether called *spores* or *sporidia*, produce by germination a thread or mass of threads, a membrane, a cellular body, &c., as the case may be, which either at once gives rise to the fruit, or to a plant producing fruit. The consideration of the relations between the reproductive organs of *phanogams* (or flowering plants) and *C.* is one of the most interesting which is to be found in botany; but it is also one of the most abstruse and difficult. *C.* are divided into the two classes, **THALLOGENS** and **ACROGENS**, *q. v.*

Cryptogamian, **Cryptogamic**, **Cryptogamous**, *a.* [Gr. *kryptos*, concealed, and *gamos*.] (*Bot.*) Having the fructification concealed, as in plants of the order *Cryptogamia*.

Cryptogamy, *n.* (*Bot.*) Concealed fructification.

Cryptogram, *n.* A secret writing: a writing in cipher, the meaning of which is not superficially intelligible; a cryptograph.

Cryptographal, *a.* Pertaining to cryptography.

Cryptographer, *n.* One who writes in secret characters.

Cryptographical, *a.* Written in cipher, or secret characters.

Cryptography, *n.* [Fr. *cryptographie*; Gr. *kryptos*, secret, and *grapho*, I write.] Also termed *Polygraphy* and *Steganography*. The art of writing in a manner intelligible only to those admitted into the secret of the method, either by conventional signs, ciphers, or by other contrivances.

Cryptology, *n.* [Gr. *kryptos*, and *logos*, treatise.] Enigmatical language.

Cryptotania, *n.* [Gr. *krypto*, to conceal, and *tania*, a wreath or border.] (*Bot.*) A genus of plants, order *Apiaceæ*. The House-wort, *C. Canadensis*, 1-2 feet high, umbels paniculate, white small flowers, is common in moist woods.

Crystal, (*kristal*), *n.* [Fr. *cristal*; Lat. *crystallus*; Gr. *krystallos*, from *kryos*, icy cold, frost, ice, and *stello*, to set.] (*Min.* and *Chem.*) This term, which was originally applied to the beautiful transparent varieties of silica, or quartz, known under the name of *rock-crystal*, is now applied to any inorganic solid body, bounded by plane surfaces symmetrically arranged, and produced by the operation of chemical affinity in the transition from the fluid to the solid state. See **CRYSTALLIZATION**.

—A superior description of glass. — The glass belonging to a watch-case. — Anything having the form of a crystal.

—*a.* Consisting of crystal, or like crystal; pure; clear; pellucid; transparent; as, "*a crystal* stream."

Crystal, in *Iowa*, a post-village and township of Tama co., about 10 m. N. of Toledo.

Crystal, in *Maine*, a P. O. of Aroostook co.

Crystal, in *Michigan*, a post-township of Montcalm co., about 40 m. N.N.W. of Lansing.

Crystal Lake, in *Illinois*, a post-village of McHenry co., on a small lake of the same name, 43 m. N.W. of Chicago.

Crystal Lake, in *Minnesota*, a township of Hennepin co., about 4 m. from Minneapolis.

Crystal Lake, in *Wisconsin*, a township of Marquette co., about 10 m. N. of Montello.

—A post-office of Waupaca co.

Cry'stalline, *a.* [Lat. *crystallinus*.] Consisting of, or resembling, crystal; as, *crystalline* glass.

—Bright; clear; diaphanous; pellucid; transparent; as, "*the crystalline sky*." — *Milton.*

C. lens, or *C. humor*. (*Anat.*) The lens of the eye, a lentiform pellucid substance, enclosed in a membranous capsule, and situated in a depression in the anterior part of the vitreous humor. See **EYE**.

C. rocks. (*Geol.*) The name given to such rocks as granite, quartzite, marble, and others, which show by

their crystalline structure that they have been brought into their present state owing to the action of chemical forces. In the early history of geology, such rocks are called *primitive*, but they are certainly not limited to any geological age, examples being found in the newest as well as the oldest. Even granite is comparatively modern, and there is no reason why crystalline rocks should not be at the present time in course of formation.

Crystallizable, *a.* That may be crystallized.

Crystallization, *n.* (*Chem.*) The spontaneous assumption of well-defined geometrical forms by bodies in passing from the fluid, or aeriform, state to the solid condition. Bodies not capable of assuming the crystalline form are termed *amorphous* or *colloid*; those which form crystals, *crystalloid*. When a substance crystallizes in two distinct forms, which cannot be derived from the same original, it is said to be *dimorphous*. Sulphur, for instance, will crystallize in octohedra or prismatic crystals. Some substances are even *trimorphous*. Sulphate of nickel crystallizes in right rhombic prisms, square-based octohedra, and oblique rhombic prisms, according to the temperature at the time of evaporation. Bodies crystallizing in similar forms are called *isomorphous*. The alumina and fluor-spar, carbon, gold, copper, and their compounds; the potassium compounds of chlorine, iodine, bromine, and fluorine, form *isomorphous* groups. *C.* may be effected in several ways: — by evaporation, by sublimation, by fusion, or by slow electrical action. It sometimes happens that precipitates are thrown down in a crystalline form; thus, when tartaric acid is added to a solution of potash, the tartrate of potash falls down in minute crystals. *C.* by evaporation is effected either by allowing a hot saturated solution of the salt to cool gradually, or by spontaneous evaporation. In the former case the masses of crystals are small and confused. Where single perfect crystals are required, the method of crystal-feeding invented by Leblanc must be resorted to. A small but perfect crystal is first obtained by one of the methods mentioned, and placed in a cold concentrated, but not saturated, solution of the substance in question, after which the crystal is turned regularly twice every day, taking care to expose a fresh surface each time, until the crystal has reached the desired size. As the solution becomes weaker, it should be replaced by a fresh quantity of the original strength. Great care must be taken not to use a saturated solution, otherwise fresh crystals will form in the vessel, and on the original crystal. A glass plate may be used to lay the crystal on in the solution, and a pair of horn or boxwood tweezers are better than the fingers for turning it. By these means crystals of very large size may be made. The solution should, as much as possible, be kept at the same temperature, and the crystal should be turned very regularly. *C.* by fusion is resorted to in the case of metals and other insoluble substances. The metal, or other body, is melted in a ladle or crucible, and allowed to cool until the top-crust is solid; it is then pierced with an iron rod, and the melted substance not yet solidified is allowed to run out. Fine masses of crystals of bismuth and sulphur may be obtained in this way. Many salts do not appear to be capable of crystallizing without holding a certain portion of water in combination, termed *water of crystallization*. Thus, ordinary carbonate of soda has ten equivalents of water united with it. Some crystals part with this water very easily, losing their crystalline form, and falling to powder merely by exposure to the atmosphere. Such salts are called *efflorescent*, in contradistinction to those which absorb water from the atmosphere, which are termed *deliquescent*. Many salts have the property of crystallizing without water of crystallization; others, again, crystallize in different forms, according to the number of equivalents of water they contain. Biorate of soda, or borax, for instance, crystallizes in prisms or octohedra, according as it contains ten or five atoms of water of crystallization. The forms which crystals assume are also influenced by the purity of the solution from which they are crystallized: for instance, iodide of potassium assumes a prismatic form when crystallized from a neutral solution, but if from one containing carbonate of potash, the resulting crystals are cubical. As to the force causing *C.*, we as yet know but little; all we know at present is, that electricity and light both accelerate *C.* If a weak voltaic current be passed through a solution of silica, it will gradually crystallize round the wires; and if camphor be exposed to the light, crystals will form thicker on the most illuminated side.

Crystallize, *v. a.* To form into crystals; to cause to form crystals.

—*v. n.* To be converted into a crystal or crystals; to unite, as the separate particles of a substance, and form a determinate and regular solid.

Crystallogenic, **Crystallogenical**, *a.* Relating, or pertaining, to the production of crystals.

Crystallogeny, *n.* [Gr. *krystallos*, crystal, and *genesis*, to be born.] The science of the production of crystals.

Crystallographer, *n.* One who is versed in crystallography.

Crystallographical, **Crystallographic**, *a.* Relating or pertaining to crystallography.

Crystallographically, *adv.* In a crystallographic manner.

Crystallography, *n.* [Gr. *krystallos*, and *graphō*, to write, to describe.] A description of crystals; the doctrine or science of crystals or crystallization. — A treatise on crystallization. — Although the forms of crystals appear to be infinite, yet, upon carefully considering their axes, angles, faces, and edges, they are found to fall into six well-defined groups, which are distinguished from each other by the relative positions and lengths of their axes. These six groups are again subdivided into

divisions according to the arrangement of their planes with respect to their axes. The subject of *C.* is a very difficult one, and only to be learned by means of an extensive series of models. It will therefore be necessary to treat the matter somewhat cursorily, referring the student to the names given to the various forms of crystals; and to Dana's *System of Mineralogy*, the standard work upon the subject. The six crystalline systems mentioned are: 1. *Regular system*, in which the axes are equal and rectangular. The cube, octohedron, and rhombic dodecahedron are the principal members of this system. 2. *Square prismatic*, in which two of the axes only are equal, all three being rectangular. 3. *Right prismatic*, in which all the axes are unequal, and all rectangular. It may perhaps assist the memory, if it is borne in mind that in each of the above systems the whole of the axes are rectangular, while in the following three the axes are all inclined to each other. 4. *Rhombohedral*, in which the three axes are equal, but not rectangular. 5. *Oblique prismatic*, one axis rectangular to two, but all unequal. 6. *Double oblique*, in which all the axes are unequal, and none rectangular. The forms belonging to different systems shade off gradually into each other. Thus, the cube, by being slightly increased on one of its faces, becomes a square prism; and the square prism, by having one of its sides slightly enlarged, becomes a right prism. Many forms are derived from each other by having slices removed from their angles or edges. Thus the octohedron may be modified into a cube by having its angles gradually sliced away, and into the rhombic dodecahedron by having its edges treated in the same manner; and alum, which crystallizes as an octohedron, is often found crystallized with its edges or angles sliced away, and approaching one or the other of the forms mentioned. See ISOMORPHISM, and POLYMORPHISM.

Crystalline, *a.* [Gr. *krystallos*, and *eidos*, form.] Crystalline; pellucid, like crystal.

Crystallography, *n.* [Gr. *krystallos*, and *typos*, type.] (Photog.) A photographic delineation on glass.

Crystallogogy, *n.* [Gr. *krystallos*, and *logos*, discourse.] (Chem.) The science of the crystalline structure of inorganic bodies.

Crystal Peak, in Nevada, a P. O. of Washoe co.

Crystal Springs, in Mississippi, a vill. of Copiah co., 25 m. S.W. of Jackson.

Crystal Valley, in Wisconsin, a village of Trempealeau co., on Dutch Creek.

Cso'ma de Korös, ALEXANDER, a Transylvanian traveller and philologist, b. about 1790. He was in early life seized by the desire to investigate the origin of the Magyar race, and after a course of study at Göttingen, he went, in 1820, to the East. He visited Egypt and Persia, and spent several years in a Buddhist monastery in Tibet, diligently studying the Tibetan language and literature; imagining he recognized resemblances between the Tibetan and Magyar. He next lived some years in Calcutta, where he compiled his *Dictionary of Tibetan and English*, and a *Grammar of Tibetan*. D. at Darjeeling, as he was setting out on another journey into Tibet, 1842.

Ctenoides, CTENOIDÆANS, *n. pl.* [Gr. *ktenoides*, like a comb.] A name given by Agassiz to one of his orders of fishes, characterized by scales composed of layers with pectinated or toothed posterior margins. These combs, overlapping one another, give a rough feel to the skin; the scales are horny or bony, without enamel. The Ctenoid order includes the following families: *Chetodontes*, *Pleuronectes*, *Percoides*, *Polyacanthes*, *Scienoides*, *Sparoides*, *Scombroidei*, *Aulostomes*.

Ctenolabrus, *n.* (Zool.) A genus of fishes of the family Labridæ, having a denticulated preoperculum, and three spinous rays to the anal fin. The Conner, Blue-perch, or Burgal, *C. Burgall* of the N. Atlantic, 6 to 12 inches long, color generally blue, very abundant on the coast from June to September, is an excellent fish for the table, when fried.

Ctenophoræ, BEROID MEDUSÆ, *n. pl.* (Zool.) An order of *Acalephs*, containing more or less spherical or ovate Jelly-fishes, which have the body built of 8 homogeneous segments, bearing 8 rows of locomotive appendages, more or less distinctly indicated.

Ctesibius, (te-sil'be-us), a mathematician of Alexandria, the inventor of the pump and other hydraulic instruments. Lived in the 2d century B. C.

Cub, *n.* [Probably akin to Icel. *kobbi*, a sea-calf, a seal.] The young of certain quadrupeds, as of the bear and the fox; a puppy; a whelp; as, a bear's cub.

—A young boy or girl; — applied in a contemptuous sense. "Two daughters . . . hut, such two unlicked cubs." — Congreve.

—*v. a.* or *n.* To bring forth a cub or cubs; — hence, to bring forth young, as a woman. (Used contemptuously.) "Cub'd in a cabin, on a mattress laid." — Dryden.

Cu'ba, a large island of the W. Indies, belonging to Spain, and the largest, most flourishing, and important of the Antilles group, — whence its poetical appellation of *Queen of the Antilles*. The figure of *C.* is long and narrow, approaching to that of a crescent, with the convex side looking towards the N.; its W. portion lying between Florida and the peninsula of Yucatan, leaves two entrances into the Gulf of Mexico; the distance from Cape San Antonio the most W. point of the island, in Lat. 21° 54' N., Lon. 84° 57' 15" W., to the nearest point in Yucatan, is 125 m. across; and that from Point Icaicos, the most N. point in the island, in Lat. 23° 10' N., Lon. 81° 11' 45" W., is 49 m. N.E. by E. from Cape San Nicolas Mole in Hayti; and Cape Cruz, in *C.*, is abt. 95 m. N. from the nearest point of Jamaica. The greatest length of the island, following its curve, is about 660 m.; its breadth, which is very irregular, varies from 11 to 135 m.; while the coast-line may be estimated at

1,800 m. Total area (with dependencies), 48,489 Eng. sq. m. The coasts of *C.* are very much indented, and it is surrounded by many islands, keys, and reefs. Notwithstanding the general difficulty of approaching its shores, the island has several excellent harbors, — that of Havana

Fig. 735. — ENTRANCE OF HAVANA.

being one of the best in the world. The land skirting the sea-shore, almost all round the island, is so low and flat as scarcely to be raised above the level of the sea, which greatly increases the difficulty, especially in the rainy season, of communicating with the interior. In the lagoons near the shore, — especially on the N. side of the island, which are filled with sea-water during spring-tides, — sufficient salt is collected for the use of the inhabitants. A cordillera stretches from one end of *C.* to the other, dividing it into two unequal sections; that on the N. side being, for the most part, the narrower of the two. Of the geology little is known beyond what may be found in Humboldt. This cordillera is one great calcareous mass, which rests upon a schistose formation. Its summit presents a naked ridge of barren rocks, occasionally interrupted by more gentle undulations. It attains, in some parts, an elevation of about 7,000 feet, the highest summit being about 7,500 ft. — *Clim.* In the W. half of the island, the climate is such as is to be expected along the N. limit of the torrid zone, presenting many inequalities of temperature from the near neighborhood of the American continent. The seasons are spoken of as the *rainy* and the *dry*; but the line of demarcation is not very clearly defined. The warmest months are July and Aug., when the mean temp. is from 28° to 29° of the centigrade, or from 82° to 84° Fahr. The coldest months are Dec. and Jan., when the mean temp. is nearly 10° Fahr., less than under the equator. During the rainy season the heat would be insupportable but for the regular alternation of the land- and sea-breezes. The weather during the dry season is comparatively cool and agreeable. It never snows in *C.*, but hail and hoar-frost are not uncommon; and, at an elevation of 300–400 ft. above sea-level, ice has been found several lines in thickness, when the N. wind has happened to prevail for several successive weeks. Hurricanes are not so frequent as in Hayti and the other W. India islands, and seldom do much damage on shore. In the E. part of the island, particularly in the neighborhood of Santiago, earthquakes are not unusual. The most severe on record are those which took place in 1675, 1682, 1766, and 1826. — *Zool.* The only indigenous quadruped known in *C.* is the *julia* or *hutia*, shaped like a rat, but from 12 to 18 inches in length, exclusive of the tail; of a clear black color, feeding on leaves and fruits, and inhabiting the hollows and clefts of trees. Its flesh, though insipid, is sometimes eaten. Amphibious oviparous animals, as the crocodile, cayman, manati, tortoise, and *jicotea*, are common; the first on the coast, and the others in the rivers and lagoons. The *perro jibaro* is the domestic dog restored to a state of nature. It becomes fierce and carnivorous, though not so much so as the wolf of Europe; never attacking man until pressed in the chase. Whatever be their original color, they uniformly degenerate into a dirty black, with a very rough coat. In spite of the efforts made to extirpate them, they increase in numbers, and do great damage among the cattle. The domestic cat, called the *gato jibaro*, when it becomes wild, commits similar depredations in the poultry-yard. The most valuable of the domestic animals are the cow and pig. The sheep, goat, and ass are not in such general use, although, of late years, the great jackass of the Spanish peninsula has been introduced with some success for the purpose of breeding mules. The feathered race are remarkable for the beauty of their plumage, but they are far too numerous for separate notice here. The rivers, though not large, are well supplied with excellent fish, as, also, are the bays and inlets. Oysters, and other shell-fish too, are plenty, but of inferior quality, and adhere to the branches of the mangrove trees which surround the coast. Snakes of large size are of rare occurrence, though some have been seen 10 to 12 ft. long, and 7 or 8 inches in diameter. Of insects, the bee is turned to valuable account by the exportation of its wax, and the use made of its honey. The mosquito tribe are troublesome, and the phosphorescent family, as fire-flies, &c., are remarkable for the brilliancy of the colored lights they exhibit. — *Veg. Prod.* The forests of *C.* are of vast extent. Mahogany and other hard woods are indigenous, and several sorts are well suited for ship-building. The palm tribe are as eminent for beauty as utility, while of vines there is great variety: some of such strength as to destroy the largest of the forest-trees in their parasitical embrace. Tropical fruits are abundant and various; of these the pine-apple, and orange and its

varieties, are the most highly esteemed. Of the elementary plants, the *platano*, or plantain, is by far the most important. Next in order come the sweet and bitter *yuca*; the sweet root being eaten as a vegetable and the bitter converted into bread after its poisonous juice has been extracted. The sweet potato, the yam, and other farinaceous roots are also known, although not in such general use as in other of the W. India lands. The maize, or Indian corn, is indigenous, and extensively used; the green leaves for fodder, under the name of *malloja*, and the grain in various forms for man and beast. Rice is cultivated in considerable quantity and a variety of beans, especially the *gurbanzo*. Garden stuffs are scarcely known, except in Havana and other large towns, and there only in the dry season. Agriculture is very little attended to. The raising of sugar constitutes by far the most important branch of industry carried on in *C.*; following next in order, comes tobacco and coffee; and, after the outbreak of the American civil war, the growth of cotton, once an important product of this island, was again resumed, but only to a limited extent, and with no very brilliant success. — *Min.* The pursuit of the precious metals was the first object of the early discoverers; but if gold was found on this island at all, it was probably in washing the sands of some of the rivers, as no traces of the supposed mining operations are now to be found. The gold and silver sent to Spain from this and other of the W. India islands, soon after their discovery and conquest, consisted, most likely, of the accumulations of the natives. The course of the 17th cent., the copper mines near Santiago, in the E. part of the island, were wrought with some success, but were abandoned upwards of 100 years ago, from the imperfect knowledge which then existed of the art of extracting the metal from the ore. When the mines were abandoned, a large quantity of the mineral, amounting to several hundred tons, was left on a spot as worthless; but having been subjected to analysis by a new "English proprietor," it was found to be rich in metal as amply to repay the expense of sending it to England for smelting. In consequence of this discovery, the old workings were explored, and commenced for the purpose of renewing the mining operations on a scale of corresponding magnitude. The *Clara* and *Santa Clara* mines are now worked very successfully. Coal of tolerable quality has been found in the vicinity of Havana. The Cuban coal is highly bituminous, and some places degenerate into a form resembling the pitch lake of Trinidad, which is found in the pitch lake of Trinidad. The ships of the discoverers were repaired with this bitumen, which is often found near the coast in a semi-liquid state, like petroleum or naphtha. Marbles, jaspers of various colors, and susceptible of a high polish, are found in many parts of *C.*, and in its chief dependency, the Isle of Pines. The mineral waters of Diego, Madinga, and Guanabacoa have obtained some celebrity; but with the exception of the last, which within a few miles of Havana, they are difficult access, and, consequently, but little resorted to. — *Ag. and Ind.* The chief agricultural products of *C.*, as ready stated, are sugar, coffee, and tobacco. The *ingenios*, or sugar estates, with large buildings and numerous important industrial establishments of the island, varying in extent from 500 to as much as 10,000 acres. U. States take about 70 or 80 per cent. of the sugar grown in *C.*, the greater part of the remainder passing to Europe. After the "ingenios," the *cafetales*, or coffee estates, are the most important establishments. They vary in extent from 100 to upwards of 1,000 acres, even more in the mountain districts, — the number of hands employed being as high as 100 in the low country, but generally averaging 50 or 60 negroes to 100 acres. The first coffee plantation was established in 1748, the seeds having been brought from San Domingo. Though at one time coffee was sent out from *C.* in enormous quantities, it does not now figure largely in the exports. Tobacco is indigenous to *C.*, and its excellent quality is celebrated in all parts of the world. Estates devoted to its cultivation are scattered over the greater part of the island, but the finest quality of tobacco are those grown in the country west of Havana, known as the "Vuelta abajo." Among the other important establishments of *C.* may be mentioned the numerous cattle farms, cotton plantations, chocolate plantations, and *colmenaries*, or farms devoted to the production of honey and wax. The imports consist mainly of jerked beef from S. America, codfish from Canada, New England, flour from Spain, rice from the Carolinas, Spain, and the East Indies, wine and olive oil from Spain, coal and petroleum from the U. States, besides large quantities of American, British, German, and French manufactures and hardware. Heavy differential duties in favor of goods imported into *C.* in Spanish ships are in force, so that the greater part of the ports arrive in these. Cattle are imported from Florida and Texas. There are no manufacturing industries of importance in the island, except the production of cigars, of which 154,931,131 were exported in 1874. For the same year the total exports were valued at 89,652,514 pesos; the imports at 56,265,315 pesos. Exports of sugar in 1894 amounted to 1,023,719 tons, which 965,524, or nearly 95 per cent. were sent to U. S. The exports of tobacco were 227,000 bbls. During that year 3,181 vessels, of 3,538,539 tons, entered Havana, and other Cuban ports. — Steamers ply between Havana and all the chief ports on the coast and other West India islands. There is also a mail steamship line to Cadiz twice a month, and lines to New York, New Orleans, Baltimore, Southampton, Liverpool, Havre, Hamburg and the ports of Central America.

submarine cable between the island and Florida was laid, in 1867-68, and that to Jamaica in 1870. A third cable, laid in 1871, connects Batabanó to Santiago de Cuba.—*Political Divisions and Government.* As respects the civil jurisdiction, *C.* is divided into 6 provinces or departments, comprising within their limits 166 *partidos*, or counties. These departments have each a capital bearing the same name with itself. The government is vested in a Captain-General, appointed by the mother country, who is supreme military commandant, and also civil governor of the *W.* division of the island. He is assisted by a Council of Administration. The island is represented in the Spanish Cortes by 16 senators and 3 deputies. The remaining provinces have each a governor, who has independent civil power, responsible only to the court of Spain. The island is also apportioned into 6 military divisions, identical in topographical distribution with the 6 civil provinces, the chiefs, or governors, of which are, of course, subordinate to the captain-general. The royal court (*Real Audiencia*), of Puerto Principe, of which the Captain-General is the *ex-officio* president, has the supreme jurisdiction in all civil and criminal affairs. In the principalities there are *Ayuntamientos*, and in the rural districts *Jueces Pedaneos*, who combine the exercise of judicial functions with those of police commissioners.—A bill for the gradual abolition of slavery in *C.* was passed by the Spanish Congress, Jan. 21, 1880, and was promulgated as a law, Feb. 18. This law provided that from the date of its promulgation all slaves from 55 and upwards should become free. Slaves from 50 to 55 were to be liberated on Sept. 17, 1880; from 40 to 45, in 1884; from 35 to 40, in 1886; and from 30 to 35, in 1888. Those under 30 were to be emancipated in 1890. This action was followed, in 1886, by a decree absolutely emancipating all the slaves.—*Education.* The University of Havana was established in 1722 by a pontifical bull of Innocent XIII., which was approved by the Spanish government, Jan. 5, 1729, but it was only in 1863 that Gen. Concha, in connection with the professors, drew up a system of education assimilated to that of Spain. The expenses of education in the higher branches are defrayed from the public revenues and the town councils pay the expenses of primary education.—*Railroads, &c.* Down to a recent period the means of locomotion between the different parts of the island were very deficient. The common roads were, in general, badly constructed, and during the rainy season were for the most part impracticable for wheel conveyances. The long, narrow shape of the island, by lessening the distance from the interior to the seacoast, obviated, in some degree, these difficulties. But down to a comparatively late period, it was customary in most parts for the negroes to be employed in the severe drudgery of carrying produce in baskets on their heads, to and from the estates to the seaports, or to the public highways. During the last forty years, however, this system has been wholly abandoned by the introduction of a very well-planned system of railways. At the commencement of the year 1897 *C.* possessed 28 lines, of an aggregate length of about 1,000 miles. These roads are all controlled by private companies. The principal and first-constructed track runs from Havana to Guines and LaUnion; it was begun as early as Nov., 1835. Another important line, from Cardenas to Macagua, was started in 1833, and a branch from Cardenas to Jacaro, in 1839. The other railroads have been constructed since 1840, and the whole of them afford the most rapid and perfect means of communication to the inhabitants of every important place in the island. The cars on some of the lines are drawn by horses, so that the roads have been built at a comparatively small cost. They have, however, been of the greatest service to the island and may, perhaps, be regarded as the principal cause of whatever extension of cultivation and general prosperity *C.* has enjoyed.—*Principal Towns.* Besides the three leading cities above mentioned, the chief commercial towns are Puerto Principe, Matanzas, Cardenas, Cienfuegos, Guanabacoa, Santo-Espiritu, Guines, Manzanillo, Bayamo and Sagua la Grande, all of which, excepting Puerto Principe, Santo-Espiritu, Guines and Bayamo, are seaports.—*Population.* The population of *C.*, according to the most recent statistical authority (1896), numbers 1,631,000 people, of whom 977,992 are Spanish, 489,249 negroes, 43,811 Chinese, and the remainder other nationalities. There has been a very slow increase of population, growth in numbers being checked by the civil strife that has been so long desolating the finest sections of the unhappy island. This computation of population is of course entirely irrespective of the Spanish military force now stationed in *C.*—*History.* *C.*, or, to use the favorite metaphor, "the richest jewel in the crown of Spain," was discovered by Columbus, Oct. 28, 1492. It was first named *Juana*, then *Fernandina*, and afterwards *Santiago*, and *Ave Maria*. The natives called it *Cuba*, which name has since come into general use. Columbus returned to the island April 29, 1494, and again in 1502. The first Spanish settlement was formed in 1511, and the conquest was completed by Velasquez in 1512. The colonists carried on continual war with the aboriginal inhabitants, who were almost exterminated by 1560. The cultivation of tobacco and the sugar-cane was introduced about 1580. Gen. Lopez having, in spite of prohibitions from the government of the U. S., invaded *C.* at the head of an expedition of American filibusters, May 17, 1850, and again Aug. 12, 1851, was captured by the Spanish authorities and executed at Havana, Sept. 1, 1851. *C.* had long been treated harshly and oppressively and used largely as a mine for the replenishment of the treasury of Spain, while the people of the island were given no voice in their own government. This state of affairs created

intense dissatisfaction, and the country had long panted for liberty, when, upon the receipt of the news of the Spanish revolution, Sept.-Oct., 1868, an insurrection broke out in this colony on the 10th of the last-named month; and on the same day a declaration of independence was issued at Manzanillo and a national junta formed. This revolutionary movement rapidly spread over the whole of the *E.* and central divisions of the island. The insurgents appointed Don Carlos Manuel Cespedes, a native Cuban, their commander-in-chief, and their junta, or provisional government, applied to the U. S. for their recognition as belligerents. In April, 1869, a constituent assembly of the insurgents proclaimed Cespedes president of the Cuban Republic, and decreed the abolition of slavery and the free exercise of all religions. The Spaniards, on their side, prosecuted the war with varying, and on the whole, but indifferent success. Repeated changes were made in the office of Captain-General, and fresh bodies of troops sent from Spain. But guerilla warfare was actively carried on until 1878, when the insurgents disbanded, and on March 1st a proclamation was issued by the Captain-General, granting a general amnesty. The reforms demanded, however, were not granted and three parties continued to exist in the island—the revolutionary separatists, who wanted complete independence; the autonomists, who desired home rule; and the Spanish party, who opposed changes in the existing state of affairs. Under the governmental administration of Premier Sagasta, a scheme of home rule for *C.* was drafted, but it was never carried out, and in February, 1895, a new rebellion began in the province of Santiago, which soon assumed the dimensions of a revolution. The Spanish government at once took vigorous steps for the suppression of this movement, sending during the year an army of some 84,000 men, who, however, proved of little avail, as the insurrectionists refused to meet them in the open field, but pursued a course of guerilla warfare, while yellow fever, the scourge of the island, decimated the unacclimated troops. During the year a number of filibustering expeditions reached *C.* in safety, coming from the U. S. and South America, while one from Costa Rica conveyed the mulatto patriot, Maceo, to the scene of conflict. General Calleja, Governor-general of *C.*, whose army at the opening of the war amounted nominally to some 20,000 troops and a few thousand local militia, earnestly sought to confine the rebellion to the original locality and to put down the insurgents. But in this, despite reinforcements sent him from Spain and the use of a fleet of cruisers and gunboats, he utterly failed, and at the end of March he resigned. He was succeeded by Marshal Martinez Campos, whose success in quelling the preceding insurrection raised great hopes in Spain, and troops were sent him in large numbers. But his ranks were thinned by skirmishes, guerilla attacks, fever and dysentery, and the strength of his army was broken by the need of guarding plantations and railways. The rebellion in consequence steadily gained head. During the summer it proved impossible to prosecute the war with vigor. In the fall Campos formed a strong cordon of troops across the island and sought to sweep the insurgents from west to east. Success in this, however, was checked by the November rains, which brought all active operations necessarily to an end. The troops had gained some successes, but at the end of the year Campos in person suffered a severe repulse, being attacked by a force of 4,000 Cubans. A number of Cuban delegates met in August at Najassa, in Puerto Principe, proclaimed a Cuban republic, with five states, and elected as president, Salvador Cisneros, with a full series of governmental officials. Maximo Gomez was made commander-in-chief of the insurrectionary forces, while Maceo and several others were chosen as subordinate commanders. Najassa was selected as the provisional capital. During December, 1895, the insurgents penetrated the province of Santa Clara, despite all the Spanish forces could do to prevent, and by an engagement fought near Colon on Jan. 5, 1896, they won a position that commanded the overland entrance to Havana. This they were not long able to hold, but their success raised so serious an outcry in Spain against what seemed the dilatory policy of Campos that the ministry felt compelled to recall him on January 19.—(Continued in SECTION II.)

Cu'ba, in Illinois, a post-village of Fulton co.

—A township of Lake co.

Cuba, in Indiana, a post-office of Owen co.

Cuba, in Kansas, a post-office of Republic co.

Cuba, in Kentucky, a village of Graves co.

Cuba, in Michigan, a post-office of Kent co.

Cuba, in Missouri, a post-village of Crawford co.

Cuba, in New York, a post-village and township of Alleghany co.

Cuba, in Ohio, a post-village of Clinton co., about 80 m. S.W. of Columbus.

Cuba, in Tennessee, a post-office of Shelby co.

Cubajiniqualpa, a small town of Guatemala; pop. 2,500.

Cubahat'chee, in Alabama, a creek in Macon co., tributary to the Tallapoosa River.

Cu'ban, *n.* (*Geog.*) A native or inhabitant of Cuba.

—*a.* (*Geog.*) Relating or pertaining to Cuba, or to its people.

Cuba'qua, in Venezuela, a small island of the department of Caracas, on the Caribbean Sea.

Cuba Sta'tion, in Alabama, a P. O. of Sumter co.

Cuba'tion, *n.* [*Lat. cubatio.*] Act of reclining or lying down.

Cub'atory, *a.* Recumbent; reclining; lying down.

Cu'bature, *n.* [*Fr. See CUBE.*] The finding of a cube equal to a solid body; the finding exactly the solid or cubic contents of a body.

Cub'bear, *n.* See ARCHIL.

Cub'bridge-head, *n.* (*Naut.*) A rail or partition drawn across a ship's half-deck.

Cub'by, **Cub'by-hole**, *n.* A den; a narrow, confined place.

Cub'-drawn, *a.* Drawn by cubs.

Cube, *n.* [*Fr.: Lat. cubus; Gr. kubos*, a solid square; probably from some root signifying a solid mass; *W. cub*, a bundle, a heap, a cube.] (*Geom.*) A body having the shape of a die; a solid square; a die; a regular solid body, with six equal square sides, and containing equal angles.

(*Crystall.*) The cube or hexahedron has six square faces or planes, and the three equal axes (printed in bold lines, *Fig. 736*) terminate in the centre of each of the square faces. The planes of squares are symmetrically arranged, so that they are perpendicular to one axis, and parallel to the other two. The crystals have each 6 square faces, with 12 equal edges, and 8 equal angles. Examples of substances which crystallize in the form of the cube, are: common iron pyrites, common salt, or chloride of sodium, &c.

Fig. 736. — CUBE. OR HEXAHEDRON.

(*Arith.*) The product of a number obtained by taking that number three times as a factor; as, 64, obtained from 4 multiplied by 4, multiplied by 4.

—*v. a.* To raise to the third power, by multiplying a number into itself, and the product thus obtained by the same number.

Cube'ba, *n.* [*Fr. cubbe; Hind. kababa.*] (*Bot.*) A genus of plants, order *Piperaceae*. Distinguished by its dioecious flowers being partly covered by sessile bracts, and by its fruits being elevated on a sort of stalk, formed from the contraction of the base of the fruit itself. *C. officinalis*, or Java pepper, a native of Java, yields the berries, called *cubebæ*, which are extensively used in medicine. They have a bitter and aromatic flavor, and contain volatile oil and resin; they are stomachic; and given in a dose of from 1 to 2 drachms in powder, 2 or 3 times a day, have proved curative in certain forms of gonorrhœa.

Cu'bebs, *n. pl.* See CUBEBA.

Cube'-ore, *n.* (*Min.*) Same as PHARMACODERITE, *q. v.*

Cube'-root, *n.* (*Arith.*) A number or quantity which, if multiplied into itself, and then again by the product, produces the cube; or, when twice multiplied into itself, produces the number or quantity of which it is the root. Thus 5 is the cube-root of 125, because $5 \times 5 = 25 \times 5 = 125$.

Cube'-spar, *n.* (*Min.*) Same as ANHYDRITE, *q. v.*

Cub Hill, in Maryland, a post-office of Baltimore co.

Cu'bic, **Cu'bical**, *a.* [*Lat. cubicus.*] Relating to, or having the form or properties of, a cube; that may be or is contained within a cube.

(*Crystal.*) Monometric.

Cubic Equation. (*Algebra.*) An equation which involves the cube of an unknown quantity. A cubic equation is said to be a *pure* one, when it consists of two terms only; one of which is a simple number. Thus $x^3 + c = 0$ is a pure cubic equation. All other cubic equations are said to be *affected*. The most general affected cubic equation can obviously be reduced to the form $x^3 + 3ax^2 + 3ax + a_3 = 0$.

Cubical Parabola. (*Math.*) There are two curves known by this name; one is a non-plane [CUBIC], the other a plane curve. The latter has for its equation $ay = x^3$; it has a point of inflection at the origin, and a cusp at infinity. It is of the third class, and has the origin for a centre.

Cubi'ca, *n.* (*Manf.*) A fine description of shalloon.

Cu'bically, *adv.* In a cubical manner or method.

Cu'bicalness, *n.* State or quality of being cubical.

Cubic-foot, *n.* (*Arith.*) A solid foot.

Cubic-number, *n.* (*Arith.*) A self-multiplying number.

Cu'bicule, *n.* [*Lat., from cubitus*, a bed.] (*Arch.*) Among the Romans, a bed-chamber, tent, or balcony. — *Cubitum*, according to Pliny, was a room furnished with a sofa or bed.

Cu'biform, *a.* Having the form of a cube.

Cu'bile, *n.* [*From Lat. cubitus*, a bed.] (*Arch.*) The ground-work, or lowest course of stones in a building.

Cu'bit, *n.* [*Lat. cubitus*, the elbow, from the custom of leaning on that part of the arm in the recumbent posture at meals; *Gr. kubiton*, the elbow; *Gael. cub*, a bending; *cubach*, bent; *Fr. coude.*] (*Anat.*) The elbow, or bend of the arm; the bone of the arm from the elbow to the wrist; the length of the arm from the elbow to the extremity of the middle finger.

Cubit, (*ku'bit*), *n.* [*Lat. cubitus.*] A measure of length employed by the ancients, and more especially by the Hebrews. It was originally the distance from the elbow to the tip of the middle finger. According to some authorities, there were two cubits in use by the Jews, — the *sacred* and the *common* cubit. The former was 21 inches long, and the latter 18 inches. Calmet, however, states his belief that the second, or shorter *C.*, was not introduced until after the Babylonian captivity. Hence Ezekiel's precaution (*Ezek.* xl. 5), in speaking of the *C.* as a *C.* and a hand-breadth. The exact length of the *C.* is not known; it has been stated to be 1 ft. 9-888 inches, and a hand-breadth 3-684 inches in the tables of measure affixed to several versions of the authorized Bible.

Cu'bita, *n.* (*Med.*) A holster or cushion for the elbow to rest upon, for invalids.

—*a.* Of the length or measure of a cubit; as, a "cubital stature."

(*Anat.*) Pertaining to the cubit, or fore-arm.

Cu'bited, *a.* Possessing a cubit's measure.

Cu'bitus, *n.* [Lat.] See CUBIT.

Cu'bizit, *n.* (Min.) Same as ANALCITE (*q. v.*).

Cu'bless, *a.* Without cubs; as, a *cubless* lioness.

Cub Prairie, in Ill., a former P. O. of Jefferson co.

Cu'bo-cube, *n.* (Algeb.) The 6th power;—64 is the *cubo-cube* of 2.

Cu'bo-cubo-cube, *n.* (Algeb.) The 9th power;—512 is the *cubo-cubo-cube* of 2.

Cu'bo-dodecahe'dral, *a.* Having the joint forms of a cube and a dodecahedron.

Cu'boid, **Cuboid'al**, *a.* [Gr. *kubos*, and *eidos*, form.] Resembling a cube; nearly in the shape of a cube.

Cu'bo-octoh'e'dral, *a.* Having the joint forms of a cube and an octohedron.

Cucamon'go, in California, a post-office of San Bernardino co.

Cuck'ing-stool, *n.* See DUCKING-STOOL.

Cuck'old, *n.* [From It. *cuculo*; Lat. *cuculus*, a cuckoo; Fr. *coucou*, a cuckoo, and *cocu*, a cuckold.] One who is cuckooed; one who is served as the cuckoo serves other birds, viz., by laying its egg in their nest to be hatched by them;—hence, a man whose wife is false to his bed; the husband of an adulteress.

"Why who would not make her husband a cuckold, to make him a monarch?"—*Shaks.*

—*v. a.* To make a man a cuckold by holding criminal conversation with his wife.

"If thou canst cuckold him, thou dost thyself a pleasure, and me a sport."—*Shaks.*

—To render a husband a cuckold by having sexual intercourse with another man.

"That's to cuckold thee before thy face."—*Dryden.*

Cuck'oldize, *v. a.* To make a cuckold.

Cuck'old's-neck, *n.* (Naut.) A knot by which a rope is secured to a spar, the two parts of the rope crossing each other and seized together.

Cuck'oldom, *n.* The act of adultery; the state of being a cuckold.

"It is a true saying, that the last man of the parish that knows of his *cuckoldom*, is himself."—*Arbutnot.*

Cuck'oo, *n.* [Lat. *cuculus*; Fr. *coucou*; Ger. *kuckuk*.] (Zool.) A bird of the family CUCULIDÆ, *q. v.*

Cuck'oo-bad, *n.* (Bot.) See RANUNCULUS.

Cuck'oo-flower, *n.* (Bot.) See CARDAMINE.

Cuck'oo-spit, **Cuck'oo-spittle**, *n.* (Bot.) A spumous dew or exudation found upon the joints of certain plants, as lavender and rosemary.

(Zool.) See CERCOPIDÆ.

Cucui'sas, a town of Venezuela, 28 m. S.W. of Caracas; pop. abt. 6,000.

Cucu'idæ, *n. pl.* (Zool.) The Cuckoo family of birds, order *Scansores*, distinguished by a gently curved, and generally lengthened bill, lengthened tarsi, rather short toes, long and soft tail, with 8 or 12 feathers. To the genus *Coccyzus*, or *Cuculus*, belong the two following migratory species: *C. canorus*, the common European cuckoo, which differs from almost every other bird in not constructing a nest, nor under any circumstances hatching its own eggs, which it deposits in the nests of other birds, as of the hedge-sparrow. The unfledged young have a remarkable instinct, which impels them to unceasing efforts to expel their helpless companions from the nest, which they effect by pushing them in the hollow of their backs to the verge of their nest, and tilting them over, until they at length monopolize all the care and provision of the foster-parent.—The yellow-billed Cuckoo, *C. Americanus*, is thus described by Wilson:—"From the imitative sound of its note, it is known in many parts by the name of the *cow-bird*; it is also called in Virginia the *rain-crow*, being observed to be most clamorous immediately before rain. This species arrives in Pennsylvania, from the South, in April, and spreads over the country, as far at least as Lake Ontario. It leaves us, on its return southward, about the middle of September. Far from sharing the unnatural and proverbial conduct of the European Cuckoo, it builds its own nest, hatches its own eggs, and rears its own young. It is 13 inches long, and 16 inches in extent; the whole upper parts are of a dark glossy drab, with greenish silky reflections; the tail is long; the whole lower parts are pure white; the legs and feet light-blue; the toes placed 2 before and 2 behind, as in the rest of the genus; the bill is long, a little bent, very broad at the base, dusky-black above, and yellow below; the eye hazel, and feathered close to the eyelid, which is yellow."

Fig. 737. — CUCKOO.
(*C. Americanus*.)

Cu'cullate, **Cu'cullated**, *a.* [L. Lat. *cucullatus*.] Hooded; covered, as with a hood or cowl.—Having the resemblance or shape of a hood, as a leaf, or a petal. (Zool.) Applied to the prothorax of insects, when elevated into a kind of ventricose cowl or hood which receives the head.

Cu'culus, *n.* (Zool.) The cuckoo. See CUCULIDÆ.

Cu'cumber, *n.* [Fr. *coucomb*; from Lat. *cucumis*, *cucumeris*, said to be derived from *curvus*, crooked; Ger. *kukumber*.] (Bot.) See CUCUMIS.

Cu'cunifor'm, *a.* [Lat. *cucumis*, and *forma*, form.] Of a curved cylindrical form, like a cucumber.

Cu'cumis, *n.* [See CUCUMBER.] (Bot.) A genus of plants,

ord. *Cucurbitaceæ*. The species *C. sativus*, distinguished by heart-shaped, acuminate pentangular leaves, which are rough with hairs approaching to bristles, and oblong fruit, is a native of the middle and S. of Asia, and has been cultivated from the earliest times. Its fruit, the cucumber, forms an important article of food in its native regions, the Southern States, &c., and is an esteemed delicacy in colder countries, where it is produced by the aid of artificial heat. Many varieties are in cultivation, with fruit from 4 inches to 2 feet in length, rough, smooth, &c. Young cucumbers are much used for pickling, and are called *gherkins*. The *C.* requires a sunny situation and a free, rich soil. To this genus belong many other species valued for their edible fruit, especially the melon, *C. melo*, and the water-melon, *C. citrullus*. See MELON.

Cucur'bit, **Cucur'bite**, *n.* [Lat. *cucurbita*, gourd.] (Chem.) A vessel in the shape of a gourd; but sometimes made shallow, with a wide mouth.

Cucur'bita, *n.* (Bot.) The typical genus of the order *Cucurbitaceæ*. The fruit of

several species are employed as articles of food; thus, *C. ovifera* is the vegetable marrow, or egg-squash (fig. 739), one of our most delicate table-vegetables; *C. maxima* is the red gourd or pumpkin, which, when boiled, tastes like a young carrot; *C. pepo* is the white gourd, a favorite culinary vegetable in most countries; *C. verrucosa* is the warted squash, club-squash, crook-neck squash, &c., long cultivated by the Indians west of the Mississippi; cultivated in our gardens for its numerous well-known varieties of fruit; *C. lagenaria*, the bottle-gourd, is native within the tropics, and often cultivated for the hard, woody rind of the fruit, used for ladles, bottles, &c., as the fruit of the calabash-tree.

Cucurbita'ceæ, *n. pl.* (Bot.) An order of plants, alliance *Cucurbitales*. DIAG. Monopetalous flowers, strictly parietal placentæ and pulpy fruit.—The plants are natives of hot climates in almost every part of the world; they abound in the E. Indies, many occur in Peru and Brazil, and a few are found in Europe and N. America. They are all herbs with tuberous or fibrous roots, which are annual or perennial, and with stems which are generally succulent, and either prostrate or climbing by means of tendrils. The leaves are rough, alternate, and radiate-veined. The flowers are unisexual, monœcious, or dioecious. The calyx is monosepalous, and, in the female flowers, superior. The corolla is monopetalous, four- or five-parted, sometimes fringed, with strongly-marked reticulated veins, perigynous, and occasionally scarcely distinguishable from the calyx. The male or sterile flower has generally 5 stamens, which are epipetalous, and either distinct, or monadelphous, or triadelphous, the anthers being two-celled, usually long and sinuous, rarely straight. Now and then male flowers are found with only 2 or 3 stamens. In the fertile or female flower the ovary is inferior, the style is short, and the stigmas are more or less dilated. The fruit is usually a pepo, as in the cucumber; or, rarely, but a succulent berry, as in the bryony. The seeds are more or less flattened and exalbuminous. An acrid, bitter, purgative principle characterizes the plants of this order, and is especially evident in the pulp surrounding the seeds. In some cultivated species the acridity is scarcely perceptible, and the fruits are edible. 56 genera, including 270 species, have been described.—See CUCUMIS, CUCURBITA.

Cucurbita'ceous, *a.* [From Lat. *cucurbita*, a gourd.] (Bot.) Belonging to the gourd species of plants, as the pumpkin, melon, cucumber, &c.

Cucur'bitales, *n. pl.* (Bot.) The cucurbitale alliance of plants. DIAG. Declinous exogens, with monodichlamydeous flowers, inferior fruit, parietal placentæ, and embryo without a trace of albumen. The *C.* includes the three orders *Cucurbitaceæ*, *Datisceæ*, and *Begoniaceæ*.

Cucur'bitive, *a.* Having the form of gourd-seed.

Cucu'ta, (formerly *Rosario*, or *San José de Cucuta*), a town of S. America, in the Republic of Colombia, prov. Pamplona, on the frontier of Venezuela, 28 m. N. N. E. of Pamplona; Lat. 7° 37' N., Lon. 72° 14' W. The first Congress of Colombia met and formed a republican constitution here in 1820. Pop. abt. 5,000.

Cud, *n.* [A.S. *cud*, from *ceowan*, to chew, *cwith*, the womb; Goth. *quithus*, the belly; Icel. *quidr*, the lower belly; probably allied to Gr. *kutos*, a hollow, from *kuō*, to hold, to contain.] The pannich, stomach, or belly of a ruminating animal.—The food which ruminating animals bring up in portions from the first stomach to be thoroughly masticated or chewed.—A quid of tobacco.

Cud'bear, *n.* A crimson dye prepared from *Lecanora tartarea*.

Cuddalore, a sea-port of British India, in the Carna-

Fig. 738. — CUCUMBER.
(*C. sativus*.)

Fig. 739.
VEGETABLE MARROW.
(*C. ovifera*.)

tic, prov. Arcot, 86 m. S.S.E. of Madras; Lat. 11° 43' 2 N., Lon. 79° 49' E. This is a flourishing place, and h manufactures of cotton and paper.

Cuddapah, [Hind. *cripa*, mercy.] An interior tow of Hindostan, British presidency of Madras, on the Cuddapah River, 507 feet above sea-level, 120 m. N.W. of Madras. Trade. Sugar and jaggery.

Cud'den, *n.* [Gr. *kuddle*, a pig.] A clown; a stupid rustic.

(Zool.) Same as coal-fish. See GADUS.

Cud'dle, *v. n.* [Probably from *coddle*; O. Fr. *cadele* to pamper, to cherish, to make much of.] To cower; to squat; to lie close or snug.

"She cuddles low behind the brake."—*Prior.*

—*v. a.* To hug; to embrace; to fondle; to hold sexual intercourse.

—*n.* A close hug or loving embrace.

Cuddlebackville, in New York, a P.O. of Orange co.

Cud'dler, *n.* One who cuddles another; one who nestles down, or squats.

Cud'dling, *n.* Act or position of lying closely embraced; practice of squatting.

Cud'dy, *n.* [Fr. *cahute*; etymol. uncertain.] A small hut or cabin.

(Naut.) A small cabin in the fore-peak of a ship, used by the sailors. Sometimes also applied to the CABOOSE, *q. v.*—A booby; a bumpkin; a boor; a dolt; a cudden.

Cudgel, (*kufel*), *n.* [W. *cogel*, a truncheon, a cudgel from *cog*, a lump, a mass, a block of wood.] A knob or knotted stick; a short, thick staff or stick, to administer a beating with; a club; a truncheon.

"His surly chief ne'er failed to crack
His knotty cudgel on his tougher back."—*Dryden.*

To cross the cudgels. To forbear a contest;—from the practice of cudgel-players to lay one cudgel over another.

"It is much better to cross the cudgels, or to be baffled in conclusion."—*L'Estrange.*

—*v. a.* To beat with a cudgel; to beat in general.

"Cudgel thy brains no more about it."—*Shaks.*

Cud'geller, *n.* One who uses a cudgel over another.

Cud'gel-proof, *n.* Able to resist a stick or cudgel.

"His doublet was of sturdy huff,
And though not sword, yet cudgel-proof."—*Hudibras.*

Cud'le, *n.* (Zool.) See CUTTLE-FISH.

Cud'weed, *n.* (Bot.) See GNAPHALIUM.

Cud'worth, RALPH, an English philosopher and theologian, b. in Somersetshire, 1617. In 1654 he was appointed master of Christ's College, and in 1678 prebendary of Gloucester. He was a man of great learning and in philosophy a Platonist. His principal work the *True Intellectual System of the Universe*, a defence substantially, of revealed religion against material and atheists. It was translated into Latin by Moshe and has been several times republished. *C.* was a author of a *Treatise on Eternal and Immutible Moral* a continuation of the *Intellectual System*; and several theological works. D. 1688. Lady Masham, the friend of Locke, was the only daughter of *C.* A new edition of great work was published in 1830, with a Life by B. H. Cue, *n.* [Fr. *queue*; Lat. *cauda*.] The tail; the end of a thing; a long roll of hair hanging from the back of the head; a queue; the curl of a wig.—See QUEUE.

—The last words of a speech, which a player, who answers, catches and regards as an intimation to beg as, to give the proper cue.

"And so every one according to his cue."—*Shaks.*

—A catch-word; a hint; an intimation; a short direct

"The motive and the cue for passion."—*Shaks.*

—The part which any man is to play in his turn; his turn, or temper of mind.

"Were it my cue to fight, I should have known it
Without a prompter."—*Shaks.*

—The straight rod used in impelling balls at billiards; and chalk the end of a cue.

—*v. a.* To tie into a cue or tail, as the hair.

Cuen'ca, a walled city of Spain, cap. prov. of same name, on a high mountain, near the confluence of the Júcar and Ilucar rivers, 86 m. E.S.E. of Madrid, 136 S.W. of Saragossa. This city is very ancient, presents many fine architectural remains, and was given to dowry by Ben Abat the Moorish king of Seville, to his daughter Zaida, to Alfonso VI., king of Castile, 1072. *Manuf.* Paper and wool. Pop. 6,700.

Cuen'ca, or RAMBAE, a city of S. America, in Ecua, cap. of a prov. of same name, in a spacious plain, 90 feet above sea-level, and 186 m. S. of Quito; Lat. 56° S., Lon. 79° 12' W. Its houses are mostly built of adobe, or unburnt brick. *Manuf.* Confectionery, chocolate, and hats. Pop. 25,000.

Cuernava'ca, a small town of the Mexican confederacy, 40 m. S. of the city of Mexico.

Cue'ro, in Texas, a town, the cap. of De Witt co., abt. 90 m. S. by E. of Austin. Pop. (1897) abt. 3,000.

Cuer'po, *n.* [Sp.; Lat. *corpus*.] The body.

"Exposed in *cuerpo* to their rage,
Without my arms and equipage."—*Hudibras.*

Cue'vas, a town of Spain, prov. Castellon, 51 m. S. of Almeria; pop. about 4,000.

Cuff, *n.* [Swed. and Goth. *kuffa*, to insult with stripes; Swed. *skuffa*, to push, to shove; Goth. *kaupatjan*, a buffet; Fin. *kopsia*, to smite; allied to It. *sciaffo*, a *koláphos*, a box on the ear.] A blow; a buffet; a stroke; a box.

"He gave her a cuff on the ear."—*Arbutnot.*

—*v. a.* To beat; to strike with the fist, or with talons, wings, as a fowl.

"Were not you, my friend, abused, and cuffed, and kicked
Congr

—To buffet, as by the action of wind and weather.

—*v. n.* To fight; to scuffle.

“Clapping farces acted by the court.

While the peers cuff to make the rabble sport.” — *Dryden*.

Cuff, *n.* [Probably from O. Fr. *coiffe*, Fr. *coiffe*, a hood, coif, lining, as applied to the sleeve; allied to Gr. *kuptō*, Heb. *kaphaph*, to bend, to curve, *kaphal*, to fold, to double.] The part of the sleeve turned or folded back from the hand.

Cuffee, **Cuffey**, *n.* [Etymol. unknown.] A cant term applied to negroes; it is sometimes used by them as a surname.

Cufic, *a.* [From *Cufa*, in Persia.] Relating to inscriptions and coins bearing the *kinji* or Cufic writing, or old Arabic.

Cufi bo'no. [Lat.] Of what use? To what end?

Culo'ma, or **Colo'ma**, in *Cal.*, a town of Eldorado co.

Coinage, (*kwin'ej*), *n.* [From COINAGE.] (*Mining*.) In

Cornwall, Eng., placing of the stamp of the arms of the

duchy of Cornwall on smelted blocks and ingots of tin.

Cuirass, (*kwi-ras'*), *n.* [Fr. *cuirasse*, from *cuir*, Lat.

corium, skin, leather; It. *corazza*, a breastplate.] (*Mil.*)

A breastplate; a covering for the breast; originally, as

the name denotes, of leather, also of quilted linen, cloth,

&c. The *C.* of plate-armor succeeded the hauberk, hac-

queton, &c., of mail, about the reign of Edward III.;

and from that period the surcoat, jupon, &c., which

were usually worn over the coat of mail, began to be

laid aside. From that time too the *C.* or breastplate con-

tinued to be worn, and was the last piece of defensive

armor laid aside in actual warfare. There were cuir-

assiers in the English civil wars, and in the French ser-

vice nearly to the end of the 17th cent.; after this period,

the *C.* was generally laid aside, until it was again em-

ployed by some of Napoleon's regiments, and it is now,

in most European services, worn by some regiments of

heavy cavalry.

Cuirassier, (*kwe-ras-sé'a*), *n.* [Fr.] (*Mil.*) A horse-

soldier armed with a cuirass or breastplate; as, a cui-

rassier of the Imperial guard.

“Cuirassiers all in steel for standing fight.” — *Milton*.

Cuisse, (*kwi'se*), *n.* [Fr. *cuisse*.] (*Mil.*) Armor for

covering the thighs; circular plates of steel, that encir-

cled two thirds of the thigh till they met the knee and

leg defences.

Cuisine, (*kwe-zéen'*), *n.* [Fr.: from Lat. *coquina*.] Cook-

ery; art or manner of cooking. — The kitchen or de-

partment of an establishment where cookery is carried

on; as, chief of the *cuisine* (*chef-de-cuisine*).

Cuisse, **Cuis'sot**, **Cuis'sard**, *n.* [Fr., from *cuisse*,

the thigh.] Same as *CUISS*, *q. v.*

Cuivre, *n.* [Fr.] Copper.

Cuivre, in *Missouri*, a post-office of Audrain co.

Cujas, **JACQUES**, (*kū'zhās*), or, in Latin, *CUJACIUS*, a very

celebrated French jurist, was born at Toulouse in 1520.

He was the son of a tanner, but successfully pursued

knowledge under difficulties, and made himself a great

name. He began lecturing on the Roman Law in 1547,

was chosen professor at Cahors in 1554, and in the fol-

lowing year removed to Bourges, where, with occasional

intervals, he taught for the rest of his life. He was much

persecuted by rival professors, and in the last years of

his life suffered greatly from the distracted condition of

his country. He enjoyed the patronage of Margaret of

Falois, and his fame drew pupils from all parts of Eu-

rope; among them were the critic Joseph Scaliger and

the historian Thuanus. His works fill 10 vols. folio, and

consist of editions of the original works on the Roman

law, with commentaries and expositions, &c. D. 1590.

C'lage, *n.* (*Naut.*) The laying up of a ship in dock,

to be repaired.

C'bertson's, in *Pennsylvania*, a village of Mercer co.

C'breath, in *Georgia*, a village of Columbia co.

C'ideas', *n.* (*Ecl. Hist.*) A religious order, whose

origin is attributed to St. Columba, an Irish monk of

the 6th cent., who evangelized the western parts of Scot-

land, and founded a monastery in Iona. The word is

robably contracted from the Gaelic *Gille De* (or servants

of God), words corresponding to the Latin *Cultores Dei*.

“The dark attired *Culdees*

Were Albyn's earliest priests of God.” — *Campbell*.

C'le-de-four, *n.* [Fr., bottom of an oven.] (*Arch.*)

the arched roof of a niche, on a circular plan.

C'le-de-lamp, *n.* [Fr.] (*Pin. Arts.*) Applied to sev-

eral fanciful decorations, as arabesques.

C'le-de-sac, *n.* [Fr., the bottom of a bay.] A street

alley, having only one entrance and exit.

(*Zoöl.*) Any bag-shaped cavity, or tubular vessel, or

gan, open only at one end.

C'ldrum, in *Minnesota*, a former P. O. of Morrison co.

C'lebra, a sea-port of Costa Rica; Lat. 10° 35' N., Lon.

8° 35' W.

C'lebra River, in Costa Rica, enters the Caribbean

a near the Lake of Chiriqui.

C'lebra, or **PASSAGE ISLAND**, in the W. Indies, a small

and belonging to the Virgin group, off the E. coast of

Porto Rico. Pop. about 400.

C'lex, *n.* (*Zoöl.*) A Linnean genus of insects corre-

sponding to the *Culicidæ*, or Gnat family. See *GNAT*.

C'liacan, Mex. *Huwi Colhuacan*, an interior town

Mexico, State of Chualoa, 105 m. E.S.E. of Cinaloa, and

3 S.E. of El Fuerte. It is a depôt for goods in transit

and from Guaymas. Pop. 4,000.

C'licidæ, *n. pl.* (*Zoöl.*) The Gnat family. See *GNAT*.

C'liciform, *a.* [Lat. *culex*, a gnat, and *forma*, form.]

gnat-shaped.

C'linarily, *adv.* In kitchen fashion; after the man-

ner of cooks or cookery.

C'linary, *a.* [Lat. *culinarius*, from *culina*, a kitchen.]

relating to the kitchen, or to the art of cookery; used

kitchens; as, *culinary* utensils.

Cull, *v. a.* [Fr. *cuellir*; Lat. *colligo* — *con*, and *ligo*, to

gather.] To pick out; to separate one or more things

from others; to select from many.

“Like the bee, culling from ev'ry flow'r.” — *Shaks.*

Cullen, in *New York*, a post-office of Herkimer co.

Cullender, *n.* Same as *COLANDER*, *q. v.*

Cull'er, *n.* One who culls, or who picks or chooses

from many.

Cull'et, *n.* Broken and waste glass, used in the manu-

facture of new glass.

Cullibility, *n.* Same as *GULLIBILITY*, *q. v.*

Cullible, *a.* Same as *GULLIBLE*, *q. v.*

Culling, *n.* Refuse; dross; debris.

Cullion, *n.* [O. Fr. *couille*, *couillon*.] A mean wretch;

a lubberly coward; a poltroon; a cully.

“Such a one as leaves a gentleman,

And makes a god of such a cullion.” — *Shaks.*

(*Bot.*) A bulbous root.

Cull'is, *n.* [Fr. *coulis*.] A strong broth for invalids;

a savory jelly.

(*Arch.*) A channel, groove, or gutter.

Cullo'den, or **Drummos'sie Moor**, a desolate

level table-land in Scotland, 3 m. E. of Inverness, on

which the duke of Cumberland gained a decisive victory

over the Highlanders, in their attempt to replace the

Stuart dynasty on the throne in 1746.

Cullo'den, in *Georgia*, a township of Monroe co.

Cullman, in *Alabama*, a county, organized 1877, from

parts of Blount and Wiustou counties. Cap. Cullman.

Pop. (1890) 13,500.

Culls, *n. pl.* Refuse, or rejected timber.

Cully, *n.* [O. Fr. *couillon*.] The companion or hully

of a courtesan; a person who is meanly deceived, duped,

tricked, or imposed on, as by a sharper, jilt, or strump-

et; one who is bamboozled.

“Yet the rich *cullies* may their boasting spare.” — *Dryden*.

—*v. a.* To deceive; to trick, cheat, or impose on; to jilt.

“A trick to *cully* fools.” — *Pomfret*.

Cully, in *Pennsylvania*, a township of Sullivan coun-

ty.

Cullyism, *n.* State or condition of a cully.

Culm, *n.* [Lat. *culmus*; allied to *culmen*, the top, sum-

mit; *culmen*, a pillar, a column.] (*Min.*) A slaty kind

of anthracite, occurring in Wales. The strata in which

it is found are often called the *culm measures*.

(*Bot.*) The stem of grasses, which is hollow, and has

a peculiar organization.

Culmen, *n.* [Lat.] Top; summit; culmination.

Culmerville, in *Pennsylvania*, a post-office of Alle-

ghany co.

Culmiferous, *a.* [Lat. *culmus*, and *fero*, to bear.]

(*Bot.*) Bearing culms or stalks.

Cul'minant, *a.* Culminating.

Cul'minate, *v. n.* [From L. Lat. *culmino*, *culminatum*,

from Lat. *culmen*, top, summit.] To reach the top or

summit; to be vertical; to come to, or be in, the merid-

ian; to be in the highest point of altitude, as a planet.

“All sunshine; as when his beams at noon

Culminate from th' equator.” — *Milton*.

—To attain to the highest pitch or point of rank, power,

or accomplishment.

—*a.* Growing upward.

Culmination, *n.* Act of culminating; the transit

of a heavenly body over the meridian or highest point

of altitude for the day. — Top; crown; highest point of

honor; power; reputation, &c.

Culnai', a village of Peru, Canta district, in the Andes,

10,000 feet above the sea.

Culpability, *n.* State of being culpable; culpable-

ness; blamableness.

Culpable, *n.* [L. Lat. *culpabilis*, from *culpa*, a fault;

Fr. *culpable*.] Blamable; deserving blame or censure;

blameworthy; censurable; faulty; wrong; criminal;

immoral; sinful; as, a *culpable* act.

Culpableness, *n.* State of being culpable; guilt;

wrong-doing.

Culpably, *adv.* In a culpable or blamable manner.

Cul'peper, in *Virginia*, a N.E. central co.; area, about

673 sq. m. The S. border is washed by the Rapidan,

as is the N.E. by the N. branch of the Rappabannock.

The Hazel River traverses its N. part. Surface, divers-

sified; soil, fertile. Pop. (1890) 13,233. Cap. Culpeper,

formerly known as Culpeper Court House.

Culpeper, in *Virginia*, a pleasant town, cap. of Cul-

peper co. Pop. (1897) abt. 1,650.

Cul'prit, *n.* [Lat. *culpæ reatus* — *culpa*, a fault, and

reatus, the state of impeachment, from *reus*, a party ac-

cused.] The condition of one charged with an offence;

a person arraigned in court for a crime.

“An author is in the condition of a *culprit*; the public are his

judges.” — *Prior*.

—Any person convicted of a crime; a criminal.

Cul'p's Hill, (*BATTLE* OF.) See *GETTYSBURG*.

Culp, *n.* [Fr. *culte*.] Homage; worship; veneration. —

A system of rites established for religious worship.

Cul'ch, (*kul'ch*), *n.* Oyster-spawn.

Cul'ter, *n.* Same as *COULTER*, *q. v.*

Cul'tros'tral, *a.* (*Zoöl.*) Coulter-shaped, as the bill

of the stork, &c.

Cul'tivable, **Cul'tivable**, *a.* Susceptible of til-

lage or cultivation; as, a *cultivable* soil.

Cul'tivate, *v. a.* [L. Lat. *cultivato*, *cultivatum*; Fr.

cultiver, from Lat. *culo*, *cultum*, to till.] To till; to pre-

pare the soil for crops; to manure, plough, dress, sow,

and reap; to labor on, manage, and improve in hus-

bandry; as, to *cultivate* a farm.

—To improve by care, labor, instruction, or study; to

refine and improve by correction of faults, and enlarge-

ment of powers, faculties, or good qualities; to study;

to labor earnestly for the improvement of anything; to

strive or endeavor to make better; as, to *cultivate* the

mind.

“To *cultivate* the wild, licentious savage,

With wisdom, discipline, and liberal arts.” — *Addison*.

—To foster; to cherish; to study exceptionally; to devote

one's special attention and application to; as, to *culti-*

vate an art or science, to *cultivate* a friendship.

—To develop, raise, or produce by tillage and husbandry;

as, to *cultivate* a crop.

Cultiva'tion, *n.* (<

the sea; Lat. $10^{\circ} 27' 52''$ N., Lon. $64^{\circ} 4' 47''$ W. It is the oldest city founded by Europeans in S. America. Diego Castellon commenced it in 1523, and called it New Toledo. It was almost destroyed by an earthquake in 1855. Pop. 8,000.

Cumanaco'a, a town of Venezuela, dep. Cumana; pop. abt. 3,000.

Cum'bal, in the U. States of Colombia, a mountain-peak of the Andes, just N. of the equator. Height 15,620 feet.

Cum'bent, a. [Old Lat. *cumbeo*, *cumbens*.] Lying down; reclined; recumbent.

Cum'ber, v. a. [D. *kommer*, distress, difficulty, grief; Ger. *kümmern*, intensive or frequentative of O. Ger. *kūmjān*, to mourn, complain; *kummer*, trouble, vexation, sorrow; Swed. *bekymra*, to trouble; L. Sax. *quimen*; Goth. *quainon*, to sorrow; allied to Gr. *kinūros*, wailing.] To encumber; to load or crowd; to embarrass; to entangle; to obstruct; to busy; to distract, as with cares.

"The multiplying variety of arguments . . . is not only lost labour, but cumbers the memory to no purpose." — Locke.

Cum'berland, WILLIAM, DUKE OF, the second son of George II., king of England, b. 1721. He, in 1745, commanded the British at the battle of Fontenoy, where they were defeated by the French. In the next year, at Culloden, he defeated Prince Charles Edward Stuart. D. 1765.

Cum'berland, a N.W. co. of England, bounded N. by the Solway Frith and the river Liddel, which separates it from Scotland for 30 m.; W. by the Irish Sea; S. by Westmoreland and Lancashire; and E. by Northumberland and Durham. Area, 1,523 sq. m. The surface is mountainous; Skiddaw attains an elevation of about 3,050 feet. It is watered by the Eden, Eamont, Derwent, Cocker, Caldew, Elk, Liddel, and Irthing; it has numerous lakes, among which are Bassenthwaite, Borrowdale, Buttermere, Derwentwater, and Ullswater. A large portion of this county is devoted to grazing purposes. The mineral products are slate, limestone, coal, and lead; its most important and valuable item, however, is *plumbago*, the finest being procured from Borrowdale, q. v. *Manuf.* Gingham, calicoes, corduroys, sail-cloth, carpets, paper, &c. *Chief towns.* Carlisle, Whitehaven, Penrith, Cockermouth, Keswick, and Workington. Pop. (1891) 266,549.

Cumberland, a peninsula of British N. America, having Davis's Strait on the N.E., and Northumberland Inlet on the S.W.

Cumberland, in Illinois, an E.S.E. co.; area, about 310 sq. m. It is drained by the Embarras River, an affluent of the Wabash. The surface is mostly prairie and timber lands. Soil generally fertile. Cap. Toledo. Pop. (1896) 15,200.

—A post-twp. of Fayette co.;—now called Brownstone.

Cumberland, in Ind., a p.-v. of Marion co.

Cumberland, in Kentucky, a S. co.; area, about 375 sq. m. It is traversed by the Cumberland River. The soil is fertile. Cap. Burkesville.

—A village in the above co.

—A post-office of Wayne co.

Cumberland, in Maine, a S.W. co.; area, about 900 sq. m. It is partly bounded on the N.E. by Androscoggin River, and on the S.E. by the Atlantic Ocean. Soil, fertile. Cap. Portland.

—A prosperous town and township of the above county. Pop. (1890) 1,487.

Cumberland, in Maryland, a city, cap. of Alleghany co., on the Potomac River. It has a large trade, and, next to Baltimore, is the largest city in the State. A few m. W. of the city, upon the summit of the Alleghany, commences the district known as the Cumberland coal region, which extends W. of the Ohio River. Pop. abt. 15,000.

Cumberland, in New Jersey, a S.S.W. co.; area, about 480 sq. m. Delaware Bay washes its S.W. border, and it is drained by the Maurice River and the Cohansey and Tuckahoe Creeks. The surface is level; the soil, E. of the Cohansey, is light and sandy; W. of the creek it is composed of clay and sandy loam. Cap. Bridgeport. Pop. (1895) 49,815.

Cumberland, in North Carolina, a S. central co.; area, about 950 sq. m. It is traversed by Cape Fear River, and two of its tributaries, Little River and Rockfish Creek. The surface is diversified, and the soil fertile. Cap. Fayetteville. Pop. (1890) 27,321.

Cumberland, in Nova Scotia, a N.W. co. Cap. Amherst.

Cumberland, in Ohio, a post-village of Guernsey co., about 80 m. E. of Columbus.

—A village of Licking co., 18 m. E. of Columbus.

Cumberland, in Pennsylvania, a S.E. co.; area, about 545 sq. m. It is bounded on the E. by Susquehanna, and is also drained by the Couedogwinit and Yellow Breeches creeks. The soil is exceedingly fertile, and agriculture is in a very forward state. Cap. Carlisle. Pop. (1890) 47,230.

—A township of Adams co.

—A village of Bedford county; about 100 m. W. by S. of Harrisburg.

—A township of Greene co.

Cumberland, in Rhode Island, a township of Providence co.

Cumberland, in Tennessee, an E. central co.; area, abt. 700 sq. m. It is traversed by Obed's River, and Daddy's Creek. Surface, mountainous. Cap. Crossville. Pop. (1890) 5,376.

Cumberland in Virginia, a S.E. co.; area, about 310 sq. m. It is bounded on the S.E. by the Appomattox River, and partly on the N. by the James River. Surface, diversified; soil, good. Cap. Cumberland Court-House. Pop. (1890) 9,482.

Cum'berland Basin, is the N.E. portion of Chignecto Bay, which communicates on the S.E. with the Bay of Fundy. It is celebrated for its fisheries.

Cumberland Bay, on the N. side of the island of Juan Fernandez, off the coast of Chili. Lat. $33^{\circ} 37'$ S.; Lon. $78^{\circ} 53'$ W.

Cumberland Bay, in New York, a portion of Lake Champlain, extending into Clinton co.

Cumberland Centre, in Maine, a post-village of Cumberland co., abt. 55 m. N.W. of Augusta.

Cumberland City, in Kentucky, a post-office of Clinton co.

Cumberland City, in Tennessee, a post-office of Stewart co.

Cumberland Court-House, in Virginia, a post-village, cap. of Cumberland co., abt. 50 m. W. of Richmond.

Cumberland Ford, in Kentucky, a post-office of Knox co.

Cumberland Furnace, in Tennessee, a post-office of Dickson co.

Cumberland Gap, a narrow pass, separating Kentucky and Tennessee, and important as commanding those States, and as being the line of communication between Richmond and N. Alabama, and the towns on the Mississippi. It was seized by the Confederates early in the civil war. Being evacuated by them in June, 1862, it was occupied by the Nationals, who were compelled to abandon it in September. On Sept. 9, of the following year, it was recaptured by Gen. Burnside.

Cumberland Gap, in Tennessee, a post-office of Claiborne co.

Cumberland Hill, in Rhode Island, a post-village of Providence co., abt. 12 m. N. by W. of Providence.

Cumberland House, in British N. America, a station of the Hudson's Bay Co., on the W. side of Pine Island Lake, in Lat. 54° N., Lon. $102^{\circ} 40'$ W.

Cumberland Iron Works, in Tennessee, a post-village of Stewart co., abt. 55 m. W.N.W. of Nashville.

Cumberland Island, on the E. coast of Georgia, off Camden co. It is 20 m. long, by 1 to 5 m. wide.

Cumberland Mountains, a range of the Appalachian group, extending along the S.W. border of Virginia and the S.E. of Kentucky; and passing across the State of Tennessee into the N.E. part of Alabama. The range has a total length of abt. 50 m., rarely exceeding 2,000 feet in height. It is essentially composed of the same groups of stratified rocks as those of the Alleghany Mountains.

Cum'berland Presbyterians. See PRESBYTERIANISM.

Cumberland River, one of the most considerable tributaries of the Ohio. It rises in the Cumberland Mountains in Kentucky; flows W., then S.W. into Tennessee, then W., and then N.W. into Kentucky again, where it joins the Ohio River. Length, over 600 m.

Cumberland University. See LEBANON, Tennessee.

Cumberland Valley, in Pennsylvania, a township of Bedford co.

Cum'bersome, a. Troublesome; burdensome; embarrassing; vexatious; as, a *cumbersome* duty. — Unwieldy; intractable; unmanageable; as, a *cumbersome* load.

"Clogg'd with his clothes, and *cumber'd* with his years." — Dryden.

Cum'bersomely, adv. In an encumbering manner.

Cum'bersomeness, n. Quality of being cumbersome or encumbering.

Cum'ber-world, n. That which encumbers the world. (R.)

Cum'bo'la, in Pennsylvania, a mining village in Schuylkill co.

Cum'brance, n. An encumbrance; burden; hindrance; impediment.

"Riches . . . the wise man's *cumbrance*." — Milton.

Cumbre, (La.) a principal pass of the Andes, between Santiago, in Chili, and Mendoza.

Cum'brian, n. A native of the county of Cumberland, England, from *Cumbria*, the ancient name of that country.

—a. Relating or pertaining to Cumberland, Eng.; as, the *Cum'brian* burr.

Cum'brian Mountains, a great knot of mountains, abt. 50 m. in length and breadth, in the N.W. of England, occupying parts of Cumberland, Westmoreland, and Lancashire. This tract is unsurpassed in the British Isles for picturesqueness and beauty, and is much frequented by tourists. Its highest summits are Fell Pike, 3,166 feet; and Snaefell, 3,100 feet.

Cum'brous, a. Burdensome; unwieldy; impeding; clogging; obstructive.

"He sunk beneath the *cumbrous* weight." — Swift.

—Oppressive; vexatious; confused; jumbled.

"The *cumbrous* elements, earth, flood, air, fire." — Milton.

Cum'brously, adv. In a cumbrous manner.

Cum'brouness, n. State of being cumbrous or oppressive.

Cum'frey, n. (Bot.) See COMFREY.

Cum'in, n. See CUMINUM.

Cum'ing, in Nebraska, a N.E. co., area, abt. 400 sq. m. It is traversed by the Elkhorn River, and the Plum and Pebble creeks. The surface is undulating prairie and timber lands, and the soil fertile. County-town, West Point.

Cum'ing City, in Nebraska, a post-village of Washington co., about 30 m. North North West of Omaha City.

Cumin'ic Acid, n. (Chem.) An organic acid, formed when oil of cumin is added to fused hydrate of potash. It crystallizes in colorless plates.

Cum'minum, Cum'in. [Lat. *cuminum*; Ar. *gamoun* Fr. *cumin*.] (Bot.)

A genus of plants, order *Apiaceae*. The only species, *C. cyminum*, is a dwarf, fennel-looking plant, cultivated in the S. of Europe and Asia Minor for its fruits or seeds, which are hot and aromatic, like those of the caraway and anise. The essential oil of Cumin seed is a mixture of a hydrocarbon termed *cymol* ($C_{10}H_{14}$), and of an oxyhydrocarbon called *cuminol* or *hydride of cūmyl* ($C_{10}H_{12}O$).

Cum'ming, JOHN, a Scottish divine and popular preacher of the Scotch Church in Crown Court, Covent Garden. London; b. in Aberdeenshire, 1810. He is author of numerous works chiefly directed against the Roman Catholic Church. The principal are his *Apocalyptic Sketch*, *Lectures on the Parables*, *Voices of the Night*. D. 1881.

Cum'ming, in Georgia, a township and village, cap. Forsyth co., on Vickery's Creek.

Cum'ming, or DOUBLE WELLS, in Georgia, a post-village of Warren co., about 57 m. W. of Augusta.

Cummings, in Pennsylvania, a township of Lycoming co.

Cum'ming's Mill, in Tennessee, a village of Jackson co.

Cum'ming's Point, in S. Carolina, the N. extremity of Morris Island, at the entrance of Charleston harbor, about 1 m. S.S.E. of Fort Sumter.

Cum'mingsville, in Mississippi, a village of Iwamba co.

Cum'mington, in Massachusetts, a post-village a township of Hampshire co.

Cum'mington, in Illinois, a village of Macoupin co.

Cum'mington West Village, in Massachusetts, a post-village of Hampshire co.

Cum'min's Creek, in Texas, enters the Colorado River from the N. near Columbus.

Cum'min's Creek, in Texas, a former P. O. of Ellis county.

Cum'minusville, in Ohio, a village of Hamilton county.

Cum'minsville, in the province of Ontario, a village of Halton county.

Cum'mu, or CUMMU, in Pennsylvania, a township of Berks county.

Cum'shaw, n. (Com.) A benefaction; a gift of money as a bonus. (Used in China.)

—v. a. To make a money present to; as, to *cumshaw* a ship's purser.

Cum'ulo-cir-ro-stratus, n. (Meteor.) The rain-cloud or nimbus seen round the sun before rain.

Cum'ulate, v. a. [Lat. *cumulo*, *cumulatus*, from *cumulus*, a heap.] To form a heap: to heap together.

"Mighty shoals of shells, bedded and *cumulated*." — Woodward.

Cum'ulation, n. Same as ACCUMULATION, q. v.

Cum'ulatist, n. One who accumulates, heaps, or collects together.

Cum'ulative, a. Composed of parts in a heap; forming a mass. — That augments by addition; that is added to something else.

Cum'mulose, a. Possessing heaps; composed of heaps.

Cum'mulo-stratus, n. (Meteor.) See CLOUD.

Cum'mulus, n. (Meteor.) See CLOUD.

Cun, v. a. (Naut.) See COX.

Cunab'ula, n. pl. [Lat., cradles; Fr. *cunables*.] (Bibl.)

A term applied to the copies now existing of the printed books, or to such as were printed in the 17th century.

Cunax'a, a town of Assyria, where Cyrus the young was defeated by his brother Artaxerxes, B. C. 401.

Cuncta'tion, n. [Lat. *cunctatio*.] Delay; procrastination; dilatoriness.

"Celerity should always be tempered with *cunctation*." — Bracton.

Cuncta'tor, n. [Lat.] One who dallies, delays, or procrastinates; an idler; a sluggard.

"Being unwilling to discourage such *cunctators*." — Hamlet.

Cund, v. a. To give notice to. (O. and R.)

"A balker . . . who *cundeth* the master of each boat." — Carroll.

Cundinamar'ca, in the U. States of Colombia, a central dep. containing the cap. of the republic, Bogotá. pop. 600,000.

Cu'neal, a. [Lat. *cuneus*, a wedge.] Having the form or appearance of a wedge; relating to a wedge.

Cu'neate, **Cu'neated**, **Cu'neatie**, a. (Zool. and Bot.) Applied to an animal, or part, or leaf, &c., when their longitudinal diameter exceeds the transverse, and narrows gradually downwards.

Cu'neiform, **Cu'neiform**, (ku-ne'e-form), n. [Lat. *cuneus*, a wedge, and *forma*, form; Ger. *keilförmig*.] name given to the inscriptions found on old Assyrian, Babylonian, and Persian monuments, from the characters being formed like a wedge. This species of writing is called *cuneiform*.

Fig. 740. — CUMIN, (*C. cyminum*).
a, the flower; b, the fruit or seed.

as it is the simplest, so it is the most ancient of which we have any knowledge. It is so called from the letters being composed of parts resembling a wedge, a nail, or an arrow-head. It is found carved in rocks and sculptures, or stamped on bricks and tiles; and is met with on the ancient monuments of Persepolis, and other cities of the Persian empire, among the ruins of Babylon and Nineveh.

Fig. 741.

CUNEIFORM CHARACTERS ON AN ASSYRIAN BRICK.

and even in Egypt. It appears to have been first employed in Babylonia and Egypt, and to have subsequently spread to Media and over the Persian empire. There are three distinct alphabets or kinds of *C.* writing, and which are mostly found together in parallel columns, being translations of each other. The most ancient of these is the Babylonian-Assyrian, which consists of a great number of characters; this is the one which has given most trouble to philologists, and in which least progress has been made. The second of these is called the Median, which is a modification of the first, and consists of about 160 characters. The most recent is the Persian, which consists of only 39 to 44 letters. It is much more refined than the others, and the forms are much less complicated. The letters here are all very distinctly formed, none being at all doubtful, and the words are separated from each other by an oblique stroke. This language is believed to be the original of the modern Persian, and to be nearly allied to the Sanskrit. There is every reason to believe that the employment of the *C.* character originated in Babylonia, while the system of writing to which it was adapted is of very remote origin. Much progress has already been made in deciphering these ancient records, with the result that much light has been thrown on the early history of the world. The first accounts of the *C.* characters were brought to Europe about the beginning of the 17th cent., and some time afterward imperfect copies of them were published. The first publication of a connected inscription was made by Le Bruyn at Amsterdam, in 1714; and subsequently Niebuhr published copies of some which he had found at Persepolis and elsewhere, and which were more accurate than any that had appeared before. Still, for long after this, nothing was done towards the deciphering of the language. Many, indeed, were of opinion that they belonged to no language; that they were mere ornaments carved at the caprice of the architect. &c. Grotefend, of Hanover, was the first who made any progress in the deciphering of these characters, and brought the result of his labors before the Academy of Göttingen in 1802. Since that time there have been many able and active laborers in the field and the reading of cuneiform inscriptions, even those of very remote date, has become comparatively easy. See BABYLONIA, &c.

Cunette', *n.* [Fr.] (*Fort.*) A narrow ditch in the middle of a dry ditch, serving as a drain, or, if filled with water as an obstacle to the enemy.

Can'ha, a town of Brazil, about 120 m. E.N.E. of São Paulo. Pop. abt. 4,000.

Cuni'la, *n.* [Lat. penny-ryal.] (*Bot.*) A genus of plants, order *Lamiaceae*. The dittany, *C. mariana*, is a perennial herb, 1 to 2 feet high, growing in rocks and in dry woods from New York to Georgia and Arkansas. Its corolla nearly twice as long as the calyx, is a pale-red color. The herb is delightfully fragrant, and used in febrifugal infusions.

un'ning, *a.* [A. S. *cunnan*, *connan*; Ger. *kennen*, to know; Goth. *kunanan*, allied to Sansk. *kan*, to shine. Knowing; skillful; experienced; well instructed; wrought with skill; learned. — Artful; crafty; astute; witty; subtle; designing; deceitful; full of tricks and stratagems. — Performed with skill or ingenuity; ingenious; rare; curious.

"An altar, carved with cunning imagery." — Spenser.

—Revealing, exhibiting, or expressing ingenious, dexterous, or striking qualities or characteristics; as, a *cunning* contrivance.

—*n.* Faculty or act of using stratagem to accomplish a purpose; deceitfulness or deceit; fraudulent skill or dexterity; craft or craftiness; subtlety; artifice.

"Discourage cunning in a child; cunning is the ape of wisdom." — Locke.

un'ningham, ALLAN, a popular English novelist and biographer, b. in Dumfriesshire, 1785. He is author of a *Memoir of Burns*; several lyric *Poems and Ballads*; the novel of *Paul Jones*; *The Lives of British Painters, Sculptors, and Architects*, &c. D. 1842.

Cun'ningham, in *Pennsylvania*, a former post-office of Clarion co.

Cunningham's, in *Texas*, a former P.O. of Bastrop co.

Cunningham's Island, in *Ohio*, near the W. end of Lake Erie, constituting a part of Ottawa co.

Cunningham's Mills, in *Pennsylvania*, a village of Mercer co.

Cunningham's Store, in *N. Carolina*, a post-office of Person co.

Cun'ningly, *adv.* In a cunning manner; craftily; with artful deceit.

Cun'ning-man, *n.* A man who professes fortune-telling; or, to instruct how to recover lost or stolen property.

"I attack the cunning-man for plunder." — Hudibras.

Cun'ningness, *n.* Slyness; deceitfulness; artfulness; craft.

Canonia'ceae, *n. pl.* (*Bot.*) An order of plants, alliance *Saxifragales*. *Diag.* Distinct styles, and opposite leaves with large interpetiolar stipules. — They are trees or shrubs, natives of S. America, the Cape, the E. Indies, and Australia. They are nearly allied to the *Saxifragaceae*. Most of them have astringent properties. There are 22 genera and 100 species.

Cuntline, (*kunt'lin*), *n.* (*Naut.*) The space between the bulges of two casks, stowed side by side. Where one cask is set upon the *C.* between two others, they are stowed *bilge and cuntline*.

Cup, *n.* [A. S. *cop*; Fris. and D. *kop*; Ger. *kopf*; Lat. *cupa*, a tub, a cask; W. *cub*, from *cw*, a roundness, a concavity; Fr. *coupe*.] A small vessel to drink out of; a chalice; a goblet; as, a china cup.

"Life's enchanted cup but sparkles near the brim." — Byron.

—The liquor contained in a cup, or that it may contain; a draught; a bumper; as, Moselle-cup.

—*pl.* Social entertainment in drinking; a drinking-bout; a jollification; as, he is good-tempered in his cups.

"Flowing cups pass swiftly round." — Lovelace.

—That which is to be received or endured; a draught; — hence, by implication, sufferings; afflictions; good received; blessings or favors.

"And taste of sorrow's cup." — Gascoigne.

(*Surg.*) A glass vessel used for drawing blood; a cupping-glass.

—Anything hollow or concave like a cup; as, the cup of the knee, the cup of a flower.

"In much the same manner as an acorn in its cup." — Woodward.

Cup and ball, (*Games*.) A child's toy, consisting of a cup attached to a wooden or ivory handle, and a ball; the latter to be thrown up and caught in the cup. — *Cup and can*. Familiar companions; boon associates; — the can being the large vessel out of which the cup is filled, and to which it is a constant companion.

"Swear he's a most facetious man."

"That you and he are cup and can." — Swift.

—*v. a.* To supply or furnish with cups of liquor.

"With thy grapes our hairs be crown'd."

"Cup us till the world go round." — Shaks.

(*Surg.*) To apply a cupping-glass to procure a discharge of blood from a scarified portion of the body.

"They bleed, they cup'd, they purg'd; in short, they cur'd." — Pope.

Cupa'nia, *n.* [In honor of the Italian botanist Cupani.] (*Bot.*) A genus of plants, order *Sapindaceae*. The species *C. sapida* flourishes in the W. Indies, and is in some respects a valuable and interesting tree. The distilled water of the flowers is used by the negro women as a cosmetic, and the succulent, slightly acid arillus of the seed is eaten for dessert. The fruit containing these seeds is commonly known as the *Akee*-fruit.

Cu'par-Fife, a town of Scotland, cap. of Fifeshire, 10 m. W. of St. Andrew's, on the Eden. *Manuf.* Linen. Pop. 8,600.

Cup'-bearer, *n.* An officer of state, formerly attached to a monarch's household, who attended at the royal table to serve with wine; one who attends to the filling of cups or glasses at a revel or feast; as, Gaunymede, the cup-bearer of Jupiter.

Cupboard, (*kup'urd*), *n.* [*Cup*, and A. S. *bur*, a bower, a receptacle.] A receptacle or closet for holding cups, crockery, &c.; a small case or inclosure in a room, with shelves, destined to receive cups, plates, dishes, and the like.

Cupboard-courtship, *cupboard-love*. Love or attentions paid with a view to a regale from the cupboard; as, a policeman's *cupboard-courtship*.

To cry cupboard. To feel the pangs of hunger; to express a demand for food.

Cu'pel, **Cop'pel**, *n.* [Lat. *cupella*, from *cupa*, a tub, a cask; Gr. *kupellon*, a big-bellied drinking-vessel, dim. of *krupt*, a hole, a hollow; Fr. *coupeille*.] A small cup generally made of bone-ashes, used for extracting base metals from gold and silver. The compound, on being heated in the cupel, loses the base metals by their becoming oxidized, and sinking into the cupel. See ASSAYING.

—*v. a.* To refine by means of a cupel.

Cu'pel-dust, *n.* Powder used in refining metals.

Cupella'tion, *n.* The process of refining gold, silver, and some other metals in a cupel, or by scarification. — See ASSAYING.

Cup'ful, *n.*; *pl.* **CUPFULS**. The quantity that a cup will contain.

Cup'gall, *n.* A description of gall found on oak-leaves.

Cupi'ea, in *Colombia*, a village and sea-port on a bay of the same name, near the entrance to the Bay of Panama. Lat. 6° 40' N., Lon. 77° 50' W.

Cu'pid, *n.* [Lat. *cupido*, from *cupido*, desire.] *Myth.* The Roman name of the god of love. Cicero speaks of three divinities under this appellation (*De Nat. Deor.*

iii. 23); but the one usually meant when spoken of without any qualification was the son of Mercury and Venus. He is generally represented as a beautiful child with wings, blind, and carrying a bow and quiver of arrows. See EROS.

Cupid'ity, *n.* [Lat. *cupiditas*, from *cupido*—*cupio*, to long for, to desire.] An eager desire or longing to possess something; an inordinate or unlawful desire of wealth or power; hankering; avarice; covetousness; lust of gain.

Cup'-moss, *n.* (*Bot.*) See CLADONIA.

Cu'pola, *n.* [It. *cupola*; Fr. *coupole*, from *coupe*, a cup.] (*Arch.*) The hemispherical roof which covers a circular building; a hemispherical vault on the top of a building, adorning the round top of a structure. See DOME.

—The round top of a furnace:—sometimes the furnace itself.

Cup'per, *n.* A scarifier: one who uses a cupping-glass.

Cupping, (*kup'ping*), *n.* From the cup-like form of the glasses employed. (*Surg.*) The application of cupping-glasses, from which the air has been previously expelled, to the skin, with the view of attracting blood to the part, and, if necessary, abstracting it. *C.* was practised by the ancients, and is frequently resorted to in the present day. In performing the operation, the part is first washed with warm water, in order to promote the flow of blood to it;

and then, a small bell-shaped glass, from which the air has been partially expelled by holding it for an instant over the flame of a spirit lamp (fig. 742), is immediately applied to the spot, and the usual amount of atmospheric pressure on the part being thus diminished, the blood flows towards it, producing a distention of the blood-vessels and an elevation of the surface. This is called *dry-cupping*, and is frequently of great service in removing certain kinds of pain. Several glasses may be used. Frequently also an air-pump is used for attracting blood. The glass is readily removed by inserting the nail of the finger between the edge of it and the skin, so as to admit the air. When it is intended to abstract blood, the *C.*-glass is removed as soon as the part is sufficiently swollen, and the scarificator applied to it. This instrument contains a number of lancets (usually 10 or 12), which by touching a spring, are made to inflict a corresponding number of wounds, the depth of which may be regulated by the operator. Immediately on the wounds being made, the *C.*-glass is applied, exhausted as before, and the blood allowed to flow into it until a sufficient quantity has been extracted. If the blood coagulates, or the glass be full, it should be carefully removed, the part sponged with warm water, and the glass again applied to it. *C.* is preferable to any other method of blood-letting in many kinds of inflammatory diseases.

Fig. 742.

EXHAUSTING THE AIR FROM A CUPPING-GLASS.

Cupping-glass, *n.* See CUPPING.

Cu'preous, *a.* [Lat. from *cuprum*, copper.] Coppery; consisting of or resembling copper.

Cupres'sus, *n.* [From the island of Cyprus, where the cypress is very abundant.] (*Bot.*) A gen. of plants, order *Pinaceae*. The White Cedar, *C. thyoides*, is a tree, 40 to 60 feet high, quite common in the Middle States. It usually occurs in swamps, which it densely and exclusively occupies. The leaves consist of short, minute,

Fig. 743. — WHITE CEDAR.

(*Cupressus thyoides*.)

evergreen scales, covering the finely divided branchlets, in four imbricated rows, and each one furnished with a minute gland or tubercle on the back. The wood is white, fine-grained, and wonderfully light, soft, and durable. Used in the manufacture of shingles, pails, fences, &c. Posts made of this cedar it is said will last 50 years.

Cu'pric Acid, *n.* (*Chem.*) This acid never occurs in a separate state. When finely divided copper is fused with nitre and hydrate of potash, a cuprate of potash is formed, which is an exceedingly unstable salt, easily decomposed with potash, oxygen, and copper.

Cupriferous, *a.* [From Lat. *cuprum*, and *ferre*, to bear.] Containing or yielding copper; as, *cupriferous* ore.

Cu'prite, *n.* (*Min.*) The red oxide of copper, which is also known as octohedral copper ore, from the form of its crystals.

Cu'proid, *n.* [Lat. *cuprum*, and Gr. *eidos*, form.] (*Crysalis*.) A solid related to a tetrahedron, and contained under twelve equal triangles.

Cuproplumbite, *n.* (*Min.*) A double sulphide of lead and copper, found in Chili in granular masses of a lead-gray color, with a metallic lustre, and a cubic cleavage.

Cup'-rose, *n.* A familiar name for the poppy.

Cupulate, *a.* Cupuliferous.

Cupule, *n.* [Lat. *cupula*.] (*Bot.*) The cup or husk of the acorn and similar fruits, forming a sort of involucre.

Cupuliferæ, *n. pl.* (*Bot.*) The same as CORYLACEÆ. *q. v.*

Cupuliferous, *a.* [From Lat. *cupula*, and *ferre*, to bear.] Possessing a cupule.

Cup'-valve, *n.* (*Mach.*) The cup-valve for a steam-engine resembles a conical valve, made to fit a cover in the form of a vase, or of the portion of a sphere.

Cur, *n.* [Belgic, *korre*, a country-house dog; W. *corgi*, *cor*, a dwarf, and *ci*, a dog.] A dog that snarls or growls, but lacks the courage to bite; as, a mangy *cur*.—A surly, snarling, contemptible person.

"What would ye have, ye curs?"—*Shaks.*

Cur'a, a town of Venezuela, about 45 m. S.W. of Caracas; pop. about 4,500.

Cur'able, *a.* That may be healed or cured; admitting a remedy; as, a curable disease.

Curability, *n.* State of being curable, or susceptible of cure.

Cur'ableness, *n.* Curability; possibility to be healed.

Curaco'a, CURAÇAO, CURAZOA, (*koo-ra-sô'*) a group of small islands in the West Indies, situated near the N. shore of Venezuela, in the Caribbean Sea. They consist of Curacoa, Bonaire, Aruba, and Little Curacoa. Chief town, Willemstad, on the island of C., one of the handsomest towns in the W. Indies; Lat. 12° N., Lon. 69° W. These islands depend upon rain for water. The coasts, on the whole, are difficult of access, the principal bay being that of St. Anna, on which Willemstad stands. The soil in many places is arid and unproductive. Among the exports of C. may be noticed maize, beans, and other kinds of pulse; cattle, salt, and madder. C. chiefly owes its prosperity to its commerce with the neighboring islands and coasts. In 1827 it became a free harbor. The island was discovered by Spain in 1527; taken from that country by the Dutch in 1634; conquered by the English in 1807; and restored to Holland in 1815. Total pop. 20,844.

Curacoa, (*koo-ra-sô'*) a sweet and agreeable liqueur, obtained by digesting orange-peel in sweetened spirits, and flavoring with cinnamon, and cloves or mace. It is made in great perfection by the Dutch in the islands of Curacoa, from which it derives its name. The spirits employed in its manufacture are usually reduced to nearly 5; under proof, and each gallon contains about 3½ lbs. of sugar. C. varies in color; the darker kind being produced by digesting in it powdered Brazil-wood, and mellowing the color by caramel or burnt sugar.

Cur'acy, **Cur'ateship**, *n.* Office or employment of a curate; a benefice held by license from a bishop.

Curaray, in Ecuador, a river rising in the Andes, 65 m. S.S.E. of Quito, and joining the Napo River 87 m. below San Miguel.

Cur'arine, *n.* (*Chem.*) An alkaloid contained in Curara, the Ourari, Wourari, or Arrow Poison of the South American Indians.

Curasow, *n.* (*Zoöl.*) See PENELOPIDÆ.

Cur'ate, *n.* [Lat. *curator*, he who takes charge of, or *curatus*, careful, anxious, from *curo*, to care for.] One to whom the cure or care of souls is committed; a clergyman who holds a curacy.

—In the English Church, a clergyman hired to perform the duties of a rector or vicar.

Cur'ateship, *n.* See CURACY.

Cur'ative, *a.* Relating to the cure of diseases; tending to cure; as, a curative remedy.

Curator, *n.* [Lat.] In a general sense, signifies a person who is appointed to take care of anything. Among the ancient Romans, there were officers in every branch of the public service, to whom this appellation was given; thus we read of *Curatores aquarum, frumenti, viarum, operum publicorum, Tiberis*, &c.; i. e., persons who distributed corn, superintended the making of roads and the public buildings, or were conservators of the rivers, &c.—In learned institutions, the officer who has charge of libraries, collections of natural history, &c., is frequently styled C.

(*Civil Law*.) The guardian of a minor who has attained the age of fourteen. Before that age, minors are under a tutor. The guardianship of persons under various disabilities, and of the estate of deceased or absent persons and insolvents, is also committed to a C.

Curatorship, *n.* Office or vocation of a curator.

Curatrix, *n.* [Lat.] A female who teuds, cures, or heals.

Curb, (*kerb*), *v. a.* [Fr. *courber*, from Lat. *curvo*.] To bend the will, or to the will of; to control; to restrain; to check; to hold back; to confine; as, to curb one's temper.

"Where pinching want must curb thy warm desires."—*Prior*.

—To guide or restrain with a curb; as, to curb a horse.—To supply with a curb, as a pavement, well, &c.

—*n.* [Fr. *courbe*.] That which curves, bends, or keeps in check; restraint; check; hindrance.

"By these men, religion, that should be the curb, is made the spur to tyranny."—*Denham*.

—Part of the bit of a horse's bridle which serves to guide, restrain, or manage him.

"Nor reins, nor curbs, nor threat'ning cries they fear."—*Dryden*.

—A curb-stone.—A stone frame-work erected round the mouth of a well.

(*Farricry*.) A hard and callous tumor, running along the inside of a horse's hind hoof.

Curb'less, *a.* Unrestrained; without a curb or check.

Curb'-plate, *n.* (*Arch.*) The wall-plate of a circular or elliptical roof or dome;—the wall-plate of a skylight; the plate which receives the upper rafters of a curb-roof.

Curb Roof, *n.* (*Arch.*) A roof in which the rafters, instead of continuing straight down from the ridge to the walls, are at a given height received on plates;

Fig. 744.—CURB ROOF.

which, in their turn, are supported by rafters less inclined to the horizon, whose bearing is through the medium of the wall plates, directly upon the wall. It presents a bent appearance, as in the diagram (fig. 744), whence it derives its name; it is also called the *mansard* roof, from the name of the celebrated French architect who very frequently resorted to its use.

Curb'-stone, **Curb**, *n.* The line of stoue-work which borders the footpath of a road. It is generally made of a hard durable stone, such as granite.

Curculio, *n.* **Curculionidæ**, *n. pl.* [Lat., a weevil.] (*Zoöl.*) A genus and family of snouted coleopterous insects, including the Diamond beetles and other splendidly colored species; as well as the Corn and Nut weevils, and a variety of others scarcely less destructive to grain, fruit, and vegetable products in general. The most important have been described under their genera. (See BRUCAI and CALANDRA; others will be found under their respective names.) We notice only here, as typical of the genus Curculio, the Clover-weevil, *C. apricane*, which often does much injury to fields of common red clover. It lays its eggs among the flowers, and the little grubs make their way through the calyx into the pod.

Cur'cumine, *n.* (*Chem.*) The coloring matter of *Curcuma longa*. It is nearly insoluble in water, but dissolves in alcohol. Its yellow color is changed to brown by alkalies, which leads to its use in the laboratory as a test of alkalinity.

Curc'umo, *n.* [Ar. *curkum*.] (*Bot.*) A genus of plants, ord. Zingiberaceæ. The dried tubers or rhizomes of *C. longa* constitute the turmeric of the shops. Turmeric is extensively cultivated in almost every part of India, being employed as a condiment by the natives. It forms the principal ingredient of curry-powder; giving to that compound its peculiar odor and bright yellow color. It is used for dyeing yellow, and for making turmeric-paper; which is used as a test for free alkalies, being turned by these from a yellow to a reddish-brown color. As a medicinal agent, turmeric is a mild aromatic. The rhizomes of another species, *C. angustifolia*, contain much starch, which, when extracted, forms East India arrow-root, or Curcuma starch.

Curd, *n.* [Ir. *cruth*, curdled milk, allied to Gr. *kruos*, icy cold, *kruōdēs*, icy, chill, and Lat. *cruor*; Eng. *gore*, with a notion of the curdling, congealing effects of cold; Scot. *cruds*; W. *crwd*, a round lump.] Milk formed into lumpy masses, by coagulation; the thickened part of milk which is formed into cheese; as, curds and whey.—The coagulated part of any liquid.

—*v. a.* To curdle; to congeal; to coagulate.

—*v. n.* To disintegrate into curds and whey.

Curd'iness, *n.* State of being curdy.

Curd'le, *v. n.* (Sometimes written CRUDLE.) To change into curds, as milk.

"Sip round the pail, or taste the curdling cheese."—*Thomson*.

—To congeal; to coagulate, or concrete.

—*v. a.* To change into curds, as milk.

"There is in spirit of wine some acidity, by which brandy curdles milk."—*Floyer*.

—To cause to thicken, coagulate, congeal, or concrete.

"Till curdled cold his courage gan t' assail."—*Spenser*.

Curd'less, *a.* Without curds; deprived of curds; as, curdless whey.

Curds'ville, in Ky, a twp. of Daviess co.

—A village of Mercer co.

Curds'ville, in Virginia, a township of Buckingham co.

Curd'y, *a.* Full of curds; coagulated; curdled.

Cure, *n.* [Fr.; Lat. *cura*, care, from *quæro*, to seek, to search for; implying solicitude.] Act of healing; restoration to health from disease, and to soundness from a wound; as, a perfect cure.

—A remedy; a restorative; that which cures or heals.

"The wise for cure on exercise depend."—*Dryden*.

—System of medical or hygienic treatment of disease, &c.; as, the water-cure.

—The cure of souls: spiritual charge; benefice or employment of a curate; a curacy; as, inducted into a cure.

—Remedial means for the palliation or removal of anything evil.

"By way of a cure for the corruption of good manners."—*Swift*.

—*v. a.* [Lat. *curo*, from *cura*, cure.] To heal; to restore to health, or to soundness; to remove or destroy, as a disease.

"Love the sole disease thou canst not cure."—*Pope*.

—To remedy, obviate, remove, or destroy any mischievous or objectionable tendency, habit, quality, or appetite; as, to cure a hopeless attachment.

"I never knew a man cured of inattention."—*Swift*.

—To preserve from decay or corruption, as by drying, salting, jerking, &c.; to pickle; as, to cure a ham.

—*v. n.* To effect a restoration to health and soundness.

—To become convalescent and restored to health, soundness, and vigor.

"The lover of his fond passion's cur'd."—*Waller*.

Cure, *n.* [Fr.] In France, a curate.

Cureless, *a.* That cannot be cured or healed; incurable; as, a cureless complaint.

Cur'er, *n.* A healer; one who cures.

"He is a curer of souls, and you a curer of bodies."—*Shaks*.

Cureton's Store, in S. Carolina, a post-office of Lancaster co.

Curette, *n.* [Fr.] (*Surg.*) An oculist's instrument, shaped like a little scoop.

Curfew, (*kūr'fū*), *n.* [Fr. *couvre-feu*—*couvrir*, to cover, and *feu*, fire.] The ringing of a bell or bells at eight o'clock at night, as a signal to the inhabitants to put out their fires and retire to rest. (This ancient custom, very common in the Middle Ages throughout Europe, is still retained in many of the country districts of England.)

Cur'ia, *n.*; *pl.* CURIÆ. [Lat.] (*Anc. Hist.*) A word applied to a division of the Roman people, and the place of assembly for such a division. Each of the three ancient Romulan tribes, the *Ramnes*, *Tities*, and *Luceres*, was subdivided into ten curiæ. The plebeians had no connection with the curiæ, and the clients of the patricians were members of the curiæ only in a passive sense; thus the curiæ alone contained those that were real citizens, and their assembly alone was the legitimate representative of the whole people. Each curia had its own place of worship, which was superintended by a priest, (*curio*), who was assisted by another, called *curialis flāmen*. The word curia is also used to designate the place in which the senate held its meetings; as, curia Hostilia, curia Julia, curia Pompeii, &c.

(*Arch.*) The building in which the higher council of the State met, in a Greek or Latin city. It is described by Vitruvius as being adjacent to the Forum. Its form was quadrangular; either square or oblong. Half-way up each wall there was a projecting shelf, or cornice, to prevent the voice being lost in the height of the building. A sort of religious character was conceived to belong to the senate-house, and there were often statues of the gods placed in it.

Cur'ia, in Arkansas, a village of Independence co.

Curia'tii, (*Rom. Hist.*) See HORATHI.

Curico, a maritime district of Chili, containing rich mines of gold and copper. Curico, cap. of this district has a pop. of 2,500.

Curialis'tie, *a.* [From Lat. *curia*.] Belonging to a court of law or justice.

Cur'ing-house, *n.* A place or kitchen set apart for the curing of meats.—In Cuba and Barbadoes, that part of a sugar-works devoted to the draining and drying of the saccharine concretions.

Cur'iology, *a.* [Gr. *kyriologikos*.] Relating to rud hieroglyphic inscriptions.

Cur'ios, *n. pl.* (*Com.*) A commercial abbreviation of CURIOSITIES, *q. v.*

Cur'iosity, *n.* [Fr. *curiosité*; Lat. *curiositas*.] Quality of being curious; a strong desire to see something novel or to discover something unknown; a disposition to scrutinize or pry into; inclination to inquiry; inquisitiveness; as, woman's cur'iosity.

—Accuracy; exactness; nice performance.

"Our senses . . . are too gross to discern the cur'iosity of d workmanship of nature."—*Ray*.

—A thing unusual; an object of curious contemplation; an interesting spectacle; a rarity; as, the cur'iosities of a museum.

Cur'iosities, *n. pl.* (*Com.*) Objects of art or rarity; as, Chinese cur'iosities.

Curio'so, *n.* [It.] A virtuoso; a dilettante; an adept in curious works of art or virtu.

Cur'ious, *a.* [Fr. *curieux*; Lat. *curiosus*, from *cur* care.] Eagerly solicitous; strongly desirous to see what is novel, and hear what is new, or to discover what unknown; solicitous to see or to know; habitually inquisitive; as, a cur'ious child.

—Accurate; solicitous to be correct; careful; nice; e act; difficult to please; scrupulous; as, cur'ious discri ination.

—Exhibiting or requiring skill, care, or nicety; artist rare; as, "the cur'ious touches of art."—*Milton*.

—Singular; strange; unusual; of rare occurrence; wh could hardly have been expected; as, a cur'ious coincidence.

"By cur'ious chance, or careless art, composed."—*Fairfax*.

—Anxious or eager to learn or acquire; attentive to; di gent about; disposed to pry into, or be inquisitive abo preceding after or of.

"Well read, and cur'ious of antiquities."—*Dryden*.

Cur'iously, *adv.* In a curious manner; skilfully; s gularly.

Cur'iousness, *n.* State or quality of being curio curiosity; inquisitiveness.—Exactness; carefulne nicety of accomplishment.

Curiti'ba, in Brazil, a town, cap. of a comarca of t same name, 105 m. W. of Paranaña.

Curitib'ia River, in Brazil, rises in the mountains Cubatão, flows a circuitous S. course; then W., after ceiving the São José, and finally joins the Iguaçu.

Curl, *v. a.* [D. *krullen*; Ger. *kräuseln*, to curl, to cri from *kraus*, curled, crisp; Lat. *crispus*, curled, crisp

Ice. *krulla*, to crisp; Dan. *krulle*: from the root of *crook*.] To form into ringlets; to crisp; as, to *curl* the hair.

"The wealthy *wirled* darlings of our nation." — *Shaks.*

—To twist; to coil; to writhe, as a serpent. — To dress or ornament with curls; as, to *curl* a wig. — To ripple; to raise in waves or undulations.

"The ruffian billows . . . *curling* their monstrous heads." — *Shaks.*

—*r. i.* To shrink or contract into ringlets, as the hair. — To take a bent, twisted, winding, or coiled form; to coil, as a serpent. — To rise and ripple in waves or undulations.

"While *curling* smokes from village tops are seen." — *Pope.*

—In Scotland, to practise the game of curling.

—*n.* A ringlet of hair, or anything of a like form.

"Shaks his ambrosial *curls*, and gives the nod." — *Shaks.*

—*n.* A waving sinuosity or flexure; a winding; a twist; as, a *curl* of mahogany, the *curl* of a wave.

(*Agric.*) A disease in potatoes, in which the leaves, on their first appearance, appear curled and shrunk up; and, consequently, as they do not present a sufficient surface to the light to elaborate the sap in a sufficient manner for carrying on the growth of the plant, it never acquires strength, and either dies, or produces very imperfect tubers. The cause of the disease in the first instance is generally supposed to be the unhealthy state of the set; but something also may be owing to bad management and improper soil.

Curledness, *n.* State of being curled.

Curlier, *n.* One who curls; a hair-dresser; a perruquier. — In Scotland, one who plays at the game of curling.

Curlew, *n.* [*Fr. courlieu.*] (*Ornith.*) See SECTION II.

Curlieness, *n.* State or quality of being curly; as, *curlieness* of the hair.

Curling, *n.* (*Games.*) In Scotland, a game played upon the ice by a number of persons.

—*p. a.* Beuding; twisting; forming into ringlets.

Curling-irons, **Curling-tongs**, *n. pl.* A pair of tongs used by hair-dressers for curling the hair.

Curlingly, *adv.* In a curling manner.

Curlyville, in *Pennsylvania*, a post-vill. of Clarion co.

Curly's Wharf, in *Virginia*, a P. O. of Henrico co.

Curly, *a.* Having curls; tending to curl; full of ripples; as, a *curly* wig.

Curmudgeon, (*ker-muj'on.*) *n.* [*A. S. ceorl*, a churl, and *medin*, *morigan*, to be proud, to swell.] A churlish-minded man; an avaricious, churlish fellow; a miser; a niggard; a hunk; a screw.

"Nor shalt thou find him a *curmudgeon*,
If thou dispatch it without grudging." — *Hudibras.*

Curran, JOHN PHILPOT, an Irish advocate and orator, b. at Newmarket, co. Cork, 1750. In 1783 he obtained a seat in the Irish parliament as member for Kilbeggan. In debate, *C.* who was one of the few liberal members then in the house, was usually charged with the duty of replying to opponents; for which important duty his ready speech and cutting retort admirably qualified him. But his sarcasm led him into several duels, in which fortunately little harm was done on either side. In 1788, he was in favor of the formation of the Irish volunteers; and, in subsequent years, he was constant and eloquent in his appeals to government to adopt a different policy towards Ireland, as that which it was pursuing was likely to drive the people into rebellion. Government gave no heed, and the rebellion of 1798 was the consequence. *C.* had retired from parliament before the Union, of which he was a warm opponent. He was appointed Master of the Rolls in Ireland in 1806, an office he held until 1813, when he resigned. He died in London, 1817.

Curran, in *Illinois*, a prosperous township of Sangamon co.

—A post-village and township of Sangamon co.

Curran, in *Missouri*, a village of Stone co.

—A post-office of Barry county.

Curran, *n.* [*From Corinth*, where they were originally grown.] (*Bot.*) The dried fruit of a species of grapevine extensively cultivated in the Grecian Islands. See VITIS.—The common red, white, and black fruit of two species of the genus *Ribes* (*q. v.*).

Currucey, *n.* [See CURRENT.] A flowing or passing; a continued or uninterrupted course; constant flow; a passing from person to person, or from age to age; circulation; as, *currucey* of information, *currucey* of time.

—General reception, or estimation; common valuation; as, to give *currucey* to a report.

(*Fin. and Polit. Econ.*) A circulating medium of exchange; that which passes current as money or in lieu of money, whether coin or paper. Some economists include checks, drafts, bills of exchange, and all other written or printed instruments that take the place of cash in the exchanges.—*C.* in the U. S. The earliest American paper *C.* was issued by the colony of Massachusetts, in 1690, to pay the cost of the expedition against Quebec; it was increased after the capture of Louisburg by the New England volunteers. That colony also issued a series of silver coins of its own, of which the famous "pine tree shilling" is the best known example. The paper currency named was gradually redeemed. During the Revolutionary War the States and Congress alike issued paper money when coin had failed, there being no other way to meet the expenses of that great struggle. At that time the principles of finance were even less understood than at present, and Congress made no provision for redeeming its currency. Impressed with the notion that the war would be very brief, no system of national taxation was devised, and the States were free to support the government, or not, as they chose. As a result, scant attention was given the appeals of Congress, and, with little or no national revenue, there was no alternative but to continue the issue of paper promises to pay, whose purchasing power

decreased as its volume increased. These notes were coarsely engraved and printed, and very easily counterfeited; in fact, the spurious currency, said to have been very largely made in England, came to be greatly in excess of the genuine. By 1780 it took \$150 of Continental currency to buy a bushel of corn, and it soon after became practically worthless, but was eventually redeemed at its face value by the new government. The coinage of metallic money began in 1790, but for many years foreign coins continued to circulate in the U. S. In time domestic coins became more plentiful, but Mexican and other foreign moneys continued in free circulation until all metallic money was driven out by the exigencies of the Civil War. From 1834 to 1879, owing to the more favorable coinage ratio of France, practically no domestic silver was in circulation in this country (except in the form of subsidiary coins, dimes, quarters, &c.) (See BIMETALLISM.) During this period paper *C.* was largely used. The U. S. Bank issued notes which circulated freely, and the various States also authorized banks of issue. The U. S. Treasury circulated paper notes on four different occasions prior to the legal tender paper of 1862. Unsound banks flooded the country with paper obligations whose instability was shown by the great panics of 1837 and 1857. As a remedy for this evil, the National Banking System was instituted in 1863, whose issues have been supplemented by the U. S. legal tenders, or greenbacks, and various forms of Treasury paper elsewhere referred to. These forms of money, with a greatly enlarged volume of gold and silver coins, now constitute the *C.* of the U. S., all of which is kept at par with gold by the method described under MONOMETALLISM (*q. v.*). See also MONEY; BANKS; NATIONAL; BIMETALLISM, &c.

Current, *a.* [*Fr. courant*; *Lat. currens*, from *curro*, to run.] Running; flowing; as, a *current* stream.—Passing; passing from person to person, or from hand to hand; circulating; common; as, *current* money.

—Popular; general; or fashionable; established by common estimation; generally received or accepted as authentic.

—Now passing; present in its course; as, the *current* year.

—*n.* A running, flowing, or passing; progressive motion, as of the air, water, &c.; as, a *current* of electricity.

"While thro' the sky his shining *current* strays." — *Pope.*

—Tide; course; that which advances in a certain direction; as, the *current* of a river, a *current* of wind.

Pennyroyal froze the genial *current* of the soul." — *Gray.*

Currently, *adv.* In a current manner; generally.

Currentness, *n.* State or quality of being current; circulation; general reception; currency.

Currie, (*kur'ri*), *n.* [*Lat. curriculum*, from *curro*, to run.] A chaise or carriage, with two wheels, drawn by two horses.—Also, a primitive form of the two-wheeled velocipede. See BICYCLE.

Curriculum, *n.* [*Lat.*] A race-course; an arena for trials of speed.—Whence, in academical language, the whole course of studies completed in a university or similar institution.

Currie, *n.* (*Cookery.*) See CURRY.

Curried, (*kur'rid*), *p. a.* [See CURRY.] Dressed by currying; cleaned; prepared; as, *curried* leather.

(*Cookery.*) Prepared with curry, or curry-powder; as, *curried* rabbit.

Currier, *n.* [*Fr. corroyeur*; *Lat. coriarius*, from *corium*, hide, skin, leather.] One who curries and dresses leather after it is tanned.

"For useless to the *currier* were their hides." — *Dryden.*

Curriersville, in *N. Carolina*, a P. O. of Moore co.

Currish, *a.* Like a cur; snappish; snarling; bristly.

"Cupid deigns not to wound a *currish* mind." — *Fairfax.*

Currishly, *adv.* After the manner of a cur; snappishly.

Currihuess, *n.* Churlishness; snappishness; viciousness.

Currituck, in *N. Carolina*, a N.E. co., bordering on Virginia and Currituck Sound. Area, abt. 200 sq. m. North River washes its S.W. border. The surface is level, and the soil sandy. Cap. Currituck Court-House. Pop. (1890) 6,740.

Currituck, an island in the Atlantic Ocean, off the N.E. coast of N. Carolina, abt. 30 m. long by 2 m. wide.

Currituck Court-House, in *N. Carolina*, a post-village, cap. of the co. of that name, 242 m. E.N.E. of Raleigh.

Currituck Sound, in *N. Carolina*, an inlet of the Atlantic Ocean on the N.E. coast. Length about 50 m.; breadth about 10 m.

Curry, (sometimes wrongly written CURRIE), *n.* [*From Hind. gormu, guliyu*, to stew.] (*Cookery.*) A stew variously made, and highly seasoned with curry-powder, &c.—(Also called CURRY-POWDER.) A highly-spiced Indian condiment, used for seasoning dishes, stews, sauces, &c.

Curry, *v. a.* [*Fr. corroyer*, from *Lat. corium*, skin, hide, and probably the root of *rado*, to scrape, scratch, or shave.] To dress and prepare leather after it is tanned; as, to *curry* a calf's skin.—To rub, scratch, clean, and smooth the skin of an animal with a comb; as, to *curry* a horse.

—To scratch or claw; to beat; to drub; to rub or stroke.

"Setting brother against brother.
To claw and *curry* one another." — *Hudibras.*

—To cook and prepare with curry-powder; as, to *curry* a fowl.

To curry favor. To strive to become a favorite by petty officiousness, adroit flattery, or trifling acts of kindness.

"An ass would go the same way to work to *curry* favour for himself." — *L'Estrange.*

Cur'ry, in *Indiana*, a thriving township of Sullivan county.

Curry, in *Oregon*, a S.W. co., bordering on California. Area, abt. 1,550 sq. m. The Pacific Ocean bounds it on the W., and it is drained by Rogue, Elk, and Chetcoe rivers. The surface is mountainous and the soil fertile. Cap. Gold Beach. Pop. (1897) 2,100.

Cur'ry-comb, *n.* A comb for rubbing and cleaning the coat of a horse's skin.

Cur'rying, *n.* (*Arts and Trades.*) The art of dressing skins after they are tanned, for the purposes of the shoemaker, saddler, harness-maker, &c.; or of giving them the necessary smoothness, lustre, color, and suppleness. The operation of currying is performed in two ways: either upon the flesh (or inner side), or on the hair (or outer side), or, as it is technically called, the *grain*; and consists chiefly in beating or pummeling the skin, smoothing and dressing it, and finally imbuing it with certain oily matters, so as to render it supple and water-proof.

Cur'ry-powder, *n.* (*Cookery.*) See CURRY.

Curry's Run, in *Kentucky*, a P. O. of Harrison co.

Currys ville, in *Indiana*, a village of Sullivan co.

Curse, *v. a.* (*imp.* and *pp.* CURSED, or CURST.) [*A. S. cursian*, *corsian*, from *cross*.] To execrate in the name of the cross, or by the sign of the cross; to utter a wish of evil against one; to invoke a malediction upon; to imprecate.

"O Luxury! thou *curst* by Heaven's decree." — *Goldsmith.*

—To injure; to harass or torment by great calamities.

"Impose

Thy plagues, and *curse* 'em with such ills as those." — *Pope.*

—*v. n.* To utter imprecations or maledictions; to affirm or deny with imprecations of divine vengeance; to swear; as, to *curse* one's own stupidity.

—*n.* The expression of a wish of evil to another; imprecation or denunciation of evil.

"*Curses*, not loud, but deep." — *Shaks.*

—Malediction; execration; anathema; divine or solemn condemnation; as, a father's *curse*.

"The primal eldest *curse* . . . a brother's murder." — *Shaks.*

—Torment; vexation; cause of great affliction; as, the *curse* of ignorance.

"Built in the eclipse and rig'd with *curses* dark." — *Milton.*

Cur'sed, *a.* Deserving a curse; execrable; detestable; hateful; abominable; as, a *cur'sed* act of folly.

"Let us fly this *cur'sed* place." — *Milton.*

—Causing trouble, torment, vexation, or calamity.

"Where wounding thorns and *cur'sed* thistles grew." — *Prior.*

Cur'sedly, *adv.* In a manner worthy of being cursed or execrated; badly; mischievously; miserably; troublesomely; as, this boot pinches *cur'sedly*. (*Colloq.*)

Cur'sedness, *n.* State or condition of being under a curse, or of being denounced to evil and calamity.

Cur'ser, *n.* One who curses; a swearer.

"Uncle Toby was an awful *cur'ser*." — *Smollett.*

Cur'ship, *n.* Dogship; meanness; scoundrelism. (*R.*)

"How *cur'ship* he, I say, oppose thy *cur'ship*
'Gainst arms, authority and worship?" — *Hudibras.*

Cur'sitor, *n.* [*L. Lat.*] (*Eng. Law.*) Clerks belonging to the chancery, who make out original writs, and are called *clerks of course*.

Cur'sive, *a.* [*It. corsivo*, from *Lat. curro*, *cursus*, to run.] Running; flowing; coursing; as, a *cur'sive* handwriting.

Cur'sor, *n.* [*Lat.*] That part of a mathematical instrument which slides to and fro upon another part.

Cur'sores, (*RUNNERS*), *n. pl.* [*Lat. curro*, *cursus*, to run.] (*Zoöl.*) An order of birds including those which are disabled from flight by the restricted development of the wings, but which possess superior powers of running from the compensating size and strength of the legs; the Ostrich (*Fig. 395*), Rhea, Cassowary (*Fig. 415*), Emu, Bustard, and Apteryx, are examples of this order.

Cur'sorial, *a.* Suitable for running or walking.

Cur'sorily, *adv.* In a running or hasty manner; slightly; hastily; without due attention.

Cur'sory, *a.* [*Lat. cursorius*, from *curro*, *cursus*, to run.] Hasty; superficial; careless; desultory; inattentive.

"A *cur'sory* and superficial view." — *Addison.*

Curst, *imp.* and *pp.* of CURSE, *q. v.*

Curt, *a.* [*Lat. curtus*; *Fr. court*, *courte*.] Short; brief; curtailed; mutilated; pithy; laconic; crnsty; as, a *curt* answer.

Curt, *a.* A contraction for CURRENT, *q. v.*

Curtail, *v. a.* [*Fr. court*, and *tailler*, to cut, from *L. Lat. taliare*, to cut, from *Lat. talia*, a cutting. See TALLY.] To shorten; to cut off the end or a part; to diminish; to contract; as, to *curtail* expenditure.

"Abominable *curtailings* and quaint modernisms." — *Swift.*

Cur'tail-dog, *n.* A dog *laved*, or mutilated according to forest law by having its tail cut off, and thereby becoming excluded from sporting purposes. A badly trained sporting-dog.

Cur'tailer, *n.* One who curtails, shortens, or lops off the end of anything.

Cur'tail-step, *n.* (*Arch.*) The lowest step in a flight of stairs, ending at its outer extremity in a scroll projecting beyond the ordinary line of the staircase.

Cur'tain, *n.* [*It. cortina*, a bed-curtain, from *corte*, a court; *Fr. courtine*.] A cloth hanging round a bed, at a window, or in a theatre, which may be contracted or expanded at pleasure.

"The fringed *curtains* of thine eye advance." — *Shaks.*

—A small hanging or cape falling over the back part of a woman's neck; as, the *curtain* of a bonnet.

(*Fort.*) That part of the rampart which is built

between the bastions, and, consequently, connects their flanks. The *C.* is generally defended by a ravelin or redoubt, and other outworks constructed immediately

Fig. 745. — SYSTEM OF FORTIFICATION.

in front of it, to save it from being too much exposed to the direct fire of the enemy, with whom it is an object to effect a breach in it as soon as possible. In Fig. 745, which shows a ground-plan of some of the elements of a regular fortification, FF is the curtain; H A E F, a bastion. The component parts of the bastion are thus designated: A H and A E, the two faces; E F and G H, the two flanks; A, the salient; F G, the gorge; and H and E, the shoulders; M N is the rampart; M O, the parapet on the rampart; Q P Q, the ditch; N O, the covert-way; R W R, the glacis; K L L, a ravelin.

Behind the curtain, in secret: in a private manner.

To draw the curtain, to close it, so as to shut out the light; to conceal any object.

To drop the curtain, to end a performance.

—*v. a.* To inclose or surround with curtains; to furnish or equip with curtains; as, to curtain a window.

“Wicked dreams abuse the curtain’d sleep.”—*Shaks.*

Curtain-lecture, n. A lecture or homily delivered by a wife to her husband, when in bed, upon the shortcomings and errors of his daily life.

“The curtain-lecture makes a mournful bed.”—*Dryden.*

Curtal, a. Curt; brief; short; laconic; as, a “curtal aphorism.”—*Millon.*

Curtal-axe, Curtle-axe, n. (Mil.) See the modern spelling, CUTLASS.

Curtana, Curtein, n. (Hist.) The Sword of Mercy, carried before the English monarchs, on the occasion of their coronation; first used at the coronation of King Edward the Confessor.

Curtate, a. [Lat. *curtatus*.] (Astron.) Applied to denote a planet’s distance from the sun reduced to the plane of the ecliptic. The curtate (or shortened) distance is therefore equal to the true distance multiplied by the co-sine of the planet’s heliocentric altitude.

Curtation, n. (Astron.) The interval between the true and the curtate distance of a planet from the sun.

Curtsey, or Courtesy of England, n. (Eng. Law.) The right of a husband who has married a wife seised in fee simple, or fee tail general, or heiress in special tail, and has issue male or female born alive, and which by possibility may inherit, — to hold her lands after her death for his life. Thus, four things are said to be necessary to give an estate by the curtesy: marriage, seisin of the wife, issue, and death of the wife.

Curtilage, n. [O. Fr. *courtillage*, from L. Lat. *cortilagiūm*.] (Law.) A court-yard or close, comprised within the fence surrounding a dwelling-house.

Curtis, BENJAMIN ROBBINS, an American judge and juridical writer, b. at Watertown, Mass., 1809. In 1851, he became a judge of the Supreme Court of the U. States, and was one of the counsel of Pres. Johnson in 1868. D. 1874.

Curtis, GEORGE WILLIAM, an American author, b. in 1824, at Providence, R. I. After following various pursuits, he went to Europe in 1846, and extended his travels to Egypt and Syria. In 1850, he published his first work, *Nile Notes of a Howadji*. That was followed by *Lotos Eating* (1851), and *The Howadji in Syria* (1852). He was for many years editor of *Harper’s Magazine*, in which he published a remarkable series of papers under the caption *The Easy Chair*, and which he continued until his death. His *Potiphar Papers* appeared in book form in 1853. In 1857 he became the leading editorial writer of *Harper’s Weekly*. As a lecturer he gained high rank, and as early as 1856 entered the field as a political orator. He declined several diplomatic positions abroad, but in 1864 became regent of the University of New York, and in 1890 its chancellor. Died August 31, 1892.

Curtisville, in Massachusetts, a village of Stockbridge township, Berkshire co., about 12 miles W. by S. of Boston.

Curtius, MARCUS, (*kur’she-us*), a Roman hero, who devoted himself to the infernal gods for the safety of his country. According to the legend, a wide chasm having suddenly appeared in the Forum, the oracle declared that it never would close until Rome threw into it its most precious possessions. Thereupon C., arming himself, mounted his horse, and saying that Rome contained nothing more precious to its greatness than a valiant citizen fully accounted for battle, he solemnly

threw himself into the abyss, which instantly closed over his head, B. C. 362.

Curtius Rufus, QUINTUS, a Roman historian, who wrote the history of Alexander the Great in ten books, the first two of which are lost. The exact period in which he flourished is not known; for though his style would indicate that he lived in one of the best periods of the Latin language, no writer of any earlier date than the 12th century has made any mention of his work.

Curtly, adv. Briefly; pithily; laconically; shortly.

Curtness, n. Shortness; brevity; as, *curtness* of speech.

Curtsey, n. See COURTESY.

Curuguaty, a village of Paraguay, 135 m. N.E. of Asunción.

Curule Magistracies, n. pl. (Anc. Hist.) Were those of the greatest dignity in the Roman state; and were distinguished from all others by the privilege enjoyed by the persons who held them of sitting on ivory chairs (*sellæ curules*) when engaged in their public functions. The curule magistracies were the consuls, prætors, censors, and chief ædiles; which last, on account of this privilege, were called *curule*, to distinguish them from the plebeian ædiles.

Curval, Curvent, a. (Her.) Curved; bent in the form of a bow.

Curvate, Curvated, a. [From Lat. *curvatus*.] Curved; bent in a regular form; crooked.

Curvation, n. [From Lat. *curvo*.] The act of bending or curving.

Curvative, a. (Bot.) With the leaves somewhat curving.

Curvature, n. [Lat. *curvatura*, from *curvo*, *curvatus*, to bend, to curve.] (Geom.) The amount of bending or deflection of a curve from its tangent at any point. The circle being the curve whose *C.* is uniform, is always used as a measure of the curvature of other curves; that is to say, the curvature at any point of a curve is the same as that of the osculating circle at that point. — *Absolute C.* The *C.* of the osculating circle of a non-plane curve. The term *absolute* is employed in consequence of such curves possessing a *second C.*, or *torsion*, in virtue of which they are continually deflected from a plane. — *Line of C.* is a line traced upon a surface such that the normals at any two consecutive points meet one another. Since, of all the normals to a surface at points consecutive to a given one, only two meet the normal at that point, and the planes containing the latter normal and the two former are always at right angles to one another; it follows that through every point of a surface pass two lines of *C.* which cut one another perpendicularly, and are touched by the two principal normal sections. — *Spherical C.* is a term applied to a non-plane curve, denoting the *C.* of any great circle of the osculating sphere. The radius and centre of *spherical C.* are respectively the radius and centre of this sphere. The *C.* of an *umbilical point* of a surface is also said to be spherical, and a line every point of which is an umbilic on the surface is called a *line of spherical C.* — *C. of Surfaces.* The *C.* of a surface at any point may be considered as determined by that of the plane sections through the point. The methods of finding the centres and radii of *C.* are given in every treatise on surfaces.

Curve, a. [Lat. *curvus*; Fr. *courbe*; Gael. *crub*, to crouch, *crubadh*, a bending; Heb. *kaphaph*, to bend, to curve; O. Heb. *kapha*, to bend, to bow.] Bending; crooked; inflected in a regular form, and forming part of a circle; as, a *curve* line.

—*n.* A bending without angles; that which is bent; a flexure; an arch or arc; a bow.

(Geom.) A line which, running on continually and gradually in all directions, may be cut by a right line in more points than one. The theory of *C.* forms a very important branch of the higher mathematical science; but only those *C.* that follow some law in their change of direction can form the subject of geometrical speculation. The law of the circle is that all portions of the *C.* are equidistant from one point, called a *centre*. The invention of defining *C.* by algebraic equation is due to Descartes, and the law of a plane *C.* is generally expressed by an equation between the co-ordinates of any point in it referred to a fixed point. Descartes divided all *C.* into two classes, — *geometrical* and *mechanical*. It is now the custom to indicate the same distinctions by the terms *algebraic* and *transcendental*. The *C.* is called algebraic when its equation only contains the powers of *x* and *y*; and it is called transcendental when the equation contains other functions, such as logarithms of *x* and *y*. Algebraic *C.* are divided into different orders, according to the degree of the equation which expresses the relation between their co-ordinates. Straight lines are said to be of the first order, because the equation of a straight line contains no powers or products of the variables *x* and *y*. A *C.* of the second is one of which the equation rises to two dimensions, and the *C.* which it includes are the circle, the ellipse, the hyperbola, and the parabola. Out of the infinite number of *C.* that can be drawn, very few comparatively have received definite names. Besides the four mentioned above, which form the conic sections, there are the semi-cubical parabola, the cisoid of Diocles, the conchoid of Nicomedes, the cycloid, the trochoid, the *C.* of sines, co-sines, tangents, the logarithmic *C.*, &c.

Curve, v. a. To bend; to crook; to inflect; to form into an arch; as, to *curve* a bow.

—*v. i.* To bend or trend by degrees from a stated course; as, a *curving* path.

Curvedness, n. State of being curved.

Curvet, n. [Fr. *courbette*; It. *corvetta*, from Lat. *curvo*, to bend, to curve.] (*Manege*.) A particular leap of a horse, in which he bends his body, and springs out, raising his fore-legs together.

—*A frolic; a prank; a piece of fun.*

—*v. n.* To leap; to bound; to spring and form a curvet, as a horse.

—To leap; to frisk; to use a license.

“Cry hold! to thy tongue, I prithee; it *curvets* unseasonably.” — *Shaks.*

—*v. a.* To make to curvet, frisk, or leap.

Curvello, a town of Brazil, prov. of Minas Geraes, 150 m. N.N.W. of Villa Rica; pop. about 2,000.

Curve’lou, in Indiana, a post-village of Cass co.

Curvi-caudate, a. [Lat. *curvus*, and *cauda*, a tail.] Crooked-tailed.

Curvi-eos’ate, a. [Lat. *curvus*, and *costa*, a rib.] Presenting small, curved ribs.

Curviden’ate, a. [Lat. *curvus*, and *dentis*, a tooth.] Possessing bent or curved teeth.

Curvifoliate, a. [Lat. *curvus*, and *folium*, a leaf.] With leaves bending backward.

Curviform, a. [Lat. *curvus*, and *forma*, form.] Of a curved or crooked form.

Curvilinear, n. (Geom.) An instrument for tracing curved lines.

Curvilinear, Curvilinear’ear, a. [Lat. *curvus*, and *linea*, a line.] Consisting of, or bounded by, curved lines; as, a *curvilinear* orbit.

Curvilinear’ity, n. State or quality of being curvilinear.

Curvilinear’early, adv. In a curvilinear form or manner.

Curvilinear’ed, a. [Lat. *curvus*, and *nervus*, a nerve.] With the veins curved.

Curvirostra, n. (Zool.) The Cross-bills, a genus of birds, family *Fringillidae*, much resembling bullfinches, linnets, &c., except in the bill, which is altogether singular, the two mandibles crossing each other at the points, when the bill is closed. This bill, which at first seems to be “an error and defect in nature,” is articulated to the head in such a manner, that the mandibles are capable not merely of vertical but of lateral motion; and muscles of extraordinary power are provided for moving them. The result of this is, that the cross-bills readily obtain their principal food, the seeds of firs and pines, by tearing up the cones. They bring the points of the mandibles together — which they can do so as to pick up a very small seed — and insert it into the cone, when a powerful lateral movement widens the opening quite sufficiently; and the tongue, which terminates in a singular movable scoop, is inserted to detach the seed.

The power of the bill is such that it can be employed in its lateral movements to tear wood to pieces, and cross-bills in confinement seem to take a mischievous pleasure in so employing it, and by this means, an pulling at wires, soon destroy any ordinary cage. They are native of both hemispheres. The white-winged Cross-bill, *C. leucoptera*, of N. America, is of a dull red color, the wings and tail dark blackish-brown, with white bands upon the wings. It is about six inches long.

Curvirostral, a. [Lat. *curvus*, and *rostrum*, a beak.] Having a curved or crooked beak or bill.

Curvity, n. [Lat. *curvitas*.] A curvature; a bending in a regular form; crookedness.

Curvograph, n. (Geom.) Same as ARCOGRAPH, q. v.

Curwensville, in Pennsylvania, a post-village of Pike township, Clearfield co.

Curzola, (*koor-zo’la*) (anc. *Coreyra Nigra*, so called from the sombre color of its pine-forests.) An island in Dalmatia, in the Adriatic, Lat. 42° 57' N., Lon. 17°. It has a length of about 25 m., with an average breadth of 4 m. It is well covered with wood, which on the coast grows down to the water-edge. The woods furnish ship-timber; a considerable quantity of wine is raised, and the fisheries of the coast are productive. The population numbers altogether 6,500; about 2,000 of who are located in the town of C., at the N.E. extremity of the island.

Cuscuta’ceæ, n. pl. (Bot.) The Dodder family; order of plants, alliance *Solanales*. DIAG. 5 free stamens, basal placentæ, and a filiform spiral embryo. The plants composing it are distinguished from those of *Violaceæ* by their parasitic habit, by the absence of leaves, by the tube of the corolla being furnished with scales alternating with the segments, and by having thread-like coiled embryo with almost obsolete cotyledons. They are chiefly natives of temperate climates and are often very destructive to flax, clover, and other crops. There are 50 species in two genera.

Cush. [Heb., black.] (*Script.*) The name of a region inhabited by tribes of the Hamite family, so called. There seems to have been an antediluvian Cush (*G. ii. 13*). If so, it was in Asia; and Cush the Hamite may have had his name from a settlement or allotment there. Leaving this as a matter upon which we can little more than conjecture, it may be observed that the chief habitations of the Cushites were to the south of Egypt, in the extensive tracts called Ethiopia (*Ex. xxix. 10*). They also appear to have spread in Arabian peninsula, where were tribes descended from them (*Gen. x. 7*).

Cush’ites, n. pl. See CUSH.

Fig. 746.

WHITE-WINGED CROSS-BILL (*C. leucoptera*). N. America.

Cush, in *Pennsylvania*, a post-office of Clearfield co.
Cushat, *n.* [A. S. *cusceote*.] The Ring-dove or Wood-pigeon, *Columba palumbus*.

"While thro' the braes the cushat croods." — Burns.

Cush-e-w-bird, *n.* (Zool.) The bird *Craz Pauzi*. See *PENELOPIDE*.

Cushing, CALEB, an American statesman, b. at Salisbury, Massachusetts, 1800. He devoted himself to the study of the law, and commenced practice at Newburyport, in 1825. Elected to the State senate in 1826, he visited Europe in 1829, and published on his return his *Reminiscences of Spain*, and *Historical and Political Review of the Revolution of Three Days in France*. In 1835 he was returned by the State of Massachusetts to Congress, a position that he retained for four consecutive terms. During this period he supported the policy of President Adams, and was a consistent Whig until the time of Pres. Tyler. In 1843 Pres. Tyler nominated him Secretary of the Treasury, but the appointment was rejected by the Senate. He was thereupon chosen to conduct the mission to China, and concluded the first American treaty with that court. On his return he was elected to the Massachusetts legislature a third time, when, in 1847, a bill to appropriate funds to equip the Massachusetts regiment of volunteers having been defeated in the legislature, he equipped them from his private means, and as their colonel marched with them to the Rio Grande in Mexico, where he was made brigadier-general by Gen. Taylor. In 1853, Pres. Pierce made him his Attorney-General. In 1865, armed with ample powers from the government, he went to the U. States of Colombia, and returned in 1869, after concluding the *Caleb Cushing Treaty*, which permits the U. States govt. to survey the route for, and to construct a ship-canal across the Isthmus of Darien. In 1872, he served as American commissioner at Geneva for the settlement of the Alabama question, and in 1873, was appointed minister to Spain. D. Jan., 1879.

Cushing, in *Maine*, a p-v. and twp. of Knox co.
Cushion, (*kush'un*), *n.* [Fr. *coussin*, from O. Ger. *kusso*, *kussin*, a cushion, a pillow.] A pillow for a seat; a soft pad placed on the seat of a chair, &c.; a stuffed bag; something resembling a pillow; as, an engraver's *cushion*.
 "To rest, the cushion, and soft deen invite." — Pope.

The padded edge of a billiard-table.
v. a. To seat on a cushion. — To supply or fit with cushions; as, to *cushion* a seat. — To conceal or hide, as beneath a cushion.

Cushion-capital, *n.* (Arch.) The capital of a column so sculptured as to resemble a cushion pressed down by the weight of its entablature.

Cushion-dance, *n.* (Games.) A social dance, formerly common among young people at rustic feasts, &c., in England.

Cushionet, *n.* [Fr. *coussinet*.] A small cushion.
Cushiony, *a.* Soft; pliable; elastic; resembling a cushion.

Cusk, *n.* (Zool.) The *Brosinitus vulgaris*, a sea-fish of the genus *GADUS*, *q. v.*

Cusp, *n.* [Lat. *cusps*, a point.] (Arch.) A term applied to the points formed by the meeting of curves in the interior of trefoils, quatrefoils, &c.; and in the ornamental tracery of church-windows these points are often adorned with foliage. The cusp was introduced towards the close of the first period of Gothic architecture.

(Geom.) When two curves touch, or appear to touch each other, and terminate in a point at which they have a common tangent, this point is called the *cusp of the curve*. If we conceive a curve to be generated by a moving point, then a C. is where the point suddenly stops and returns for a time in the same general direction as that in which it was moving when it reached the 2. point. Cusps are of two kinds: 1. when the two branches, A B, A C, have their convexities turned in the same direction with respect to the common tangent at

Fig. 747.

the C. point, as in 1, fig. 747; 2, when they have their convexities turned in opposite directions to the common tangent at the C. point, as in 2, fig. 747.

(Astron.) The point or horn of the moon or other lunar shaped like a crescent.

(Astron.) The beginning of a house, when calculating nativity.

Cuspid, *a.* Possessing a cusp or cusps.

Cuspidal, *a.* Terminating in a curved point.

Cuspidate, **Cuspidated**, *a.* [Lat. *cuspidatus*, *cuspidatus*, from *cusps*, a point.] (Bot.) Suddenly terminating in a point; spear-pointed.

Cuspis, *n.* [Lat.] The sharp end of a thing; a point.

Cossawago, or **Cossawago**, in *Pennsylvania*, a township of Crawford co.

Cossawago Creek, in *Pennsylvania*, rises in Erie co., and joins French Creek near Meadville, in Crawford co.
Cseta, in *Alabama*, a township of Chambers co., abt. 5 m. N. E. of Montgomery.

Cseta, in *Georgia*, a twp. and post-vill. cap. of Chattoochee co., abt. 19 m. S. E. of Columbus.

Cstar, in *Ohio*, a post-office of Wood co.

Cstard, *n.* [W. *cistard*; probably from *caws*, cheese, and.] (Cookery.) A curdy kind of composition, of milk

and eggs, sweetened and spiced, and then baked or boiled for the table.

Cus'tard-apple, *n.* (Bot.) A name given in the W. Indies to the eatable fruit of the different species of the genus *ANONA*, *q. v.*

Cus'tard's, in *Pennsylvania*, a post-vill. of Crawford co.
Custine, ADAM PHILIPPE, COMTE DE. (*kus'teen*), a French general, b. at Metz, 1740. He entered the army early in life, and attracted the notice of Frederic of Prussia, under whom he served in the Seven Years' War. He afterwards accepted a commission in one of the French regiments serving in the American war against the English; and on returning to France was made governor of Toulon. In 1792 he had the command of the army of the Rhine; but being suddenly summoned to Paris, the tyrants of the hour sent him to the guillotine, August, 1793, there to expiate the crime of non-success.

Custo'dial, *a.* Relating to custody, control, or guardianship.

Custo'dian, **Custo'dier**, *n.* [From Lat. *custos*.] A keeper; a guardian; one who has the care or custody of anything.

Custo'dianship, *n.* Office or employment of a custodian.

Cus'tody, *n.* [Lat. *custodia*, from *custos*, a watchman or keeper; probably from *con* and *adsto* — *ad*, by, and *sto*, to stand.] A standing by; a watching; a keeping; a guarding; care; guardianship; watch; — specifically, safe-keeping by the hands of judicial power; as, in the custody of the law. — Confinement; imprisonment; deprivation of liberty; restraint of personal freedom. — Defence; security; preservation from danger.

Custom, (*kus'tum*), *n.* [O. Fr. *coutume*; Fr. *coutume*, from Armor. *kustum* — *köz*, old, and *stum*, usage; It. *costuma*; Lat. *consuetudo*, *consuetus*, to be accustomed.] A frequent or common use or practice; a frequent repetition of the same act; habit; way; long-established practice or usage; established mode; habitual practice; manner; fashion; as, the customs and manners of a people. — Business support; a buying of goods; practice of frequenting a shop and purchasing or ordering to be done; patronage.

"Let him have your custom, but not your votes." — Addison.

(Physiol.) Custom differs from habit, with which it is usually coupled, in being a frequent repetition of the same act, whereas habit is the effect which such custom produces upon the mind or body. Custom is well said to be "a second nature." It is able to give a man inclinations and capacities altogether different from those he was born with. Acts that are at first most disagreeable to us, or are only accomplished with the utmost difficulty, become, by each repeated act, more easy and pleasant; until at length it may be difficult, or even impossible, for us to refrain from doing them. Physiologists tell us that every act of the body — nay, even every thought of the mind, destroys a certain portion of the matter of our body; but, by that very act of destruction, an increased energy or vitality is communicated to the part, by means of which, in a healthy and normal condition, a larger quantity of fresh matter is attracted to the part, and by this means an increased store of materials is laid up for future use. By this means the arm of the blacksmith acquires strength; the foot of the dancer, and the hand of the musician, their dexterity. The effect of custom is not discernible during the vivacity of youth; in middle age it gains ground, and in old age it governs without control. To introduce an active habit, the mere repetition of acts is not sufficient, without length of time. The acts require to be separated from each other by short intervals of time, in order to acquire their full force; and the more regular and uniform any operation is, the sooner it becomes habitual. Some pleasures are strengthened by custom, which in other cases beget familiarity and indifference, or even disgust. Custom blunts the edge of distress and pain; yet the want of anything to which we have been long accustomed is a kind of torture. The power of custom is a happy contrivance for our good. The mind grows fond of those actions which it is accustomed to; and what was at first difficult and disagreeable, becomes at length easy and pleasant; so that even our employments come to be changed into our diversions. It thus also distributes a corresponding amount of pleasure among all ranks of life; for while it renders pleasant the labors of the poor man, the pleasures of the rich man lose their effects from satiety. Satiety is necessary to check exquisite pleasures, which would otherwise engross the mind and withdraw it from more important pursuits. From a consideration of the effects of custom we can see the importance of that precept which the heathen philosopher Pythagoras is said to have given to his disciples, *Optimum ritæ genus elegit, nam consuetudo facit jucundissimum* — "Select that course of life which is the best, and custom will render it the most pleasant."

(Law.) Such a usage as by common consent and uniform practice has become the law of the place, or of the subject-matter to which it relates. It differs from prescription, which is personal, and is annexed to the person of the owner of a particular estate: while the other is local, and relates to a particular district. To render a custom valid, it has been said that the following qualities are requisite: 1. Antiquity; i. e. that it shall have been used as far back as time of legal memory, that is, "for so long a time that the memory of man runneth not to the contrary." 2. Continuance without interruption. 3. Without dispute. 4. It must be reasonable; and 5. Certain. 6. Compulsory. 7. Customs must be consistent with each other. Customs in derogation of the common law must be construed strictly. — *Customs* (*coutumes*), in the law of France, were the laws

relating both to movable and immovable property, peculiar to different districts of the kingdom before the Revolution. Districts governed by customs were commonly termed *pays coutumiers*; in contradistinction to the remainder of the realm, which, being under the civil law, was termed *pays de droit Romain*. The pays coutumiers embraced all the north of France.

(Pol.) *Custom duties* are duties charged upon commodities on their being imported into, or exported from, a country. They appear to have been called customs from being customary payments, or payments which had been in use from time immemorial. They seem to have existed in every commercial country. The trouble and expense necessarily incurred by a government in making provision for the commerce of a country, naturally led to its seeking some means of remuneration, and none seemed so fair and reasonable as that it should fall on the goods or vessels on whose behalf they were incurred. As a large portion of the entire revenue of this country is derived from the custom duties, they are of the utmost importance to our prosperity, and there are many important questions connected with them. The duties should in no case be so high as to encourage smuggling; nor, indeed, in most cases, so as to interfere with their consumption; neither should they in general be too low, for then they must be extended over a great number of articles, by which means the expense of collection is largely increased, and the freedom of the trader much interfered with. They should be levied, as much as possible, on articles that do not constitute necessities of life, or accessories to manufacturing industry. Moderate custom duties are among the least objectionable of all taxes, as they interfere little with the operations of the manufacturer or trader, in many cases serving rather as a protection to the former, and are (or at least can be) collected at a relatively small expense. Up to the time of the rebellion the expenses of the general government were derived almost exclusively from Customs.

Customable, *a.* [O. Fr. *coutumable*.] Common; usual; customary; habitual. — Liable to the payment of the duties called customs.

Customableness, *n.* Frequency; habit; conformity to custom.

Customably, *adv.* According to custom; in an accustomed manner.

"Kingdoms have been customably carried away by right of succession, according to proximity of blood." — Hammond.

Customarily, *adv.* Habitually; commonly.

Customariness, *n.* Frequency; commonness of occurrence; habitual practice or habit.

Customary, *a.* [Fr. *coutumier*; L. Lat. *coutumarius*, liable to the tax or tribute of the *coutuma*.] According to custom, or prescription, or to established or common usage or habit; usual; common; habitual; ordinary; accustomed; as, a customary compliment.

"The prejudices of education and customary belief." — Glanville.

(Law.) Holding or held by custom; as, a customary service.

— *n.* A book containing laws and usages, or customs.

Cowell.

Customer, *n.* One who is in the habit of purchasing at a shop, market, &c.; one who buys goods or wares; an accustomed buyer or employer.

"Poor tradesmen do . . . persuade customers to buy their goods." Lord Roscommon.

An ugly customer, one who is hard to manage; a person who is apt to prove dangerous or intractable.

Custom-house, *n.* The house or public building set apart for the collection of customs; an office where vessels are entered and cleared, and where the customs duties are paid, or security is given for the payment.

Custos, *n.*; *pl.* *CUSTODES*. [Lat.] A custodian; a keeper.
Custos-bre'vium, *n.* (Law.) In England, the chief clerk of the Court of Common Pleas.

Custo'za, or **Custoz'za**, a small place of N. Italy, near Mantua. Here the Italians were defeated by the Austrians under Marshal Radetsky, July 23, 1848; and on June 24, 1866, they were again defeated by the Austrians.

Custos-rotulorum, *n.* [L. Lat.] In England and Ireland, the principal magistrate of a county, who has charge of the official records.

Custrel, *n.* A knight's buckler. — A beaker or wine-flagon.

Custrin, in Prussia. See *KÜSTRIN*.

Cut, *v. a.* (Imp. and pp. *CUT*.) [Swed. and Goth. *kotta*, to cut; Lith. *kertù*; Gr. *keirô*, the *t* being thrown away, like the Slav. *korjû*, to cut; Icel. *kuti*, a small knife, *kuta*, a cut with a knife; Sansk. *kriti*, to cut; allied to Lat. *caedo*, to cut, *culter*, a knife; Gr. *kopto*, to cut.] To separate the parts of any body by an edged instrument; to make a gash, wound, incision or notch into; to sever into pieces by the use of any kind of an edged instrument.

— To hew; to cleave; to lop; to slash; to sever for gathering; as to *cut* timber; to *cut* grass.

— To divide and sever by cutting; to dock; to cuttail; as, *cut* the nails. — To carve; to divide or apportion by cutting; as, to *cut* a plate of beef.

— To carve; to hew out; to shape or form by cutting; as, to *cut* a profile.

"Why should a man whose blood is warm within, Sit, like his grandsire, cut in alabaster?" — Shaks.

— To penetrate; to pierce; to affect deeply; to wound or hurt the sensibility or feelings of.

— To intersect; to cross; to divide by passing through; as, a transversal *cutting* of two parallels makes four interior angles.

— To divide into two sections or portions; as, to *cut* a pack of cards.

"And frankly leave us, human elves, To cut and shuffle for ourselves." — Prior.

—To geld; to castrate; to emasculate; as, to *cut* a horse.
Cut and dried; *cut and dry*; done with preparation; in readiness for use; as, to have a thing all *cut and dried* beforehand.

"Sets of phrases, *cut and dry*." — *Swift*.

Cut glass. Glass cut and polished by friction into ornamental shapes and designs. — *Cut nail*. See *NAIL*.

To *cut a dash*, *figure*, or *shine*, to make a show or display. (Colloq.) — To *cut a caper*, to do something eccentric or fantastical; to play a prank. — To *cut down*, to fell; to hew down; — hence, to surpass; to abase; to put down by force of contrast.

"His natural eloquence *cuts down* the finest orator." — *Addison*.
 To *lessen*; to *abate*; to *curtail*; as, to *cut down* expenses.

To *cut lots*, to draw lots by cutting cards.

To *cut off*, to separate from the other parts by cutting; to *intercept*; to *destroy*; to put an end to; as, to *cut off* an enemy's retreat, to *cut off* from an inheritance, to be *cut off* by death.

"*Cut off* from hope, abandoned to despair." — *Prior*.

To *cut out*, to shape; to form; to adapt; as, to *cut out* a garment.

"Every man had *cut out* a place for himself." — *Addison*.

To take the place of; to *debar*; to *surpass*; to *outdo*; as, to *cut out* a rival in the affections of a mistress.

"I am *cut out* from anything but common acknowledgment." — *Pope*.

To seize by stratagem; to capture by a bold dash; as, *cut out* a ship from under the enemy's guns.

To *cut short*, to hinder or put a stop to by sudden interruption; to bring to an unexpected check; to abridge; to render abortive; as, to *cut short* an opponent's speech, to *cut a man short* of his pay.

"Achilles *cut him short*; and thus replied." — *Dryden*.

To *cut under*, to compete with by offering at a lower price; to *undersell*; to *undervalue*; as, to *cut under* at market. — To *cut up*. To cut to pieces; to damage, hurt, injure, or demolish; to eradicate; as, to *cut up* a bullock, to have one's book *cut up* by a reviewer, to be *cut up* in mind.

"This doctrine *cuts up* all government by the roots." — *Locke*.

To *cut a person*, or the acquaintance of. To drop all intercourse with; to ostracise; to give the cold shoulder.

To *cut the cards*. To divide a pack of cards, in order to determine the trump, deal, or pitch.

To *cut the teeth*. To have the teeth to appear through the gums.

—*v. t.* To pass into, or through, and sever; as, to *cut* a man's leg off; — to enter, and divide the parts; to incise; as, to *cut* for the stone; — to interfere; as, a *cutting* horse; — to separate a pack of cards by dividing it into two portions; as, to *cut* for partners.

—To *bolt*; to run with haste; to dart away with speed; as, to *cut* and run. (Vulgar.) — To *cut one's lucky*. To make off without ceremony; to run away at short notice. (Vulgar.) — To *cut across*. To pass by the most direct way; as, to *cut across* a common. — To *cut in*. To join; to cast one's lot with; as, to *cut in* for a rubber at whist. — To *cut into*. To join, or interrupt without leave or ceremony; as, to *cut into* a conversation.

—*n.* The longitudinal opening made by an edged or sharp instrument, as distinguished from that made by perforation with a pointed weapon or instrument; — hence, a gash; a cleft; a notch; a wound; a slash; as, a *sabre-cut*. (Opposed to *thrust*.) — Action, stroke, or blow given with an edged instrument, as an axe, a sword, knife, &c.; — hence, a hurt, a wound, an injury. — A stroke or blow made by an instrument other than a tool or weapon; as, the *cut* of a whip.

—A sarcasm; a severe remark or criticism; personal slight or discourtesy; avoidance; as, to give a person the *cut* direct.

"This was the unkindest *cut* of all." — *Shaks*.

—A channel; a ditch; a groove; a furrow; a notch; a canal; any hollow in a surface made by cutting.

"This great cut or ditch Sesostris . . . purposed to have made . . . wider and deeper." — *Knolles*.

—A part cut off; any small piece or shred; a portion; as, a *cut* of mutton, a *cut* of scantling.

"It hath a number of short cuts or shreds." — *Hooker*.

—Aspect of the nature of the wound left by a cut; as, an open *cut*, a deep *cut*, a clean *cut*, &c.

—A near passage or way by which an angle of distance is avoided; as, a short *cut* homewards.

"There is a shorter *cut*, an easier passage." — *Decay of Piety*.

—A picture cut or carved upon a block or stamp of wood or copper; — whether instrument or impression; as, a work illustrated with *cuts*.

"Prints or *cuts* of martyrs." — *Browne*.

—Act of dividing a pack of cards into two portions; as, a *cut* for trump.

"The deal, the shuffle, and the *cut*." — *Swift*.

—Manner in which a thing is cut; form; shape; mode; style; fashion; as, the *cut* of a dress-coat, the *cut* of the whiskers.

"Their clothes are after such a Pagan *cut*." — *Shaks*.

—A gelding; a castrated horse or mule.

—A lot drawn by cutting sticks, or slips of paper.

"A man may as reasonably draw *cuts* for his tenets, and regulate his persuasion by the cast of a die." — *Locke*.

Cut and long tail. A proverbial expression for men of all kinds; — originally derived from dogs.

"Come *cut and long tail*: for there be six bachelors as bold as he." — *Ben Jonson*.

Cuta'neous, *a.* [From Lat. *cutis*, the skin; Sansk. *cutti*, a skin, the bark of a tree.] Belonging to the skin; attaching to, existing on, or affecting the skin.

Cutaneous Diseases. See *SKIN (DISEASES OF THE)*.

Cutch, *n.* Oyster spawn.

Cutch-Bhooj, an extensive native state of India, inclosed by Scinde on the N., the Guicowar's dominions on the S., and by the Gulf of Cutch and the Indian Ocean on the S. and S.E.; Lat. between 22° 47' and 24° 40' N., Lon. 68° 26' and 75° 45' E. Area, 14,000 sq. m. The country is mountainous, but contains numerous fertile, level tracts producing cotton, sugar, grapes, and musk-lemmons. — The *Runn of Cutch*, a morass with an area of 7,000 sq. m., is supposed to have been the bed of an inland sea.

Cutch-Gunda'va, a prov. of Beloochistan, E. of the Brahovick Mountains, between Lat. 27° 40' and 29° 15' N., and Lon. 67° 20' and 69° 39' E., having N. Sewestan, (Cabul.) E. and S. Scinde, and W. the prov. Talawan. Area, 10,000 sq. m. It is for the most part a plain, and its soil, rich and loamy, is exceedingly productive. Climate mild in winter, but oppressively hot in summer. The bulk of the pop. are Juts. The chief towns are Gunda'va (the cap.), Dadur, Bhag, and Lheree. Estim. pop. 100,000.

Cutch'ogue, in New York, a post-village of Suffolk co.

Cute, *a.* [A contraction of ACUTE, *q. v.*] Sharp; penetrating; shrewd; clever; acute. (Colloq.)

Cute'ness, *n.* Smartness; sagacity; shrewdness; keenness. (American.)

Cut'grass, *n.* A rough-leaved grass.

Cut'etant Creek, in New York, traverses Tioga co., and joins Oswego Creek about 2 m. N. of Oswego.

Cut'hand, in Texas, a post-office of Red River co.

Cuth'bert, *n.* See ST. CUTHBERT.

Cuthbert, in Georgia, a town, the capital of Randolph co. Pop. (1897) about 2,800.

Cu'ticle, *n.* [Fr.; Lat. *cuticula*, dim. of *cutis*, skin.] (Anat.) The scarf-skin. The exterior membranous covering of the body. In its chemical characters it resembles nail, quill, &c., and has the properties of a condensed form of albumen. See *SKIN*.

(Bot.) The thin vesicular membrane that covers the external surface of veg. tables, and adheres firmly to the cellular substance beneath it. It acts in plants as a means of preventing a too rapid perspiration, and is furnished with respiratory openings called *stomata*.

Cu'ticular, *a.* Pertaining to the cuticle.

Cut-in, (or *IN-CUT*) *Notes*, *n. pl.* (Print.) Side-notes which are not arranged in the front margin down the side of the page, but are inserted in the text by shortening the lines, as if a piece of the text were cut out, and the note put into the vacant space.

Cu'tis, *n.* [Lat.] (Anat.) The true skin or derma. See *SKIN*.

Cut'lass, *n.* (Old spelling CURTLE-AXE, CURTAL-AXE.) [Fr. *couteau*, from Lat. *cutellus*, from *culter*, a ploughshare, a knife; Sansk. *kut*, to cut.] A broad, curving sword; a hanger, used by seamen in hand-to-hand encounters.

"Sharpen your *cutlasses*." — *Sir C. Napier*.

Cut'ler, *n.* [Fr. *couteiller*, from *couteau*, a knife; O. Fr. *cutel*, from Lat. *cutellus*.] One who makes, sells, or sharpens knives, and other cutting instruments.

"*Cutler's* poetry upon a knife; 'love me and leave me not.'" — *Shaks*.

Cut'ler, in Maine, a post-township of Washington co.

Cutler, in Ohio, a post-office of Washington co.

Cut'lery, *n.* The business or trade of a cutler; the business of making knives; or, more generally, knives and other edged instruments, as razors, &c.

—Sharp-edged or cutting instruments generally; as, Sheffield *cutlery*. See *Hardware*.

Cut'let, *n.* [Fr. *cotelette*; O. Fr. *costelette*, dim. of *coste*; Fr. *cote*, from Lat. *costa*, a rib.] (Cookery.) A small piece of meat, either mutton, veal, or lamb, broiled or fried; as, a *Maintenon cutlet*.

Cut'off, *n.* A short cut or passage, to lessen a distance.

(Mach.) A contrivance in a steam-engine for cutting off the passage of steam from the steam-chest to the cylinder, when the piston has moved through part of a stroke, so as to allow the remainder of the stroke to be made by the expansive force of the steam already let in.

Cut Off, in Georgia, a village of Walton co.

Cut'purse, *n.* One who cuts purses in order to steal them or their contents; one who robs from the person; a robber; a pickpocket; a highwayman; a thief.

"To have an open ear, a quick eye, and a nimble hand is necessary for a *cutpurse*." — *Shaks*.

Cuttack, (*kut-tak'*), a large mar. district of Hindostan, prov. Orissa, presidency Bengal, between Lat. 19° 30' and 21° 40' N., Lon. 84° 30' and 87° E., having E. the Bay of Bengal; area, 7,635 sq. m. Among the natural features of the country, the most remarkable is the Chilka Lake, which is, for many miles separated from the sea by a strip of sand not more than 300 yards wide. The chief towns are Cuttack, the cap.; Pooree, with its temples of Juggernaut, at the mouth of the most southerly arm of the Mahanuddy; Kanarak, or the *Black Pagoda*, about 20 m. further to the N.; and Balasore, which gives its name to a roadstead stretching along the coast as far as the Hooghly. Among seamen, this maritime tract is generally distinguished as *Orissa*. Pop. 2,200,000. — CUTTACK, the cap., is abt. 220 m. from Calcutta, and has a pop. of 40,000.

Cuttee, *n.* One who is cut, ostracised, or avoided. (Vulgar.)

—A box used by a weaver.

Cut'-throat, *n.* A murderer; an assassin.

"Unpaid *cut-throats* are abroad." — *Dryden*.

—*a.* Mordacious; cruel; inhuman; barbarous.

"*Cut-throat* and abominable dealing." — *Carew*.

Cut'ting, *n.* A piece cut off anything; specifically, a twig or scion, cut off for the purpose of grafting or planting it; as, grape-vine *cuttings*. — A separation or di-

vision; an incision, as of flesh. — An excavation made through earth or rock, in making a road, canal, &c.; as, a railroad *cutting*. — Division, as of a pack of cards.

Cut'ter, *n.* He or that which cuts; as, a tailor's *cutter*; a paper-*cutter*, &c. — A fore-tooth, or incisor, that cut meat; in contradistinction to a *grinder*.

—A kind of sleigh or sledge drawn by one horse.

—In England, an officer of the Court of the Exchequer who provides wood for the tallies, and cuts the sum paid upon them.

—A kind of brick for facings.

(Naut.) A vessel with one mast and a bowsprit, of considerable breadth in proportion to her length. The distinction between a cutter and other vessels with one mast — which are called sloops — is, that in the cutter the jib has no stay to support it.

Cut'tingly, *adv.* In a cutting or contemptuous manner.

Cut'tingsville, in Oregon, a P. O. of Clackamas co.

Cuttingsville, in Vermont, a post-village of Rutland co.

Cut'tle, *Cut'tle-fish*, *n.* [A.S. *cudele*; W. *cuddia* to hide, from *cudd*, darkness, gloom.] (Zool.) S. SEPIAIDE.

Cut'twal, *n.* [Hind.] In India, a native superintendent of police.

Cut'ty, *n.* [Scot.] A spoon made of horn. — A short cl tobacco pipe, for carrying in the mouth; as, a *Burr cutty*.

—An unchaste woman; a harlot. (Scottish.)

Cut'ty, *a.* Short; handy; easy to hold; as, a *cutty-pipe*.

Cut'tyhuuk Island, the most S.W. of the Elizabeth Islands, at the entrance of Buzzard's Bay, Massachusetts. It has a fixed light on its S.W. end, 48½ ft above the level of the sea. Lat. 41° 24' 35" N., Lon. 75° 20' W.

Cut'ty-stool, *n.* [From Scot.] A stool of penan formerly placed in Scottish churches, whereon unchaste women were seated during divine service, in order to publicly admonish by the minister.

Cut'water, *n.* (Naut.) The foremost part of a ship's prow, which projects forward of the bows, and cuts the water when sailing.

—The angular segment of the buttress of a bridge built to face the current of a stream, and divide the force of its pressure upon the abutments.

—(Zool.) A name of the Razor-bill, *Alca torda*. (See Fig. 238.)

Cut'-worm, *n.* A name given to the caterpillar of many species of moths of the fam. *Noctuidæ*, who remain day about the roots of young plants, and come forth at night to cut off the tender stems and leaves.

Cuvette, *n.* [Fr.] In glass manufacture, a large capable for fusing plate-glass.

Cuvier, GEORGES CHRÉTIEN LÉOPOLD DAGOBERT, BARR. (*koo've-ai*), one of the greatest naturalists the world has produced, b. at Montbéliard, France, 1769. After finishing his education at Stuttgart, young C. accepted the situation of tutor in a Protestant family in Normandy. T. Abbé Texier, whom the troubles of the time had driven into exile from the capital, introduced him by letter MM. Jussieu and Geoffroy. Several memoirs, written about this time, and transmitted to the latter, established his reputation, and procured his admission to two or three of the learned societies in Paris. In 1800 was appointed successor to Daubenton as professor

Fig. 749. — G. CUVIER.

natural history at the college of France, and in 1802 succeeded Mertrud in the chair of comparative anatomy at the Garden of Plants. From that time he devoted himself steadily to the studies which have immortalized

his name. His *Leçons d'Anatomie Comparée*, and the *Règne Animal*, in which the whole animal kingdom is arranged according to the organization of the beings of which it consists, have raised him to the pinnacle of scientific fame, and established him as perhaps the first naturalist in the world after Linnæus. His numerous memoirs and works upon these subjects show a master-mind in the study of zoology; and extending the principles laid down in his comparative anatomy to the study of paleontology, he has been enabled to render immense service to geology. Starting from the law that there is a correlation of forms in organized beings,—that all the parts of each individual have mutual relations with each other, tending to produce one end, that of the existence of the being,—that each living being has in its nature its own proper functions, and ought therefore to have forms appropriated for that function; and that consequently the analogous parts of all animals have received modifications of form which enable them to be recognized,—he was able to ascertain from the inspection of a single fossil bone, not only the family to which it ought to belong, but the genus to which it must be referred. Even the very species of animal was thus to be made out, and the restoration of its external form as it might have lived and died, became in his hands an object of certainty and precision. His *Règne Animal* has been frequently translated, and forms the basis of all arrangements followed at the present time. Cuvier filled many offices of great importance in the state; particularly those connected with educational institutions. Napoleon treated him with much consideration; Louis XVIII. and Charles X. advanced him to honor; and Louis Philippe raised him to the rank of a peer of the realm. D. 1832.

Cuvier, Frederic, the younger brother of the above, b. 1773, was also devoted to the pursuits of natural history. His most important work is, *On the Teeth of Animals*, published in 1822. D. 1838. His last words were: "Let my son place upon my tomb this inscription: Frédéric Cuvier, brother of Georges Cuvier."

Cuxhaven, (*kooz-ha'fen*), a town with a fine harbor, at the mouth of the river Elbe, in Germany, belonging to the territory of Hamburg, 55 m. W. of the city of Hamburg. Lat. 53° 52' 21" N., Lon. 8° 5' E. Pop. 2,000.

Cuyabá, or **Cuia'ba**, in Brazil, a river which rises in the district of Diamantino, and joins the Porrrudos, or São Lourenço.

A city near the above river, cap. of the prov. Matto Grosso. Lat. 15° 26' S., Lon. 56° W. Pop. 8,000.

Cuyahoga, in Ohio, a N. N. E. co., bordering on Lake Erie; area, about 426 sq. m. It is traversed by the Cuyahoga river, and also by Chagrin and Rocky rivers. The surface is level and the soil fertile. Cap. Cleveland. Pop. (1890) 313,037.

A river which rises in Geauga co., and after flowing S., and then S. W. to Akron, in Summit co., turns to the N. W. and enters Lake Erie at Cleveland, in Cuyahoga co.

Cuyahoga Falls, in Ohio, a fine town and township of Summit co., 5 m. N. E. of Akron. Pop. about 3,000.

Cuyler (*kí'ler*), in New York, a post-township of Cortland county.

Cuylerville, in New York, a P. O. of Livingston co.

Cuzco (*kooz'ka*), an inland city of Peru, cap. of a dep. of same name—and formerly cap. of the empire of the Incas—at the foot of some hills, 11,380 ft. above the level of the sea, about 400 m. E. S. E. of Lima; Lat. 13° 30' 55" S., Lon. 72° 4' 10" W. According to tradition, this town was founded in 1043, by Manco Capac, the first Inca of Peru. The grandeur and magnificence of the edifices, of its fortress, and of the Temple of the Sun, struck the Spaniards with astonishment in 1534, when the city was taken by Francis Pizarro. On the hill towards the north are yet seen the ruins of a fortress built by the Incas, and which had a communication, by means of subterranean passages, with three forts built in the walls of Cuzco. All the descendants of the Incas resided in a particular quarter of the city. Pop. 40,000.

ct., *n.* An abbreviation of *hundred-weight*.

camelide, *n.* (*Chem.*) A white insoluble solid, resulting from a spontaneous molecular re-arrangement of hydrated cyanic acid. Form. CNOH.

camus, *n.* (*Zoöl.*) A small crustaceous animal belonging to the sub-order *Tetradecapods*. They infect different species of *Cetacea*, living on their rough skin, and gnawing it more or less deeply.

canéan, *a.* [*Gr. kyaneos*, from *kyanos*, a dark-blue substance.] Having a dark-blue or an azure color.

cyanic Acid, *n.* (*Chem.*) When cyanogen is passed through a solution of an alkali, a change takes place similar to that which occurs when chlorine is used in the same manner. Cyanide and cyanate of the base are produced; the cyanic acid, however, containing only one equivalent of oxygen, instead of five, as in the case of chloric acid. There are several more convenient methods of producing cyanic acid than the one named. One is by heating an intimate mixture of two parts of ferrocyanide of potassium with one of peroxide of manganese; the mass being constantly stirred until it reaches a low red heat. When cool, cyanate of potash may be dissolved out. Cyanic acid is so unstable that it cannot be separated from its compounds by an acid. It is best produced by distilling *cyanuric acid* (which see), a crystalline compound having precisely the same composition, in a sealed tube. It is extremely pungent, very volatile, and acts as a powerful caustic if dropped on the flesh. It cannot be preserved, as it gradually changes into a white glassy mass, destitute of acid properties, soluble in water, and permanent in air. This body has been named *cyamelid*, and has exactly the same components as hydrated cyanuric and cyanic acids. Form. (CNO).

Cyanide, *n.* (*Chem.*) A compound of cyanogen with a metal. Prussian-blue is a cyanide of iron.

Cyanine, *n.* (*Chem.*) The coloring matter of red and blue flowers. Alcohol extracts it from the petals of the violet or iris. Alkalies turn it blue and green; acids red-dens it.

Cyanite, *n.* (*Min.*) A massive and crystallized mineral. It has a pearly lustre, is translucent, and of various shades of blue. It is a silicate of alumina, with a trace of oxide of iron. Only found in primitive rocks. Comp. Silica 36.8, alumina 63.2.

Cyanogen, *n.* [*Gr. kyanos*, and *gennao*, I produce.] (*Chem.*) C₂, or bicarbide of nitrogen is one of the most interesting of the carbon compounds, its discovery by Gay-Lussac in 1814 having thrown considerable light upon two important facts in chemical science,—the existence of compounds acting as elements; and of substances having the same ultimate composition, but different properties. In fact, it was the means of originating new theories with respect to organic bodies generally. The name *cyanogen*, signifying *blue-producer*, was bestowed on this substance in consequence of its forming an essential ingredient in Prussian-blue. C cannot be formed by the direct union of its elements, but may be obtained by passing nitrogen over a mixture of charcoal and carbonate of potash heated to redness in a porcelain tube. The potash becomes reduced to potassium, carbonic oxide escapes, and C is formed, which unites with the potassium, yielding cyanide of potassium. The reaction that takes place is interesting—

The compounds of C are, however, generally obtained from the ferrocyanide of potassium, a salt formed by heating in a covered pot five parts of refuse animal matter, such as hide, hoof, and horn waste, with two parts of potash and iron filings. The mass, when cold, is digested in water, which dissolves out the ferrocyanide of potassium. Ten parts of this salt, distilled with 7 parts of oil of vitriol, and 5 or 6 parts of water, yield hydrocyanic or prussic acid, which, if saturated with oxide of mercury, furnishes cyanide of mercury. This, on being dried and heated in a retort, furnishes C. It is a colorless gas, with a peculiar penetrating odor. It is poisonous in its effects if breathed, and it burns with a beautiful purple flame. It dissolves in one-fourth of its bulk of water, in one-twenty-fifth of alcohol, and may be submitted to a high temperature without decomposition. It is easily liquefied by a pressure of 4 atmospheres. In the liquid state it is colorless, limpid, and lighter than water. At -50° Fahr. it freezes, forming a transparent crystalline solid. C, which is in itself a compound radical, has the property of uniting with various elements to form still more complicated radicals. Thus, with iron it forms 2 compounds,—*ferrocyanogen*, FeC₃, or FCy, and *ferridcyanogen*, Fe₂C₆, or FdCy; with cobalt, cobaltcyanogen; with manganese, mangani-C; with platinum, platino-C; with palladium, palladio-C; with iridium, iridio-C; and with copper, cupro-C;—which all behave as elements, uniting with the metals, and forming hydrides with hydrogen. The principal compound of C is cyanic acid, composed of an equivalent of C, and an equivalent of oxygen, which has been described under the head of *Cyanic Acid*. It also forms five other compounds with oxygen, all of which possess precisely the same composition, but differ remarkably in their properties. They are cyanuric, cyanilic, fulminuric, fulminic acids, and a body called *cyamelid*. Descriptions of their properties will be found under their respective headings. With nitrogen, cyanogen forms *cyanamide*. C forms with chlorine 3 compounds, which have all the same ultimate composition, but differ materially in their properties. One of them is gaseous, another liquid, and the third solid. With iodine and bromine it forms solid combinations; with sulphur it forms a compound radical, sulphocyanogen (SCy), which, with hydrogen, forms hydrosulphocyanic acid; with selenium a similar compound is formed. The cyanides of the alkalis and earths are soluble, those of the heavy metals mostly insoluble in water. The most important of these is the *cyanide of potassium*, which is obtained by heating to redness in an iron crucible 5 parts of ferrocyanide of potassium and 3 of carbonate of soda, until the mixture has ceased to be of a yellow color, and has given off the last bubble of gas. This salt is made in large quantities for the use of electrolytists and photographers. The former use it as a solvent for gold and silver in electro-plating; the latter to remove the unneeded iodide of silver from the collodion-plate. C is prone to form double salts with the metals. Cyanide of potassium, when added to solutions of the heavy metals, throws down a precipitate, which is soluble in an excess of the precipitant, forming a double cyanide of potassium and the metal. These double cyanides are of two classes,—those which form salts easily decomposed by hydrochloric acid, such as cyanide of potassium and silver; and those which are not so easily decomposed, such as the cyanides of potassium and iron, of potassium and cobalt, and several others. The salts of the second class are looked upon by chemists as containing the metal united with the cyanogen, forming an organic radical. This will, perhaps, be better understood by considering the following formulae:

1st class.—Double cyanide of nickel and potassium, NiCy.KCy.

2d class.—Double cyanide of iron and potassium, or ferrocyanide of potassium.

Cyanide of potassium. Cyanide of iron. Potassium. Ferrocyanogen.

In the latter salts the heavy metal is generally masked; thus the iron in ferrocyanide of potassium is not distin-

guishable by the usual tests for that metal. The whole theory of cyanogen and its compounds is most intricate, and cannot be entered into here. Those who wish to pursue the subject further are referred to the discussion of the properties of cyanogen, and its compounds, in the third volume of Miller's *Elements of Chemistry*. When binoxide of nitrogen is passed through a solution of hydro-ferrid cyanic acid, a decomposition takes place, an equivalent of hydrocyanic acid being replaced by an equivalent of binoxide of nitrogen. The compounds formed by this radical will be described under the head of *NITRO-FERRIDES*.—Equivalent, 26; sp. gr., 1.8664; combining value, 2. Form. Cy, or C N₂.

Cyan'olite, *n.* [*Gr. kyanos*, and *lithos*, stone.] (*Min.*) An iridescent bluish silicate of lime, forming the central part of a nodule found in crystalline trap-rock in the Bay of Fundy.

Cyanometer, *n.* [*Gr. kyanos*, and *metron*, measure.] An instrument contrived by Sansure for determining the deepness of the tint of the atmosphere. A circular band of thick paper or pasteboard is divided into fifty-one parts, each of which is painted with a different shade of blue, decreasing gradually from the deepest blue formed by a mixture of black, to the lightest formed by a mixture of white. The colored zone is held in the hand of the observer, who notices the particular tint which corresponds to the color of the sky. The number of this tint, reckoned from the lightest shade, marks the intensity at the time of observation.

Cyanopathy, *n.* [*Gr. kyanos*, and *pathos*, suffering.] (*Med.*) The blue disease, or *CYANOSIS*, q. v.

Cyano'sis, *n.* [*Gr. kyanosis*.] (*Med.*) A diseased condition of the system, arising from a malformation of the heart, allowing the inter-mixing of the venous with the arterial blood, in consequence of which the former is not properly oxygenized, and a blueness is imparted to the skin; whence the disease takes its name. Little can be done towards effecting a cure of this disease; and though it interferes with the functions of the body and produces general weakness, it does not necessarily destroy life. It is commonly called the *Blue Disease*.

Cyan'osite, *CHALCANTHITE*, *n.* (*Min.*) Native sulphate of copper. This salt is rarely found in distinct crystals, but generally in stalactitic and other forms in the fissures and hollows of old mines, or dissolved in the waters which issue from them. Comp. Sulphuric acid, 32.1; oxide of copper, 31.8; water, 36.1.

Cyann'ic Acid, *n.* (*Chem.*) This acid is obtained in a variety of ways, which need not be described here. It is deposited from its aqueous solution in colorless rhombic prisms. It is sparingly soluble in cold water, more freely in boiling alcohol, and still more so in boiling water. It is polymeric with cyanic acid and several other products of cyanogen. Form. C₂H₂O₂H₂.

Cybele, (*Myth.*) A name of the goddess Rhea, the daughter of Cælus and Terra, (Heaven and Earth,) and sister and wife of Saturn. She is also called the *mother of the gods*, and is usually represented with a gravid uterus, and many breasts, as symbolical of the fecundity of the earth, and the prolific fountains of plenty it produces.

Cycadea'ceæ, *n. pl.* (*B. t.*) An ord. of plants, alliance *Gymnogens*.—*DIAG.* Simple, continuous stem, parallel-veined pinnate leaves, and antheriferous cone-scales.—They are small palm-like unbranched trees or shrubs, with stems marked by the scars of fallen leaves. In a few species the stem divides in a forked or dichotomous manner. The leaves are clustered at the summit, are pinnate, parallel-veined, hard, and usually circinate in vernation. The flowers are quite naked, unisexual, and dioecious; the male flowers in cones, consisting of scales, from the under surface of which one-celled anthers arise; the female, consisting of naked ovules placed on the margins of alternate leaves, or of ovules arising from the base of flat scales, or from the under surface of peltate ones. The seeds are hard or succulent, with embryos, single or many, in fleshy or mealy albumen. The plants are principally natives of the tropical parts of America and Asia, and are also found occasionally at the Cape of Good Hope, in Madagascar, and Australia. Their stems and seeds yield mucilage and starch. The product known as Japan sago is said to be obtained from a species of the typical gen. *Cycas*. The order includes 45 species in 6 genera.

Cy'cadites, *n.* (*Geol.*) Fossil plants of the oölite and chalk, of which the leaves only are known. They are apparently allied to the existing *Cycadea'ceæ*.

Cyclades, a group of 15 islands of the Grecian Archipelago; so called because they lay in a circle around Delos, the smallest of them. See *ARCHIPELAGO*.

Cycladidæ, *n. pl.* (*Zoöl.*) See *CRASSIDÆ*.

Cycle, (*si'kl*), *n.* [*Fr.: Gr. kyklos*, allied to *W. cych*, a circle; Sansk. *kuch*, to curve, to bend.] The revolution of a certain period of time which finishes and recommences perpetually. Cycles were invented for the purposes of chronology, and for marking the intervals in which two or more periods, of unequal length, are each completed a certain number of times, so that both begin again exactly in the same circumstances as at first. These divisions are artificial or arbitrary, and have been invented to compensate for the impossibility of measuring natural cycles, such as the revolution of the earth round the sun, or that of the moon round the earth, by our divisions and subdivisions of time. An explanation of the most remarkable of these cycles, and those in common use, will be found under their respective names.—An abbreviated form for bicycle, tricycle, etc.

—*c.* To ride a cycle.

(*Astron.*) An imaginary orb, or circle, in the heavens.

Cyclamen, *n.* (*Bot.*) A gen. of plants, order *Primu-*

lancea, distinguished by having a wheel-shaped corolla, with a long reflexed limb, and flower-stalks twisted spirally downwards after flowering. The species are herbaceous perennials, not numerous, and chiefly natives of the S. of Europe. They have turnip-like, partly sub-

Fig. 750. — THE PERSIAN CYCLAMEN, (*C. Persicum*.)

terranean stems, which are very acrid, but nevertheless are greedily eaten by swine, and the plants are accordingly often designated SOW-BREAD. They are drastic and emmenagogue. A very stimulating ointment is prepared from them, which, externally applied by friction, expels intestinal worms from children. Several of the species are frequent in our flower-gardens, on account of the beauty and fragrance of their flowers, which have the additional charm of being produced early in spring. The most beautiful species, *C. Persicum* has been imported into this country.

Cyclar, *n.* Same as CYCLIST.

Cyclie, **Cyclieal**, *a.* Circular; pertaining to a cycle; containing a cycle; as, *cyclical* time.

Cycling, *n.* The art or practice of riding a cycle.

Cyclist, *n.* One who rides a cycle.

Cyclograph, *n.* [Gr. *kyklos*, and *graphein*, to write.] An instrument for drawing arcs of circles without centres, used in architectural and engineering drawings, when the centres are too distant to be conveniently accessible.

Cycloid, *n.* [Gr. *kyklos*, and *eidos*, form.] (*Geom.*) The curve of swiftest descent; that is, a body will descend from a given height in less time on this than on any other curve, or even than on an inclined plane. On this curve depends the doctrine of pendulums. See CYCLOIDAL.

Cycloid, **Cycloidian**, *n.* (*Zool.*) An order of fishes, formed by Agassiz, embracing fishes whose scales are rounded and smooth on the edge, as salmon and cod.

Cycloidal, *a.* Pertaining, or relating, to a cycloid.

C. curves are defined as follows:—1. When a circle is made to rotate on a rectilinear basis, the figure described on the plane of the basis by any point in the plane of the circle is called a *trochoid*: a circle concentric with the generating circle, and passing through the describing circle. 2. If the describing point is in the circumference of the rotating circle, the two circles coincide, and the curve is called a *cycloid*. 3. If a circular basis be substituted for a rectilinear one, the trochoid will become an *epitrochoid*, and the cycloid an *epicycloid*.

Cyclometer, *n.* (*Mech.*) A recent invention for measuring and recording the distance traversed by wheeled vehicles, such as carriages, steam-cars, or bicycles. The apparatus most largely employed in rail-roading is attached to the wheels of a car and records their revolutions, the number of miles passed over being indicated on a sheet of paper inside the car. The instrument is automatic in action, and is capable, by a very ingenious attachment, for indicating and locating every inequality in the roadbed of a railroad.

Cyclometry, *n.* The art of measuring circles.

Cyclone, (*Meteorol.*) See SECTION II.

Cyclonic, *a.* Belonging or relating to a cyclone; as, a *cyclonic* latitude.

Cyclope'dia, **Cyclope'dia**, *n.* See ENCYCLOPEDIA.

Cyclope'an, *a.* [From Gr. *kyklops*—*kyklos*, a circle, and *ops*, the eye.] Pertaining to the Cyclops;—hence, gigantic; vast; ponderous; barbarous; terrific; as, a *Cyclopean* statue.

Cyclope'an Architecture, *n.* An expression applied to certain huge structures, the remains of which are found in many parts of Greece, Italy, and Asia Minor,

the architecture of which was totally different from that which prevailed in the historical ages. The epithet originated in the Grecian tradition that assigned the

Fig. 751. — CYCLOPEAN DOOR OF THE LIONS.
(*Mycenæ*.)

buildings to the gigantic strength of the Cyclops. They are distinguished by the irregular character of the masonry, and the large dimensions of the stones, which are laid without any mortar.

Cycloped'ic, *a.* See ENCYCLOPÆDIC.

Cyclop'ic, *a.* [From Gr. *kyklops*.] Relating or pertaining to the Cyclops; gigantic; huge; barbarous.

Cyclops, *n. sing. and pl.* [From Gr. *kyklos*, and *ops*.] (*Myth.*) A race of gigantic beings, represented by the later poets as dwelling in Sicily, where they assisted Hephestus, or Vulcan, in forging the thunderbolts of Jupiter. They had only one eye, round, and situated in the centre of the forehead. The most celebrated among them was Polyphemus, a son of Poseidon, the god of the sea. The ninth book of the Odyssey relates his discomfiture by Odysseus (Ulysses). They were reckoned among the gods, and sacrifices were solemnly offered to them at Corinth. Apollo destroyed them all, because they had made the thunderbolts of Jupiter, with which his son Æsculapius had been killed.

(*Zool.*) A genus of minute crustaceans, order Entomostraca, comprising numerous species, some of which belong to fresh water, while others are marine. The fresh-water species abound in the muddiest and most stagnant pools, and often too in the clearest springs; the marine species are to be found, often in vast numbers, among the sea-weeds, in small pools on the seashore; others there are which inhabit the open ocean, where, by the luminous properties they possess, they contribute to its phosphorescence. They take their name from having but one eye. They have all eight or ten legs, and the abdomen is terminated by a bifid tail adapted for swimming.

Cyclop'ite, *n.* (*Min.*) A hydrated silicate of alumina and lime, with minor proportions of peroxide of iron, magnesia, soda, and potash.

Cyclostome, **Cyclostomous**, *a.* [Gr. *kyklos*, and *stoma*, mouth.] (*Zool.*) Having a circular mouth; round-mouthed.

Cyclo-stylar, *a.* [Gr. *kyklos*, and *stylos*, pillar.] (*Arch.*) Relating to a structure composed of a circular range of columns, without a cove; with a cove the range would be a peristyle.

Cy'der, *n.* A form of spelling CIDFR, *q. v.*

Cy'dippe, *n.* (*Zool.*) See PLEURO-RANCHIA.

Cydonia, *n.* [From *Cydonia*, in Candia, its native place.] (*Bot.*) The Quince, a

genus of plants, order Pomaceæ, distinguished from the genus *Pyrus* by the leafy calyx-lobes, and the many-seeded cells of its fruit. The quince is a well-known, hardy, deciduous tree, cultivated for its austere fruit, which, however, is turned to good account by cooks and confectioners.

Cyesil'ogy, *n.* [Gr. *cyesis*, pregnancy, and *logos*, a discourse.] (*Med.*) The doctrine of gestation.

Cygn'et, (*sig'net*), *n.* [Fr. *cygne*; Lat. *cygnus*; Gr. *kyknos*, probably allied to Sansk. *kubt*, humped; Lith. *kupra*; Lat. *gibbus*, from its rounded neck or humped back.] (*Zool.*) A young swan.

"So doth the swan her downy cygnets save."—Shaks.

Cygnus, *n.* [Lat., the swan.] (*Zool.*) See SWAN.

(*Astron.*) A constellation in the N. hemisphere, between Lyra and Calliopeia. According to the British catalogue, *C.* contains 81 stars, the most brilliant of which is *Ariedel*, or *Deneb cygni*, of the 2d magnitude. *C.* is nearly in the same meridian with Dolphin.

Cylin'dric, **Cylin'drical**, *a.* Having the form of a cylinder, or resembling or partaking of its properties; as, the *cylindrical* canals of the body.

C. vault, (*Arch.*) A vault without groins, resting upon two parallel walls.

Cylinder, (*sil'in-dur*), *n.* [Gr. *kylindros*, from *kylindō*,

from *heilōo*, to roll; Heb. *galal*. See ROLL.] (*Geom.*) A long, circular body of uniform diameter, whose ends form equal parallel circles. It is generated by a line which moves parallel to itself, while one end traces upon a plane any curve whatever. When the position of the generating line is at right angles to the plane, the *C.* is *right*; when not, it is *oblique*, &c. In all cases the content of the *C.* is found by multiplying the number of square units in the base by the number of linear units in the altitude, which is the perpendicular distance between the two ends. The area of the convex surface is equal to a rectangular parallelogram whose base is the circumference of the end, and its height the length of the generating line. To this must be added the areas of the two ends, to get the whole surface of the cylinder.

Fig. 753. — RIGHT CIRCULAR CYLINDER

(*Steam-Engine*.) That part of the engine in which the piston works, and from which, by alternately admitting and condensing the steam, all the power of the machine is derived. The boring of cylinders for steam-engines requires very powerful and accurate machinery. The cylinder is cast hollow, and the object of the boring machine is to produce a true *C.* with an even surface so that the piston may fit exactly and work freely. Some machines for this purpose act horizontally and others vertically; while the cutters revolve and advance by the action of some powerful prime mover. The operation is generally repeated three times, in the last of which the greatest care is required.—The *C. cover* the lid bolted to a flange round the top of a cylinder, as to be perfectly steam-tight; it has a stuffing-box in the centre, through which the piston-rod alternately passes.—The *C. cocks* are cocks placed in convenient parts of the cylinder for admitting oil to lubricate the piston; by which to blow out the condensed steam, or any deposit in cylinders.

Cyl'inder, *n.* (*Agric.*) A roller used for levelling and condensing the ground in agriculture and other operations.

Cylin'drically, *adv.* In a cylindrical manner.

Cylindric'ity, *n.* State of being cylindrical.

Cylin'driform, *a.* [Cylinder and form.] Having the form of a cylinder.

Cylin'droid, *n.* [Gr. *kylindros*, and *eidos*, form.] A solid body resembling a cylinder, but having the base or ends elliptical. (*o.*)

Cylindromet'ric, *a.* [Gr. *kylindros*, and *metron*, measure.] Pertaining to a scale for measuring cylinders.

Cyton, in Wisconsin, a post-township of St. Croix co. pop. abt. 500.

Cy'ma, *n.* [Lat.] (*Arch.*) A term applied to a mould deriving its name from its contour resembling that of a wave; being hollow in its upper part and swelling below. Of this moulding there are two sorts: the *cyma recta*, just described, and the *cyma reversa*, whose upper part swells, whilst the lower is hollow. By the workmen these are called *ogees*.

(*Bot.*) Same as CYME, *q. v.*

Cy'mar, *n.* Same as SMAR, *q. v.*

Cymbal, (*sim'bal*), *n.* [Lat. *cymbalum*; Gr. *kymbal* from *kymbos*, a cavity, or hollow vessel; probably fr. Sansk. *kamap*, to tremble, to vibrate.] (*Mus.*) A bowl-shaped brass musical instrument. In playing, two of them are struck together, producing a sharp, ringing sound. The origin of this instrument is very ancient.

Fig. 755. — ANCIENT CYMBALS AND TAMBOURINE.

probably anterior to that of the tambourine. They are often mentioned in Scripture, and, from Psalm c. it would appear that both hand-*C.* and finger-*C.* (fig. 755) or castanets, were used.—Modern *C.* are, *par excellence*, military instruments; and when played with taste, form a very pretty addition to the band. They are instruments of percussion; and, when struck together, produce a loud, harsh tone of no fixed pitch. The best *C.* are obtained from China and Turkey; and attempts of Europeans to discover the metal of which

they are made have hitherto proved abortive. Although best adapted for military bands, modern composers often introduce them in the orchestra with very pleasing effect.

ym'biform, *a.* [Lat. *cymba*, boat, and *forma*.] Boat-shaped.

ym'e, (*sime*), *n.* [Gr. *kyma*, a sprout.] (*Bot.*) A common term for the different kinds of definite inflorescence; that is to say, for every inflorescence formed of a terminal flower, beneath which are lateral branches, each having a terminal flower, and lateral branches again similarly dividing, and so on. See INFLORESCENCE.

ymif'erous, *a.* [Lat. *cyma*, a cyme, and *fero*, to bear.] (*Bot.*) Yielding cymes.

ymogene, a product from the distillation of coal oil.

ymoid, *a.* [Gr. *kyma*, and *eidōs*.] In cyme shape.

ymol, *n.* (*Chem.*) A hydrocarbon, contained in the volatile oil of cumin.

ym'ophane, *n.* (*Min.*) Same as CHRYSOBERYL, *q. v.*

ymoph'auous, *a.* Opalescent; having a flamboyant light or lustre.

ymose, **Cymous**, *a.* [Fr. *cimeux*.] In the form of, or possessing, a cyme.

yn'auche, (*si-nān'ke*), *n.* [From Gr. *kynōs*, a dog, and *igēho*, to suffocate.] (*Med.*) A general name for several diseases of the throat, the two principal being *C. trachealis*, (*CROUP*, *q. v.*) and *C. tonsillaris*, (inflammatory QUINSE, *q. v.*)

yn'an'tropy, *n.* From Gr. *kynōs*, a dog, and *anthropos*, man.] (*Med.*) A variety of melancholia, in which the patient believes himself changed into a dog; and mutes the voice and habits of that animal.

yn'ara, *n.* (*Bot.*) A genus of plants, order *Asteraceæ*, containing the Artichoke, the Cardoon, and similar plants, which have their capitula surrounded by a hard, piny, or lacerated involucre, and long, equal, tubular lobes with an inflated limb.

yn'ara'ceous, *a.* Pertaining to plants of the *Cynara* tribe.

yn'arctom'achy, *n.* [Gr. *kyōn*, dog, *arktos*, a bear, and *machē*, combat.] Bear-baiting with a dog.

yn'arho'dium, *n.* (*Bot.*) A fruit with distinct valves, and hard indehiscent pericarps enclosed within the fleshy tube of the calyx, as in *Rosa*.

yn'ic, (*sin'ik*), *n.* [Gr. *kynikos*, from *kyōn*, *kynōs*, a dog.] Surly or snarling, growling, ill-natured man; a misanthrope. See CYNICS.

yn'ic, **Cynical**, (*sin'ik-l*), *a.* Snarling; captious; surly; envious; austere; misanthropical; satirical; as, *cynical phrase*.

—Belonging to, or resembling, the Cynics school of philosophy. —Relating or pertaining to the dog-star; as, a *cynic year*.

yn'ically, *adv.* In a cynical, snarling, captious, or surly manner.

yn'icalness, *n.* Misanthropy; moroseness; contempt of the world.

yn'icism, *n.* Austerity; churlish severity of temper; state or condition of a cynic.

yn'ies, *n. pl.* (*Phil.*) A sect of philosophers among the Greeks, so called from their snarling humor, and their regard of the conventional usages of society; the name being probably derived from *kyōn*, a dog. According to some authorities, however, *cynic* is formed from *ynosarges*, the name of the gymnasium in which the founder expounded his system. He taught that the true dignity of man consists in wisdom, and wisdom in independence of mind; and being by birth poor, and consequently excluded from all political rights, he maintained at this independence, or, rather, freedom from all restraint, was to be attained by man, rendering his wants few and simple as possible. He is represented as teaching that pain and labor, and even infamy, are benefits; and that pleasure, on the contrary, is an evil. His doctrine of the supreme good is a life according to virtue, which consists in action, and requires neither many words nor extensive knowledge. He condemned all civil institutions, despised the ties of kin or country, and saw no wedlock no higher or better end than the propagation of the species. These peculiar views were carried to still greater lengths by his followers. The most famous of these, besides their founder, were Diogenes of Sinope, Crates of Thebes with his wife Hipparchia, and Menippus. At length the sect became so disgusting from their pudence, dirty habits, and profligacy, that they ceased to be regarded with any respect, and passed into obscurity.

The great merit of this system is, that it paved the way for the establishment of Stoicism, by which it was succeeded and superseded.

yn'ips, *n.* **Cynip'idæ**, *n. pl.* [Gr. *kyn*, to impregnate.] See GALL-FLIES.

yn'odon, *n.* [Gr. *kyōn*, dog, and *odos*, tooth, alluding to the singular, one-sided spikelets.] (*Bot.*) A genus of plants, order *Graminaceæ*. The most important species is *C. dactylon*, a grass very widely diffused, being the principal fodder-grass, and best pasture-grass of India.

Here it is the principal covering of many thousands of square miles, and is known by the names of *Dhob*, *oorba*, &c. It is a vigorous creeper, known in this country as *Bermuda-grass*, and found from Pennsylvania to Georgia, in sandy and hard soils.

yn'oglossum, *n.* [Gr. *kyōn*, dog, and *glossa*, tongue.] (*Bot.*) A genus of plants, order *Boraginaceæ*. The most important species is *C. officinale*, a perennial, erect, fleshy plant, of a dull green color, and emitting a disagreeable smell, which several distinguished botanists have compared to the smell of young mice. Grows in waste grounds and roadsides. The Virginia Mouse-ear, *Morrisoni*, found from Canada to Florida in rocky woods and rubbish, has a stem much branched, and small, white flowers.

Cyno'mis, *n.* (*Zoöl.*) A gen. of animals, ord. *Rodentia*. See PRAIRIE-DOG.

Cynomo'rimum, *n. pl.* (*Bot.*) See BALANOPHORACEÆ.

Cynorex'ia, *n.* [Gr. *kyōn*, dog, and *orexis*, appetite.] (*Med.*) An insatiable appetite. See CANINE.

Cynoseph'alæ, (*Anc. Hist.*) "The Dog's Heads," (*kyōn*, dog, and *kephalai*, heads), a range of mountains in Thessaly, where two battles were fought: the first B. C. 364, between the Thebans and Alexander of Phœæ, when the former were victorious, though Pelopidas, their leader, was slain. — The second, in which the Roman consul Flaminius defeated Philip V. of Macedon, was fought B. C. 197.

Cynosure, (*sin'ō-zhūr*), *n.* [Gr. *kynosoura* — *kyōn*, *kyōs*, a dog, and *oura*, tail. The Dog's Tail.] (*Astron.*) The constellation of the Lesser Bear, to which, as containing the North star, the eyes of mariners and travelers were, in former times, directed. See URSA MINOR.

—A centre of attraction or observation; anything to which the attention is strongly directed.

Cynosu'rus, *n.* [Gr. *kynosoura*, a dog's tail.] (*Bot.*) A genus of plants, order *Graminaceæ*, including the crested Dog's-tail or Gold-seed.

Cyn'thia, *n.* (A name of Diana.) (*Zoöl.*) A genus of diurnal lepidoptera, belonging to the *Nymphalidæ*. The species *C. cardui*, the Painted Lady-butterfly, which is the most remarkable of the genus, has the wings in general of a brownish-yellow color, dappled with black spots or clouds of various shapes.

(*Bot.*) A genus of plants, order *Asteraceæ*.

Cyn'thian, in Ohio, a village and township of Shelby co., 90 m. W.N.W. of Columbus.

—A village of Clermont co.

Cyn'thia'ua, in Indiana, a village of Hamilton co.

—A post-village of Posey co.

Cyn'thia'ua, in Kentucky, a city, the cap. of Harrison co., 37 m. N.E. of Frankfort. Pop. (1897) abt 3,300.

Cyn'thia'ua, in Ohio, a post-village of Pike co.

Cyn'thins, and **Cyn'thia**, *n.* (*Myth.*) Surnames given by the ancient poets to Apollo and Artemis: from *Cynthus*, a mountain of the island of Delos, on which they are said to have been born.

Cyopho'ria, *n.* [From Gr. *kyos*, a foetus, and *phero*, I carry.] (*Med.*) Pregnancy.

Cypera'ceæ, *n. pl.* (*Bot.*) An order of plants, alliance *Glumales*. DIAG. Whole leaf-sheaths, a one-celled ovary, and an embryo enclosed within the base of the albumen. — They are grass-like herbs, growing in tufts and never acquiring a shrubby condition, and found especially in marshes, ditches, and the neighborhood of running streams. Although closely allied to the *Graminaceæ* (grasses), the plants of this order are of little use to man, their seeds being deficient in those nutritive qualities which render the seeds of the cereals so valuable. The rhizomes, tubers, or corms, of some species of the typical genus *Cyperus*, were formerly employed in medicine as aromatic tonics and astringents. When boiled or roasted, some of these corms are edible, especially those of the Chufa, *C. esculentus*.

Cypera'ceous, *a.* (*Bot.*) Belonging to the *Cyperaceæ*.

Cyperus, *n.* (*Bot.*) The typical genus of the order *CYPERACEÆ*, *q. v.*

Cypher, *n.* Same as CIPHER, *q. v.*

Cyphonism, *n.* [Gr. *kyphonismos*.] The practice of smearing the body of a criminal with honey as a bait to insects; — a mode of punishment pursued in ancient times.

Cypra'idæ, *n. pl.* (*Zoöl.*) A family of Gasteropod molluscs, called also *Coueries*, remarkable for the brilliant colors of their shells, and for the high polish of which they are susceptible. The shells of the *Cypræa* genus are generally semi-oval, having their mouth placed in the flat part; their spines are not externally visible; the aperture, or mouth, is a narrow opening, running the entire length of the shell. *C. abouad* both in the old and new world, but their greatest development, both in point of size and number of species, takes place in warm climates. The *Cypræa moneta* is well known as the current coin of the natives of Siam, Bengal, and many parts of Africa. See COWRIE.

Cyp're, in Louisiana, a P. O. of St. Mary's co.

Cyp're, [O. Fr. *cyprès*, as near as.] (*Law.*) The rule of construction applied to a will (but not to a deed) by which, when the testator evinces a particular and a general intention, and the particular intention cannot take effect, the words shall be so construed as to give effect to the general intention.

Cypress, in Kentucky, a village of Union co.

Cypress, in Missouri, a village of Scott co.

Cypress, in Tennessee, a post-office of McNairy co.

Cypress, in Wisconsin, a post-office of Kenosha co.

Cypress Bayou, in Arkansas. It forms the boundary between Hempstead and Washita cos., and enters the Little Missouri River.

Cypress Creek, in Alabama, enters the Tennessee river at Florence.

Cypress Creek, in Arkansas, unites with Cadron creek in Conway co.

Cypress Creek, in Ark., a former P. O. of Desha co.

Cypress Creek, in Ill., a former P. O. of Johnson co.

Cypress Creek, in Indiana, enters the Ohio River in Warwick co.

Cypress Dale, in Ind., a former p. o. of Vanderburgh co.

Cypress Top, in Texas, a post-office of Harris co.

Cy'press, *n.* [Fr. *cyprès*; Sp. *ciprés*; It. *cipresso*; Lat. *cupressus*.] (*Bot.*) The common name of the genus

Cupressus, *q. v.*, but more specially applied to the species *Cupressus sempervirens*, which is extensively cultivated in the East, on account of its evergreen and mournful aspect, for planting in graveyards and round tombs, and forms a most important item in the landscape of all Mohammedan cities. The tree is of a conical figure, tapering upwards with close-set branches grow-

ing upright, and greatly resembles the Lombardy poplar. Its odor was considered so balsamic, that the Eastern physicians used to send their patients troubled with lung complaint to the isle of Crete for their residence, *C.* being there very common. It is believed that *C.* is the *fir-tree* of Scripture. Its wood is very valuable when grown to a size fit for planks, which dimension it attains in as short a time as oak. It was much used by the ancients, and was employed in the original doors of St. Peter's at Rome, which, on being replaced, after 600 years, by gates of brass, were found to be perfectly free from decay, and within to have retained part of the original odor of the wood. We are not aware of the cultivation of *C.* in this country; it would succeed perfectly in the Middle and Southern States.

Cy'pressville, in Illinois, a village of Gallatin co.

Cyp'rian, (*St.*) TRASCUS CÆCILUS, (*sip'ri-an*), Bishop of Carthage, and one of the fathers of the Church. He was probably a native of Carthage, taught rhetoric there, and about 246, when nearly fifty years of age, was converted to the Christian faith. He was soon after chosen presbyter, adopted a rigidly ascetic manner of life, and was appointed bishop of Carthage in 248. When the persecution under Decius fell upon the Churches, *C.* ran away and concealed himself for nearly two years. He was then received as bishop again, but during the next persecution, under Valerianus, he was arrested and banished. After a year he was recalled, but as he refused to make the required sacrifice to the gods, he was put to death, 258. His works, consisting of letters and sermons, are of great importance for the insight they give into the beliefs, modes of thought, and practices of the early Churches. They are written in a rhetorical style, resembling that of Tertullian, whom *C.* studied and revered and was accustomed to speak of as "the master."

Cyp'rian, *n.* (*Geog.*) A native or inhabitant of the island of Cyprus.

—A courtesan; a woman of the town; a harlot.

"Jack fell foul of a gay Cyprian." — *De'foe*.

a. [From *Cyprus*, *q. v.*] Relating, or belonging to, ancient Cyprus. — Pertaining or conducing to lasciviousness; having reference to the encouragers of harlotry; as, a *Cyprian manner*.

Cyp'rine, *a.* [Lat. *cyprinus*.] Pertaining, or having reference, to cypress; as, a *cyprine grove*.

(*Min.*) Same as VESUVIANITE, *q. v.*

Cyprin'idæ, *n. pl.* (*Zoöl.*) The Carp family. They are malacopterygious, abdominal, and, for the most part, fresh-water fishes. They live on aquatic plants; and are characterized by their small mouth, and by their feeble and generally toothless jaws. They have a scaly body, no adipose fin, a stomach destitute of a *cul-de-sac*, and no pyloric cæca. The different varieties of gold and silver fish, the gudgeon, tench, bream, roach, bleak, minnow, and many other well-known pond and river fishes, belong to this family. *Cyprinus*, the common *C.* is the typical genus of the family. This well-known fish is extremely prolific, and the quantity of roe so great that it is said to have sometimes exceeded the weight of the emptied fish itself when weighed against it. The age to which the *C.* arrives is very great, and several well authenticated instances are adduced of their arriving at that of considerably more than a century; some writers, indeed, affirm that they have been known to live to the age of two hundred years. The usual length of *C.* varies from 1 to 3 feet, and in favorable waters they weigh sometimes 20 or 30 pounds. The general color is a yellowish olive, and the sides slightly tinged with a golden hue; the scales large, round, and very distinct; the head large, and the mouth furnished with a moderately long cirrus or beard; above which is a shorter one. The fins are violet-brown, except the anal, which has a reddish tinge. — The Golden Carp or

Fig. 757. — CYPRESS

(*Cypræa moneta*.)

Fig. 758. — CARP.
(*Cyprinus carpio*.)

gold-fish, *Cyprinus auratus*, common in aquaria and vases, is indigenous to China. It breeds in ponds in various parts of the U. States. — The beautiful *Leuciscus argenteus* and *atromaculatus*, known under the names of dace, cheven, chivin, and lake-chub, are from 6 to 14 inches long, and color brown. They are common in the Eastern States.

Cyprinodontidae, *n. pl.* (Zool.) A family of malacopterygious fishes, closely allied to the *Cyprinidae*, but with teeth upon the jaws. It includes the ornamental Minnow, Mummichog, or Cobbler, extensively used for bait.

Cypriot, *n.* (Geog.) A native or inhabitant of modern Cyprus.

Cypripedium, *n.* [Gr. *Kypris*, Venus, and *podion*, a slipper; from the slipper-like form of the lip.] (Bot.) The Ladies'-slipper, a genus of plants, order *Orchidaceae*. The species are chiefly distinguished by their large, very showy flowers, with large inflated lower petal or lip. The species *C. candidum*, white-flowered ladies'-slipper, *C. acaule*, acanthescent ladies'-slipper, *C. parviflorum*, yellow ladies'-slipper, are natives of this country. *C. arietinum*, the Ram's-head, found in damp woods, from Canada to Vermont, has a stem clustered, flexuous, 8–12 inches high; remarkable for the singular form of the lips, which readily suggests the name of this curious plant.

Cypriis, *n. pl.*

CYPRIDES.

(Zool.) A genus

of entomostracous

Crustacea,

containing num-

erous minute

species, having

the body enclosed

in a shell of

2 horny pieces,

somewhat re-

sembling that

of a bivalve mol-

lusc. The an-

tennae and feet

are beautifully

feathered with

long fringed

bristles, by

means of which

these animals

swim with

much vivacity.

They abound in

every pool of

stagnant water.

Their horny shells

are very abundant

in a fossil state in

the Wealden rocks

of England, in the

limestone of the

carboniferous series,

&c.

Cyprius, (Turk. *Kibris*.) a famous and considerable island, situate in the N.E. angle of the Mediterranean Sea, between Asia Minor and Syria, and once forming part of the Turkish *eyalet* or govt. of *Düzüir*, or the Islands, 44 m. S. of Cape Anamur, 65 W. of Latakia, and 330 E. of the island of Crete; between Lat. 34° 34' and 35° 42' N., and Lon. 32° 18' and 34° 37' E. In shape, this island is somewhat oval, with a considerable promontory projecting E.N.E.; greatest length 132 m.; average breadth from 30 to 35 m. It is intersected from E. to W. by a range of mountains, the highest point of which is St. Croce (anc. *Mount Olympus*); and has as its principal river the *Pedia* (anc. *Pedaeus*). The wines of *C.* (resembling Tokay) were formerly highly prized by connoisseurs; but the growth of this article has within a century diminished to an average of about 200,000 galls. Sheep and cattle are bred in considerable numbers. *C.* is said to possess veins of gold, silver, and other metals, and contains a species of rock-crystal, called *Paphos diamond*. Amianthus, or asbestos, of the finest quality, is found near *Baffa* (anc. *Paphos*).—*Manuf.* Carpets, cotton and silk fabrics, and Turkey leather.—*Prin. Towns.* Nicosia (the cap.), *Baffa*, *Larnica*, and *Cerina*.—*Pop.* 209,300; of whom 161,400 are Greeks and the remainder Mohammedans.—*Hist.* *C.* was originally peopled by the Phoenicians. It was subsequently colonized by the Greeks, and successively possessed by the Egyptians, Persians, and Romans. In antiquity, *C.* was the favorite seat of the worship of Venus, "*dives potens Cypri*." The whole island was, indeed, sacred to her; whence the epithets *Cyprian*, *Paphian*, and *Idalian*, applied to the goddess in classic verse. After the fall of the W. empire, *C.* formed part of the Byzantine power, from which it was wrested by the Saracens. Isaac, a prince of the Comneni family, next usurped the sovereignty, from which he was expelled, in 1191, by Richard I. of England, who conferred it on Guy de Lusignan, in whose family it remained for 3 centuries. On the extinction of this line, in 1480, *C.* reverted to the Venetians, whom the Turks dispossessed in 1571, after a vigorous resistance. *C.* was ceded to Gt. Britain in 1878. In 1892 it was granted a constitution with an elected council.

Cypseia, *n.* [Gr. *kypheia*, a chest.] (Bot.) See *ACHENIUM*.

Cypselidae, *n. pl.* (Zool.) See *SWIFT*.

Cyrenaic, **Cyrenian**, *a.* [Lat. *cyrenaicus*.] Relating, or pertaining to, the city of Cyrene, or to the philosophy of the Cyrenaics.

—*n.* One of the CYRENAICS, *q. v.*

Cyrenaica, **Cyrenaea**. (Anc. Geog.) The name of a district of N. Africa, nearly corresponding to the modern *BARCA*, *q. v.* Cyrene was its capital.

Cyrenaics, **Cyrenians**, *n. pl.* (Phil.) A sect of ancient philosophers, whose founder, like that of the

Cynics, had been a disciple of Socrates, being Aristippus, a native of Cyrene, in Africa, after which city his followers were called. His great maxim was, that a man ought to control circumstances, and not be controlled by them. According to him, the sum of life was made up of pleasure and pain; the one to be sought after as good, the other to be avoided as evil. The chief good, according to him, was the greatest number of agreeable perceptions; and the true philosopher was one who actively and successfully pursued pleasure. He taught that man ought to devote himself entirely to the enjoyment of the present moment, neither regretting the past nor caring for the future. Every act was regarded to be in itself morally indifferent; and only to be viewed as it produced pleasure or pain to the individual. The chief successors of Aristippus were Theodorus, Hegesias, and Anniceris, each of whom became the founder of a sect known respectively as the *Theodoran*, *Hegesian*, and *Annicerian* schools. As Cyrenaicism was the forerunner of Stoicism, so Cyrenaicism paved the way for Epicureanism, which constitutes its chief merit.

Cyrene. (Anc. Geog.) The capital of Cyrenaica, was founded by Battus and his followers from Thera, B. C. 631. Seven kings of this race succeeded, and about B. C. 450 a republic was established. It was afterwards made subject to Egypt, and passed under the dominion of Rome, B. C. 74. The ruins of this town, called *Ghrennah* by the Turks, still exist in a beautiful and fertile plain, about 11 m. from the Mediterranean Sea, and attest its former magnificence. It was the birthplace of many great men, among whom were Callimachus, Eratosthenes, Carneades, Aristippus, &c.

Cyrtilla'ceae, *n. pl.* (Bot.) A small order of plants, alliance *Berberales*, consisting of shrubs with regular symmetrical flowers having an imbricated corolla; the stamens alternating with the petals; axile placentæ; and pendulous ovules. There are 3 genera including 5 species of little importance.

Cyriol, (St.) See *ST. CYRIL*.

Cyriolog'ic, *a.* [From Gr. *kyrios*, chief, and *logos*, speech.] Pertaining to capital letters.

Cyroped'ium, or **CORUPEDIUM**. (Anc. Hist.) A place in Phrygia, where Lysimachus was defeated and slain by Seleucus, B. C. 281.

Cyrtostyle, *n.* [Gr. *kyrtos*, curved, and *stylos*, a pillar.] (Arch.) A circular projecting portico.

Cyrus, surnamed **THE ELDER**, (*sirus*.) founder of the Persian monarchy, was son of Cambyses, a Persian noble, and of Mandane, daughter of Astyages, king of Media.

His story is more than half mythical, and it is impossible to separate fact from legend. The principal exploits attributed to him are the incitement to a revolt of the Persians, and consequent defeat of Astyages and the Medes, when he became king, B. C. 559; the conquest of Lydia and capture of Croesus; the siege and capture of Babylon in 538, and the invasion of Scythia, where he was defeated and slain by Tomyris, queen of the Massagetae, 529. He was interred at Psargardæ, and his tomb was visited by Alexander the Great. Xenophon's *Cyropædia* is an ideal picture of a good and wise ruler, not an actual history of *C.*

Cyrus, surnamed **THE YOUNGER**, was son of Darius II., king of Persia, and Parysatis. In B. C. 407 he was made governor of the western provinces of Asia Minor. He was of ambitious temper, and was sentenced to death for plotting against his brother Artaxerxes on his accession to the throne, but was pardoned. Still determined to be king himself, he raised an army, including a large body of Greek mercenaries, crossed the Taurus, marched down the Euphrates, and at Cunaxa encountered the army of his brother, when he was defeated and slain, B. C. 401. Xenophon, who had served as a volunteer among the Greeks, conducted their retreat, and wrote an account of the expedition.

Cys'icus, or **CYZICUS**, a town of Asia Minor, in Natolia, S.E. of the island of Marmora, and 70 miles S.W. of Constantinople. In ancient times *C.* was seated on an island of the same name; but an isthmus has gradually formed, and what was formerly an island is now a peninsula.

Cyst, **CYSTIS**, (*sist*.) *n.* [A. S. *cyst*; D. *kist*; Ger. *kiste*, a chest, coffer, casket; Gr. *kystis*, from *kyô*, to hold, to contain.] (Med.) A pouch, or sac, without opening, and commonly of a membranous nature, which is accidentally developed in one of the natural cavities of the body, or in the substances of organs. Many theories have been successively emitted to explain the formation

of cysts, but none are entirely satisfactory. The mor formed by them is called *Encysted*.

Cyst'ic, **CYSTOSE**, *a.* [From *cyst*.] (Med.) Belong to a cyst, or to the gall-bladder. — The *C. artery* is g^d off from the right branch of the hepatic, and divides into two branches, which proceed to the gall-bladder.

Cyst'ine, *n.* (Chem.) A term applied to the *cystic acid*, a constituent of certain urinary calculi. For $C_2H_{12}N_2S_2O_4$. It is sometimes voided in the form of yellowish crystalline sand.

Cystitis, *n.* [From *cyst*.] (Med.) Inflammation of the bladder.

Cystocele, *n.* [Gr. *kystos*, and *cele*, a tumor.] (M.) A hernia or rupture formed by a protrusion of bladder.

Cystolith'ic, *a.* Relating to stone in the bladder.

Cystotomy, *n.* [Gr. *cystis*, and *tomo*, I cut.] (Sur.) The operation of cutting into the bladder for the extraction of a stone or other extraneous substance.

Cythera. See *CERIGO*.

Cytheræ'a. [Lat.] (Myth.) One of the names of Venus, from the island of Cythera, now Cerigo, where she had a well-known temple.

Cytina'ceae, *n. pl.* [From *Cytisina*, one of the genera.] (Bot.) An order of plants, alliance *Rhizogens*. D. Flowers in spikes at the end of a scaly stem, with a parted calyx, anthers opening by slits, and innumerable ovules growing over parietal placentæ. — The species chiefly inhabit the south of Europe, the Cape, and Guinea. They are very little known, and have no sensible properties of importance.

Cytisine, *n.* (Chem.) A purgative bitter principle extracted from the *Cytisus alpinus*. The poisonous principle of *Cytisus laburnum*.

Cytisus, *n.* [Lat.] (Bot.) A genus of plants, of the *Fabaceae*, of which some of the species, having 1 or 2 twiggy branches, are popularly called *Broom*, others called *Laburnum*, whilst others, still, are generally known by the name *Cytisus*. The species are numerous small trees or shrubs, with leaves of three leaflets, yellow, white, or purple flowers, natives chiefly of warmer temperate parts of the Old World. Many of them are very beautiful, and some are among the esteemed ornaments of our shrubberies, as others of our green-houses.

Cytoblast, *n.* [From Gr. *kyo*, I hold, and *blast*, a sprout.] (Physiol.) The nucleus, cellule, or centre of simulative force, from which the organic cell is developed.

Cytoblast'ema, *n.* [From *cytoblast*.] (Physiol.) A structureless substance in which the elementary nuclei, or cytoblasts are imbedded.

zæ'ki, **THADDËUS**, a Polish statesman and author, 1765. His most important work is a *Treatise on the Laws of Poland and Lithuania*. D. 1813.

Czar, **Tsar**, **Tzar**, (*zâr*.) *n.* [Slav.; Russ. *tsar*; *tsar*, *tsar*, from Lat. *Cæsar*.] A king; a chief; a monarch; — specifically, the title assumed by the Russian emperors. Voltaire considers this title to have been derived from the *tzars* or *tchars* of the kingdom of Kazan. Ivan II. (1533–1584) was the first Russian monarch who assumed the title.

Czarina, (*zâr-rë'na*.) *n.* [Russ. *tsaritsa*.] The title of Empress of Russia, as wife of the *Czar*.

Czar'ian, *a.* Pertaining or relating to the *Czar*.

Czar'ish, *a.* Belonging, or having relation to, the *Czar* of Russia.

Czar'owitz, **Czar'ovitch**, **Czar'owitch**. [Russ. *tsarowitch*.] The title given to the heir of the Russian monarchy.

Czartoryski, **ADAM**, **PRINCE**, (*châr-to-ris'ki*.) a prominent actor in the Polish revolution of 1830, B. at Warsaw in 1770. When the revolution broke out, he devoted all his energies to the service of his country. As president of the provisional government, he summoned the Diet to meet in December, and in the following month was placed at the head of the national government. He resigned his post on the terrible days of August 15 and 16, and served as a common soldier during the last fruitless struggle. He was excluded from the amnesty of 1831, and his estates in Poland confiscated. His latter years were spent in Paris, where he d. in 1861.

Czaslau, a village near Chitissitz, in Bohemia, 3 m. from Prague. Here the Austrians, led by Prince Charles of Lorraine, encountered the Prussians, May 1742, (O. S.) After a hard-fought battle they were compelled to retire, which they did in good order, carrying away 14 standards, two pairs of colors, and 1,000 prisoners. The Prussians, commanded by Frederick, took 18 pieces of cannon, two pairs of colors, and 300 prisoners.

Czeg'led, a town of Hungary, between the Danube and the Theiss, co. Pesth, 39 m. S.E. of Pesth. (1895) 27,854.

Czer'mak, (**JOHN NEPUMUK**.) a German physiologist and physician, B. at Prague, 1825. professor of physiology at Jena. *C.* is the inventor and introducer of the laryngoscope and rhinoscope, and of a new method for the apical and surgical treatment of diseases of the glottis and throat. His work *Der Kehlkopf und seine Verwerthung für Physiologie und Medicin*, has been translated and published in France, England, America, and Holland.

Czernowitz, or **TCHERNOWITZ**, (*tchair-no'veetz*.) a town of the Austrian empire, on the Pruth, 140 m. N. of Jassy. It has manufactures of jewelry and carriage wheels, and a pop. of 59,206 in 1895.

Czer'ny, **GEORGE**. See *SERVIA*.

(From an Assyrian Sculpture.)

C.—SECTION II.

CABB

abanet', ALEXANDER, artist, b. at Montpellier, France, Nov. 28, 1823. In 1845 he won the Grand Prize of Rome, and subsequently was for many years one of the professors of painting in the École des Beaux-Arts, his pupils including some of the most famous French artists. Several of his paintings are in American collections, including the *Death of Moses*, in the Corcoran Gallery, and the portrait of Miss O. L. Wolfe, in the Metropolitan Museum. The *Apotheosis of St. Louis*, the *Birth of Venus*, &c., are in the Luxembourg Gallery, Paris. He received many medals and other marks of honor. Died in Paris, Jan. 23, 1889.

abbage, n. [Fr. *cabcohe*; It. *cappuccio*, dimin. of *capo*, Lat. *caput*, head. (Agric.) The *Brassica oleracea*, or common culinary *C.*, a species of the genus *Brassica*. The innumerable varieties arise from difference of soil and cultivation; and as all the *C.* tribe form hybrids, new varieties are continually produced. This is effected by the bees, when different sorts are in flower at the same time. The pollen adheres to their bodies as they seek honey in the flowers, and being deposited on the stamens of other sorts, impregnates the germen. Hence, only one variety of *C.* should be in flower at any one time in any garden or field, when we wish to keep the sort unadulterated; particularly if some sorts have expanded leaves, and others close heads. The different sorts of *C.* most prized for the garden are chiefly divided into the close-heading and the spreading. In order to have a regular succession of *C.*, the seed should be sown at different times, from the beginning of spring to the autumn. The early sown will run to seed the same year; the later sown will increase more, produce larger and firmer heads, and will not go to seed till the next season. *C.* are generally raised first in a seed-bed: when they are intended for early produce they are sown before winter, and protected by shelter, or under glass frames. In this manner strong plants may be had early in spring, which, planted out in April, will produce fine heads by July or August. Those which are raised on a large scale are generally sown in March, and planted where they are to remain in June or July. When they have been pricked out from the seed-bed very young, and allowed to get to a good size in a piece of ground prepared for the purpose, before being finally transplanted in the field, the success is more certain, and it will well repay the additional trouble. These come to perfection in autumn, and may be taken off the ground when they are wanted. Some kinds are so hardy that they will bear the severest frosts, and remain covered with snow for a considerable time without damage. Such are the green curly-leaved *C.*, which form no close head, but consist of spreading leaves. *C.* are subject to a peculiar disease when repeatedly planted in the same ground: the bottom of the stem enlarges, and the plant comes sickly. This disease is called *clubbing*, and is caused by an insect, which deposits its eggs in the substance of the stem where it joins the root; the organization of the plant is deranged, and the *C.* never comes to perfection. The only remedy for this disease is to change the cultivation, and for a time to plant no *C.* on a ground which produces clubbed plants, but to enrich it up well, and expose it to the winter's frost in grass; quick-lime should be put on it, but no manure; other vegetables of a different class should be sown two or three years.—*Varieties.* The *C.* is of highly vegetative character, its exuberance in this respect being strongly expressed, and yielding much diversified varieties. It may be indicated by a growth of the parenchyma of the leaf, which is thrown into wavy folds, specially indicated in the common kale. In this variety, the Portugal or Tronchuda *C.*, it remains in the stem, which becomes swollen and turnip-like, of which we have an example in the kohlrabi. Its disposition becomes extreme in the Jersey *C.*, which the stem grows sometimes to a height of 10 feet, and has been used, not only for walking-sticks, but as timbers for small thatched roofs. In other cases the vegetative surplus may produce a similar development of the buds, yielding us the Brussels sprouts, or may be applied to the development of the apical bud alone, yielding the enormous "head" of cabbage. The flowering of this bud is delayed till the vegetable process is checked by the approach of winter. But in the final and most evolved variety, cauliflower, the vegetative surplus is poured into the flowering head. In consequence the flowering is partly checked, the inflorescence becomes a dense corymb instead of an open panicle, and the majority of the flowers

abort and fail to produce seed. In the case of the wrinkled and blistered Savoy, we have an example of excessive development of the leaf parenchyma; and in the Broccoli we possess a specially vegetative cauliflower, an easily grown and hardy winter variety. Thus, in the widely diversified series of variations from wild cabbage to cauliflower, we have hypertrophied arrestments of a single process, vegetative exuberance manifesting itself in one or another tissue of the plant, and being arrested elsewhere. See CRAMBE.

(Med.) *C.* a flesh-producing vegetables, whether given to man or animals; for the latter, especially milch cows, sheep and oxen, they are considered an admirable food; in the former, when imperfectly cooked, and only partaken of rarely, they are apt to produce flatulence; but these effects will soon subside if repeated for a short time, and eaten thoroughly boiled and pressed. The best way of cooking *C.*, to deprive them of all the ingredients likely to produce flatulence and indigestion, is to boil them in two waters before serving them at table.

—Cloth surreptitiously taken by a tailor or cutter-out of garments.

Cab'bage, v. a. [Du. *kabussen*, to hide as in a basket; to steal dexterously; from *kabus*, a hand-basket.] To purloin pieces of cloth in cutting out clothes.

"Your tailor, instead of shreds, cabbages whole yards of cloth."
—Arbuthnot.

—Hence, to appropriate anything unlawfully, or without the owner's consent.

—r. i. To form a head in growing; as the plants begin to cabbage.

Cabbage-Butterfly, n. (Entom.) The name given to several species of butterfly, whose larvae, known as "cabbage worms," devour the leaves of the cabbage and other cruciferous plants. The caterpillar of the large cabbage (or white) butterfly, is 1 to 1½ inch long, and so voracious that it will eat twice its weight of cabbage leaf in twenty-four hours. The *C. B.* has become naturalized in the United States, where it has proved very destructive.

Cabbage-Fly, n. (Entom.) An insect (*Anthomyia brassicae*) of the same family as the house-fly, and belonging to a very large genus, many of whose species are injurious to plants. The maggots are found in summer on the roots and lower stems of the cabbage and similar plants. Rotation of crops is probably the best method of prevention, but the pupæ may be destroyed by drawing away the earth around the roots of cabbages, while the larvae may be killed by spraying with lime water.

Cabbage-Moth, n. (Entom.) A species of moth (*Mamestra brassicae*) whose larvae attacks the leaves of the cabbage and turnip, and is sometimes very destructive. The perfect insect is of a rich mottled-brown color, with beautiful markings. The grubs may be picked from the cabbages, or their ascent prevented by making a ring in the ground with spirit of tar or gas-lime.

Cab'bling, n. (Metal.) A process in iron-smelting which may be thus described: When the cast, or pig-iron, has been subjected to the influence of a refinery, the product is called *finery*; it is then carried to the forge and smelted in a furnace with charcoal; in a short time a large ball, about 2½ cwt., is formed by working with an iron bar; this ball is then taken to a large hammer, and beaten into a flat, oval, or oblong shape, from 2 to 4 inches in thickness; this is allowed to cool, when "cabbling" commences, which is simply breaking up this flat iron into small pieces. Men are especially allocated for this operation, and are named *cabblers*. The pieces of iron thus obtained are then heated in another furnace, almost to fusion, hammered down into shape, and ultimately drawn out into bar-iron.

Cabet (ka-bā'), ETIENNE, a leading French communist, born 1788. He early entered on a forensic career at Paris, and conducted the *Journal de Jurisprudence* for some years. In 1831 he was elected a member of the Chamber of Deputies, but having been found guilty of a libel upon the king in his journal *Le Peuple*, he was, in 1834, condemned to two years' imprisonment, and a heavy fine. Preferring exile to imprisonment, he retired to England. Here he encountered the work of a kindred spirit, an imaginary Utopia, with which he was so charmed, that he appropriated some of the leading ideas, and having adapted them to the tastes of the French workmen, published them in 1842, in a little volume entitled *Voyage en Icarie*. The establishment of a social republic appears after this to have become the ruling idea of his life, and he had at last the happi-

CABL

ness of securing a grant of land in Texas, whither he, accompanied by a considerable number of emigrants, proceeded in 1848. After many hardships and difficulties, they succeeded in organizing themselves into a little community. This turning out badly, *C.* next settled at Nauvoo, in Illinois, and died at St. Louis, Mo., 1856.

Cabinda, a small Portuguese settlement on the W. coast of Africa, N. of the tract along the Congo, which belongs to the Congo Free State, and separates it from other Portuguese territory. Its capital, Cabinda, was formerly a noted slave port; now chiefly devoted to boat-building and the coast trade.

Cable, in Illinois, a village of Mercer co. Pop. 1,276.

Cable, GEORGE WASHINGTON, an American novelist, born at New Orleans, Oct. 12, 1844. Served in the Confederate army during the Civil War, after which he engaged in journalism and mercantile occupations at New Orleans until 1879, when he devoted himself wholly to literature. His novels are mainly descriptive of life in Louisiana, and illustrate Creole character and dialect. They include: *Old Creole Days*; *The Grandissimes*; *Madame Delphine*; *Dr. Serier*; &c. He also wrote essays on the condition of the colored race in the South. He gave readings from his stories in the North, and in 1897 became editor of *Current Literature*, published in New York City.

Cable, (kā'bl), n. [Fr. and Sp. *cable*; Ger. *kabel*; Heb. and Ar. *chebel*, a rope, a cord, from *chabal*, to tie or make fast.] (Naut.) Originally, that which fastens or ties; literally, and in a modern sense, the rope or chain by which a vessel is held. Cables, until within a recent period, were usually made of hemp, but of late years iron chains have come much into use. A hempen cable of twelve inches girth, and length 120 fathoms, weighs 3,075 lbs. Since the weights of two cables of equal lengths will be as their sections, or squares of the girths, it is easy to deduce the following rule for the weight of any hempen cable: multiply the square of the girth in inches by 21.3 (or 21 is near enough); the product is the weight in lbs. Since, also, as the breaking strain, or resistance against the force to part the cable, will be as the section, it will be as the weight, and will be found nearly by dividing the weights in lbs. by 100; the quotient is the breaking strain in tons. This rule is of course liable to great uncertainty from the quality, or wear of the cable. Chain cables possess great advantages over hempen cables; they are not liable to be destroyed by chafing on rocky grounds, nor to become rotten and insecure from alternate exposure to the air and water; and by reason of their greater weight, the strain is exerted on the cable rather than on the ship.

Fig. 2755.—CHAIN AND HEMP CABLES.
